I A A

Illinois Agricultural Association RECORD

I A A

Volume 1 | February 15, 1923 | Number 1

S. H. THOMPSON ELECTED I. A. A. PRESIDENT

THE RECORD TO GO TO I.A.A. MEMBERS TWICE EACH MONTH

Takes the Place of Weekly News Letter and Quarterly Publication

This is the first issue of the Illinois Agricultural Association Record in its new form.

After March 15, according to a decision of the I. A. A. Executive Committee, The Record will be sent semi-monthly, if finances permit, to all members of the Association.

The Weekly I. A. A. News Letter, which went to about 3,000 members of the Association, and [illegible]-quarterly Record, which was sent four times a year to all members, will be discontinued. This publication has taken their place.

Information to Members

The whole purpose of The Record will be to inform the members of the county farm bureaus and the I. A. A. of what has been done by their county, state and national farm bureaus and the allied co-operative marketing organizations.

The Record is your paper.

Not In Competition

The Record is not starting in any sense of the word as a competitor of the existing county farm bureau bulletins, county newspapers or state farm journals. It could never compete with these publications.

The sole purpose of The Record is to tell of the work of the I. A. A. and its allied movements.

Ever since the opening of an I. A. A. business office in the Edison Building, Chicago, with one room, a secretary and stenographer, there has been some sort of an I. A. A. publication.

(Turn to Page 3, Column 3)

Woman On Farm Shares Benefits Of Co-operation

"Many a care-worn farm wife today enjoys some of the modern conveniences by reason of the fact that you have met together and talked over your problems in common. It is necessary that you cooperate."

This was the message of Howard M. Gore, of the U. S. Department of Agriculture, before the annual meeting. Mr. Gore cited instance after instance of farm problems that were solved by co-operation rather than blind antagonism and personalities.

I. A. A. To Group All Marketing In One Division

A special co-operative marketing division of the Illinois Agricultural Association, with a salaried director in charge, is to be created, according to a decision of the I. A. A. Executive Committee at the last meeting.

The co-operative marketing division will include all the various departments of co-operative marketing now in the I. A. A. These departments will not be materially changed in scope except that they will be more united in working together in the one co-operative marketing division.

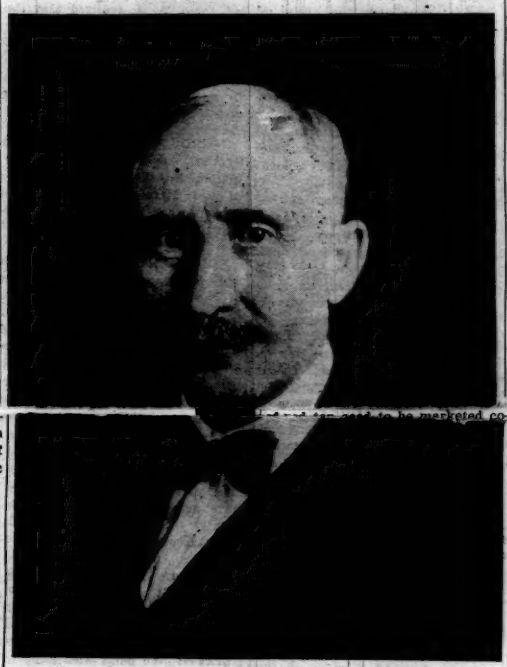
The director of the division has not yet been named.

The I. A. A. plans to concentrate its energies upon co-operative marketing more than ever in 1923, as the one greatest hope of the Illinois farmer for economic advancement.

Special Policy Committee of 4 Named by I. A. A

At the first meeting of the new executive committee was passed a motion that a special policy committee of the I. A. A., to weigh and decide upon the policies to be pursued in important questions that may arise, be appointed.

President Thompson appointed the following men as members of the committee: Howard Leonard, Eureka; Dean H. W. Mumford, Urbana; Harvey Sconce, Sidell; H. W. Danforth, Washington.



The Record Held Up By Shortage Of Print Paper

This first issue of The Record has been much delayed on account of the shortage of print paper. It had been originally planned to get out the issue as soon as possible after the annual meeting. It was found, however, that news print paper, of the sort specified to come within the budget for the publication, could not be secured at any price before March 10.

It was necessary, therefore, to get out this issue on more expensive paper. This, too, took two weeks to secure.

The next issue of The Record will appear March 15. From that time on the publication will come semi-monthly.

PRESIDENT OF I. A. A.

S. H. THOMPSON

Farmers of 29 Counties Judges of Farm Bureau

During the last two years, when the farm bureau has attracted the attention of the world, some of the most prominent men of contemporary history—President Harding, Bernard Baruch, M. Clemenceau—have praised the movement. Articles have appeared in the most prominent national magazines of the country—World's Work, The Saturday Evening Post, Colliers'—in praise of the accomplishments of the Farm Bureau. Some of the greatest economists and business men of the country have lauded the Farm Bureau.

But—with all due respect for these men and these publications—there is the opinion of another man which carries more authority.

And that is the man down on the farm!

The following are the opinions of twenty-nine farmers from as many counties which were written in letters to their county farm bureaus and published during the membership campaign of 1922:

August Lindgren, Marshall-Putnam—"No one will have to ask me to become a member of the Farm Bureau for the coming term."

R. E. Gifford, Montgomery—"The benefits from the Farm Bureau and allied organizations have more than paid my annual dues."

Peter E. Unzicker, Woodford—"I have often thought what a different country this would be if every farmer belonged to the Farm Bureau."

Herman Staffeldt, Will—"Our only hope lies in the Farm Bureau."

Walter R. Kimzey, Wabash—"No disinterested observer can compare former conditions with those of today without saying: 'Long live the Farm Bureau'!"

"A Step Backward"

Givens Bros., Brown—"It would be a step backward, surely, not to have the Farm Bureau."

H. S. Brown, Knox—"The slogan, 'Forward, Farm Bureau!,'

(Turn to Page 2, Column 1)

8 NEW MEMBERS, 7 OLD, ON I. A. A. EXECUTIVE BODY

Changes Are Made in 13th, 14th, 16th, 19th, 20th, 22nd, 24th and 25th Districts

S. H. Thompson, of Quincy, is the new president of the Illinois Agricultural Association, elected by the unanimous vote of the delegates. A. O. Eckert, of Belleville, was elected vice-president.

Eight changes were made in the Executive committee. The following is the membership of the committee as it stands for 1923, the names of new members being in boldface type.

The New Committee

[illegible] in reorganization of the [illegible] to be marketed co-

11th District, Henry McGough, Maple Park, Kane County.

12th District, C. F. Tullock, Rockford, Winnebago County.

13th District, **C. E. Bamborough**, Polo, Ogle County.

14th District, **W. H. Moody**, Port Byron, Rock Island County.

15th District, H. E. Goembel, Hoopole, Henry County.

16th District, **G. E. Reder**, Mendota, Bureau County.

17th District, F. D. Barton, Cornell, Livingston County.

18th District, C. R. Finley, Hoopeston, Vermilion County.

19th District, **D. J. Holterman**, Sadorus, Champaign County.

20th District, **Earl J. Smith**, Detroit, Pike County.

21st District, E. L. Corbin, Carlinville, Macoupin County.

22nd District, **Fred Baumberger**, Reno, Bond County.

23rd District, Carlton Trimble, Crawford County.

24th District, **Curt Anderson**, Xenia, Clay County.

25th District, **Vernon Lessley**, Sparta, Randolph County.

Election Contest

Although the election for president was, by a resolution made a unanimous vote, a contest between former President Howard Leonard and Vice President S. H. Thompson preceded.

Dean Mumford Talks On College And Farm Bureau

"If the majority of the farmers of the country learn to work together for the good of agriculture, almost anything that the farmers are justly entitled to may be secured," declared Dean H. W. Mumford of the College of Agriculture of the University of Illinois, at the close of his address before the I. A. A. annual meeting.

FARMERS' OPINIONS OF FARM BUREAU

(Continued from Page 1)

should be the cry of every member until we are one-hundred per cent members."

D. M. Brubaker, Stephenson—"The Farm Bureau is a vital force working toward the betterment of this country."

Wm. Grimes, Christian—"Every farmer ought to become a member and take an active interest in the work."

"Piece of Machinery"

M. E. Lyons, Livingston—"The Farm Bureau is one of the most efficient pieces of farm machinery ever invented—if it's used efficiently."

Chas. M. Colburn, Logan—"The Farm Bureau will help to make a better community in which to live."

W. M. Goff, Sangamon—"At this critical time when every other big business is carefully organized, we farmers, unless we are content to be virtually bondsmen to organized interests, must cooperate and organize."

"The Best Solution"

C. E. Wheelock, Lake—"The best solution we have now is through the Farm Bureau—make it strong so that farming may reach and hold its rightful place among the big industries."

Harry R. Jewell, Warren—"The Farm Bureau at $15 a year is about the best buy I know anything about."

Charles J. Webb, McDonough—"It is my firm conviction that it is the duty of every farmer to join the farm bureau."

F. A. Brewer, Whiteside—"No farmer can afford not to be a member of and a booster for the Farm Bureau."

Clair V. Golden, Rock Island—"If the Farm Bureau should cease to function, the future of the American farmer would be lost."

Helping Themselves

E. W. Newman, Union—"The Farm Bureau is made up of farmers who have begun to look out for themselves."

J. F. Cullison, Lawrence—"Join the Farm Bureau and be a booster, in order that the good work may go on."

F. M. Adams, Peoria—"The only way for farmers to get a 'square deal' is to stand together."

Saved His Dues

H. O. Moffett, Macoupin—"I have saved through Farm Bureau work more than three times the dues I have paid in."

Oscar T. Engstrom, Kane—"My advice to farmers is to co-operate with their Farm Bureau."

F. H. Clapp, Grundy—"The Farm Bureau is one of our best community assets."

D. H. Lewis, Henry—"I think the Farm Bureau is the best organization that farmers have ever had."

"Owe it to Yourself"

Herbert Beattie, Randolph—"You owe it to yourself and you owe it to your children to support the Farm Bureau."

J. E. Righter, Moultrie—"It pays to co-operate."

Elisha Lee, Mercer—"All that we have gained so far has been due to organization."

C. P. Mills, Champaign—"The only working organization which is trying to better the condition of the farmer, financially and otherwise, is the Farm Bureau."

F. D. Lahman, Lee—"With every line of business organized, down to the bootblacks, why shouldn't the farmer have a solid organization behind him?"

VOICE FOR FA... ON GRAIN BOA... URGED AT MEETIN...

Seven Resolutions are Passed By Delegates to I. A. A. Convention

A brief but important list of seven resolutions was passed at the I. A. A. annual meeting. The following men constituted the Resolutions Committee of the convention: H. E. Goembel, Carlton Trimble and J. R. Fulkerson.

The more equal distribution of the financial burden of the establishment and support of schools was urged; legislation which would prevent discrimination by the grain exchanges of the State against farmer-owned companies was recommended; the giving of greater consideration to rural communities in road construction was the subject of another resolution. The passage of laws that would provide adequate police protection free from political taint for rural people was endorsed and laws which would protect state highways from too heavy loads were favored.

Here are the resolutions as they were submitted and approved:

The Resolutions

FIRST: Realizing the economic loss and the great danger to human life resulting from the prevalence of the dread scourge of bovine tuberculosis among the livestock of the State of Illinois, we endorse the movement for the eradication of said disease as carried on by various individuals and counties co-operating with the State and Federal Government and respectfully ask the Legislature of the State of Illinois for an appropriation of $500,000 per annum for the next two years, to forward the movement of rendering the herds of livestock of the State of Illinois free from said disease and remove the menace to human life.

SECOND: We recommend that the school laws of the State of Illinois be revised to the end that the burden of the establishment, maintenance and support of the schools of the State be equitably distributed as to the various classes of property in the State and to prevent the imposition of undue burdens upon the farm lands and rural population.

THIRD: We recommend such legislation as will prevent discrimination by the Grain Exchanges of the State of Illinois against farmer-owned and controlled co-operative enterprises.

State Highways

FOURTH: In the construction and maintenance of the highways of the State of Illinois, we urge that greater consideration should be given to the convenience and the welfare of rural communities, and to that end we endorse the principle of state-aid and supervision in the construction and maintenance of our highways.

FIFTH: It is with deep and sincere regret that we note the fact that death called from our midst very suddenly, Mr. Ira Withrow, delegate from Whiteside County to the Illinois Agricultural Association Convention while attending the sessions of this Convention. We desire to express our heartfelt sympathy to the bereaved family and ask that a copy of this resolution be sent to said family.

SIXTH: We point with pride to the record and the accomplishments of our retiring President, Mr. Howard Leonard, who has faithfully and efficiently discharged his duties as an officer of this association during the past seven years, and we desire to express our sincere appreciation for the tireless energy and fearless integrity with which he has conducted the duties of his office. We express our heartiest and most sincere best wishes to him and bespeak for him our hearty cooperation with him in any endeavor for the promotion of the best interests of the agriculture of the State and the Nation.

Police Protection

SEVENTH: We endorse the passage of such laws relative to police protection as will efficiently and economically provide for the rural people of the State of Illinois, adequate protection from the depradation of law violators and require that the laws be so framed as to furnish such protection and that they be free from political system of political patronage. We further favor such law as will protect the highways of the State from the undue burdening of the roads by permitting the carriage over such roads of loads beyond the capacity of the roads to sustain.

Sold" On Results, ...erely On Promises

...ricultural Association ...ends itself to ... promises, but ...

...y year the list of accomplishments of the I. A. A. amount in savings in money to the membership far more than the amount paid in. This is as it should be.

But, better yet, is the fact that the I. A. A. doesn't live upon its past record—it is always looking ahead to the future. What will be the problems of 1923? Whatever they may be, the I. A. A. will be right on the job, ready to help solve them.

The following list of accomplishments is a brief one. It doesn't represent by any means all that the I. A. A. has done during 1922. It is only a part of the results, but it serves to show what a great state-wide farmers' organization, aided by its county farm bureaus and its national farm bureau, can do with the help of a loyal membership.

Following are twenty-five of the accomplishments of 1922:

Service to Members

CLAIMS — $8,794.70 in railroad claims was collected free of charge for farm bureau members.

SPEAKERS—Speakers were furnished 165 meeting during the year.

PUBLICITY — The I. A. A. brought out, in co-operation with county farm bureaus and other individuals, 55 special editions of Illinois newspapers, containing over twelve hundred columns of articles about the I. A. A., farm bureaus and the A. F. B. F., and reaching over 300,000 readers.

ORGANIZATION—The I. A. A. co-operated with 38 county farm bureaus in putting on reorganization campaigns to resign for the next three years the memberships of 1920 which had expired, and to gain new members.

TAXATION — In co-operation with county farm bureaus the I. A. A. made exhaustive investigations into the farm tax situation which showed that the farmer had been bearing an unequitable and disproportionate part of the increased cost of state government during the last twenty years. These organizations appeared before the Illinois Tax Commission in 1921 and 1922 as the only ones which have ever represented the farmer, with a plea for equitable valuations. The Commission granted a decrease which means a saving to farmers in taxes of $557,500 for 1922.

LEGISLATIVE — The I. A. A. Legislative Committee kept closely in touch with the proposed new constitution during its formation and carefully analyzed it before recommending it to farmers. This document, which would have speeded the way to taxation justice for the farmer, was defeated by the town and city vote.

FREIGHT RATES—The I. A. A. strenuously opposed a raise in live stock freight rates proposed by the railroads, both in 1921 and 1922, which would have cost farmers of the State an estimated annual total of $750,000. The raise was prevented both years.

LEGAL—The I. A. A. maintains a legal service which aids in the drawing up of contracts and the proper organization of marketing associations. This legal service took up electric light service charge cases for members of two county farm bureaus and won a favorable decision which saved from one to two dollars a month to them.

FREIGHT CARS — The I. A. A. has helped in many counties to remedy the shortage of cars during the latter part of 1922.

FINANCE — A reserve fund of more than $50,000 to be placed in U. S. bonds and laid by for future emergencies was saved without in the least curtailing the work of the association.

Co-operative Marketing

SOY BEANS—The I. A. A., with county farm bureaus and the A. F. B. F. testified at Washington and secured tariff protection which is enabling the rapidly developing soy bean industry of Illinois to compete on equal terms with the Orient.

MILK—The I. A. A. and county farm bureaus have assisted in organization of co-operative milk marketing associations at Quincy and Rock Island, a bargaining association at Benton, and a producer-consumer organization at Waukegan. All possible aid has been given toward the reorganization of the co-operative associations in the Chicago and St. Louis districts.

CREAM — Co-operative cream marketing associations of producers have been organized with the aid of the I. A. A. and county farm bureaus at Mt. Carroll and Galena, as well as cream producers' bargaining association in Jefferson County.

LIVESTOCK—Co-operating with seven county farm bureaus, the I. A. A. organized the Peoria Live Stock Producers Association, a firm which now enjoys thirty per cent of the business at its market and which will return all commission funds above expenses of operation to its farmer owners. The I. A. A. assisted the National Live Stock Producers Association in the organization of like firms at the Chicago, Indianapolis and East St. Louis markets.

WOOL—140,000 pounds of pooled wool were sold for prices which have been estimated by county farm bureaus as averaging from four to eight cents a pound above those paid by local dealers.

POTATOES—Eight cars of potatoes were purchased for farmers

(Turn to Page 3, Column 4)

600 AT BANQUET OF ANNUAL MEETING

More than six hundred farm bureau delegates and visitors attended the banquet held on the first evening of the I. A. A. annual meeting. Every table in the huge Cameo room was filled. President O. E. Bradfute, of the American Farm Bureau Federation, and Ex-Gov. Frank O. Lowden were the speakers.

As part of the ceremony of the banquet Howard Leonard tendered his office to the President-Elect, S. H. Thompson.

"I have watched the I. A. A. grow from a small group of farmers to the great organization that it now is," said Mr. Leonard. "As I look into the faces of the people here tonight, I know that it will continue to grow."

"I feel keenly the weight of responsibility that has been placed upon me," said Mr. Thompson, in accepting the office. "I bespeak the co-operation of Illinois farmers to make the I. A. A. the greatest organization of its kind in the United States."

Q630.5
ILLA

TAX SLASH SAVES HALF A MILLION TO STATE FARMERS

$557,550 Less 1922 Taxes To Pay; Cut Follows I. A. A. Hearing

Decreases in equalized state land valuations which amount to a reduction in farm taxes of $557,550 for 1922, alone, or approximately twice the sum spent during the year by the Illinois Agricultural Association for all projects, were announced in December by the Illinois Tax Commission.

The reduction followed a hearing before the Commission at which the I. A. A. and county farm bureaus presented the statistical evidence gathered during two years as the foundation for a plea for reduced valuations.

Appeared in 1921

The I. A. A. and the county farm bureaus also appeared before the Commission in 1921 on behalf of Illinois farmers. They are the only organizations in the history of the State to represent farmers before the Commission.

It has been estimated that the reductions granted from 1921 to 1922, inclusive, amount to a saving of approximately five dollars for the average Illinois farm, or a total sum in excess of a million dollars.

A Problem, But—

Two years ago the farmer knew that he had a tax problem but he didn't know how much of a problem it was. The I. A. A. and the county farm bureaus investigated.

It was a long, slow, tiresome job, with more work than glory attached to it. It took the efforts of men trained in finance and law and statistics.

The evidence of the two years' investigation, when presented before the Commission, showed that the Illinois farmer had been bearing the largest part of the increased burden of the cost of State government during the last twenty years.

The Farmer's Share

From 1902 to 1921 the percentage of increase in "full valuations" per unit of farm lands had been more than double the corresponding increase in town and city lots. It had been more than five times the corresponding increase in railway main track and right-of-way.

From 1902 to 1921, inclusive, the increase in State full valuations of land per acre in the State as a whole amounted to 56.26 per cent in the State as a whole as compared to an increase of 24.56 per cent in town and city lots per unit, a decrease of 23.52 per cent per mile of railway second main track and an increase of 10.11 per cent in railway main track and right of way, not including buildings.

(Continued from page 4)

"Sam Can't Do It All," Is Message Of Cunningham

"Don't look for Sam Thompson or any other officer of the I. A. A. to do it all in 1923," said E. A. Cunningham, president of the U. S. Grain Growers Sales Company, in his talk before the Annual Meeting. "You'll get out of the I. A. A. just what you put into it and no more."

With just such direct frankness Mr. Cunningham outlined the grain marketing situation from the smashup of last spring down to the time when the Farm Bureau took over the wrecked machinery. He warned that the creation of adequate co-operative grain marketing machinery was a long hard job.

"The Chicago Board of Trade," he said, "refused our application for a seat, even though we complied with their rules. But you have a right on the Board of Trade even if you never buy or sell a bushel there. You ought to know how your grain is being sold. You have had the repeated statement of men on that Board that they would give us a seat if we 'came regular.' But we were refused."

All Farmers of State Gain in 1922 Tax Cut

Farmers of every county in Illinois have realized a substantial saving as the result of the reduction in land tax valuations granted last December by the Illinois Tax Commission, after the appearance of the county farm bureaus and the I. A. A. before that body in 1921 and 1922 with a plea for reduced land taxes.

Look up your county in the following alphabetical list and see how much you and your neighbors have saved in 1922 land taxes:

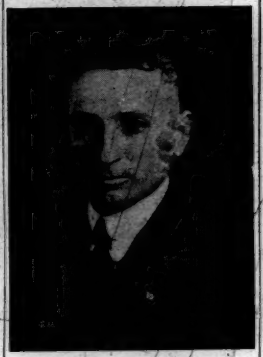
Adams, $5,791.58; Alexander, $1,002.23; Bond, $2,325.29; Boone, $2,096.52; Brown, $2,401.51; Bureau, $11,320.34; Calhoun, $1,306.87; Carroll, $4,419.35; Cass, $2,504.18; Champaign, $18,146.43; Christian, $9,423.03; Clark, $3,320.70; Clay, $1,912.39; Clinton, $2,850.92; Coles, $5,822.27; Cook, 14,468.85; Crawford, $3,244.93; Cumberland, $2,618.00; DeKalb, $7,517.39; DeWitt, $6,129.88; Douglas, $6,986.18; DuPage, $3,422.39; Edgar, $8,051.08; Edwards, $1,287.83; Effingham, $2,276.52; Fayette, $3,520.48; Ford, $7,505.21; Franklin, $2,716.13; Fulton, $8,929.89; Gallatin, $1,579.36; Greene, $4,682.67; Grundy, $5,992.19; Hamilton, $1,819.47; Hancock, $7,232.16; Hardin, $318.70; Henderson, $3,321.97; Henry, $9,597.93; Iroquois, $15,508.68; Jackson, $2,848.68; Jasper, $2,793.67; Jefferson, $2,724.50; Jersey, $1,024.86; Jo Daviess, $4,296.43; Johnson, $1,024.28; Kane, $5,855.53; Kankakee, $9,588.07; Kendall, $4,486.71; Knox, $10,086.10; Lake, $5,230.35; LaSalle, $18,447.17; Lawrence, $1,272.41; Lee, $9,177.00; Livingston, $16,357.16; Logan, $9,549.98; McDonough, $5,969.68; McHenry, $5,599.19; McLean, $10,052.72; Macon, $9,234.32; Macoupin, $7,564.42; Madison, $5,789.18; Marion, $2,571.14; Marshall, $4,497.29; Mason, $6,130.35; Massac, $874.33; Menard, $4,086.12; Mercer, $5,123.93; Monroe, $2,195.10; Montgomery, $5,412.95; Morgan, $6,903.31; Moultrie, $4,942.74; Ogle, $7,941.27; Peoria, $7,330.10; Perry, $1,448.79; Piatt, $7,011.31; Pike, $5,292.40; Pope, $834.57; Pulaski, $750.95; Putnam, $2,064.56; Randolph, $2,514.58; Richland, $1,819.87; Rock Island, $4,616.72; St. Clair, $6,547.26; Saline, $2,280.16; Sangamon, $8,485.02; Schuyler, $3,735.73; Scott, $2,096.34; Shelby, $6,881.20; Stark, $3,019.37; Stephenson, $5,262.13; Tazewell, $9,577.61; Union, $890.96; Vermilion, $12,512.40; Wabash, $1,536.56; Warren, $6,747.98; Washington, $2,713.32; Wayne, $5,195.58; White, $3,279.52; Whiteside, $7,669.31; Will, $8,992.70; Williamson, $2,702.21; Winnebago, $4,162-05; Woodford, $7,626.99.

TWO AMENDMENTS TO CONSTITUTION

Two amendments to the Constitution of the Illinois Agricultural Association were adopted at the Wednesday session of the annual meeting held by the I. A. A. The amendments were offered to the delegates by J. M. Beckett, of Blue Mound, Macon county, as chairman of the Amendments committee. A. O. Eckert, of Bellville, and Geo. F. Tullock of Rockford, served with Mr. Beckett on this committee.

Collection of Dues

The first amendment was passed by a majority vote of more than two-thirds of the voting delegates. This amendment was an addition to Article 4, Section 1 of the Constitution. The amendment was read as follows:



"When any dues from any joint membership contracts remain unpaid for six months after maturity, the contracts, together with other evidence of indebtedness, shall at the option of the Executive Committee of the Illinois Agricultural Association, be turned over to the Treasurer of the Illinois Agricultural Association for collection, and the cost of collecting prorated between the County Farm Bureau and the Illinois Agricultural Association as their interests shall appear."

President's Salary

The second amendment was also an addition. This amendment was to be added to Article 6, Section 2 of the Constitution and was carried practically unanimously. The amendment reads:

"His (the President's) compensation shall be fixed by the Executive Committee not to exceed $15.00 per diem and traveling expenses."

VICE PRESIDENT

A. O. ECKERT

THE RECORD TO GO TWICE EACH MONTH

(Continued from Page 1)

The first was a one or two page mimeographed bulletin. This was later enlarged into a four and five page multigraphed bulletin.

Then in June, 1921, came the printed I. A. A. News Letter. This was sent to a list of 2,000 which was gradually increased to more than 3,000. Late that year it was recognized that there was an urgent need of a publication to the whole membership and the Quarterly Record, a small, four-page paper, began. It was sent four times a year to the members.

Saw Greater Need

All during 1922, however, the need for more information to the members, more often, was seen. Demands for it from farmers came from all over the State.

The Publicity Committee considered the matter and recommended a publication similar to this, semi-monthly. The recommendation was approved by the Executive Committee.

Last month the Budget Committee and the 1923 Executive Committee put the stamp of their approval on the project.

Wants Illinois To Be a Leader In Co-operation

"The Farm Bureau Movement," said ex-Governor Frank O. Lowden, speaking at the annual meeting banquet, "has progressed tremendously during the past few years. It has progressed during a period of greatest distress to agriculture.

"I am unqualifiedly for co-operative marketing. As a member of the cotton growers co-operative, I am a thorough believer in the proposition of one man pooling his product with that of another to get the advantage of prices actually based on supply and demand.

"I want to see this great state of Illinois take the lead this year in co-operative enterprise."

RESULTS OF I. A. A. FOR 1922 ARE BIG

(Continued from Page 2)

in 35 counties at cost plus handling charges by an I. A. A. buyer.

BLANKETS — A total of 1,641 pairs of blankets, made of 1921 pooled wool, were sold to farmers at cost plus handling charges.

LIMESTONE—The I. A. A. investigated 44 sites in 17 counties and, reported to farmers on the possibilities for the development of farmer-owned plants; twenty-one commercial shipping plants were investigated and reported upon.

SEEDS — Together with six county farm bureaus, the I. A. A. aided in the organization of the Egyptian Seed Growers' Exchange, which during the first season pooled more than 1,100,000 pounds of red top seed to be marketed co-operatively and which secured a $50,000 loan from the War Finance Corporation.

PHOSPHATE — A reduction in phosphate freight rates which will mean a saving of $20,000 to $25,000 a year on a normal year's business was granted by the railroads, following pleas entered at various times during the year by the I. A. A.

EGGS AND POULTRY—The I. A. A., in co-operation with county farm bureaus, organized six co-operative egg and poultry marketing associations which have been doing business during the year, receiving the top prices and often above the top prices on the Chicago market. Fourteen more such associations are in process of formation.

FRUIT — Fruit shipments totalling 876 acres to 115 points in the U. S. and Canada were made during the year by the Illinois Fruit Exchange, organized in 1921 and aided in its 1922 marketing by the I. A. A. The I. A. A. was one of the prominent factors in the organization of the Federated Fruit and Vegetable Growers, Inc., which began business Jan. 1, 1923, as a national sales service organization for the fruit growers of the country.

Special Projects

CHARITY—The I. A. A. co-operated with the United Charities of Chicago, the Chicago Daily News, county farm bureau and railroads to provide two-week outings in the homes of farm bureau members for 456 slums' children of Chicago.

FLOOD AID—The I. A. A. co-operated with the Red Cross and the College of Agriculture of the State University to furnish feed to farmers stricken by the spring floods.

DECENNIAL—The I. A. A., in co-operation with the College of Agriculture, local people of DeKalb, the farm bureaus and the A. F. B. F., promoted a Farm Bureau Decennial Celebration at DeKalb, attended by 25,000, to commemorate the birth of the Illinois farm bureau movement.

A. F. B. F. RESULTS PART OF HISTORY OF THE COUNTRY

Twelve of Accomplishments For 1922 Mean Advancement of U. S. Agriculture

The farm bureau, as everybody knows, is a three-ply organization for the price of one—county, state and national.

The national farm bureau, the American Farm Bureau Federation, ranks as the largest and greatest organization of farmers ever brought together in the history of the world. With headquarters in Chicago and Washington, it includes state farm bureau organizations in 47 states of the Union.

"Sold" on Results

Like the I. A. A., the A. F. B. F. has always gone on results rather than promises. Its list of achievements during the past two years are a part of the history of the nation.

The following is a brief "dozen" of the accomplishments of the American Farm Bureau Federation for 1922:

"Got the Facts"

1. Got the facts.
2. Sold agriculture and co-operative marketing to the nation.
3. Maintained the biggest farmers' organization in the world.
4. Founded the National Live Stock Producers' Association, with co-operative commission houses at six terminal markets.
5. Founded Federated Fruit and Vegetable Growers, Inc., which established co-operative sales agencies for perishables at 150 markets.
6. Aided in reorganization of the U. S. Grain Growers, Inc.

National Marketing

7. Worked out a new plan for co-operative marketing of dairy products and demonstrated its practicability in the Chicago market.
8. Maintained wool pools and secured satisfactory tariff on wool.
9. Relieved car shortage, represented farmers in fifteen national transportation cases and saved every farmer in America an average of twenty dollars in freight bills.
10. Killed the proposed general sales tax.
11. Voiced farmers' views in the national capitol, maintained effective farm bloc and secured passage of laws legalizing co-operative marketing; eliminated speculation in grain futures and established right of co-operative to a seat on the grain exchanges; put dirt farmer on the Federal Reserve Board; prevented shifting of tax burden to agriculture; extended functions of War Finance Corporation; protected farm interests in the tariff; provided appropriations for farm-to-market roads; extended financial relief to Northwest during crop failures; extended time of payments on irrigated land; secured adequate funds for the Department of Agriculture; provided deficiency appropriations for tuberculosis eradication.
12. Maintained Farm Bureau service through ten departments.

THE I. A. A. ANNUAL MEETING AT A GLANCE

DELEGATES FROM EVERY CORNER OF STATE AT MEETING

Program of I. A. A. Annual Convention A Real Message to Farmers

Never was a more representative group of farmers gathered together in Illinois than during the two days of the Illinois Agricultural Association annual meeting in Chicago last month. From Lake County to Union and from Vermilion to Rock Island, every corner of the State had its interests represented.

There were all the way from one to 53 farmers present from the various counties which sent delegates and visitors.

Address by Mumford

The convention opened with the invocation by the Rev. Mr. Kiest, of Anna, a member of the 1922 Excutive Committee. The morning session was taken up by the reports of the president, secretary, and treasurer, and the address of Dean H. W. Mumford, of the College of Agriculture of the University of Illinois: "The College of Agriculture in Relation to the Farm Bureau."

During Wednesday afternoon addresses were given by C. B. Denman, chairman of the Board of Directors of the East St. Louis Live Stock Producers Commission Association; Hon. Howard M. Gore, U. S. Department of Agriculture; C. Larsen, Dean of the South Dakota College of Agriculture, and up to last Jan. 1 Director of Dairy Marketing for the I. A. A.

Banquet in Evening

The election of officers took up the rest of the afternoon. There was the banquet in the evening, with addresses by Ex-Gov. Frank O. Lowden and President O. E. Bradfute, of the American Farm Bureau Federation.

On Thursday morning the addresses of Hon. W. N. Ferris, U. S. Cunningham, President of the U. S. Grain Growers Sales Company, carried the session well into the noon hour.

Report on Taxation

J. C. Watson, I. A. A. Statistician gave a detailed report of the I. A. A. tax investigations, illustrated with charts, to start the afternoon meeting. Senator H. M. Dunlap, of Savoy, talked on the new state police bill which he is fostering for the coming session of the legislature.

The convention closed with the reports of committees.

Bradfute Sees Marketing As The Farm Goal

"The American farmer is the most efficient farmer in the world," said O. E. Bradfute, president of the American Farm Bureau Federation, speaking at the annual meeting, "and the Illinois farmer is a leader in that efficient class."

Mr. Bradfute stressed the importance of an immediate solution of the problems which cause such a great difference between the farmer's dollar and the dollar of other manufacturers.

"We are over-produced," he said. "We have a surplus."

Co-operative marketing, according to Mr. Bradfute, is the only way out for the farmer, and the American Farm Bureau Federation will bend every effort during 1923 to make co-operative marketing more successful than it has ever been in history.

DELEGATES TO I. A. A. ANNUAL MEETING

The following is a list of the official, accredited delegates to the annual meeting of the Illinois Agricultural Association:

ADAMS COUNTY—D. H. Myers, Mendon; Lawrence Randall, Lorain.
BOND COUNTY—W. W. Williford, Greenville; J. B. Wait, Greenville.
BOONE COUNTY — Elmer Hyde, Garden Prairie; A. B. Hammond, Belvidere.
BROWN COUNTY—Charlie Snyder, Versailles; Albert Lewis, Mt. Sterling.
BUREAU COUNTY—D. G. Reder, Mendota; Wilber Saverhill, Tiskilwa; Simon Albrecht, Tiskilwa.
CARROLL COUNTY—Albert Getz, Mt. Carroll; Chas W. Moore, Mt. Carroll.
CASS COUNTY—J. H. Taylor, Virginia; F. C. Walbaum, Ashland.
CHAMPAIGN COUNTY — Lorin Clark, Homer; W. H. Jackson, Fisher; D. J. Holtermann, Sadorus.
CHRISTIAN COUNTY—Wm. Grimes, Rosemond; Dwight Hart, Edinburg.
CLARK COUNTY—T. R. Lovett, Marshall; Albert Wright, West Union.
CLAY COUNTY — Curt Anderson, Xenia; E. L. Sunderman, Louisville.
CLINTON COUNTY—H. H. Imming, Aviston; Peter Bach, Bartelso.
COLES COUNTY—C. S. Hall, Oakland; F. F. Homan, Mattoon.
COOK COUNTY—Herman Schwake, Arlington Heights; Frank Diekmann, South Holland.
CRAWFORD COUNTY—N. F. Goodwin, Palestine; A. York, Robinson.
CUMBERLAND COUNTY—A. C. Gordon, Neoga; A. M. Pingery, Sigel.
DE KALB COUNTY—B. W. Lyon, Waterman; Geo. S. Hyde, Earlville.
DEWITT COUNTY—C. W. Thorp, Clinton; Scott Griffin, Clinton.
DOUGLAS COUNTY — Frank L. Reeder, Tuscola; Chas. McDonald, Hindsboro.
DUPAGE COUNTY—C. G. Shoger, Naperville; John K. Rathbun, Lombard.
EDGAR COUNTY—W. G. Tucker, Horace; Zeiss Gumm, Paris.
EDWARDS COUNTY—Harry Perkins, Albion; Albert Libkie; West Salem.
EFFINGHAM COUNTY—F. C. Wachel, Altmont.
FORD COUNTY—F. W. Tieken, Piper City; A. C. Thompson, Piper City.
FRANKLIN COUNTY—Matt House, Benton; H. H. Webb, Mulkeytown.
FULTON COUNTY—J. E. Mummert, Astoria; E. C. Vittum, Canton.
GALLATIN COUNTY — Geo. B. Scherrer, Shawneetown; H. H. Glasscock, Omaha.
GREENE COUNTY—Glenn Smith, Greenfield; L. R. Lee, Roodhouse.
GRUNDY COUNTY—R. W. Carper, Coal City; E. S. Cryder, Morris.
HANCOCK COUNTY—I. N. Hosford, Hamilton; W. G. Clark, Carthage; M. G. Lambert, Ferris.
HENDERSON COUNTY — C. W. Cooper, Little York; C. C. Painter, Stronghurst.
HENRY COUNTY — Robert Armstrong, Kewanee; J. A. Boomer, Atkinson; Henry Larson, Cambridge.
IROQUOIS COUNTY—G. C. Honeywell, Milford; Chas. Holtz, Buckley; W. A. Ward, Sheldon.
JACKSON COUNTY — Willard Graves, Murphysboro; Jess L. Klein, Carbondale.
JERSEY COUNTY—James C. Downey, Jerseyville; J. R. Fulkerson, Jerseyville.
JO DAVIESS COUNTY — John E. Bonnett, East Dubuque; E. F. Hunt, Hanover; Willis Vipond, Scales Mound.
JOHNSON COUNTY—W. L. Owen, Simpson.
KANE COUNTY—William I. Lye, Big Rock; D. Craft, Lily Lake.
KANKAKEE COUNTY—L. E. Suprenant, Bourbonais; Henry M. McLane, Reddick.
KENDALL COUNTY—E. L. Mattlock, Yorkville; C. G. Ricketts, Oswego.
KNOX COUNTY—Perry C. Gehring, Altona; C. E. Hartsook, McQuoin; Elmer L. Olson, Knoxville.
LAKE COUNTY—H. E. Flood, Gurnee; E. B. Jordan, Deerfield.
LA SALLE COUNTY—D. E. Stephenson, Streator; H. W. Watts, Leland; H. T. Marshall, Serena.
LEE COUNTY—M. J. Fielding, Dixon; Wm. Sandrock, Ashton.
LIVINGSTON COUNTY — Geo. L. Potter, Pontiac; J. W. Porter, Pontiac; M. C. Fonger, Odell.
LOGAN COUNTY—J. W. Rupp, Mt. Pulaski; Ralph Lanterman, Williamsville.
McDONOUGH COUNTY — J. E. Stickle, Blandinsville; I. A. Le Master, Bushnell.
McHENRY COUNTY—H. C. Gilkerson, Marengo; D. L. Thomas, Ringwood.
McLEAN COUNTY—S. M. Elkins, Bloomington; Carl Vrooman, Bloomington; Walter Tenny, McLean.
MACON COUNTY—J. C. Batchelder, Harristown; Henry Shafer, Illiopolis.
MACOUPIN COUNTY—H. J. Schultz, Shipman; J. F. Enslow, Atwater.
MADISON COUNTY—Stanley Castle, Alton; H. B. Koeller, Godfrey.
MARION COUNTY—G. R. Williams, Salem; E. Kinsey, Centralia.
MARSHALL - PUTNAM COUNTY—L. F. Boyle, Hennipin; Elmer Hunt, Henry.
MASON COUNTY—
MENARD COUNTY—L. V. Sampson, Petersburg; J. H. Behrens, Greenview.
MERCER COUNTY—Scoville Lee, Aledo; I. F. Gilmore, Aledo.
MONROE COUNTY—Phillip Bickelhaupt, Renault; Chas. Franklin, Prairie Du Rocher.
MONTGOMERY COUNTY — John Foster, Raymond; H. G. Lincoln, Witt.
MORGAN COUNTY—C. S. Black, Jacksonville; O. A. Rohrer, Waverly.
MOULTRIE COUNTY—J. A. James, Windsor; Geo. Fulk, Banthany.
OGLE COUNTY—Joseph Holmes, Monroe Center; C. E. Bamborough, Polo.
PEORIA COUNTY—Z. M. Holmes, Mossville; Chas. R. Ford, Edwards.
PIATT COUNTY—M. E. Wise, Cerro Gordo; Hugh Ruddock, Jr., Bement.
PIKE COUNTY—Chas E. Dunham, Griggsville; Geo. Stauffer, Jr., Baylis.
POPE COUNTY—Robert Clanahan, Rensbaw.
RANDOLPH COUNTY—J. C. Knott, Chester; J. V. Lessley, Sparta.
RICHLAND COUNTY—D. H. Kink, Olney.
ROCK ISLAND COUNTY — C. J. Searle, Rock Island; Homer A. Daily, Hillsdale.
ST. CLAIR COUNTY—H. H. Hartman, Freeburg; Cyril Pfeifer, O'Fallon.
SALINE COUNTY—Henry Fowler, Eldorado; C. E. Burkhardt, Raleigh.
SANGAMON COUNTY—John Stout, Chatam; W. R. Huffaker, New Berlin; C. R. Carpenter, Buffalo.
SCHUYLER COUNTY — Fred L. Camp, Huntsville; Clarence Thompson, Frederick.
SCOTT COUNTY—W. H. Robinson, Bluffs; W. H. Price, Bluffs.
SHELBY COUNTY—W. R. Boys, Shelbyville; J. W. McClellan, Trowbridge.
STARK COUNTY—David Turnbull, Neponset; E. H. Rennick, Toulon.
STEPHENSON COUNTY — L. M. Swanzey, Freeport; T. F. Ellis, Lena; H. M. Phillips, Lena.
TAZEWELL COUNTY—C. B. Wood, Delavan; R. C. Nichels, Green Valley; A. L. Robinson, Pekin.
UNION COUNTY—E. W. Newman, Anna; R. K. Loomis, Makanda.
VERMILION COUNTY—R. L. Wood, Bismarck; J. W. F. Crouch, Chenoyville.
WABASH COUNTY—John Deputy, Mt. Carmel.
WARREN COUNTY—M. S. Smith, Monmouth; Ralph Kirby, Berwick.
WAYNE COUNTY—O. W. Talbert, Fairfield.
WHITESIDE COUNTY—Ira Withrow, Erie, died; T. H. Adams, Fenton.
WILL COUNTY—Arthur States, Elwood; G. L. Francis, New Lenox.
WILLIAMSON COUNTY — Finis Grain, Carterville.
WINEBAGO COUNTY—L. A. Frisbe, Rockford; E. M. Brechenridge, Rockford.
WOODFORD COUNTY—Maj. Dora Eureka; C. E. Bonar, El Paso.

COPIES OF ANNUAL REPORT

Copies of the I. A. A. Annual Report, a 96-page booklet illustrated with photographs, will be sent upon request as long as there is a supply. This is the report given to delegates and visitors at the annual meeting.

Illinois Agricultural Association RECORD

I A A

Volume 1 | April 1, 1923 | Number 2

ILLINOIS "CO-OP" BILL BEFORE LEGISLATURE

FARM CREDIT ACT PASSED; PROVIDES BETTER FINANCING

Maximum Land Bank Loan Now $25,000; Marketing to be Aided

American organized agriculture secured one of its greatest accomplishments for the farm industry of the country when, on the last day of its session, Congress passed the Agricultural Credits Act, meeting a need which has been felt for fifty years and providing for the near future more adequate credit facilities than the farmer has ever had before in history.

Not only has the maximum Federal Land Bank loan been increased from $10,000 to $25,000 but other provisions of the act, which is a composite of several bills, insure better financing.

The American Farm Bureau Federation and the I. A. A. have always seen the need for such legislation and have been urging it for more than a year.

Wallace Statement

U. S. Secretary of Agriculture Henry C. Wallace recently issued the following statement in explanation of the workings of the new act:

"The act is divided into two parts. In the first, it provides government agencies for handling agricultural loans. In the second it authorizes the organization of private agencies under government supervision for making loans on live-stock security and on farm commodities on the way to market.

"The government loan activities will be carried on in connection with the Federal land banks. At the present time the country is divided into twelve districts, and in each of these districts there is a Federal land bank which makes

(Turn to Page Two)

1,000 In Meeting At St. Paul To Discuss Prices

Orderly marketing of farm products through well-directed organizations and immediate congressional action to stabilize prices of crops on a basis of cost of production were indorsed by delegates attending the recent Northwest Agricultural Price Stabilization conference in St. Paul, Minn. More than 1,000 farmers and business men of 12 states were present. The I. A. A. was represented at the meeting.

I. A. A. Executive Committee Meets In Springfield

The Executive Committee of the I. A. A. held its last meeting in Springfield on March 20. The meeting was planned for Springfield in order that the members of the committee might study the legislation backed by the I. A. A. and county farm bureaus during the present session of the legislature.

Transportation Next Farm Issue Before Congress

Senator Arthur Capper, chairman of the Farm Bloc, in an interview given out after the passage of the Farm Credits Act, stated that agricultural transportation would be a big issue before the next Congress.

"The farmer will not have all the relief to which he is entitled until freight rates, now too high, come down," he says.

Conferences of Advisers Set For Apr. 2-12

The spring series of Illinois farm advisers' conferences have been announced by the Extension Service of the College of Agriculture of the State University as follows:

Southern Illinois Group: Centralia, April 2 and 3.

Northern Illinois Group: Chicago, April 4 and 5.

Central Illinois Group: Decatur, April 9 and 10.

Northwestern Illinois Group: Galesburg, April 11 and 12.

April 15 Date of Next Issue of The Record

This is the second issue of the I. A. A. Record. It was announced in the first issue that a second would follow on March 15. The delay to April 1 came about as the result of the failure of a three months' supply of paper stock, ordered Feb. 10 and promised for March 1, to appear before March 16.

It is planned hereafter to issue The Record regularly on the first and fifteenth of each month. Many changes are being made in the mailing list, however, as the result of recent membership campaigns and it is possible that mistakes may be made. If you are a member of the I. A. A. and don't receive The Record, get in touch with the News Publicity Department: it is your paper.

LET'S JOIN THE PARADE!

YOUR HIRED MAN!

Of course you know what your hired man on the farm can do—you put him to work where he can help most. But—

How about your hired men in Chicago, the various departments of the I. A. A.? What can they do for you? How can you best put them to work for you?

The I. A. A. Record will start in the next issue with a series of articles which will cover every department in the association, telling how it can serve you. This issue is beginning a run of articles to tell the story of the various co-operative associations in Illinois.

Watch for these articles—they'll be in every issue.

Farmer of Lee County Also Is Real Cartoonist

The cartoon in this issue of The Record was drawn by Herbert Conner, a regular "dirt farmer," secretary of the Lee County Farm Bureau. Mr. Conner does his cartoons at home nights on the dining room table, after finishing his day's work. He is one of the strongest farm bureau boosters in the State and puts into his cartoons the gospel of farmer organization which he practices. The Record will publish more of his work.

"CO-OPS" AT YARDS TOPPING THE LIST

Five of the seven commission companies operating under the auspices of the National Live Stock Producers' Association stood in first place in volume of business handled in their respective markets during a recent week.

Companies holding first place and the cars handled were: Chicago, 310; St. Louis, 188; Indianapolis, 173; Buffalo, 170; Peoria, 40.

The Producers opened at the Kansas City yards on March 5 and netted a total of 20 cars as their first week's business.

Handling an average of over 25 per cent of the weekly market receipts, the Indianapolis Producers have stood at first place in that market each week since January 1. Their first ten weeks' business of 1923 was 2,055 cars.

Both the Chicago and Peoria Producers have stood at first place eight out of the ten weeks in their respective yards. The volume of business of the Chicago Producers was 3,082 cars, while Peoria netted 464 cars.

The St. Louis Producers have handled 1,766 cars since the beginning of 1923, having stood either first or second each week among the companies at that market.

The Buffalo Producers handled 1,271 cars during the ten weeks. No figures are on hand for the Ft. Worth market.

FARMER MARKETING UP TO LEGISLATURE IN PROPOSED BILL

Measure To Allow Agriculture Voice on Grain Exchanges Also Introduced

Two bills of great importance to organized farmers are up for consideration at this session of the Illinois Legislature. Their passage will do much to safeguard the interests of producers all over the state.

These are the Co-operative Marketing Act and the bill designed to allow admission to membership in Boards of Trade of farmers' organizations.

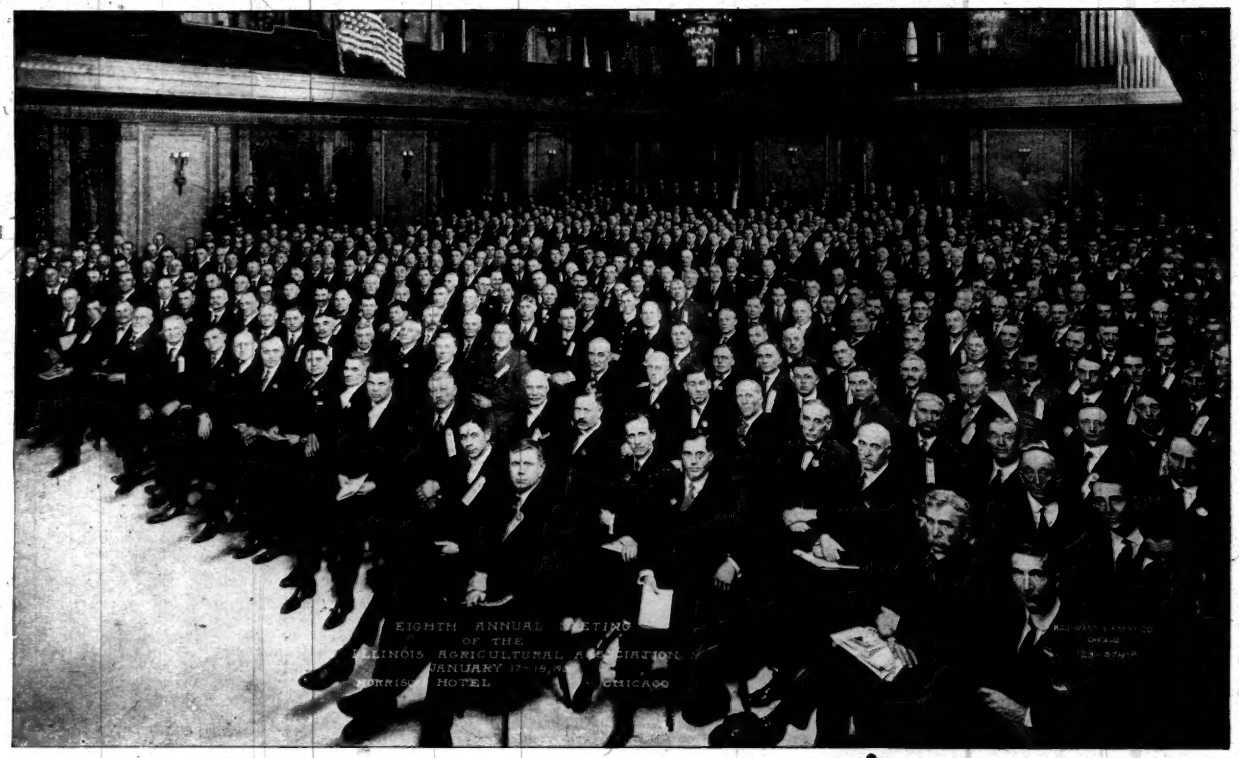
Marketing Act

The Co-operative Marketing Act, if passed, will permit farmers to pool and market their products without fear that the action will be considered a combination in restraint of trade. Almost identical acts, fostered by the Farm Bureau, have already passed in Texas, Mississippi, South Carolina, Virginia, South Dakota, Arizona, Arkansas, Alabama, North Carolina, Kansas, Idaho, Tennessee, Louisiana, Georgia, Kentucky, North Dakota, Washington, Montana, and Colorado.

The bill has passed the House in Missouri, has been reported favorably in Minnesota, and is making satisfactory progress in Ohio. It failed in Indiana due to Governor McCray's veto, after passing the Senate 43 to 0, and the House 74 to 11.

Provisions of Act

The act authorizes the formation of non-profit, co-operative associations, with or without capital stock for the purpose of encouraging the orderly marketing of agricultural products through co-operation. It aims "to make the distribution of agricultural products between producer and consumer as direct as



(Turn to Page Four)

Four Advisory Committees Meet To Shape Work

Meetings of the Phosphate-Limestone, Organization-Publicity, Dairy Marketing and Live Stock Marketing advisory committees have been held during the past month.

These meetings were for the purpose of shaping a program of work to be pursued by the various departments with the counsel of the members of the committee.

THE I. A. A. ANNUAL MEETING AT A GLANCE

DELEGATES FROM EVERY CORNER OF STATE AT MEETING

Program of I. A. A. Annual Convention A Real Message to Farmers

Never was a more representative group of farmers gathered together in Illinois than during the two days of the Illinois Agricultural Association annual meeting in Chicago last month. From Lake County to Union and from Vermilion to Rock Island, every corner of the State had its interests represented.

There were all the way from one to 53 farmers present from the various counties which sent delegates and visitors.

Address by Mumford

The convention opened with the invocation by the Rev. Mr. Kiest, of Anna, a member of the 1922 Excutive Committee. The morning session was taken up by the reports of the president, secretary, and treasurer, and the address of Dean H. W. Mumford, of the College of Agriculture of the University of Illinois: "The College of Agriculture in Relation to the Farm Bureau."

During Wednesday afternoon addresses were given by C. B. Denman, chairman of the Board of Directors of the East St. Louis Live Stock Producers Commission Association; Hon. Howard M. Gore, U. S. Department of Agriculture; C. Larsen, Dean of the South Dakota College of Agriculture, and up to last Jan. 1 Director of Dairy Marketing for the I. A. A.

Banquet in Evening

The election of officers took up the rest of the afternoon. There was the banquet in the evening, with addresses by Ex-Gov. Frank O. Lowden and President O. E. Bradfute, of the American Farm Bureau Federation.

On Thursday morning the addresses of Hon. W. N. Ferris, U. S. Cunningham, President of the U. S. Grain Growers Sales Company, carried the session well into the noon hour.

Report on Taxation

J. C. Watson, I. A. A. Statistician gave a detailed report of the I. A. A. tax investigations, illustrated with charts, to start the afternoon meeting. Senator H. M. Dunlap, of Savoy, talked on the new state police bill which he is fostering for the coming session of the legislature.

The convention closed with the reports of committees.

Bradfute Sees Marketing As The Farm Goal

"The American farmer is the most efficient farmer in the world," said O. E. Bradfute, president of the American Farm Bureau Federation, speaking at the annual meeting, "and the Illinois farmer is a leader in that efficient class."

Mr. Bradfute stressed the importance of an immediate solution of the problems which cause such a great difference between the farmer's dollar and the dollar of other manufacturers.

"We are over-produced," he said. "We have a surplus."

Co-operative marketing, according to Mr. Bradfute, is the only way out for the farmer, and the American Farm Bureau Federation will bend every effort during 1923 to make co-operative marketing more successful than it has ever been in history.

DELEGATES TO I. A. A. ANNUAL MEETING

The following is a list of the official, accredited delegates to the annual meeting of the Illinois Agricultural Association:

ADAMS COUNTY—D. H. Myers, Mendon; Lawrence Randall, Lorain.
BOND COUNTY—W. W. Williford, Greenville; J. B. Wait, Greenville.
BOONE COUNTY — Elmer Hyde, Garden Prairie; A. B. Hammond, Belvidere.
BROWN COUNTY—Charlie Snyder, Versailles; Albert Lewis, Mt. Sterling.
BUREAU COUNTY—D. G. Reder, Mendota; Wilber Saverhill, Tiskilwa; Simon Albrecht, Tiskilwa.
CARROLL COUNTY—Albert Getz, Mt. Carroll; Chas W. Moore, Mt. Carroll.
CASS COUNTY—J. H. Taylor, Virginia; F. C. Walbaum, Ashland.
CHAMPAIGN COUNTY — Lorin Clark, Homer; W. H. Jackson, Fisher; D. J. Holtermann, Sadorus.
CHRISTIAN COUNTY—Wm. Grimes, Rosemond; Dwight Hart, Edinburg.
CLARK COUNTY—T. R. Lovett, Marshall; Albert Wright, West Union.
CLAY COUNTY — Curt Anderson, Xenia; E. L. Sunderman, Louisville.
CLINTON COUNTY—H. H. Immind, Aviston; Peter Bach, Bartelso.
COLES COUNTY—C. S. Hall, Oakland; F. F. Homan, Mattoon.
COOK COUNTY—Herman Schwake, Arlington Heights; Frank Diekmann, South Holland.
CRAWFORD COUNTY—N. F. Goodwin, Palestine; A. York, Robinson.
CUMBERLAND COUNTY—A. C. Gordon, Neoga; A. M. Pingery, Sigel.
DE KALB COUNTY—B. W. Lyon, Waterman; Geo. S. Hyde, Earlville.
DEWITT COUNTY—C. W. Thorp, Clinton; Scott Griffin, Clinton.
DOUGLAS COUNTY — Frank L. Reeder, Tuscola; Chas. McDonald, Hindsboro.
DUPAGE COUNTY—C. G. Shoger, Naperville; John K. Rathbun, Lombard.
EDGAR COUNTY—W. G. Tucker, Horace; Zeiss Gumm, Paris.
EDWARDS COUNTY—Harry Perkins, Albion; Albert Libkie; West Salem.
EFFINGHAM COUNTY—F. C. Wachel, Altmont.
FORD COUNTY — F. W. Tieken, Piper City; A. C. Thompson, Piper City.
FRANKLIN COUNTY—Matt House, Benton; H. H. Webb, Mulkeytown.
FULTON COUNTY — J. E. Mummert, Astoria; E. C. Vittum, Canton.
GALLATIN COUNTY — Geo. B. Scherrer, Shawneetown; H. H. Glassecock, Omaha.
GREENE COUNTY — Glenn Smith, Greenfield; L. R. Lee, Roodhouse.
GRUNDY COUNTY—R. W. Carper, Coal City; E. S. Cryder, Morris.
HANCOCK COUNTY—I. N. Hosford, Hamilton; W. G. Clark, Carthage; M. G. Lambert, Ferris.
HENDERSON COUNTY — C. W. Cooper, Little York; C. C. Painter, Stronghurst.
HENRY COUNTY — Robert Armstrong, Kewanee; J. A. Boomer, Atkinson; Henry Larson, Cambridge.
IROQUOIS COUNTY—G. C. Honeywell, Milford; Chas. Holtz, Buckley; W. A. Ward, Sheldon.
JACKSON COUNTY — Willard Graves, Murphysboro; Jess L. Klein, Carbondale.
JERSEY COUNTY—James C. Downey, Jerseyville; J. R. Fulkerson, Jerseyville.
JO DAVIESS COUNTY — John E. Bonnett, East Dubuque; E. F. Hunt, Hanover; Willis Vipond, Scales Mound.
JOHNSON COUNTY—W. L. Owen, Simpson.
KANE COUNTY—William I. Lye, Big Rock; D. Craft, Lily Lake.
KANKAKEE COUNTY—L. E. Suprenant, Bourbonais; Henry M. McLane, Reddick.

Illinois Agricultural Association RECORD

I A A

Volume 1 | April 1, 1923 | Number 2

ILLINOIS "CO-OP" BILL BEFORE LEGISLATURE

FARM CREDIT ACT PASSED; PROVIDES BETTER FINANCING

Maximum Land Bank Loan Now $25,000; Marketing to be Aided

American organized agriculture secured one of its greatest accomplishments for the farm industry of the country when, on the last day of its session, Congress passed the Agricultural Credits Act, meeting a need which has been felt for fifty years and providing for the near future more adequate credit facilities than the farmer has ever had before in history.

Not only has the maximum Federal Land Bank loan been increased from $10,000 to $25,000 but other provisions of the act, which is a composite of several bills, insure better financing.

The American Farm Bureau Federation and the I. A. A. have always seen the need for such legislation and have been urging it for more than a year.

Wallace Statement

U. S. Secretary of Agriculture Henry C. Wallace recently issued the following statement in explanation of the workings of the new act:

"The act is divided into two parts. In the first, it provides government agencies for handling agricultural loans. In the second it authorizes the organization of private agencies under government supervision for making loans on live-stock security and on farm commodities on the way to market.

"The government loan activities will be carried on in connection with the Federal land banks. At the present time the country is divided into twelve districts, and in each of these districts there is a Federal land bank which makes

1,000 In Meeting At St. Paul To Discuss Prices

Orderly marketing of farm products through well-directed organizations and immediate congressional action to stabilize prices of crops on a basis of cost of production were indorsed by delegates attending the recent Northwest Agricultural Price Stabilization conference in St. Paul, Minn. More than 1,000 farmers and business men of 12 states were present. The I. A. A. was represented at the meeting.

I. A. A. Executive Committee Meets In Springfield

The Executive Committee of the I. A. A. held its last meeting in Springfield on March 20. The meeting was planned for Springfield in order that the members of the committee might study the legislation backed by the I. A. A. and county farm bureaus during the present session of the legislature.

Transportation Next Farm Issue Before Congress

Senator Arthur Capper, chairman of the Farm Bloc, in an interview given out after the passage of the Farm Credits Act, stated that agricultural transportation would be a big issue before the next Congress.

"The farmer will not have all the relief to which he is entitled until freight rates, now too high, come down," he says.

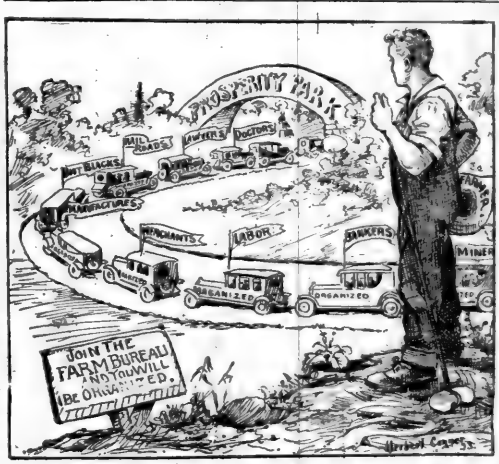
Conferences of Advisers Set For Apr. 2-12

The spring series of Illinois farm advisers' conferences have been announced by the Extension Service of the College of Agriculture of the State University as follows:

Southern Illinois Group: Centralia, April 2 and 3.

Northern Illinois Group: Chicago, April 4 and 5.

Central Illinois Group: Decatur, April 9 and 10.



Northwestern Illinois Group: Galesburg, April 11 and 12.

April 15 Date of Next Issue of The Record

This is the second issue of the I. A. A. Record. It was announced in the first issue that a second would follow on March 15. The delay to April 1 came about as the result of the failure of a three months' supply of paper stock, ordered Feb. 10 and promised for March 1, to appear before March 16.

It is planned hereafter to issue The Record regularly on the first and fifteenth of each month. Many changes are being made in the mailing list, however, as the result of recent membership campaigns, and it is possible that mistakes may be made. If you are a member of the I. A. A. and don't receive The Record, get in touch with the News Publicity Department: it is your paper.

LET'S JOIN THE PARADE!

YOUR HIRED MAN!

Of course you know what your hired man on the farm can do—you put him to work where he can help most. But—

How about your hired men in Chicago, the various departments of the I. A. A.? What can they do for you? How can you best put them to work for you?

The I. A. A. Record will start in the next issue with a series of articles which will cover every department in the association, telling how it can serve you. This issue is beginning a run of articles to tell the story of the various co-operative associations in Illinois.

Watch for these articles—they'll be in every issue.

"CO-OPS" AT YARDS TOPPING THE LIST

Five of the seven commission companies operating under the auspices of the National Live Stock Producers' Association stood in first place in volume of business handled in their respective markets during a recent week.

Companies holding first place and the cars handled were: Chicago, 310; St. Louis, 188; Indianapolis, 173; Buffalo, 170; Peoria, 40.

The Producers opened at the Kansas City yards on March 5 and netted a total of 20 cars as their first week's business.

Handling an average of over 25 per cent of the weekly market receipts, the Indianapolis Producers have stood at first place in that market each week since January 1. Their first ten weeks' business of 1923 was 2,055 cars.

Both the Chicago and Peoria Producers have stood at first place eight out of the ten weeks in their respective yards. The volume of business of the Chicago Producers was 3,082 cars, while Peoria netted 464 cars.

The St. Louis Producers have handled 1,766 cars since the beginning of 1923, having stood either first or second each week among the companies at that market.

The Buffalo Producers handled 1,271 cars during the ten weeks. No figures are on hand for the Ft. Worth market.

Farmer of Lee County Also Is Real Cartoonist

The cartoon in this issue of The Record was drawn by Herbert Conner, a regular "dirt farmer," secretary of the Lee County Farm Bureau. Mr. Conner does his cartoons at home nights on the dining room table, after finishing his day's work. He is one of the strongest farm bureau boosters in the State and puts into his cartoons the gospel of farmer organization which he practices. The Record will publish more of his work.

FARMER MARKETING UP TO LEGISLATURE IN PROPOSED BILL

Measure To Allow Agriculture Voice on Grain Exchanges Also Introduced

Two bills of great importance to organized farmers are up for consideration at this session of the Illinois Legislature. Their passage will do much to safeguard the interests of producers all over the state.

These are the Co-operative Marketing Act and the bill designed to allow admission to membership in Boards of Trade of farmers' organizations.

Marketing Act

The Co-operative Marketing Act, if passed, will permit farmers to pool and market their products without fear that the action will be considered a combination in restraint of trade. Almost identical acts, fostered by the Farm Bureau, have already passed in Texas, Mississippi, South Carolina, Virginia, South Dakota, Arizona, Arkansas, Alabama, North Carolina, Kansas, Idaho, Tennessee, Louisiana, Georgia, Kentucky, North Dakota, Washington, Montana, and Colorado.

The bill has passed the House in Missouri, has been reported favorably in Minnesota, and is making satisfactory progress in Ohio. It failed in Indiana due to Governor McCray's veto, after passing the Senate 43 to 0, and the House 74 to 11.

Provisions of Act

The act authorizes the formation of non-profit, co-operative associations, with or without capital stock for the purpose of encouraging the orderly marketing of agricultural products through co-operation. It aims "to make the distribution of agricultural products between producer and consumer as direct as

(Turn to Page Four)

Four Advisory Committees Meet To Shape Work

Meetings of the Phosphate-Limestone, Organization-Publicity, Dairy Marketing and Live Stock Marketing advisory committees have been held during the past month.

These meetings were for the purpose of shaping a program of work to be pursued by the various departments with the counsel of the members of the committee.

Illinois Agricultural Association
RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by News Publicity Department, L. J. Montross, Director.

Entry as second class matter Oct. 14, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of ten cents for subscription to the Illinois Agricultural Association Record.

OFFICERS

President, S. H. Thompson, Quincy.
Vice-President, A. O. Eckert, Belleville.
Secretary, Geo. A. Fox, Sycamore.
Treasurer, R. A. Cowles, Bloomington.

EXECUTIVE COMMITTEE By Congressional Districts

11th—Henry McGough, Maple Park.
12th—G. F. Tullock, Rockford.
13th—C. E. Bamborough, Polo.
14th—W. H. Moody, Port Byron.
15th—H. E. Goembel, Hoopole.
16th—G. E. Reder, Mendota.
17th—F. D. Barton, Cornell.
18th—C. R. Finley, Hooperston.
19th—D. J. Holterman, Sadorus.
20th—Earl J. Smith, Detroit.
21st—E. L. Corbin, Carlinville.
22nd—Fred Baumberger, Reno.
23rd—Carlton Trimble, Trimble.
24th—Curt Anderson, Xenia.
25th—Vernon Lessley, Sparta.

Directors of Departments, I. A. A. Office

General Office and Assistant to Secretary, J. D. Harper; Field Organization, J. C. Sailor; Organization Publicity, G. E. Metzger; News Publicity, L. J. Montross; Transportation, L. J. Quasey; Statistics, J. C. Watson; Finance, R. A. Cowles; Fruit and Vegetable Marketing, C. E. Durst; Live Stock Marketing, C. A. Stewart; Dairy Marketing, A. D. Lynch; Phosphate Limestone, J. R. Bent.

CONGRESS PASSES FARM CREDIT ACT

(Continued from Page 1)

land mortgage loans, these twelve banks being directed by a central Federal Farm Loan Bureau in Washington.

Credit Bank

In connection with each of these land banks there is to be established an intermediate credit bank, located in the same city with the land bank and under the supervision of the officers and directors of the land bank. The Federal government supplies each of these intermediate credit banks with a capital of not to exceed $5,000,000. These intermediate credit banks are authorized to discount farmers' notes which have been taken by banks and other financial institutions, and then can carry such notes for a term of from six months to three years. The banks may also loan direct to farmers' cooperative associations under conditions set forth in the act.

"These intermediate credit banks may issue debentures which will have back of them the farmers' notes which the banks have taken. The idea is that these debentures may be sold to people who wish a safe investment. They are exempt from taxation, just as the bonds issued by the Federal land banks are exempt. The interest charged by the intermediate credit banks may not exceed by more than one per cent the interest paid on the debentures issued, and the farmer who borrows must not be charged an interest rate of more than one and one-half per cent above the interest charged by the intermediate credit bank.

Second Division

"The second division of the act authorizes the organization, under a Federal charter, of national agricultural credit corporations, these to be organized by private capital. They will be under the supervision of the Comptroller of the Currency, just as are other national banking institutions. They must have a capital stock of at least $250,000. They may issue collateral trust debentures up to ten times their capital and surplus. Such corporations will probably be organized in the Western States where the live-stock industry is important and where now cattle loan companies are in operation.

"In addition to the provisions of the act designed to furnish the farmer much needed intermediate credit, certain changes have been made in the law under which the Federal land banks operate and in the Federal Reserve Act. Provision for the establishment of the so-called permanent organization of the twelve Federal land banks is made by providing that three out of the seven directors for each bank are to be elected by the borrowers from the bank and three are to be appointed by the Federal Farm Loan Bureau. The seventh director, who will be the president of the board, will be chosen from three persons who have received the highest nomination vote for this position by the borrowers or stockholders in the bank.

$25,000 Maximum

"Heretofore the maximum amount which might be loaned to any individual by the Federal land banks has been $10,000. This has been increased to $25,000. Also the purpose for which mortgage loans may be made has been broadened to include the repayment of any existing indebtedness.

"The Federal Reserve Act is amended by broadening the definition of what is called agricultural paper, making it include the grading and processing of agricultural products by cooperative marketing associations. Heretofore the Federal Reserve Banks have not been permitted to discount agricultural paper for a longer period than six months. This period has been increased to nine months.

State Banks

"A large number of state banks are not now members of the Federal Reserve System, some of them because their capital is not large enough to meet the requirements of the law. An amendment to the Federal Reserve Act is carried in this bill designed to encourage small banks to join the system. A bank which has capital equal only to sixty per cent of the capital required of national banks may now be admitted, if within a reasonable time the capital will be increased to correspond with the capital required of national banks.

"The life of the War Finance Corporation is extended up to February 29, 1924, the expectation being that by that date the new credit facilities provided for under this agricultural credits act will be sufficient to meet the needs.

"This Agricultural Credits Act of 1923 is one of the most important acts passed by the last Congress. It marks an earnest effort to provide the farmer with the sort of credit he must have to carry on efficiently. It is not class legislation. The results will be helpful to business in general, because the effect will be to stabilize agricultural production and marketing."

75 to 100 Lots of Seed Tested Daily By State

Seventy-five to 100 samples of seed are being received daily at the laboratory of the Illinois State Department of Agriculture. The analysis of seed is free to each individual, firm or corporation on five samples a year. A fee of fifty cents is charged for each sample in excess of this amount.

This law was passed several years ago, being one of the first pieces of legislation which the I. A. A. backed. It has resulted in a tremendous improvement in the quality of Illinois seed and the elimination of many noxious weeds that otherwise would have found their way to the farm.

I. A. A. ADVISORY COMMITTEES NAMED FOR 1923 PROGRAM

President Appoints Farmer Counselors for Eight Projects of Work

President S. H. Thompson has announced his list of selections for the various advisory committees of the I. A. A. These committees meet upon call and discuss their various phases of the work during the year, sometimes making recommendations to the executive committee.

As the result of the advisory committees each great phase of the work of the I. A. A. is given a maximum of personal study, discussion and advice. The committees for 1923 are as follows:

Finance—A. O. Eckert, Belleville; Henry McGough, Maple Park; Chas. R. Finley, Hoopeston.

Live Stock—W. H. Moody, Port Byron; Vernon Lessley, Sparta; C. E. Bamborough, Polo; Geo. F. Tullock, Rockford; C. B. Goble, Charleston; W. B. Elliott, Williamsfield.

Grain Marketing—H. E. Goembel, Hoopole; D. J. Holterman, Sadorus; Curt Anderson, Xenia; G. E. Reder, Mendota; W. A. McNeill, Chandlerville.

Fruit and Vegetable—A. O. Eckert, Belleville; Fred Baumberger, Reno; Senator H. M. Dunlap, Savoy.

Legislative — S. H. Thompson, Quincy; F. D. Barton, Cornell; A. C. Everingham, Hutsonville.

Phosphate-Limestone — F. D. Barton, Cornell; Fred Baumberger, Reno; Frank I. Mann, Gilman; H. G. Marshall, Serena.

Dairy Marketing — Henry McGough, Maple Park; Carlton Trimble, Trimble; L. E. Birdsall, Sterling; H. E. McDonough, Hampshire.

Organization-Publicity — Earl C. Smith, Detroit; E. L. Corbin, Carlinville; J. H. Checkley, Lincoln; J. M. Beckett, Blue Mound; W. B. Elliott, Williamsfield; A. C. Page, Orange Judd Farmer, Chicago; C. V. Gregory, Prairie Farmer, Chicago.

Walton Peteet, of A. F. B. F., Aids Illinois Bill

Walton Peteet, of Texas, since taking up his duties last month as director of co-operative marketing for the American Farm Bureau Federation, has been making addresses all over the country. He has been active in support of the co-operative marketing legislation now before the Illinois, Colorado, Ohio and other state legislatures similar to the laws which have already been passed in 18 states.

1923 Contract For Phosphate Soon to be Let

Negotiations are being made for letting the contracts for this year's supply of phosphate for Illinois Farm Bureau members by the Phosphate-Limestone Department of the I. A. A. It is expected that the contract will be made at an early date.

J. R. Bent, in charge of phosphate-limestone work for the I. A. A., recently attended a meeting of the Ground Rock Phosphate Producers at Nashville, Tenn., where he sounded out present conditions in the phosphate market and met many of the large producers.

Hearing Before State Senate On 'Co-op' Bill

At a hearing before the Committee of the Whole of the Senate the day after the meeting of the Executive Committee in Springfield, Walton Peteet, Director of Co-operative Marketing for the American Farm Bureau Federation, made an address showing the urgent need of a co-operative marketing law in Illinois. He explained to the legislators that co-operative marketing, the farmers' main opportunity to place his industry on a par with other great industries, was, under present Illinois laws, under a tremendous handicap.

Charles Adkins represented the president of the Illinois Farmers' Grain Dealers Association and spoke against the bill. Everett C. Brown, president of the Chicago Live Stock Exchange, Lawrence Farlow, secretary of the Illinois Farmers' Grain Dealers Association, and Secretary Culbertson, of the Illinois Grain Dealers Association, also gave brief talks in opposition.

FARM BUREAU HEADS CONFER WITH I.A.A.; DISCUSS POLICIES

Meeting Planned For More Than Year; All County Presidents Asked To Come

The presidents of all of the county farm bureaus of the State were asked to come to Chicago on the last Monday in March for an all-day conference to be held at the I. A. A. offices. Policies of a state-wide nature were to be discussed.

It had been planned for more than a year to call a meeting of this nature, to get the opinions of the heads of the various bureaus and to promote discussion of subjects and policies of a common interest. The size of the conference and the distance which some of the presidents would have to come, however, made it difficult to select a time satisfactory to all.

Marketing, finance, legislation, taxes and other subjects were to be brought up at the conference.

Illinois Pastor Real Worker for Farmer Progress

The Rev. Mr. John Acheson, pastor of the Presbyterian Church of Princeville, Peoria County, Illinois, the author of the farm bureau sermon in this issue of The Record, is one of the foremost believers in farm co-operation in the State. In addition to his pastorate and farm bureau duties, he is also agricultural editor of the Peoria Transcript.

"The Bible," says the Rev. Mr. Acheson, "is full of the greatest agricultural and co-operative messages ever given."

A FARM BUREAU SERMON

Give and it shall be given unto you; good measure, pressed down, shaken together and running over. —Luke 6:38.

By the Rev. Mr. John Acheson

THE idea of "getting by giving" is generally accepted as a churchly thought, and when one reads the text he passes it over to long-faced church folks as a very practical thing for them; but modern secular life is still so selfish and pagan in its motives and standards that such an ideal cannot apply. However, to the contrary, let us say that the very essence of the words quoted is practically workable in almost every phase of life; especially is this idea a practical one for the farmer who desires success in his business.

When he sacrifices a heavy crop of clover by plowing it under, he is working out the principle of the text—GIVING into the soil nitrogen and humus material and with the next crop from that field he GETS "good measure, pressed down, shaken together, and running over."

He attends a sale in the fall of the year where pure bred hogs are sold. He needs a herd boar. The price runs up on the good ones to the place where he thinks he can ill afford to buy, but he GIVES and the next spring and summer he watches the growth and development of his pigs, and at the co-operative marketing pens when his car-load tops the market, he realizes that he GETS in better hogs, "good measure, pressed down, shaken together, and running over."

The farmers' own business organizations, the county Farm Bureau, the I. A. A., and the A. F. B. F., cost him a little money. He is asked to GIVE $15.00 each year to support his own program, to work out a solution to the many problems confronting the business of agriculture—the biggest business in America. GIVE—he gave, a hundred thousand farmers in Illinois have given a little money each year for a few years toward this end and by reading carefully the accomplishments of the I. A. A. and the A. F. B. F. during the years of their activity, one can well appreciate the truth of and application to every phase of farm life of the very practical teachings of this scripture: "Give, and it shall be given unto you; good measure, pressed down, shaken together, and running over."

Illinois Co-operative Markets 1,052 Cars of Fruit to 24 States in 1922

One thousand and fifty-two carloads of Southern Illinois fruit, representing an aggregate market value of $600,000, found their way to market in at least 115 points in 24 states and four Canadian provinces in 1922 as the result of the activities of the Illinois Fruit Exchange.

The Illinois Fruit Exchange was organized in 1921 by county farm bureaus and the Illinois Agricultural Association, co-operating.

Little fruit was handled during the first season due to the failure of the crop, but vastly increased growth and activity were manifest last season. The exchange now comprises 19 local organizations in 10 counties of Southern Illinois, with 821 grower members. This is an increase of one-third over the membership in the spring of 1922.

Counties Organized

Counties now having locals are: Adams, St. Clair, Marion, Jefferson, Clay, Jackson, Williamson, Union, Johnson, and Pulaski.

Peaches, apples, pears, and strawberries were the fruits handled by the Exchange during the year. Apples head the list with 501 cars shipped, closely followed by peaches with 432 cars. Strawberry and pear shipments totalled 76 and 50 cars, respectively. In addition, three mixed shipments were made.

Headquarters at Centralia

Headquarters of the organization are at Centralia and it is from that office that the work of directing the car-lot sale and distribution to suitable markets takes place. General management of the Exchange is under J. B. Leeper, formerly connected with the Adams County Farm Bureau and a man with considerable practical business and banking experience.

Fruit growers who join their respective locals become members of the central organization at the same time and their entrance dues go toward the support of both bodies. Members must sign a contract pledging that all of their fruit marketed will go to the co-operative for a period of three years, after which they have the option of cancelling their contracts if they see fit.

Locals Assemble Fruit

The work of the local organizations consists of assembling the fruit of their members in car-load lots. The products are standardized under the direction of the Exchange and every precaution is taken to see that all fruit is inspected and properly graded and packed. A majority of the locals have established packing houses which include in their equipment, modern sizing machinery. After the car-load lots are ready for shipment, it is the duty of the central exchange to make the sales and route the shipments.

A national distributing organization was employed by the exchange during the past year to find markets for the fruit handled. This concern was paid on a brokerage basis. The method was found to be a better and cheaper service than for the Exchange to have established its own sales connections, especially at such an early period of its career.

"Illini" Brand Respected

Prior to 1922, Illinois fruit had a rather poor reputation on markets, largely due to poor grading methods of the growers. Through community packing houses, the Exchange has brought about progress in standardizing the fruits. Apples are graded and packed according to Illinois regulations, while other fruits are prepared for market in accordance with government standards. The "Illini" brand was stamped on the crates and boxes containing the best products, and judging from reports from the various markets, the methods of the Exchange have given Illinois fruits a high reputation.

One big reason why the Exchange succeeded so well was because of the wide distribution of products secured. Formerly it was the practice of the majority of the growers to consign to Chicago, causing a flooding of that market and consequently low prices.

In seeking the best markets for its members, the Exchange distributed its products over a large section of the United States and Canada. The accompanying map shows points to which one or more cars of "Illini" brand fruits were sold. It is easy to see that this wide distribution was responsible for the good returns secured for the members. The system kept the fruit away from poor and glutted markets and sent them to the very best ones.

Higher Prices Received

The result was that higher prices were received by the organized growers than by their unorganized neighbors. For example, in one case the growers of a community sold their strawberries through the Exchange and obtained a net average of $2.52 per crate, while a large grower in the vicinity who did not ship through the Exchange, received $1.97½ or 54½ cents less per crate.

In the case of peaches, it was found that the organized producers of one local received from 50 to 75 cents more per bushel on the average for that commodity than was the case with those marketing through other channels.

Stabilized Markets

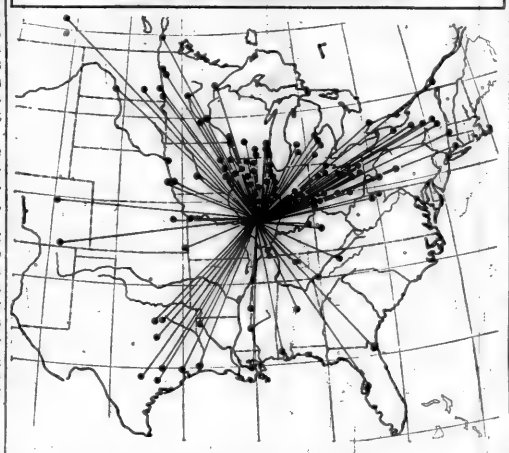
Many men familiar with the situation are of the opinion that the work of the Illinois Fruit Exchange was directly responsible for the holding up of fruit prices all over the state during 1922. By not flooding the Chicago market, that point was kept in better condition. Thus prices were stabilized throughout Illinois and members as well as non-members reaped the benefits of the Exchange.

The growers of southern Illinois are well satisfied with the results of the past season. While the profits were not large, they believe more thoroughly than ever in the co-operative idea and stand ready to see the thing through.

Growing to Increase

Illinois ranked fourth among the states in car-lot shipments of peaches in 1922. It is also one of the leading early apple states. With large plantings of peaches and apples in recent years, the state promises to occupy an important place in the fruit industry. The organization of the Exchange is therefore a timely matter in view of the improved marketing conditions it will bring about.

It has been estimated that in five years the normal peach crop of Illinois will total from 3,000 to 9,000 cars yearly. The apple production gives promise of a proportionate increase.



According to Mr. Leeper, present activities in southern Illinois indicate that the Exchange will increase greatly in membership during 1923. A strawberry growers' local has recently been formed at Metropolis, to be known as the Massac Fruit Growers. Meetings have been held and formation of more locals seems imminent at Pulaski, Oblong, Newton, Walnut Hill, and Mt. Carmel.

Officers Elected

At the annual meeting of the Illinois Fruit Exchange at Centralia, February 20, officers were elected for 1923 as follows: President, W. L. Cope, Marion county, (re-elected); vice-president, O. V. Cummins, Jefferson county; secretary, Norman W. Casper, Johnson county (re-elected); Ernest G. Kinsey, Marion county, treasurer.

These officers, together with R. K. Loomis, Union county; R. B. Endicott, Pulaski county; Frank Lanter, St. Clair county; and E. H. Barker, Union county, will constitute the Board of Directors of the year.

WHAT CO-OPERATION DOES

THIS map shows the 115 points in the United States and Canada to which the Illinois Fruit Exchange shipped carlots of fruit in 1922, the first year of active operation, as the result of co-operation. Prior to the organization of the exchange, most of the fruit was dumped on the Chicago market.

ILLINOIS "CO-OPS"

This is the first of a series of articles to appear in the I. A. A. Record on co-operative marketing organizations which have been started by the I. A. A., county farm bureaus and allied organizations. The next will be on the Peoria Live Stock Commission Association.

I. A. A. Arranges For Farm Bureau Gatepost Signs

The I. A. A. has made arrangements for the purchasing of "Member Farm Bureau" signs at the most reasonable prices yet quoted and counties who desire to furnish these their members are asked to co-operate by placing orders at once to insure the lowest quotations on quantity orders. Communications should be addressed to J. D. Harper, Office Secretary, c/o I. A. A.

There are two styles of signs, a large one with space for the member's name and a smaller one without space for name. Both signs are blue and white with a small I. A. A. map and A. F. B. F. map in either corner with the words, "Member Farm Bureau" prominently displayed.

Live Stock Men Hold Conference With the I. A. A.

A meeting of representatives of the Live Stock Marketing Department of the I. A. A. and of the Indianapolis, Peoria, Chicago and East St. Louis Live Stock Producer's Associations was held in the I. A. A. offices recently to discuss the relations between local live stock shipping associations and the farm bureaus.

While no definite action was taken it was informally agreed that the interests of both could be best served by closer working relations between the shipping associations and the farm bureaus.

"PITTSBURGH PLUS" UP TO LEGISLATORS IN WESTERN STATES

Fake Freight Charge of Steel Mills Brings Wave of Protest

"Pittsburgh Plus," for some time an I. A. A. and farm bureau issue in Illinois, is the subject of measures for appropriations being introduced before a number of state legislatures in the middle west, including Illinois.

The term, "Pittsburgh Plus" means merely the practice of steel manufacturers of making Pittsburgh, Penn., the base of their prices for various products. For instance, a man might haul steel from the mills at Gary with his own truck, yet he would be charged the $6.80 which would have been the amount of freight from Pittsburgh to Gary, had the steel been made and sent from Pittsburgh.

This imaginary freight charge, of course, goes into the pockets of the steel manufacturers.

Since the farmer is one of the largest consumers of steel products in the country — sometimes estimated to be the largest—he is paying a large part of this extortion.

The I. A. A. has passed a resolution against the "Pittsburgh Plus" practice and has always used its influence against it.

Farm Bureau At Capital Is Making U. S. History

The Washington office of the American Farm Bureau Federation, almost for the first time since it was installed, is having a breathing spell, after the adjournment of Congress several weeks ago. A breathing spell at this office merely means, however, the planning for the next session of Congress.

It was only several years ago that this office was opened in the Munsey Building, with Gray Silver, a West Virginia farmer, in charge. It was but a one-room office in those days: Mr. Silver and his secretary.

Other "Blocs"

At that time Wall Street, the manufacturers and other great lines of industry had and always had their "blocs" in Congress. The farmer had never been adequately represented, in spite of the fact that his industry is one of the greatest in the country.

One evening, however, several Congressmen met informally with Mr. Silver in the A. F. B. F. office. There was nothing secret about this meeting — a few reporters were present and joined in the discussion.

It was agreed that the farmer was desperately in need of corrective legislation to improve his condition. He had been made the "goat" of the financial let-down which followed the war.

The "Farm Bloc"

Thus was the famous "agricultural bloc" born.

For some time the name "farm bloc" was used in derision and protest. But the organization, which never was political in its lines, grew amazingly fast. The senators and representatives from the farming states learned through information presented by the American Farm Bureau Federation, the I. A. A. and state federations, the desperate condition of the farmer.

Result Is History

The result will go into every history of this period of American development: the passage of more legislation of benefit to farmers in 1921 and 1922 than had been passed in any like period since the first U. S. Congress.

Some of these laws are: the co-operative marketing act, the anti-grain gambling act, the packer and stockyards control act, the farmer-emergency tariff, the act giving farmers representation on the Federal Reserve Board, the act extending to agriculture the financial aid of the War Finance Corporation, the recent farm credits act and other legislation.

And the Washington office of the A. F. B. F. is still on the job!

Illinois Needs a New "Co-op" Marketing Law!

McHENRY FARMERS GET FACTS ABOUT LIVE STOCK 'T.B.'

County-wide Demonstration Meeting is Sequel To Months of Dispute

The climax of months of bovine tuberculosis agitation in McHenry county came at a county-wide meeting recently when several hundred dairy farmers gathered at Woodstock to witness a demsonstration and to hear authorities discuss all phases of the subject.

An indignation meeting had been held during the few weeks preceding the demonstration to combat reports that the herds of the county were badly infected with tuberculosis. Farmers and others interested were divided into two camps, one favoring an immediate campaign to clean out the plague, the other opposing a campaign, saying that it would work hardship to the farming interests of the district.

Propaganda, lack of understanding of the economic value of eradication, doubt as to the reliability of the test, and scant knowledge of how well owners were indemnified for losses, were reasons for the ill feeling.

Dr. Ausburger, a government veterinarian, conducted the demonstration. Five cattle of different ages, which had reacted to the tuberculin test, were slaughtered. All showed visible lesions of tuberculosis.

Several Addresses

Following the demonstration, several prominent authorities spoke on tuberculosis and its eradication. These included A. J. Glover, editor of Hoard's Dairyman; H. R. Smith, national live stock commissioner; Dr. A. E. White, assistant chief of the Bureau of Animal Industry; and Dr. J. J. Lintner, in charge of tuberculosis eradication work in Illinois.

The speakers showed the immense economic loss to the farmers themselves by tuberculosis. It was shown that in addition to the menace to health of people drinking milk from tuberculous cows, there are important financial reasons for eradicating the disease.

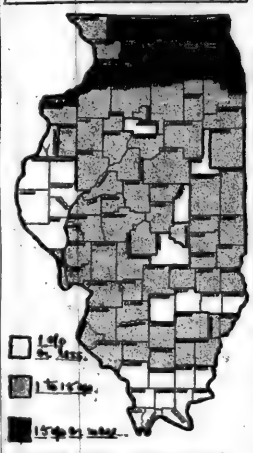
Economic Loss

Smith quoted government figures to show that 20.3 per cent of the hogs coming on the Chicago market last year showed lesions of tuberculosis, the result of infection from diseased cattle. He stated that cattle coming from counties known to be badly infected often sold for from 75 cents to a dollar less than those from cleaner districts. The packers are willing to pay a premium on stock from tested counties, he said.

Information that had spread over McHenry county to the effect that compulsory testing, with no indemnity, was desired, was combatted by Dr. Lintner, who explained the progress of the work in Illinois and how owners were indemnified by federal and state funds. He stated that testing was optional with owners.

With the strong evidence presented at the demonstration and meeting, most of the "anti" propaganda was dispelled and many of the unbelievers converted to the cause of cleaning out the plague from the herds of the county.

Two Resolutions



Two resolutions were introduced and adopted unanimously by those in attendance. The first read as follows:

"In recognition of the need of an appropriation for tuberculosis eradication, we, the farmers of McHenry County, Ill., at Woodstock assembled, March 1, 1923, urge our representatives in the legislature to make every effort possible to secure adequate funds for indemnity to reimburse owners for a part of the loss on reacting cattle slaughtered."

The second resolution called upon the county board of supervisors to appropriate funds for the carrying on of a local campaign of eradication.

Further plans for the cleanup campaign will be inaugurated at a public meeting of McHenry farmers and business men to be called within a few weeks.

THE 'T. B.' MAP

THE above map shows the estimated amount of bovine tuberculosis in the various counties of Illinois. The counties in black are those in which it is estimated that there is fifteen per cent or more of the disease among the herds; the shaded counties are those in which from one to fifteen per cent of the herds are estimated to be tuberculous; and the white counties are those which have only one per cent or less.

Forty Farm Boys Come To Chicago, Visit the I. A. A.

C. F. Baumeister, of Freeport, farm adviser of the Stephenson County Farm Bureau, brought forty boys to Chicago for an educational trip, March 29 and 30, as a part of his Farm Boys Short Course. It was planned to visit the Stock Yards and see tuberculous cattle slaughtered, also to inspect the I. A. A. and A. F. B. F.

'CO-OP' MARKETING UP TO LEGISLATURE

(Continued from Page One)

can be efficiently done and to stabilize the marketing of agricultural products."

Eleven or more persons engaged in agricultural production may organize an association, which may engage for its members in the marketing or selling, harvesting, preserving, drying, processing, canning, packing, grading, storing, shipping, or the manufacture or marketing of by-products.

The act provides that any person who maliciously and knowingly spreads false reports about association affairs shall be guilty of a misdemeanor and subject to punishment.

No stockholder may own more than one-twentieth of the common stock of the association, according to the provisions.

Associations are allowed to make contracts with members to sell for any period of time not over ten years, all or any specified part of their products.

The act is permissive in character in that it enables the organization of co-operative associations but does not interfere with the present law on organization. It does not interfere with the operation of elevators or other co-operatives organized under the present law.

Any association at present organized may be brought under the provisions of the act if it is passed.

Trade Board Act

The Board of Trade bill provides that "No associations of persons, whether incorporated or unincorporated, comprised of brokers, commission merchants, or traders, engaged in buying, selling, dealing in or exchanging grain, live stock, other agricultural products or the by-products thereof" shall discriminate in any way in the sale of its memberships or in the conferring of trading privileges against any person or association with adequate financial responsibility, and who agree to comply to all reasonable rules and conditions governing that association.

It further provides that such associations shall not make discriminatory rules against co-operative organizations of producers or prohibit them from returning to bona fide members, on a patronage basis, moneys collected in excess of expenses of such co-operative associations.

Further provisions are made for tions who are discriminated relief in the courts of organiza against. Memberships or trading privileges in Board of Trade must be conferred within thirty days after demand, according to the act, or each day of delay thereafter shall be considered a separate offense against such associations.

"T. B." Funds

The I. A. A. maintains the position on the several road bills which are to be brought up during this session of the legislature that it stands for farm-to-market roads rather than the use of all funds for cement city-to-city highways. According to the resolution passed at the annual meeting the I. A. A. is urging a $500,000 state appropriation for the eradication of bovine tuberculosis.

New Milk Plant At Rock Island Ready on May 1

Construction of the new co-operative milk marketing plant is under way at Rock Island and the directors plan to have it in operation by May 1. The building is being erected at a cost of $20,000, exclusive of equipment.

The Rock Island project is capitalized at $50,000 and is backed by the local Farm Bureau. A. D. Lynch, Director of Dairy Marketing of the I. A. A., is rendering assistance in the work.

Contracts for the installation of strictly modern equipment will be let at a very early date and a manager will also be appointed.

Two Other Laws Have Relation To Credits Act

A delegation of senators and representatives called upon U. S. Secretary of Agriculture Henry C. Wallace recently to ask him as to the relation between the new Agricultural Credits act and existing facilities, such as the War Finance Corporation and the Federal Warehouse Act. Mr. Wallace issued the following statement:

"The Agricultural Credits Act does not in any way interfere with the functioning of the War Finance Corporation. The life of the War Finance Corporation was extended to Feb. 29, 1924, for the very purpose of making sure that there should be no restriction of credit facilities to the farmer during the period needed to build up the machinery of the new credits act. The War Finance Corporation has ample funds and nothing has been done to limit its work.

"The United States Warehouse Act has an important relation to the new credit system. Originally, the law limited licensed warehouse commodities to cotton, wool, tobacco and grain. The law has been so amended as to remove limitations. Under the present act the Secretary of Agriculture can license a warehouse for the storage of any products he considers would constitute sound collateral. There should be no difficulty in making advantageous loans based upon such collateral."

I. A. A. Wool Pool Gets Ready for Shearing Season

"The sheep-shearing season will soon be upon us and we want to keep before the members of the I. A. A. the fact that every effort is being made to make the wool pool larger than ever this year," says the Livestock Marketing Department of the I. A. A.

"Prices obtained last year were gratifying and the service offered by the National Wool and Warehouse Storage Company in handling the clip and making returns exceeded all expectations.

Montana growers have pledged 75 per cent of the total clip to this year's pool and the results obtained in Wyoming are almost as large.

18 COUNTIES HOLD MEMBER CAMPAIGNS SINCE JANUARY

Greatly Hampered By Bad Roads; Dates For Four New Schools Set

Eighteen Illinois counties have instituted Farm Bureau membership reorganization campaigns during the first three months of 1923. Only one county, Williamson, has announced the completion of its campaign, the remainder not being entirely cleaned up as yet.

Fulton county stands high in members secured this year, with a total of about 1,300 announced and returns not all in.

The campaigns have been greatly hampered by weather conditions and almost impassable roads. In many counties solicitors have been obliged to give up their work for long periods due to the difficulties in travelling.

Counties which started their campaigns in January and February include Fulton, Pike, Mason, Union, Lawrence, McDonough, Lee, Hancock, DeWitt, Kendall, Menard, Williamson, Boone, and Cook.

Ogle, Adams, Morgan, and Cass counties held solicitors' schools preparatory to campaigns during the latter part of March.

Dates for schools in Madison, Ford, Stark, and Franklin counties have been set for the spring and summer months. Several more will reorganize, but have not completed the preliminary arrangements at this time.

Serum Purchasing Committee Makes Recommendations

The Serum Purchasing Committee of Five, which was appointed at the I. A. A. annual meeting, met recently to consider a contract for the handling of serum during 1923.

The committee is recommending a contract with a large serum company to furnish both serum and virus at 75 cents per cubic centimeter for the year. Based on last year's contract, this price is five cents less per cc., and will result in an estimated saving of $11,000 to the counties purchasing serum.

There are 31 county farm bureaus which have serum depots, and nine others will order serum through the contract.

Two Employes Leave Service of Association

Two employes, E. F. Murphy, of the Poultry and Egg Marketing Department, and A. O. Peterson, of the News-Publicity service, have left the I. A. A.; Mr. Murphy to take up other work and Mr. Peterson on account of serious illness. The latter's place has been taken by George Biggar, formerly of the Moline Dispatch, an instructor last year in South Dakota State College. J. D. Harper, assistant to the secretary, is temporarily taking care of Mr. Murphy's duties.

Illinois Agricultural Association RECORD

I A A

Volume 1 | April 15, 1923 | Number 3

SENATE PASSES CO-OPERATIVE MARKETING BILL

U.S.G.G. DIRECTORS APPOINT OFFICERS, DISCUSS NEW PLAN

Grain Marketing Program Going Toward Uniting of Forces

The Board of Directors of the U. S. Grain Growers, Inc., held a two-day session in the Chicago offices of the organization recently and elected officers as follows:

President, Harry L. Keefe, Walthill, Nebr.,; Vice President, Eugene Funk, Shirley, Ill.; Secretary, J. M. Mehl, Chicago, Ill. The executive committee consists of Harry L. Keefe, Chairman; R. A. Cowles (treasurer of the Illinois Agricultural Association), Bloomington, Ill.; T. I. Ferris, Pleasanthill, Ind.

New Board Member

John G. Brown, of Indiana, resigned from the Board of Directors in order to devote all of his time to his duties as president of the National Live Stock Producers Association. Marshall P. Hill, Francisville, Ind., president of the Indiana Farmers' Grain Dealers' Association, was elected in Mr. Brown's place.

Detailed statement as to the plans for the immediate future of the U. S. Grain Growers, Inc., was reserved until later but it was made known that a working plan had been agreed upon by the committee. This plan was explained to the farm bureau presidents of Illinois at their meeting a few days later by Secretary J. C. Coverdale, of the American Farm Bureau Federation.

(Continued on page 2)

Extra Copies of First Two Issues of The Record

There are several thousand copies of the first issue of The I. A. A. Record available. These will be sent in any quantity desired to any farm bureau requesting them, as long as the supply lasts. This issue is a resume of the annual meeting and of the I. A. A. and A. F. B. F. accomplishments of 1922.

An over-supply was ordered on account of the constant changes in the mailing list, due to membership campaigns.

There are also a few hundred available copies of the April 1 issue for any county farm bureau which can use them.

There have been several letters received which noted that the writer was not receiving The Record. All these names are being put on the list as rapidly as possible.

Demand For Farm Hands Over 100 Ahead of Supply

According to Chas J. Boyd, general superintendent of the Illinois Free Employment Bureau, the demand for farm help at this time is very great and the officers of the bureau throughout the state have many orders from farmers which they are unable to fill.

The Chicago office, 116 North Dearborn street, reports that orders have been placed there for over 100 farm hands with pay from $40 to $55 per month with room and board. Occasionally higher rates are offered, states Mr. Boyd, but the help does not seem to be forthcoming.

DAIRY COMMITTEE SUBMITS PLAN FOR A SALES AGENCY

Representatives of Co-operative Associations Meet in Chicago on April 9

Representatives of co-operative dairy marketing organizations from all parts of the country met at the Sherman Hotel, Chicago, April 9, to complete plans for a national sales agency to sell butter, cheese and condensed milk.

J. T. Williams, president of the Chicago Milk Producers Marketing Committee and chairman of the Committee of Nine, presided at the meeting. Walton Peteet, director of co-operative marketing for the American Farm Bureau Federation, and Aaron Sapiro, counsel of the marketing committee, addressed the meeting, explaining the plan and citing the advantages of a national sales agency for marketing dairy products.

Nucleus of Plan

The plan as presented by the committee was not complete, but was put forth as a nucleus upon which to build a national plan for co-operative marketing of manufactured dairy products. Consultation was held with representatives of dairy manufacturing associations throughout the middle west in the formulating of the plan.

Important features of the plan include the creating of a national brand for butter, the first step in a national merchandising program. While all the butter sold will be stamped with the brand name, it will also bear the name of the individual co-operative creamery manufacturing it. Through a program of national advertising, similar to that of the California fruit growers, the co-operative sales agency will strive to put the national brand name before the consumer to become as well and favorably known as the fruit growers' brands are now known.

Agencies In Cities

Agencies will be established in the principal cities to gather information and statistics relative to the dairy markets to place before the creameries in the various states belonging to the co-operative. Aid will also be given to assist the members in disposing of surplus milk and cream. Every effort will be made to create a stabilized dairy products market.

Cass County Does Fine Work; Other Campaigns Coming

An unusually fine record was made by the Cass County Farm Bureau in its reorganization campaign. One hundred per cent was made in the solicitors' school on March 28, when 181 agreements were signed. By March 31, three days later, 578 memberships were secured and turned in to the state office. This was 85 per cent of the former membership of 678. H. C. McCarrel directed the Cass campaign.

Ogle county, whose school was originally scheduled for March 19, was forced to postpone until April 4, due to the severe snow storm in that section of the state previous to the 19th.

Madison county will hold its school at Edwardsville on April 16, followed by the Bureau county school at Princeton on May 1.

Holsteins To Be Sold At Aurora April 19 and 20

The Illinois Third Guaranty State Sale of Holstein-Friesian cattle will be held at the Central States Fair Grounds, Aurora, April 19 and 20. Twenty breeders from all parts of the state have consigned about 100 high class individuals of the breed to this sale.

The sale is a co-operative enterprise on the part of Holstein breeders and is sponsored by the Illinois Holstein-Friesian Association. The many inquiries coming to the association point to more interest in the event than has been the case for several years, indicating that improved milk market and other conditions are causing a demand for pure bred foundation dairy cattle.

VOTE IS 34 TO 3 IN FAVOR OF ACT; ONE AMENDMENT

Resolution of Illinois Farm Bureau Presidents Presented to Legislature

By a majority of thirty-four to three the co-operative marketing bill passed the Senate. The opposing votes were those of Chicago senators. Every downstate member voted for it.

Six out of the nine Chicago senators, however, recorded themselves in favor of the measure.

Kill Amendment

The only opposition came two days before the passage of the bill at a hearing before the Senate. This opposition was in the form of a proposed amendment to the bill, but resulted also in censure of some of the provisions of the measure which were not up for amendment. The amendment would have changed the bill to compel co-operative marketing associations to release members from marketing contracts on a year's notice.

It was defeated 30 to 6, after some discussion.

Adopt Change

Another amendment from a Chicago senator which would have cast out several of the most vital sections of the bill was defeated.

The only amendment which was finally adopted was one brought up by Senator Mason, of Chicago, which would permit co-operative contracts to be made for any length of time instead of

(Continued on page 2)

Producers Continue To Rank High On Markets

Continued success of the Producers Live Stock Commission companies on the various markets was evidenced during the month of March.

The Chicago Producers stood first among the companies on that market for three weeks of the month and ranked second during the other week. A total of 1,130 cars of live stock was handled.

At Indianapolis, the Producers handled 740 cars, or 25.4 per cent of the total volume of business on that market in March. The company ranked first each week of the month.

Handling 762 cars, or 14.9 per cent, of the volume at the East St. Louis market, the Producers held first place for three weeks and second during the fourth week of March.

At both the Buffalo and Peoria markets, the Producers held first rank each week. A total of 570 cars, or 18.5 per cent of the volume, shows the success at Buffalo. At Peoria, 156 cars were handled during the four weeks.

Difficulties peculiar to a new establishment were experienced at Kansas City, where the Producers opened March 5. However, the company climbed from 26th place, with 24 cars, during the third week, to 15th with 35 cars, during the fourth week of the month.

General Manager Hired For Chicago Milk 'Co-op'

The Milk Producers' Marketing Company of Chicago recently announced the selection of Fred Blizzard, West Town, N. Y., as new general manager of the company.

Mr. Blizzard has had thirty-one years experience in dairy marketing work. He was for several years with the Borden company in New York as general manager and more recently has been engaged in practical dairy farming in the East. He has also been greatly interested in the building up of the successful Dairymen's League, New York, helping that co-operative work out many of its problems.

Since taking up his work with the Chicago marketing company on April 1, Mr. Blizzard has been devoting the time to a general study of the milk marketing situation in the district and in laying out plans for the growing success of the company.

With such a man with proven business ability at the head of the co-operative, the officers and directors of the company are asking the whole hearted co-operation of every producer member to rebuild the company.

Illinois Agricultural Association
RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by News Publicity Department, L. J. Montross, Director.

Entry as second class matter Oct. 19, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of ten cents for subscription to the Illinois Agricultural Association Record.

U.S.G.G. DIRECTORS APPOINT OFFICERS, DISCUSS NEW PLAN

(Continued from Page 1)

Farmers' Elevators

In general, the plan aims to make good on the grain marketing program and, to that end, to bring into proper relationship to one another the existing forces, including the local farmers' elevators, on the one hand, and the single commodity marketing organizations on the other.

The executive committee of the organization is of the opinion that the local farmers' elevators must be the basis upon which to build a grain selling organization, including ownership and control in terminal elevators and all handling facilities.

Orderly Marketing

At the same time the committee recognizes the need for special commodity organizations to direct intelligently the flow of grain through these facilities and thereby effect orderly and organized marketing. If modifications are necessary in the present plan of the U. S. Grain Growers, Inc., to bring this about, the Board of Directors will not hesitate to take the responsibility for making them.

The present administration of the U. S. Grain Growers, Inc., is adopting the policy of making no forecasts as to what is to be done, but on the contrary trying to go ahead slowly and steadily on a firm basis to work out the problem of the co-operative marketing of the farmer's grain.

The executive board of the Canadian Council of Agriculture recently visited the American Farm Bureau Federation in Chicago for the purpose of studying the farm bureau movement from top to bottom. Organized farmers in Canada are planning to model some of their work after American accomplishments.

Here's a Story of Facts and Figures: the Statistical Service of the I. A. A.

Figures and statistics make dry reading—sometimes. But there are exceptions: it was largely due to the figures and statistics dug up by the I. A. A. and county farm bureaus that farmers of Illinois read last January that they had realized a saving of more than half a million dollars in 1922 taxes for state purposes. That wasn't dry reading!

The Statistical Service of the I. A. A., or, rather, John C. Watson, Statistician, furnishes the facts and figures which must generally be had before a further step can be taken in many phases of taxation, legislation and marketing. It is no job for an amateur: it is highly specialized work which demands training and experience.

In 1920, for example, the farmer knew that in many instances he was paying too much taxes. But he couldn't prove it! Other business men could. They had their statisticians. They were able to come before the Tax Commission with the facts and figures.

But in 1921 the I. A. A. and the county farm bureaus started after the statistics and figures. They spent two years in research. They found that for twenty years the Illinois farmer had been bearing an unduly large part of the state tax burden.

Saving of $550,000

In 1921 and 1922 the I. A. A. and county farm bureaus appeared before the Illinois Tax Commission with a plea for lower farm land taxes. The result was the prevention of one-half of the contemplated raise in 1921 and a reduction in state valuations in 1922 which meant a saving of $550,000 in state land taxes for 1922 alone.

But the work of the I. A. A. in taxes is by no means ended with this. The Statistical Service is making taxation its big project for 1923.

Revaluation in 1923

The revaluation of real estate which comes every four years falls this time in the spring of 1923. Investigations of the Statistical Service show that in nearly half of the individual counties and in the state as a whole, land is now assessed at its highest point—in spite of the well-known decrease in actual values during the last few years. The same investigations show that in many counties average valuations of town and city lots are lower than they were twenty years ago in spite of the well-known raise in actual values during the last few years.

Land has lost since 1920 from 20 to 50 per cent of its sales value. Town and city lots have advanced enormously in sales value. Yet—land is assessed at its highest point and eighty per cent of lots at their average pre-war value. Obviously the farmer is paying more than his share of the cost of state government.

Facts and Figures

Under a plan proposed by the Statistical Service, investigations are now being made in 20 to 30 Illinois counties to determine the exact relationship of land to lots. It has been found in one of the counties, of chiefly town and city population, having one of the largest cities outside of Chicago, that land is assessed at 58.88 per cent of its sales value, lots at 42.80 per cent.

Translated into cold cash, land owners in this county are paying about $50,000 more than their share. In another county land owners are paying about $150,000 a year more for county and state taxes alone than they would pay if land was assessed on the same basis as town and city lots.

The Tenant, Too

The farmer who doesn't own land is also being looked after by the Statistical Service in his taxes. Records have been secured of sales which show that live stock and other farm personal property is in some instances being burdened with a full assessed valuation of from one-half to three-fourths and more of its total sales value.

How About It?

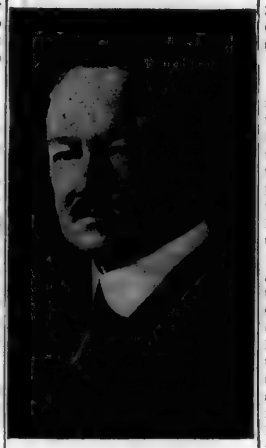
How do things stand in YOUR county? If you think you are paying more than your share, get in touch with your county farm bureau and suggest an investigation in co-operation with the I. A. A. Statistical Service. This is one of the greatest pieces of work the I. A. A. can do for your county in 1923.

This investigation must be conducted before next summer, however, or it may be too late. After the County Boards of Review act this summer, it will be difficult to get changes in valuations of real estate.

How It's Spent

Another service to your county which the I. A. A. Statistical Service plans for 1923 is the start of an investigation to find what your local and county tax money goes for.

The Statistical Service hopes to suggest and outline a plan whereby, without too much expense, an analysis of local and county expenditures can be made—not at all with the idea of seeking out possible carelessness and dishonesty of officials, but to leave to your judgment whether or not your tax money has been spent economically and wisely. You should know.



This isn't all

These two great projects do not in any sense constitute the entire work of the Statistical Service. Many other sorts of statistical investigation—in soy bean production, in the tariff, in various phases of marketing and legislation—have been made during the last two years and will be made in the future.

But during 1923 the I. A. A. Statistical Service will devote the greater portion of its time and effort to the two taxation projects outlined in this article. They are huge projects. They are probably too huge to be finished in one year or in several years. But their accomplishment, even in part, will not only let the Illinois farmer know—for the first time—just where he stands on taxes, but it should also save him an amount a great deal more in most cases than the dues he pays for any one year.

Watch the statistics—they're important!

STATISTICS

JOHN C. WATSON

John C. Watson, of the I. A. A. Statistical Service, has been in the employ of the association for three years. His life training has been such as to fit him for his investigations in statistics on behalf of Illinois farmers. He is, in addition, a farmer and farm land owner of Champaign County and knows just how it feels to send in the annual check to cover farm land taxes.

NEXT TIME

Next time—the story of the Dairy Products Marketing Department of the I. A. A. This department is one of the oldest of I. A. A. marketing departments. It has aided producers in the formation of marketing associations in almost every corner of the State. The account of its work and of what it can do for dairymen in the farm bureau will interest you. Watch for it—in the next issue.

"CO-OP" MARKETING ACT IS PASSED BY VOTE OF 34 TO 3

(Continued from Page One)

limiting them to ten years. This amendment is of little importance, however, as contracts seldom run even as long as ten years.

Chicago Support

Not only were two-thirds of the Chicago senators in favor of the measure, but the two most prominent newspapers in Chicago have given the co-operative marketing bill their editorial backing.

F. B. Resolution

A resolution, which is printed in full on page four of this issue, in favor of the co-operative marketing bill and the bill to allow farmers' organizations a seat on grain exchanges was presented to every member of the Illinois legislature on the day before the hearing on the bill. This resolution was passed by the farm bureau presidents of the state at their recent meeting with the I. A. A. in Chicago.

$25,000 for Cook County Station Passes Senate

A delegation from the Cook County Farm Bureau appeared at Springfield recently on behalf of an appropriation from the legislature for $25,000 for a truck crop experiment station in the county. The Senate appropriations committee put its O. K. on the project.

Cook County is one of the most extensive producers of truck crops in the United States.

A FARM BUREAU CREED

I am the Farm Bureau. I believe in the happiness, prosperity, and general well-being of the followers of agriculture—the world's basic industry. I am an exponent of all just methods which will enable the American farmer to obtain that happiness and prosperity which are so essential to the welfare of this great nation.

I am the Farm Bureau. Formed a few years ago, my followers now number over a million tillers of the soil in all parts of America. In my short existence I have made the organized farmer a power that is respected throughout the length and breadth of our land. My influence is felt in the halls of legislation, the centers of finance, and the nation's markets. I stand for fair legislation, for alleviation of the farmers' financial burdens, and for efficient marketing through co-operation. I strive for the economic betterment of American farming—a factor necessary to the development of all American industries.

I am the Farm Bureau. I believe in the sanctity of the soil, the basis of all prosperity. I hope to see the day when all men will regard the upkeep of the fertility of the soil as a sacred trust. I believe in improved methods of farming, better crops, purebred live stock—all of which stand for common sense and efficiency. I have faith in the boys and girls of the farm and through my program I am making them better able to meet the problems of tomorrow. I desire an organized community life—a place where farmers may work, play, and worship together. I stand for better rural schools—institutions where the children of the farm will have privileges equal to those of the city.

I am the Farm Bureau. I have a constructive program for the farmers of America—a program that cannot be accomplished in a day or a year, but which will be developed as the result of experience, education, co-operation, and hard work. My basis is sound. My principles are trustworthy. My leaders are honorable and capable—men chosen from the farms of America.

I am the Farm Bureau—the hope of the American farmer.

68,035 Head of Live Stock Received In 8 Months By Peoria Co-operative

The first result of the ratification of the plan of the Farmers' National Live Stock Marketing Committee of Fifteen, appointed in 1920 by the American Farm Bureau Federation to work out a national marketing plan, was the formation late in 1921 of the National Live Stock Producers' Association. This agency, with headquarters at Chicago, proceeded early in 1922 to establish farmer-owned and operated commission firms on the East St. Louis, Chicago and Indianapolis markets. The Illinois Agricultural Association was asked to set up a like firm on the Peoria market.

In March, 1922, an investigation of the market was conducted by the Live Stock Marketing Department of the I. A. A. Following this, a meeting of representatives of the seven counties principally interested in the Peoria market was called for the purpose of organizing a selling agency.

The Organization

As finally organized, a board of seven directors, one each from the seven counties—Peoria, Woodford, Knox, stark, Fulton, Marshall, and Tazewell—was selected by the executive committees of the various farm bureaus. Funds sufficient to establish the selling agency at Peoria were furnished the board of directors by the sale of memberships to individuals and shipping associations, and by loans from the I. A. A. and farm bureaus interested.

After selecting an experienced and capable management, the Peoria Producers' Commission Association opened for business, June 26, 1922, the fourth selling agency operating under the National Live Stock Producers' Association, previous agencies being established at East St. Louis, Indianapolis, and Chicago.

Eight Months' Growth

The following table will show the growth that has been made during the first eight months of operation of the Peoria Producers:

Month	Cars	Value
July	61	$ 81,580.98
August	74	105,[illegible].68
September	76	103,788.43
October	90	119,092.42
November	140	175,977.31
December	165	220,831.89
January	219	301,628.90
February	180	236,634.96
Total	1,004	$1,348,162.57

It will be noted that the only marked decrease in receipts occurred in February. This was caused by the almost impassable condition of the roads, hindering truck shipments. During the eight months, 593 cars, or 59.06 per cent of the total of 1,004 coming to the Peoria Producers, were shipped by truck.

Total Receipts

The total receipts during the period were 68,035 head of live stock, apportioned as follows: 2,020 cattle, 2,147 calves, 63,460 hogs, and 408 sheep. Commissions collected amounted to a total of $20,090.17.

For the last four months the Producers have stood either first or second among the seven commission firms operating on that market. Shipments to the agency are not entirely from the seven counties mentioned, some live stock being received from Mason, Logan, and McLean counties, Illinois, and from eastern Iowa territory tributary to the M. C. and St. L. R. R.

In accordance with the policy of the National Live Stock Producers' Association, the Peoria agency, while not a member of the exchange, abides by all the rules and regulations of that body, with the exception that it reserves the privilege of pro-rating to its membership all the profits that may accrue from the business.

How to Join

Membership in the Producers may be obtained in several ways. An individual may make application directly to the selling agency, may join the local shipping association which holds membership on the market, or by becoming a member of the county farm bureau, some of the counties having organized county-wide shipping associations and taken out a membership on that basis.

Members of the Board of Directors of the Peoria Producers are as follows; George Wilson, Toulon, president; W. T. Youle, Delavan, vice president; Seaton Moon, Harmon, secretary-treasurer; Sam McClugage, Peoria, chairman of board; J. F. Felter, Eureka, and B. H. Taylor, Canton.

W. R. Hembrough, formerly in the live stock commission business at East S. Louis, is manager of the Producers at Peoria, and is salesman of carlot shipments of stock. Eddie McDonough, a buyer and trader for several years on the Peoria market, takes care of the truck hog sales, while George Stemm is office manager.

Average Prices

It is a significant fact that the average prices received for hogs on the Peoria market during the period the Producers have been operating have been much nearer the average prices on the Chicago market than previously. This bears out the contention made repeatedly by live stock producers that a selling agency controlling at least 25 per cent of the receipts on the terminal market could influence favorably the prices received for their live stock.

Answers Question

The table above will answer the question so often asked—Are the sales made and the services rendered by co-operative selling agencies on a basis with those furnished by old line firms? Note the gradual increase in the Producers' business from month to month. With the live stock producer as the judge and jury, it can easily be seen that he is satisfied with the Peoria co-operative selling agency as an efficient and altogether satisfactory medium for marketing live stock. Otherwise the Peoria Producers would not have experienced the growth so evident during the first eight months of existence.

THEY'RE PATRONIZING THEIR OWN FIRM

This picture shows a line of trucks bearing Illinois live stock to the Peoria Live Stock Producers' Association, organized by the I. A. A. and county farm bureaus. A large share of the firm's business, which has amounted to nearly a million and a half dollars in eight months, is truck receipts. The farmer firm does the most business on the market.

THE GOLDEN EGG

The next co-operative movement of the I. A. A. and county farm bureaus to be taken up in the series of articles in The Record, will be the local poultry and egg co-operative shipping associations in Central Illinois which were organized last year.

I. A. A. Endeavoring To Help In Labor Shortage Problem

On another page of The Record is an item in regard to the present shortage of farm help in Illinois. The I. A. A., with a view of helping farm bureau members who must have additional labor, is endeavoring to get in touch with help that may be available for farms in the state.

If you are in need of help, fill in the blanks below and mail to Illinois Agricultural Association, 608 S. Dearborn Street, Chicago, as soon as possible.

Do you prefer a married or a single man? _____

Can you use him the year round? _____

Milk Marketing Situation in St. Louis Improved

The Milk Producers' Advisory Committee, which has been carrying on a campaign over southern Illinois and Missouri for over a month, has been meeting a splendid response from producer-creditors and stockholders of the Illinois - Missouri Co-operative Marketing Company, over 1,400 agreements having been signed up and are in the hands of creditors.

Sapiro Is Named "Co-op" Attorney For the A. F. B. F.

Aaron Sapiro, noted co-operative marketing attorney, was appointed at a meeting of the Executive Committee of the American Farm Bureau Federation as co-operative marketing attorney for that organization.

Mr. Sapiro and Walton Peteet, Director of Co-operative Marketing for the A. F. B. F., in co-operation with the co-operative marketing committee of the national association, will shape policies and plans for the big national program of farmer marketing now under way.

"BROWN MOUSE" IS LATEST RELEASE OF HOMESTEAD FILMS

Homestead Films, Inc., will soon have its recently completed five-reel feature film, "The Brown Mouse," ready for distribution. The picture is from the novel of the same name by Herbert Quick, the well known writer of farm stories.

Mr. Quick's home county farm bureau at Berkeley Springs, West Virginia, has been granted the privilege of the first public showing of the film, April 18 and 19.

"The Brown Mouse" is a story depicting the modernizing of rural schools through the introduction of practical lessons in agriculture. The scene is laid in a typical Iowa rural school district, all of the characters being recognizable in the average middle western community. The difficulties and opposition encountered by the young man who dares to change the old order of things, his final success and the happy culmination of his childhood love affair, all tend to make the picture very interesting as well as conveying a valuable lesson.

The Minnesota Legislature recently passed a bill appropriating $10,000 to protect the state against the Pittsburg-Plus practice of setting the price for steel.

ILLINOIS FRUIT EXCHANGE JOINS FEDERATED BODY

Growers Sign Contract To Market Through "Co-op" Sales Agency

The directors of the Illinois Fruit Exchange, with headquarters at Centralia, recently signed the contract of membership with the Federated Fruit and Vegetable Growers, Inc., the national co-operative sales agency formed January 1, 1923 as the result of the work of Fruit Marketing Committee of Twenty-one of the American Farm Bureau Federation.

This step was taken only after long consideration on the part of the directors of the Illinois exchange leading up to a unanimous decision for membership. In 1922 the exchange marketed its products through a private sales agency, and it was only the obvious superiority and advantages of the Federated Fruit Growers that prompted the important step.

Cite Advantages

Among the advantages of an affiliation with the national sales agency cited were the facts that it was a product of the work of the farm bureau and deserved the support of growers' organizations; exchanges who are members of the Federated have a voice in its governing body; and the Federated is on a sound basis, being formed on a plan similar to the successful California fruit growers' co-operatives. In addition, the Federated has taken over the North American Fruit Exchange with its trained sales force and experience of twelve years.

150 Sales Offices

The Federated Fruit and Vegetable Growers, Inc., have already established salaried representatives in over 150 cities reaching 70 per cent of the population of the United States, and have bonded brokerage service in the remainder of the markets.

What's the Biggest Farm Bureau Lie You've Heard?

In every community there is, out of a thousand loyal farmers, one "knocker" who is fond of gossip and who spends valuable time in spreading about the neighborhood some highly imaginary "fish stories" about state and county farm bureau work. You've heard 'em. Yet, ridiculous as most of these yarns are when compared to the facts, there are uninformed people who believe them.

The Record proposes to publish these whoppers! Sunlight and air are the best cures for noxious germs! So send in to The Record what you think is the biggest lie about the farm bureau you've ever heard.

How's This One?

The Record will start the ball rolling by the following story, which was told on himself by one of the former members of the I. A. A. Executive Committee:

"I came home from Chicago after one of the meetings of the I. A. A. Executive Committee," he said, "and attended a meeting of our county farm bureau the next evening. While at this meeting, I noted that several people glanced at me curiously and even suspiciously. It was not until a few days later, however, that I learned the cause. The rumor had started about the county that as a member of the I. A. A. Executive Committee, I was being paid $1,600 a year and expenses! The fact is, as everybody knows, that executive committeemen are paid only their expenses for the usual one-day monthly meetings and that all of them, if their farming operations are at all extensive, must necessarily lose money every time they attend a conference. Yet I found that a few uninformed farmers believed this yarn!

He Denies Yarn

"I was unable for a month or so to learn who had started the rumor. When I finally found out, I challenged the man, who, by the way, was not a member of the farm bureau, and he denied the story. The matter dropped there."

How's this for a whopper? Or do you know a larger one? If so, send it in to The Record.

Illinois Agricultural Association
RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by News Publicity Department, L. J. Montross, Director.

Entry as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of ten cents for subscription to the Illinois Agricultural Association Record.

U.S.G.G. DIRECTORS APPOINT OFFICERS, DISCUSS NEW PLAN

(Continued from Page 1)

Farmers' Elevators

In general, the plan aims to make good on the grain marketing program and, to that end, to bring into proper relationship to one another the existing forces, including the local farmers' elevators, on the one hand, and the single commodity marketing organizations on the other.

The executive committee of the organization is of the opinion that the local farmers' elevators must be the basis upon which to build a grain selling organization, including ownership and control in terminal elevators and all handling facilities.

Orderly Marketing

At the same time the committee recognizes the need for special commodity organizations to direct intelligently the flow of grain through these facilities and thereby effect orderly and organized marketing. If modifications are necessary in the present plan of the U. S. Grain Growers, Inc., to bring this about, the Board of Directors will not hesitate to take the responsibility for making them.

The present administration of the U. S. Grain Growers, Inc., is adopting the policy of making no forecasts as to what is to be done, but on the contrary trying to go ahead slowly and steadily on a firm basis to work out the problem of the co-operative marketing of the farmer's grain.

The executive board of the Canadian Council of Agriculture recently visited the American Farm Bureau Federation in Chicago for the purpose of studying the farm bureau movement from top to bottom. Organized farmers in Canada are planning to model some of their work after American accomplishments.

Here's a Story of Facts and Figures: the Statistical Service of the I. A. A.

Figures and statistics make dry reading—sometimes. But there are exceptions: it was largely due to the figures and statistics dug up by the I. A. A. and county farm bureaus that farmers of Illinois read last January that they had realized a saving of more than half a million dollars in 1922 taxes for state purposes. That wasn't dry reading!

The Statistical Service of the I. A. A., or, rather, John C. Watson, Statistician, furnishes the facts and figures which must generally be had before a further step can be taken in many phases of taxation, legislation and marketing. It is no job for an amateur: it is highly specialized work which demands training and experience.

In 1920, for example, the farmer knew that in many instances he was paying too much taxes. But he couldn't prove it! Other business men could. They had their statisticians. They were able to come before the Tax Commission with the facts and figures.

But in 1921 the I. A. A. and the county farm bureaus started after the statistics and figures. They spent two years in research. They found that for twenty years the Illinois farmer had been bearing an unduly large part of the state tax burden.

Saving of $550,000

In 1921 and 1922 the I. A. A. and county farm bureaus appeared before the Illinois Tax Commission with a plea for lower farm land taxes. The result was the prevention of one-half of the contemplated raise in 1921 and a reduction in state valuations in 1922 which meant a saving of $550,000 in state land taxes for 1922 alone.

But the work of the I. A. A. in taxes is by no means ended with this. The Statistical Service is making taxation its big project for 1923.

Revaluation in 1923

The revaluation of real estate which comes every four years falls this time in the spring of 1923. Investigations of the Statistical Service show that in nearly half of the individual counties and in the state as a whole, land is now assessed at its highest point—in spite of the well-known decrease in actual values during the last few years. The same investigations show that in many counties average valuations of town and city lots are lower than they were twenty years ago in spite of the well-known raise in actual values during the last few years.

Land has lost since 1920 from 20 to 50 per cent of its sales value. Town and city lots have advanced enormously in sales value. Yet—land is assessed at its highest point and eighty per cent of lots at their average pre-war value. Obviously the farmer is paying more than his share of the cost of state government.

Facts and Figures

Under a plan proposed by the Statistical Service, investigations are now being made in 20 to 30 Illinois counties to determine the exact relationship of land to lots. It has been found in one of the counties, of chiefly town and city population, having one of the largest cities outside of Chicago, that land is assessed at 58.88 per cent of its sales value, lots at 42.80 per cent.

Translated into cold cash, land owners in this county are paying about $50,000 more than their share. In another county land owners are paying about $150,000 a year more for county and state taxes alone than they would pay if land was assessed on the same basis as town and city lots.

The Tenant, Too

The farmer who doesn't own land is also being looked after by the Statistical Service in his taxes. Records have been secured of sales which show that live stock and other farm personal property is in some instances being burdened with a full assessed valuation of from one-half to three-fourths and more of its total sales value.

How About it?

How do things stand in YOUR county? If you think you are paying more than your share, get in touch with your county farm bureau and suggest an investigation in co-operation with the I. A. A. Statistical Service. This is one of the greatest pieces of work the I. A. A. can do for your county in 1923.

This investigation must be conducted before next summer, however, or it may be too late. After the County Boards of Review act this summer, it will be difficult to get changes in valuations of real estate.

How It's Spent

Another service to your county which the I. A. A. Statistical Service plans for 1923 is the start of an investigation to find what your local and county tax money goes for.

The Statistical Service hopes to suggest and outline a plan whereby, without too much expense, an analysis of local and county expenditures can be made—not at all with the idea of seeking out possible carelessness and dishonesty of officials, but to leave to your judgment whether or not your tax money has been spent economically and wisely. You should know.

This isn't all

These two great projects do not in any sense constitute the entire work of the Statistical Service. Many other sorts of statistical investigation—in soy bean production, in the tariff, in various phases of marketing and legislation—have been made during the last two years and will be made in the future.

But during 1923 the I. A. A. Statistical Service will devote the greater portion of its time and effort to the two taxation projects outlined in this article. They are huge projects. They are probably too huge to be finished in one year or in several years. But their accomplishment, even in part, will not only let the Illinois farmer know—for the first time—just where he stands on taxes, but it should also save him an amount a great deal more in most cases than the dues he pays for any one year.

Watch the statistics—they're important!

STATISTICS

JOHN C. WATSON

John C. Watson, of the I. A. A. Statistical Service, has been in the employ of the association for three years. His life training has been such as to fit him for his investigations in statistics on behalf of Illinois farmers. He is, in addition, a farmer and farm land owner of Champaign County and knows just how it feels to send in the annual check to cover farm land taxes.

NEXT TIME

Next time—the story of the Dairy Products Marketing Department of the I. A. A. This department is one of the oldest of I. A. A. marketing departments. It has aided producers in the formation of marketing associations in almost every corner of the State. The account of its work and of what it can do for dairymen in the farm bureau will interest you. Watch for it—in the next issue.

"CO-OP" MARKETING ACT IS PASSED BY VOTE OF 34 TO 3

(Continued from Page One)

limiting them to ten years. This amendment is of little importance, however, as contracts seldom run even as long as ten years.

Chicago Support

Not only were two-thirds of the Chicago senators in favor of the measure, but the two most prominent newspapers in Chicago have given the co-operative marketing bill their editorial backing.

F. B. Resolution

A resolution, which is printed in full on page four of this issue, in favor of the co-operative marketing bill and the bill to allow farmers' organizations a seat on grain exchanges was presented to every member of the Illinois legislature on the day before the hearing on the bill. This resolution was passed by the farm bureau presidents of the state at their recent meeting with the I. A. A. in Chicago.

$25,000 for Cook County Station Passes Senate

A delegation from the Cook County Farm Bureau appeared at Springfield recently on behalf of an appropriation from the legislature for $25,000 for a truck crop experiment station in the county. The Senate appropriations committee put its O. K. on the project.

Cook County is one of the most extensive producers of truck crops in the United States.

A FARM BUREAU CREED

I am the Farm Bureau. I believe in the happiness, prosperity, and general well-being of the followers of agriculture—the world's basic industry. I am an exponent of all just methods which will enable the American farmer to obtain that happiness and prosperity which are so essential to the welfare of this great nation.

I am the Farm Bureau. Formed a few years ago, my followers now number over a million tillers of the soil in all parts of America. In my short existence I have made the organized farmer a power that is respected throughout the length and breadth of our land. My influence is felt in the halls of legislation, the centers of finance, and the nation's markets. I stand for fair legislation, for alleviation of the farmers' financial burdens, and for efficient marketing through co-operation. I strive for the economic betterment of American farming—a factor necessary to the development of all American industries.

I am the Farm Bureau. I believe in the sanctity of the soil, the basis of all prosperity. I hope to see the day when all men will regard the upkeep of the fertility of the soil as a sacred trust. I believe in improved methods of farming, better crops, purebred live stock—all of which stand for common sense and efficiency. I have faith in the boys and girls of the farm and through my program I am making them better able to meet the problems of tomorrow. I desire an organized community life—a place where farmers may work, play, and worship together. My basis is sound. My principles are trustworthy. My leaders are honorable and capable—men chosen from the farms of America.

I am the Farm Bureau—the hope of the American farmer.

68,035 Head of Live Stock Received In 8 Months By Peoria Co-operative

THEY'RE PATRONIZING THEIR OWN FIRM

This picture shows a line of trucks bearing Illinois live stock to the Peoria Live Stock Producers' Association, organized by the I. A. A. and county farm bureaus. A large share of the firm's business, which has amounted to nearly a million and a half dollars in eight months, is truck receipts. The farmer firm does the most business on the market.

The first result of the ratification of the plan of the Farmers' National Live Stock Marketing Committee of Fifteen, appointed in 1920 by the American Farm Bureau Federation to work out a national marketing plan, was the formation late in 1921 of the National Live Stock Producers' Association. This agency, with headquarters at Chicago, proceeded early in 1922 to establish farmer-owned and operated commission firms on the East St. Louis, Chicago and Indianapolis markets. The Illinois Agricultural Association was asked to set up a like firm on the Peoria market.

In March, 1922, an investigation of the market was conducted by the Live Stock Marketing Department of the I. A. A. Following this, a meeting of representatives of the seven counties principally interested in the Peoria market was called for the purpose of organizing a selling agency.

The Organization

As finally organized, a board of seven directors, one each from the seven counties—Peoria, Woodford, Knox, stark, Fulton, Marshall, and Tazewell—was selected by the executive committees of the various farm bureaus. Funds sufficient to establish the selling agency at Peoria were furnished the board of directors by the sale of memberships to individuals and shipping associations, and by loans from the I. A. A. and farm bureaus interested.

After selecting an experienced and capable management, the Peoria Producers' Commission Association opened for business, June 26, 1922, the fourth selling agency operating under the National Live Stock Producers' Association, previous agencies being established at East St. Louis, Indianapolis, and Chicago.

Eight Months' Growth

The following table will show the growth that has been made during the first eight months of operation of the Peoria Producers:

Month	Cars	Value
July	61	$ 81,58[illegible]
August	74	10[illegible]
September	75	103,788.43
October	90	119,092.42
November	140	175,977.31
December	165	220,531.89
January	219	301,628.90
February	180	236,634.96
Total	1,004	$1,348,162.57

It will be noted that the only marked decrease in receipts occurred in February. This was caused by the almost impassable condition of the roads, hindering truck shipments. During the eight months, 593 cars, or 59.06 per cent of the tetal of 1,004 coming to the Peoria Producers, were shipped by truck.

Total Receipts

The total receipts during the period were 68,035 head of live stock, apportioned as follows: 2,020 cattle, 2,147 calves, 63,460 hogs, and 408 sheep. Commissions collected amounted to a total of $20,090.17.

For the last four months the Producers have stood either first or second among the seven commission firms operating on that market. Shipments to the agency are not entirely from the seven counties mentioned, some live stock being received from Mason, Logan, and McLean counties, Illinois, and from eastern Iowa territory tributary to the M. C. and St. L. R. R.

In accordance with the policy of the National Live Stock Producers' Association, the Peoria agency, while not a member of the exchange, abides by all the rules and regulations of that body, with the exception that it reserves the privilege of pro-rating to its membership all the profits that may accrue from the business.

How to Join

Membership in the Producers may be obtained in several ways. An individual may make application directly to the selling agency, may join the local shipping association which holds membership on the market, or by becoming a member of the county farm bureau, some of the counties having organized county-wide shipping associations and taken out a membership on that basis.

Members of the Board of Directors of the Peoria Producers are as follows; George Wilson, Toulon, president; W. T. Youle, Delavan, vice president; Seaton Moon, Harmon, secretary-treasurer; Sam McClugage, Peoria, chairman of board; J. F. Felter, Eureka, and B. H. Taylor, Canton.

W. R. Hembrough, formerly in the live stock commission business at East S. Louis, is manager of the Producers at Peoria, and is salesman of carlot shipments of stock. Eddie McDonough, a buyer and trader for several years on the Peoria market, takes care of the truck hog sales, while George Stemm is office manager.

Average Prices

It is a significant fact that the average prices received for hogs on the Peoria market during the period the Producers have been operating have been much nearer the average prices on the Chicago market than previously. This bears out the contention made repeatedly by live stock producers that a selling agency controlling at least 25 per cent of the receipts on the terminal market could influence favorably the prices received for their live stock.

Answers Question

The table above will answer the question so often asked—Are the sales made and the services rendered by co-operative selling agencies on a basis with those furnished by old line firms? Note the gradual increase in the Producers' business from month to month. With the live stock producer as the judge and jury, it can easily be seen that he is satisfied with the Peoria co-operative selling agency as an efficient and altogether satisfactory medium for marketing live stock. Otherwise the Peoria Producers would not have experienced the growth so evident during the first eight months of existence.

THE GOLDEN EGG

The next co-operative movement of the I. A. A. and county farm bureaus to be taken up in the series of articles in The Record, will be the local poultry and egg co-operative shipping associations in Central Illinois which were organized last year.

I. A. A. Endeavoring To Help In Labor Shortage Problem

On another page of The Record is an item in regard to the present shortage of farm help in Illinois. The I. A. A., with a view of helping farm bureau members who must have additional labor, is endeavoring to get in touch with help that may be available for farms in the state.

If you are in need of help, fill in the blanks below and mail to Illinois Agricultural Association, 608 S. Dearborn Street, Chicago, as soon as possible.

Do you prefer a married or a single man? _____

Can you use him the year round? _____

Is yours a dairy, livestock, or grain farm? _____

Would you prefer men of Scotch, German, Scandinavian, or Polish descent? _____

What wages will you pay? _____

When do you need help? _____

Write plainly your name, address, and county.

(Name) _____

(Address) _____

(County) _____

Milk Marketing Situation in St. Louis Improved

The Milk Producers' Advisory Committee, which has been carrying on a campaign over southern Illinois and Missouri for over a month, has been meeting a splendid response from producer-creditors and stockholders of the Illinois - Missouri Co-operative Marketing Company, over 1,400 agreements having been signed up and are in the hands of creditors.

Sapiro Is Named "Co-op" Attorney For the A. F. B. F.

Aaron Sapiro, noted co-operative marketing attorney, was appointed at a meeting of the Executive Committee of the American Farm Bureau Federation as co-operative marketing attorney for that organization.

Mr. Sapiro and Walton Peteet, Director of Co-operative Marketing for the A. F. B. F., in co-operation with the co-operative marketing committee of the national association, will shape policies and plans for the big national program of farmer marketing now under way.

"BROWN MOUSE" IS LATEST RELEASE OF HOMESTEAD FILMS

Homestead Films, Inc., will soon have its recently completed five-reel feature film, "The Brown Mouse," ready for distribution. The picture is from the novel of the same name by Herbert Quick, the well known writer of farm stories.

Mr. Quick's home county farm bureau at Berkeley Springs, West Virginia, has been granted the privilege of the first public showing of the film, April 18 and 19.

"The Brown Mouse" is a story depicting the modernizing of rural schools through the introduction of practical lessons in agriculture. The scene is laid in a typical Iowa rural school district, all of the characters being recognizable in the average middle western community. The difficulties and opposition encountered by the young man who dares to change the old order of things, his final success and the happy culmination of his childhood love affair, all tend to make the picture very interesting as well as conveying a valuable lesson.

The Minnesota Legislature recently passed a bill appropriating $10,000 to protect the state against the Pittsburg-Plus practice of setting the price for steel.

ILLINOIS FRUIT EXCHANGE JOINS FEDERATED BODY

Growers Sign Contract To Market Through "Co-op" Sales Agency

The directors of the Illinois Fruit Exchange, with headquarters at Centralia, recently signed the contract of membership with the Federated Fruit and Vegetable Growers, Inc., the national co-operative sales agency formed January 1, 1923 as the result of the work of Fruit Marketing Committee of Twenty-one of the American Farm Bureau Federation.

This step was taken only after long consideration on the part of the directors of the Illinois exchange leading up to a unanimous decision for membership. In 1922 the exchange marketed its products through a private sales agency, and it was only the obvious superiority and advantages of the Federated Fruit Growers that prompted the important step.

Cite Advantages

Among the advantages of an affiliation with the national sales agency cited were the facts that it was a product of the work of the farm bureau and deserved the support of growers' organizations; exchanges who are members of the Federated have a voice in its governing body; and the Federated is on a sound basis, being formed on a plan similar to the successful California fruit growers' co-operatives. In addition, the Federated has taken over the North American Fruit Exchange with its trained sales force and experience of twelve years.

150 Sales Offices

The Federated Fruit and Vegetable Growers, Inc., have already established salaried representatives in over 150 cities reaching 70 per cent of the population of the United States, and have bonded brokerage service in the remainder of the markets.

What's the Biggest Farm Bureau Lie You've Heard?

In every community there is, out of a thousand loyal farmers, one "knocker" who is fond of gossip and who spends valuable time in spreading about the neighborhood some highly imaginary "fish stories" about state and county farm bureau work. You've heard 'em. Yet, ridiculous as most of these yarns are when compared to the facts, there are uninformed people who believe them.

The Record proposes to publish these whoppers! Sunlight and air are the best cures for noxious germs! So send in to The Record what you think is the biggest lie about the farm bureau you've ever heard.

How's This One?

The Record will start the ball rolling by the following story, which was told on himself by one of the former members of the I. A. A. Executive Committee:

"I came home from Chicago after one of the meetings of the I. A. A. Executive Committee," he said, "and attended a meeting of our county farm bureau the next evening. While at this meeting, I noted that several people glanced at me curiously and even suspiciously. It was not until a few days later, however, that I learned the cause. The rumor had started about the county that as a member of the I. A. A. Executive Committee, I was being paid $3,600 a year and expenses! The fact is, as everybody knows, that executive committeemen are paid only their expenses for the usual one-day monthly meetings and that all of them, if their farming operations are at all extensive, must necessarily lose money every time they attend a conference. Yet I found that a few uninformed farmers believed this yarn!

He Denies Yarn

"I was unable for a month or so to learn who had started the rumor. When I finally found out, I challenged the man, who, by the way, was not a member of the farm bureau, and he denied the story. The matter dropped there."

How's this for a whopper? Or do you know a larger one? If so, send it in to The Record.

87 Farm Bureau Presidents Meet With I. A. A.

PRESIDENTS HEAR EXPLANATION OF MARKETING BILLS

Hold Important Conference of County Leaders; Pass Resolutions

Presidents or other representatives from 87 Illinois county farm bureaus met with officials of the Illinois Agricultural Association at the Great Northern hotel, Chicago, on March 26, to discuss policies in marketing, legislation, and other projects of importance to organized agriculture in the state.

The meeting was one which had been planned for more than a year and which was called at the request of the I. A. A. Executive Committee at its March session.

Peteet Speaks

Walton Peteet, director of co-operative marketing of the American Farm Bureau Federation, was present and gave the first talk of the day, explaining the provisions of the co-operative marketing bill which is before the Illinois legislation.

"A modern co-operative marketing association," stated Mr. Peteet, "represents an intelligent application to farm marketing of the proven experience of business, so that is purely and simply a business agency devised and designed to serve farmers in the better marketing of their products."

Explains Co-op Bill

He told how the proposed law was based on the experience of successful American co-operatives and that the act had already become a law in about twenty states. The inadequacy of present Illinois laws for permitting co-operative organizations was outlined, especially in regard to co-operatives to take advantage of the new Intermediate Rural Credits Law, which will only allow loans to farmers' organizations that are formed under laws similar to the proposed act.

Mr. Peteet explained in detail the different provisions of the co-operative marketing bill, showing how each provision was based upon the experience of successful co-operative organizations in other states. He emphasized that the act was strictly permissive in character and did not interfere with any present farmers' associations or hinder the formation of co-operative organizations under old laws.

Board of Trade Bill

Following Mr. Peteet's explanation, Donald Kirkpatrick of the legal department of the I. A. A. informed the conference concerning the provisions of Senate Bill 150 which would allow farm organizations in Illinois the right to a seat on boards of trade. He told of the need of such a law and explained that it would be supplementary to the Capper-Tincher Act passed by Congress.

After these explanations of the proposed laws before the Illinois legislature, President S. H. Thompson of the I. A. A. outlined the policy of the legislative committee of the association in strongly backing these two bills for passage, rather than a policy of supporting several measures and thus dividing the strength of the organization.

Pass Resolutions

Resolutions were unanimously passed by the convention endorsing the stand taken by the I. A. A. in its legislative program and urging the passage of the proposed acts. It was requested that copies of the resolutions be presented to Governor Len Small and all members of the legislature.

Other Discussions

In the afternoon, explanations of the reorganization plan of the U. S. Grain Growers were made by E. H. Cunningham and John W. Coverdale, followed by a general discussion of questions regarding the Grain Growers. Other problems taken up during the afternoon meeting included a waterway program discussion led by R. A. Cowles, treasurer of the I. A. A., and the report of several of the presidents relative to the work being done in their counties in the adjustment of tax valuations under the direction of the I. A. A.

EVERY CORNER OF STATE REPRESENTED AT THIS MEETING

Farm Bureau Heads From 87 Counties In Meeting

The following is the list of county farm bureau presidents or alternates from 87 counties in Illinois who met in Chicago on March 26, for the first time in the history of the I. A. A., to become more familiar with the policies of the association and to express themselves as to the wishes of their constituents in the county bureaus:

Adams, D. H. Myers, President; Bond, F. Baumberger, President; Boone, Phil H. Sanford, President; Brown, R. O. Shields, President; Bureau, David G. Reder, President; Calhoun, Aug. Franke, Jr., Alternate; Carroll, C. M. Kingery; Cass, J. E. Edwards, President; Champaign, Lorin Clark, President; Christian, W. N. Grimes; Clark, J. Q. Snedeker, President; Coles, C. S. Hall, President; Cook, Herman Schwake, President; Crawford, N. F. Goodwin, President; Cumberland, A. C. Gordon, President; DeKalb, J. J. Kingsley, Alternate; DeKalb, A. U. Dodge; DeWitt, Claude W. Thorp, President; Douglas, Chas. McDonald, Alternate; DuPage, A. W. Fischer, President; Edgar, W. A. Dennis, President; Edwards, Walter Tribe, President; Effingham, L. F. Mauls, President; Ford, E. W. Tiaken, President; Franklin, J. F. Whittington, Alternate; Fulton, B. H. Taylor, President; Gallatin, Geo. B. Scherer, President; Greene, L. R. Lee, President; Grundy, R. Fred Cummings, Alternate; Hancock, I. N. Hosford, President; Henderson, C. W. Cooper, President; Iroquois, R. F. Karr, President; Jackson, Fred Dietz, President; Jefferson, J. H. Payne, Alternate; Jersey, James C. Downey, President; Jo. Daviess, John E. Bonnet, President; Johnson, W. L. Owen, President; Kane, I. R. Judd, President; Kankakee, J. C. Collier, Farm Adviser.

Kendall, B. L. Matlock, President; Knox, Henry Gehring, President; Lake, D. E. Minto, President; La-Salle, O. W. Esmond, Secretary; Lawrence, J. E. Lingenfelter, President; Lee, S. L. Shaw, President; Livingston, G. L. Porter, Vice President; Logan, Geo. Stoll, President; Macon, Henry Shafer, President; Madison, Stanley Castle, President; Marion, D. L. Boynton, Secretary; Marshall-Putnam, L. F. Boyle, President; Mason, Chas W. Borgelt, President; McDonough, C. R. Kline, Alternate; McLean, Simon C. Moon, President; Mercer, Scoville Lee, Secretary; Monroe, John C. Gummersheimer, President; Montgomery, H. A. Cress, President; Morgan, C. S. Black, President; Moultrie, T. P. Ellis, President; Ogle, Joseph Holmes, President; Peoria, Chas. R. Ford, Vice President; Piatt, M. E. Wise, President; Pike, C. E. Dunham, President; Pope, A. H. Floyd, President.

Randolph, Chas. McKinley, President; Rock Island, W. H. Moody, President; Saline, W. A. Grant, President; Sangamon, J. P. Stout, President; Schuyler, W. T. Boyd, Alternate; Scott, Clyde J. North, President; Shelby, Isaac F. Wortman, President; St. Clair, H. H. Hartman, Secretary; Stark, David Turnbull, President; Stephenson, Arnold F. Karsk, Alternate; Tazewell, R. B. Orndorff, President; Union, R. W. Newman, President; Vermilion, C. R. Finley, President; Vermilion, W. B. McFarland; Wabash, John Deputy, President; Warren, W. D. Rodgers, President; Wayne, J. K. Ethridge; White, O. M. Casebier, President; Whiteside, R. A. Norrish, President; Will, N. L. Welter, President; Williamson, L. C. Sanders, President; Winnebago, Geo. F. Tullock, Alternate; Woodford, J. Frank Felter, President; Massac, George Arensman; Henry, Lawrence C. Warner.

Fruit Exchange Sees Formation of More Locals

Two new local fruit units of the Illinois Fruit Exchange are in process of organization by the growers at Oblong and Robinson, Crawford county. Meetings were held recently in these localities by the Fruit Marketing Department of the I. A. A. with the almost unanimous endorsement of the plan by growers present and the signing of many contracts. Organization committees were appointed and are now at work.

Growers at each of these places are planning the construction of packing warehouses when the organizations are perfected.

Assistance is being asked in the formation of locals at other points in southern Illinois, the success of the exchange last year and the splendid prospects for a big fruit crop this year giving impetus to the co-operative work.

CUNNINGHAM TELLS OF PLANS OF U.S. GRAIN GROWERS, INC.

"Cards face up on the table. No more wild theories."

This, in brief, was the message brought to the presidents of Illinois county farm bureaus by E. H. Cunningham, of the U. S. Grain Growers' Sales Co., in his address at the afternoon session. Mr. Cunningham was given an informal vote of thanks and confidence at the end of his talk.

"I don't hold out to you that you are going to solve this problem in three, four or five years, but you are going to make a long step in advance during the next three, four or five years," Mr. Cunningham said. "I have no sympathy with any plan that says it can set this thing up and render you a service and make you money tomorrow. They cannot do it. It simply is not in the cards. This is too big a thing that we are talking about.

"Now, can we get down to business and try to sell grain? We think we can, under this plan. But we don't hold out that we are going to try to give you anything tomorrow or the next day. The working out of a plan of marketing grain for America is different than the marketing of a little citrus fruit surrounded and limited by climatic and soil conditions.

"The committee has never had any plan suggested that they were ready to accept if it involved in the slightest degree the jeopardizing of the interests of the creditors of this organization. We are going to try to get them their money if it is humanly possible to do so."

COUNTY PRESIDENTS URGE PASSAGE OF FARMER MEASURES

Endorse Stand of I. A. A. in Supporting Senate Bills 150 and 165

Farm Bureau presidents or alternates from 87 Illinois counties assembled in Chicago March 26, unanimously endorsed and approved the position taken by the I. A. A. in supporting Senate Bill 165, providing for the organization and incorporation of co-operative marketing organizations, and Senate Bill 150, providing for the admission of co-operative organizations to all public markets and grain exchanges.

A copy of the resolutions was placed in the hands of each member of the House and Senate at Springfield, as well as being given to the Governor.

The following are the resolutions.

WHEREAS, there is now pending in the Legislature of the State of Illinois Senate Bill No. 165, providing for the organization and incorporation of co-operative marketing organizations, and

WHEREAS, there is now pending in the Legislature of the State of Illinois Senate Bill No. 150, providing for the admission of co-operative organizations to all public markets and grain exchanges, and

WHEREAS, the success of Agriculture is dependent on a more orderly marketing of its products, and

WHEREAS, experience has taught, and reliable authorities agree, that the marketing of agricultural products by commodity through co-operative associations is sound in principle, and

WHEREAS, the co-operative association is as different from the ordinary commercial corporation as the corporation is different from a partnership, and

WHEREAS, laws regulating co-operative associations must differ from the laws regulating corporations, and

WHEREAS, Senate Bill 165 and Senate Bill 150 offer the agencies for the creation and operation of co-operative associations,

THEREFORE, BE IT RESOLVED, that we, the undersigned presidents or alternates of Illinois Farm Bureaus, assembled in joint conference this 26th day of March, 1923, Chicago, Illinois, endorse and approve the position taken by the Illinois Agricultural Association in supporting Senate Bill 165 and Senate Bill 150, and that we expressly urge the present Legislature to pass and the Governor of the State to sign these bills, and further, that this resolution be conveyed to the Secretary of the Illinois Agricultural Association, with a request that the same be immediately placed in the hands of the members of the Senate, House of Representatives and the Governor of the State of Illinois.

Illinois farm advisers made 43,000 farm visits and held 3,491 demonstrations during 1922.

SUPREME COURT O.K'S CAPPER-TINCHER ACT

SIX-HOUR HEARING OF CO-OPERATIVE ACT IN THE HOUSE

President Thompson and A. C. Everingham of I. A. A. Speak For Bill

Proponents and opponents of the Illinois Co-operative Marketing Bill clashed in the House of Representatives at Springfield recently in a hearing similar to that held in the Senate. The meeting lasted for six hours.

The chief arguments, like those advanced in the Senate a few weeks before, were that the bill was favorable or inimical to the farmers' interests.

S. H. Thompson, president of the Illinois Agricultural Association, and A. C. Everingham, of the I. A. A. Legislative Committee, were speakers for the bill. They portrayed the need of Illinois farmers for co-operative marketing and the necessity for a legislative measure like the proposed bill to facilitate the organization of co-operative associations.

Opponents of the measure presented the contention that they were endeavoring to protect the farmer against himself, that the co-operative bill would hurt his interests. Representatives of the Chicago city council expressed the fear that the passage of the measure would increase the cost of agricultural products to the consumer.

Contracts Signed By 26 Counties For Serum Supply

Twenty-six counties have signed up to secure their serum from the American Serum Co., Sioux City, Ia., in accordance with the recommendations of the Serum Purchasing Committee appointed at the annual meeting of the I. A. A.

An estimated aggregate of 16,000,000 cubic centimeters of serum and virus will be handled by the counties at the new price of 75 cents per 100 cc., which is five cents less per cc. than last year. All farm bureaus who have signed up are maintaining serum depots for storage of their supply.

Replies Indicate Widespread Demand For Help on Farms

While there have not been a great number of replies received as yet from Illinois farmers by the I. A. A. in regard to the help shortage on the farms of the state, those that have come to the office indicate a widespread shortage throughout most of the counties of Illinois.

According to the answers to the questionnaire, wages paid vary from $40 to $75 per month with room and board. There is a demand for both married and single men, the latter being desired in the majority of cases.

While the I. A. A. can promise nothing definite, it is making an investigation with a view to helping out in the solution of the problem. A more definite announcement will be made later after a general survey of the situation is made and more questionnaires are answered.

NEARLY $2000 IN CLAIMS COLLECTED

Claims numbering 54 and amounting to the total of $1,875.39 were collected by the Transportation department of the I. A. A. during the first three months of 1923 and paid to farm bureau members or live stock shipping associations of Illinois.

Most of the losses incurred come under the following heads: general loss and damage, freight loss and damage, and overcharge.

The majority of the claims are of small amounts, less than $50. The largest claim was collected for August Wild, Monroe county, being $200 collected from a railroad from fire loss. Another of the larger claims was $150 secured for C. A. Smith, Knox county, for cattle killed on a railroad right-of-way.

Committee Meets To Consider 1923 Phosphate Supply

Members of the phosphate-limestone advisory committee of the I. A. A., F. D. Barton, Cornell, chairman, met with the phosphate-limestone department and executive officers of the association at the Chicago office, April 16.

Consideration of the proposed contract for the remainder of the 1923 supply of phosphate was taken up, as well as other matters of business concerning the department.

WHY NOT TRY THE SLEDGE?

Outlook For Pool of 1923 Wool Crop Very Encouraging

The Live Stock Department of the I. A. A. is receiving many orders for sacks of twine from farm bureaus in Illinois whose members are planning to consign their wool clip to the 1923 wool pool.

The market outlook for wool this year is very bright. Speculators are active and are said to be out attempting to contract for the product before it is sheared.

It will be remembered that the 143,000 pounds of Illinois wool consigned to the pool last year averaged 34.9 cents per pound as compared with 27 cents paid locally, resulting in a saving of about $14,000 to the poolers. Montana growers are pooling practically 75 per cent of the total clip, or 7,000,000 pounds, this year.

Wool may be billed at any time to the pool, the address being National Wool Warehouse and Storage Co., 4300 S. Robey St., Chicago, Care I. A. A.

Leaders of the Minnesota potato co-operative marketing agency are striving to have 100,000 acres of that commodity under contract by July 15.

Refund Is Voted By Directors of Live Stock Co-op

At the quarterly meeting of the Board of Directors of the Chicago Producers Commission Association in April, it was announced that the business of the organization has been so successful during the past year that a substantial refund can be made to all members at the end of the fiscal year, June 30.

The directors voted that such a refund shall be made shortly after the close of the year's business.

This gratifying news will be more than welcome to members of the Chicago Producers and such concrete evidence of success should cause many more live stock shippers to join the co-operative.

Continued success is being experienced during April by the Producers at all the markets where they are established, most of them ranking at or near the top among the firms doing business on the respective markets.

Kendall county board of supervisors recently voted $4,000 to devote to the eradication of tuberculosis in the county.

SAYS MEASURE IS CONSTITUTIONAL; BENEFITS FARMERS

Grain Exchanges Subject To Regulation; "Co-ops" Get Board Trade Seats

American agriculture scored another great victory when the United States Supreme Court in a decision handed down upheld the constitutionality of the new Capper-Tincher Act regulating grain exchanges and admitting co-operative associations to seats on boards of trade.

There were only two dissenting votes on the decision, those of Justices [illegible] holds.

This opinion of the Supreme Court as handed down by Chief Justice William H. Taft, completely overrules the attack made on the constitutionality of the Capper-Tincher Act by the Chicago Board of Trade and fully upholds the contentions of the Department of Agriculture, the farm bloc and the farm bureau.

Quotes Decision

The decision as read by Chief Justice Taft is quoted as follows: "It is clear from the citations in the statement of the case of evidence before committees of investigation as to manipulations of the futures market and their effects, that we would be unwarranted in rejecting the findings of Congress as unreasonable, and

(Continued on page 2)

Co-op Bill Made Law in Minnesota, Maine and Ohio

Three more states have passed the standard co-operative marketing act, similar to that which is under consideration in the House at Springfield and was passed by the Senate with only three negative votes.

Maine and Ohio have both passed the bill and it has been signed by the governor in each state, while in Minnesota, the act was passed by the legislature and is awaiting the signature of Governor Preus. Governor Donahey of Ohio signed the bill in the presence of agricultural leaders on Friday, April 13, but Ohio farm bureau members claim that they are not superstitious.

Practically half the states of the Union have enacted the bill into a law up to this time.

87 Farm Bureau Presidents Meet With I. A. A.

PRESIDENTS HEAR EXPLANATION OF MARKETING BILLS

Hold Important Conference of County Leaders; Pass Resolutions

Presidents or other representatives from 87 Illinois county farm bureaus met with officials of the Illinois Agricultural Association at the Great Northern hotel, Chicago, on March 26, to discuss policies in marketing, legislation, and other projects of importance to organized agriculture in the state.

The meeting was one which had been planned for more than a year and which was called at the request of the I. A. A. Executive Committee at its March session.

Peteet Speaks

Walton Peteet, director of co-operative marketing of the American Farm Bureau Federation, was present and gave the first talk of the day, explaining the provisions of the co-operative marketing bill which is before the Illinois legislation.

"A modern co-operative marketing association," stated Mr. Peteet, "represents an intelligent application to farm marketing of the proven experience of business, so that is purely and simply a business agency devised and designed to serve farmers in the better marketing of their products."

Explains Co-op Bill

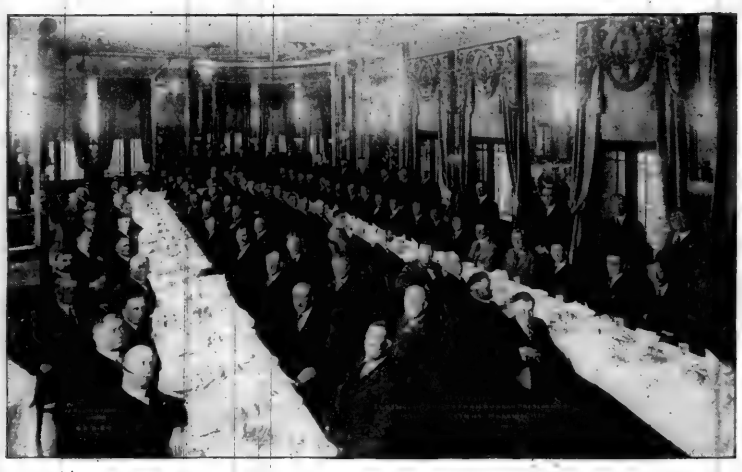
He told how the proposed law was based on the experience of successful American co-operatives and that the act had already become a law in about twenty states. The inadequacy of present Illinois laws for permitting co-operative organizations was outlined, especially in regard to co-operatives to take advantage of the new Intermediate Rural Credits Law, which will only allow loans to farmers' organizations that are formed under laws similar to the proposed act.

Mr. Peteet explained in detail the different provisions of the co-operative marketing bill, showing how each provision was based upon the experience of successful co-operative organizations in other states. He emphasized that the act was strictly permissive in character and did not interfere with any present farmers' associations or hinder the formation of co-operative organizations under old laws.

Board of Trade Bill

Following Mr. Peteet's explanation, Donald Kirkpatrick of the legal department of the I. A. A. informed the conference concerning the provisions of Senate Bill 150 which would allow farm organizations in Illinois the right to a seat on boards of trade. He told of the need of such a law and explained that it would be supplementary to the Capper-Tincher Act passed by Congress.

After these explanations of the proposed laws before the Illinois legislature, President S. H. Thompson of the I. A. A. outlined the policy of the legislative committee of the association in strongly backing these two bills for passage, rather than a policy of supporting several measures and thus dividing the strength of the organization.



Pass Resolutions

Resolutions were unanimously passed by the convehtion endorsing the stand taken by the I. A. A. in its legislative program and urging the passage of the proposed acts. It was requested that copies of the resolutions be presented to Governor Len Small and all members of the legislature.

Other Discussions

In the afternoon, explanations of the reorgnization plan of the U. S. Grain Growers were made by E. H. Cunningham and John W. Coverdale, followed by a general discussion of questions regarding the Grain Growers. Other problems taken up during the afternoon meeting included a waterway program discussion led by R. A. Cowles, treasurer of the I. A. A., and the report of several of the presidents relative to the work being done in their counties in the adjustment of tax valuations under the direction of the I. A. A.

EVERY CORNER OF STATE REPRESENTED AT THIS MEETING

Farm Bureau Heads From 87 Counties In Meeting

The following is the list of county farm bureau presidents or alternates from 87 counties in Illinois who met in Chicago on March 26, for the first time in the history of the I. A. A., to become more familiar with the policies of the association and to express themselves as to the wishes of their constituents in the county bureaus:

Adams, D. H. Myers, President; Bond, F. Baumberger, President; Boone, Phil H. Sanford, President; Brown, R. O. Shields, President; Bureau, David G. Reder, President; Calhoun, Aug. Franke, Jr., Alternate; Carroll, C. M. Kingery; Cass, J. E. Edwards, President; Champaign, Lorin Clark, President; Christian, W. N. Grimes; Clark, J. Q. Snedeker, President; Coles, C. S. Hall, President; Cook, Herman Schwake, President; Crawford, N. F. Goodwin, President; Cumberland, A. C. Gordon, President; DeKalb, J. E. Kingsley, Alternate; DeKalb, A. U. Dodge; DeWitt, Claude W. Thorp, President; Douglas, Chas. McDonald, Alternate; DuPage, A. W. Fischer, President; Edgar, W. A. Dennis, President; Edwards, Walter Tribe, President; Effingham, L. P. Mautz, President; Ford, E. W. Tieken, President; Franklin, J. Whittington, Alternate; Fulton, B. H. Taylor, President; Gallatin, Geo. B. Scherrer, President; Greene, L. R. Lee, President; Grundy, S. Fred Cummings, Alternate; Hancock, I. N. Hosford, President; Henderson, C. W. Cooper, President; Iroquois, R. F. Karr, President; Jackson, Fred Dietz, President; Jefferson, J. H. Payne, Alternate; Jersey, James C. Downey, President; Jo. Daviess, John E. Bonnet, President; Johnson, W. L. Owen, President; Kane, I. R. Judd, President; Kankakee, J. C. Collier, Farm Adviser.

Kendall, E. L. Matlock, President; Knox, Henry Gehring, President; Lake, D. H. Minto, President; LaSalle, O. W. Esmond, Secretary; Lawrence, J. E. Lingenfelter, President; Lee, S. L. Shaw, President; Livingston, G. L. Porter, Vice President; Logan, Geo. Stoll, President Macon, Henry Shafer, President; Madison, Stanley Castle, President; Marion, D. L. Boynton, Secretary; Marshall-Putnam, L. F. Boyce, President; Mason, Chas W. Borgelt, President; McDonough, C. P. Kline, Alternate; McLean, Simon C. Moon, President; Mercer, Scoville Lee, Secretary; Monroe, John C. Gummersheimer, President; Montgomery, H. A. Cress, President; Morgan, C. S. Black, President; Moultrie, T. P. Ellis, President; Ogle, Joseph Holmes, President; Peoria, Chas. R. Ford, Vice President; Piatt, M. E. Wise, President; Pike, C. E. Dunham, President; Pope, A. H. Floyd, President.

North, President; Shelby, Isaac F. Wortman, President; St. Clair, H. H. Hartman, Secretary; Stark, David Turnbull, President; Stephenson, Arnold F. Karsk, Alternate; Tazewell, B. Orndorff, President; Union, E. W. Newman, President; Vermilion, C. R. Finley, President; Vermilion, W. B. McFarland; Wabash, John Deputy, President; Warren, W. D. Rodgers, President; Wayne, J. K. Ethridge; White, O. M. Casebier, President; Whiteside, R. A. Norrish, President; Will, N. J. Welter, President; Williamson, L. C. Sanders, President; Winnebago, Geo. F. Tullock, Alternate; Woodford, Frank Felter, President; Massac, George Arensman; Henry, Lawrence C. Warner.

Fruit Exchange Sees Formation of More Locals

Two new local fruit units of the Illinois Fruit Exchange are in process of organization by the growers at Oblong and Robinson, Crawford county. Meetings were held recently in these localities by the Fruit Marketing Department of the I. A. A. with the almost unanimous endorsement of the plan by growers present and the signing of many contracts. Organization committees were appointed and are now at work.

Growers at each of these places are planning the construction of packing warehouses when the organizations are perfected.

Assistance is being asked in the formation of locals at other points in southern Illinois, the success of the exchange last year and the splendid prospects for a big fruit crop this year giving impetus to the co-operative work.

CUNNINGHAM TELLS OF PLANS OF U.S. GRAIN GROWERS, INC.

"Cards face up on the table. No more wild theories."

This, in brief, was the message brought to the presidents of Illinois county farm bureaus by E. H. Cunningham, of the U. S. Grain Growers' Sales Co., in his address at the afternoon session. Mr. Cunningham was given an informal vote of thanks and confidence at the end of his talk.

"I don't hold out to you that you are going to solve this problem in three, four or five years, but you are going to make a long step in advance during the next three, four or five years," Mr. Cunningham said. "I have no sympathy with any plan that says it can set this thing up and render you a service and make you money tomorrow. They cannot do it. It simply is not in the cards. This is too big a thing that we are talking about.

"Now, can we get down to business and try to sell grain? We think we can, under this plan. But we don't hold out that we are going to try to give you anything tomorrow or the next day. The working out of a plan of marketing grain for America is different than the marketing of a little citrus fruit surrounded and limited by climatic and soil conditions.

"The committee has never had any plan suggested that they were ready to accept if it involved in the slightest degree the jeopardizing of the interests of the creditors of this organization. We are going to try to get them their money if it is humanly possible to do so."

COUNTY PRESIDENTS URGE PASSAGE OF FARMER MEASURES

Endorse Stand of I. A. A. in Supporting Senate Bills 150 and 165

Farm Bureau presidents or alternates from 87 Illinois counties assembled in Chicago March 26, unanimously endorsed and approved the position taken by the I. A. A. in supporting Senate Bill 165, providing for the organization and incorporation of co-operative marketing organizations, and Senate Bill 150, providing for the admission of co-operative organizations to all public markets and grain exchanges.

A copy of the resolutions was placed in the hands of each member of the House and Senate at Springfield, as well as being given to the Governor.

The following are the resolutions.

WHEREAS, there is now pending in the Legislature of the State of Illinois Senate Bill No. 165, providing for the organization and incorporation of co-operative marketing organizations, and

WHEREAS, there is now pending in the Legislature of the State of Illinois Senate Bill No. 150, providing for the admission of co-operative organizations to all public markets and grain exchanges, and

WHEREAS, the success of Agriculture is dependent on a more orderly marketing of its products, and

WHEREAS, experience has taught, and reliable authorities agree, that the marketing of agricultural products by commodity through co-operative associations is sound in principle, and

WHEREAS, the co-operative association is as different from the ordinary commercial corporation as the corporation is different from a partnership, and

WHEREAS, laws regulating co-operative associations must differ from the laws regulating corporations, and

WHEREAS, Senate Bill 165 and Senate Bill 150 offer the agencies for the creation and operation of co-operative associations,

THEREFORE, BE IT RESOLVED, that we, the undersigned presidents or alternates of Illinois Farm Bureaus, assembled in joint conference this 26th day of March, 1923, Chicago, Illinois, endorse and approve the position taken by the Illinois Agricultural Association in supporting Senate Bill 165 and Senate Bill 150, and that we expressly urge the present Legislature to pass and the Governor of the State to sign these bills, and further, that this resolution be conveyed to the Secretary of the Illinois Agricultural Association, with a request that the same be immediately placed in the hands of the members of the Senate, House of Representatives and the Governor of the State of Illinois.

Illinois farm advisers made 48,000 farm visits and held 3,491 demonstrations during 1922.

Volume 1 | May 1, 1923 | Number 4

SUPREME COURT O. K'S CAPPER-TINCHER ACT

SIX-HOUR HEARING OF CO-OPERATIVE ACT IN THE HOUSE

President Thompson and A. C. Everingham of I. A. A. Speak For Bill

Proponents and opponents of the Illinois Co-operative Marketing Bill clashed in the House of Representatives at Springfield recently in a hearing similar to that held in the Senate. The meeting lasted for six hours.

The chief arguments, like those advanced in the Senate a few weeks before, were that the bill was favorable or inimical to the farmers interests.

S. H. Thompson, president of the Illinois Agricultural Association, and A. C. Everingham, of the I. A. A. Legislative Committee, were speakers for the bill. They portrayed the need of Illinois farmers for co-operative marketing and the necessity for a legislative measure like the proposed bill to facilitate the organization of co-operative associations.

Opponents of the measure presented the contention that they were endeavoring to protect the farmer against himself, that the co-operative bill would hurt his interests. Representatives of the Chicago city council expressed the fear that the passage of the measure would increase the cost of agricultural products to the consumer.

Contracts Signed By 26 Counties For Serum Supply

Twenty-six counties have signed up to secure their serum from the American Serum Co., Sioux City, Ia., in accordance with the recommendations of the Serum Purchasing Committee appointed at the annual meeting of the I. A. A.

An estimated aggregate of 16,000,000 cubic centimeters of serum and virus will be handled by the counties at the new price of 75 cents per 100 cc., which is five cents less per cc. than last year. All farm bureaus who have signed up are maintaining serum depots for storage of their supply.

Replies Indicate Widespread Demand For Help on Farms

While there have not been a great number of replies received as yet from Illinois farmers by the I. A. A. in regard to the help shortage on the farms of the state, those that have come to the office indicate a widespread shortage throughout most of the counties of Illinois.

According to the answers to the questionnaire, wages paid vary from $40 to $75 per month with room and board. There is a demand for both married and single men, the latter being desired in the majority of cases.

While the I. A. A. can promise nothing definite, it is making an investigation with a view to helping out in the solution of the problem. A more definite announcement will be made later after a general survey of the situation is made and more questionnaires are answered.

NEARLY $2000 IN CLAIMS COLLECTED

Claims numbering 54 and amounting to the total of $1,875.39 were collected by the Transportation department of the I. A. A. during the first three months of 1923 and paid to farm bureau members or live stock shipping associations of Illinois.

Most of the losses incurred come under the following heads: general loss and damage, freight loss and damage, and overcharge.

The majority of the claims are of small amounts, less than $50. The largest claim was collected for August Wild, Monroe county, being $200 collected from a railroad from fire loss. Another of the larger claims was $150 secured for C. A. Smith, Knox county, for cattle killed on a railroad right-of-way.

Committee Meets To Consider 1923 Phosphate Supply

Members of the phosphate-limestone advisory committee of the I. A. A., F. D. Barton, Cornell, chairman, met with the phosphate-limestone department and executive officers of the association at the Chicago office, April 16.

Consideration of the proposed contract for the remainder of the 1923 supply of phosphate was taken up, as well as other matters of business concerning the department.

WHY NOT TRY THE SLEDGE?

Outlook For Pool of 1923 Wool Crop Very Encouraging

The Live Stock Department of the I. A. A. is receiving many orders for sacks of twine from farm bureaus in Illinois whose members are planning to consign their wool clip to the 1923 wool pool.

The market outlook for wool this year is very bright. Speculators are active and are said to be out attempting to contract for the product before it is sheared.

It will be remembered that the 143,000 pounds of Illinois wool consigned to the pool last year averaged 34.9 cents per pound as compared with 27 cents paid locally, resulting in a saving of about $14,000 to the poolers. Montana growers are pooling practically 75 per cent of the total clip, or 7,000,000 pounds, this year.

Wool may be billed at any time to the pool, the address being National Wool Warehouse and Storage Co., 4300 S. Robey St., Chicago, Care I. A. A.

Leaders of the Minnesota potato co-operative marketing agency are striving to have 100,000 acres of that commodity under contract by July 15.

Refund Is Voted By Directors of Live Stock Co-op

At the quarterly meeting of the Board of Directors of the Chicago Producers Commission Association in April, it was announced that the business of the organization has been so successful during the past year that a substantial refund can be made to all members at the end of the fiscal year, June 30.

The directors voted that such a refund shall be made shortly after the close of the year's business.

This gratifying news will be more than welcome to members of the Chicago Producers and such concrete evidence of success should cause many more live stock shippers to join the co-operative.

Continued success is being experienced during April by the Producers at all the markets where they are established, most of them ranking at or near the top among the firms doing business on the respective markets.

Kendall county board of supervisors recently voted $4,000 to devote to the eradication of tuberculosis in the county.

SAYS MEASURE IS CONSTITUTIONAL; BENEFITS FARMERS

Grain Exchanges Subject To Regulation; "Co-ops" Get Board Trade Seats

American agriculture scored another great victory when the United States Supreme Court in a decision handed down upheld the constitutionality of the new Capper-Tincher Act regulating grain exchanges and admitting co-operative associations to seats on boards of trade.

There were only two dissenting votes on the decision, those of Justices [illegible] and [illegible] holds.

This opinion of the Supreme Court as handed down by Chief Justice William H. Taft, completely overrules the attack made on the constitutionality of the Capper-Tincher Act by the Chicago Board of Trade and fully upholds the contentions of the Department of Agriculture, the farm bloc and the farm bureau.

Quotes Decision

The decision as read by Chief Justice Taft is quoted as follows:

"It is clear from the citations in the statement of the case of evidence before committees of investigation as to manipulations of the futures market and their effects, that we would be unwarranted in rejecting the findings of Congress as unreasonable, and

Co-op Bill Made Law in Minnesota, Maine and Ohio

Three more states have passed the standard co-operative marketing act, similar to that which is under consideration in the House at Springfield and was passed by the Senate with only three negative votes.

Maine and Ohio have both passed the bill and it has been signed by the governor in each state, while in Minnesota, the act was passed by the legislature and is awaiting the signature of Governor Preus. Governor Donahey of Ohio signed the bill in the presence of agricultural leaders on Friday, April 13, but Ohio farm bureau members claim that they are not superstitious.

Practically half the states of the Union have enacted the bill into a law up to this time.

Illinois Agricultural Association
RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by News Publicity Department, L. J. Montross, Director.

Entry as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of ten cents for subscription to the Illinois Agricultural Association Record.

CAPPER-TINCHER ACT IS UPHELD BY SUPREME COURT

(Continued from page 1)

that in our inquiry as to the validity of the legislation, we must accept the view that such manipulation does work to the detriment of producers, consumers, shippers and legitimate dealers in interstate commerce in grain and that it is a real abuse.

Interstate Commerce Affected

"But it is contended that it is too remote in its effect on interstate commerce, and that it is not like the direct additions to the cost to the producer of marketing cattle by exorbitant charges and discrimination of commission men and dealers. This is hardly consistent with the affidavits the plaintiffs presented from the leading economists, who say that dealing in futures stabilizes cash prices.

"More than this, prices of grain futures are those upon which an owner and intending seller of cash grain is influenced to sell or not to sell as they offer a good opportunity to him to hedge comfortably against future fluctuations.

Prices Manipulated

"Manipulations of grain futures for speculative profit, though not carried to the extent of a corner or complete monopoly, exert a vicious influence and produce abnormal and disturbing temporary fluctuations of prices that are not responsible to actual supply and demand and discourage not only this justifiable hedging but disturb the normal flow of actual consignments. A futures market lends itself to such manipulation much more readily than a cash market."

The Court upheld the government's contention that futures trading affects the cash price of grain. The relation between cash grain and future dealing is evidenced by the fact that corners in grain have resulted from dealings in futures.

Bradfute Comments

President O. E. Bradfute, of the American Farm Bureau Federation, in commenting upon the Supreme Court decision, said:

"The farmers of America will recognize in this decision the establishment for all time of their fundamental right to follow their own products as far to market as they like. The President of the United States, and the Federal Congress, have already repeatedly voiced their interest in and their support of co-operative marketing. Now comes the third branch of the national government, the United States Supreme Court, and upholds the legality of co-operative marketing. It is a decision of far-reaching importance and will sustain the growers of farm crops everywhere in their belief that our co-operative marketing program is right."

Mr. Bradfute was also very pleased over the fact that admission to exchanges will now be granted to co-operative marketing associations, by which action the Supreme Court recognized one of the fundamental principles of co-operative marketing—the payment of patronage dividends to members.

Dairy Marketing Department Serves Producers In ... n Advisory Capacity

Service is the watchword of the Illinois ...icultural Association. No department of the association is w... it can show definite accomplishments which ... been of benefit to the farmers of the state. Here's the sto... one of the service departments of the I. A. A. which has ... ned results—the Dairy Marketing Department.

When the Dairy Marketing Department was ... ned in 1920, C. Larsen, director of extension and professor of ... ng at South Dakota State College, was secured to direct the w... Mr. Larsen had charge of the work until last January when h... igned to accept the position of Dean of Agriculture at the South ...ta college. He was succeeded by A. D. Lynch, a man with seve... ears' experience in the practical management of dairy plants.

The Dairy Marketing Department operates on the basis of service which is largely of an advisory nature. It co-operates with local farm bureaus in the formation of co-operative dairy marketing associations. When such an enterprise is contemplated, the department first makes a field survey. Local conditions are studied, existing marketing observed, and a careful analysis of the situation is made to see whether a marketing organization would be likely to succeed.

Sometimes it is found inadvisable to start a co-operative of the kind contemplated, when local conditions do not point to success. It is felt that it is better to have the credit of advising an impossible proposition not to go ahead than to be able to recount a large number of enterprises started, all of which may not prove to be successful.

Organizing

After the field survey, if conditions seem favorable for going ahead, the next step is that of organization. This may consist in the signing of a contract or it may require, as in the case of a stock company, the sale of stock.

Following the organization comes installation. A building must be built or rented, machinery and equipment has to be purchased, by-laws must be provided, an accounting system set up and a manager provided. In each of these phases of the work, the department attempts to serve.

Often the Dairy Marketing De... partment ... co-operate with ...ent of the I. A. A., such as ...egal Department, to give the ... co-operative the best of s... A competent auditing se... may also be provided by ... state association. Auditing is ... far the most important es... al to good business mana... it.

DAIRYING

Illinois has 1,148,000 dairy cows on 237,000 farms, producing 2,000,000 gallons of milk daily. Dairy farms, including animals and equipment, represent an investment of over $100,000,000. The state ranks third in ice cream production, fourth in fluid milk sold, seventh in milk prod... and eighth in butter pr... ion.

Read ... accompanying story and ... out what the Dairy De... nent of the I. A. A. li... ng for Illinois dairymen.

...tenance

After th... operative is established and ... ctioning, a maintenance se... is rendered. It is necessar... visit the organization occasi... y and to keep in touch with ... Often the officials of a new ... operative make a visit to on... more of the older and succes... associations to see how they ... tion and to form a sort of ... cking relationship between c... ratives of similar operation.

...al Kinds

There a... veral kinds of co-operative ... marketing associations ... stence in Illinois. This is due to the many degrees of dairying found in the state. In some sections, particularly in the northern part, the number of cows per farm is much greater than it is in the central and southern parts of the state.

Thus locally owned co-operative creameries are found in the northwestern part of Illinois, at Elizabeth, Galena, Mt. Carroll, and Apple River. Intensified dairying conditions are found in the communities surrounding these towns, and the cream comes from a ... radius, being practically al... vered by the farmers them...

Bar... g Associations

In th... tion of the state where da... is more scattered, it is mor... ficult and often impossible ... farmers to operate their ow... operative creamery. In orde... r them to obtain enough v... e, it would be necessary to ... long distances. In such ins..., dairymen find a means ... co-operative selling known a... bargaining association. T... ind of organization is to be ... d in Effingham, Jefferson, ... Franklin counties.

DAIRY DIRECTOR

A. D. LYNCH

A. D. Lynch, of the I. A. A. Dairy Marketing Service, is well fitted to direct the work of the department. His training has been altogether along dairy lines, both production and manufacturing. He has had several years experience as manager of dairy plants and hence is familiar with the many problems peculiar to the organization and management of such enterprises.

Very frequently a town is found to be supporting several cream stations where one station would perhaps serve the needs of the district. Through a bargaining association, the farmers run their own station co-operatively, thus eliminating considerable buying cost for which the producer must ultimately pay. The product is then sold to creameries for as good a price as they can obtain. Usually this is done by bidding. In some instances these co-operative cream stations have netted the farmers an increased return of from five to eight and even more cents per pound of butterfat.

A bargaining association requires no capital stock and is therefore not costly. It is educational in its nature and it stabilizes dairy operations, promotes better quality, permits grading, reduces expense, and benefits the co-operators. It also paves the way for larger undertakings.

Retail Milk Co-ops.

Milk marketing co-operatives which retail fluid milk in cities are often advantageous. They are found to best function in cities of around 30,000 population. Ventures of this kind are located at Waukegan, Quincy, and Rock Island. In these places the producers found, after making a survey of the situation, that there was a need for better milk supply in these cities and conditions generally beckoned them to follow their product all the way to market. There are perhaps fifteen Illinois cities with sufficient population to warrant a co-operative retail milk plant.

In some instances, the producers are advised not to go into the retail milk business because local conditions are not favorable. For example, a large proportion of the farmers may be renters and hence the membership would not be stable. In one locality, action is being delayed because the city is located on the corner of four counties, thus complicating the situation.

Path Not All Roses

With present day improvements in transportation, the potential area from which milk may be shipped to a market has greatly widened. A few years ago, dairymen would not have believed that their milk would be shipped 70, 80, or 100 miles, to market. At present, much milk is shipped that far and considerably further.

The proposition of transportation is constantly starting the wholesale milk companies in the face, especially at Chicago and St. Louis. The surplus problem is a big one and a difficult one to handle.

At St. Louis, the dairymen co-operated for the wholesaling of their milk to dealers and others in that city. Their marketing program was resisted and fought rather bitterly by the dealers and other interests. The company itself was new. Co-operation in

(Continued on page 3)

AN' IT AIN'T DONE YET

Hard times has done their worst to us,
We're feelin' pretty sad;
A farmer's livin' nowadays
Is mighty all-fired bad.
We've worked an' slaved to raise our crops,
An' a wee sma' price we've had;
But the Farm Bureau's a workin',
An' it ain't done yet.

We want the kids to go to school,
It's hard to let 'em off;
The taxes take our extra cash,
Our horses have the cough.
The banker charges interest high,
To him our hats we doff;
But the Farm Bureau's a workin',
An' it ain't done yet.

The wife's been complainin' that
Her clothes din't fit to wear;
The kiddies' shoes are clean done out,
For money we can't spare.
My own clothes are a sight to see,
With many a patch an' tear;
But the Farm Bureau's a workin'
An' it ain't done yet.

Somehow I ain't discouraged,
For it really seems to me,
That though the hogs have cholera
An' the cows have got T. B.
Dark clouds are breakin' in the sky,
The sunshine soon we'll see;
For the Farm Bureau's a workin',
An' it ain't done yet.

—G. C. B.

Co-Op Bill Fills Need In Illinois Agriculture

The Illinois Agricultural Association and the presidents of practically all of the county farm bureaus of the state have declared in favor of the co-operative marketing bill which now is before the House at Springfield after having been passed by a decisive majority in the Senate.

The positive need of commodity co-operative marketing if the farmer is to attain his rightful position among American industries and the inadequacy of any present Illinois law to facilitate the organization of co-operative marketing associations along constructive, sane, conservative lines —this, in brief, is the reason why the I. A. A. and the county farm bureaus have been from the start back of the co-operative marketing bill.

In spite of the fact that most of the agricultural leaders of the state have shown themselves to be in favor of the bill, however, some measure of opposition has developed since the first hearing of the bill in the Senate. A number of objections have been advanced, chiefly by interests which are at present profiting by the present system of marketing farm products. Following is a list of a few of the objections which have been brought up:

Objections

1. Farmers signing a contract under the provisions of the new co-operative bill would be required to live up to their contract.

2. The co-operative bill was introduced to create some advantage to the U. S. Grain Growers, Inc.

3. The co-operative act of 1915 is good enough.

4. Contracts must be signed for a period of ten years.

5. Signing of the contract will tie the farmer up to deliver his products to others, taking what they see fit to give him.

6. Persons who influence members of co-operative organizations to break their contracts or persons who spread false and malicious reports about the co-operative associations will be guilty of a misdemeanor and subject to fine.

7. The bill was brought up secretly and was railroaded through the Senate.

Real Motive

In the first place it is obvious that the real motive behind the objections is for the most part, selfish, and comes from parties who have no real interest in working out a constructive marketing plan to stabilize agricultural prices, eliminate unnecessary profit, and bring about greater efficiency in the distribution of farm-produced commodities.

The real motive is never mentioned. On the contrary, it is always carefully stated that the only motive is to protect the farmer from himself. The objectors have no constructive program and offer no plan for stabilizing prices, eliminating unnecessary profit, and bringing about greater efficiency in the distribution of farm products.

Living Up to Contracts

The first objection, that farmers would have to live up to their contracts, is quite well-founded. It is true that contracts under the new co-operative act cannot be easily broken. In other words, a man who joins a co-operative under the new act has the assurance that the other fellow isn't going to be able very easily to desert him.

Our whole business and financial structure depends on the sacred and binding character of contracts entered into voluntarily.

That the bill has any sort of connection with the U. S. Grain Growers, Inc., is pure imagination. The bill is for the forming of new associations—entirely.

Co-operative Act of 1915

The Co-operative Act of 1915 good enough? For those who find it so, the present bill, if it becomes law, will not interfere at all. To those who have found the Act of 1915 inadequate for organization, the present bill offers other and broader provisions for co-operative commodity marketing organizations.

Contracts must be signed for ten years? Again a false objection. Contracts can be signed for whatever period of time you and your fellow producers decide.

Signing Contract

Signing of the contract binds the farmer to deliver his product to others? It binds him only to deliver it to himself, to his own organization in which he has a voice in management, instead of blindly dumping it on the market as at present.

No one is compelled to sign a contract. Contracts can be made to suit conditions and never can be secured unless the provisions meet the general approval of farmers.

Malicious Statements

That persons who spread malicious falsities about co-operative associations and who encourage contract breaking will be punished is true enough. In other words, the enemies of co-operative marketing will find it harder to undermine it.

That the bill was brought up secretly in the Senate is misleading. A complete account of the progress of the measure has been published each issue in The I. A. A. Record.

Dairy Marketing Directors Meet At South Bend

A meeting of dairy marketing representatives of Illinois, Michigan, Indiana and Ohio met at South Bend, Ind., April 19, with E. B. Heaton, Director of Dairy Marketing, and Walton Peteet, Director of Co-operative Marketing of the A. F. B. F.

General discussion of the dairy marketing plans of the states took place, as well as consideration of the efficiency of the various forms of co-operative dairy associations.

Marketing representatives present were A. D. Lynch, of the I. A. A.; B. F. Beach, assistant secretary of the Michigan Milk Producers' Association; C. R. George, Indiana Dairyman's Association; and E. D. Waid of the Ohio Farm Bureau Federation.

The annual meeting of the American Farm Bureau Federation for 1923 will be held during the first week of December in Chicago, according to plans made at the last meeting of the Executive Committee of the Federation.

CROWDED OUT

Due to lack of space the story of Poultry and Egg Marketing Associations formed by the I. A. A., could not be printed in this issue of The Record, as promised. It will appear May 15.

DAIRY DEPARTMENT SERVES PRODUCERS

(Continued from page 2)

the district was new. The situation became further complicated by the marketing company becoming involved in bankruptcy proceedings. For the moment, co-operative marketing in the St. Louis area is at a standstill.

But St. Louis dairymen are not going to give up their co-operative milk marketing any more than a grain farmer will refuse to plant after a crop failure. They know that the St. Louis people need milk; they know that they are the logical men who should supply them; and they also know that the dealers need them as surely as they need the dealers for a market.

A plan is now being worked out in that district to relieve the situation and it is believed that from all the chaos and seeming trouble a plan will emerge that will serve the best interests of the dairymen and dealers alike.

Protects Dairy Industry

Representatives of the department were instrumental in securing the passage of the Haugen Butter Bill at Washington which now makes it a Federal law that butter shall contain 80 per cent fat and no more than 16 per cent moisture. This resulted in considerable saving to the producers in the state, inasmuch as Illinois had enforced an 82½ per cent butter standard previous to the Haugen law.

The department also supported the Voigt bill, prohibiting the interstate shipment of filled milk, which passed after a bitter fight in which all dairy interests were united.

At the present session of the State Assembly at Springfield, the Dairy Marketing Department dug up facts and figures to show that the tuberculosis indemnity appropriation should be passed and represented them to the Appropriations Committee. The department is also supporting another bill which will prohibit the use of dairy terms in advertising dairy substitutes.

Will Carry On

During 1923 the work will be carried on along the same lines of service as before—the organization of new associations where is advisable, the work of the department in an advisory capacity with the co-operatives now formed, and the protection of the dairy industry.

Many Newspapers Publish Special Bureau Editions

Twenty-four farm bureau special editions of newspapers have been published in Illinois during the first four months of 1923 in twenty counties where reorganization campaigns have taken place.

With several more counties to hold campaigns during May and June, at least thirty such editions will have appeared by July 1.

European Crop Conditions Are Generally Good

Generally good crop conditions in Europe are indicated in a radiogram just received by the United States Department of Agriculture from the International Institute of Agriculture at Rome. The radio message reads as follows:

"In Belgium, sowing commenced in the middle of March with weather favorable and no frost damage to winter crops. Winter crops in Germany slightly above average; some damage by floods; spring sowings progressing well. Winter crops in France favored by climate; spring sowing well under way but slightly retarded by rain. Crop conditions in Italy good; weather favorable and sowing under way. Good crops are expected in Spain; spring sowing completed."

Fox Resigns As President State H. F. Association

George A. Fox, secretary of the I. A. A., resigned his position as president of the Illinois Holstein-Friesian Association at the meeting held in connection with the state Holstein sale at Aurora, April 19 and 20. Frank T. Fowler, Lake Villa, was elected to succeed Mr. Fox to the presidency of the association.

Mr. Fox gave his reason for resignation that his duties with the I. A. A. did not allow him to do justice to the Holstein association work. However, he will serve on the board of directors for the coming year.

At the same meeting, C. M. Long, who has been field secretary of the state association, resigned to take up similar duties with the extension department of the Holstein-Friesian Association of America.

The sale of state Holsteins was a success, an average of $293.60 being secured for the 24 males and 61 females consigned, the former averaging $390.60 and the latter $236.20.

The top of the sale went to John L. Nicholson and Son, Ingleside, when they bought the yearling bull, Bell Farm Bosch Pride, from R. N. Thompson, Cowden, for $5,000.

T. B. ERADICATION MEASURES HAVE SENATE HEARINGS

I. A. A. Represented by Lynch; Dairy Substitute Advertising Bill Up

Both Senate bills which refer to bovine tuberculosis eradication in Illinois have passed their first readings in the Senate.

Senate Bill 209 would appropriate $1,200,000 for the next two years to indemnify owners of tubercular cattle that have been destroyed, and Senate Bill 281 would allow counties to appropriate funds from the county treasury to use in the suppression, eradication, and control of tuberculosis in domestic animals.

No one appeared against the tuberculosis bills at the Senate appropriations committee hearing. Those who spoke in their favor were, A. D. Lynch, Director of Dairy Marketing of the I. A. A.; H. E. Smith, National Live Stock Commissioner; C. M. Long, Secretary of the Illinois Holstein-Friesian Association; Dr. Luckey, St. Louis Live Stock Commissioner; B. M. Davison, Director of Agriculture; and A. W. Fischer, farm bureau member of DuPage county.

Dairy Substitute Advertising

House Bill 223, which would prevent the illegal use of the words, butter, cream, and dairy, in connection with the sale or advertising of any substance designed as a substitute for butter, has been referred to a special sub-committee of five of the House for further [illegible]

Among those who spoke in favor of the bill before the House committee on agriculture were, Mr. Lynch of the I. A. A.; W. F. O'Harr, president of the Illinois State Dairyman's Association; Dr. G. L. McKay, secretary of the American Association of Creamery Buttermakers; and E. B. Heaton, Dairy Marketing Director of the A. F. B. F.

Attorneys representing the J. F. Jelke Co., Chicago, and the J. B. Pearsall Butter Co., Elgin, appeared against the bill.

Let's Have Some Farm Bureau Lies; Send 'em In!

When The Record started the ball rolling with a real honest-to-goodness farm bureau lie in the April 15 issue, it asked that its readers from all parts of Illinois write in a description of the biggest "whoppers" that they have heard in circulation concerning the farm bureau.

As this issue went to press before any choice "fish stories" had time to arrive at the I. A. A. office, the editor decided to find out if Mr. Metzger of the organization department had discovered any noxious bacteria in his travels about the state which needed the application of sunshine, via publicity.

"The biggest farm bureau lie, or rather lies, that I have ever heard," said Mr. Metzger, "came to light at a farm bureau meeting which I attended in a certain Illinois county."

"A farmer arose in the meeting and said. 'There is a report in circulation out in my community that our county farm bureau president is drawing a salary of $30,000 a year and quite a few people out my way actually believe it.'

"'That's nothing,' replied a man from another corner of the county. 'Some knocker out where I live started the rumor that our county farm bureau committeemen are getting $25 per day when they attend the executive committee meetings.'

"Of course everyone at the meeting laughed at the absurdity of such reports," concluded Mr. Metzger, "But the pity of it is that there are farmers who are ready to believe anything that will slander their own organization."

Now The Record wants its readers to send in the very "biggest ones" they've heard. Do it now—in time for the next issue.

In short, you "Tell The Record" and The Record will "Tell the World."

Tax Statement By I. A. A. Statistical Service

THE ASSESSMENT OF FARM PROPERTY

A statement by the Statistical Department of the I. A. A.

Both the Constitution of the State of Illinois and the revenue laws demand uniform valuations of all kinds of property for taxation. The general revenue act directs that all property not specifically exempted by general law shall be valued by assessors at the amount it would bring in a fair, voluntary sale for cash. The requirement of "fair cash value" is usually disobeyed by all assessors. Under the present maximum tax rates, which were fixed by the legislature with full knowledge of the practice of underassessment, it is fortunate for owners of tangible property that it is underassessed. But this fact does not relieve assessors and equalizing bodies from the legal obligation of making uniform assessments and of fixing valuations of all property, including intangible property, at the same percentage of its fair cash value. A decision of the Supreme Court of Illinois, handed down December 18, 1918, declares: "One person cannot be compelled to pay a greater portion of taxes, according to the value of his property, than another, and where assessors have disregarded the injunction of the law and made an assessment of property far below its real cash value, their misconduct must also follow the principle of uniformity and their assessments of all persons must be at the same proportional value."

All available evidence indicates that, in the last two or three years, at least, farm property has been assessed at a much higher percentage of its fair cash value than most other property. Following is an analysis of the evidence.

Personal Property

The tables below give for each of the years, 1921 and 1922, (a) the average farm value, as estimated by the United States Department of Agriculture, of each kind of live stock on Illinois farms on January 1; (b) the average full assessed valuation of each kind of live stock in the state as a whole on April 1; (c) the percentage of the average farm value on January 1 used in the average full assessed valuation on April 1.

FARM VALUES AND FULL ASSESSED VALUATIONS OF LIVE STOCK—1921

Kind of live stock	(a) U. S. Dept. Agr. average farm value January 1	(b) Average full assessed valuation—April 1	Percentage of Jan. 1 value used in Apr. 1 valuation
Horses, per head	$85.00	$58.94	69
All cattle, per head	44.00	27.28	62
Mules and asses, per head	97.40	62.02	64
Sheep, per head	5.54	3.26	57
Hogs, per head	13.70	8.70	64

FARM VALUES AND FULL ASSESSED VALUATIONS OF LIVE STOCK—1922

Kind of live stock	(a) U. S. Dept. Agr. average farm value January 1	(b) Average full assessed valuation—April 1	Percentage of Jan. 1 value used in Apr. 1 valuation
Horses, per head	$69.00	$51.28	74
All cattle, per head	29.10	21.43	73
Mules and asses, per head	75.90	54.64	72
Sheep, per head	5.30	4.24	80
Hogs, per head	10.50	8.92	85

For the third item the estimated average farm value is for mules alone, while the average valuation is for mules and asses, but it is not believed that this difference could affect averages very much.

Under ordinary conditions, horses, mules, and hogs increase in average value per head from January 1 to April 1. Cattle and sheep increase or decrease in average value more or less in accord with fluctuations of market prices for fat animals. In the three months period for both years for which average values and average assessed valuations are given above, it is probable that horses and mules increased moderately in value, and that the same was true of hogs in 1921. In 1922 both hogs and sheep increased largely in average value. It is not probable that cattle changed much in average value in the three months of either year, or that sheep changed much in average value in 1921.

But, even with reasonable allowances for increases in average values between January 1 and April 1, it is fairly certain that farm animals were assessed at about 60 per cent of their average value on April 1, 1921, and at more than 60 per cent of their average value on April 1, 1922.

Real Estate

In the last two or three months a considerable number of county farm bureaus have been investigating the 1922 full assessed valuations and sales values of all farm land and town and city lots recently sold for which the conveyances give exact information. In every one of these counties very wide fluctuations were found in the individual assessments of both land and lots. The chief purpose, however, of the investigation was to discover whether all the land sold was assessed the same percentage of its sale value as were all the town and city lots sold. Average figures have now been secured for a sufficient number of counties, fairly representing the different soil types and economic conditions of the state, to warrant a general statement of what the investigation discloses.

Farm Land

In 1922 farm land, including improvements, in the state as a whole was assessed at the highest valuation ever used. The same was true in a large number of counties. In only a few counties was the great decrease in the value of farm land which began in 1920 reflected in substantial decreases in assessments. In every county in which assessments were either practically stationary or were increased, the decrease in sales value of land has greatly increase … percentage of sales … in the assessments. … of the few counties … essments have been … decreased, it is … ther the decrease … with the decrease … s.

The … increase in sales … and city lots, with … tions either almost … in many counties … asing, has lowered … e of recent sales … the 1922 full as… ons. In all of the … e the farm bureau … percentage, it was … than 45 per cent. … es as a whole, it is … r cent. In a num… is not much above … d in one or two is … er cent.

… and Lots

… e or two counties … r that land is as… sessed no … her than town and … city lots. The difference is us… ually so … that the raising of … average … tions of all the town … and city … in a county to the … same bas… land would require … an increa… from 15 to 30 per … cent. … e county it would … exceed … cent. A lowering … of land … he basis of lots in … most of … ounties investigated … would r… an average reduc… tion of … 13 to 25 per cent. … running … o more than 30 per … cent in … r two counties.

… Property

In th… vestigation of sales … values … assessed valuations of … town a… y lots, nearly all of … the lots … ist of residence prop… erty. … r as business proper… ty can be separated, it is usually found to carry very low assessments. This is probably due in part to the tendency noted in the last paragraph for the lots of highest value to have the lowest relative assessments. In most counties investigated there can be no doubt that business property is assessed at less than most residence property.

The investigation has not gone far enough to give any average figures. Examples, however, can be given showing the ridiculously small assessments of some large properties. In one county a comparatively small plant valued by its owners at $5,000 is assessed for $685, or one-seventh of its estimated value. Another plant is valued at $40,000 and assessed for $1,500, or less than four per cent of its real value. In another county, a coal mining company has property conservatively valued at $2,000,000. Last year it was assessed at $38,000 or less than two per cent of its real value. In another county a well known manufacturing company in its annual report gives the value of its physical plant, equipment, materials, and finished goods at about $3,000,000. Last year it was assessed at a trifle more than $90,000, or three per cent of the value claimed in its annual report.

Conclusions Drawn

The information given above, though drawn, so far as it relates to real estate, from about one-eighth of the counties of the state, is believed to be more or less typical of conditions in other counties. In any case it is safe to say that in most counties and in the state as a whole, there is little uniformity in assessing different classes of property. So far as available evidence is sufficient to warrant conclusions, it is fairly certain that farm animals were assessed in 1922 at from 60 to 65 per cent of their fair cash value, while it is probable that land was assessed at an average of about 50 per cent, and town and city lots at less than 40 per cent of their fair cash value. It is also probable that mercantile, manufacturing, and mining properties, on the average, were assessed the lowest of any tangible properties in the state, but it is not possible to estimate average percentages.

The inequalities of assessments indicated above have cost farmers millions of dollars in taxes paid in the last two years. In one county, the county and state taxes alone collected this spring on land are $125,000 in excess of what they would be if land were assessed on the level of lots. In each of a number of other counties they are from $40,000 to $50,000.

Remedy Suggested

In most counties assessors were instructed to value all property this spring at 60 per cent of fair cash value. If carried out these instructions would require an increase in the assessment of land in most counties of the state. It would probably mean an increase in the assessments of town and city lots in most counties averaging at least 50 per cent, running up to 70 or 75 per cent in many counties, and mounting to over 100 per cent in certain cities which were assessed at less than 30 per cent in 1922. It is extremely improbable that any such violent increase in assessments of town and city lots will be made. It is very doubtful if the average of the new assessments of lots will prove to be much over 45 per cent of actual cash values.

It is highly important to farmers and farmers' organizations to know what the level of the new assessments will prove to be for farm animals, farm land, town and city lots, and so far as possible for business, manufacturing, and mining property. It is not enough to have succeeded in having instructions given to assessors to lower the assessed valuation of land or farm personal property. Such decreases are likely to be made very irregularly in different townships. If valuations are equalized by the County Boards of Review, as they should be, the question of relative valuations of different kinds of property is certain to be raised. The same question is certain to be raised by the Illinois Tax Commission this fall in its work of equalizing the valuations of different classes of property between the counties and in the state. The county farm bureau that knows how different classes of property are assessed this year is in a position to secure just assessments. This is no place for guess work or rule of thumb methods.

The farm bureaus which have investigated the 1922 assessed valuations and recent sales values of property are enthusiastic in supporting this project. They will continue this work by investigating the new assessments and finding out the facts. In order to help any farm bureaus which have not made the investigation, the Statistical Department of the I. A. A. offers to spend one day starting the investigation in each county requesting it, and to help in analyzing the data when secured. In most counties, records of 200 transfers should be sufficient. The necessary data can be secured at little cost, and will require one person's time for only a few days.

Co-operation Is Asked By I. A. A. Traffic Division

The Transportation department is asking the co-operation of farm bureau members in securing information where service may be given.

Each Monday morning a representative of the department goes to the Chicago stock yards and checks up on all losses on live stock of the week previous incurred by Illinois farm bureau members or shipping associations. The matter is then taken up with the shipper to get the facts of the case and to secure the authority to pursue the claims. The department is asking that more prompt replies be made to these inquiries so that it may know if adjustment is desired.

Farm bureau shippers of the state are also asked to inform the Transportation department of inadequate watering facilities or other undesirable conditions at live stock loading pens, so that they may be remedied before hot weather.

Illinois Agricultural Association RECORD

I A A

Volume 1 | May 15, 1923 | Number 5

I. A. A. STATE PICNIC AT URBANA, JUNE 29th

EXECUTIVE BODY HOLDS SESSION IN CHICAGO OFFICE

Accept Resignation of Fred Baumberger; Hear Both Sides Roads Issue

The regular meeting of the I. A. A. Executive Committee was held at the Chicago office with all members present except Fred Baumberger, Reno. President S. H. Thompson presided.

Mr. Fox read a letter from Mr. Baumberger in which he tendered his resignation as a member of the committee due to conditions which made it difficult for him to attend the regular meetings. The resignation was accepted and a meeting of voting delegates of the 22nd district was called at East St. Louis on May 11, to fill the vacancy.

Regular routine business was taken up by the committee. R. A. Cowles presented a financial statement of the I. A. A. for the first quarter of 1923, which was adopted. Action was taken by the committee in clearly defining the duties of the treasurer. A statement in regard to the progress of the Co-operative Marketing bill was made by President Thompson for the Legislative Committee.

Hear Roads Question

Both sides of the million dollar bond issue for roads question were presented to the members of the committee.

(Continued on page 2)

Decline of Five Cents In Price Wool Pool Sacks

Due to an unexpected decline in the price of burlap, the Live Stock Marketing Department of the I. A. A. announces that a cut of five cents each has been made in the price of sacks for use in the wool pool.

The new prices went into effect May 1. New sacks now cost 50 cents each in lots of from one to 24 and 47 cents each in lots of 25 or more. Prices of No. 1 used sacks remain the same.

The Live Stock Department also wishes to notify wool growers that a number of companies are advertising prices of 14 cents per pound for twine. Such twine is made of jute and has the same effect upon wool as binder twine. It will only tie about 20 to 25 fleeces per pound compared to 35 to 40 fleeces that may be tied by standard twine.

Arrangements For Phosphate Supply Nearly Concluded

The Phosphate-Limestone Department of the I. A. A. has practically concluded an agreement with two of the ground rock phosphate producers in Tennessee for the supply of phosphate for the balance of 1923.

This fortunate arrangement gives the department a producer on each of the two roads,—the Louisville and Nashville and the Nashville, Chatanooga, and St. Louis, which will help in times of car shortage.

The specifications as to basic quality are: phosphorus, 13 per cent; fineness, 95 per cent through 100 mesh screen; and moisture not to exceed three per cent. The price based on this quality up to and including July 14, 1923, is $5.50 and thereafter till the end of the year, $6.50. Adjustments will be made either up or down as the grade varies in individual shipments from the specification as to basic quality.

Further details in regard to phosphate selling plans will be made later.

Will Levy Charge On Commercial Claims Collected

At the last meeting of the I. A. A. Executive Committee, action was taken authorising the Transportation Department to levy a charge for strictly commercial claims which the department collects for individuals or co-operative associations.

Under this ruling, a commission will be charged on all freight overcharge, freight loss and damage, and general loss and damage claims collected. The commission charged will be as follows; for farm bureau members, 12½ per cent; for co-operative associations, 15 per cent; and for non-members, 25 per cent.

Charges to members will be the same as to non-members, subject to a refund upon certification by the county farm bureau that the individual is a member in good standing. The refund will be 12½ per cent less the original commission charged. This emphasizes the difference between the rate charged members and non-members.

Checks in payment of claims will be made payable to the Illinois Agricultural Association. The association will then issue checks in favor of the claimants, less the amount of commission. The ruling affects all claims collected after May 1.

AMENDMENTS TO BE USED AS ATTACK ON CO-OPERATIVE BILL

Next Appearance of Measure May Be Test of Strength In The House

With the legislative hopper at Springfield crammed with hundreds of bills, only a few of which have a ghost of a show for passage, the Illinois Co-operative Marketing Bill, at the time The Record goes to press, is still in the House. It is probable, however, that during the second or third week in May the measure will be brought up.

It is believed that the opposition, which consists to a large extent of Chicago representatives, will concentrate its attack upon amendments to weaken the bill rather than votes against it. There are members of the House who would not want to be placed on record as voting against the act yet who would vote for amendments to make it worthless.

The real contest on the bill, therefore, will probably resolve itself into a test of strength when the amendments are brought up.

Farmers who are supporting the bill, including the I. A. A. and the county farm bureaus, have willingly listened to and have answered objections brought up against the measure and have always considered any or all amendments brought up for the sincere purpose of trying to improve the act. It is probable, however, that at the next appearance of the bill, a number of amendments will be proposed whose only purpose is to indirectly kill the measure.

ALL ILLINOIS FARM BUREAU FOLKS ASKED TO GREAT ANNUAL OUTING

College of Agriculture "Open House" To Be Held At Same Time, Offering Chance To Take In Two Events; "Twin Cities" Easily Reached

Champaign-Urbana on June 29th.

The place and date of the I. A. A. state picnic for 1923 was thus decided at a meeting of county farm bureaus and officials of the I. A. A. and of the College of Agriculture at the Twin Cities recently. At another meeting which followed several days later, committees were named and the machinery was set in motion to prepare for the greatest state picnic ever held by the state farm bureau movement.

Crystal Lake Park, in Urbana, is to be the scene of the big farm gathering. This site offers one of the most desirable locations in the state—a large, grassy, wooded plot on the outskirts of Urbana through which a beautiful lake winds.

The "twin cities" are easily reached both by train and car from almost any part of Illinois. A more central location would be hard to find.

New Advantage

The 1923 state picnic offers a further advantage which has been enjoyed by none of the three preceding picnics, held at Champaign, Dixon and Olney in 1920, 1921 and 1922, respectively. This advantage consists of the co-operation of the College of Agriculture of the University of Illinois and the placing of the University "Open House," the time when farmers of the state flock to the college to see the experimental fields, in the same week as the picnic.

Instructive Trip

Farm Bureau visitors will thus be enabled to make the occasion not only a genuine outing and good time but also one of the most instructive trips they could possibly take.

The twin cities, Champaign and Urbana, have made arrangements to co-operate to the limit to show their farmer visitors the best sort of hospitality.

Name Committees

At the second meeting, in the offices of the county farm bureau in Champaign, the following committees were named:

GENERAL PICNIC COMMITTEE—J. D. Harper, Illinois Agricultural Association; J. D. Billborrow, Extension Service, College of Agriculture, University of Illinois; D. J. Holterman, Sadorus; C. R. Finley, Hoopeston; J. E. Smith, Mayor of Urbana; Ed Filson, President Champaign Chamber of Commerce; C. H. Oathout, Champaign County Farm

(Continued on page 4)

Cunningham Named As Farmer Member of Reserve Board

President Harding has appointed Edward H. Cunningham of Iowa as "dirt farmer" member of the federal reserve board.

Edward E. Jones of Pennsylvania was named a member of the farm loan board. Mr. Jones is at present connected with the federal land bank at Baltimore.

Mr. Cunningham's appointment fills the vacancy caused by the death of Milo D. Campbell of Michigan, appointed after Congress created the "dirt farmer" position on the board.

Mr. Cunningham's selection is given the unanimous aproval of Iowa Republican party leaders and farm bureau federations of the middle west.

Mr. Cunningham is well known to Illinois farmers for his work in the reorganization of the U. S. Grain Growers, Inc., and as secretary of the Iowa Farm Bureau Federation.

'Co-ops' Offer Real Hope, Says N. C. Supreme Court

The North Carolina Supreme Court, in upholding the constitutionality of the Co-operative Marketing Act passed in that state, an act similar to the one before the Illinois legislature, has delivered the following opinion on the merits of co-operative marketing:

"The co-operative system is the most hopeful movement ever inaugurated to obtain justice for, and improve the financial condition of farmers and laborers. The producers are paying all the costs and assuming all the responsibilities of these co-operative associations. They are taking all the risks. They are asking no assistance from the public treasury. They are forcing no one to join and they are exacting no inordinate prices for their product. They are associating themselves as authorized by the statute, like other persons, and they have signed mutual and fair agreements among themselves which would be futile unless those who have signed such agreements can be held to abide by the terms of such contracts."

Tax Statement By I. A. A. Statistical Service

THE ASSESSMENT OF FARM PROPERTY

A statement by the Statistical Department of the I. A. A.

Both the Constitution of the State of Illinois and the revenue laws demand uniform valuations of all kinds of property for taxation. The general revenue act directs that all property not specifically exempted by general law shall be valued by assessors at the amount it would bring in a fair, voluntary sale for cash. The requirement of "fair cash value" is usually disobeyed by all assessors. Under the present maximum tax rates, which were fixed by the legislature with full knowledge of the practice of underassessment, it is fortunate for owners of tangible property that it is underassessed. But this fact does not relieve assessors and equalizing bodies from the legal obligation of making uniform assessments and of fixing valuations of all property, including intangible property, at the same percentage of its fair cash value. A decision of the Supreme Court of Illinois, handed down December 18, 1918, declares: "One person cannot be compelled to pay a greater portion of taxes, according to the value of his property, than another, and where assessors have disregarded the injunction of the law and made an assessment of property far below its real cash value, their misconduct must also follow the principle of uniformity and their assessments of all persons must be at the same proportional value."

All available evidence indicates that, in the last two or three years, at least, farm property has been assessed at a much higher percentage of its fair cash value than most other property. Following is an analysis of the evidence.

Personal Property

The tables below give for each of the years, 1921 and 1922, (a) the average farm value, as estimated by the United States Department of Agriculture, of each kind of live stock on Illinois farms on January 1; (b) the average full assessed valuation of each kind of live stock in the state as a whole on April 1; (c) the percentage of the average farm value on January 1 used in the average full assessed valuation on April 1.

FARM VALUES AND FULL ASSESSED VALUATIONS OF LIVE STOCK—1921

Kind of live stock	(a) U. S. Dept. Agr. average farm value January 1	(b) Average full assessed valuation—April 1	(c) Percentage of Jan. 1 value used in Apr. 1 valuation
Horses, per head	$85.00	$58.94	69
All cattle, per head	48.00	31.30	65
Mules and asses, per head	97.00	65.01	67
Sheep, per head	6.90	3.90	57
Hogs, per head	13.70	8.78	64

FARM VALUES AND FULL ASSESSED VALUATIONS OF LIVE STOCK—1922

Kind of live stock	(a) U. S. Dept. Agr. average farm value January 1	(b) Average full assessed valuation—April 1	(c) Percentage of Jan. 1 value used in Apr. 1 valuation
Horses, per head	$69.00	$51.28	74
All cattle, per head	39.10	28.61	73
Mules and asses, per head	75.00	53.64	72
Sheep, per head	5.20	4.26	80
Hogs, per head	10.50	8.92	85

For the third item the estimated average farm value is for mules alone, while the average valuation is for mules and asses, but it is not believed that this difference could affect averages very much.

Under ordinary conditions, horses, mules, and hogs increase in average value per head from January 1 to April 1. Cattle and sheep increase or decrease in average value more or less in accord with fluctuations of market prices for fat animals. In the three months period for both years for which average values and average assessed valuations are given above, it is probable that horses and mules increased moderately in value, and that the same was true of hogs in 1921. In 1922 both hogs and sheep increased largely in average value. It is not probable that cattle changed much in average value in the three months of either year, or that sheep changed much in average value in 1921.

But, even with reasonable allowances for increases in average values between January 1 and April 1, it is fairly certain that farm animals were assessed at about 60 per cent of their average value on April 1, 1921, and at more than 60 per cent of their average value on April 1, 1922.

Real Estate

In the last two or three months a considerable number of county farm bureaus have been investigating the 1922 full assessed valuations and sales values of all farm land and town and city lots recently sold for which the conveyances give exact information. In every one of these counties very wide fluctuations were found in the individual assessments of both land and lots. The chief purpose, however, of the investigation was to discover whether all the land sold was assessed the same percentage of its sale value as were all the town and city lots sold. Average figures have now been secured, for a sufficient number of counties, fairly representing the different soil types and economic conditions of the state, to warrant a general statement of what the investigation discloses.

Farm Land

In 1922 farm land, including improvements, in the state as a whole was assessed at the highest valuation ever used. The same was true in a large number of counties. or Property

... vestigation of sales ... assessed valuations of ... y lots, nearly all of ... ist of residence prop... r as business proper... ty can be separated, it is usually found to carry very low assessments. This is probably due in part to the tendency noted in the last paragraph for the lots of highest value to have the lowest relative assessments. In most counties investigated there can be no doubt that business property is assessed at less than most residence property.

The investigation has not gone far enough to give any average figures. Examples, however, can be given showing the ridiculously small assessments of some large properties. In one county a comparatively small plant valued by its owners at $5,000 is assessed for $685, or one-seventh of its estimated value. Another plant is valued at $40,000 and assessed for $1,500, or less than four per cent of its real value. In another county, a coal mining company has property conservatively valued at $2,000,000. Last year it was assessed at $38,000 or less than two per cent of its real value. In another county a well known manufacturing company in its annual report gives the value of its physical plant, equipment, materials, and finished goods at about $3,000,000. Last year it was assessed at a trifle more than $90,000, or three per cent of the value claimed in its annual report.

Conclusions Drawn

The information given above, though drawn, so far as it relates to real estate, from about one-eighth of the counties of the state, is believed to be more or less typical of conditions in other counties. In any case it is safe to say that in most counties and in the state as a whole, there is little uniformity in assessing different classes of property. So far as available evidence is sufficient to warrant conclusions, it is fairly certain that farm animals were assessed in 1922 at from 60 to 65 per cent of their fair cash value, while it is probable that land was assessed at an average of about 50 per cent, and town and city lots at less than 40 per cent of their fair cash value. It is also probable that mercantile, manufacturing, and mining properties, on the average, were assessed the lowest of any tangible properties in the state, but it is not possible to estimate average percentages.

The inequalities of assessments indicated above have cost farmers millions of dollars in taxes paid in the last two years. In one county, the county and state taxes alone collected this spring on land are $125,000 in excess of what they would be if land were assessed on the level of lots. In each of a number of other counties they are from $40,000 to $50,000.

Remedy Suggested

In most counties assessors were instructed to value all property this spring at 60 per cent of fair cash value. If carried out these instructions would require an increase in the assessment of land in most counties of the state. It would probably mean an increase in the assessments of town and city lots in most counties averaging at least 50 per cent, running up to 70 or 75 per cent in many counties, and mounting to over 100 per cent in certain cities which were assessed at less than 30 per cent in 1922. It is extremely improbable that any such violent increase in assessments of town and city lots will be made. It is very doubtful if the average of the new assessments of lots will prove to be much over 45 per cent of actual cash values.

It is highly important to farmers and farmers' organizations to know what the level of the new assessments will prove to be for farm animals, farm land, town and city lots, and so far as possible for business, manufacturing, and mining property. It is not enough to have succeeded in having instructions given to assessors to lower the assessed valuation of land or farm personal property. Such decreases are likely to be made very irregularly in different townships. If valuations are equalized by the County Boards of Review, as they should be, the question of relative valuations of different kinds of property is certain to be raised. The same question is certain to be raised by the Illinois Tax Commission this fall in its work of equalizing the valuations of different classes of property between the counties and in the state. The county farm bureau that knows how different classes of property are assessed this year is in a position to secure just assessments. This is no place for guess work or rule of thumb methods.

The farm bureaus which have investigated the 1922 assessed valuations and recent sales values of property are enthusiastic in supporting this project. They will continue this work by investigating the new assessments and finding out the facts. In order to help any farm bureaus which have not made the investigation, the Statistical Department of the I. A. A. offers to spend one day starting the investigation in each county requesting it, and to help in analyzing the data when secured. In most counties, records of 200 transfers should be sufficient. The necessary data can be secured at little cost, and will require one person's time for only a few days.

Co-operation Is Asked By I. A. A. Traffic Division

The Transportation department is asking the co-operation of farm bureau members in securing information where service may be given.

Each Monday morning a representative of the department goes to the Chicago stock yards and checks up on all losses on live stock of the week previous incurred by Illinois farm bureau members or shipping associations. The matter is then taken up with the shipper to get the facts of the case and to secure the authority to pursue the claims. The department is asking that more prompt replies be made to these inquiries so that it may know if adjustment is desired.

Farm bureau shippers of the state are also asked to inform the Transportation department of inadequate watering facilities or other undesirable conditions at live stock loading pens, so that they may be remedied before hot weather.

I. A. A. STATE PICNIC AT URBANA, JUNE 29th

EXECUTIVE BODY HOLDS SESSION IN CHICAGO OFFICE

Accept Resignation of Fred Baumberger; Hear Both Sides Roads Issue

The regular meeting of the I. A. A. Executive Committee was held at the Chicago office with all members present except Fred Baumberger, Reno. President S. H. Thompson presided.

Mr. Fox read a letter from Mr. Baumberger in which he tendered his resignation as a member of the committee due to conditions which made it difficult for him to attend the regular meetings. The resignation was accepted and a meeting of voting delegates of the 22nd district was called at East St. Louis on May 11, to fill the vacancy.

Regular routine business was taken up by the committee. R. A. Cowles presented a financial statement of the I. A. A. for the first quarter of 1923, which was adopted. Action was taken by the committee in clearly defining the duties of the treasurer. A statement in regard to the progress of the Co-operative Marketing bill was made by President Thompson for the Legislative Committee.

Hear Roads Question

Both sides of the million dollar bond issue for roads question were presented to the members of the committee.

(Continued on page 2)

Decline of Five Cents In Price Wool Pool Sacks

Due to an unexpected decline in the price of burlap, the Live Stock Marketing Department of the I. A. A. announces that a cut of five cents each has been made in the price of sacks for use in the wool pool.

The new prices went into effect May 1. New sacks now cost 50 cents each in lots of from one to 24 and 47 cents each in lots of 25 or more. Prices of No. 1 used sacks remain the same.

The Live Stock Department also wishes to notify wool growers that a number of companies are advertising prices of 14 cents per pound for twine. Such twine is made of jute and has the same effect upon wool as binder twine. It will only tie about 20 to 25 fleeces per pound compared to 25 to 40 fleeces that may be tied by standard twine.

Arrangements For Phosphate Supply Nearly Concluded

The Phosphate-Limestone Department of the I. A. A. has practically concluded an agreement with two of the ground rock phosphate producers in Tennessee for the supply of phosphate for the balance of 1923.

This fortunate arrangement gives the department a producer on each of the two roads,—the Louisville and Nashville and the Nashville, Chatanooga, and St. Louis, which will help in times of car shortage.

The specifications as to basic quality are: phosphorus, 13 per cent; fineness, 95 per cent through 100 mesh screen; and moisture not to exceed three per cent. The price based on this quality up to and including July 14, 1923, is $5.50 and thereafter till the end of the year, $6.50. Adjustments will be made either up or down as the grade varies in individual shipments from the specification as to basic quality.

Further details in regard to phosphate selling plans will be made later.

Will Levy Charge On Commercial Claims Collected

At the last meeting of the I. A. A. Executive Committee, action was taken authorizing the Transportation Department to levy a charge for strictly commercial claims which the department collects for individuals or co-operative associations.

Under this ruling, a commission will be charged on all freight overcharge, freight loss and damage, and general loss and damage claims collected. The commission charged will be as follows; for farm bureau members, 12½ per cent; for co-operative associations, 15 per cent; and for non-members, 25 per cent.

Charges to members will be the same as to non-members, subject to a refund upon certification by the county farm bureau that the individual is a member in good standing. The refund will be 12½ per cent less the original commission charged. This emphasizes the difference between the rate charged members and non-members.

Checks in payment of claims will be made payable to the Illinois Agricultural Association. The association will then issue checks in favor of the claimants, less the amount of commission. The ruling affects all claims collected after May 1.

AMENDMENTS TO BE USED AS ATTACK ON CO-OPERATIVE BILL

Next Appearance of Measure May Be Test of Strength In The House

With the legislative hopper at Springfield crammed with hundreds of bills, only a few of which have a ghost of a show for passage, the Illinois Co-operative Marketing Bill, at the time The Record goes to press, is still in the House. It is probable, however, that during the second or third week in May the measure will be brought up.

It is believed that the opposition, which consists to a large extent of Chicago representatives, will concentrate its attack upon amendments to weaken the bill rather than votes against it. There are members of the House who would not want to be placed on record as voting against the act yet who would vote for amendments to make it worthless.

The real contest on the bill, therefore, will probably resolve itself into a test of strength when the amendments are brought up.

Farmers who are supporting the bill, including the I. A. A. and the county farm bureaus, have willingly listened to and have answered objections brought up against the measure and have always considered any or all amendments brought up for the sincere purpose of trying to improve the act. It is probable, however, that at the next appearance of the bill, a number of amendments will be proposed whose only purpose is to indirectly kill the measure.

ALL ILLINOIS FARM BUREAU FOLKS ASKED TO GREAT ANNUAL OUTING

College of Agriculture "Open House" To Be Held At Same Time, Offering Chance To Take In Two Events; "Twin Cities" Easily Reached

Champaign-Urbana on June 29th.

The place and date of the I. A. A. state picnic for 1923 was thus decided at a meeting of county farm bureaus and officials of the I. A. A. and of the College of Agriculture at the Twin Cities recently. At another meeting which followed several days later, committees were named and the machinery was set in motion to prepare for the greatest state picnic ever held by the state farm bureau movement.

Crystal Lake Park, in Urbana, is to be the scene of the big farm gathering. This site offers one of the most desirable locations in the state—a large, grassy, wooded plot on the outskirts of Urbana through which a beautiful lake winds.

The "twin cities" are easily reached both by train and car from almost any part of Illinois. A more central location would be hard to find.

New Advantage

The 1923 state picnic offers a further advantage which has been enjoyed by none of the three preceding picnics, held at Champaign, Dixon and Olney in 1920, 1921 and 1922, respectively. This advantage consists of the co-operation of the College of Agriculture of the University of Illinois and the placing of the University "Open House," the time when farmers of the state flock to the college to see the experimental fields, in the same week as the picnic.

Instructive Trip

Farm Bureau visitors will thus be enabled to make the occasion not only a genuine outing and good time but also one of the most instructive trips they could possibly take.

The twin cities, Champaign and Urbana, have made arrangements to co-operate to the limit to show their farmer visitors the best sort of hospitality.

Name Committees

At the second meeting, in the offices of the county farm bureau in Champaign, the following committees were named:

GENERAL PICNIC COMMITTEE—J. D. Harper, Illinois Agricultural Association; J. D. Bilsborrow, Extension Service, College of Agriculture, University of Illinois; D. J. Holterman, Sadorus; C. R. Finley, Hoopeston; J. E. Smith, Mayor of Urbana; Ed Filson, President Champaign Chamber of Commerce; C. H. Oathout, Champaign County Farm

(Continued on page 4)

Cunningham Named As Farmer Member of Reserve Board

President Harding has appointed Edward H. Cunningham of Iowa as "dirt farmer" member of the federal reserve board.

Edward E. Jones of Pennsylvania was named a member of the farm loan board. Mr. Jones is at present connected with the federal land bank at Baltimore.

Mr. Cunningham's appointment fills the vacancy caused by the death of Milo D. Campbell of Michigan, appointed after Congress created the "dirt farmer" position on the board.

Mr. Cunningham's selection is given the unanimous aproval of Iowa Republican party leaders and farm bureau federations of the middle west.

Mr. Cunningham is well known to Illinois farmers for his work in the reorganization of the U. S. Grain Growers, Inc., and as secretary of the Iowa Farm Bureau Federation.

'Co-ops' Offer Real Hope, Says N. C. Supreme Court

The North Carolina Supreme Court, in upholding the constitutionality of the Co-operative Marketing Act passed in that state, an act similar to the one before the Illinois legislature, has delivered the following opinion on the merits of co-operative marketing:

"The co-operative system is the most hopeful movement ever inaugurated to obtain justice for, and improve the financial condition of farmers and laborers. The producers are paying all the costs and assuming all the responsibilities of these co-operative associations. They are taking all the risks. They are asking no assistance from the public treasury. They are forcing no one to join and they are exacting no inordinate prices for their product. They are associating themselves as authorized by the statute, like other persons, and they have signed mutual and fair agreements among themselves which would be futile unless those who have signed such agreements can be held to abide by the terms of such contracts."

Illinois Agricultural Association
RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by News Publicity Department, L. J. Montross, Director.

Entry as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of ten cents for subscription to the Illinois Agricultural Association Record.

OFFICERS

President, S. H. Thompson, Quincy.
Vice-President, A. O. Eckert, Belleville.
Secretary, Geo. A. Fox, Sycamore.
Treasurer, R. A. Cowles, Bloomington.

I. A. A. Office

General Office and Assistant to Secretary, J. D. Harper; Field Organization, J. C. Sailor; Organization Publicity, G. E. Metzger; News Publicity, L. J. Montross; Transportation, L. J. Quasey; Statistics, J. C. Watson; Finance, R. A. Cowles; Fruit and Vegetable Marketing, C. E. Durst; Live Stock Marketing, C. A. Stewart; Dairy Marketing, J. D. Lynch; Phosphate Limestone, J. R. Bent. Legal, Newton Jenkins.

EXECUTIVE BODY HOLDS SESSION IN CHICAGO OFFICE

(Continued from page 1)

Frank T. Sheets, State Superintendent of Highways, spoke in behalf of the million dollar bond issue, presenting figures and charts to show why the Legislature should pass the measure. Opposition to the measure was represented by S. E. Bradt, who spoke for the Illinois Bankers Association and others of the opposition.

While no action was taken by the Executive Committee on the proposed bond issue, the members were considerably enlightened as to the merits of both sides of the question.

Reports Submitted

Reports were submitted to the committee by the directors of the I. A. A. departments. J. R. Bent of the Phosphate-Limestone Department explained the proposed phosphate contract to the committee; C. A. Stewart of the Live Stock Marketing Department outlined a new membership agreement for shipping associations; and L. J. Quasey, Transportation director, told of some new plans of that department in regard to claims.

Near completion in the sign-up of agreements in the St. Louis milk territory was indicated in the report of A. D. Lynch, Dairy Marketing Department. A majority of all claimants and shareholders have already signed agreements. In a report by G. E. Metzger of the Organization Department, favorable progress in 1923 reorganization campaigns was outlined.

Decide on Picnic

Upon a renewal of an invitation by Mr. Holterman to hold the annual I. A. A. picnic at Crystal Lake Park, Urbana, the committee decided to accept and left plans for other arrangements with Secretary Fox and Champaign county people.

Before adjournment, the Executive body decided to hold its next meeting on June 6.

Need Service In Rail Shipping? I. A. A. Has Traffic Department

Practically all great industries whose welfare is bound up with railroad shipping have transportation experts on the job to protect their interests. Agriculture, the largest shipper of all Illinois industries, was not represented in transportation until the organization on a business basis of the I. A. A.

Today the organized farmer of Illinois has in the Traffic Department of the Illinois Agricultural Association, handled by Lee J. Quasey, director and G. W. Baxter, assistant, a service which takes care of all important phases of transportation for him.

Work of the department may be grouped into several divisions, as follows: 1. Freight rates, rules, and regulations. 2. Car supply. 3. Shipping facilities. 4. Freight train service. 5. Railroad claims, including freight and general loss and damage claims. 6. Miscellaneous.

Freight Rates, Rules and Regulations

Hundreds of tariffs containing information on freight rates of all commodities in which the farmer is interested, as well as rules and regulations affecting shipping on all railroads in the state are kept up to date. The farmer contemplating a shipment and desiring to know the correct rate and routing can get all the details from the department. Rules and regulations which are not clearly understood, are interpreted.

Another service under this division is the appearance of the department before the Illinois Commerce Commission or the Interstate Commerce Commission to protest unjust rates or rules. Surveys are made of freight rates on all farm products in order to form a basis for guidance.

Car Supply

One of the difficulties experienced by farmers of late, especially during the last four months of 1922, is the severe car shortage. Indications point to even a greater shortage during 1923. The department is on the job to remedy such situations. It goes before the railroads with information showing the shortage in a particular locality and strongly urges action.

At the last meeting of the I. A. A. Executive Committee, a resolution was passed, at the suggestion of the Transportation Department, that each county farm bureau appoint transportation committees to consist of two or more members to represent the interests of the various special agricultural interests of the county. These committees, working in co-operation with the Traffic Department, will make its work much more effective in car shortage complaints.

Shipping Facilities

Often there are cases when shipping associations complain of lack of shipping facilities at their local point. Sometimes a side track is needed or a site for stock scales. When they cannot get prompt action locally, they appeal to the Transportation Department.

The department investigates and ascertains if the complaint is justified. If a survey shows that the condition should be remedied, the department takes it up with the railroad or tells the shipping association whom to take the matter up with.

An example of action secured is the case in DeKalb county

TRAFFIC

LEE J. QUASEY

where a shipping association complained of the discrimination of local buyers who had leased a scale site. The complaint was investigated by the railroad at the request of the Transportation Department. The local buyers were found to have mistaken their privileges. Their lease was taken away and the scale site turned over to the shipping association.

Freight Train Service

A common cause of complaint on the part of shippers is layover delay in shipments. For instance, a carload of live stock may be delayed so long en route that serious loss is incurred by the shipper.

In such cases, the Transportation Department investigates the matter with the operating department of the railroad and urges improvements of conditions if physically possible.

Claim Prevention

Believing that "an ounce of prevention is worth a pound of cure," the Transportation Department aims to reduce shipping losses to a minimum. Especially is this the case with live stock.

Proper bedding of cars, partitions for mixed shipments, suitable pens, shelter and adequate watering facilities in the yards are all factors which the department deals with to prevent loss. In a typical instance, service was given to a live stock shipping association in Iroquois county in getting watering facilities installed by the railroad.

Railroad Claims

The department deals with freight claims, and general loss and damage claims.

In taking up freight claims, overcharge complaints are common and the shipper has no way of determining the justice of his claim. By taking it up with the traffic service of the I. A. A., his claim in investigated with the railroad. All that is necessary is for the department to have a copy of the account sales in the case of live stock shipments and similar evidence or a paid freight bill in the case of other shipments.

Many controversies arise between shippers and railroads over freight loss and damage claims. These cases are handled by the traffic service, but must always be properly supported by evidence, such as the original bill of lading or copy thereof, the paid freight bill, a copy of the account sales or invoice, and a statement by an individual who has knowledge of the facts of the case which tend to show that the railroad was either directly or indirectly responsible for the loss or damage.

Loss and Damage

While general loss and damage claims are not transportation claims, the department renders service in handling such cases, which includes loss by fire or killing of live stock in cases where a railroad company is involved. When individuals or associations present such claims, it is necessary that the date and place of accident, a list of the items of loss and damage and basis therefor, together with information showing how the amount was arrived at and a statement of the circumstances or conditions surrounding the case, be presented to the department.

The collection of such claims is the only instance in which a charge is levied by the department, such action having recently been taken by the I. A. A. Executive Committee, as the work is mainly for the benefit of individuals.

Miscellaneous

Miscellaneous matters handled by the Transportation Department include assistance in securing farm crossings, repairs to fences along right-of-ways, and other problems of a varied nature, in which the individual cannot secure justice alone.

An instance of miscellaneous service was the case in an Illinois county where a court decision was cited by the Transportation Department to prove that a farmers renting land traversed by a railroad, had the legal right to a crossing to get to that land. The crossing was built.

Justifies Existence

It would be a difficult task and it would take up much more space than this entire issue of The Record to narrate in detail the work of the Transportation Department of the I. A. A. The service that it renders on behalf of the farmers of Illinois in representing their interests in problems of transportation by the adjustment of claims, the securing of just rates, and the protection of the farmers' interests in general well justifies its existence as a service department of the I. A. A.

MORE SERVICE

Another example of I. A. A. service is the Transportation Department. Just as it would be impractical for the individual farmer to appear before the State Tax Commission on his own behalf, so it is with the problems of transportation which affect the farmer in all that he buys or sells. Read the accompanying story and find out how this department serves the farmers of Illinois in their individual and co-operative efforts.

MILK PRODUCERS OF BENTON FORM NEW CO-OPERATIVE

Dairy Department of I. A. A. Aids in Organization; Officers Elected

Leading dairymen supplying the city of Benton with milk have formed an organization to be incorporated as the Benton Co-operative Milk Producers association. Final steps were taken toward organization at a meeting held in April with the Dairy Marketing Department of the I. A. A.

Officers elected to lead the new association are as follows: president, Earl Seever; vice president, W. C. Hobbs; secretary-treasurer, Earl Doty.

About a year ago the Dairy Marketing Department helped to organize a bargaining association of milk producers at Benton, which was more or less of a temporary organization. Its success led to the desire for a permanent incorporated association.

Objects

The new co-operative will strive to improve the milk marketing conditions of Benton by stabilizing the city milk market, giving the consumers better service and a more standard quality of milk, and by encouraging more efficient methods of dairying in the vicinity.

Illinois Poultry Products Amount To Total of Over $60,000,000 in One Year

The lowly hen is not considered an especially important factor in agricultural production in Illinois, yet the value of poultry and egg products in the state was $63,771,952 in 1919, the last year when a complete census was taken.

In the country as a whole, poultry and egg products in 1920 contributed almost seven per cent of the nation's agricultural wealth, or $1,225,000,000, a sum not to be "sneezed" at by any means. And this has been done in the face of the fact that poultry production on most farms is considered of very minor importance and little attention has been paid to poultry marketing by the producer.

Much is heard of the virtues of California as a poultry and egg producing state and doubtless many have taken it for granted that the Golden Gate state is the leader in that phase of agricultural production. Yet Illinois, according to the 1920 census, produced in 1919 nearly twice as many eggs as did California.

While California's hens may cackle more loudly than the biddies of Illinois, the real secret of California's success lies in co-operative marketing of eggs. This product has made the Petaluma district in that state especially noted and the eggs from that section have attained great fame on the New York market, due to more efficient marketing methods brought about by co-operation.

Illinois Ranks Third

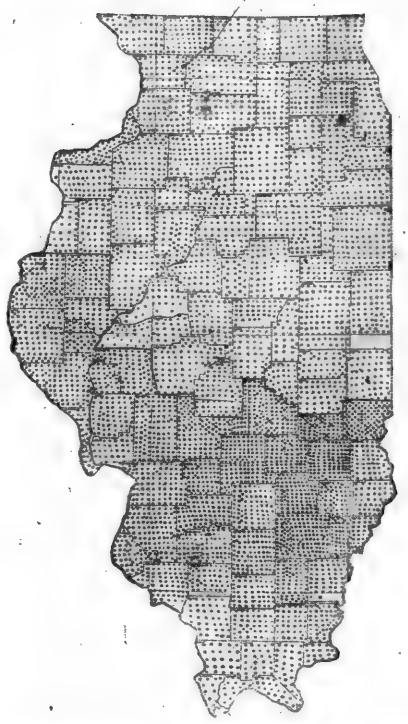
In cold figures of egg production, Illinois ranked third in 1919 with over 100,000,000 dozen produced. Iowa and Missouri stood first and second with over 114 million and 112 million dozen, respectively. California placed seventh with somewhat over 57,000,000 dozen as her production.

New York and Chicago naturally take the lead as the nation's principal egg markets. The egg receipts at the New York market in 1920 were 5,157,535 cases, while Chicago received 4,153,584 cases.

Strange as it may seem, Illinois furnished almost 20 per cent of the New York receipts for 1920, being the leading source of eggs for that market. Her contribution was 1,006,440 cases. Iowa was second with 616,130 cases, while Indiana and California stood third and fourth.

Chicago Market

Market figures for 1921 show that Missouri led on the Chicago market, having shipped 825,912 cases of eggs. Iowa was second with 705,995 cases, and Kansas third with 481,684 cases. Illinois only supplied 205,178 cases to Chicago, being eighth and furnishing only about five per cent of the eggs on the market.



The accompanying map portrays the distribution of egg production among the counties of Illinois and the "egg belt," or area of greatest production, is outlined.

Wayne County In Lead

According to 1920 census figures, Wayne county led in egg production in 1919, having produced 2,247,180 dozen, with Shelby and Iroquois counties closely following at second and third places.

McLean county is credited with producing the most poultry in 1919, with 585,420 head, Shelby being second and Iroquois third.

ILLINOIS AND THE GOLDEN EGG

Map showing distribution of egg production in Illinois. Each dot represents 15,000 dozen eggs. Note "egg belt" in south central part of state or the area where greatest production in indicated.

The production figures of these three counties do not vary greatly.

I. A. A. Investigates

In 1922 the Poultry and Egg Marketing Department of the I. A. A. made a careful study of market methods as affecting poultry products. Investigations were made as to the advisability of forming co-operative poultry and egg marketing associations and a start was made in the formation of some associations, notably in Shelby county. In some localities where such co-operatives were contemplated, the department advised against organization, due to the fact that there was not a sufficient volume of business to indicate success.

Associations were formed in Oconee, Tower Hill, Shelbyville, Westervelt and Stewardson, Shelby county, and at Flora, Clay county.

Results Secured

As a result of careful grading and standardization of the poultry products handled, every shipment made by these associations sold for at least half a cent premium, and many shipments commanded as high as five cents premium on the Chicago market.

Economy in marketing costs was also evident. For example, one association which transacted $4,410 worth of business in a month, did it at a total cost of only $158.00.

One result of the formation of associations was the fact that in communities where co-operative marketing associations were formed, the prices of eggs rose from three to eight cents per dozen and poultry from four to eight cents per pound in the immediate neighborhoods. This boost in price naturally caused farmers in outlying districts to bring eggs and poultry to the town where the prices had been boosted. This brought about a raise of about three cents in egg and poultry prices in these outlying districts. Thus the effect of farmer marketing reached out far beyond the territory in which the associations were located.

Educational Value

The educational value of the associations was also great, in that the farmer members have learned how to standardize, grade, and make their own individual shipments to market at proper times. They also learned how to study market conditions and market trends.

It may be said that, among other things, the very existence of the poultry marketing associations formed by the I. A. A. had its effect upon poultry and egg dealers all over the state. Prices were kept up to discourage the forming of co-operative associations. This is emphasized by the following statement made by a member of an egg dealers' organization in 1922:

"While dealers will be inclined to pay lower prices for poultry and eggs this year in order to make up some of the losses suffered in the industry by readjustment, we would advise you to pay as much as possible because the lower prices will tend to stimulate the springing up of co-operative marketing associations."

Bradfute Calls Conference of Research Men

President O. E. Bradfute of the American Farm Bureau Federation has called a conference of agricultural economists of twelve middle western states to meet in Chicago, May 18, at the Sherman hotel.

The object of the meeting is to talk over the research work which is now being done by various organizations and to consider the desirability of organizing a Middle West Agricultural Economics Research Committee. A similar group functions in New England successfully, serving as a clearing house for economic information.

Stimulation and co-ordination of research activities bearing upon agriculture in the fields of taxation, central market distribution, transportation, market and mortgage financing, farm income and production would be among the duties of the committee.

Invitations have been sent to state colleges of agriculture, state departments of agriculture, state bureaus of markets, state farm bureaus, Federal Reserve Banks, Federal Land Banks, Chambers of Commerce, as well as to many miscellaneous organizations allied to agricultural economics, to attend the conference.

STRONGER LOCALS ARE PLANNED FOR STEPHENSON 'CO-OP'

In response to a request from the Stephenson County Farm Bureau, the I. A. A. Dairy Marketing Department has been devoting some time recently in supplying a stronger type of organization to locals of the Stephenson County Co-operative Marketing Company.

The plan will give each of the 12 locals of the co-operative a stronger organization with officers and enable them to function better in carrying out the plans of the marketing company.

Each local may elect one representative from each 50 members to serve on an advisory council composed of representatives from all the locals. This advisory council participates in each meeting of the board of directors of the marketing company. Thus each local is given a more direct voice in the affairs of the co-operative.

The Dakota Local Branch has adopted the new plan and other locals have expressed a desire to use the plan to strengthen their organizations and to give them more responsibility in the governing of the association.

Producers' Board Hears of Great Growth of Movement

Approximately 100,000 farmers are marketing their live stock through eight agencies of the National Live Stock Producers Association at the rate of $100,000,000 annually, according to the report of President John G. Brown at the regular quarterly session of the board of directors held in Chicago a few days ago.

A steady gain in volume of business is being experienced each month by the Producers. For instance, a report showed that the total value of live stock handled in February was $5,455,090.12 on 194,158 head, and for March, $5,863,683,08 on 206,203 head. Of these about 40,000 were cattle, calves, and sheep, hogs making up the bulk of the live stock handled. An increase in sales accounts from 6,809 in February to 8,250 in March was noted.

Amount of Business

In Mr. Brown's quarterly report, he showed that 15 to 20 per cent of the total live stock shipped to Buffalo is sold by the Producers; 5 to 8 per cent at Chicago, or more than 1,000 carloads per month; 25 to 30 per cent at Indianapolis; 15 to 18 per cent at East St. Louis; and 25 to 30 per cent at Peoria.

Kansas City, which opened in March, has progressed from twenty-sixth place during an early week after opening, to tenth place during the last week in April.

The Peoria Producers have voted to return to members 10 per cent of the commissions as patronage dividends after May 31. Fifty per cent of the membership fee will also be returned.

The Chicago agency has repaid its membership fees in full and will pay a substantial patronage dividend after the close of the first year's business, June 30.

Expansion Provided For

The board of directors in session voted to invest complete executive authority in President Brown and requested that he devote as much of his time as necessary to the executive affairs of the organization. Mr. Brown has established headquarters in the executive offices of the national association, 608 S. Dearborn St., Chicago, and will direct the work from there.

This arrangement was found expedient because the opening of new branches of the Producers at various markets requires General Manager F. M. Simpson to be absent almost continuously from the Chicago office to oversee the details of starting new terminals.

Mr. Simpson opened up a Producers agency at Sioux Falls, S. D., May 3, and has been devoting his time more recently to work at Cleveland and Oklahoma City where agencies will be established.

Praise Work of Brown

The national board declared that President Brown had shown unusual genius in harmonizing the various elements of the live stock industry. Effective co-operation has been made possible at the terminals and the organization has been built constructively upon a sound foundation for the orderly marketing of live stock.

Addresses were made at the directors' meeting by President Bradfute of the A. F. B. F. and Walton Peteet, director of co-operative marketing. Mr. Bradfute congratulated the Producers upon their splendid and sound growth and named the organization as one of the outstanding examples of co-operation. Mr. Peteet especially urged a simultaneous development of the sales department and field service work.

First on Four Markets

The Producers were first on four markets, Buffalo, Indianapolis, St. Louis, and Peoria, during the last two weeks of April. The Chicago agency stood second both weeks, while Kansas City swung from eleventh to tenth place during the seventh and eighth weeks of business.

Illinois Agricultural Association
RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by News Publicity Department, L. J. Montross, Director.

Entry as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of ten cents for subscription to the Illinois Agricultural Association Record.

OFFICERS

President, S. H. Thompson, Quincy.
Vice-President, A. O. Eckert, Belleville
Secretary, Geo. A. Fox, Sycamore.
Treasurer, R. A. Cowles, Bloomington.

Directors of Departments, I. A. A. Office

General Office and Assistant to Secretary, J. D. Harper; Field Organization, J. C. Sailor; Organization Publicity, G. E. Metzger; News Publicity, L. J. Montrose; Transportation, L. J. Quasey; Statistics, J. C. Watson; Finance, R. A. Cowles; Fruit and Vegetable Marketing, C. E. Durst; Live Stock Marketing, C. A. Stewart; Dairy Marketing, A. D. Lynch; Phosphate Limestone, J. R. Bent. Legal, Newton Jenkins.

EXECUTIVE BODY HOLDS SESSION IN CHICAGO OFFICE

(Continued from page 1)

Frank T. Sheets, State Superintendent of Highways, spoke in behalf of the million dollar bond issue, presenting figures and charts to show why the Legislature should pass the measure. Opposition to the measure was represented by S. E. Bradt, who spoke for the Illinois Bankers Association and others of the opposition.

While no action was taken by the Executive Committee on the proposed bond issue, the members were considerably enlightened as to the merits of both sides of the question.

Reports Submitted

Reports were submitted to the committee by the directors of the I. A. A. departments. J. R. Bent of the Phosphate Limestone Department explained the proposed phosphate contract to the committee; C. A. Stewart of the Live Stock Marketing Department outlined a new membership agreement for shipping associations; and L. J. Quasey, Transportation director, told of some new plans of that department in regard to claims.

Near completion in the sign-up of agreements in the St. Louis milk territory was indicated in the report of A. D. Lynch, Dairy Marketing Department. A majority of all claimants and shareholders have already signed agreements. In a report by G. E. Metzger of the Organization Department, favorable progress in 1923 reorganization campaigns was outlined.

Decide on Picnic

Upon a renewal of an invitation by Mr. Holterman to hold the annual I. A. A. picnic at Crystal Lake Park, Urbana, the committee decided to accept and left plans for other arrangements with Secretary Fox and Champaign county people.

Before adjournment, the Executive body decided to hold its next meeting on June 6.

Need Service In Rail Shipping? I. A. A. Has Traffic Department

Practically all great industries whose welfare is bound up with railroad shipping have transportation experts on the job to protect their interests. Agriculture, the largest shipper of all Illinois industries, was not represented in transportation until the organization on a business basis of the I. A. A.

Today the organized farmer of Illinois has in the Traffic Department of the Illinois Agricultural Association, handled by Lee J. Quasey, director and G. W. Baxter, assistant, a service which takes care of all important phases of transportation for him.

Work of the department may be grouped into several divisions, as follows: 1. Freight rates, rules, and regulations. 2. Car supply. 3. Shipping facilities. 4. Freight train service. 5. Railroad claims, including freight and general loss and damage claims. 6. Miscellaneous.

Freight Rates, Rules and Regulations

Hundreds of tariffs containing information on freight rates of all commodities in which the farmer is interested, as well as rules and regulations affecting shipping on all railroads in the state are kept up to date. The farmer contemplating a shipment and desiring to know the correct rate and routing can get all the details from the department. Rules and regulations which are not clearly understood, are interpreted.

Another service under this division is the appearance of the department before the Illinois Commerce Commission or the Interstate Commerce Commission to protest unjust rates or rules. Surveys are made of freight rates on all farm products in order to form a basis for guidance.

Car Supply

One of the difficulties experienced by farmers of late, especially during the last four months of 1922, is the severe car shortage. Indications point to even a greater shortage during 1923. The department is on the job to remedy such situations. It goes before the railroads with information showing the shortage in a particular locality and strongly urges action.

At the last meeting of the I. A. A. Executive Committee, a resolution was passed, at the suggestion of the Transportation Department, that each county farm bureau appoint transportation committees to consist of two or more members to represent the interests of the various special agricultural interests of the county. These committees, working in co-operation with the Traffic Department, will make its work much more effective in car shortage complaints.

Shipping Facilities

Often there are cases when shipping associations complain of lack of shipping facilities at their local point. Sometimes a side track is needed or a site for stock scales. When they cannot get prompt action locally, they appeal to the Transportation Department.

The department investigates and ascertains if the complaint is justified. If a survey shows that the condition should be remedied, the department takes it up with the railroad or tells the shipping association whom to take the matter up with.

An example of action secured is the case in DeKalb county

TRAFFIC

LEE J. QUASEY

where a shipping association complained of the discrimination of local buyers who had leased a scale site. The complaint was investigated by the railroad at the request of the Transportation Department. The local buyers were found to have mistaken their privileges. Their lease was taken away and the scale site turned over to the shipping association.

Freight Train Service

A common cause of complaint on the part of shippers is layover delay in shipments. For instance, a carload of live stock may be delayed so long en route that serious loss is incurred by the shipper.

In such cases, the Transportation Department investigates the matter with the operating department of the railroad and urges improvements of conditions if physically possible.

Claim Prevention

Believing that "an ounce of prevention is worth a pound of cure," the Transportation Department aims to reduce shipping losses to a minimum. Especially is this the case with live stock.

Proper bedding of cars, partitions for mixed shipments, suitable pens, shelter and adequate watering facilities in the yards are all factors which the department deals with to prevent loss. In a typical instance, service was given to a live stock shipping association in Iroquois county in getting watering facilities installed by the railroad.

Railroad Claims

The department deals with freight claims, and general loss and damage claims.

In taking up freight claims, overcharge complaints are common and the shipper has no way of determining the justice of his claim. By taking it up with the traffic service of the I. A. A., his claim in investigated with the railroad. All that is necessary is for the department to have a copy of the account sales in the case of live stock shipments and similar evidence or a paid freight bill in the case of other shipments.

MORE SERVICE

Another example of I. A. A. service is the Transportation Department. Just as it would be impractical for the individual farmer to appear before the State Tax Commission on his own behalf, so it is with the problems of transportation which affect the farmer in all that he buys or sells. Read the accompanying story and find out how this department serves the farmers of Illinois in their individual and co-operative efforts.

Many controversies arise between shippers and railroads over freight loss and damage claims. These cases are handled by the traffic service, but must always be properly supported by evidence, such as the original bill of lading or copy thereof, the paid freight bill, a copy of the account sales or invoice, and a statement by an individual who has knowledge of the facts of the case which tend to show that the railroad was either directly or indirectly responsible for the loss or damage.

Loss and Damage

While general loss and damage claims are not transportation claims, the department renders service in handling such cases, which includes loss by fire or killing of live stock in cases where a railroad company is involved. When individuals or associations present such claims, it is necessary that the date and place of accident, a list of the items of loss and damage and basis therefor, together with information showing how the amount was arrived at and a statement of the circumstances or conditions surrounding the case, be presented to the department.

The collection of such claims is the only instance in which a charge is levied by the department, such action having recently been taken by the I. A. A. Executive Committee, as the work is mainly for the benefit of individuals.

Miscellaneous

Miscellaneous matters handled by the Transportation Department include assistance in securing farm crossings, repairs to fences along right-of-ways, and other problems of a varied nature, in which the individual cannot secure justice alone.

An instance of miscellaneous service was the case in an Illinois county where a court decision was cited by the Transportation Department to prove that a farmers renting land traversed by a railroad, had the legal right to a crossing to get to that land. The crossing was built.

Justifies Existence

It would be a difficult task and it would take up much more space than this entire issue of The Record to narrate in detail the work of the Transportation Department of the I. A. A. The service that it renders on behalf of the farmers of Illinois in representing their interests in problems of transportation by the adjustment of claims, the securing of just rates, and the protection of the farmers' interests in general well justifies its existence as a service department of the I. A. A.

MILK PRODUCERS OF BENTON FORM NEW CO-OPERATIVE

Dairy Department of I. A. A. Aids in Organization; Officers Elected

Leading dairymen supplying the city of Benton with milk have formed an organization to be incorporated as the Benton Co-operative Milk Producers association. Final steps were taken toward organization at a meeting held in April with the Dairy Marketing Department of the I. A. A.

Officers elected to lead the new association are as follows: president, Earl Seever; vice president, W. C. Hobbs; secretary-treasurer, Earl Doty.

About a year ago the Dairy Marketing Department helped to organize a bargaining association of milk producers at Benton, which was more or less of a temporary organization. Its success led to the desire for a permanent incorporated association.

Objects

The new co-operative will strive to improve the milk marketing conditions of Benton by stabilizing the city milk market, giving the consumers better service and a more standard quality of milk, and by encouraging more efficient methods of dairying in the vicinity.

Illinois Poultry Products Amount To Total of Over $60,000,000 in One Year

The lowly hen is not considered an especially important factor in agricultural production in Illinois, yet the value of poultry and egg products in the state was $63,771,952 in 1919, the last year when a complete census was taken.

In the country as a whole, poultry and egg products in 1920 contributed almost seven per cent of the nation's agricultural wealth, or $1,225,000,000, a sum not to be "sneezed" at by any means. And this has been done in the face of the fact that poultry production on most farms is considered of very minor importance and little attention has been paid poultry marketing by the producer.

Much is heard of the virtues of California as a poultry and egg producing state and doubtless many have taken it for granted that the Golden Gate state is the leader in that phase of agricultural production. Yet Illinois, according to the 1920 census, produced in 1919 nearly twice as many eggs as did California.

While California's hens may cackle more loudly than the biddies of Illinois, the real secret of California's success lies in cooperative marketing of eggs. This product has made the Petaluma district in that state especially noted and the eggs from that section have attained great fame on the New York market, due to more efficient marketing methods brought about by co-operation.

Illinois Ranks Third

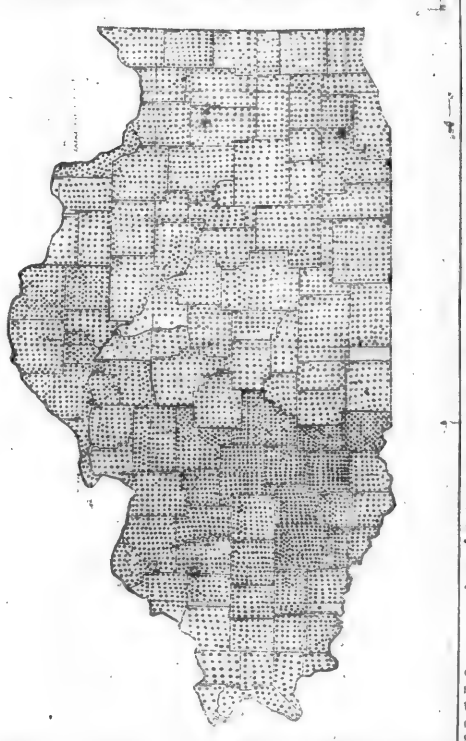
In cold figures of egg production, Illinois ranked third in 1919 with over 100,000,000 dozen produced. Iowa and Missouri stood first and second with over 114 million and 112 million dozen, respectively. California placed seventh with somewhat over 57,000,000 dozen as her production.

New York and Chicago naturally take the lead as the nation's principal egg markets. The egg receipts at the New York market in 1920 were 5,157,535 cases, while Chicago received 4,153,584 cases.

Strange as it may seem, Illinois furnished almost 20 per cent of the New York receipts for 1920, being the leading source of eggs for that market. Her contribution was 1,006,440 cases. Iowa was second with 616,130 cases, while Indiana and California stood third and fourth.

Chicago Market

Market figures for 1921 show that Missouri led on the Chicago market, having shipped 825,912 cases of eggs. Iowa was second with 705,995 cases, and Kansas third with 481,684 cases. Illinois only supplied 205,178 cases to Chicago, being eighth and furnishing only about five per cent of the eggs on the market.



The accompanying map portrays the distribution of egg production among the counties of Illinois and the "egg belt," or area of greatest production, is outlined.

Wayne County In Lead

According to 1920 census figures, Wayne county led in egg production in 1919, having produced 2,247,180 dozen, with Shelby and Iroquois counties closely following at second and third places.

McLean county is credited with producing the most poultry in 1919, with 585,420 head, Shelby being second and Iroquois third. The production figures of these three counties do not vary greatly.

ILLINOIS AND THE GOLDEN EGG

Map showing distribution of egg production in Illinois. Each dot represents 15,000 dozen eggs. Note "egg belt" in south central part of state or the area where greatest production in indicated.

I. A. A. Investigates

In 1922 the Poultry and Egg Marketing Department of the I. A. A. made a careful study of market methods as affecting poultry products. Investigations were made as to the advisability of forming co-operative poultry and egg marketing associations and a start was made in the formation of some associations, notably in Shelby county. In some localities where such co-operatives were contemplated, the department advised against organization, due to the fact that there was not a sufficient volume of business to indicate success.

Associations were formed in Oconee, Tower Hill, Shelbyville, Westervelt and Stewardson, Shelby county, and at Flora, Clay county.

Results Secured

As a result of careful grading and standardization of the poultry products handled, every shipment made by these associations sold for at least half a cent premium, and many shipments commanded as high as five cents premium on the Chicago market.

Economy in marketing costs was also evident. For example, one association which transacted $4,410 worth of business in a month, did it at a total cost of only $158.00.

One result of the formation of associations was the fact that in communities where co-operative marketing associations were formed, the prices of eggs rose from three to eight cents per dozen and poultry from four to eight cents per pound in the immediate neighborhoods. This boost in price naturally caused farmers in outlying districts to bring eggs and poultry to the town where the prices had been boosted. This brought about a raise of about three cents in egg and poultry prices in these outlying districts. Thus the effect of farmer marketing reached out far beyond the territory in which the associations were located.

Educational Value

The educational value of the associations was also great, in that the farmer members have learned how to standardize, grade, and make their own individual shipments to market at proper times. They also learned how to study market conditions and market trends.

It may be said that, among other things, the very existence of the poultry marketing associations formed by the I. A. A. had its effect upon poultry and egg dealers all over the state. Prices were kept up to discourage the forming of co-operative associations. This is emphasized by the following statement made by a member of an egg dealers' organization in 1922:

"While dealers will be inclined to pay lower prices for poultry and eggs this year in order to make up some of the losses suffered in the industry by readjustment, we would advise you to pay as much as possible because the lower prices will tend to stimulate the springing up of co-operative marketing associations."

Bradfute Calls Conference of Research Men

President O. E. Bradfute of the American Farm Bureau Federation has called a conference of agricultural economists of twelve middle western states to meet in Chicago, May 18, at the Sherman hotel.

The object of the meeting is to talk over the research work which is now being done by various organizations and to consider the desirability of organizing a Middle West Agricultural Economics Research Committee. A similar group functions in New England successfully, serving as a clearing house for economic information.

Stimulation and co-ordination of research activities bearing upon agriculture in the fields of taxation, central market distribution, transportation, market and mortgage financing, farm income and production would be among the duties of the committee.

Invitations have been sent to state colleges of agriculture, state departments of agriculture, state bureaus of markets, state farm bureaus, Federal Reserve Banks, Federal Land Banks, Chambers of Commerce, as well as to many miscellaneous organizations allied to agricultural economics, to attend the conference.

STRONGER LOCALS ARE PLANNED FOR STEPHENSON 'CO-OP'

In response to a request from the Stephenson County Farm Bureau, the I. A. A. Dairy Marketing Department has been devoting some time recently in supplying a stronger type of organization to locals of the Stephenson County Co-operative Marketing Company.

The plan will give each of the 12 locals of the co-operative a stronger organization with officers and enable them to function better in carrying out the plans of the marketing company.

Each local may elect one representative from each 50 members to serve on an advisory council composed of representatives from all the locals. This advisory council participates in each meeting of the board of directors of the marketing company. Thus each local is given a more direct voice in the affairs of the co-operative.

The Dakota Local Branch has adopted the new plan and other locals have expressed a desire to use the plan to strengthen their organizations and to give them more responsibility in the governing of the association.

Producers' Board Hears of Great Growth of Movement

Approximately 100,000 farmers are marketing their live stock through eight agencies of the National Live Stock Producers Association at the rate of $100,000,000 annually, according to the report of President John G. Brown at the regular quarterly session of the board of directors held in Chicago a few days ago.

A steady gain in volume of business is being experienced each month by the Producers. For instance, a report showed that the total value of live stock handled in February was $5,455,090.12 on 194,158 head, and for March, $5,863,883.08 on 266,203 head. Of these about 40,000 were cattle, calves, and sheep, hogs making up the bulk of the live stock handled. An increase in sales accounts from 6,809 in February to 8,250 in March was noted.

Amount of Business

In Mr. Brown's quarterly report, he showed that 15 to 20 per cent of the total live stock shipped to Buffalo is sold by the Producers; 5 to 8 per cent at Chicago, or more than 1,000 carloads per month; 25 to 30 per cent at Indianapolis; 15 to 18 per cent at East St. Louis; and 25 to 30 per cent at Peoria.

Kansas City, which opened in March, has progressed from twenty-sixth place during an early week after opening, to tenth place during the last week in April.

The Peoria Producers have voted to return to members 10 per cent of the commissions as patronage dividends after May 31. Fifty per cent of the membership fee will also be returned.

The Chicago agency has repaid its membership fees in full and will pay a substantial patronage dividend after the close of the first year's business, June 30.

Expansion Provided For

The board of directors in session voted to invest complete executive authority in President Brown and requested that he devote as much of his time as necessary to the executive affairs of the organization. Mr. Brown has established headquarters in the executive offices of the national association, 608 S. Dearborn St., Chicago, and will direct the work from there.

This arrangement was found expedient because the opening of new branches of the Producers at various markets requires General Manager F. M. Simpson to be absent almost continuously from the Chicago office to oversee the details of starting new terminals.

Mr. Simpson opened up a Producers agency at Sioux Falls, S. D., May 3, and has been devoting his time more recently to work at Cleveland and Oklahoma City where agencies will be established.

Praise Work of Brown

The national board declared that President Brown had shown unusual genius in harmonizing the various elements of the live stock industry. Effective co-operation has been made possible at the terminals and the organization has been built constructively upon a sound foundation for the orderly marketing of live stock.

Addresses were made at the directors' meeting by President Bradfute of the A. F. B. F. and Walton Peteet, director of co-operative marketing. Mr. Bradfute congratulated the Producers upon their splendid and sound growth and named the organization as one of the outstanding examples of co-operation. Mr. Peteet especially urged a simultaneous development of the sales department and field service work.

First on Four Markets

The Producers were first on four markets, Buffalo, Indianapolis, St. Louis, and Peoria, during the last two weeks of April. The Chicago agency stood second both weeks, while Kansas City swung from eleventh to tenth place during the seventh and eighth weeks of business.

Come to Urbana for I. A. A. Picnic, June 29th!

PICNIC AT URBANA IS 4th BY I.A.A. AND FARM BUREAUS

Springfield, Dixon and Olney Entertain Farmers During Last Three Years

The state picnic just scheduled by the county farm bureaus and the I. A. A. for Champaign-Urbana on June 29 will be the fourth great state-wide picnic held by the Illinois state and county farm bureau organization.

The picnics have already become a tradition, looked forward to each year. They are more than a mere merry-making: they are the time of the year when the farm bureau meets, shakes hands, gets acquainted, plays, learns and unites for a better agriculture.

Springfield in 1920

The first picnic, held in a grove in Sangamon County near Springfield in the summer of 1920, drew a crowd estimated at eight thousand. The first state-wide horseshoe pitching tournament was held at this picnic.

The following year, on September 6, 1921, the state picnic was held at Dixon, in Lee County. A crowd of nearly 10,000 by actual count, attended.

Olney Last Year

Last year's state picnic, at Olney, in Richland County, was given a bad deal by the weather man. Rain clouds loomed the evening before and descended upon the crowd on the day of the picnic. The result was a crowd of about 5,000 where easily twice this many would otherwise have attended, in view of the splendid preparations made by the picnic committee of the county farm bureaus.

Remember the Date!

But never have the I. A. A. and the county farm bureaus had a more splendid opportunity for the state picnic than this year. The co-operation of the College of Agriculture and the chance to survey the fields at the university is an attraction to this year's picnic that cannot be over-estimated. The "twin cities" are easily reached by road from almost anywhere in central Illinois.

Paste the date in your hatband—June 29, at Urbana!

Alabama Paper Praises Work of Peteet In South

In speaking of the position of leadership held by Walton Peteet as Director of Co-operative Marketing with the American Farm Bureau Federation, the Alabama Farm Bureau News said in a recent issue:

"Alabama members have come in contact with this big and brainy Texan. He has been in this state for several important meetings and has impressed those who met him as one of the ablest men in the Farm Bureau movement. He has been an outstanding figure in the South in cotton marketing, with a tremendous zeal and energy which make him the ideal leader in the new field he has been called to."

JUNE 29 THE DATE—HERE'S THE PLACE!

THIS airplane view of Crystal Lake Park at Urbana gives an idea of the beautiful, winding lake on the grounds and the trees and grass. The park offers one of the most charming locations for a picnic of any place in the state.

"Barnyard Golf" Pitching Feature of Each Picnic

"It's a ringer!"

This exclamation is one that was heard time and time again at Springfield, Dixon and Olney at the last three I. A. A. picnics. For one of the main events of these affairs was the state-wide horseshoe pitching tournaments for the state farm bureau championship.

In 1920 a cup was put up to be kept for a year by the winners of each tournament. Any team winning it for three consecutive years was to keep it permanently.

Ed Torbert and Joe Heskett, of the DeWitt County Farm Bureau won the trophy all three years and now retain it permanently.

At the recent meeting of the general picnic committee at Champaign-Urbana, it was the opinion that the horseshoe pitching tournament should be continued at the picnic this year. As many counties as possible are urged to enter teams. Only farm bureau members are eligible to play.

Another trophy will be put up for the championship and more details about the contest will be given in the next Record.

Writer Says Farm Bureau Man "Best Mind" At Capital

What sort of a fellow is Gray Silver, who is the head of the legislative office of the American Farm Bureau Federation at Washington? More than one Illinois farmer has asked himself this question, when he read of the accomplishments of the Farm Bloc, which was organized by the A. F. B. F. It is answered in "Judge," the issue of March 24, By Herbert Corey, celebrated correspondent.

"There are other organizations which have agents here (in Washington), of course," writes Mr. Corey, "but Gray Silver is the best mind of them all. They compare with him as a yellow tulip does with the Aurora borealis.

"The only thing that even sounds phony about Gray Silver is his name, and that's real. He is the man who made a majority of the House and Senate determine to raise whiskers and wear boots during the summer vacation. It is not often that Silver uses harsh measures to carry through a plan, but when he does get rough a horsehoer's rasp sounds like velvet. He is essentially an organizer rather than an individualist.

"He became the most powerful individual engaged in molding legislation in Washington—no one who knows the situation would question that description—because he could not help himself. When farmers had no real organization, Gray Silver was made a member of every committee sent to Washington to ask Congress to behave, because he lived near at hand and would pay his own way. When the A. F. B. F. determined to take an active hand he came to Washington to stay four years. He has tried to get back to his thousand-acre farm in West Virginia and is not let."

Over Million and Half Fleeces Are Pledged to Pool

According to C. J. Fawcett, assistant manager of the National Wool Warehouse and Storage Company, which handles pooled wool for several states, a total of 1,700,000 fleeces are pledged for the 1923 wool pool. The contracts call for delivery of wool immediately after shearing.

Mr. Fawcett states that it is quite universally recognized by the wool growers of the west that the pool has been the means of stimulating the price paid in a local way by speculators from 3 to 5 cents per pound. In the seasons of 1921 and 1922 the wool pools were very successful, returning to the growers substantial increase above the price obtainable locally at shearing time.

At least ten states are organizing for the co-operative marketing of potatoes under the Peteet-Sapiro plan.

INSPECTION FARM PRODUCTS IS AIM OF SENATE BILL

Would Especially Benefit Fruit Growers; Four Main Provisions

A bill for an act to authorize the director of the Illinois Department of Agriculture to establish inspection and standardization service for all kinds of agricultural and horticultural products, to standardize containers therefor, and to employ inspectors, was recently introduced into the Illinois Senate by Senator William S. Jewell, Fulton county.

This act will enable growers to take advantage of the Federal law which provides for shipping point inspection. It cannot be used in Illinois with existing machinery.

The passage of the bill is especially desired by Illinois fruit and vegetable growers in that it is especially applicable to perishable products. In the past, some unscrupulous buyers have rejected shipments for unwarranted reasons when they could profit thereby. Shipping point inspection will protect the grower as it insures the condition of the products before transportation. With this service, the grower will be protected from unwarranted rejections, as previous inspection by licensed U. S. inspectors will make the shipment the property of the buyer when quotation is accepted.

Four Main Provisions

There are four main provisions which characterize the bill. First, it establishes an inspection division under the Department of Agriculture. Second, it provides for the establishment of standards for all agricultural products following a hearing and after proper notice has been given. It also sets standards for containers.

Third, it authorizes the employment of inspectors, the raising of fees to pay for inspection, and co-operation with the United States Department of Agriculture in carrying out the provisions of the bill. Fourth, it authorizes the appropriation of funds to carry out the work.

Amend Apple Law

Senator Jewell has also introduced into the Senate an amendment to the apple grading law which was passed two years ago. It will make the law conform to the grading rules now in use by the United States Department of Agriculture.

As it new stands, the apple law allows the grower to grade his products in accordance with the U. S. Sulzer Act instead of the Illinois act, if he so desires. The Sulzer act is now obsolete and the department of agriculture is using another apple grading rule. The amendment introduced into the Senate of Illinois will allow Illinois apple growers to grade under present U. S. standards if desired.

The Fruit and Vegetable Marketing Department of the I. A. A. is strongly supporting these two measures in behalf of growers.

"CO-OP" BILL UP FOR FINAL VOTE IN HOUSE

SIDNEY ANDERSON SLATED TO SPEAK AT I. A. A. PICNIC

Committees Meet To Make Arrangements For Big Outing of June 29

PASTORS INVITED TO PICNIC

A special invitation has been issued to rural pastors of Illinois to attend the I. A. A. State Picnic at Urbana, June 29, to be held in co-operation with county farm bureaus and the College of Agriculture. A special program is to be arranged for the ministers, according to plans of the General Picnic Committee. Many ministers have already announced that they would attend.

The General Picnic Committee urges that each county farm bureau do all within its power to bring out its rural pastors. "There's always room for one more" is the flivver—see to it that your minister gets a ride to Urbana on June 29. He'll be just as interested in us and our work as we are in him and his.

Sidney Anderson, Congressman from Minnesota and known country-wide as Chairman of the Commission of Agricultural Inquiry, will be the speaker at the I. A. A. State Picnic at Urbana, June 29, if arrangements which have been made can be later confirmed. While Congressman Anderson's acceptance of the date is not yet official, it can be announced that he will be at Urbana on "the big day" if there is any possibility.

For his work in the Commission of Agricultural Inquiry, especially

A. F. B. F. Calls Egg Marketing Meeting May 28

A national egg marketing conference was called for May 28 at the Hotel Sherman, Chicago, by the American Farm Bureau Federation. It was planned, according to a resolution passed by the A. F. B. F. at its last annual meeting, to develop plans for the centralized marketing of eggs and poultry.

Representatives of state farm bureau federations, of agricultural colleges and of the agricultural press were invited.

HE FEEDS THEM ALL!

9th "Co-op" Yards Firm Is Opened At Cleveland

The ninth Producers' Co-operative Live Stock Commission Association has been opened by the National Live Stock Producers' Association at Cleveland, Ohio. Farmer-owned and operated selling agencies are now functioning at Chicago, East St. Louis, Peoria, Indianapolis, Buffalo, Fort Worth, Kansas City, Cleveland and Sioux Falls.

Other agencies are to be started soon at Oklahoma City, Cincinnati and probably other terminal markets.

On the last week before publication the Producers' agencies were first on five markets. Chicago handled 300 cars, or 5.87 per cent of the total receipts, Indianapolis, 203 cars, or 26.16 per cent of the total receipts, Buffalo 74 cars and Fort Worth 100 cars.

The Peoria Producers received twenty-two cars and ranked first. At East St. Louis the Producers ranked second with 217 cars.

Carbondale Milk Producers Form New Co-operative

Milk distributors of the city of Carbondale, Jackson county, met with the Dairy Marketing Department of the I. A. A. in May to effect the organization of the Carbondale Co-operative Milk Producers Association.

Officers elected by members of the new company were Arthur Parrish, president, and Harry Atherton, secretary-treasurer.

The association was organized to bring about a better understanding between the distributors, to advertise the value of milk products as food, and to stabilize milk market prices in Carbondale.

DID YOU KNOW—?

THAT there are 580 local co-operative live stock shipping associations in Illinois, many of which are the largest business institutions in the communites they serve? Turn to Page Two and read how the Live Stock Marketing Department of the I. A. A. aims to give the most complete service possible to these associations and to all farm bureau live stock producers.

Did you know that at Waukegan is the only producer-consumer co-operative company in Illinois, doing a flourishing and profitable business? Read on Page Three about this remarkable leaf in the history of farmer co-operation and the part played in it by the I. A. A.

Attempt To Cripple Act With Amendments Fails

With all unfavorable amendments killed, the Illinois Co-operative Marketing bill was on the order of final passage in the House at Springfield at the time this issue of The Record went to press and will undoubtedly be finally voted upon a few days later.

Supporters of the measure in the House rolled up a vote which resulted in tabling a succession of amendments which had for their real purpose the crippling of the bill. Only once was a roll call necessary to defeat an amendment.

It had been widely predicted about Springfield that the chief attack on the bill would be in the way of amendments, but the two-hour onslaught on the measure in the House found the defense invulnerable.

Six proposed amendments, in all, were downed.

As the measure stood after the barrage of amendments it carried no feature objectionable to its backers.

The bill has already been passed by the Senate by a decisive majority.

THE WATCHDOG!

How can a farmer, busy with his crops and untrained in the technicalities of transportation matters, know that he isn't paying too much freight when he ships? Unless he is one out of a million, he can't. But—

Even if he can't, his county farm bureau and the I. A. A. are on the job with men who make it their business to know and to safeguard the member's interests. This story tells how many a farmer is saving the price of his membership on a shipment of hogs or cattle because his bureau and the I. A. A. were on the job!

Conference Of Producer Heads Held May 25-26

A conference of the managers of the various Producers Co-operative Live Stock Commission Associations now operated on nine markets was called at Chicago, May 25 and 26 by President John G. Brown of the National Live Stock Producers Association.

LIVE STOCK RATES REDUCED FOLLOWING PROTEST OF I. A. A.

An average reduction of $11.25 on a car of cattle, $10.62 on a car of hogs, and $9.75 on a car of sheep from points on the Wabash Railroad west of the Illinois River to East St. Louis has been announced, following a protest entered on the former rates by the Transportation Service of the Illinois Agricultural Association.

The reduction is now in effect.

Raised in 1921

In the Spring of 1921 the rates on cattle and hogs from points west of the Illinois River to Chicago, Peoria and East St. Louis was increased about 25 per cent in accordance with an Interstate Commerce Commission order.

The Wabash increased the rates from points on their line west of the river to East St. Louis to the same basis as on points east of the river. The I. A. A. on complaint from the Hancock County Farm Bureau, took up the matter.

I. A. A. Protests

Not only Hancock County, but all points on the Wabash west of the Illinois River to East St. Louis were involved. It was found by the I. A. A. that the rates on cattle, sheep and hogs were out of line in this territory.

Following the protest of the I. A. A., the railroad made an adjustment, reducing the rates approximately five cents per hundred weight on cattle, six cents on hogs and six cents on sheep.

Mid-West States Hold Economic Meet At Chicago

An Agricultural Economics Research Conference for Middle West States was held at the Hotel Sherman, Chicago, on Friday, May 18. O. E. Bradfute, president of the American Farm Bureau Federation, acted as chairman.

Taxation was discussed by J. C. Watson, of the Illinois Agricultural Association.

Come to Urbana for I. A. A. Picnic, June 29th!

PICNIC AT URBANA IS 4th BY I. A. A. AND FARM BUREAUS

Springfield, Dixon and Olney Entertain Farmers During Last Three Years

The state picnic just scheduled by the county farm bureaus and the I. A. A. for Champaign-Urbana on June 29 will be the fourth great state-wide picnic held by the Illinois state and county farm bureau organization.

The picnics have already become a tradition, looked forward to each year. They are more than a mere merry-making: they are the time of the year when the farm bureau meets, shakes hands, gets acquainted, plays, learns and unites for a better agriculture.

Springfield in 1920

The first picnic, held in a grove in Sangamon County near Springfield in the summer of 1920, drew a crowd estimated at eight thousand. The first state-wide horseshoe pitching tournament was held at this picnic.

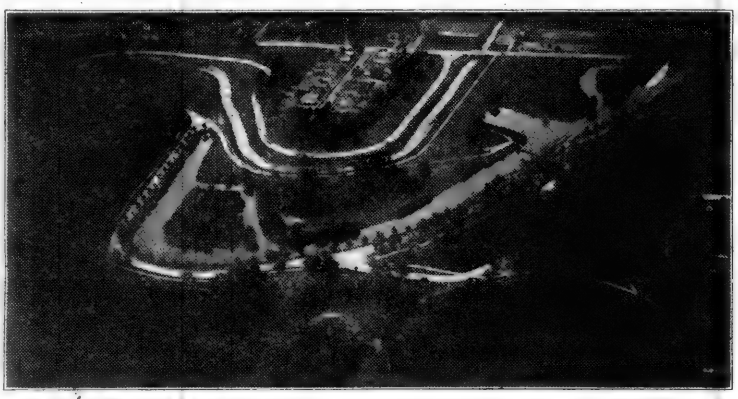
The following year, on September 6, 1921, the state picnic was held at Dixon, in Lee County. A crowd of nearly 10,000 by actual count, attended.

Olney Last Year

Last year's state picnic, at Olney, in Richland County, was given a bad deal by the weather man. Rain clouds loomed the evening before and descended upon the crowd on the day of the picnic. The result was a crowd of about 5,000 where easily twice this many would otherwise have attended, in view of the splendid preparations made by the picnic committee of the county farm bureaus.

Remember the Date!

But never have the I. A. A. and the county farm bureaus had a more splendid opportunity for the state picnic than this year. The co-operation of the College of Agriculture and the chance to survey the fields at the university is an attraction to this year's picnic that cannot be over-estimated. The "twin cities" are easily reached by road from almost anywhere in central Illinois.



Paste the date in your hatband—June 29, at Urbana!

Alabama Paper Praises Work of Peteet In South

In speaking of the position of leadership held by Walton Peteet as Director of Co-operative Marketing with the American Farm Bureau Federation, the Alabama Farm Bureau News said in a recent issue:

"Alabama members have come in contact with this big and brainy Texan. He has been in this state for several important meetings and has impressed those who met him as one of the ablest men in the Farm Bureau movement. He has been an outstanding figure in the South in cotton marketing, with a tremendous zeal and energy which make him the ideal leader in the new field he has been called to."

JUNE 29 THE DATE—HERE'S THE PLACE!

THIS airplane view of Crystal Lake Park at Urbana gives an idea of the beautiful, winding lake on the grounds and the trees and grass. The park offers one of the most charming locations for a picnic of any place in the state.

"Barnyard Golf" Pitching Feature of Each Picnic

"It's a ringer!"

This exclamation is one that was heard time and time again at Springfield, Dixon and Olney at the last three I. A. A. picnics. For one of the main events of these affairs was the state-wide horseshoe pitching tournaments for the state farm bureau championship.

In 1920 a cup was put up to be kept for a year by the winners of each tournament. Any team winning it for three consecutive years was to keep it permanently.

Ed Torbert and Joe Heskett, of the DeWitt County Farm Bureau won the trophy all three years and now retain it permanently.

At the recent meeting of the general picnic committee at Champaign-Urbana, it was the opinion that the horseshoe pitching tournament should be continued at the picnic this year. As many counties as possible are urged to enter teams. Only farm bureau members are eligible to play.

Another trophy will be put up for the championship and more details about the contest will be given in the next Record.

Writer Says Farm Bureau Man "Best Mind" At Capital

What sort of a fellow is Gray Silver, who is the head of the legislative office of the American Farm Bureau Federation at Washington? More than one Illinois farmer has asked himself this question, when he read of the accomplishments of the Farm Bloc, which was organized by the A. F. B. F. It is answered in "Judge," the issue of March 24, By Herbert Corey, celebrated correspondent.

"There are other organizations which have agents here (in Washington), of course," writes Mr. Corey, "but Gray Silver is the best mind of them all. They compare with him as a yellow tulip does with the Aurora borealis.

"The only thing that even sounds phony about Gray Silver is his name, and that's real. He is the man who made a majority of the House and Senate determine to raise whiskers and wear boots during the summer vacation. It is not often that Silver uses harsh measures to carry through a plan, but when he does get rough a horseshoer's rasp sounds like velvet. He is essentially an organizer rather than an individualist.

"He became the most powerful individual engaged in molding legislation in Washington—no one who knows the situation would question that description—because he could not help himself. When farmers had no real organization, Gray Silver was made a member of every committee sent to Washington to ask Congress to behave, because he lived near at hand and would pay his own way. When the A. F. B. F. determined to take an active hand he came to Washington to stay four years. He has tried to get back to his thousand-acre farm in West Virginia and is not let."

Over Million and Half Fleeces Are Pledged to Pool

According to C. J. Fawcett, assistant manager of the National Wool Warehouse and Storage Company, which handles pooled wool for several states, a total of 1,700,000 fleeces are pledged for the 1923 wool pool. The contracts call for delivery of wool immediately after shearing.

Mr. Fawcett states that it is quite universally recognized by the wool growers of the west that the pool has been the means of stimulating the price paid in a local way by speculators from 3 to 5 cents per pound. In the seasons of 1921 and 1922 the wool pools were very successful, returning to the growers substantial increase above the price obtainable locally at shearing time.

At least ten states are organizing for the co-operative marketing of potatoes under the Peteet-Sapiro plan.

SIDNEY ANDERSON SLATED TO SPEAK AT I. A. A. PICNIC

(Continued from page 1)

in farm transportation, Congressman Anderson has the respect and admiration of farmers all over the country. He is "farmer-minded," represents an agricultural constituency and has an enviable reputation as a speaker. He will bring a real message to the picnic.

Meetings of several of the committees which are planning for the picnic have been held during the last two weeks.

Arrangements have been made to devote a part of the program, possibly on the evening preceding the picnic, to the rural ministers of Illinois. A number of pastors have already made arrangements to come.

The grounds committee has started its work at Crystal Lake Park. Arrangements are being made for the parking of cars and for the horseshoe pitching courts.

Castle Is New Member of I. A. A. Executive Body

Stanley Castle, Alton, president of the Madison County Farm Bureau, is the new member of the I. A. A. Executive Committee from the 22nd District to succeed Fred Baumberger, Reno, who resigned in April.

Mr. Castle was elected to the position by the voting delegates of the district at a meeting at East St. Louis in May. He is a prominent grain farmer of Madison county and an outstanding worker for the farm bureau. Under his leadership the Madison County Farm Bureau has developed into one of the strongest and most successful county organizations in Illinois.

I. A. A. Has Department To Solve Producers' Live Stock Problems

In keeping with its aim to furnish service to farm bureau members in all important phases of Illinois agriculture, the Illinois Agricultural Association has from the start maintained a Live Stock Marketing Department. Continuing the policy laid down during the first two years of the operation of this department, the work has been divided into three general lines of activities: first, live stock marketing; second, the wool pool; third, general activities.

By far the most important work is in the division of live stock marketing. Here two agencies enter largely into co-operative marketing. First, there are the 580 communities of the State which are served by local co-operative shipping associations. Second, the four terminal markets in which Illinois shippers are most interested, Chicago, East St. Louis, Indianapolis and Peoria, are now served by successful producer-owned and operated selling agencies functioning under a national plan.

The relationship of the I. A. A. Live Stock Marketing Department to these marketing agencies, both local and at the terminal markets, is largely of an advisory or consulting nature and is maintained by bi-monthly letters sent to the boards of directors and managers of all the associations and also by means of meetings attended directly by C. A. Stewart, Director of the Department.

All possible information is given both by mail and at meetings and suggestions are made.

Big Business Done

Many of the larger local shipping associations of Illinois do a yearly business of from $100,000 to $150,000, while some of the largest have handled business to the extent of $500,000 annually. The four terminal markets in which Illinois is interested receive up to forty per cent of their total receipts from shipping associations, fully half of which comes from this state.

In most communities served by shipping associations, the association ranks in amount of business done as the most important business in the community. The I. A. A. Live Stock Marketing Department, therefore, has always advocated the use of the most effective business principles and methods. The Department recommends that associations incorporate and assist them in that respect, as incorporation gives a standing as an organization and limits liability of members.

The Department also recommends bonding of managers and employes handling funds and advocates the best methods of accounting.

Reports Asked

Recognizing that one of the tremendous problems affecting the prosperity of the Illinois live stock industry is the inability to stabilize receipts at the terminal markets, the Department has asked reports from local shipping associations at frequent intervals, in order to work toward a program of preventing fluctuation in receipts and the accompanying fluctuation in prices.

In co-operation with the Extension Service of the College of Agriculture, schools of instruction for associations are held from time to time in different parts of the State. At these schools the most efficient methods of handling live stock, methods of organization and other information of benefit is given out.

While the Live Stock Marketing Department and the I. A. A. in general took a prominent part in the setting up and financing of the four live stock commission firms in which Illinois farmers are most interested, no official connection is any longer maintained with them. They are distinct organizations. Although they do not place a premium upon Farm Bureau membership, it is a recognized fact that most of their support comes from farm bureau members and shipping associations affiliated with the movement, and it is to the advantage of both that close relations be maintained. The Department, therefore, keeps as closely in touch with the four selling agencies as possible.

Complaints Filed

The Department, however, is always representing foremost the producers and local shipping associations. In all questions which arise they may depend upon the Department for all possible assistance. This is especially true in complaints filed against old line companies or the Producers. Many times, because of the intimate knowledge which the Department has of terminal marketing methods, satisfactory explanation can be offered without further investigation. At other times such complaints have led to an investigation which resulted beneficially to all parties concerned.

The Wool Pool

The I. A. A. wool pool, handled by the Live Stock Marketing Department, has been in operation five years and has gone through many of the vicissitudes which accompany the development of any new enterprise. From this experience an effective plan has been devised. A contract is now entered into with the National Wool Warehouse and Storage Company, of Chicago, authorizing them to act as depository and selling agency for Illinois wools. Illinois producers are thus able to have the advantages of marketing their wool with the 7,000,000 to 27,000,000 pounds marketed yearly from other states. This large scale handling has meant a distinct saving.

Early each year the Department enters into contracts for sacks and twine so as not to lose on a possible rise in the market.

Watch Grading

A representative of the Department watches the grading of the wool at the warehouse as closely as possible, even though there is no doubt of the reliability of the graders. The Department is consulted before any sale of wool is made and in cases there is any doubt as to what decision should be made the owners of the wool are consulted.

Despite the fact that the pool has been operating in the fluctuations of the post-war fluctuation period, questionnaires from the counties have shown that every year pool prices have generally been higher than local prices.

C. A. STEWART

A rapid advance in wool during the fall of 1921, after the pool had been sold, resulted in some dissatisfaction. This advance, however, was not justified by prevailing conditions and there was no way to forecast it.

Sale of Blankets

In 1920 and 1921 the Department, in order to find an outlet for wool at a time of poor demand, had thousands of pounds made into blankets to be sold to members at cost. This realized growers a higher price than they could otherwise have obtained at the time and furnished blankets at a figure comparable to city wholesale prices, saving the buyer, too. Some of these blankets are still on hand and are being distributed by the Department.

General Projects

The general activities of the Department include various matters in which producers over the State are interested. Live stock freight rates are handled by the I. A. A. Live Stock and Transportation Departments, co-operating. An active part has been taken in an attempt to get a reduction on mixed shipment rates.

The Department has filed an application with the Tariff Commission for the reduction of the exorbitant tariff on Canadian cattle. This move was prompted by protests from Illinois feeders.

The Department works with counties which are handling hog cholera serum and virus for members, being represented on the committee which recommended to counties the company best fitted for handling the Illinois business. A number of conferences have been held with the State Veterinarian on farmer vaccination. The Department is represented, with farm bureaus, the University and the State Department of Agriculture on a committee working out a plan for a better distribution in Illinois of serum and virus, especially as to distribution from jobbing houses.

Work is being done on the subject of direct contact between the cattle feeder and Western producers, as the present method of distributing feeders is becoming more and more unsatisfactory and losses among cattle purchased at the terminal are increasing yearly. The attention of the U. S. Department of Agriculture has been called to these problems.

"We are anxiously looking for suggestions wherein this Department may be of benefit to the producer," says one of the bulletins from the I. A. A. Live Stock Marketing Department. "If you have any problems, send them in. If this Department cannot help you solve them, it may be possible to place you in contact with some agency which can be of assistance. We want all the live stock interests of the State to realize and appreciate that this Department has been created for the sole purpose of assisting the producer, particularly with his marketing problems."

ST. LOUIS DISTRICT MARKETING PLAN IS PROPOSED AT MEET

E. B. Heaton, of A. F. B. F., Heads Committee For Dairy Co-operation

At a meeting of the milk producers' advisory committee of the St. Louis district, held at East St. Louis, E. B. Heaton, Director of Dairy Marketing for the A. F. B. F., was elected chairman and A. E. Richardson secretary. The other members of the committee are:

Geo. A. Fox, Secretary of the Illinois Agricultural Association; John L. Boland, President of the Missouri Farm Bureau Federation; Pearlie Haycraft, President of the Southern Illinois Milk Producers' Association.

Mr. Heaton presented the following plan as the basis for reorganizing the district for the co-operative distribution of dairy products:

1. That the property standing of the Illinois-Missouri Co-operative Milk Marketing Company be maintained by the issue of preferred stock to farmer creditors.
2. That all directors of the marketing company submit their resignations to the committee.
3. That the country receiving station property of the marketing company be sold to local co-operative associations.
4. That a field organizer be employed by the marketing company to look after the property of the company and to assist in the formation of local associations, etc.
5. That a movement be immediately started looking forward to the formation of a non-stock, non-profit central sales agency for the St. Louis district and that this movement shall proceed along the following lines:
   (a) The formation of local co-operative non-stock and non-profit associations at all shipping points in the district having a minimum of ..... thousand pounds of milk.
   (b) These local associations shall buy or build or purchase a building and property of sufficient size to receive and in emergencies skim the milk of their members.
   (c) The local association shall issue preferred stock to finance local investment.
   (d) The local associations shall have the local producers as members sign an enforceable contract, among the provisions in which shall be:
   (1) A provision that when 75 per cent of the total milk produced in the St. Louis district is represented in similar associations with identical contracts the title to the milk is to pass and the milk delivered to the central non-stock and non-profit association to be created.
   (2) A provision also that when the central association begins to function that the local association must lease the local building and real estate to the central association, the central association to own all equipment.
   (3) A provision that a committee composed of all the farm advisers and county agents in St. Louis district, shall determine when 75 per cent of the total milk in the district is represented by contracts with local associations.
   (4) Until a new marketing association is created the Southern Illinois Milk Producers Association shall bargain with the dealers for the sale of the milk in the district.
   (5) When the new marketing association is created it shall enter into contract with the Illinois-Missouri Co-operative Milk Marketing Company for use of the property of that company with the understanding that its property may be absorbed by the new company or made a subsidiary.

MANY MEMBERSHIP CAMPAIGNS UNDER WAY DURING 1923

Thirteen Counties Complete Drives; Wabash County Signs 149.4%

Thirteen Illinois county farm bureaus have completed membership reorganization campaigns since the first of January, 1923. These counties include DuPage, Fulton, Kendall, Lawrence, Marshall - Putnam, Mason, Pike, Sangamon, Union, Wabash, Will, Williamson, and Woodford.

High Record

Of this number, Wabash county made the best record, 149.4 per cent of the old membership having been signed up. J. P. Lyons, Livingston county, was manager of the campaign.

Counties that started campaigns between January 1 and May 1, but which have not made final reports, are McDonough, Hancock, Pike, Mason, Menard, Cass, DeWitt, Morgan, Mason, Boone, Lee, Madison, Ogle, Adams and Cook.

Four schools of instruction preparatory to campaigns, were held in May. These were held in Bureau, LaSalle, Douglas, and Ford counties.

June Campaigns

Stark, Winnebago, Carroll and Marion county farm bureaus will start campaigns in June, while Jackson, Franklin, Pulaski, St. Clair, Scott, Richland, and Johnson counties have schools planned for later in the season. Several other counties will probably be added to this list when they complete plans.

"Co-op" Marketing Highly Commended By Henry Wallace

"When we get down to the principles of co-operative marketing," said Secretary of Agriculture Henry C. Wallace recently, after an extensive trip into the South to study late developments in commodity co-operative marketing, "it is simply a matter of applied Christianity."

"In years past, we have had in operation a number of what we call co-operative marketing organizations. We started out in the old days with creamery associations, etc., but we have learned by the experience of the past two years that these old fashioned organizations were founded on the wrong principles of marketing.

"We know now that we must improve the economics of marketing. Where the old-fashioned organizations saved pennies, the present organizations are saving dimes and dollars.

"It is through this kind of co-operative marketing that the farmers of America are to get an a sound economic footing and enjoy a standard of living equal to that of workers of other industries."

A survey made of over 6,000 representative farms by the Department of Agriculture shows that a return of $917 was made for the use of $16,400 of capital and the labor of his family during the year 1922.

$100,000 Plant, $102,000 Business, 860 Members—that's Co-operation!

THIS picture shows the headquarters of the Co-operative Trading Company at Waukegan—the only producer-consumer concern in Illinois. When first formed in 1911 it was a co-operative buying association for consumers only. Last year milk producers in the Waukegan district were admitted to share in the benefits of the company and the Dairy Marketing Department of the I. A. A. helped to work out the plans for this new feature of the organization. The building contains the grocery, meat market, and modern dairy plant of the Co-operative.

It was almost twelve years ago—the summer of 1911, to be exact—that housewives in the south side of the city of Waukegan went on the war-path against private milk dealers, claiming that the product was of poor quality and too high in price. Today, as a result of that action, Waukegan has a producers-consumers co-operative association that did a business of over $102,000 in dairy products alone in 1922, supplies milk to over 1,200 Waukegan families, handles one-fourth of the fluid milk trade of the city, and has property valued at nearly $100,000.

The name of the organization is the Co-operative Trading Company, one of the best examples of true co-operation in Illinois. It has nearly 800 consumers and about 60 farmer shareholders at present. Organizers of the co-operative were Finns, but the majority of the membership is now composed of other nationalities.

The growth of the company has been slow but steady. When organized in 1911 with 120 consumer-shareholders, its beginnings were very modest. Milk was first distributed from the basement of a residence on Cummings avenue, Waukegan, for about a year, when a building was erected on McAllister avenue. A co-operative grocery store of the company was established on the ground floor of the structure and the milk business was handled in the basement.

Enlarge Accommodations

The addition of a meat department and the growth of business during the years that followed the establishment of the co-operative made an enlargement of accommodations essential. For this reason, a $30,000 addition was completed in April, 1922, to house the dairy equipment and sales department.

Dairy fixtures and machinery were added to the new addition at a cost of over $21,000, and comprise the most up-to-date and sanitary equipment for the efficient handling of dairy products. The equipment includes a refrigeration plant, pasteurization and clarification machinery, bottle filler and capper, churn, and other necessities of a modern dairy plant.

I. A. A. Helps

With the enlargement in the spring of 1922, the consumer co-operators decided to sell shares of stock to farmers who supplied milk to the company to allow them to secure the benefits of co-operation. The Dairy Marketing Department of the I. A. A. was secured to serve in an advisory capacity when this step was taken. A satisfactory agreement was reached between producers and consumers.

The Plan

The agreement reached stipulated that the farmers should subscribe for sufficient capital stock to cover the dairy investment. It guaranteed the farmer a satisfactory basic price for his milk. It was further agreed that the profits from the dairy department should be pro-rated back to the producers and consumers in proportion to the price received by the producers and paid by the consumers for milk, respectively.

The association is capitalized at $30,000. Members may purchase shares costing $10. No individual may hold over 10 shares of company stock. Six per cent interest was paid on all shares in 1922. Prior to that, five per cent was the dividend paid. The present prosperous condition of the company indicates that the higher rate of dividend will prevail henceforth.

In addition to the dividend, consumer-shareholders receive a five per cent rebate on all purchases. For example, if a member purchases goods to the value of $1,000 during the year, he receives $50 rebate at the end of the year. At the present time, this rebate is given in shares to members who own less than 10 shares of stock. This is done in order to provide the company with sufficient working capital to allow expansion.

It is interesting to note that comparatively little capital stock has actually been sold to members, most of it having been purchased through dividing members' profits into shares.

The general plan of the Co-operative Trading Company is based upon the Rochdale system which originated in England nearly a hundred years ago.

Farmers' Share

Producer-members who supply the company with milk receive a pro rata share in the dairy profits besides their stock dividends. In 1922, this sum amounted to $1,000, which, when divided among the thirty farmer-members of last year, added five cents per hundred pounds of milk sold during the year. Some received as high as $95 in rebate.

In addition to the profit-sharing benefits of the company, farmer-members found it to their advantage to sell to the co-operative during 1922 because they were paid from 10 to 15 cents per hundred pounds more for their milk than private dealers of Waukegan were paying.

At present the company is paying five cents more per hundred than other dealers. At the same time the retail price for milk is standard for all dealers in the city. The price paid to farmers marketing in Waukegan averages about 50 cents more per hundred than that paid when delivered at nearby country bottling works of Chicago dealers. This higher price in Waukegan is attributed largely to the presence of the Co-operative Trading Company.

Besides the fluid milk sold and cream retailed, the co-operative sells butter, cottage cheese, buttermilk, and chocolated milk from its dairy. Only about 3,000 pounds of butter is made monthly, as there is little profit in it with the high fluid milk prices.

Surplus Over $8,500

During 1922 the sales of the organization were as follows: Dairy department, $102,619.19; grocery department, $68,422.99; and meat department, $24,778.81. The surplus for the year was $8,605.95. The increase in dairy sales from year to year is manifest by the sales of 1920 which were $72,531.38, and in 1921, $76,108.94. Indications point to a still greater increase in 1923 dairy sales, as they promise to total $70,000 for the first half-year alone.

The co-operative has a new garage and barn for trucks, wagons, and horses under construction at this time. It will cost $7,000.

The manager, Jack Liukku, reports a generally optimistic outlook for the company. Its steady growth in business is principal, about a gradual expansion. More milk producers are becoming shareholders as the increase in sales warrants a larger supply. Both producers and consumers seem well satisfied with the co-operative company. Mr. Liukku has been manager for nearly five years, having charge of all the departments of the "co-op." There are 20 employes in all.

Officers and directors of the company selected from the ranks of producer and consumer-members are as follows for 1923: president, Vaino F. Lehto; vice president, Lincoln Egbert; secretary, J. N. Hautala; Elmer Erickson, Richard Maki, Fort Kikkinen, Mike Ilvarinen, Matt Martila and Karl Helander.

IT'S VALUABLE!

DON'T miss the I. A. A. State Picnic to be held at Urbana, June 29. It is more than a mere outing. It is instructional and educational.

For it offers a chance to take in the University Open House and see what the College of Agriculture is doing for the advancement of farming. It presents addresses by speakers who have a real message for farmers.

I like to think of the work of the Farm Bureau Federation as a national undertaking,—as a national blessing. I honestly believe that by giving agriculture new hope and new vigor we are regenerating the republic. Our work restores the fair trade balance between the country and city and they prosper together. But, most important, perhaps, from a national point of view, is the putting of agriculture on firm business foundations and improving the standards of farm life and thereby insuring the perpetuity of a strong and happy rural population in America. The country will forever feed the city, and the sort of people the country sends to the city determines the kind of a city life we are to have. So, in reviving and invigorating American farm life we are regenerating and preserving the Nation. Therefore, our watchword should be organization and service.

—Gray Silver, Farm Bureau representative in Washington, in report to Executive Committee of American Farm Bureau Federation.

Illinois Agricultural Association
RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by News Publicity Department, L. J. Montross, Director.

Entry as second class matter Oct 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in section 1103, Act of October 3, 1917, authorized Oct. 31 1921.

The individual membership fee of the Illinois Agricultural Association is six dollars a year. This fee includes receipt of the twelve issues of the Illinois Agricultural Association Record.

SIDNEY ANDERSON SLATED TO SPEAK AT I. A. A. PICNIC

(Continued from [illegible])

in farm transportation, Congressman Anderson has the respect and admiration of farmers all over the country. He is, "farmer-minded," represents an agricultural constituency and has an enviable reputation as a speaker. He will bring a real message to the picnic.

Meetings of several of the committees which are planning for the picnic have been held during the last two weeks.

Arrangements have been made to devote a part of the program, possibly on the evening preceding the picnic, to the rural ministers of Illinois. A number of pastors have already made arrangements to come.

The grounds committee has started its work at Crystal Lake Park. Arrangements are being made for the parking of cars and for the horseshoe pitching courts.

Castle Is New Member of I. A. A. Executive Body

Stanley Castle, Alton, president of the Madison County Farm Bureau, is the new member of the I. A. A. Executive Committee from the 22nd District to succeed Fred Baumberger, Reno, who resigned in April.

Mr. Castle was elected to the position by the voting delegates of the district at a meeting at East St. Louis in May. He is a prominent grain farmer of Madison county and an outstanding worker for the farm bureau. Under his leadership the Madison County Farm Bureau has developed into one of the strongest and most successful county organizations in Illinois.

I. A. A. Has Department To Solve Producers' Live Stock Problems

In keeping with its aim to furnish service to farm bureau members in all important phases of Illinois agriculture, the Illinois Agricultural Association has from the start maintained a Live Stock Marketing Department. Continuing the policy laid down during the first two years of the operation of this department, the work has been divided into three general lines of activities: first, live stock marketing; second, the wool pool; third, general activities.

By far the most important work is in the division of live stock marketing. Here two agencies enter largely into co-operative marketing. First, there are the 850 communities of the State which are served by local co-operative shipping associations. Second, the four terminal markets in which Illinois shippers are most interested, Chicago, East St. Louis, Indianapolis and Peoria, are now served by successful producer-owned and operated selling agencies functioning under a national plan.

The membership of the I. A. A. Live Stock Marketing Department to these marketing agencies, both local and at the terminal markets, is largely of an advisory or consulting nature and is maintained by bi-monthly letters sent to the boards of directors and managers of all the association and also by means of meetings attended directly by C. A. Stewart, Director of the Department.

All possible information is given both by mail and at meetings and suggestions are made.

Big Business Done

Many of the larger local shipping associations of Illinois do a yearly business of from $100,000 to $150,000, while some of the largest have handled business to the extent of $500,000 annually. The four terminal markets in which Illinois is interested receive up to forty per cent of their total receipts from shipping associations, fully half of which comes from this state.

In most communities served by shipping associations, the association ranks in amount of business done as the most important business in the community. The I. A. A. Live Stock Marketing Department, therefore, has always advocated the use of the most effective business principles and methods. The Department recommends that associations incorporate and assist them in that respect, as incorporation gives a standing as an organization and limits liability of members.

The Department also recommends bonding of managers and employes handling funds and advocates the best methods of accounting.

Reports Asked

Recognizing that one of the tremendous problems affecting the prosperity of the Illinois live stock industry is the inability to stabilize receipts at the terminal markets, the Department has asked reports from local shipping associations at frequent intervals, in order to work toward a program of preventing fluctuation in receipts and the accompanying fluctuation in prices.

In co-operation with the Extension Service of the College of Agriculture, schools of instruction for associations are held from time to time in different parts of the State. At these schools the most efficient methods of handling live stock, methods of organization and other information of benefit is given out.

While the Live Stock Marketing Department and the I. A. A. in general took a prominent part in the setting up and financing of the four live stock commission firms in which Illinois farmers are most interested, no official connection is any longer maintained with them. They are distinct organizations. Although they do not place a premium upon Farm Bureau membership, it is a recognized fact that most of their support comes from farm bureau members and shipping associations affiliated with the movement, and it is to the advantage of both that close relations be maintained. The Department, therefore, keeps as closely in touch with the four selling agencies as possible.

Complaints Filed

The Department, however, is always representing foremost the producers and local shipping associations. In all questions which arise they may depend upon the Department for all possible assistance. This is especially true in complaints filed against old line companies or the Producers. Many times, because of the intimate knowledge which the Department has of terminal marketing methods, satisfactory explanation can be offered without further investigation. At other times such complaints have led to an investigation which resulted beneficially to all parties concerned.

The Wool Pool

The I. A. A. wool pool, handled by the Live Stock Marketing Department, has been in operation five years and has gone through many of the vicissitudes which accompany the development of any new enterprise. From this experience an effective plan has been devised. A contract is now entered into with the National Wool Warehouse and Storage Company, of Chicago, authorizing them to act as depository and selling agency for Illinois wools. Illinois producers are thus able to have the advantages of marketing their wool with the 7,000,000 to 27,000,000 pounds marketed yearly from other states. This large scale handling has meant a distinct saving.

Early each year the Department enters into contracts for sacks and twine so as not to lose on a possible rise in the market.

Watch Grading

A representative of the Department watches the grading of the wool at the warehouse as closely as possible, even though there is no doubt of the reliability of the graders. The Department is consulted before any sale of wool is made and in cases there is any doubt as to what decision should be made the owners of the wool are consulted.

Despite the fact that the pool has been operating in the fluctuations of the post-war fluctuation period, questionnaires from the counties have shown that every year pool prices have generally been higher than local prices.

C. A. STEWART

A rapid advance in wool during the fall of 1921, after the pool had been sold, resulted in some dissatisfaction. This advance, however, was not justified by prevailing conditions and there was no way to forecast it.

Sale of Blankets

In 1920 and 1921 the Department, in order to find an outlet for wool at a time of poor demand, had thousands of pounds made into blankets to be sold to members at cost. This realized growers a higher price than they could otherwise have obtained at the time and furnished blankets at a figure comparable to city wholesale prices, saving the buyer, too. Some of these blankets are still on hand and are being distributed by the Department.

General Projects

The general activities of the Department include various matters in which producers over the State are interested. Live stock freight rates are handled by the I. A. A. Live Stock and Transportation Departments, co-operating. An active part has been taken in an attempt to get a reduction on mixed shipment rates.

The Department has filed an application with the Tariff Commission for the reduction of the exorbitant tariff on Canadian cattle. This move was prompted by protests from Illinois feeders.

The Department works with counties which are handling hog cholera serum and virus for members, being represented on the committee which recommended to counties the company best fitted for handling the Illinois business. A number of conferences have been held with the State Veterinarian on farmer vaccination. The Department is represented, with farm bureaus, the University and the State Department of Agriculture on a committee working out a plan for a better distribution in Illinois of serum and virus, especially as to distribution from jobbing houses.

Work is being done on the subject of direct contact between the cattle feeder and Western producers, as the present method of distributing feeders is becoming more and more unsatisfactory and losses among cattle purchased at the terminal are increasing yearly. The attention of the U. S. Department of Agriculture has been called to these problems.

"We are anxiously looking for suggestions wherein this Department may be of benefit to the producer," says one of the bulletins from the I. A. A. Live Stock Marketing Department. "If you have any problems, send them in. If this Department cannot help you solve them, it may be possible to place you in contact with some agency which can be of assistance. We want all the live stock interests of the State to realize and appreciate that this Department has been created for the sole purpose of assisting the producer, particularly with his marketing problems."

ST. LOUIS DISTRICT MARKETING PLAN IS PROPOSED AT MEET

E. B. Heaton, of A. F. B. F., Heads Committee For Dairy Co-operation

At a meeting of the milk producers' advisory committee of the St. Louis district, held at East St. Louis, E. B. Heaton, Director of Dairy Marketing for the A. F. B. F., was elected chairman and A. E. Richardson secretary. The other members of the committee are:

Geo. A. Fox, Secretary of the Illinois Agricultural Association; John L. Boland, President of the Missouri Farm Bureau Federation; Pearlie Haycraft, President of the Southern Illinois Milk Producers' Association.

Mr. Heaton presented the following plan as the basis for reorganizing the district for the co-operative distribution of dairy products:

1. That the property standing of the Illinois-Missouri Co-operative Milk Marketing Company be maintained by the issue of preferred stock to farmer creditors.
2. That all directors of the marketing company submit their resignations to the committee.
3. That the country receiving station property of the marketing company be sold to local co-operative associations.
4. That a field organizer be employed by the marketing company to look after the property of the company and to assist in the formation of local associations, etc.
5. That a movement be immediately started looking forward to the formation of a non-stock, non-profit central sales agency for the St. Louis district and that this movement shall proceed along the following lines:

(a) The formation of local co-operative non-stock and non-profit associations at all shipping points in the district having a minimum of ..... thousand pounds of milk.

(b) These local associations shall buy or build or purchase a building and property of sufficient size to receive and in emergencies skim the milk of their members.

(c) The local association shall issue preferred stock to finance local investment.

(d) The local associations shall have the local producers as members sign an enforceable contract, among the provisions in which shall be:

(1) A provision that when 75 per cent of the total milk produced in the St. Louis district is represented in similar associations with identical contracts the title to the milk is to pass and the milk delivered to the central non-stock and non-profit association to be created.

(2) A provision also that when the central association begins to function that the local association must lease the local building and real estate to the central association, the central association to own all equipment.

(3) A provision that a committee composed of all the farm advisers and county agents of the St. Louis district, shall determine when 75 per cent of the total milk in the district is represented by contracts with local associations.

(4) Until a new marketing association is created the Southern Illinois Milk Producers Association shall bargain with the dealers for the sale of the milk in the district.

(5) When the new marketing association is created it shall enter into contract, with the Illinois-Missouri Co-operative Milk Marketing Company for use of the property of that company with the understanding that its property may be absorbed by the new company or made a subsidiary.

MANY MEMBERSHIP CAMPAIGNS UNDER WAY DURING 1923

Thirteen Counties Complete Drives; Wabash County Signs 149.4%

Thirteen Illinois county farm bureaus have completed membership reorganization campaigns since the first of January, 1923. These counties include DuPage, Fulton, Kendall, Lawrence, Marshall - Putnam, Mason, Pike, Sangamon, Union, Wabash, Will, Williamson, and Woodford.

High Record

Of this number, Wabash county made the best record, 149.4 per cent of the old membership having been signed up. J. P. Lyons, Livingston county, was manager of the campaign.

Counties that started campaigns between January 1 and May 1, but which have not made final reports, are McDonough, Hancock, Pike, Mason, Menard, Cass, DeWitt, Morgan, Mason, Boone, Lee, Madison, Ogle, Adams and Cook.

Four schools of instruction preparatory to campaigns, were held in May. These were held in Bureau, LaSalle, Douglas, and Ford counties.

June Campaigns

Stark, Winnebago, Carroll and Marion county farm bureaus will start campaigns in June, while Jackson, Franklin, Pulaski, St. Clair, Scott, Richland, and Johnson counties have schools planned for later in the season. Several other counties will probably be added to this list when they complete plans.

"Co-op" Marketing Highly Commended By Henry Wallace

"When we get down to the principles of co-operative marketing," said Secretary of Agriculture Henry C. Wallace, recently, after an extensive trip into the South to study late developments in commodity co-operative marketing, "it is simply a matter of applied Christianity."

"In years past, we have had in operation a number of what we call co-operative marketing organizations. We started out in the old days with creamery associations, etc., but we have learned by the experience of the past two years that these old fashioned organizations were founded on the wrong principles of marketing.

"We know now that we must improve the economics of marketing. Where the old-fashioned organizations saved pennies, the present organizations are saving dimes and dollars.

"It is through this kind of co-operative marketing that the farmers of America are to get on a sound economic footing and enjoy a standard of living equal to that of workers of other industries."

A survey made of over 6,000 representative farms by the Department of Agriculture shows that a return of $917 was made for the use of $16,400 of capital and the labor of his family during the year 1922.

$100,000 Plant, $102,000 Business, 860 Members—that's Co-operation!

THIS picture shows the headquarters of the Co-operative Trading Company at Waukegan—the only producer-consumer concern in Illinois. When first formed in 1911 it was a co-operative buying association for consumers only. Last year milk producers in the Waukegan district were admitted to share in the benefits of the company, and the Dairy Marketing Department of the I. A. A. helped to work out the plans for this new feature of the organization. The building contains the grocery, meat market, and modern dairy plant of the Co-operative.

It was almost twelve years ago—the summer of 1911, to be exact—that housewives in the south side of the city of Waukegan went on the war-path against private milk dealers, claiming that the product was of poor quality and too high in price. Today, as a result of that action, Waukegan has a producers-consumers co-operative association that did a business of over $102,000 in dairy products alone in 1922, supplies milk to over 1,200 Waukegan families, handles one-fourth of the fluid milk trade of the city, and has property valued at nearly $100,000.

The name of the organization is the Co-operative Trading Company, one of the best examples of true co-operation in Illinois. It has nearly 800 consumers and about 60 farmer shareholders at present. Organizers of the co-operative were Finns, but the majority of the membership is now composed of other nationalities.

The growth of the company has been slow but steady. When organized in 1911 with 120 consumer-shareholders, its beginnings were very modest. Milk was first distributed from the basement of a residence on Cummings avenue, Waukegan, for about a year, when a building was erected on McAllister avenue. A co-operative grocery store of the company was established on the ground floor of the structure and the milk business was handled in the basement.

Enlarge Accommodations

The addition of a meat department and the growth of business during the years that followed the establishment of the co-operative made an enlargement of accommodations essential. For this reason, a $30,000 addition was completed in April, 1922, to house the dairy equipment and sales department.

Dairy fixtures and machinery were added to the new addition at a cost of over $21,000, and comprise the most up-to-date and sanitary equipment for the efficient handling of dairy products. The equipment includes a refrigeration plant, pasteurization and clarification machinery, bottle filler and capper, churn, and other necessities of a modern dairy plant.

I. A. A. Helps

With the enlargement in the spring of 1922, the consumer co-operators decided to sell shares of stock to farmers who supplied milk to the company to allow them to secure the benefits of co-operation. The Dairy Marketing Department of the I. A. A. was secured to serve in an advisory capacity when this step was taken. A satisfactory agreement was reached between producers and consumers.

The Plan

The agreement reached stipulated that the farmers should subscribe for sufficient capital stock to cover the dairy investment. It guaranteed the farmer a satisfactory basic price for his milk. It was further agreed that the profits from the dairy department should be pro-rated back to the producers and consumers in proportion to the price received by the producers and paid by the consumers for milk, respectively.

The association is capitalized at $30,000. Members may purchase shares costing $10. No individual may hold over 10 shares of company stock. Six per cent interest was paid on all shares in 1922. Prior to that, five per cent was the dividend paid. The present prosperous condition of the company indicates that the higher rate of dividend will prevail henceforth.

In addition to the dividend, consumer-shareholders receive a five per cent rebate on all purchases. For example, if a member purchases goods to the value of $1,000 during the year, he receives $50 rebate at the end of the year. At the present time, this rebate is given in shares to members who own less than 10 shares of stock. This is done in order to provide the company with sufficient working capital to allow expansion.

It is interesting to note that comparatively little capital stock has actually been sold to members, most of it having been purchased through dividing members' profits into shares.

The general plan of the Co-operative Trading Company is based upon the Rochdale system which originated in England nearly a hundred years ago.

Farmers' Share

Producer-members who supply the company with milk receive a pro rata share in the dairy profits besides their stock dividends. In 1922, this sum amounted to $1,000, which, when divided among the thirty farmer-members of last year, added five cents per hundred pounds of milk sold during the year. Some received as high as $95 in rebate.

In addition to the profit-sharing benefits of the company, farmer-members found it to their advantage to sell to the co-operative during 1922 because they were paid from 10 to 15 cents per hundred pounds more for their milk than private dealers of Waukegan were paying.

At present the company is paying five cents more per hundred than other dealers. At the same time the retail price for milk is standard for all dealers in the city. The price paid to farmers marketing in Waukegan averages about 50 cents more per hundred than that paid when delivered at nearby country bottling works of Chicago dealers. This "higher price in Waukegan is attributed

IT'S VALUABLE!

DON'T miss the I. A. A. State Picnic to be held at Urbana, June 29. It is more than a mere outing. It is instructional and educational.

For it offers a chance to take in the University Open House and see what the College of Agriculture is doing for the advancement of farming. It presents addresses by speakers who have a real message for farmers.

[illegible] ...ented of the ...erative Trading Company.

Besides the fluid milk sold and cream retailed, the co-operative ... butter, cottage cheese, ice cream, and chocolated milk from its dairy. Only about ... pounds of butter is made month. ... there is little profit in it as the fluid milk prices.

Surplus Over $8,500

During 1922 the sales of the organization were as follows: Dairy department, $102,619.19; grocery department, $48,422.99; and meat department, $24,7[illegible].83. The surplus for the year was $8,605.95. The increase in dairy sales from year to year is manifest by the sales of 1920 which were $72,531.38, and in 1921, $76,303.94. Indications point to a still greater increase in 1923, dairy sales, as they promise to total $70,000 for the first half-year alone.

The co-operative has a new garage and barn for trucks, wagons, and horses under construction at this time. It will cost $7,000.

The manager, Jack Liukku, reports a generally optimistic outlook for the company. Its steady growth in business is due to about a gradual expansion. More milk producers are becoming shareholders as the increase in sales warrants a larger supply. Both producers and consumers seem well satisfied with the co-operative company. Mr. Liukku has been manager for nearly five years, having charge of all the departments of the co-op. There are 26 employes in all.

Officers and directors of the company, elected from the ranks of producer and consumer-members are as follows for 1923: president, Vaino F. Lehto, vice-president, Lincoln Eckert; secretary, J. N. Hautala; Elmer Eckerson, Richard Maki, Fred Kiskinen, Mike Ivarinen, Matt Martila and Karl Helander.

I like to think of the work of the Farm Bureau Federation as a national conservative — a national blessing. I honestly believe that by giving agriculture new hope and new vigor we are regenerating the republic. Our work restores the fair trade balance between the country and city and they prosper together. But, most important, perhaps, from a national point of view, is the putting of the future on firm business foundations, and improving the standard of farm life and thereby insuring the perpetuity of a strong and happy rural population in America. The country will forever feed the city, and the sort of people the country sends to the city determines the kind of a city life we are to have. So, in securing and invigorating American farm life we are regenerating and preserving the Nation. Therefore our watchword should be organization.

Gray Silver, Farm Labor representative, Washington, in report of Committee of American Farm Bureau Federation.

Two-Week Farm Outings For the City Tots

F. B. FOLKS ASKED TO PLAY HOST TO KIDDIES OF SLUMS

I. A. A. Co-operates For Third Year In Providing Farm Outings For Children

It's mighty hot down on South Halsted street, in Chicago, during July and August. One has only to walk through the tenement district there on a sultry afternoon to understand why so many babies of the city die before they've ever had a chance at life or why so many others grow up stunted to a life of poverty or worse.

But out in the country, out in the open air—even two weeks a year of country life offer a chance to some of these unfortunate "kids" of the slums.

I. A. A. Helping

The Illinois Agricultural Association has for the past two years co-operated with the United Charities of Chicago, the city's largest non-sectarian charitable organization, and the Chicago Daily News, the largest evening newspaper of the city, to provide two-week outings on the farm for as many poor and destitute city children as possible.

In the summer of 1921 more than 300 children were given two-week outings in the homes of members of the farm bureaus and the I. A. A. Last year 500 were received.

Selects Children

The United Charities selects the children and makes sure that they are worthy. They are given new clothes, carefully examined by a physician and generally made bright and shining—and sanitary—for their outing. The railroads of Illinois furnish free fare within a radius of two hundred miles of the city.

The members of the I. A. A. and the county farm bureaus are invited to take one or more of these kiddies, who range in age from 4 to 14, of both sexes, into their homes for two weeks, if they care to do so and are in position. There is no expense attached and no reward except the feeling that one has been a "good fellow" to a child who was starving for God's fresh air and trees and grass.

Assumes Liability

The United Charities assumes the liability for injury and sickness and conducts the children to the station where they are met by the farm folks. With more than 800 tots given outings during the last two summers only three complaints have been received. A number of people, on the other hand, have put in requests to get back the same children this year that they had last summer and have said that they gained as much from the experience as their guests.

The Daily News contributes money and publicity to the cause.

Within 200 Miles?

Elsewhere on this page is an application blank which may be conveniently filled in if you care to be host to one or more slums children this summer. The United Charities allows, so far as possible, you choice of age and sex. It is urged, however that applications be sent in if possible, before June 15 or at the latest before July 1.

The railway offer of free transportation, however, is extended only within a radius of two hundred miles from Chicago, so applications cannot be received from points further than 200 miles from the city.

WHEN A FELLER HAS A FRIEND!

Here are three of the 500 Chicago slums kiddies who were given two-week outings in the country last summer in homes of I. A. A. and farm bureau members. The same project is being carried on this summer. An article telling the details of the plan and an application blank will be found elsewhere on this page.

FARM OUTINGS

If you live within two hundred miles of Chicago (the railroads furnish free transportation only within this limit) and wish to be host some time during July or August to a city boy or girl for a two-week outing, the blank below may be filled out. Elsewhere on this page will be found an article and a picture giving further details.

To Outing Secretary,
Illinois Agricultural Association,
608 South Dearborn Street,
Chicago, Illinois.

We are in position to give a two weeks' vacation to.....

Chicago children some time in July or August, preferably.....

.....

Our choice of age and sex is as follows .....

.....

.....

Our nearest railway station is at.....

County .....but we could meet the children at.....

.....

(Please name at least two optional stations)

It is understood that the United Charities of Chicago assumes the liability in the case of accident or illness to any of the children sent to us; however, we pledge to exercise proper precautions in the care and treatment of these children.

Post office .....

Rural Route No. .....

Telephone No. .....

The organization committee of the Minnesota Potato Growers Exchange has decided that it will not be possible to perfect an efficient marketing organization in time to handle the 1923 crop, which will begin to move to market on July 15.

It is necessary to provide adequate storage and prompt financing before effective merchandising can be maintained. All plans will be complete to handle the 1924 crop, it is announced.

Will Your County Have a "Barnyard Golf" Team?

The General Committee for the I. A. A. State Picnic to be held at Urbana, June 29, urges that every county farm bureau, if possible, be represented in the big horseshoe pitching contest to be held at the main sports feature of the day. Will your county be represented?

It is realized that the I. A. A. picnic this year precedes most of the county farm bureau picnics and, therefore, that most counties will have no opportunity to select a county team at their picnic. It is suggested, however, that last year's champions be sent to Urbana or that a team be selected by farm bureau officials.

The only requirement is that all contestants must be county farm bureau members. A handsome cup is to be presented to the county farm bureau winning the tournament.

"Barnyard golf" is thoroughly a farmer's game, although today it is popular in every city in the country.

See to it that your county is represented in the tournament.

URBANA TO HAVE MANY JUNE EVENTS BESIDES PICNIC

Farm Advisers Will Meet; Boys' and Girls' Clubs To Visit U. of I.

The annual I. A. A. Picnic, June 29, will be a grand and fitting climax to a series of several important agricultural meetings in Urbana during the month.

From June 12 to 14, Illinois farm advisers will hold their annual meeting at the University of Illinois. County home advisers will meet in conference June 14-15.

On June 22 and 23, a meeting of national importance will be held at the university when the summer meeting of the American Society of Agronomy will be held. This society includes all the instructors and research men in the agronomy departments of all state agricultural colleges.

Another event of June 22 is the staging of grain and live stock judging contests in which high school boys from all over the state will take part. Many boys' and girls' club members from Illinois counties will meet at Urbana in the annual club tour on the same day.

"Open House" week, ending with the I. A. A. Picnic on the 29th, will be featured by visits to the university by farmers from all over the state to inspect the experiment work being carried on by the agricultural division of the institution.

Meat-for-Health Campaign To Be Observed In June

In order to bring to the attention of the public the wholesome qualities of meat as well as the relative economy of flesh for food, all organizations interested in the packing industry are sponsoring a Meat-for-Health Week throughout the nation, June 25 to 30, 1923.

Producers, packers, live stock commission men, butchers, and consumers are co-operating to make the campaign a success. Among other things, one of the purposes of the campaign is to bring about a closer understanding between the producer and the consumer of this basic food supply.

Dairy Interests Busy Preparing For Expositions

October will be a banner month for the dairy industry in the United States according to plans being made by dairy interests all over the nation.

The First World's Dairy Congress will be held at Washington D. C., October 2-5, when world problems relating to dairying will be considered. Representatives from practically every civilized country in the world will attend this exposition, many of them bringing exhibits with them. H. E. Van Norman is president of the Congress.

Immediately following the Washington event, the Annual National Dairy Show will be held at Syracuse, N. Y., October 6-13. It is expected that the display will be the greatest in the history of the show, owing to the holding of the World's Dairy Congress, and also the determination of eastern dairy interests to excel the middle west in staging the big event. The National has been held at St. Paul, Minn., during the past two years.

Oleo Production Declines; Butter On the Increase

Oleomargarine production fell from 212 million pounds in 1921 to 185 million pounds in 1922, while the production of creamery butter increased about 100 million pounds at the same time, according to figures just issued by the United States Department of Agriculture. Oleo production had reached the great heighth of 370 million pounds in 1920.

Complete figures of increased dairy production are as follows: creamery butter, 1921—1,055,000,000 pounds; 1922—1,153,515,000 pounds; cheese: 1921—356,000,000 pounds; 1922; 370,000,000 pounds; ice cream: 1921—148,000,000 pounds; 1922—161,000,000 pounds.

Education of the consumer as to the great food value of dairy products as well as the bettering of economic conditions are mainly responsible for the increased dairy consumption.

Fruit growers of western and southwestern Michigan recently organized the Michigan Fruit Growers, Inc., to co-operatively market their fruit products.

CO-OPERATIVE BILL PASSES HOUSE 99 TO 47

PROGRAM OF STATE PICNIC AT URBANA NEARS COMPLETION

Speaking, "Barnyard Golf," Music, Sports, Boating—Plan To Come June 29!

Last call for the I. A. A. Farm Bureau State Picnic at Urbana, June 29th!

The committees in charge of the event have been hard at work for the last two weeks and have shaped a program which will insure everybody a good time and a valuable outing. It is hoped to have the largest crowd ever turned out at an I. A. A. picnic.

Rural Pastors

The program for the meeting of the rural ministers on the evening of June 28 has also been developed. The Rev. Mr. W. W. Diehl, of Albion, Mich., an authority on rural church problems, will speak.

Rural pastors from all over Illinois have signified their intention of attending. Many farm bureau folks, too, will be at the conference of the 28th.

The "Open House"

Plans for the "Open House" of the College of Agriculture of the University of Illinois, to be held on June 28, 29 and 30 indicate that this event will furnish valuable instruction and will attract farm folks from all over Illinois.

Urbana will be the Mecca of organized Illinois Agriculture of the State on June 29—and no mistake!

Apple Grading Law Amendment Passed In Senate

The State Senate has passed the amendment to the apple grading law, introduced by Senator W. S. Jewell, Fulton county, and strongly supported by the Fruit and Vegetable Marketing Department of the I. A. A. It will now go to the House.

The bill will allow Illinois apple growers to grade under present U. S. Department of Agricultural standards instead of grading under provisions of the Illinois apple grading law passed two years ago.

The Indiana Farm Bureau Onion Growers Association was organized in May at Kendallville, Ind., the first step toward co-operative marketing of the nation's onion crop.

BRING THE FAMILY AND COME!

I. A. A. FARM BUREAU STATE PICNIC, CRYSTAL LAKE PARK, URBANA, ILL., JUNE 29

SPEAKING—

Address by Sydney Anderson, U. S. Congressman from Minnesota, Chairman of Congressional Committee of Agricultural Inquiry.

Address by Mrs. A. E. Brigden, Rochester, N. Y., President New York State Federation of Home Bureaus.

GAMES AND SPORTS—

Horseshoe Pitching Tournament for the Farm Bureau Championship of Illinois.

Baseball Game Between Two Country Farm Bureau Teams To Be Arranged.

Boating Stunts Contests

SUPERVISED PLAY FOR CHILDREN—

Children's Play Will be Supervised by Instructors of Department of Physical Education of University of Illinois.

MOTION PICTURES—

Free Showing of the six-reel farm drama, "The Brown Mouse."

BAND MUSIC—

A splendid band furnished by the Chambers of Commerce of Urbana and Champaign will play during the day.

ALL CONVENIENCES—

Plenty of water and shade—in case of sickness or injury a Red Cross tent with a nurse in charge—if the car balks, a trouble shooter on the grounds—a fried fish dinner served at reasonable prices.

Peoria Producers Pay Ten Per Cent Dividend

Reports from the various companies operating on the markets under the auspices of the National Live Stock Producers' Association show that the farmer-owned companies are continuing the progressive stride which they have maintained in the past.

Success of the Peoria company is evidenced by the fact that it declared a 10 per cent patronage dividend to be paid after May 31 and it was also voted to return 50 per cent of the cash membership fees. Peoria Producers stood first in receipts on the market each week in May except the last, when they stood second. An average of about 30 cars of stock weekly was handled.

Two new agencies opened up during May, one at Sioux Falls, S. D., on May 5, and the second at Cleveland on the 15th. Sioux Falls held third place on that market during the first week of operation and advanced to first place during its third week, being second the other two. It handled about 17 per cent of the receipts each week.

The Chicago Producers Commission Association has installed a sheep-selling department with Ernie Belfus in charge. The agency held first or second rank each week of the month and handled an average of about 280 cars weekly.

As has been its custom, the Indianapolis agency maintained first place on that terminal each week of the month and handled an average of 27 per cent of the receipts weekly. The growth of the agency has necessitated the

I. A. A. HELPING TO FORM PRODUCERS' 'CO-OP' IN INDIANA

The Live Stock Marketing Department of the I. A. A., C. A. Stewart, director, has been giving some help in the organization of a new selling agency of the National Live Stock Producer's Association at Evansville, Ind.

Evansville is a market in southwestern Indiana which secures about 20 per cent of its receipts from southern Illinois counties. The remainder of its receipts come about equally from Indiana and Kentucky counties.

White and Gallatin counties are the principal Illinois counties shipping stock to this market, although Edwards and Wabash are also patrons. L. L. Pinnell, Executive Committeeman of the Gallatin County Farm Bureau, is representing the I. A. A. as one of a committee of five in making arrangements for the opening of the "co-op."

Presents plans indicate that the Farmer's Commission Company, a stock organization which has been operating on that market, and which is dissolving will be taken over by the new Producers company. No definite date of opening has been announced.

Homestead Films, Inc., recently moved its headquarters from 7510 N. Ashland Ave. to 732 S. Wabash Ave., Chicago. The new location of the farm bureau motion picture company is a prominent one on Chicago's motion picture row

MEASURE IS SENT TO SENATE; IS UP TO GOVERNOR NEXT

Act Carries No Amendments Not Admitted To It By Its Proponents

By a vote of 99 to 47 the Illinois Co-operative Marketing Bill has passed the House of Representatives at Springfield, and has been returned to the Senate for concurrence in amendments. It is probable that the measure will go up to Governor Len Small for his signature before this issue of The Record is mailed.

The passage of the bill in the House was no surprise either to its adherents or its opponents, as it had been freely predicted at Springfield that the chief contest would come on the amendments.

The bill has shown surprising strength both in the Senate and in the House. Only three votes were recorded against it when it passed the Senate. When it came up for amendments in the House, the most critical time of its career, its supporters were able to down most of the hostile amendments, which had as their real purpose the crippling of the bill, without a roll call.

Not an amendment was admitted to the bill which was not acceptable to its proponents.

Rock Island Milk 'Co-op' Opens Soon; Manager Employed

Opening of the Rock Island Co-operative Milk Marketing Company's plant will take place early in July, according to present plans. Some delay has been experienced in opening due to installation of equipment and the selection of a manager.

Louis A. Finsen, a man with wide experience in management of dairy plants and in merchandising of dairy products, has been employed as manager and recently assumed his duties. He comes to the "co-op" from the Northern Milk and Ice Cream Company, Minneapolis.

The Rock Island Co-operative, formed by milk producers who supply milk to that city, is capitalized at $50,000. Advisory aid in organization is being given by the Dairy Marketing Department of the I. A. A.

From June 12 to 14, Illinois farm advisers will hold their annual meeting at the University of Illinois. County home advisers will meet in conference June 14-15.

On June 22 and 23, a meeting of national importance will be held at the university when the summer meeting of the American Society of Acronomy will be held. This society includes all the instructors and research men in the agronomy departments of all state agricultural colleges.

Another event of June 22 is the staging of grain and live stock judging contests in which high school boys from all over the state will take part. Many boys' and girls' club members from Illinois counties will meet at Urbana in the annual club tour on the same day.

"Open House" week, ending with the I. A. A. Picnic on the 29th, will be featured by visits to the university by farmers from all over the state to inspect the experiment work being carried on by the agricultural division of the institution.

Meat-for-Health Campaign To Be Observed In June

In order to bring to the attention of the public the wholesome qualities of meat as well as the relative economy of flesh for food, all organizations interested in the packing industry are sponsoring a Meat-for-Health Week throughout the nation, June 25 to 30, 1923.

Producers, packers, live stock commission men, butchers, and consumers are co-operating to make the campaign a success. Among other things, one of the purposes of the campaign is to bring about a closer understanding between the producer and the consumer of this basic food supply.

Dairy Interests Busy Preparing For Expositions

October will be a banner month for the dairy industry in the United States according to plans being made by dairy interests all over the nation.

The First World's Dairy Congress will be held at Washington D. C., October 2-5, when world problems relating to dairying will be considered. Representatives from practically every civilized country in the world will attend this exposition, many of them bringing exhibits with them. H. E. Van Norman is president of the Congress.

Immediately following the Washington event, the Annual National Dairy Show will be held at Syracuse, N. Y., October 6-13. It is expected that the display will be the greatest in the history of the show, owing to the holding of the World's Dairy Congress, and also the determination of western dairy interests to excel the middle west in staging the big event. The National has been held at St. Paul, Minn., during the past two years.

Oleo Production Declines; Butter On the Increase

Oleomargarine production fell from 212 million pounds in 1921 to 185 million pounds in 1922, while the production of creamery butter increased about 100 million pounds at the same time, according to figures just issued by the United States Department of Agriculture. Oleo production had reached the great heighth of 370 million pounds in 1920.

Complete figures of increased dairy production are as follows: creamery butter, 1921—1,055,000,000 pounds; 1922—1,153,515,000 pounds; cheese: 1921—356,000,000 pounds; 1922; 370,000,000 pounds; ice cream: 1921—148,000,000 pounds; 1922—161,000,000 pounds.

Education of the consumer as to the great food value of dairy products as well as the bettering of economic conditions are maiply responsible for the increased dairy consumption.

Fruit growers of western and southwestern Michigan recently organized the Michigan Fruit Growers, Inc., to co-operatively market their fruit products.

CO-OPERATIVE BILL PASSES HOUSE 99 TO 47

PROGRAM OF STATE PICNIC AT URBANA NEARS COMPLETION

Speaking, "Barnyard Golf," Music, Sports, Boating— Plan To Come June 29!

Last call for the I. A. A. Farm Bureau State Picnic at Urbana, June 29th!

The committees in charge of the event have been hard at work for the last two weeks and have shaped a program which will insure everybody a good time and a valuable outing. It is hoped to have the largest crowd ever turned out at an I. A. A. picnic.

Rural Pastors

The program for the meeting of the rural ministers on the evening of June 28 has also been developed. The Rev. Mr. W. W. Diehl, of Albion, Mich., an authority on rural church problems, will speak.

Rural pastors from all over Illinois have signified their intention of attending. Many farm bureau folks, too, will be at the conference of the 28th.

The "Open House"

Plans for the "Open House" of the College of Agriculture of the University of Illinois, to be held on June 28, 29 and 30 indicate that this event will furnish valuable instruction and will attract farm folks from all over Illinois.

Urbana will be the Mecca of organized Illinois Agriculture of the State on June 29—and no mistake!

Apple Grading Law Amendment Passed In Senate

The State Senate has passed the amendment to the apple grading law, introduced by Senator W. S. Jewell, Fulton county, and strongly supported by the Fruit and Vegetable Marketing Department of the I. A. A. It will now go to the House.

The bill will allow Illinois apple growers to grade under present U. S. Department of Agricultural standards instead of grading under provisions of the Illinois apple grading law passed two years ago.

The Indiana Farm Bureau Onion Growers' Association was organized in May at Kendallville, Ind., the first step toward co-operative marketing of the nation's onion crop.

BRING THE FAMILY AND COME!

I. A. A. FARM BUREAU STATE PICNIC, CRYSTAL LAKE PARK, URBANA, ILL., JUNE 29

SPEAKING—

Address by Sydney Anderson, U. S. Congressman from Minnesota, Chairman of Congressional Committee of Agricultural Inquiry.

Address by Mrs. A. E. Brigden, Rochester, N. Y., President New York State Federation of Home Bureaus.

GAMES AND SPORTS—

Horseshoe Pitching Tournament for the Farm Bureau Championship of Illinois.

Baseball Game Between Two Country Farm Bureau Teams To Be Arranged.

Boating Stunts Contests

SUPERVISED PLAY FOR CHILDREN—

Children's Play Will be Supervised by Instructors of Department of Physical Education of University of Illinois.

MOTION PICTURES—

Free Showing of the six-reel farm drama, "The Brown Mouse."

BAND MUSIC—

A splendid band furnished by the Chambers of Commerce of Urbana and Champaign will play during the day.

ALL CONVENIENCES—

Plenty of water and shade—in case of sickness or injury a Red Cross tent with a nurse in charge—if the car balks, a trouble shooter on the grounds—a fried fish dinner served at reasonable prices.

Peoria Producers Pay Ten Per Cent Dividend

Reports from the various companies operating on the markets under the auspices of the National Live Stock Producers' Association show that the farmer-owned companies are continuing the progressive stride which they have maintained in the past.

Success of the Peoria company is evidenced by the fact that it declared a 10 per cent patronage dividend to be paid after May 31 and it was also voted to return 50 per cent of the cash membership fees. Peoria Producers stood first in receipts on the market each week in May except the last, when they stood second. An average of about 30 cars of stock weekly was handled.

Two new agencies opened up during May, one at Sioux Falls, S. D., on May 5, and the second at Cleveland on the 15th. Sioux Falls held third place on that market during the first week of operation and advanced to first place during its third week, being second the other two. It handled about 17 per cent of the receipts each week.

The Chicago Producers Commission Association has installed a sheep-selling department with Ernie Belfus in charge. The agency held first or second rank each week of the month and handled an average of about 280 cars weekly.

As has been its custom, the Indianapolis agency maintained first place on that terminal each week of the month and handled an average of 27 per cent of the receipts weekly. The growth of the agency has necessitated the

I. A. A. HELPING TO FORM PRODUCERS' 'CO-OP' IN INDIANA

The Live Stock Marketing Department of the I. A. A., C. A. Stewart, director, has been giving some help in the organization of a new selling agency of the National Live Stock Producer's Association at Evansville, Ind.

Evansville is a market in southwestern Indiana which secures about 20 per cent of its receipts from southern Illinois counties. The remainder of its receipts come about equally from Indiana and Kentucky counties.

White and Gallatin counties are the principal Illinois counties shipping stock to this market, although Edwards and Wabash are also patrons. L. L. Pinnell, Executive Committeeman of the Gallatin County Farm Bureau, is representing the I. A. A. as one of a committee of five in making arrangements for the opening of the "co-op."

Presents plans indicate that the Farmer's Commission Company, a stock organization which has been operating on that market, and which is dissolving will be taken over by the new Producers company. No definite date of opening has been announced.

Homestead Films, Inc., recently moved its headquarters from 7516 N. Ashland Ave. to 732 S. Wabash Ave., Chicago. The new location of the farm bureau motion picture company is a prominent one on Chicago's motion picture row

MEASURE IS SENT TO SENATE; IS UP TO GOVERNOR NEXT

Act Carries No Amendments Not Admitted To It By Its Proponents

By a vote of 99 to 47 the Illinois Co-operative Marketing Bill has passed the House of Representatives at Springfield, and has been returned to the Senate for concurrence in amendments. It is probable that the measure will go up to Governor Len Small for his signature before this issue of The Record is mailed.

The passage of the bill in the House was no surprise either to its adherents or its opponents, as it had been freely predicted at Springfield that the chief contest would come on the amendments.

The bill has shown surprising strength both in the Senate and the House. Only three votes were recorded against it when it passed the Senate. When it came up for amendments in the House, the most critical time of its career, its supporters were able to down most of the hostile amendments which had as their real purpose the crippling of the bill, without a roll call.

Not an amendment was admitted to the bill which was not acceptable to its proponents.

Rock Island Milk 'Co-op' Opens Soon; Manager Employed

Opening of the Rock Island Co-operative Milk Marketing Company's plant will take place early in July, according to present plans. Some delay has been experienced in opening due to installation of equipment and the selection of a manager.

Louis M. Filson, a man of wide experience in management of dairy plants and in merchandising of dairy products has been employed as manager and recently assumed his duties. He comes to the "co-op" from the Northern Milk and Ice Cream Company, Minneapolis.

The Rock Island Co-operative, formed by milk producers who supply milk to that city, is capitalized at $50,000. Advisory aid in organization is being given by the Dairy Marketing Department of the I. A. A.

Illinois Agricultural Association
RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by News Publicity Department, L. J. Montross, Director.

Entry as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of ten cents for subscription to the Illinois Agricultural Association Record.

Quasey; Statistics, J. C. Watson; Finance, R. A. Cowles; Fruit and Vegetable Marketing, C. E. Durst; Live Stock Marketing, C. V. Stewart; Dairy Marketing, A. D. Lynch; Phosphate Limestone, J. R. Bent. Legal, Newton Jenkins.

Algonquin Milk Shippers Saved $45 Every Day

In a recent letter to the I. A. A. Transportation Department, B. B. Stewart, Algonquin, McHenry county, made this statement:

"About 18 months ago I wrote you about our milk rate to Chicago. Our mileage to Chicago was figured via West Chicago, 52 miles, whereas we have a line via Crystal lake, 47 miles. There was talk of paying for the milk by zones and we were to be outside of the 50-mile zone. You got us inside that zone and we get eight cents more per 100 pounds than if we were outside. We are shipping 56,000 pounds of milk a day from this station. This makes a daily saving of about $45."

Another concrete example of I. A. A. service! Mr. Stewart is well satisfied with the saving brought to Algonquin milk shippers by the Transportation Department. And in his letter he was asking for more service—this time in securing action by a railroad in cleaning out Canadian thistles from the right-of-way.

Moral—If you want service write to the I. A. A. Don't expect I. A. A. departments to know your grievances unless you "put them wise" to your wants.

Producers Will Open Agency At Cincinnati, Ohio

Representative live stock producers of Ohio, Kentucky, and Indiana in a meeting in Cincinnati, took preliminary steps to establish a producers live stock commission agency at that market. They will organize under Ohio's new co-operative marketing law and be a member of the family of co-operatives making up the National Live Stock Producer's Association. Operations will not start until July.

I. A. A. Maintains Legal Service To Protect Interests of Farmers

One of the most recent and one of the most effective departments of the I. A. A. working today for the benefit of the Illinois farm bureau member in the business of agriculture is the I. A. A. Legal Service, with Newton Jenkins as director. This division of the service of the I. A. A. was established to give organized farmers of Illinois the advantages of legal counsel on a par with that employed by the great firms representing other industries.

The work of the Legal Service may be divided into the following four groups:

1—Assistance to the various other departments of the Association.
2—Business of the Association itself.
3—Service to County Farm Bureaus.
4—Special matters.

All Use It

Every department of the Association is in constant need of the Legal Department. When Mr. Durst of the Fruit and Vegetable Marketing Department, wishes to help organize a local fruit exchange in Union County, for instance, it becomes necessary to incorporate the organization, draw up appropriate by-laws for the organization, pass upon crop contracts to be signed by the members, etc. This is the proper function of the Legal Department.

What is true of fruit and vegetables, is also true of dairy products. Mr. Lynch is called upon constantly from the dairy districts of the state, to assist in forming dairy organizations. Mr. H. A. DeWerff, Farm Adviser in Franklin County, wants to organize the milk producers in a locality in his county. The incorporation papers are obtained for the Benton Milk Producers Association and it is now a going concern. The work of incorporating and organizing creameries and milk marketing companies is done by the Legal Department.

Live Stock Work

When J. R. Shinn, Adviser in Fulton County, calls upon Mr. Stewart for assistance in the organization of a Shipping Association, he takes it up with the Legal Department, which prepares incorporation papers and attends to the legal aspects of the matter and the Fulton County Farm Bureau Live Stock shipping Association is the result. These shipping associations have been organized all over Illinois during the past year. They are uniform in character and have all been set up in accordance with, and have become affiliated in the marketing plan of the National Live Stock Producers Association.

Before Mr. Bent of the Limestone-Phosphate Department, enters into contractual relations with the Ruhm Phosphate & Chemical Co. in Tennessee, he goes over with great detail, the subject matter involved in the contract, with the Legal Department of the Association. In this way he safeguards the Association and rights of the members in Illinois, who buy phosphate through the Association.

Legislative Aid

The Legal Department works in close conjunction with the legislative committee. It sometimes prepares a bill for the committee. It analyzes bills introduced by interests other than agriculture to determine how it may affect Illinois farmers. It performs the same service with reference to national and state legislation.

Newton Jenkins

Mr. Quasey frequently is confronted with questions of law involved in transportation claims. These are taken up with the Legal Department. Matters of transportation and claims, are very closely related to legal service.

Tax Question

The taxation of farm lands has been a live question in the state during the past few years. The tax work of Mr. Watson brings in numerous questions of legality in certain practices pursued in the various counties. When the County Clerk of Macoupin County, for instance, extended the taxes improperly, an opinion as to the law was rendered by the Legal Department to that County. The matter was taken to Court and the farmers won the suit.

Thus it may be seen that each department, in a sense, has its legal counsel to consult upon legal matters affecting its work.

An organization as large as the I. A. A. dealing, as it does, with many interests and maintaining many contacts, has a good deal of legal business pertaining to the organization itself. Matters of this kind are often very closely related to questions of business policy.

I. A. A. as Whole

Any matters involving financial responsibility on the part of the Association come in this category. In this sense, the Legal Department represents the interest of the Association against the world. In all legal matters touching upon the business of the Association, the Legal Department assists the officers of the Association.

The County Farm Bureaus make use, to a considerable extent, of the Association's Legal Department. When Fred J. Blackburn of Marion County, wants to advise one of his members what the law is with reference to division fences, he gets in touch with the Legal Department.

County Service

A perplexing school question confronts certain of the farmers in Madison County and Alfred Raut communicates with the Legal Department to determine what right the Superintendent of Schools has, with reference to boundaries of the School District.

Some of the farmers around Magnolia in Putman County, want to form a co-operative elevator. F. E. Fuller, the Farm Adviser, sends for Mr. Jenkins to come down to discuss with them, the forms of organization and the necessary steps to be taken in the formation of an elevator.

Mr. M. L. Hunt, Treasurer of the McDonough County Farm Bureau, wants to know what the law is as to the liability of his Farm Bureau for the payment of taxes on personal property. And thus it goes. Hundreds of these legal inquiries come in from all over the state and are given attention by the Association's Legal Department.

General Strive

Certain special matters come up from time to time, which involve a great deal of attention by the Legal Department. An example of this is the Illinois-Missouri Milk Association matter at East St. Louis. This Company was thrown into bankruptcy last January. Mr. Kirkpatrick has acted as legal adviser for the reorganization committee. The matter was carried by Mr. Kirkpatrick to the higher court and in the meantime the Committee has worked out a settlement which has been accepted by nearly all of the creditors.

Another similar matter which the Legal Department has been working upon for a long period, is that of rural light and power. The matter first was raised by the members in a group of Northern Illinois Counties, where rates for electrical energy had been boosted by the Illinois Northern Utilities Company. The matter was taken up by the Legal Department with the Illinois Commerce Commission and the rate boost was cut in half.

Overhaul Rules

Following this first complaint, others were made from Bureau County and later from Tazewell and other Counties. It became necessary to overhaul the entire rules in Illinois for electric light and power used on the farm. The old rules were abolished and Frank L. Smith of Dwight, Illinois, Chairman of the Illinois Commerce Commission, has had a Committee working for several months on the question, with committees representing the Illinois Agricultural Association and the Utilities. The case has just recently been closed and the Commerce Commission will shortly promulgate its General Order.

These are some of the things which keep the firm of Jenkins & Kirkpatrick busy in behalf of organized agriculture in Illinois.

FARM WOMEN TO ENTER FIELD OF 'CO-OP' MARKETING

Conference Held To Consider Egg Merchandising; Pass Resolution

As the result of the national egg marketing conference held in Chicago by the American Farm Bureau Federation, farm women of America are to undertake the organization and control of their first national co-operative marketing association, that of egg marketing.

Mrs. W. C. Martin, Texas, chairman of the Home and Community Department of the American Farm Bureau Federation, was elected chairman of the meeting, assisted by Mrs. H. W. Lawrence of Ohio.

Aaron Sapiro, co-operative counsel of the A. F. B. F., was the principal speaker at the conference. He recommended that the farm women of the middle west, instead of "trading $2 worth of eggs at the cross-roads grocery for 50 cents worth of canned goods" adopt the co-operative sales plan of the Pacific Coast Egg Producers which has brought them a premium of two to four cents per dozen for their eggs on the New York market.

The conference instructed the chairman, Mrs. Martin, to appoint a general committee to work out a standard plan for co-operative egg marketing. This committee will select state organization committees to initiate campaigns to organize farmers and the families of farmers to merchandise eggs in an intelligent and orderly fashion.

Walton Peteet summarized the conference results by stating that the new committee would prepare definite plans for co-operative marketing of eggs; the egg producers would organize local associations to assemble and grade their eggs; the locals would federate into state selling agencies, and the state associations would be co-ordinated into a great national egg producers marketing association.

Watchful of your interests in freight rates

Transportation Department
Illinois Agricultural Association

Mt. Carroll Producers Pleased With Success of One Year of Co-operation

When farmers in the vicinity of Mt. Carroll decided to organize a co-operative creamery company to supply the locality with a good market for dairy products, advisory aid was asked from the Dairy Marketing Department of the I. A. A. That was in the fall of 1921. The aid was given and a new co-operative opened for business, January 2, 1922.

When stockholders in the Mt. Carroll Co-operative Creamery Company met to consider their first year's results on January 27, 1923, they found that their company had transacted nearly $88,000 worth of business during the year, was able to declare a seven per cent dividend on all paid up stock, and had $1,442.65 balance on hand.

That's partly the reason why the dairy producers of the territory were satisfied with their first year of business. But there were other pleasing things too, about this first year of co-operation, as will be shown.

In the organization of the Mt. Carroll Co-operative Creamery, shares of stock were sold at $50 per share, the company being capitalized for $10,000. No member is allowed to hold more than five shares. Most members hold but one share as is shown by the fact that there are now 135 stockholders owning 147 shares of stock.

Considerable expense was necessary before establishment and during 1922, the cost of building and equipment. An old creamery was purchased at a cost of $6,010, while repairs and addition of new equipment during the year incurred an expense of over $3,000.

Plant Opens

During the first two weeks after the plant was opened, 108 patrons delivered cream. This number gradually increased until as many as 219 producers were patrons of the co-operative creamery during eht flush season of the year.

A total of 186,424 pounds of butter was made during 1922 by Butter-maker G. W. Messner and his assistant, Joe Bowman. By far the largest part of this was sold in prints to retail merchants in larger Illinois cities. Some was shipped to Iowa. The tub butter shipped went to Chicago commission houses.

Premium on Butter

It is interesting to note that the high quality of the product caused it to command a premium on the market. Print butter sold at one cent over 92 score on the Chicago market, while tub butter sold at one cent under 92 score print butter on the Chicago market.

A short summary of the creamery receipts for the year from the various sources of accounts, follows:

Commission Houses	$18,705.40
Retail Merchants	47,018.72
Patrons	3,005.85
Buttermilk	681.47
Sundry Items	20.45
Butter Inventory	696.33
Total	$70,078.22

Disbursements totalled $68,085.59. From the profits, $550 was set aside for stock dividend, $445 for the purchase of a cream vat, and leaving a balance on hand of $997.63.

Poultry Products Too

Besides its butter trade, the "co-op" handled poultry and eggs for its patrons on the very narrow margin of one cent per dozen for eggs and one cent per pound for poultry. This is less than half the usual margin of buyers.

Only the small balance of $393.06 was shown to the credit side of the poultry products handled, due, of course, to the narrow margin at which they were purchased. Receipts for eggs during the year totalled $10,365.52 and chickens were sold to the value of $7,131.19.

The Mt. Carroll Creamery found that handling poultry and eggs for patrons worked in very well along with its dairy trade. The volume of poultry products would not be so great as to warrant the establishment of a separate co-operative shipping association. Added convenience to patrons is given by making it handy for them to deliver their cream, eggs, and poultry to the one station.

What Are Benefits?

In the consideration of the success of a year's operation of the Mt. Carroll Co-operative Creamery, the question might naturally arise, and justly, too: "Outside of the stock dividends paid, what actual benefits did the co-operative creamery bring that would not have been received by patronizing local dealers?"

Probably a study of the accompanying table showing the price paid for cream during each month of 1922 by the Mt. Carroll Co-operative Creamery, the Elizabeth Co-operative Creamery, and a neighboring cream station, will help to answer that question.

As can be seen from the table, an average of about five cents per pound was paid all through the year by the Mt. Carroll Co-operative Creamery over that of the neighboring cream station. The "co-op" purchased 152,375 pounds of butterfat during the year. At five cents per pound difference, it paid farmers $7,618.75 over what a neighboring cream station paid.

At the same time, it is estimated, judging from the prices paid during other years, that the neighboring cream station paid at least four cents per pound more than if there had been no co-operative creamery in Mt. Carroll. This brings an estimated increase of $13,713.75 which producers received over what they might have, had there been no "co-op."

The fact that the Elizabeth Co-operative Creamery paid more than the Mt. Carroll Creamery did during 1922 was possible because of longer establishment of the former concern and the probable better quality of cream received.

Increase This Year

Judging by the business of the Mt. Carroll "co-op" so far this year, it appears that 1923 will easily see a great increase over 1922 in total volume. During the first four months of this year, an average of 600 pounds more butter has been made each month over the corresponding period last year. Much more poultry and egg business is evident this year also.

The creamery is being considerably improved this year. A new cream vat and a refrigeration system have already been installed. In addition, the plant will be painted and otherwise improved during the year.

Officers Pleased

Statements made by Chas W. Moore, president of the Mt. Carroll Co-operative Creamery Company, and H. Hostetter, secretary, indicate that they are pleased with the results of co-operation as it has worked out in the enterprise, but there are some trials and tribuations also.

As Mr. Hostetter expressed it: "Co-operation is the only thing. It can work wonders if farmers will only 'stick.' Too many forget, however, that the creamery is their own enterprise and they will desert it if some competitor offers them a cent or two more in order to win them away from their own concern. They forget that the co-operative is responsible for the higher prices and that if it is killed, competitors will pay the same old prices."

IN THEIR WORKING CLOTHES

The Mt. Carroll Co-operative Creamery was undergoing repairs when The Record visited it and we were unable to get a good picture of it, so we "snapped" two of the officers who happened to be present, Charles W. Moore, president, (left) and H. P. Hostetter, secretary (right).

Other officers are, Jasper Schamberger, vice-president, and S. A. Keim, treasurer, who, with Sherman Gillespie, John Elliott, Frank Vanderheyden, W. J. Hartman, William James, George Fulrath, and President Moore, constitute the Board of Directors.

Holstein "News" To Make Debut Early In June

The Illinois Holstein-Friesian Association is starting a new publication to appear this month, "The News," which will appear monthly. The following are the new officers of the Association:

President, Frank T. Fowler, Lake Villa; Vice-President, C. J. Lindley, Greenville; Treasurer, A. S. Benton, Chicago; General and Field Secretary, E. G. Thiem; Directors, H. W. Allyn, Byron; W. H. Fitch, Aurora; Geo. A. Fox, Sycamore; L. M. Gentry, Oregon; H. M. Wood, Delavan; W. W. Yapp, Urbana.

PITTSBURGH PLUS PRACTICE IS HIT HARD BY HOUSE

Fake Steel Freight Charge Is Target of Unanimous Vote; Bill To Governor

By a unanimous vote of 108 to 0, the Illinois House of Representatives has declared against "Pittsburgh Plus," following the lead of the Senate which had already voted to take steps to abolish the steel industry practice which adds the Pittsburgh freight rate to the price of steel products in midwestern mills.

The bill would create a committee of seven members appointed by the Governor: two from the Senate; two from the House; one from the Farm Bureau; one from the Western Association of Rolled Steel Consumers; and one, a manufacturer. The committee is authorized to prosecute legal actions, to co-operate with a similar body of another state, and to inform the public generally for the purpose of bringing about the abolition of "Pittsburgh Plus."

Provision is also made by the bill for the appropriation of $25,000 for the commission appointed.

The bill is now subject to action by the Governor.

"Pittsburgh Plus" abolition is backed by the American Farm Bureau Federation. The I. A. A. passed resolutions against it at the last annual meeting.

The practice adds greatly to the cost of farm implements. The farmer is one of the largest—if not the largest—user of steel products in the country. The imaginary freight charge is of course pocketed by the steel manufacturers.

Charities Send Folder Telling Of the Outings

The United Charities of Chicago is sending to a list of I. A. A. and Farm Bureau members this month an illustrated folder describing the Outings for Children Project. This folder tells graphically what is being done for the youngsters.

Ground Rock Phosphate--

You Know What You're Getting
You Pay Only For Quality You Get

Phosphate is a profit maker. It cuts down your labor cost per bushel of yield—increases quality and selling value of the grain.

The I. A. A. has a shipping office in Tennessee to insure you prompt service and accuracy of weight and quality—every carload is sampled and analyzed and you are billed on the basis of the analysis.

The buying power of the I. A. A. insures you the lowest price consistent with high quality.

Your Farm Adviser has the information and order forms. Get your orders in early through your County Bureau. The price is lower now than later.

Phosphate-Limestone Department
Illinois Agricultural Association

Illinois Agricultural Association
RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by News Publicity Department, L. J. Montross, Director.

Entered as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of ten cents for subscription to the Illinois Agricultural Association Record.

OFFICERS

President, S. H. Thompson, Quincy.
Vice-President, A. O. Eckert, Belleville.
Secretary, Geo. A. Fox, Sycamore.
Treasurer, R. A. Cowles, Bloomington.

Quasey; Statistics, J. C. Watson; Finance, R. A. Cowles; Fruit and Vegetable Marketing, C. E. Durst; Live Stock Marketing, C. A. Stewart; Dairy Marketing, A. D. Lynch; Phosphate Limestone, J. R. Bent. Legal, Newton Jenkins.

Algonquin Milk Shippers Saved $45 Every Day

In a recent letter to the I. A. A. Transportation Department, B. B. Stewart, Algonquin, McHenry county, made this statement:

"About 18 months ago I wrote you about our milk rate to Chicago. Our mileage to Chicago was figured via West Chicago, 52 miles, whereas we have a line via Crystal lake, 47 miles. There was talk of paying for the milk by zones and we were to be outside of the 50-mile zone. You got us inside that zone and we get eight cents more per 100 pounds than if we were outside. We are shipping 56,000 pounds of milk a day from this station. This makes a daily saving of about $45."

Another concrete example of I. A. A. service! Mr. Stewart is well satisfied with the saving brought to Algonquin milk shippers by the Transportation Department. And in his letter he was asking for more service—this time in securing action by a railroad in cleaning out Canadian thistles from the right-of-way.

Moral—If you want service write to the I. A. A. Don't expect I. A. A. departments to know your grievances unless you "put them wise" to your wants.

Producers Will Open Agency At Cincinnati, Ohio

Representative live stock producers of Ohio, Kentucky, and Indiana in a meeting in Cincinnati, took preliminary steps to establish a producers live stock commission agency at that market. They will organize under Ohio's new co-operative marketing law and be a member of the family of co-operatives making up the National Live Stock Producer's Association. Operations will not start until July.

I. A. A. Maintains Legal Service To Protect Interests of Farmers

One of the most recent and one of the most effective departments of the I. A. A. working today for the benefit of the Illinois farm bureau member in the business of agriculture is the I. A. A. Legal Service, with Newton Jenkins as director. This division of the service of the I. A. A. was established to give organized farmers of Illinois the advantages of legal counsel on a par with that employed by the great firms representing other industries.

The work of the Legal Service may be divided into the following four groups:

1—Assistance to the various other departments of the Association.
2—Business of the Association itself.
3—Service to County Farm Bureaus.
4—Special matters.

All Use It

Every department of the Association is in constant need of the Legal Department. When Mr. Durst of the Fruit and Vegetable Marketing Department, wishes to help organize a local fruit exchange in Union County, for instance, it becomes necessary to incorporate the organization, draw up appropriate by-laws for the organization, pass upon crop contracts to be signed by the members, etc. This is the proper function of the Legal Department.

What is true of fruit and vegetables, is also true of dairy products. Mr. Lynch is called upon constantly from the dairy districts of the state, to assist in forming dairy organizations. Mr. H. A. DeWerff, Farm Adviser in Franklin County, wants to organize the milk producers in a locality in his county. The incorporation papers are obtained for the Benton Milk Producers Association and it is now a going concern. The work of incorporating and organizing creameries and milk marketing companies is done by the Legal Department.

Live Stock Work

When J. R. Shinn, Adviser in Fulton County, calls upon Mr. Stewart for assistance in the organization of a Shipping Association, he takes it up with the Legal Department, which prepares incorporation papers and attends to the legal aspects of the matter and the Fulton County Farm Bureau Live Stock shipping Association is the result. These shipping associations have been organized all over Illinois during the past year. They are uniform in character and have all been set up in accordance with, and have become affiliated in the marketing plan of the National live Stock Producers Association.

Before Mr. Bent of the Limestone-Phosphate Department, enters into contractual relations with the Ruhm Phosphate & Chemical Co. in Tennessee, he goes over with great detail, the subject matter involved in the contract, with the Legal Department of the Association. In this way he safeguards the Association and rights of the members in Illinois, who buy phosphate through the Association.

Legislative Aid

The Legal Department works in close conjunction with the legislative committee. It sometimes prepares a bill for the committee. It analyzes bills introduced by interests other than agriculture to determine how it may affect Illinois farmers. It performs the same service with reference to national and state legislation.

Newton Jenkins

Mr. Quasey frequently is confronted with questions of law involved in transportation claims. These are taken up with the Legal Department. Matters of transportation and claims, are very closely related to legal service.

Tax Question

The taxation of farm lands has been a live question in the state during the past few years. The tax work of Mr. Watson brings in numerous questions of legality in certain practices pursued in the various counties. When the County Clerk of Macoupin County, for instance, extended the taxes improperly, an opinion as to the law was rendered by the Legal Department to that County. The matter was taken to Court and the farmers won the suit.

Thus it may be seen that each department, in a sense, has its legal counsel to consult upon legal matters affecting its work.

An organization as large as the I. A. A. dealing, as it does, with many interests and maintaining many contacts, has a good deal of legal business pertaining to the organization itself. Matters of this kind are often very closely related to questions of business policy.

I. A. A. as Whole

Any matters involving financial responsibility on the part of the Association come in this category. In this sense, the Legal Department represents the interest of the Association against the world. In all legal matters touching upon the business of the Association, the Legal Department assists the officers of the Association.

The County Farm Bureaus make use, to a considerable extent, of the Association's Legal Department. When Fred J. Blackburn of Marion County, wants to advise one of his members what the law is with reference to division fences, he gets in touch with the Legal Department.

County Service

A perplexing school question confronts certain of the farmers in Madison County and Alfred Raut communicates with the Legal Department to determine what right the Superintendent of Schools has, with reference to boundaries of the School District.

Some of the farmers around Magnolia in Putman County, want to form a co-operative elevator. F. E. Fuller, the Farm Adviser, sends for Mr. Jenkins to come down to discuss with them, the forms of organization and the necessary steps to be taken in the formation of an elevator.

Mr. M. L. Hunt, Treasurer of the McDonough County Farm Bureau, wants to know what the law is as to the liability of his Farm Bureau for the payment of taxes on personal property. And thus it goes. Hundreds of these legal inquiries come in from all over the state and are given attention by the Association's Legal Department.

General Strive

Certain special matters come up from time to time, which involve a great deal of attention by the Legal Department. An example of this is the Illinois-Missouri Milk Association matter at East St. Louis. This Company was thrown into bankruptcy last January. Mr. Kirkpatrick has acted as legal adviser for the reorganization committee. The matter was carried by Mr. Kirkpatrick to the higher court and in the meantime the Committee has worked out a settlement which has been accepted by nearly all of the creditors.

Another similar matter which the Legal Department has been working upon for a long period, is that of rural light and power. The matter first was raised by the members in a group of Northern Illinois Counties, where rates for electrical energy had been boosted by the Illinois Northern Utilities Company. The matter was taken up by the Legal Department with the Illinois Commerce Commission and the rate boost was cut in half.

Overhaul Rules

Following this first complaint, others were made from Bureau County and later from Tazewell and other Counties. It became necessary to overhaul the entire rules in Illinois for electric light and power used on the farm. The old rules were abolished and Frank L. Smith of Dwight, Illinois, Chairman of the Illinois Commerce Commission, has had a Committee working for several months on the question, with committees representing the Illinois Agricultural Association and the Utilities. The case has just recently been closed and the Commerce Commission will shortly promulgate its General Order.

These are some of the things which keep the firm of Jenkins & Kirkpatrick busy in behalf of organized agriculture in Illinois.

FARM WOMEN TO ENTER FIELD OF 'CO-OP' MARKETING

Conference Held To Consider Egg Merchandising; Pass Resolution

As the result of the national egg marketing conference held in Chicago by the American Farm Bureau Federation, farm women of America are to undertake the organization and control of their first national co-operative marketing association, that of egg marketing.

Mrs. W. C. Martin, Texas, chairman of the Home and Community Department of the American Farm Bureau Federation, was elected chairman of the meeting, assisted by Mrs. H. W. Lawrence of Ohio.

Aaron Sapiro, co-operative counsel of the A. F. B. F., was the principal speaker at the conference. He recommended that the farm women of the middle west, instead of "trading $2 worth of eggs at the cross-roads grocery for 50 cents worth of canned goods" adopt the co-operative sales plan of the Pacific Coast Egg Producers which has brought them a premium of two to four cents per dozen for their eggs on the New York market.

The conference instructed the chairman, Mrs. Martin, to appoint a general committee to work out a standard plan for co-operative egg marketing. This committee will select state organization committees to initiate campaigns to organize farmers and the families of farmers to merchandise eggs in an intelligent and orderly fashion.

Walton Peteet summarized the conference results by stating that the new committee would prepare definite plans for co-operative marketing of eggs; the egg producers would organize local associations to assemble and grade their eggs; the locals would federate into state selling agencies, and the state associations would be co-ordinated into a great national egg producers marketing association.

Illinois Agricultural Association

Mt. Carroll Producers Pleased With Success of One Year of Co-operation

When farmers in the vicinity of Mt. Carroll decided to organize a co-operative creamery company to supply the locality with a good market for dairy products, advisory aid was asked from the Dairy Marketing Department of the I. A. A. That was in the fall of 1921. The aid was given and a new co-operative opened for business, January 2, 1922.

When stockholders in the Mt. Carroll Co-operative Creamery Company met to consider their first year's results on January 27, 1923, they found that their company had transacted nearly $88,000 worth of business during the year, was able to declare a seven per cent dividend on all paid up stock, and had $1,442.65 balance on hand.

That's partly the reason why the dairy producers of the territory were satisfied with their first year of business. But there were other pleasing things too, about this first year of co-operation, as will be shown.

In the organization of the Mt. Carroll Co-operative Creamery, shares of stock were sold at $50 per share, the company being capitalized for $10,000. No member is allowed to hold more than five shares. Most members hold but one share as is shown by the fact that there are now 135 stockholders owning 147 shares of stock.

Considerable expense was necessary before establishment and during 1922, the cost of building and equipment. An old creamery was purchased at a cost of $6,010, while repairs and addition of new equipment during the year incurred an expense of over $3,000.

Plant Opens

During the first two weeks after the plant was opened, 108 patrons delivered cream. This number gradually increased until as many as 219 producers were patrons of the co-operative creamery during eht flush season of the year.

A total of 186,424 pounds of butter was made during 1922 by Butter-maker G. W. Messner and his assistant, Joe Bowman. By far the largest part of this was sold in prints to retail merchants in larger Illinois cities. Some was shipped to Iowa. The tub butter shipped went to Chicago commission houses.

Premium on Butter

It is interesting to note that the high quality of the product caused it to command a premium on the market. Print butter sold at one cent over 92 score on the Chicago market, while tub butter sold at one cent under 92 score print butter on the Chicago market.

A short summary of the creamery receipts for the year from the various sources of accounts, follows:

Commission Houses	$18,765.40
Retail Merchants	47,018.73
Patrons	3,005.85
Buttermilk	631.47
Sundry Items	20.45
Butter Inventory	696.33
Total	$70,078.22

Disbursements totalled $68,085.59. From the profits, $550 was set aside for stock dividend, $445 for the purchase of a cream vat, and leaving a balance on hand of $997.63.

Poultry Products Too

Besides its butter trade, the "co-op" handled poultry and eggs for its patrons on the very narrow margin of one cent per dozen for eggs and one cent per pound for poultry. This is less than half the usual margin of buyers.

Only the small balance of $393.06 was shown to the credit side of the poultry products handled, due, of course, to the narrow margin at which they were purchased. Receipts for eggs during the year totalled $10,365.52 and chickens were sold to the value of $7,131.19.

The Mt. Carroll Creamery found that handling poultry and eggs for patrons worked in very well along with its dairy trade. The volume of poultry products would not be so great as to warrant the establishment of a separate co-operative shipping association. Added convenience to patrons is given by making it handy for them to deliver their cream, eggs, and poultry to the one station.

What Are Benefits?

In the consideration of the success of a year's operation of the Mt. Carroll Co-operative Creamery, the question might naturally arise, and justly, too: "Outside of the stock dividends paid, what actual benefits did the co-operative creamery bring that would not have been received by patronizing local dealers?"

Probably a study of the accompanying table showing the price paid for cream during each month of 1922 by the Mt. Carroll Co-operative Creamery, the Elizabeth Co-operative Creamery, and a neighboring cream station, will help to answer that question.

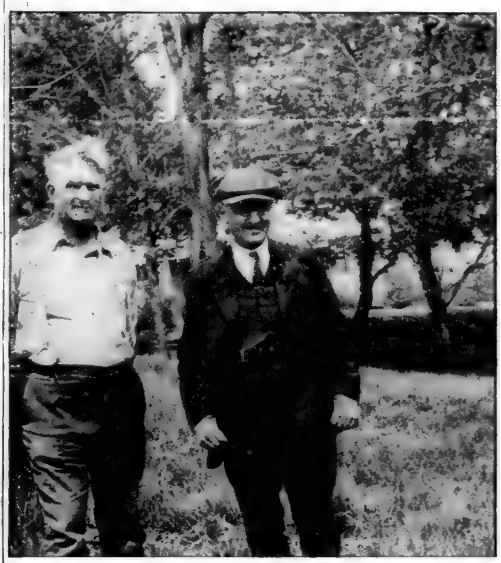
As can be seen from the table, an average of about five cents per pound was paid all through the year by the Mt. Carroll Co-operative Creamery over that of the neighboring cream station. The "co-op" purchased 152,375 pounds of butterfat during the year. At five cents per pound difference, it paid farmers $7,618.75 over what a neighboring cream station paid.

At the same time, it is estimated, judging from the prices paid during other years, that the neighboring cream station paid at least four cents per pound more than if there had been no co-operative creamery in Mt. Carroll. This brings an estimated increase of $13,713.75 which producers received over what they might have, had there been no "co-op."

The fact that the Elizabeth Co-operative Creamery paid more than the Mt. Carroll Creamery did during 1922 was possible because of longer establishment of the former concern and the probable better quality of cream received.

Increase This Year

Judging by the business of the Mt. Carroll "co-op" so far this year, it appears that 1923 will easily see a great increase over 1922 in total volume. During the first four months of this year, an average of 600 pounds more butter has been made each month over the corresponding period last year. Much more poultry and egg business is evident this year also.



The creamery is being considerably improved this year. A new cream vat and a refrigeration system have already been installed. In addition, the plant will be painted and otherwise improved during the year.

Officers Pleased

Statements made by Chas W. Moore, president of the Mt. Carroll Co-operative Creamery Company, and H. Hostetter, secretary, indicate that they are pleased with the results of co-operation as it has worked out in the enterprise, but there are some trials and tribulations also.

As Mr. Hostetter expressed it: "Co-operation is the only thing. It can work wonders if farmers will only 'stick.' Too many forget, however, that the creamery is their own enterprise and they will desert it if some competitor offers them a cent or two more in order to win them away from their own concern. They forget that the co-operative is responsible for the higher prices and that if it is killed, competitors will pay the same old prices."

IN THEIR WORKING CLOTHES

The Mt. Carroll Co-operative Creamery was undergoing repairs when The Record visited it and we were unable to get a good picture of it, so we "snapped" two of the officers who happened to be present, Charles W. Moore, president, (left) and H. P. Hostetter, secretary (right).

Other officers are, Jasper Schamberger, vice-president, and S. A. Keim, treasurer, who, with Sherman Gillespie, John Elliott, Frank Vanderheyden, W. J. Hartman, William James, George Fulrath, and President Moore, constitute the Board of Directors.

Holstein "News" To Make Debut Early In June

The Illinois Holstein-Friesian Association is starting a new publication to appear this month, "The News," which will appear monthly. The following are the new officers of the Association:

President, Frank T. Fowler, Lake Villa; Vice-President, C. J. Lindley, Greenville; Treasurer, A. S. Benton, Chicago; General and Field Secretary, E. G. Thiem; Directors, H. W. Allyn, Byron; W. H. Fitch, Aurora; Geo. A. Fox, Sycamore; L. M. Gentry, Oregon; H. M. Wood, Delavan; W. W. Yapp, Urbana.

PITTSBURGH PLUS PRACTICE IS HIT HARD BY HOUSE

Fake Steel Freight Charge Is Target of Unanimous Vote; Bill To Governor

By a unanimous vote of 108 to 0, the Illinois House of Representatives has declared against "Pittsburgh Plus," following the lead of the Senate which had already voted to take steps to abolish the steel industry practice which adds the Pittsburgh freight rate to the price of steel products in midwestern mills.

The bill would create a committee of seven members appointed by the Governor: two from the Senate; two from the House; one from the Farm Bureau; one from the Western Association of Rolled Steel Consumers; and one, a manufacturer. The committee is authorized to prosecute legal actions, to co-operate with a similar body of another state, and to inform the public generally for the purpose of bringing about the abolition of "Pittsburgh Plus."

Provision is also made by the bill for the appropriation of $25,000 for the commission appointed.

The bill is now subject to action by the Governor.

"Pittsburgh Plus" abolition is backed by the American Farm Bureau Federation. The I. A. A. passed resolutions against it at the last annual meeting.

The practice adds greatly to the cost of farm implements, the farmer is one of the largest—if not the largest—user of steel products in the country. The imaginary freight charge is of course pocketed by the steel manufacturers.

Charities Send Folder Telling Of the Outings

The United Charities of Chicago is sending to a list of I. A. A. and Farm Bureau members this month an illustrated folder describing the Outings for Children Project. This folder tells graphically what is being done for the youngsters.

Ground Rock Phosphate--

You Know What You're Getting
You Pay Only For Quality You Get

Phosphate is a profit maker. It cuts down your labor cost per bushel of yield—increases quality and selling value of the grain.

The I. A. A. has a shipping office in Tennessee to insure you prompt service and accuracy of weight and quality—every carload is sampled and analyzed and you are billed on the basis of the analysis.

The buying power of the I. A. A. insures you the lowest price consistent with high quality.

Your Farm Adviser has the information and order forms. Get your orders in early through your County Bureau. The price is lower now than later.

Phosphate-Limestone Department
Illinois Agricultural Association

Come to the State Picnic at Urbana, June 29

OUTINGS REQUESTS FOR CITY CHILDREN BEGIN TO COME IN

I.A.A. Receiving Applications; Third Year of Project Promises Good Record

The first requests for Chicago slums children for two-week outings in the homes of county farm bureau members began coming in to the Outing Secretary of the Illinois Agricultural Association during the first few days in June. Indications are that last year's record of five hundred kiddies given vacations in homes of Illinois farm bureau members will be equalled or even exceeded.

The application blank which was printed in the last issue of The Record will be found on this page. If you wish to take one or more children for an outing some time this summer, fill it out and send it in to the Outing Secretary of the I. A. A.

Third Year

Although the I. A. A. is first and always a business organization, it has always interested itself in some project for helping others each year. This is the third year of the Outing For Children project, carried on in [illegible] with the United Charities, of Chicago, The Daily News, of Chicago and Illinois railroads.

The United Charities, the city's largest non-sectarian charitable organization, selects the children from the most worthy and needy of homes. So destitute are these homes that an outing means almost life itself to the children. The charitable organization outfits the children with clothing appropriate to their outing, has them examined carefully to guard against any possibility of contagious disease and sends them on their vacations spotlessly clean, in charge of competent women directors.

From 4 to 14

The children are of both sexes and range from 4 to 14 in age.

The railroads furnish free fare within a limit of 200 miles from Chicago. The Daily News contributes money and publicity.

Assumes Liability

The farm bureau folks are asked only to take one or more of the children into their homes for two weeks and treat them as they would their own youngsters. The United Charities assumes all liability for injuries.

The families which entertained the five hundred children given outings last summer had only praise for the project. Several of them declared that they got as much out of their contact with their youthful guests as the children could possibly have received from the outing. A large number of families who took children last year requested that they entertain the same ones this summer, as many a warm attachment and friendship was formed during the outings.

PICNIC SPEAKER

Mrs. A. E. Brigden

Madison County Melon Growers May Organize

Cantaloupe growers in the vicinity of Poag, Madison county, recently held a meeting with C. E. Durst of the Fruit and Vegetable Marketing Department of the I. A. A. to consider the formation of a co-operative melon marketing organization.

The growers present seemed favorably impressed with the advantages of such an association. Last year 15 cars of melons were marketed from the locality and this year's crop will be the biggest yet with more than 250 acres under cultivation.

Formation of two more locals of the Illinois Fruit Exchange at Grafton and Jerseyville, Jersey county, seems imminent, as much enthusiasm toward co-operative marketing was manifest at meetings addressed by Mr. Durst.

Peoria Producers Pay Ten Per Cent Dividend

(Continued from page 1)

erection of a new addition to the Exchange office building for more office space. New weighing facilities and sorting pens have also been provided by the stock yards company.

The E. St. Louis Producers agency held first or second rank each week of May. It handled about 16 per cent of the total receipts each week with an average of approximately 240 cars.

This agency also gives a good example of how volume cuts costs of operation. For the first quarter of 1922, it had receipts of 1020 cars and for the same period this year, 2381 cars were handled, an increase of 133.5 per cent. The average expense of selling was $15.50 per car in 1922 and this was reduced to $11.17 this year.

The Kansas City Producers took rapid strides in May. From sixteenth place with 40 cars during the first week, this agency took rapid bounds each week until it stood in fourth place with 116 cars as receipts during the last week of May.

The Buffalo selling agency held first place at that market each week in May, handling an average of about 17 per cent of the receipts weekly.

The tenth Producers agency, it is announced, will open soon at Oklahoma City.

FARM OUTINGS

WANT one or more city youngsters for a two-week outing some time during July or August? If so this blank may be found convenient. It should be filled out and sent in, if possible, before July 1. On account of the fact that the railroads offer free transportation only within a two-hundred mile radius of Chicago, applications can only be accepted within such territory.

To Outing Secretary,
Illinois Agricultural Association,
608 South Dearborn Street,
Chicago, Illinois

We are in position to give a two weeks' vacation to.....

Chicago children some time in July or August, preferably.....

.....

Our choice of age and sex is as follows:.....

.....

VARIETY OF SERVICE

Ten Departments Working For You

The Illinois Agricultural Association Is Prepared To Serve You In Any Important Business Phase of Illinois Agriculture.

"MEAT FOR HEALTH WEEK," JUNE 25-30, AIMS AT CONSUMER

Vigorous Campaign To Tell Of Live Stock Products In Diet

As a means of calling the attention of consumers everywhere throughout the United States to the high value of meat as a food, its wholesomeness and healthfulness, as well as its importance to Agriculture, the National Live Stock and Meat Board requests the observance of the period of June 25 to June 30 as "Meat For Health Week."

Until the National Live Stock and Meat Board came into being, there was no effective medium through which all factors in the meat industry, from the man on the farm who produces the live stock to the man in the retail shop who sells the meat, could co-operate in the common cause of promoting a better knowledge of the food value and healthfulness of meat. The board is now functioning vigorously, and with the support of the producers and others, will be able to do effective work in restoring meat to the place which it deserves in the American diet. The "Meat For Health Week" will be the Board's first important step toward this end.

Use of Poster

Tentative plans for "Meat For Health Week" call for the distribution and posting in a widespread fashion of the meat poster recently issued by the United States Department of Agriculture.

This poster bears the message: "Meat is Wholesome—For Health and Vigor Eat Well Balanced Meals—Use A Variety of Kinds And Cuts Of Meat."

Recipe Booklet

This poster will probably be supplemented by colored posters bearing various meat dishes which will be in season at the time, as well as by recipe booklets, which will be issued widely, and by demonstrations, in the larger cities of the country, at which the proper methods of selecting and preparing meat will be taught.

Through these various activities, and with the cordial co-operation of live stock producers and their associations, breed associations, live stock shipping associations and other factors in the industry, the Board hopes to make "Meat For Health Week" an unlimited success.

Have You Consigned Your Wool To The 1923 Pool?

Your Lot Will Increase The Volume of Wool In The Pool.

Volume Spells Efficiency In Marketing.

Efficiency Means Greater Net Returns To The Grower.

Fourteen Years Out of Seventeen The Wool Market Advances With The Season.

Live Stock Marketing Dep't., Illinois Agricultural Ass'n.

Milk Producers At Decatur May Organize Company

At the request of the Macon County Farm Bureau, a meeting was held at Decatur recently when 122 milk producers supplying milk to that city met to consider the advisability of forming a co-operative milk marketing company. A. D. Lynch, of the I. A. A. Dairy Marketing Department, addressed the conference.

Explanation was made of the principles of co-operative dairy marketing, its advantages and pitfalls, and the experiences of similar projects that are proving successful in Illinois were related.

The presence of many small milk dealers, the wide range in the retail price of milk, and the lack of facilities for conforming to the new compulsory pasteurization ordinance passed in Decatur, seem to indicate that co-operative effort would greatly improve the milk supply of that city.

While no definite action was taken toward organizing, a committee was appointed to investigate the practicability of the step.

ILLINOIS CO-OPERATIVE BILL IS NOW A LAW

NATIONAL COUNCIL TO BE RESULT OF WHEAT CONFERENCE

Delegates Consider Ills Of Industry; Endorse Co-operation

Decision to set up a Wheat Council of the United States in which all interests will be represented, was one of the main accomplishments of the National Wheat Conference held in Chicago in June, called by governors of seven states, headed by Gov. J. A. O. Preus of Minnesota. Over 400 delegates were present.

This council, according to the resolutions, "will make a thorough, scientific study of the wheat problem and enlist in co-ordinated efforts of all interests to give publicity in every way to its findings and to develop and apply approved methods by which equilibrium between domestic products and consumption can be established and price stabilized on American price level."

Such a council was declared to be necessary to use all the efforts possible to increase the consumption of wheat, to emphasize the part it plays in the life of the nation, and to secure prices for wheat which will allow the American wheat farmer to justify the standards of living to which he has been accustomed and is entitled.

Committee

The personnel of the organization committee which will set up the Wheat Council of the United States is as follows: O. E. Bradfute, Chicago; Charles S. Barrett, Georgia; S. J. Lowell, New York;

(Continued on page 4)

BEFORE—

The organization of county farm bureaus and the Illinois Agricultural Association, the farmers of Illinois had little means of letting the law-makers of the state know just what laws they wanted and what legislation they didn't want. Now, with organization, they have appointed a Legislative Committee to inform the legislators just how the farmers feel about things down at Springfield. Read the story of the work of the Legislative Committee on Page 2 of this issue.

Executive Body Changes Ruling On Claims Charges

Some changes were made at the last session of the Executive Committee of the I. A. A. in regard to the collection of claims handled by the Transportation Department.

The department is authorized to rebate the entire amount of commission charges for transportation claims to farm bureau members in good standing, whose claims come to the I. A. A. through the county farm bureaus.

Non-members of the farm bureau will be charged 25 per cent commission on all transportation claims handled through the Transportation Department.

In handling the claims of co-operative shipping associations, full rebate of commission will be made to associations with 100 per cent farm bureau membership and which are under agreement with county farm bureaus and the I. A. A. A commission of 15 per cent will be charged associations whose membership is not 100 per cent farm bureau.

Resignation of C. E. Durst On July 1 Accepted

C. E. Durst, Director of the Fruit and Vegetable Marketing Department of the I. A. A., tendered his resignation at the last meeting of the I. A. A. Executive Committee. The resignation, which was accepted by the committee, takes effect on July 1, when Mr. Durst will take up his new work with the Federated Fruit and Vegetable Growers, Inc.

Mr. Durst has been director of his department with the I. A. A. for nearly three years, having formerly been adviser of Union and Cook counties and connected with the State University.

He took a prominent part in the organization of the Illinois Fruit Exchange in the spring of 1921 and in its later organization and marketing this season and last. He aided in co-operative fruit and vegetable organization in Tazewell and Cook Counties, as well as in the preliminary work of organizing the Egyptian Seed Growers Exchange. He was a member of the National Fruit and Vegetable Marketing Committee of 21 and is secretary of the Federated Fruit and Vegetable Growers, Inc., which grew out of the plans of that committee.

GOVERNING BOARD OF I. A. A. HOLDS JUNE CONFERENCE

Hear Reports of Work; Discuss New Form of Membership Agreement

A new form of farm bureau membership contract which would do away with much of the expense necessary with the present plan of campaigns every three years was one of the most important matters discussed at the June meeting of the I. A. A. Executive Committee.

With the plan presented, farmers would sign up in their organizations, the county farm bureau, the I. A. A. and the A. F. B. F. for a period of three years and their membership would continue from year to year thereafter unless the farm bureau or the member terminated the contract, in writing, within 60 days after the close of the three-year period or at a like date any year after that.

Other plans were submitted to the committee but action was deferred until a later period.

Reports were made to the committee by the various departments of the state association which showed a healthy condition prevailing in general. R. N. Clarke made a report on the Egyptian Seed Growers Exchange, which indicated plans for further expansion during the season. Donald Kirkpatrick, Attorney for the I. A. A., reported the progress of the Illinois-Missouri milk marketing situation.

Combine Effected Between "Co-ops" At Sioux City, Ia.

Affiliation of the Nebraska Farmers' Union Commission Company at Sioux City with the National Live Stock Producers Association is the latest evidence of the trend toward amalgamation of organized agriculture.

According to an agreement reached in June, the Farmers' Union will appoint two live stock producers living in the Sioux City territory and the National Live Stock Producers will appoint one producer from the same territory to compose a committee to supervise the affairs of the commission company, subject to the approval of the presidents of the Farmers' Union and the National Producers.

GOVERNOR SIGNS MEASURE LEGALIZING ORDERLY MARKETING OF FARM PRODUCTS

Opponents Fail In Effort To Bring About Veto of Act; Considered Great Victory For Farmers in Struggle For Improved Economic Conditions

Illinois has a Co-operative Marketing Law!

Signature of the bill by Governor Len Small on June 22 gives Illinois farmers a law similar to that passed in over half the states of the Union which legalizes the marketing of agricultural products on a co-operative basis.

All other states were watching Illinois in its fight for the passage of the law. It was considered a real battleground between the farmers in their struggle for an orderly marketing system and the strongly intrenched marketing interests which center in the state. Passage of the law was a signal victory for organized agriculture.

Many attempts were made to make the bill ineffective by amendment and by striking out important sections in its passage through the Senate and House. However, the efforts of opponents failed and proponents of the bill had control of the situation at all times. Backed by the loyal support of the organized farmers of Illinois, it went through the Senate by a vote of 34 to 3 and the House passed the measure 100 to 47.

In the final hearing of the bill before the Governor, opponents again appeared, this time to urge the veto of the act. Those attacking the measure were J. E. Poole, Chicago Live Stock Exchange; W. G. Carmichael, St. Louis Live Stock Exchange; L. N. McIntosh, Chicago Milk Dealers Association; and R. E. Little, of the Illinois Milk Producers.

Senators Lantz (Woodford), Turnbaugh (Carroll), and Cuthbertson (Macoupin), together with President S. H. Thompson and A. C. Everingham, of the I. A. A. Legislative Committee, defended the Co-operative Bill.

Signature of the bill makes it become a law on July 1.

RED TOP GROWERS TO HEAR PETEET AT ANNUAL MEET

Walton Peteet, Director of Co-operative Marketing for the A. F. B. F., will address the annual meeting of the Egyptian Seed Growers Exchange at Flora, July 10. Mr. Peteet will tell the red top growers something of the operation of co-operative associations in other sections as well as describing the A. F. B. F. plans for promoting co-operative marketing.

Local meetings for the election of delegates were held in June. The one man, one vote system is provided for in the by-laws of the exchange, each member having a vote in the election of the delegate and each delegate at the annual meeting casting one vote for each member of his local unit.

A large attendance is expected at the meeting. Special invitations have been sent to all county farm bureaus in the section as well as to bankers and business men.

Tenth Agency of Producers To Open At Oklahoma City

Plans are arranged for the opening of the tenth selling agency under the National Live Stock Producers Association at Oklahoma City, Okla., on July 2. Practically all farmers' organizations in the state are backing the new producers' commission company.

Business of the well-established producers' agencies continues to be on the increase in the majority of cases.

The Chicago Producers ranked first on that market during the first two weeks of June, handling 377 cars from June 2 to 8, and 306 cars from June 9 to 15. The agency is handling about six per cent of the business weekly.

At Indianapolis, the percentage of business done by the farmers' agency is on the increase. During the first week of June, 317 cars or 31.54 per cent of the live stock shipped on that market, went to the Producers. The second week saw the Producers handle 231 cars or 27 per cent of the business.

Come to the State Picnic at Urbana, June 29

OUTINGS REQUESTS FOR CITY CHILDREN BEGIN TO COME IN

I. A. A. Receiving Applications; Third Year of Project Promises Good Record

The first requests for Chicago slums children for two-week outings in the homes of county farm bureau members began coming in to the Outing Secretary of the Illinois Agricultural Association during the first few days in June. Indications are that last year's record of five hundred kiddies given vacations in homes of Illinois farm bureau members will be equalled or even exceeded.

The application blank which was printed in the last issue of The Record will be found on this page. If you wish to take one or more children for an outing some time this summer, fill it out and send it in to the Outing Secretary of the I. A. A.

Third Year

Although the I. A. A. is first and always a business organization, it has always interested itself in some project for helping others each year. This is the third year of the Outing For Children project, carried on in [illegible] with the United Charities, of Chicago, The Daily News, of Chicago and Illinois railroads.

The United Charities, the city's largest non-sectarian charitable organization, selects the children from the most worthy and needy of homes. So destitute are these homes that an outing means almost life itself to the children. The charitable organization outfits the children with clothing appropriate to their outing, has them examined carefully to guard against any possibility of contagious disease and sends them on their vacations spotlessly clean, in charge of competent women directors.

From 4 to 14

The children are of both sexes and range from 4 to 14 in age.

The railroads furnish free fare within a limit of 200 miles from Chicago. The Daily News contributes money and publicity.

Assumes Liability

The farm bureau folks are asked only to take one or more of the children into their homes for two weeks and treat them as they would their own youngsters. The United Charities assumes all liability for injuries.

The families which entertained the five hundred children given outings last summer had only praise for the project. Several of them declared that they got as much out of their contact with their youthful guests as the children could possibly have received from the outing. A large number of families who took children last year requested that they entertain the same ones this summer, as many a warm attachment and friendship was formed during the outings.

PICNIC SPEAKER

Mrs. A. E. Brigden

Madison County Melon Growers May Organize

Cantaloupe growers in the vicinity of Poag, Madison county, recently held a meeting with C. E. Durst of the Fruit and Vegetable Marketing Department of the I. A. A. to consider the formation of a co-operative melon marketing organization.

The growers present seemed favorably impressed with the advantages of such an association. Last year 15 cars of melons were marketed from the locality and this year's crop will be the biggest yet with more than 250 acres under cultivation.

Formation of two more locals of the Illinois Fruit Exchange at Grafton and Jerseyville, Jersey county, seems imminent, as much enthusiasm toward co-operative marketing was manifest at meetings addressed by Mr. Durst.

Peoria Producers Pay Ten Per Cent Dividend

(Continued from page 1)

erection of a new addition to the Exchange office building for more office space. New weighing facilities and sorting pens have also been provided by the stock yards company.

The E. St. Louis Producers agency held first or second rank each week of May. It handled about 15 per cent of the total receipts each week with an average of approximately 240 cars.

This agency also gives a good example of how volume cuts costs of operation. For the first quarter of 1922, it had receipts of 1020 cars and for the same period this year, 2381 cars were handled, an increase of 133.5 per cent. The average expense of selling was $15.50 per car in 1922 and this was reduced to $11.17 this year.

The Kansas City Producers took rapid strides in May. From sixteenth place with 40 cars during the first week, this agency took rapid bounds each week until it stood in fourth place with 116 cars as receipts during the last week of May.

The Buffalo selling agency held first place at that market each week in May, handling an average of about 17 per cent of the receipts weekly.

The tenth Producers agency, it is announced, will open soon at Oklahoma City.

FARM OUTINGS

WANT one or more city youngsters for a two-week outing some time during July or August? If so this blank may be found convenient. It should be filled out and sent in, if possible, before July 1. On account of the fact that the railroads offer free transportation only within a two-hundred mile radius of Chicago, applications can only be accepted within such territory.

To Outing Secretary,
Illinois Agricultural Association,
608 South Dearborn Street,
Chicago, Illinois

We are in position to give a two weeks' vacation to.....

Chicago children some time in July or August, preferably.....

VARIETY OF SERVICE

Ten Departments Working For You

The Illinois Agricultural Association Is Prepared To Serve You In Any Important Business Phase of Illinois Agriculture.

"MEAT FOR HEALTH WEEK," JUNE 25-30, AIMS AT CONSUMER

Vigorous Campaign To Tell Of Live Stock Products In Diet

As a means of calling the attention of consumers everywhere throughout the United States to the high value of meat as a food, its wholesomeness and healthfulness, as well as its importance to Agriculture, the National Live Stock and Meat Board requests the observance of the period of June 25 to June 30 as "Meat For Health Week."

Until the National Live Stock and Meat Board came into being, there was no effective medium through which all factors in the meat industry, from the man on the farm who produces the live stock to the man in the retail shop who sells the meat, could co-operate in the common cause of promoting a better knowledge of the food value and healthfulness of meat. The board is now functioning vigorously, and with the support of the producers and others, will be able to do effective work in restoring meat to the place which it deserves in the American diet. The "Meat For Health Week" will be the Board's first important step toward this end.

Use of Poster

Tentative plans for "Meat For Health Week" call for the distribution and posting in a widespread fashion of the meat poster recently issued by the United States Department of Agriculture.

This poster bears the message: "Meat is Wholesome—For Health and Vigor Eat Well Balanced Meals—Use A Variety of Kinds And Cuts Of Meat."

Recipe Booklet

This poster will probably be supplemented by colored posters bearing various meat dishes which will be in season at the time, as well as by recipe booklets, which will be issued widely, and by demonstrations, in the larger cities of the country, at which the proper methods of selecting and preparing meat will be taught.

Through these various activities, and with the cordial co-operation of live stock producers and their associations, breed associations, live stock shipping associations and other factors in the industry, the Board hopes to make "Meat For Health Week" an unlimited success.

Have You Consigned Your Wool To The 1923 Pool?

Your Lot Will Increase The Volume of Wool In The Pool.

Volume Spells Efficiency In Marketing.

Efficiency Means Greater Net Returns To The Grower.

Fourteen Years Out of Seventeen The Wool Market Advances With The Season.

Live Stock Marketing Dep't., Illinois Agricultural Ass'n.

Milk Producers At Decatur May Organize Company

At the request of the Macon County Farm Bureau, a meeting was held at Decatur recently when 122 milk producers supplying milk to that city met to consider the advisability of forming a co-operative milk marketing company. A. D. Lynch, of the I. A. A. Dairy Marketing Department, addressed the conference.

Explanation was made of the principles of co-operative dairy marketing, its advantages and pitfalls, and the experiences of similar projects that are proving successful in Illinois were related.

The presence of many small milk dealers, the wide range in the retail price of milk, and the lack of facilities for conforming to the new compulsory pasteurization ordinance passed in Decatur, seem to indicate that co-operative effort would greatly improve the milk supply of that city.

While no definite action was taken toward organizing, a committee was appointed to investigate the practicability of the step.

ILLINOIS CO-OPERATIVE BILL IS NOW A LAW

NATIONAL COUNCIL TO BE RESULT OF WHEAT CONFERENCE

Delegates Consider Ills Of Industry; Endorse Co-operation

Decision to set up a Wheat Council of the United States in which all interests will be represented, was one of the main accomplishments of the National Wheat Conference held in Chicago in June, called by governors of seven states, headed by Gov. J. A. O. Preus of Minnesota. Over 400 delegates were present.

This council, according to the resolutions, "will make a thorough, scientific study of the wheat problem and enlist in co-ordinated efforts of all interests to give publicity in every way to its findings and to develop and apply approved methods by which equilibrium between domestic products and consumption can be established and price stabilized on American price level."

Such a council was declared to be necessary to use all the efforts possible to increase the consumption of wheat, to emphasize the part it plays in the life of the nation, and to secure prices for wheat which will allow the American wheat farmer to justify the standards of living to which he has been accustomed and is entitled.

Committee

The personnel of the organization committee which will set up the Wheat Council of the United States is as follows: O. E. Bradfute, Chicago; Charles S. Barrett, Georgia; S. J. Lowell, New York;

(Continued on page 4)

BEFORE—

The organization of county farm bureaus and the Illinois Agricultural Association, the farmers of Illinois had little means of letting the law-makers of the state know just what laws they wanted and what legislation they didn't want. Now, with organization, they have appointed a Legislative Committee to inform the legislators just how the farmers feel about things down at Springfield. Read the story of the work of the Legislative Committee on Page 2 of this issue.

Executive Body Changes Ruling On Claims Charges

Some changes were made at the last session of the Executive Committee of the I. A. A. in regard to the collection of claims handled by the Transportation Department.

The department is authorized to rebate the entire amount of commission charges for transportation claims to farm bureau members in good standing, whose claims come to the I. A. A. through the county farm bureaus.

Non-members of the farm bureau will be charged 25 per cent commission on all transportation claims handled through the Transportation Department.

In handling the claims of co-operative shipping associations, full rebate of commission will be made to associations with 100 per cent farm bureau membership and which are under agreement with county farm bureaus and the I. A. A. A commission of 15 per cent will be charged associations whose membership is not 100 per cent farm bureau.

Resignation of C. E. Durst On July 1 Accepted

C. E. Durst, Director of the Fruit and Vegetable Marketing Department of the I. A. A., tendered his resignation at the last meeting of the I. A. A. Executive Committee. The resignation, which was accepted by the committee, takes effect on July 1, when Mr. Durst will take up his new work with the Federated Fruit and Vegetable Growers, Inc.

Mr. Durst has been director of his department with the I. A. A. for nearly three years, having formerly been adviser of Union and Cook counties and connected with the State University.

He took a prominent part in the organization of the Illinois Fruit Exchange in the spring of 1921 and in its later organization and marketing this season and last. He aided in co-operative fruit and vegetable organization in Tazewell and Cook Counties, as well as in the preliminary work of organizing the Egyptian Seed Growers Exchange. He was a member of the National Fruit and Vegetable Marketing Committee of 21 and is secretary of the Federated Fruit and Vegetable Growers, Inc., which grew out of the plans of that committee.

GOVERNING BOARD OF I. A. A. HOLDS JUNE CONFERENCE

Hear Reports of Work; Discuss New Form of Membership Agreement

A new form of farm bureau membership contract which would do away with much of the expense necessary with the present plan of campaigns every three years was one of the most important matters discussed at the June meeting of the I. A. A. Executive Committee.

With the plan presented, farmers would sign up in their organizations, the county farm bureau, the I. A. A. and the A. F. B. F. for a period of three years and their membership would continue from year to year thereafter unless the farm bureau or the member terminated the contract, in writing, within 60 days after the close of the three-year period or at a like date any year after that.

Other plans were submitted to the committee but action was deferred until a later period.

Reports were made to the committee by the various departments of the state association which showed a healthy condition prevailing in general. R. N. Clarke made a report on the Egyptian Seed Growers Exchange, which indicated plans for further expansion during the season. Donald Kirkpatrick, Attorney for the I. A. A., reported the progress of the Illinois-Missouri milk marketing situation.

Combine Effected Between "Co-ops" At Sioux City, Ia.

Affiliation of the Nebraska Farmers' Union Commission Company at Sioux City with the National Live Stock Producers Association is the latest evidence of the trend toward amalgamation of organized agriculture.

According to an agreement reached in June, the Farmers' Union will appoint two live stock producers living in the Sioux City territory and the National Live Stock Producers will appoint one producer from the same territory to compose a committee to supervise the affairs of the commission company, subject to the approval of the presidents of the Farmers' Union and the National Producers.

GOVERNOR SIGNS MEASURE LEGALIZING ORDERLY MARKETING OF FARM PRODUCTS

Opponents Fail In Effort To Bring About Veto of Act; Considered Great Victory For Farmers in Struggle For Improved Economic Conditions

Illinois has a Co-operative Marketing Law!

Signature of the bill by Governor Len Small on June 22 gives Illinois farmers a law similar to that passed in over half the states of the Union which legalizes the marketing of agricultural products on a co-operative basis.

All other states were watching Illinois in its fight for the passage of the law. It was considered a real battleground between the farmers in their struggle for an orderly marketing system and the strongly intrenched marketing interests which center in the state. Passage of the law was a signal victory for organized agriculture.

Many attempts were made to make the bill ineffective by amendment and by striking out important sections in its passage through the Senate and House. However, the efforts of opponents failed and proponents of the bill had control of the situation at all times. Backed by the loyal support of the organized farmers of Illinois, it went through the Senate by a vote of 34 to 3 and the House passed the measure 100 to 47.

In the final hearing of the bill before the Governor, opponents again appeared, this time to urge the veto of the act. Those attacking the measure were J. E. Poole, Chicago Live Stock Exchange; W. G. Carmichael, St. Louis Live Stock Exchange; L. N. McIntosh, Chicago Milk Dealers Association; and R. E. Little, of the Illinois Milk Producers.

Senators Lantz (Woodford), Turnbaugh (Carroll), and Cuthbertson (Macoupin), together with President S. H. Thompson and A. C. Everingham, of the I. A. A. Legislative Committee, defended the Co-operative Bill.

Signature of the bill makes it become a law on July 1.

RED TOP GROWERS TO HEAR PETEET AT ANNUAL MEET

Walton Peteet, Director of Co-operative Marketing for the A. F. B. F., will address the annual meeting of the Egyptian Seed Growers Exchange at Flora, July 10. Mr. Peteet will tell the red top growers something of the operation of co-operative associations in other sections as well as describing the A. F. B. F. plans for promoting co-operative marketing.

Local meetings for the election of delegates were held in June. The one man, one vote system is provided for in the by-laws of the exchange, each member having a vote in the election of the delegate and each delegate at the annual meeting casting one vote for each member of his local unit.

A large attendance is expected at the meeting. Special invitations have been sent to all county farm bureaus in the section as well as to bankers and business men.

Tenth Agency of Producers To Open At Oklahoma City

Plans are arranged for the opening of the tenth selling agency under the National Live Stock Producers Association at Oklahoma City, Okla., on July 2. Practically all farmers' organizations in the state are backing the new producers' commission company.

Business of the well-established producers' agencies continues to be on the increase in the majority of cases.

The Chicago Producers ranked first on that market during the first two weeks of June, handling 377 cars from June 2 to 8, and 306 cars from June 9 to 15. The agency is handling about six per cent of the business weekly.

At Indianapolis, the percentage of business done by the farmers' agency is on the increase. During the first week of June, 317 cars or 31.54 per cent of the live stock shipped on that market, went to the Producers. The second week saw the Producers handle 281 cars or 27 per cent of the business

I. A. A. 'Bats' 100 Per Cent In Legislative Program In 53rd General Assembly

The Fifty-Third General Assembly of Illinois has passed into history. Several laws of interest and importance to the farmers of the state have been passed. Most notable of all farm legislation acted upon was the passage of the Co-operative Marketing Bill, acclaimed by many to be one of the most important pieces of legislation passed in Illinois for several years. There were other constructive measures, too.

The I. A. A. has been right behind the bills which it considered to be for the best interests of Illinois farmers. It has actively supported some measures, it has less actively urged the passage of others, and it has been on the watch for measures which would be detrimental to the agricultural well-being of the state.

The Legislative Watch-dogs of the I. A. A. are the members of the Legislative Committee, composed of President S. H. Thompson, Quincy, chairman; A. C. Everingham, Hutsonville, and Frank D. Barton, Cornell. Just as big business and manufacturing interests keep their eyes on the doings of the Legislature, so does Illinois agriculture, through the Legislative Committee of the I. A. A., make a study of lawmaking.

Frank D. Barton

Mr. Barton hails from Cornell and has been doing his share in letting the legislators know what the "folks back home" want.

Well Supported

Right behind the Legislative Committee were the loyal farm bureau presidents of the state and the membership which responded so heartily whenever called upon to find out the sentiments of the "folks back home." The Legislative Committee would have been almost helpless without this support and little would have been accomplished.

And then there was the active co-operation and aid given to agricultural interests by many members of the Senate and House. Senator Simon Lantz, chairman of the Senate Committee on Agriculture, and Representative Homer Tice, Chairman of the House Committee on Agriculture, were especially interested in the passage of beneficial farm legislation.

Bills which the I. A. A. most actively supported, each of which passed, were the Co-operative Marketing Bill, bovine tuberculosis bills, dairy advertising bill, filled milk amendment, and fruit inspection and grading acts.

CHAIRMAN

S. H. Thompson

S. H. Thompson, Quincy, President of the I. A. A., who heads the Legislative Committee of the association.

The "Co-op" Act

S. B. 165 to provide for a Co-operative Marketing Law, introduced by the Committee on Agriculture, was one of the most bitterly contested measures brought up during the session. It easily passed the Senate in final vote by 34 to 3 and the House agreed to its passage by a vote of 100 to 47.

But the final votes do not tell the tale. The struggle to pass the bill was a fight to the finish. Every effort was made to kill the bill or to render it ineffective. In the House, especially, were strong efforts made to strike out important sections and to amend the bill. However, during the entire progress of the bill, in every roll call, its proponents had control of the situation.

"Now that it's passed, let's see it work," seems to be the general challenge of those who opposed the "Co-op" bill. In passing the measure, Illinois has fallen in line with over half the states in the Union who have enacted a similar law. Inasmuch as so many farm marketing interests are centered in Illinois, and particularly Chicago, it was especially needed in the state and the fight against it has been more bitter than in most other states.

What It Will Do

The Co-operative Marketing Law will legalize co-operative marketing. It clearly defines who may organize such associations and how they may be organized. It enumerates the activities and powers of a co-operative. The legality of a commodity marketing contract is provided for. Co-operative marketing organizations are protected against false reports and malicious statements.

It provides an injunction against persons who knowingly solicit or persuade a member of an association to breach his marketing contract. Through the requiring of bonds and the submission of regular reports from employees of co-operative associations, the membership is protected from mismanagement. Existing associations are allowed to reorganize under the law.

In short, the Co-operative Marketing Act gives Illinois farmers a law which will allow them to organize co-operatively for the orderly merchandising of their products without fear of their organization or membership contracts being called illegal. It seeks to do for the marketing of farm products what corporation law does for other business activities.

Tuberculosis Bills

Three acts were passed by the Legislature which will do much to clean up bovine tuberculosis in the state. These were strongly supported by the I. A. A.

S. B. 209 provides for the appropriation of $1,000,000 for the next two years for the purpose of indemnifying owners of tubercular cattle which have been destroyed.

A provision of S. B. 348 makes it legal for counties to appropriate funds from the county treasury for the eradication of tuberculosis in cattle.

S. B. 377 provides that the state of Illinois shall indemnify the owners of cattle destroyed for tuberculosis to the extent of two-thirds of the appraised value in case the Federal Government fails to appropriate funds or withdraws indemnity funds from the state. In no case shall the state reimburse the owner more than $50 for a grade or $100 for a pure bred animal in the event that Federal funds are withdrawn.

A. C. Everingham

Mr. Everingham, whose home is in Hutsonville, is one of the members of the committee who did much to put across its Legislative program.

Dairy Advertising

A law passed which will serve for the protection of dairy interests of the state was H. B. 223 which prevents the illegal use of the words butter, cream, and dairy in connection with the sale or advertisement of any butter substitute. Penalties are provided for violations.

House Bill 122, adding a section to the Pure Food Act of 1907, makes it illegal to manufacture or sell any food derived from milk to which has been added any fat or oil other than milk fat. This is similar to the "filled milk" bills passed in other states.

Shipping Point Inspection

A law which will be of especial advantage to producers of fruit and other perishables is S. B. 460 which authorizes the state Department of Agriculture to fix certain standards for grading and classifying any or all agricultural products produced in the state. It appropriates $15,000 for the carrying out of the act.

An especially desirable feature of the law is the provision for shipping point inspection of farm products. Such inspection will protect shippers of perishables by insuring the condition of the products before shipment. There has been some loss in the past when unscrupulous dealers misrepresented the condition of shipments upon arrival at their destination or rejected them for unwarranted reasons.

Another law of interest to fruit growers is the amendment to the Illinois apple grading law. S. B. 459 gives Illinois apple producers the right to grade their product under the provisions of the present U. S. Department of Agriculture grading rules instead of under the Illinois law, if they so desire.

Other Legislation

Besides very actively supporting the measures just named, the I. A. A. has lent support to several other laws which were passed by the Assembly.

(Continued on page 3)

Co-Operative History Told In New Book

"Co-operative Marketing — The Golden Rule in Agriculture," is the latest book upon organized agriculture to appear. Taking as its theme the history of the organization of co-operative associations all over America, the book is sponsored by the American Farm Bureau Federation and published by Doubleday Page and Co., of New York. It retails for one dollar.

Where O. M. Kile's book, "The Farm Bureau Movement," which has been widely read by farm bureau folks, portrayed the rise of the county, state and national farm bureau organizations, "Co-operative Marketing" tells the later organization of the co-operative marketing movement. Herman Steen, of Prairie Farmer, Chicago, is the author.

The Record will publish a review of the book later.

Farm Bureau Is Heard In Packer Merger Hearing

Newton Jenkins of the I. A. A. Legal Department, represented the American Farm Bureau Federation at the Armour-Morris merger hearings held before Chester I. Morrell of the Packer-Stockyards Administration at the Union Stock Yards, Chicago.

The economic facts of the packer merger as affecting the producers of live stock was the big aim of the hearing. C. W. Hunt, President of the Iowa Farm Bureau Federation, testified that he believed the absorption of the Morris interests by Armour & Company "would have a bad effect from the feeders' standpoint" and if held legal might lead to still further concentration of packing industries.

Crawford County Apple Growers Join Exchange

Apple growers in the vicinity of Oblong and Robinson, Crawford county, signed up 100 per cent for membership in the Illinois Fruit Exchange in June organization meetings held by Farm Adviser H. F. Crosby and C. E. Durst of the I. A. A. Fruit and Vegetable Marketing Department.

How are the live stock pens and watering facilities?

Transportation Department,
Illinois Agricultural Association.

Egyptian Seed Growers Increasing Facilities

Organization of the Egyptian Seed Growers Exchange for the co-operative marketing of red top seed was effected in the summer and fall of 1922 by the farm bureaus of Clay, Wayne, Marion, and Jefferson counties, assisted by the Illinois Agricultural Association. Robert N. Clarke represented the I. A. A. in directing the organization work.

Practically 92 per cent of the red top seed grown in the United States is produced by farmers in the southern Illinois counties named. Individual sale of the crop by individual farmers is woefully inefficient, the product being one upon which there are no regular market quotations. A voluntary pool of 45 crops, conducted largely by the Clay County Farm Bureau in 1921, showed a healthy effect upon the market, hence the incentive for a larger pool.

680 Members

Before the close of the 1922 harvest season, one-fourth of the red top of the section was under contract. A membership of 680 growers had signed up to sell through the exchange for a period of five years.

Due to the fact that the work of organization started too late to build warehouses and to handle the crop, contracts were entered into with two seed firms, one at Flora, Clay county, and the other at Cisne, Wayne county, to clean, warehouse, and prepare the seed for market. The exchange received 1,200,000 pounds of seed into the pool after harvest.

Loans Secured

The seed was handled by these warehouses to comply with the Illinois warehouse act so that negotiable warehouse receipts could be issued to serve as security to obtain funds to pay advance to members. Loans were obtained from 24 different banks in the red top district, ranging in amount from $1,650 to $7,500.

An advance of eight cents per pound, or about 60 per cent, was paid to all members who desired it. For those who did not draw their advance, interest was allowed on their account at the same rate which the exchange paid at banks.

Owing to the unsatisfactory seeding season, the exchange has not yet disposed of its entire holdings, although the carry-over is not considered any larger, if as large, as the normal carry-overs heretofore. With few exceptions the membership has remained satisfied.

Pool Boosts Prices

Local buyers opened the red top market at 12 cents per pound last year. Some of them dropped to 10 cents after the harvest season began. Due to the activity of solicitors for the exchange, the dealers were compelled to advance their prices materially toward the close of the season in order to fill their requirements. Some seed was purchased as high as 16 to 16½ cents late in the season.

It is recognized by members and non-members, alike, and admitted by several dealers that, without the pool, practically all the seed would have sold at from 10 to 12 cents per pound.

New Warehouse

Plans have been made during the past month to handle this season's crop. The contract for a new warehouse at Flora has been let and the work started June 11. It will be completed by August 1. Necessary machinery and equipment has been ordered so that it will be on the ground in ample time for the harvest season. The warehouse, 50x100, is being built of concrete and tile with asphalt roof and made as nearly fire-proof as possible.

To avoid long hauls by team or extra freight charges, the plant belonging to T. C. Hambleton, at Jeff, Wayne county, has been purchased. With this plant and the new warehouse at Flora, the exchange will have sufficient cleaning and storing capacity to handle the seed of the present membership and to take care of a moderate increase.

Although some increase in membership is expected by the exchange this year, no intensive campaign is planned, as the directors are of the opinion that it will be advisable to complete their arrangements for the handling of the present amount of seed rather than to undertake too rapid expansion.

PRESIDENT

J. S. McDonald

J. S. McDonald, Jefferson county, heads the Egyptian Seed Growers Exchange, the organization which is getting better prices for red top seed through co-operative marketing.

Curt Anderson

Mr. Anderson, who lives in Xenia, Clay county, is secretary-treasurer and acting manager of the Egyptian Seed Growers Exchange. He is also the member of the Executive Committee of the I. A. A. representing the 24th district.

Officers

J. S. McDonald, Jefferson county, is president of the Egyptian Seed Growers Exchange. The vice-president is J. N. Embser, Marion county, and Curt Anderson, Clay county, is secretary-treasurer and also acting manager of the exchange.

Other members of the board of directors are S. S. Hardin, Clay county, George Orr and J. B. Atteberry, Wayne county, and Carleton Trimble, Crawford county. Mr. Trimble was nominated by the I. A. A. and elected to the exchange so that the board would have a closer association with the I. A. A. and have the unbiased judgment of one board member who was not a producer of red top.

I. A. A. "BATS" 100 PER CENT IN LEGISLATION

(Continued from page 2)

An important bill approved by both Senate and House was S. B. 346 which provides for the creation of a Tax Investigation Commission to investigate the entire subject of taxation and to report to the Governor and the next General Assembly with recommendations of legislative changes. The commission would consist of 11 members; three from the Senate, appointed by the President; three from the House, appointed by the Speaker; one from the Illinois Bankers' Association; one from the Manufacturers' Association; one from the Illinois Agricultural Association; one from the Coal Operators' Association; and one from the Federation of Labor, the last five named being appointed jointly by the President of the Senate and the Speaker of the House.

As passed, appropriation of $10,000 was made for the commission.

School Laws

Support of the I. A. A. was given to several school laws which were passed. Some good legislation was put through which will tend to eliminate some of the worst evils of the present legislation and a foundation was laid for more action.

S. B. 28 provides a method of organizing contiguous territory bounded by school district lines into community consolidated school districts on petition and submission to elections.

S. B. 220 provides that the common school fund shall be distributed according to the number of days school is in session, the amount of assessed valuation of property, the standard of training of the teaching staff, the number of teachers and the numbers of pupils in each district. It defines more clearly the duties of the State Superintendent of Public Instruction.

A clearer defintion of the powers and duties of school boards is made in S. B. 440. More power is placed in the hands of the people. It also makes provision for the sale of school sites or buildings when such are unnecessary, unsuitable, or inconvenient for a school.

Road Legislation

While some beneficial road legislation was passed, it is generally agreed that there is still much more to be done in that phase of law-making.

A section of S. B. 422 provides an additional tax of one dollar per 100 pounds, gross weight, on motor trucks and busses which are used for hire on regularly established routes.

Several other acts were passed mainly providing for the validation of various tax levies for road construction. S. B. 311 was passed, which provides for the maintenance of a force of 100 motorcycle officers on highways.

"Pittsburgh Plus"

The appointment of a commission to help bring about the abolition of "Pittsburgh Plus" and appropriating $25,000 for the commission is the aim of S. B. 139 which easily passed both houses.

Watch for Harmful Laws

The Legislative Committee of the I. A. A. was always on the alert for laws which would be of harm to farming interests. One example of an incident of this kind was the attempt to pass a law changing the date of assessment from April 1 to January 1. Passage of this bill would have increased farmers' taxes greatly because of the fact that he has a much larger inventory at the first of the year than on April 1. The I. A. A. opposed this bill and it was tabled.

Another example of law prevention was an insurance bill which appeared to the Legislative Committee to threaten the existence of farmers' mutual companies. It was not passed.

In summarizing, it may be said that the I. A. A. was on the job all the time on behalf of Illinois farmers' interests at the Fifty-Third General Assembly. Several excellent laws were passed largely through its efforts, notably the Co-operative Marketing Act. Other good laws had I. A. A. support. Legislation which might have worked harm to farmers was prevented. In short, the Farm Bureau was on the job.

Nine Exchanges Now Designated Contract Markets

Since the constitutionality of the Capper-Tincher Act was upheld by the U. S. Supreme Court in April, all of the nine principal grain markets on which there has been future trading have revised their by-laws to conform to the provisions of the act and have been designated as contract markets by Secretary of Agriculture Henry Wallace.

PACKERS SEEKING CHANGE IN RATES; OPPOSED BY I. A. A.

Declare Proposed Action Would Lower Live Stock Prices Paid Producers

The petition of interior Iowa packers before the Interstate Commerce Commission to secure a readjustment of rates on fresh meats and packing house products from shipping points west of the Mississippi to eastern markets, is being opposed by the I. A. A. as well as the American Farm Bureau Federation, live stock shipping associations, and live stock exchanges.

The case was filed in the name of John Morrell & Co. of Ottumwa, Ia., versus the New York Central Railway, asking for readjustment of rates on fresh meats and packing house products from Interior Iowa points to points in the eastern part of the country. It is asked that the rates on manufactured products do not exceed the rates in effect on live stock.

Other Complaints Filed

Separate complaints asking for the same changes were made by Swift & Company and Wilson & Company, who desire readjustment from other points such as Kansas City, Sioux City, St. Joseph, South St. Paul, and Albert Lea, Minn.

The complainants contend that the present spread between the rates on fresh meats and packing house products one one hand and live stock on the other is too great and results in a disadvantage to their interests.

I. A. A. Protests

The I. A. A. in protesting the granting of the packers' petition in an intervening petition, alleges that the rate charges, if granted, would be detrimental to the interests of Illinois live stock producers.

"This is considered the most important case involving rates on live stock, fresh meats, and packing house products in the history of the country," declares the Transportation Department of the I. A. A.

"If the petition of the complainants is granted it will enable the interior Iowa packers to ship fresh meats and packing house products to eastern markets at the same or lower rates per hundred than live stock on the hoof.

Don't Forget the Outings For Slums Kiddies!

CITY TOT GIVEN HOME FOR SUMMER IN HENRY COUNTY

Little Girl Happy As Result of I. A. A. Project; Get Applications In

The other day a young lady from Henry county dropped into the I. A. A. office in Chicago to see the Outing Secretary. She explained that her mother was one of the farm wives who gave a little girl from the slums a two-week outing last summer in their farm home.

"We would like to have the same girl again," said the young lady, "and I am sure she will be glad to come to us. Only this time we want to keep her all summer. I can take her home with me tonight. She's a little tot of seven and last summer during her two weeks' stay with us she gained five pounds and was so happy on the farm."

Takes Girl Home

The I. A. A. Outing Secretary immediately got in touch with the United Charities, the agency which selects the most worthy and needy children for outings. The little girl's mother, a factory worker, was seen and she was very happy to have the child offered the opportunity of another summer on the farm. Arrangements were quickly made and little Marion (for that was her name) was on her way to Henry county that night.

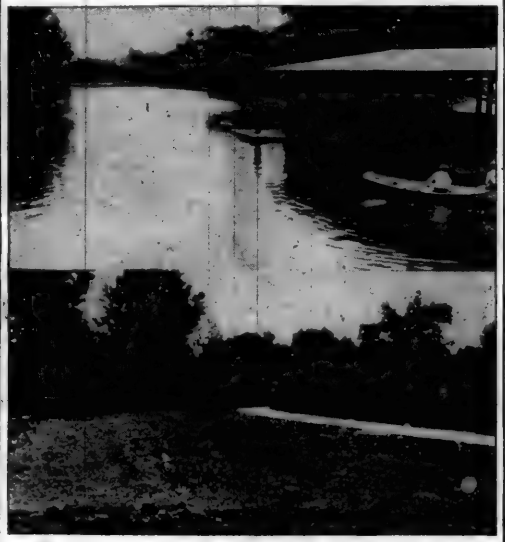
That's just one example of the results of the Outings for Children project of the I. A. A. It is a plan which transfers kiddies from their miserably hot and dangerous playgrounds on city streets into the homes of farm bureau members in God's great out-of-doors.

Last year nearly 500 children went to farm homes under the auspices of the I. A. A., co-operating with the United Charities, Chicago Daily News, and Illinois railroads.

More Applications

This year it is desired to place even more children. Applications are coming to the I. A. A. daily, but many more are wanted.

It is very noticeable that farm bureau members who took children last year were the very first to apply this year. It is quite evident that strong attachments have been made. Many ask to have the same kiddies back again.



"We want the same four children that we had last summer," reads a Mercer county letter, which names the two boys and girls desired. "They are surely dandy youngsters and we would like to have them again if it is at all possible."

Deserving Children

The application blank is reprinted for your convenience in this issue of The Record. Requests may be sent in until July 15. Remember that the children sent are deserving boys and girls from 4 to 14. The railroads furnish free transportation within 200 miles from Chicago. The United Charities assumes all liability for injuries and sends them to you with fresh clothing, free from contagious disease, and spotlessly clean.

Just put yourself in the place of a slum kiddie and imagine what a farm outing would mean to you!

SOME VIEWS WHERE THE PICNIC WAS HELD

FARM Bureau folks from all over Illinois gathered at Crystal Lake Park, Urbana, June 29, for the Fourth Annual I. A. A.-County Farm Bureau Picnic. Due to the fact that The Record went to press several days before the big event, we could not tell you about it this time. The story will appear in the next issue.

FARM OUTINGS

EXTENSION of the time in which farm bureau folks may send in requests to provide a two-week outing for city youngsters during July or August has been made until July 15. This blank may be found convenient to fill out and send in. On account of the fact that the railroads offer free transportation only within a 200-mile radius of Chicago, applications can only be accepted within such territory.

To Outing Secretary,
Illinois Agricultural Association,
608 South Dearborn Street,
Chicago, Illinois

We are in position to give a two weeks' vacation to.....

Chicago children some time in July or August, preferably.....

.....

Our choice of age and sex is as follows:.....

.....

.....

Our nearest railway station is at.....

County.....but we could meet the children at.....

.....

(Please name at least two optional stations)

It is understood that the United Charities of Chicago assumes the liability in the case of accident or illness to any of the children sent to us; however, we pledge to exercise proper precautions in the care and treatment of these children.

Name .....

Post office .....

Rural Route No. .....

One of the most enthusiastic schools of instruction for solicitors held for a long time was the one in Carroll county in June in preparation for the reorganization campaign. Out of an attendance of 171, of whom 161 were eligible for membership, 163 agreements were signed. A banker-farmer signed three agreements—one for each of his farms.

Odds Against City Boys--Girls In Popular Favor

"Nobody wants a boy!"

Strange as that statement may seem, yet it appears to be the case in reading the majority of applications from farm bureau folks who are willing to give Chicago slums kiddies a two-week outing.

In fact in the applications so far received, the demand for girls outnumbers the call for boys just four to one.

Several are quite emphatic in their demand for girls, others give the lasses as first choice but will take boys, while the small majority are requesting boys only.

What's the reason? It can't be because of last summer's experiences with boys because the odds favored the girls then also. Then again, the I. A. A. has had no complaints from farm bureau families who did "put up" with city laddies for the two weeks last year.

In fact, it is a rather queer proposition.

To be frank, the Outing Secretary of the I. A. A. doesn't like it. When she saw little boys crying last summer because their sisters went to the country while they had no chance, she decided the boys were getting the worst of the bargain.

Now, to be truthful, does it look to you as if it's just exactly fair?

"Let's give the boys a chance!"

NATIONAL COUNCIL TO BE RESULT OF WHEAT CONFERENCE

(Continued from page 1)

Alexander Legge, Chicago; H. S. Helm, Minneapolis; F. B. Wells, Minneapolis; Julius Fleischmann, New York; A. L. Taggart, Indianapolis; Sydney Anderson, Minnesota; George C. Jewett, Minneapolis; Harvey Sconce, Illinois; Dan Wallace, St. Paul; Judge Bingham, Louisville; T. Edson White, Chicago; and H. E. Byram, Chicago.

Endorse Co-Operation

The conference went on record in support of co-operative grain marketing but split on the question of governmental price fixing. Representatives of the American Farm Bureau Federation voted against any attempt to fix a definite price on wheat through governmental agencies.

Speakers

There were several prominent speakers during the two days' sessions. O. E. Bradfute, president of the American Farm Bureau Federation, urged one great national body of farmers to bring about regulated production and better distribution of wheat, together with a campaign for increased consumption.

President Samuel Gompers of the American Federation of Labor, made an especially strong address, emphasizing the necessity for farmers to lay more stress on organization.

Advisers In June Meeting At U. of I.; Club Tour Held

Illinois farm advisers met at the University of Illinois, Urbana, for their annual June meeting. Melvin Thomas, farm adviser of Coles county, presided at the sessions. He is president of the state association of advisers.

The conference opened with an address, "Co-operative Marketing as Demonstrated by Actual Experience," by Dr. Theodore Macklin, of the University of Wisconsin. He described the advantages and pitfalls of co-operation and stated that the ultimate aim in co-operative marketing is to make happier rural communities and general improved conditions of farm life.

Tours and inspections of the agronomy plots, animal husbandry and dairy departments, and animal pathology and hygiene laboratories were made by the advisers to learn the latest results of experimentation. Several talks were delivered by members of the College of Agriculture faculty and others.

The annual boys' and girls' club tour was held at Urbana on June 22 when club members from a wide area of the state assembled with their leaders to visit the university and especially the various departments of the College of Agriculture.

Supervision Brings Cleanup At South St. Paul Market

As a result of federal supervision under the stockyards control act, nine out of the 30 firms operating on the South St. Paul Live stock market have been fined or suspended during the last two months. Twenty-two out of the 30 firms had had their books audited when this report was made.

NEW U.S. GRAIN GROWERS, INC., PLAN ADOPTED

FORM PRODUCERS "CO-OP" TO RETAIL MILK AT DECATUR

I. A. A. Advises Organization After Finding Conditions Favorable

Formation of the Producers Co-operative Dairy Association, capitalized at $40,000, took place at Decatur, July 2. About 250 milk producers supplying milk to that city will be members of the new "co-op," which was formed by the Macon County Farm Bureau in co-operation with the I. A. A. Dairy Marketing Department.

Dissatisfaction with the present milk distribution system of the city led up to the organization. Producers have lately been getting only three cents per quart for milk which has been retailing for 12 cents. The new company will strive to secure a higher price for the producer and at the same time greatly better the quality of the product for the consumer.

An organization committee of nine with L. E. Bear as chairman, was appointed to act as a board of directors until organization is completed. They will form a stock sales committee. Shares of stock will be sold at a par value of $100 each.

Before advising organization, the Dairy Marketing Department conducted a business survey of the retail milk situation of Decatur and found that conditions were favorable for a producers company to sell market milk, providing it is efficiently capitalized and properly managed.

Judging from the enthusiasm manifested by the milk producers, the latest addition to the I. A. A. family of dairy "co-ops" shows every promise of success.

Pen Which Signed Co-operative Act Presented to I. A. A.

At the July meeting of the Executive Committee, President S. H. Thompson presented the pen with which Governor Small signed the Co-operative Marketing Act, to the committee with the recommendation that it be preserved as one of the valued possessions of the association. It is planned to place the pen in a glass case and to hang it on the walls of the I. A. A. office.

Red Top Growers First to Apply Under New "Co-op" Law

Only the fact that there were no application blanks available at the office of the Secretary of State prevented the Red Top Growers' Warehouse Association from filing its application to reorganize under the provisions of the new Illinois Co-operative Marketing Law which went into effect July 1. This subsidiary of the Egyptian Seed Growers Exchange was the first to apply under the act. The Exchange had made plans to apply immediately after its annual meeting, July 10.

MANY COUNTIES TO REORGANIZE THIS SUMMER AND FALL

Many Illinois counties will stage membership reorganization campaigns within the next few weeks to renew the three-year membership contracts. Most of the campaigns are in the southern part of the state.

Only one school of instruction will be held in July, that of Jackson county on July 31.

In August the following schools are scheduled by the I. A. A. Organization department: August 7, Franklin county; August 8, Pulaski county; August 9, Edwards county; August 14, Greene county; August 15, St. Clair county.

In September, Piatt county has its school planned for the fourth, followed by Bond, Sept. 12; Jo Daviess, Sept. 13; Scott, Sept. 15; Henderson, Sept. 18; and Richland, Sept. 25.

Johnson county will hold its school October 9, the only one thus far scheduled for October.

Fundamental Principles of Marketing

IT COSTS MORE—

A—To sell at long distances than at short.
B—To sell unstandard than standard products.
C—To sell perishable than unperishable.
D—To sell small quantities than large quantities.
E—To sell many varieties than few varieties.
F—To sell products with a seasonable demand than with an unseasonable demand.
G—To sell products not widely known than those widely known.

Hon. Sydney Anderson,
I. A. A. Picnic,
June 29th, 1923.

STILL HOLDING THE SACK

Chicago Producers Vote Thirty Per Cent Refund

The Board of Directors of the Chicago Producers Commission Association has voted to refund to its shipper members 30 per cent of all commissions paid in during the year which closed June 30. The refund amounts to approximately $70,000.

It will be remembered that the success of the company led to an announcement early last February that cash membership fees would be dispensed with. A total of $10,176.06 was returned to shippers shortly after that date.

During its first year of operation, the Chicago Producers handled 11,742 car loads of live stock which sold for a total of $19,828,033.54.

Starting with a manager, two cattle salesman, three hog salesmen, a cashier and small office force, the farmers' concern has expanded with growth of the business until the office now has three cattle salesman, three hog salesman, one sheep salesman, and also a well trained office and yard force.

The Chicago Producers took the lead in number of hogs handled among commission firms on that market early in July, 1922, and has held the lead nearly every week since then. At present between 12 and 15 per cent of hog receipts in Chicago go to the Prodpcers. An average of about 6 per cent of the total live stock receipts is handled by the "co-op."

Producers Will Open Agency at Pittsburgh, Pa.

Live stock producers tributary to the Pittsburgh market recently held a meeting which resulted in the decison to establish an agency of the National Producers Commission Association at that market. Committees were chosen to arrange details of establishment. Harry G. Beale, Mt. Sterling, O., heads the new "co-op."

The Producers opened an agency at Oklahoma City on July 2. Dan Gaumnitz, St. Paul, Minn., was employed as manager and hog salesman of the Oklahoma company.

C. C. Burns, for three years advisor in Jo Daviess county, will succeed C. H. Gathout as farm advisor of Champaign county, on Sept. 1. Mr. Oathout recently resigned after 10 years service in the county.

MID-WEST CHIEFS APPROVE; REQUEST MARKETING POLICY

Direct Funding of Debts and Setting Up of Sales Agencies at Terminals

(On Page Two of this issue will be found the complete report of the U. S. Grain Growers, Inc.)

At a meeting of representatives of the farm bureau federations of Illinois, Ohio, Indiana, Michigan, Iowa, Minnesota, Missouri, Nebraska, Kansas and North Dakota, composing the Mid-West presidents and secretaries, a new plan for the future course of action of the U. S. Grain Growers, Inc., was adopted.

The plan provides for the funding of debts by the U. S. Grain Growers, Inc., and the setting up of sales agencies in the various terminal markets under the Capper-Tincher act. The American Farm Bureau Federation will formulate a national grain marketing policy based on organization of producers by states, with long-term contracts, pooling by grades on the basis of milling values, corn to be handled separately.

The following is the resolution adopted unanimously:

"Resolved by this meeting of President and Secretaries of Mid-west Farm Bureaus in session at Chicago, July 3, 1923:

"1. That the American Farm Bureau Federation be requested through its Co-operative Marketing Department to formulate a national grain marketing policy, based on organization of producers by states, with long-term contracts, pooling by grades on basis of milling value, corn to be handled with separately and that appropriate action be taken to conduct organization campaigns in the several grain growing states in the order of their readiness to begin such work.

"2. That we request the Executive Committee of the U. S. Grain Growers to co-operate with the American Farm Bureau Federation in carrying out the program outlined above.

"3. That pending the organization of state co-operative grain marketing organizations as above, we approve the plan of the Board of Directors of the U. S. Grain Growers, Inc., to engage in grain selling on the plan submitted to us today, the same to be merged into or supplanted by the organizations contemplated in paragraph 1 hereof at such time as the latter are ready to begin operations."

The above resolution was approved by the I. A. A. Executive Committee in its meeting on July 6.

The Supreme Court of Texas recently sustained the co-operative cotton market contract in all its particulars.

Don't Forget the Outings For Slums Kiddies!

CITY TOT GIVEN HOME FOR SUMMER IN HENRY COUNTY

Little Girl Happy As Result of I. A. A. Project; Get Applications In

The other day a young lady from Henry county dropped into the I. A. A. office in Chicago to see the Outing Secretary. She explained that her mother was one of the farm wives who gave a little girl from the slums a two-week outing last summer in their farm home.

"We would like to have the same girl again," said the young lady, "and I am sure she will be glad to come to us. Only this time we want to keep her all summer. I can take her home with me tonight. She's a little tot of seven and last summer during her two weeks' stay with us she gained five pounds and was so happy on the farm."

Takes Girl Home

Due to the fact that The Record went to press several days before the big event, we could not tell you about it this time. The story will appear in the next issue.

FARM OUTINGS

EXTENSION of the time in which farm bureau folks may send in requests to provide a two-week outing for city youngsters during July or August has been made until July 15. This blank may be found convenient to fill out and send in. On account of the fact that the railroads offer free transportation only within a 200-mile radius of Chicago, applications can only be accepted within such territory.

To Outing Secretary,
Illinois Agricultural Association,
608 South Dearborn Street,
Chicago, Illinois

We are in position to give a two weeks' vacation to.....

Chicago children some time in July or August, preferably.....

.....

Our choice of age and sex is as follows.....

.....

.....

Our nearest railway station is at.....

County .....but we could meet the children at .....

.....

(Please name at least two optional stations)

It is understood that the United Charities of Chicago assumes the liability in the case of accident or illness to any of the children sent to us; however, we pledge to exercise proper precautions in the care and treatment of these children.

Odds Against City Boys-- Girls In Popular Favor

"Nobody wants a boy!"

Strange as that statement may seem, yet it appears to be the case in reading the majority of applications from farm bureau folks who are willing to give Chicago slums kiddies a two-week outing.

In fact in the applications so far received, the demand for girls outnumbers the call for boys just four to one.

Several are quite emphatic in their demand for girls, others give the lasses as first choice but will take boys, while the small majority are requesting boys only.

What's the reason? It can't be because of last summer's experiences with boys because the odds favored the girls then also. Then again, the I. A. A. has had no complaints from farm bureau families who did "put up" with city laddies for the two weeks last year.

In fact, it is a rather queer proposition.

To be frank, the Outing Secretary of the I. A. A. doesn't like it. When she saw little boys crying last summer because their sisters went to the country while they had no chance, she decided the boys were getting the worst of the bargain.

Now, to be truthful, does it look to you as if it's just exactly fair?

"Let's give the boys a chance!"

NATIONAL COUNCIL TO BE RESULT OF WHEAT CONFERENCE

(Continued from page 1)

Alexander Legge, Chicago; H. S. Helm, Minneapolis; F. B. Wells, Minneapolis; Julius Fleischmann, New York; A. L. Taggart, Indianapolis; Sydney Anderson, Minnesota; George C. Jewett, Minneapolis; Harvey Sconce, Illinois; Dan Wallace, St. Paul; Judge Bingham, Louisville; T. Edson White, Chicago; and H. E. Byram, Chicago.

Endorse Co-Operation

The conference went on record in support of co-operative grain marketing but split on the question of governmental price fixing. Representatives of the American Farm Bureau Federation voted against any attempt to fix a definite price on wheat through governmental agencies.

Speakers

There were several prominent speakers during the two days' sessions. O. E. Bradfute, president of the American Farm Bureau Federation, urged one great national body of farmers to bring about regulated production and better distribution of wheat, together with a campaign for increased consumption.

President Samuel Gompers of the American Federation of Labor, made an especially strong address, emphasizing the necessity for farmers to lay more stress on organization.

Advisers In June Meeting At U. of I.; Club Tour Held

Illinois farm advisers met at the University of Illinois, Urbana, for their annual June meeting. Melvin Thomas, farm adviser of Coles county, presided at the sessions. He is president of the state association of advisers.

The conference opened with an address, "Co-operative Marketing as Demonstrated by Actual Experience," by Dr. Theodore Macklin, of the University of Wisconsin. He described the advantages and pitfalls of co-operation and stated that the ultimate aim in co-operative marketing is to make happier rural communities and general improved conditions of farm life.

Tours and inspections of the agronomy plots, animal husbandry and dairy departments, and animal pathology and hygiene laboratories were made by the advisers to learn the latest results of experimentation. Several talks were delivered by members of the College of Agriculture faculty and others.

The annual boys' and girls' club tour was held at Urbana on June 22 when club members from a wide area of the state assembled with their leaders to visit the university and especially the various departments of the College of Agriculture.

Supervision Brings Cleanup At South St. Paul Market

As a result of federal supervision under the stockyards control act, nine out of the 30 firms operating on the South St. Paul Live stock market have been fined or suspended during the last two months. Twenty-two out of the 30 firms had had their books audited when this report was made.

NEW U.S. GRAIN GROWERS, INC., PLAN ADOPTED

FORM PRODUCERS "CO-OP" TO RETAIL MILK AT DECATUR

I. A. A. Advises Organization After Finding Conditions Favorable

Formation of the Producers Co-operative Dairy Association, capitalized at $40,000, took place at Decatur, July 2. About 250 milk producers supplying milk to that city will be members of the new "co-op," which was formed by the Macon County Farm Bureau in co-operation with the I. A. A. Dairy Marketing Department.

Dissatisfaction with the present milk distribution system of the city led up to the organization. Producers have lately been getting only three cents per quart for milk which has been retailing for 12 cents. The new company will strive to secure a higher price for the producer and at the same time greatly better the quality of the product for the consumer.

An organization committee of nine with L. E. Bear as chairman, was appointed to act as a board of directors until organization is completed. They will form a stock sales committee. Shares of stock will be sold at a par value of $100 each.

Before advising organization, the Dairy Marketing Department conducted a business survey of the retail milk situation of Decatur and found that conditions were favorable for a producers company to sell market milk, providing it is efficiently capitalized and properly managed.

Judging from the enthusiasm manifested by the milk producers, the latest addition to the I. A. A. family of dairy "co-ops" shows every promise of success.

Pen Which Signed Co-operative Act Presented to I. A. A.

At the July meeting of the Executive Committee, President S. H. Thompson presented the pen with which Governor Small signed the Co-operative Marketing Act, to the committee with the recommendation that it be preserved as one of the valued possessions of the association. It is planned to place the pen in a glass case and to hang it on the walls of the I. A. A. office.

Red Top Growers First to Apply Under New "Co-op" Law

Only the fact that there were no application blanks available at the office of the Secretary of State prevented the Red Top Growers' Warehouse Association from filing its application to reorganize under the provisions of the new Illinois Co-operative Marketing Law which went into effect July 1. This subsidiary of the Egyptian Seed Growers Exchange was the first to apply under the act. The Exchange had made plans to apply immediately after its annual meeting, July 10.

MANY COUNTIES TO REORGANIZE THIS SUMMER AND FALL

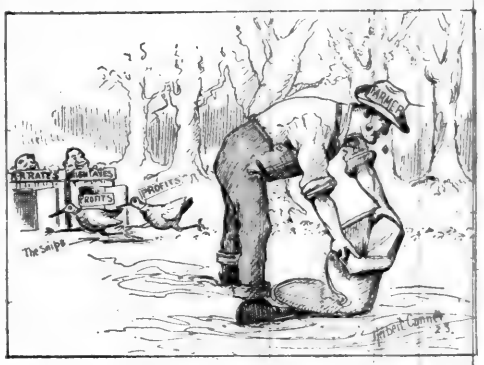
Many Illinois counties will stage membership reorganization campaigns within the next few weeks to renew the three-year membership contracts. Most of the campaigns are in the southern part of the state.

Only one school of instruction will be held in July, that of Jackson county on July 31.

In August the following schools are scheduled by the I. A. A. Organization department: August 7, Franklin county; August 8, Pulaski county; August 9, Edwards county; August 14, Greene county; August 15, St. Clair county.

In September, Piatt county has its school planned for the fourth, followed by Bond, Sept. 12; Jo Daviess, Sept. 13; Scott, Sept. 15; Henderson, Sept. 18; and Richland, Sept. 25.

Johnson county will hold its school October 9, the only one thus far scheduled for October.



Fundamental Principles of Marketing

IT COSTS MORE—

A—To sell at long distances than at short.
B—To sell unstandard than standard products.
C—To sell perishable than unperishable.
D—To sell small quantities than large quantities.
E—To sell many varieties than few varieties.
F—To sell products with a seasonable demand than with an unseasonable demand.
G—To sell products not widely known than those widely known.

Hon. Sydney Anderson,
I. A. A. Picnic,
June 29th, 1923.

STILL HOLDING THE SACK

Chicago Producers Vote Thirty Per Cent Refund

The Board of Directors of the Chicago Producers Commission Association has voted to refund to its shipper members 30 per cent of all commissions paid in during the year which closed June 30. The refund amounts to approximately $70,000.

It will be remembered that the success of the company led to an announcement early last February that cash membership fees would be dispensed with. A total of $10,176.06 was returned to shippers shortly after that date.

During its first year of operation, the Chicago Producers handled 11,742 car loads of live stock which sold for a total of $19,828,033.54.

Starting with a manager, two cattle salesman, three hog salesmen, a cashier and small office force, the farmers' concern has expanded with growth of the business until the office now has three cattle salesman, three hog salesman, one sheep salesman, and also a well trained office and yard force.

The Chicago Producers took the lead in number of hogs handled among commission firms on that market early in July, 1922, and has held the lead nearly every week since then. At present between 12 and 15 per cent of hog receipts in Chicago go to the Producers. An average of about 6 per cent of the total live stock receipts is handled by the "co-op."

Producers Will Open Agency at Pittsburgh, Pa.

Live stock producers tributary to the Pittsburgh market recently held a meeting which resulted in the decison to establish an agency of the National Producers Commission Association at that market. Committees were chosen to arrange details of establishment. Harry G. Beale, Mt. Sterling, O., heads the new "co-op."

The Producers opened an agency at Oklahoma City on July 2. Dan Gaumnitz, St. Paul, Minn., was employed as manager and hog salesman of the Oklahoma company.

C. C. Burns, for three years advisor in Jo Daviess county, will succeed C. H. Oathout as farm adviser of Champaign county, on Sept. 1. Mr. Oathout recently resigned after 10 years service in the county.

MID-WEST CHIEFS APPROVE; REQUEST MARKETING POLICY

Direct Funding of Debts and Setting Up of Sales Agencies at Terminals

(On Page Two of this issue will be found the complete report of the U. S. Grain Growers, Inc.)

At a meeting of representatives of the farm bureau federations of Illinois, Ohio, Indiana, Michigan, Iowa, Minnesota, Missouri, Nebraska, Kansas and North Dakota, composing the Mid-West presidents and secretaries, a new plan for the future course of action of the U. S. Grain Growers, Inc., was adopted.

The plan provides for the funding of debts by the U. S. Grain Growers, Inc., and the setting up of sales agencies in the various terminal markets under the Capper-Tincher act. The American Farm Bureau Federation will formulate a national grain marketing policy based on organization of producers by states, with long-term contracts, pooling by grades on the basis of milling values, corn to be handled separately.

The following is the resolution adopted unanimously:

"Resolved by this meeting of President and Secretaries of Mid-west Farm Bureaus in session at Chicago, July 2, 1923.

"1. That the American Farm Bureau Federation be requested through its Co-operative Marketing Department to formulate a national grain marketing policy, based on organization of producers by states, with long-term contracts, pooling by grades on basis of milling value, corn to be dealt with separately and that appropriate action be taken to conduct organization campaigns in the several grain growing states in the order of their readiness to begin such work.

"2. That we request the Executive Committee of the U. S. Grain Growers to co-operate with the American Farm Bureau Federation in carrying out the program outlined above.

"3. That pending the organization of state co-operative grain marketing organizations, as above, we approve the plan of the Board of Directors of the U. S. Grain Growers, Inc., to engage in grain selling on the plan submitted to us today, the same to be merged into or supplanted by the organizations contemplated in paragraph 1 hereof at such time as the latter are ready to begin operations."

The above resolution was approved by the I. A. A. Executive Committee in its meeting on July 6.

The Supreme Court of Texas recently sustained the co-operative cotton market contract in all its particulars.

Illinois Agricultural Association
RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by News Publicity Department, L. J. Montross, Director.

Entry as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of ten cents for subscription to the Illinois Agricultural Association Record.

Loss Caused by Delay in Transit; Adjusted by I. A. A.

Delay in transit of a car of cattle shipped by F. W. Case, DeKalb, caused heavy shrinkage, extra feed expense, and loss due to a drop in the market.

Mr. Case took the matter up with the Transportation Department of the I. A. A. An investigation followed, the claim was found to be justified, and the complainant was mailed a check of $82.32 to cover his loss.

In acknowledging receipt of the check, Mr. Case concluded as follows: "The I. A. A. is doing great work for the farmers along this line (transportation) as well as many others."

Just another sample of I. A. A. service!

Fruit Marketing Plans Placed in Charge of Leeper

A. B. Leeper, manager of the Illinois Fruit Exchange, has been hired by the I. A. A. to devote three fourths time to the completion of fruit and vegetable marketing plans which C. E. Durst had under way at the time of his resignation on July 1.

The work will include further organization in the Illinois Fruit Exchange during the summer as well as a thorough survey of the fruit situation in Illinois to aid in the reorganization of the Exchange, whose contracts expire this year.

An assistant will be secured by the Exchange to handle the fruit shipments during the time that Mr. Leeper is out of the office.

The World's Dairy Congress will hold its opening sessions at Washington on Oct. 2 and 3, will adjourn to Philadelphia for Oct. 4, and then continue at Syracuse, N. Y., with the National Dairy show, Oct. 5-10.

Report of U. S. Grain Growers, Inc.

The board of directors of the U. S. Grain Growers, Inc., submitted to the Mid-West States Committee the following report, which was accepted:

Gentlemen:

Your Board of Directors of the U. S. Grain Growers, Inc., respectfully present herewith its statement and report.

History. Briefly reviewing the events which lead up to the formation of the U. S. Grain Growers, Inc., probably the greatest undertaking in national co-operative marketing by any organization, and the events that have transpired since the organization: On July 23 and 24, 1920, at the suggestion and invitation of the American Farm Bureau Federation, a representative group of grain producers, representatives of farmers' organizations from many parts of the United States, met at a national get-together conference at Chicago. Out of this conference there came into being the Farmers' Marketing Committee of Seventeen. This committee was selected and appointed by the then president of the American Farm Bureau Federation, James R. Howard, and was composed of representatives from various farm organizations, the U. S. Department of Agriculture, and others interested in the subject.

During the spring months of the Second Annual Meeting of the American Farm Bureau Federation held in Indianapolis, Indiana, in December, 1921, the following endorsement was given the Farmers' Marketing Committee of Seventeen:

"We endorse the work being done by the Farmers' Marketing Committee of Seventeen and support the demand which they have made that the grain exchanges be opened to co-operative commission companies, and demand a similar privilege for the live stock co-operative commission companies from the live stock exchanges."

Nearly seven months were spent in an exhaustive study and survey of co-operative grain marketing by this committee. Statisticians and investigators from the Federal Trade Commission and the U. S. Department of Agriculture assembled and compiled valuable data that might be relied upon for the ready information of the committee.

Months of careful study and effort gradually developed the marketing plan of the Committee of Seventeen—a National Farmers' Co-operative Marketing Company," recognizing capital only as a servant, remunerating it for its service value only and providing for return to the producers the proceeds of his toil in proportion to his patronage.

The matter of drafting by-laws and operating agreements and contracts was left in the hands of a committee of lawyers who were retained to draw up these documents in accordance with the plan upon which the committee had formulated.

On February 17, 1921, the plan of the Committee of Seventeen was announced. Then followed the national ratification conference held in Chicago, April 6, 7, and 8, at which time and place were called official delegates from farmers' organizations in the 31 grain states. The original report and plan of the Farmers' Marketing Committee of Seventeen was in that meeting unanimously adopted. The delegates immediately thereafter elected a board of twenty-one (21) directors, who proceeded with the organization of the national co-operative marketing company, and on April 16, 1921, the U. S. Grain Growers, Inc., was duly incorporated under the laws of Delaware.

On June 23, 1921, the Executive Committee of the American Farm Bureau Federation in regular meeting further approved and endorsed the U. S. Grain Growers, Inc., in a motion carried approving U. S. Grain Growers, Inc., and urging the members of the American Farm Bureau Federation, the county and State organizations to get behind the movement.

Again, at Atlanta, Georgia, during the proceedings of the Third Annual Meeting of the American Farm Bureau Federation held in November, 1921, a motion was offered and carried in a meeting of the Executive Committee of the American Farm Bureau Federation reaffirming the motion made in the June meeting, re-pledging confidence in the plan of the U. S. Grain Growers, Inc., and pledging the best efforts of the organization in aiding U. S. Grain Growers, Inc., in every legitimate way financially, and, further, directing that the President be authorized to appoint a committee to assist in working out ways with the Grain Growers, plan of immediate financing.

The first annual convention of the U. S. Grain Growers, Inc., was held in Chicago, March 21, 22, 23 and 24. It developed at the meeting from the reports offered by its officers that the corporation's business affairs were financially involved. Its then current bills payable were discovered to be greatly out of line with current receivable, and with over $200,000 of the corporation's notes maturing in the next approaching months, the sole source of income was derived from membership fees, with fixed heavy overhead charges to be met currently.

The efforts of the corporation to actually begin marketing grain for its membership were blocked by the unfriendly attitude of the grain trade generally and the exchanges, together with its approaching insolvent condition.

So that up until the enactment into law of the new Capper-Tincher Bill and subsequent decision of the U. S. Supreme Court sustaining that law, has it been possible for U. S. Grain Growers, Inc., as such, and in its own name, to attempt to carry out its marketing program.

Re-organized. After its notes had matured and were past due, and the corporation became insolvent, because of its inability to meet these and other obligations, and organization work had practically ceased, again the Farm Bureau Federations sponsored the U. S. Grain Growers, Inc., in effecting its reorganization. A special meeting of the Mid-West State Farm Bureau Federations was called at Chicago on May 13, 1922, for the purpose of considering the condition of the U. S. Grain Growers, Inc. At that meeting, a committee from the group, consisting of E. H. Cunningham, W. S. Hill, and John Cowan, was selected and appointed, and was authorized and empowered to assemble the claims of the creditors—arrange, if possible, by agreement with them for a composition—and directors of U. S. Grain Growers to reorganize and save the corporation. To this committee was pledged individually and collectively the support of the Farm Bureau Federations present. It is well known to you that this committee's efforts were successful. The claims of the creditors of U. S. Grain Growers, Inc., were in greater part assembled, its commercial claims were compromised and settled, and its overhead and operating expenses were reduced to the minimum. Its office has been modestly maintained, partly through securing liquidation of membership notes owing the corporation and partly through the financial support given it by the American Farm Bureau Federation.

Its Board of Directors and Officers, with one exception (the vacancy filled in the board) today are the same men whom you selected and appointed—drafted to the corporation in the name of organized agriculture—in the hope of making good the promises and obligations of U. S. Grain Growers, Inc., made to its members and its creditors (large) composed of Farm Bureau members, Farm Bureaus and Farm Bureau Federations); also in the name of organized agriculture.

Your Committee invited and requested Mr. Frank Wetmore of Chicago, Mr. Bernard M. Baruch of New York and Mr. Louis Leigh of Chicago, to serve U. S. Grain Growers, Inc., in an advisory capacity, as members of a regularly constituted committee for that purpose. These gentlemen accepted the earnest request of your committee to serve organized agriculture and so associated themselves in that capacity with the insolvent corporation—also in the name of organized agriculture. The Advisory Committee have, without reservation, already given of its services and have reaffirmed their desire at this time to continue to serve organized agriculture in this capacity.

Again, during the meeting of the executive committee of the American Farm Bureau Federation held in Chicago on December 5th, 1922, the following motion was offered and carried:

"Mr. Smith moved: That we reaffirm our support of the U. S. Grain Growers, Inc., and direct the officers to assist it in every way within our means. Seconded by Burton. Carried."

Had it been deemed possible at the time of the reorganization of the U. S. Grain Growers, Inc., to market grain directly in the name of "U. S. Grain Growers, Inc.," in the then immediate future, no doubt your committee would have carefully considered at that time the funding of the floating debts. Such action was deferred for the time being.

Grain Futures Act Sustained. However, since the Supreme Court of the United States has sustained by decision the new "Capper-Tincher Bill" or "Grain Futures Act," the subject of funding its debts and rendering solvent the corporation has received active attention. Careful study of the "Grain Futures Act" discloses the fact that U. S. Grain Growers, Inc., conforms exactly to the requirements of the law as to a co-operative marketing organization—an organization lawfully formed of producer members and affirmatively that "any duly authorized representative of any lawfully formed and incorporated co-operative association of producers having adequate financial responsibility, which is engaged in cash grain business shall be admitted to membership on the Exchange of any contract market." It is, therefore, agreed by the Executive Committee, its advisory committee of the corporation and its counsel, that if the debts of the U. S. Grain Growers, Inc., can be funded and a reasonable amount of impaired capital subscribed, conditioned upon the funding of the corporation's debts, and thereafter paid in by the corporation, that the corporation may become solvent thereby and capable of doing a general grain marketing business, and as such may be admitted under provisions of the Grain Futures Act and the rules of the Exchange, to market grain, through its duly authorized representatives.

With this view in mind, the Executive Committee of the U. S. Grain Growers, Inc., and its Secretary, have been permitted and have carefully surveyed and studied, through association with their advisory committee and legal counsel, the immediate problems involved, which are reported herewith.

The Advisory Committee selected by your Mid-West States Committee has been consulted with and their advice accepted on all matters and the problems presented pertaining to policies of business and finance. General counsel for the corporation, Fred S. Jackson of Topeka, Kansas, has been conferred with personally and through correspondence, as well as the general counsel for the Corporation Trust Company on legal matters pertaining to the immediate problems presented, and in the absence of Mr. Jackson, at the request of the Executive Committee of the corporation, and through mutual arrangements with Mr. Jackson, Mr. Donald Kirtpatrick has rendered the committee most valuable service. The Executive Committee have taken the precaution to send Mr. Kirkpatrick, acting as their legal counsel, to the State of Delaware, in order to ascertain definitely and fully the necessary legal requirements to be complied with and the changes contemplated.

The proposed changes herewith presented have the full and final approval in principle of both our Advisory Committee referred to and our legal counsel.

Funding the Indebtedness, U. S. Grain Growers, Inc. It is proposed that U. S. Grain Growers, Inc., shall itself of exactly the same means, of funding its indebtedness as employed by industries in re-organization; namely, that it offers in exchange or substitution, certain issues of Debenture Bonds for claims held by creditors against the corporation. This involves preferably the amending of the charter of the corporation in certain minor details, so as to permit the issuance of bonds—which may be done with perfect propriety.

The proposed bonds are to be issued in such form or forms, and amount or amounts, and upon such terms and conditions finally, as approved by the Board of Directors of the corporation. A statement covering the proposed bond issues is presented in greater detail by counsel, and made a part of this report.

The indebtedness of the corporation when so funded would remove it from its present situation of insolvency and render it capable of functioning and earning profits, so that it might pay the interest upon its Debenture Bonds, and from time to time call and redeem a part of such issues; finally retiring all of the bonds in their entirety—discharging in full the obligations of the corporation, made in the name of organized agriculture to its creditors.

Introducing New Capital Into the Corporation. It is further proposed that new capital be induced to invest in certain other issues of Debenture Bonds of the corporation, for the purpose of rendering the corporation financially responsible in its conduct of a general grain marketing business for its members' ship. Further reference to this particular bond issue is included in the report of counsel, to which reference has already been made.

It should be stated that subscription to this class of Debenture Bonds would be conditioned strictly upon the funding of the debts of the corporation, and with other proper protective measures provided.

Chicago Board of Trade Confers With. The Executive Committee of the corporation have conferred personally with representatives of the Chicago Board of Trade, and submit for your proper information a letter, under date of June 16, 1923, addressed by your Executive Committee to Mr. John J. Stream, President of the Chicago Board of Trade, propounding to that body certain questions relative to meeting the requirements of the Exchange, not in conflict with the Grain Futures Act, as to financial responsibility, as follows:

"June 16, 1923.

"Mr. John J. Stream,
"President, Chicago Board of Trade,
Chicago, Illinois.

"Dear Sir:

"At the direction of the executive committee of the U. S. Grain Growers, Inc., and in line with suggestions made at our conference with your Messrs. Mauff and Fones on June 14, and I am submitting our request in writing for information as to the desired course of procedure to secure membership representation on the Chicago Board of Trade in behalf of the U. S. Grain Growers, Inc. Inc.

"The U. S. Grain Growers, Inc., is a non-stock, non-profit association of producers, organized under the laws of Delaware for the purpose of marketing the grain of its members co-operatively; that is, the corporation is without capital stock and its non-profit character is intended to limit it to the handling of grain originating from its own membership.

"Being without capital stock we would like particularly to know how your requirements as to financial responsibility should be met. We are concerned want to make such financial arrangements as will leave no ground for doubt in the minds of Board of Trade members and in the minds of our own customers as to financial responsibility and would undertake to make available such amount of cash capital and place it in such form as to guarantee our credit and performance of contracts made on the Chicago Board of Trade to the same extent that would be furnished by unimpaired capital stock if we were a capital stock corporation.

"Assuming that we should employ as our representative some person who is now a member in good standing of the Chicago Board of Trade, or should employ some person able to qualify for membership on the Exchange, could we be permitted to use our name as a principal in trades by either one of the following suggested arrangements:

"1. The underwriting of our contracts made on the Chicago Board of Trade by some other member, firm or corporation having financial responsibility adequate to cover both their own volume and ours—or the undertaking on the part of such other member, firm or corporation to finance our grain handling operations.

"2. By causing to be placed in escrow with some responsible bank or trust company in the city of Chicago a sum of money in Liberty Bonds or like securities guaranteeing our credit and financial responsibility for contracts made on the Chicago Board of Trade.

"3. The undertaking by a responsible surety to insure and guarantee our credit and financial responsibility for grain transactions and contracts made on the Chicago Board of Trade up to some stipulated amount.

"We are unable at this time to furnish any reliable estimate of the number of cars of grain we would handle in this market during the course of a year. However, we would be glad to have you consider our possible maximum volume of business for twenty-four hours and week, it being understood that increased business will be met with increased finances from time to time.

We appreciate greatly your expressed desire to have this letter in such form that you could take it before the action on our proposal, and we would request that if you should note any particular matters of information that are not covered by this letter you will call our attention to them at once so that we may furnish additional data.

"Very truly yours,
U. S. GRAIN GROWERS, INC.
By J. M. Mehl,
Secretary and Acting Treasurer."

Our communication was immediately referred to the Board of Directors of the Chicago Board of Trade; by the Board of Directors jointly to the Executive, Membership, Legal Advice and Rules Committees, and by this joint committee to the attorney. The opinion of the attorney was not received in sufficient time to enable action by the Board of Directors at their last meeting. We have been assured, however, that the attorney definitely approved our proposition No. 1 above and we have assurance that the corporation can be admitted to membership representation under the Grain Futures Act.

Department of Agriculture Consulted. On May 24, our secretary submitted to the Department of Agriculture a letter requesting the Department's view on a number of

Illinois Agricultural Association.

You Can't Tell Stephenson Co. Farmers That Dairy Co-operation Doesn't Pay!

Among the co-operative dairy marketing associations, which the I. A. A. has assisted in organizing, there is none that has served the district in which it is located to better advantage than has the Stephenson County Co-operative Marketing Company.

When producers can point to the fact that a Freeport condensary is paying one dollar per hundred for milk over what it paid before the "co-op" was well established with the price of condensed milk at practically the same level, you can't tell them that co-operation doesn't pay.

Likewise when farmers living near the marketing company local unit of Dakota consider that they were paid $.90 per hundred for milk at that point by a local dealer in February, 1922, while one year later they received $2.10 from their marketing company, they are willing to "stick" to co-operative marketing.

Serves Community

The Stephenson county "co-op" has proved, among other things, that the big idea in co-operative marketing is not especially to allow producers to get stock dividends or a share of the profits, but it has shown that the big thing in farmer marketing is to create a market which the farmers themselves control, to serve a community by assembling a large quantity of a commodity, grading it, standardizing it, and putting a product on the market that the public wants at the time that it wants it.

Where there was a poor market for milk and cream, the Freeport co-operative has manufactured the surplus into butter, sweet cream, cheese, casein, and other dairy products. Its famous "Vita Gold" butter, scoring 90 and better, commands a premium of at least one cent over the Chicago market, simply because the company makes enough butter—and makes it good enough—to create a demand for it.

Organization

The Stephenson County Co-operative Marketing Company was formed by the Stephenson County Farm Bureau and the Dairy Marketing Department of the I. A. A., February 3, 1921, after several preliminary meetings. It opened for business on August 15, 1921.

Building and equipment of the company are valued at over $70,000. It is capitalized at $75,000 and shares have a par value of $50. No member may hold more than five shares. At present there are nearly 1,000 stockholders in the co-operative. At the close of 1922 business, a dividend of six percent was declared on all stock.

1922 Statement

A brief statement of the 1922 business of the company follows:

SALES

Butter	$253,661.75
Milk	145,929.25
Cheese	46,082.49
Cream (sweet)	51,522.69
Butter and Skimmilk	4,693.47
Miscellaneous	16,474.90
	$518,364.55

DISBURSEMENTS

Total paid patrons	$411,164.56
Butter and Cream purchased	37,482.34
Running expenses	31,742.57
Miscellaneous purchases	11,268.36
Sinking fund	12,705.72
	$518,364.55

The average monthly business for 1922 was $43,197.05. A total of 13,129,766 pounds of milk was handled, together with 1,704,606 pounds of cream. The total amount of butter made was 631,595 pounds out of 518,948 pounds of fat. The overrun, which amounted to 112,649 pounds, represents $42,919.26 at 38.1 cents per pound. The average overrun was 21.7 per cent.

The average price paid for fat was 40.4 cents per pound and for milk was $1.627 per hundred. The plant manufactured 169,626 pounds of cheese from 1,865,886 pounds of milk, receiving an average of 22½ cents per pound for the product.

Volume Increasing

May, 1923, saw the biggest volume of business transacted by the company in any one month, when $62,818.42 in sales came to the organization. With this big volume the expense was only 9 per cent of the total sales, the lowest yet secured by the co-operative.

In May, also, 88,542 pounds of butter were made, an increase of 15 per cent over the corresponding month of last year and 68 per cent over the 52,633 pounds average monthly production of 1922. The last report from the plant shows that over 108,000 pounds of butter was made in June. From these figures it can be seen that the company is doing a greater business with longer establishment.

Equipment for manufacturing the skimmilk product, casein, has been added this year. There is a good market for casein at present and an average of about $1,200 worth is being sold monthly.

Has Ten Locals

The Stephenson County Co-operative Marketing Company, with its main plant at Freeport, has local units at Dakota, Damascus, German Valley, Egan, Baileyville, Pearl City, Lena, and Waddams Grove in Stephenson county; at Shannon, in Carroll county; and Forreston in Ogle county.

Producers bring their cream to these locals, where it is collected before shipping to Freeport. Each plant has its branch manager. Steps have been taken this summer to organize the local units more strongly on a business basis. Advisory councilmen from the locals are elected to represent them at each meeting of the board of directors of the company.

Dakota, Pearl City, and Egan have already organized on the strong unit basis.

Officers

The officers of the company for 1923 are, Wm. F. Brown, president; Wm. Frank, vice president; J. A. Phillips, secretary-treasurer, who with C. Maize, T. F. Ellis, D. M. Brubaker, Wm. Sieferman, H. M. Phillips, and John Kachelhoffer, constitute the board of directors.

The directors' board is on the rotating plan, and the term of office is three years. The officers are selected within the board. Directors are chosen at the annual meetings from the membership-at-large.

Management

The general management of the marketing company is under A. V. Ahrentzen, a man with many years experience in the creamery business. The company, in addition to its regular staff, has a fieldman who spends most of his time visiting locals, instructing in the care of milk and cream, and otherwise adding to the efficiency of the concern.

A monthly house organ, "The Co-op," is published to inform the membership concerning the affairs of their company.

Until recently the co-operative has maintained a warehouse to handle feeds, tankage, seed, binder twine, etc., at a small margin of profit to the membership. However, it was found that with the greatly increased volume of dairy products handled, the capitalization of the company would not permit the financing of this subsidiary, so it was disposed of in June.

An increase of nine tenths of one per cent in the number of pigs saved from farrowings in the six months ended June 1, 1923, as compared with the number saved during the same period last year, is indicated in reports gathered by rural mail carriers for the U. S. Department of Agriculture from 140,000 hog raisers in all parts of the country.

TELLING THE WORLD ABOUT "VITA GOLD"

HERE'S one of the illuminated signs of the Stephenson County Co-operative Marketing Company on display at Rockford. This "co-op" made 631,597 pounds of butter in 1922, which sold for $253,661.75. A large part of this was print butter, advertised and sold under the brand name "Vita Gold." They're making nearly twice as much this year.

REPORT OF U. S. GRAIN GROWERS, INC., SUBMITTED

(Continued from page 2)

matters involved in connection with grain exchange representation. Among others was incorporated specifically the three proposed methods of qualifying as to financial responsibility contained in the letter to President Stream. The following paragraph from the letter of Mr. Chester Morrill to Mr. Mehl under date of June 18 is in specific reply to the questions stated:

"The Solicitor is of the opinion that your suggestion as to the different methods by which non-stock membership corporations may meet the requirements of the Act are sound and that the Board of Trade would not be justified in denying membership to an association which had adopted any one of such methods; that is to say, the ideas set forth in paragraphs (a), (b), (c), and (d) just preceding the last paragraph of your letter."

Service Facilities. We also report informally for your proper information that results of the several conferences held with Mr. O. W. Hales of Hales and Hunter, Chicago, in which have been outlined in detail arrangements for financing and handling any part or all of the grain of our members. This large and successful concern, friendly to the co-operative movement, controls a large amount of surplus capital in addition to elevators and plants whereby it will assume to underwrite our contracts made on the Chicago Board of Trade and will furnish all the finances needed in the movement of grain. This financial assistance will carry with it certain accounting service enabling us, with the employment of one man to actually sell our grain on the floor, to carry on our grain selling operations at a nominal cost per bushel, thus avoiding the necessity for building immediately an office personnel and force of our own, but leaving us free to use our own capital to the extent that we have to do our own financing and handle our own force as soon as we are in a position to do so. The arrangement carries with it the use of all classes of terminal elevator service, including storage space, and for which service we will pay certain stipulated and agreed per bushel charges. The services referred to are offered without limitation for our immediate needs, and are available in a manner similar to the services offered by a bank or trust company. Neither would our business be restricted exclusively to the acceptance and employment of the services offered.

It seems possible to commence operations in the Chicago market almost at once—if desired.

Statement of Condition. We also report for your proper information and purposes herein set forth a general statement of conditions of the corporation's finances. The U. S. Grain Growers, Inc., at the present time is owing creditors on all classes approximately $350,000, including interest accrued on note obligations. Of this amount approximately $86,000 is due solicitors and about $42,000 due old directors and others; $191,000 with about $30,000 in accrued interest is due note creditors, most of whom are Farm Bureaus and Farm Bureau members. It is estimated that $100,000 in new capital will be adequate to start operation in at least five of the principal markets. This capital may not be immediately necessary. It is estimated that about $20,000 should be provided immediately and budgeted for the special purpose of consuming and getting in operation the present proposed plans.

Funds Required. In order to carry out and put into execution the plans contemplated, it becomes absolutely necessary that some funds be made immediately and definitely available for the purposes of:

1st. Carrying on the ordinary affairs of the corporation.

2nd. Arranging for the contemplated changes looking to the funding of its debts.

3rd. Securing and accomplishing the funding of its debts.

4th. Securing subscription of necessary funds to provide initial capital.

5th. Organizing the marketing of grain.

Summary. Two principal causes, and only two, have in the past prevented U. S. Grain Growers, Inc., from putting into effect its marketing plan.

1st. Its form of organization—having membership contracts and providing for patronage dividends has furnished the excuse to bar the corporation from the grain exchanges of the country and thereby deprived the corporation from marketing any part of its grain desired, through that outlet.

2nd. Its financial condition—lacking adequate finances originally to function as a going concern, and finally becoming insolvent—has rendered the corporation dormant for the time being.

The first obstacle has been removed by legislative act.

The second obstacle is going to be removed, through your active financial support and indorsement—if your Federations are so pleased.

The Grain Grower Plan in itself has not defeated the putting of the plan into operation. The plan has never had a fair trial. It seems it would be unsound to repudiate it before giving it a fair trial because of repeated indorsements by the Farm Bureau and other farmers' organizations. The Farm Bureau or the leadership of the Farm Bureau cannot repudiate this plan and ever hope to make good on another grain marketing plan.

The present Board of U. S. Grain Growers, Inc., in accepting their respective positions to which they were drafted on that Board subscribed to a solemn oath of office to faithfully and well, and to the best of their ability carry out the trust and confidence so reposed in them by the membership of the corporation—and by your committee. They have kept faith with the membership of U. S. Grain Growers, to the best of their ability.

Re-elect finances and active united support is now our immediate ... problem.

Your substantial and definite financial support to this program is required at once and most earnestly solicited.

There is needed, according to the estimates of the Executive Committee of the Corporation:

For carrying on the ordinary affairs of the Corporation.

For arranging the contemplated changes looking to the funding of its debts.

For securing and accomplishing the funding of its debts.

For securing subscriptions of necessary funds to provide initial capital, and

For organizing the marketing of grain, the sum of twenty-thousand ($20,000) Dollars, or as much thereof as may be made available at the present time and immediate future.

Said fund to be administered through and with the advice of a properly constituted Finance Committee.

The sums that may be pledged and paid by the Farm Bureau Federations for any or all of the several purposes above set forth are to be received by the Corporation as advances and be later secured by bonds or debentures in the several amounts of the same class as contemplated to be issued to the creditors of the corporation whose claims are proposed to be funded.

Very respectfully submitted,
U. S. GRAIN GROWERS, INC.
By its Board of Directors.
.....
Secretary.

Place of I. A. A. Annual Meeting To Be Chosen

Choice of the place at which the 1923 annual meeting of the Illinois Agricultural Association will be held will be decided at the next meeting of the Executive Committee on Friday, August 3. The annual meet is dated for the third week in January, 1924.

Phosphate Insures You

Highest Quality Grain
Maximum Crop Production
Surest and Greatest Profits

We Insure You

Prompt Service
Accurate Weight
Dependable Quality

Order through your Farm Bureau.

Phosphate-Limestone Department,
Illinois Agricultural Association.

Illinois Agricultural Association
RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by News Publicity Department, L. J. Monrose, Director.

Entered as second class matter Oct. 1, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 21, 1923.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of 50 cents for subscription to the Illinois Agricultural Association Record.

OFFICERS

President, S. H. Thompson, Quincy.
Vice-President, A. O. Eckert, Belleville.
Treasurer, R. A. Cowles, Bloomington.
Secretary, Geo. A. Fox, Sycamore.

EXECUTIVE COMMITTEE

By Congressional Districts,

11th—Henry McGough, Maple Park.
12th—C. F. Tulloch, Rockford.
13th—E. Bamborough, Polo.
14th—W. H. Moody, Port Byron.
15th—H. E. Gaembel, Hoopole.
16th—D. D. Mendota.
17th—F. D. Barton, Cornell.
18th—C. R. Finley, Hoopeston.
19th—D. J. Holterman, Sadorus.
20th—Carl J. Smith, Detroit.
21st—E. L. Corbin, Carlinville.
22nd—Stanley Castle, Alton.
23rd—Carlton Trimble, Trimble.
24th—Curt Anderson, Xenia.
25th—Vernon Lessley, Sparta.

Directors of Departments, I. A. A. Office

General Office and Assistant to Secretary, J. D. Harper; Field Organization, J. C. Sailor; Organization Publicity, G. E. Metzger; News Publicity, L. J. Monrose; Transportation, L. J. Quasey; Statistics, J. C. Watson; Finance, R. A. Cowles; Fruit and Vegetable Marketing, C. E. Durst; Live Stock Marketing, C. A. Stewart; Dairy Marketing, A. D. Lynch; Phosphate Limestone, J. R. Bent. Legal, Newton Jenkins.

Loss Caused by Delay in Transit; Adjusted by I. A. A.

Delay in transit of a car of cattle shipped by F. W. Case, DeKalb, caused heavy shrinkage, extra feed expense, and loss due to a drop in the market.

Mr. Case took the matter up with the Transportation Department of the I. A. A. An investigation followed, the claim was found to be justified, and the complainant was mailed a check of $82.32 to cover his loss.

In acknowledging receipt of the check, Mr. Case concluded as follows, "The I. A. A. is doing great work for the farmers along this line (transportation) as well as many others."

Just another sample of I. A. A. service!

Fruit Marketing Plans Placed in Charge of Leeper

A. B. Leeper, manager of the Illinois Fruit Exchange, has been hired by the I. A. A. to devote three fourths time to the completion of fruit and vegetable marketing plans which C. E. Durst had under way at the time of his resignation on July 1.

The work will include further organization in the Illinois Fruit Exchange during the summer as well as a thorough survey of the fruit situation in Illinois to aid in the reorganization of the Exchange, whose contracts expire this year.

An assistant will be secured by the Exchange to handle the fruit shipments during the time that Mr. Leeper is out of the office.

The World's Dairy Congress will hold its opening sessions at Washington on Oct. 2 and 3, will adjourn to Philadelphia for Oct. 4, and then continue at Syracuse, N. Y. with the National Dairy Show, Oct. 5-10.

Report of U. S. Grain Growers, Inc.

The board of directors of the U. S. Grain Growers, Inc., submitted to the Mid-West States Committee the following report, which was accepted:

Gentlemen:

Your Board of Directors of the U. S. Grain Growers, Inc., respectfully present herewith its statement and report.

History. Briefly reviewing the events which lead up to the formation of the U. S. Grain Growers, Inc., probably the greatest undertaking in national co-operative marketing by any organization, and the events that have transpired since the organization: On July 23 and 24, 1920, at the suggestion and invitation of the American Farm Bureau Federation, a representative group of grain producers, representatives of farmers' organizations from many parts of the United States, met at a national get-together marketing conference at Chicago. Out of this conference there came the naming the Farmers' Marketing Committee of Seventeen. This committee was selected and appointed by the then president of the American Farm Bureau Federation, James R. Howard, and was composed of representatives from various farm organizations, the U. S. Department of Agriculture and others interested in the subject.

During the proceeding of the Second Annual Meeting of the American Farm Bureau Federation held in Indianapolis, Indiana, in December, 1920, the following endorsement was given the Farmers' Marketing Committee of Seventeen:

"We endorse what is being done by the Farmers' Marketing Committee of Seventeen and approve the demand which they have made that the grain exchanges be opened to co-operative commission companies, and demand a similar privilege for the live stock co-operative commission companies from the live stock exchanges."

Nearly seven months were spent in an exhaustive study and survey of co-operative grain marketing by this committee. Statisticians and investigators from the Federal Trade Commission and the U. S. Department of Agriculture assembled and compiled valuable data that might be relied upon, for the ready information of the committee.

Months of careful study and effort gradually developed the marketing plan of the Committee of Seventeen—"a National Farmers' Co-operative Marketing Company," recognising capital only as a servant, demanding for it fair but not undue value only and proposing to return to the producers the proceeds of his toil in proportion to his patronage.

The matter of drafting by-laws and preparing membership contracts was left in the hands of a committee of lawyers who were retained to draw up these documents in accordance with the plan which the committee had formulated.

On February 17, 1921, the plan of the Committee of Seventeen was announced. Then followed the national ratification conference at Chicago, April 6, 7, and 8, at which time and place were called official delegates from farmers' organizations in the 25 grain states. The original report and plan of the Farmers' Marketing Committee of Seventeen was in substance unanimously adopted. The delegates immediately thereafter elected a board of twenty-one (21) directors, who proceeded with the organization of the national co-operative marketing company, and on April 14, 1921, the U. S. Grain Growers, Inc., was duly incorporated under the laws of Delaware.

On June 23, 1921, the Executive Committee of the American Farm Bureau Federation in regular meeting, further approved and endorsed the U. S. Grain Growers, Inc., in a motion carried approving U. S. Grain Growers, Inc., and urging the members of the American Farm Bureau Federation, the County and State organizations to get behind the movement.

Again, at Atlanta, Georgia, during the proceedings of the Third Annual Meeting of the American Farm Bureau Federation held in November, 1921, a motion was offered and carried in a meeting of the Executive Committee of the American Farm Bureau Federation reaffirming the motion made in the June meeting, pledging confidence in the plan of the U. S. Grain Growers, Inc., and pledging the best efforts of the organization in aiding U. S. Grain Growers, Inc., in every legitimate way financially, and, further, directing that the President be authorized to appoint a committee to assist in carrying out with the Grain Growers, plan of immediate financing.

The first annual convention of the U. S. Grain Growers, Inc., was held in Chicago, March 21, 22, 23 and 24. It developed during the meeting from the reports offered by its officers that the corporation's business affairs were financially involved. Its then current bills payable were discovered to be greatly out of line with current receivable, and with over $200,000 of the corporation's notes maturing in the next approaching months. Its sole source of income was derived from membership fees, with fixed heavy overhead charges to be met currently.

The efforts of the corporation to actually begin marketing grain for its membership were blocked by the unfriendly attitude of the grain trade generally and the exchanges, together with its approaching insolvent condition.

So that up until the enactment into law of the new Capper-Tincher Bill and subsequent decision of the U. S. Supreme Court sustaining that law, it had been impossible for U. S. Grain Growers, Inc., as such, and in its own name, to attempt to carry out its marketing program.

Re-organized. After its notes had matured and were past due, and the corporation became insolvent, because of its inability to meet these and other obligations, and organization work had practically ceased, again, the Farm Bureau Federations sponsored the U. S. Grain Growers, Inc., in effecting its reorganization. A special meeting of the Mid-West State Farm Bureau Federations was called at Chicago on May 13, 1923, for the purpose of considering the condition of the U. S. Grain Growers, Inc. At that meeting, a committee from the group, consisting of R. H. Cunningham, W. S. Hill, and John Coverdale was selected and appointed, and was authorised and empowered to investigate the claims of the creditors—arrange, if possible, by agreement with the then present officers and directors of U. S. Grain Growers, for reorganization of the corporation. To this committee was pledged individually and collectively the support of the Farm Bureau Federations present. It is well known to you that this committee's efforts were successful. The claims of the creditors of U. S. Grain Growers, Inc., were in greater part assembled, its commercial claims were compromised and settled, and its overhead and operating expenses were reduced to the minimum. Its office has been modestly maintained, partly through securing liquidation of membership notes owing the corporation and partly through the financial support given it by the American Farm Bureau Federation.

Its Board of Directors and Officers with one exception (the vacancy filled in the board) today are the same men whom you selected and appointed—drafted to the corporation in the name of organized agriculture—in the hope of making good the promises and obligations of U. S. Grain Growers, Inc., made to its members and its creditors (largely composed of Farm Bureau members, Farm Bureaus and Farm Bureau Federations); also in the name of organized agriculture.

Your Committee invited and requested Mr. Frank Wetmore of Chicago, Mr. Bernard M. Baruch of New York and Mr. Alex. Legge of Chicago, to serve U. S. Grain Growers, Inc., in an advisory capacity, as members of a regularly constituted committee for that purpose. These gentlemen accepted the earnest request of your committee to serve them and agriculture and have associated themselves in that capacity with the insolvent corporation—also in the name of organized agriculture. The Advisory Committee have, without reservation, already given of its services and have reaffirmed their desire at this time to continue to serve organized agriculture in this capacity.

Again, during the meeting of the executive committee of the American Farm Bureau Federation held in Chicago on December 5th, 1922, the following motion was offered and carried:

"Mr. Smith moved: That we reaffirm our support of the U. S. Grain Growers, Inc., and direct the officers to assist it in every way within our means. Seconded by Burton. Carried."

Had it been deemed possible at the time of the reorganization of the U. S. Grain Growers, Inc., to market grain directly in the name of "U. S. Grain Growers, Inc.," in the then immediate future, no doubt your committee would have carefully considered at that time the funding of the floating debts. Such action was deferred for the time being.

Grain Futures Act Sustained. However, since the Supreme Court of the United States has sustained by decision the new "Capper-Tincher Bill" or "Grain Futures Act," the subject of funding its debts and rendering solvent the corporation has received active attention.

Careful study of the "Grain Futures Act" discloses the fact that U. S. Grain Growers, Inc., conforms exactly to the requirements of the law as to a co-operative marketing organization—an organization lawfully formed of producer members and affirmatively that "any duly authorized representative of any lawfully formed and conducted co-operative association of producers having adequate financial responsibility which is engaged in such grain business—shall be admitted to membership on the Exchange of any contract market." It is therefore agreed by the Executive Committee, its advisory committee of the corporation and its counsel, that the debts of the U. S. Grain Growers, Inc., can be funded and a reasonable amount of initial capital subscribed, conditioned upon the funding of the corporation's debts, and thereafter paid in to the corporation, that the corporation may become solvent thereby and capable of doing a general grain marketing business, and as such, may be admitted under provisions of the Grain Futures Act and the rules of the Exchange, to market grain, through its duly authorized representatives.

With this view in mind, the Executive Committee of the U. S. Grain Growers, Inc., and its Secretary, have been permitted and have carefully surveyed and studied, through association with their advisory committee and legal counsel, the immediate problems involved, which are reported herewith.

The Advisory Committee selected by your Mid-West States Committee has been consulted with and their advice accepted on all matters and the problems involved pertaining to policies of business and finance. General counsel for the corporation, Fred S. Jackson of Topeka, Kansas, has been conferred with personally and through correspondence, as well as the general counsel for the Corporation Trust Company on legal matters pertaining to the immediate problems presented, and in the absence of Mr. Jackson, at the request of the Executive Committee of the corporation, and through mutual arrangements with Mr. Jackson, Mr. Donald Kirkpatrick has rendered the committee an invaluable service. The Executive Committee have taken the precaution to send Mr. Kirkpatrick, acting as their legal counsel, to the State of Delaware, in order to ascertain definitely and fully the necessary legal requirements to be complied with and the changes contemplated.

The proposed changes herewith presented have the full and final approval in principle of both our Advisory Committee referred to and our legal counsel.

Funding the Indebtedness, U. S. Grain Growers, Inc. It is proposed that U. S. Grain Growers, Inc., avail itself of exactly the same means, of funding its indebtedness as employed by industries in re-organization; namely, that it offers in exchange or substitution, certain issues of Debenture Bonds for claims held by creditors against the corporation. This involves preferably the amending of the charter of the corporation in certain minor details, so as to permit the issuance of bonds—which may be done with perfect propriety.

The proposed bonds are to be issued in such form or forms, and amount or amounts, and upon such terms and conditions finally, as approved by the Board of Directors of the corporation. A statement covering the proposed bond issues is presented in greater detail by counsel, and made a part of this report.

The indebtedness of the corporation when so funded would remove it from its present situation of insolvency and render it capable of functioning and earning profits, so that it might pay the interest upon its Debenture Bonds, and from time to time call and redeem a part of such issues; finally retiring all of the bonds and thereby entirely discharging in full the obligations of the corporation, made in the name of organized agriculture to its creditors.

"Inducing New Capital Into the Corporation. It is further proposed that new capital be induced to invest in certain other issues of Debenture Bonds of the corporation, for the purpose of rendering the corporation financially responsible in its conduct of a general grain marketing business for its membership. Further reference to this particular subject is included in the report of counsel, to which reference has already been made.

It should be stated that subscription to this new Debenture Bonds would be conditioned strictly upon the funding of the debts of the corporation, and with other proper protective measures provided.

Chicago Board of Trade Confers With. The Executive Committee of the corporation have conferred personally with representatives of the Chicago Board of Trade, and submit for your proper information a letter dated June 16, 1923, addressed by your Executive Committee to Mr. John J. Stream, President of the Chicago Board of Trade, propounding to that body certain questions relating to meeting the requirements of the Exchange, not in conflict with the Grain Futures Act, as to financial responsibility, as follows:

"June 16, 1923.

"Mr. John J. Stream,
"President, Chicago Board of Trade,
Chicago, Illinois.

"Dear Sir:

"At the direction of the executive committee of the U. S. Grain Growers Inc., and in line with suggestions made at our conference with your Messrs. Mauff and Fones on June 14, and I am submitting our request in writing for information as to the desired course of procedure to secure membership representation on the Chicago Board of Trade in behalf of the U. S. Grain Growers, Inc.

"The U. S. Grain Growers, Inc., is a non-stock, non-profit association of producers, organized under the laws of Delawkre for the purpose of marketing the grain of its members co-operatively; that is, the corporation is without capital stock and its non-profit character is intended to limit it to the handling of grain originating from its own membership.

"Being without capital stock we would like particularly to know how your requirements as to financial responsibility should be met. We, of course, want to make such financial arrangements as will leave no ground for doubt in the minds of Board of Trade members and in the minds of our own customers as to financial responsibility and would undertake to make available such amount of cash capital and place it in such form as to guarantee our credit and performance of contracts made on the Chicago Board of Trade to the same extent that would be furnished by unimpaired capital stock if we were a capital stock corporation.

"Assuming that we should employ as our representative some person who is now a member in good standing of the Chicago Board of Trade, or should employ some person able to qualify for membership on the Exchange, could we be permitted to use our name as a principal in trades by either one of the following suggested arrangements:

"1. The underwriting of our contracts made on the Chicago Board of Trade by some other member, firm or corporation having financial responsibility adequate to cover both their own volume and ours—or the undertaking on the part of such other member, firm or corporation to finance our grain handling operations.

"2. By causing to be placed in escrow with some responsible bank or trust company in the city of Chicago a sum of money in Liberty Bonds or like securities guaranteeing our credits and financial responsibility for contracts made on the Chicago Board of Trade up to some stipulated amount.

"3. The undertaking by a responsible surety to insure and guarantee our credit and financial responsibility for grain transactions and contracts made on the Chicago Board of Trade up to some stipulated amount.

"We are unable at this time to furnish any reliable estimate of the number of cars of grain we would handle in this market during the course of a year. However, we would be glad to have your consider our possible maximum volume of business at twenty-five cars per week, it being understood that increased business will be met with increased finances from time to time.

"We appreciate greatly your expressed courteous desire to take this letter in such form that you could take early action on our proposal, and we would request that if you should note any particular matters of information that are not covered by this letter you will call our attention to them at once so that we may furnish additional data.

"Very truly yours,

U. S. GRAIN GROWERS, INC.
By J. M. Mehl,
Secretary and Acting Treasurer."

Our communication was immediately referred to the Board of Directors of the Chicago Board of Trade; by the Board of Directors jointly to the Executive, Membership, Legal Advice and Rules Committees, and by this joint committee to their attorney. The opinion of the attorney was not received in sufficient time to enable action by the Board of Directors at their last meeting. We have been assured, however, that the attorney definitely approved our proposition No. 1 above and we have assurance that the corporation can be admitted to membership representation under the Grain Futures Act.

Department of Agriculture Consulted. On May 24, our secretary submitted to the Department of Agriculture a letter requesting the Department's view on a number of

Transportation Department, Illinois Agricultural Association.

You Can't Tell Stephenson Co. Farmers That Dairy Co-operation Doesn't Pay!

Among the co-operative dairy marketing associations, which the I. A. A. has assisted in organizing, there is none that has served the district in which it is located to better advantage than has the Stephenson County Co-operative Marketing Company.

When producers can point to the fact that a Freeport condensary is paying one dollar per hundred for milk over what it paid before the "co-op" was well established with the price of condensed milk at practically the same level, you can't tell them that co-operation doesn't pay.

Likewise when farmers living near the marketing company local unit of Dakota consider that they were paid $.90 per hundred for milk at that point by a local dealer in February, 1922, while one year later they received $2.10 from their marketing company, they are willing to "stick" to co-operative marketing.

Serves Community

The Stephenson county "co-op" has proved, among other things, that the big idea in co-operative marketing is not especially to allow producers to get stock dividends or a share of the profits, but it has shown that the big thing in farmer marketing is to create a market which the farmers themselves control, to serve a community by assembling a large quantity of a commodity, grading it, standardising it, and putting a product on the market that the public wants at the time that it wants it.

Where there was a poor market for milk and cream, the Freeport co-operative has manufactured the surplus into butter, sweet cream, cheese, casein, and other dairy products. Its famous "Vita Gold" butter, scoring 90 and better, commands a premium of at least one cent over the Chicago market, simply because the company makes enough butter—and makes it good enough—to create a demand for it.

Organization

The Stephenson County Co-operative Marketing Company was formed by the Stephenson County Farm Bureau and the Dairy Marketing Department of the I. A. A., February 3, 1921, after several preliminary meetings. It opened for business on August 15, 1921.

Building and equipment of the company are valued at over $70,000. It is capitalized at $75,000 and shares have a par value of $50. No member may hold more than five shares. At present there are nearly 1,000 stockholders in the co-operative. At the close of 1922 business, a dividend of six percent was declared on all stock.

1922 Statement

A brief statement of the 1922 business of the company follows:

SALES

Butter	$253,661.75
Milk	145,929.25
Cheese	46,082.49
Cream (sweet)	51,522.69
Butter and, Skimmilk	21,693.47
Miscellaneous	16,474.90
	518,364.55

DISBURSEMENTS

Total paid patrons	$411,164.56
Butter and Cream purchased	21,483.34
Running expenses	61,742.57
Miscellaneous purchases	11,268.36
Sinking fund	12,705.72
	$518,364.55

The average monthly business for 1922 was $43,197.05. A total of 13,129,766 pounds of milk was handled, together with 1,784,606 pounds of cream. The total amount of butter made was 631,595 pounds out of 518,948 pounds of fat. The overrun, which amounted to 112,649 pounds, represents $42,919.26 at 38.1 cents per pound. The average overrun was 21.7 per cent.

The average price paid for fat was 40.4 cents per pound and for milk was $1.627 per hundred. The plant manufactured 169,626 pounds of cheese from 1,865,886 pounds of milk, receiving an average of 22½ cents per pound for the product.

Volume Increasing

May, 1923, saw the biggest volume of business transacted by the company in any one month, when $62,818.42 in sales came to the organization. With this big volume the expense was only 9 per cent of the total sales, the lowest yet secured by the co-operative.

In May, also, 88,542 pounds of butter were made, an increase of 15 per cent over the corresponding month of last year and 68 per cent over the 52,633 pounds average monthly production of 1922. The last report from the plant shows that over 108,000 pounds of butter was made in June. From these figures it can be seen that the company is doing a greater business with longer establishment.

Equipment for manufacturing the skimmilk product, casein, has been added this year. There is a good market for casein at present and an average of about $1,200 worth is being sold monthly.

Has Ten Locals

The Stephenson County Co-operative Marketing Company, with its main plant at Freeport, has local units at Dakota, Damascus, German Valley, Egan, Baileyville, Pearl City, Lena, and Waddams Grove in Stephenson county; at Shannon, in Carroll county; and Forreston in Ogle county.

Producers bring their cream to these locals, where it is collected before shipping to Freeport. Each plant has its branch manager. Steps have been taken this summer to organise the local units more strongly on a business basis. Advisory councilmen from the locals are elected to represent them at each meeting of the board of directors of the company.

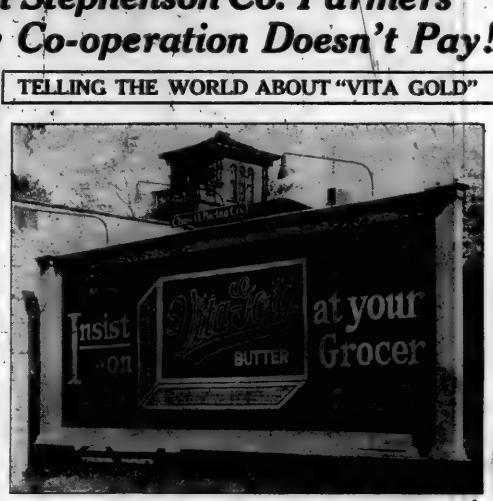
Dakota, Pearl City, and Egan have already organized on the strong unit basis.

Officers

The officers of the company for 1923 are, Wm. F. Brown, president; Wm. Frank, vice president; J. A. Phillips, secretary-treasurer, who with C. Maize, T. F. Ellis, D. M. Brubaker, Wm. Sieferman, H. M. Phillips, and John Kachelhoffer, constitute the board of directors.

The directors' board is on the rotating plan, and the term of office is three years. The officers are selected within the board. Directors are chosen at the annual meetings from the membership-at-large.

Management



The general management of the marketing company is under A. V. Ahrentzen, a man with many years experience in the creamery business. The company, in addition to its regular staff, has a fieldman who spends most of his time visiting locals, instructing in the care of milk and cream, and otherwise adding to the efficiency of the concern.

A monthly house organ, "The Co-op," is published to inform the membership concerning the affairs of their company.

Until recently the co-operative has maintained a warehouse to handle feeds, tankage, seed, binder twine, etc., at a small margin of profit to the membership. However, it was found that with the greatly increased volume of dairy products handled, the capitalization of the company would not permit the financing of this subsidiary, so it was disposed of in June.

An increase of nine tenths of one per cent in the number of pigs saved from farrowings in the six months ended June 1, 1923, as compared with the number saved during the same period last year, is indicated in reports gathered by rural mail carriers for the U. S. Department of Agriculture from 140,000 hog raisers in all parts of the country.

TELLING THE WORLD ABOUT "VITA GOLD"

HERE'S one of the illuminated signs of the Stephenson County Co-operative Marketing Company on display at Rockford. This "co-op" made 631,597 pounds of butter in 1922, which sold for $253,661.75. A large part of this was print butter, advertised and sold under the brand name "Vita Gold." They're making nearly twice as much this year.

REPORT OF U. S. GRAIN GROWERS, INC., SUBMITTED

(Continued from page 2)

matters involved in connection with grain exchange representation. Among others was incorporated specifically the three proposed methods of qualifying as to financial responsibility contained in the letter to President Stream. The following paragraph from the letter of Mr. Chester Morrill to Mr. Mehl under date of June 18 is in specific reply to the questions stated:

"The Solicitor is of the opinion that your suggestion as to the different methods by which non-stock membership corporations may meet the requirements of the Act are sound and that the Board of Trade would not be justified in denying membership to an association which had adopted any one of said methods; that is to say, the ideas set forth in paragraphs (a), (b), (c), and (d) just preceding the last paragraph of your letter."

Service Facilities. We also report informally, for your proper information that results of the several conferences held with Mr. G. W. Hales of Hales and Hunter, Chicago, in which have been outlined in detail arrangements for financing and handling any part or all of the grain of our members. This large and successful concern, friendly to the co-operative movement, controls a large amount of surplus capital in addition to elevators and plants whereby it will assume to underwrite our contracts made on the Chicago Board of Trade and will furnish all the finances needed in the movement of grain. This financial assistance will carry with it certain accounting service enabling us, with the employment of one man to actually sell our grain on the floor, to carry on our grain selling operations at a nominal cost per bushel, thus avoiding the necessity for building immediately an office personnel and force of our own, but leaving us free to use our own capital to the extent that we have to do our own financing and handle our own force as soon as we are in a position to do so. The arrangement carries with it the use of all classes of terminal elevator service, including storage space, and for which service we will pay certain stipulated rates per bushel charges. The services referred to are offered without limitations—for our immediate needs and available in a manner similar to the services offered by a bank or trust company. Neither would our business be restricted exclusively to the acceptance and employment of the services offered.

It seems possible to commence operation in the Chicago market almost at once—if desired.

Statement of Condition. We also report for your proper information and purposes herein set forth a general statement of conditions of the corporation's finances. The U. S. Grain Growers, Inc., at the present time is owing creditors of all classes approximately $250,000, including interest accrued on note obligations. Of this amount approximately $86,000 due solicitors and about $42,000 due old directors and others; $191,000 with about $20,000 in accrued interest is due note creditors, most of whom are Farm Bureau and Farm Bureau members. It is estimated that $100,000 in new capital will be adequate to start operation in at least five of the principal markets. This capital may not be immediately necessary. It is estimated that about $20,000 should be provided immediately and budgeted for the special purpose of consuming and setting in operation the present proposed plans.

Funds Required. In order to carry out and put into execution the plans contemplated, it becomes absolutely necessary that some funds be made immediately and definitely available for the purposes of:

1st. Carrying on the ordinary affairs of the corporation.

2nd. Arranging the contemplated changes looking to the funding of its debts.

3rd. Securing and accomplishing the funding of its debts.

4th. Securing subscription of necessary funds to provide initial capital.

5th. Organizing the marketing of grain.

Summary. Two principal causes, and only two, have in the past prevented U. S. Grain Growers, Inc., from putting into effect its marketing plan.

1st. Its form of organization—having membership contracts and providing for patronage dividends has furnished the excuse to bar the corporation from the grain exchanges of the country and thereby deprived the corporation from marketing any part of its grain desired, through that outlet.

2nd. Its financial condition—lacking adequate finances originally to function as a going concern, and finally becoming insolvent—has rendered the corporation dormant for the time being.

The first obstacle has been removed by legislative act.

The second obstacle is going to be removed through your active financial support and indorsement—if your Federations are so pleased.

The Grain Grower Plan in itself has not defeated the putting of the plan into operation. The plan has never had a fair trial. It seems it would be unsound to repudiate it before giving it a fair trial because of repeated indorsements by the Farm Bureau and other farmers' organizations. The Farm Bureau of the leadership of the Farm Bureau cannot repudiate this plan and ever hope to make good on another grain marketing plan.

The present Board of U. S. Grain Growers, Inc., in accepting their respective positions to which they were drafted on that Board subscribed to a solemn oath of office to faithfully and well, and to the best of their ability carry out the trust and confidence so reposed in them by the membership of the corporation—and by your committee. They have kept faith with the membership of U. S. Grain Growers, to the best of their ability.

Needed financial and active united support is now our immediate problem.

Your substantial and definite financial support to this program is required at once and most earnestly solicited.

There is needed, according to the estimates of the Executive Committee of the Corporation:

For carrying on the ordinary affairs of the Corporation.

For arranging the contemplated changes looking to the funding of its debts.

For securing and accomplishing the funding of its debts.

For securing subscriptions of necessary funds to provide initial capital, and

For organizing the marketing of grain, the sum of twenty-thousand ($20,000) Dollars, or as much thereof as may be made available at the present time and immediate future.

Said fund to be administered through and with the advice of a properly constituted Finance Committee.

The sums that may be pledged and paid by the Farm Bureau Federations of any or all of the several purposes above set forth are to be received by the Corporation as advances and be later secured by bonds or debentures in the several amounts of the same class as contemplated to be issued to the creditors of the corporation whose claims are proposed to be funded.

Very respectfully submitted,

U. S. GRAIN GROWERS, INC.
By its Board of Directors.

.....
Secretary.

Place of I. A. A. Annual Meeting To Be Chosen

Choice of the place at which the 1923 annual meeting of the Illinois Agricultural Association will be held will be decided at the next meeting of the Executive Committee on Friday, August 3. The annual meet is dated for the third week in January, 1924.

"Without Confidence, There Can Be No Peace, No Prosperity, and No Profit"—Hon. Sydney Anderson, I. A. A. Picnic, June 29

FARM FOLKS MAKE THE I. A. A. PICNIC GENUINE SUCCESS

Large Crowd Hears Speakers and Sees Barnyard Golf Tournament at Urbana

The Fifth Annual I. A. A. Farm Bureau State Picnic, at Crystal Lake Park, Urbana, June 29, was voted by all who attended as an overwhelming success. A crowd estimated by Champaign and Urbana newspapers at from 7,000 to 10,000 filled the grounds all day and made it a point to inspect the University farm before going home.

The speaking, by the Hon. Sydney Anderson, U. S. Congressman from Minnesota, and Mrs. A. E. Brigden, president of the New York State Federation of Home Bureaus, the horseshoe pitching tournament and the University Open House events held the interest of the crowd during the day.

Congressman Anderson strongly advised the formation of co-operative associations, emphasizing the value of good management.

Lauds Co-operation

"If the farmers form their organizations and place good men at the head of them, they will succeed," he said. "In California co-operation has been a success. Before it came the fruit growers were raising more than fifty varieties of oranges and losing money. Now they grow only three or four kinds and are prospering.

"After you have organized do not withdraw from your association, because you can momentarily get a better price for your products elsewhere. Stick to your association and it will prosper."

Speaks on Home

Mrs. Brigden spoke for the home and happy farm families.

"There never was a civilization that became decadent that had prosperous agriculture and happy homes," she said.

In summarizing Mrs. Brigden gave as her creed: "To make the home and community the best we can, we cannot put our money to a better use."

DeWitt Wins

The horseshoe pitching contest was won by Torbert brothers, the DeWitt County Farm Bureau Team, after attracting a large crowd nearly all the day.

The management of the picnic was smooth and efficient. The grounds offered every possible sort of accommodation: rest tents, play grounds for children, lunch stands, seating and shade, all of which were enjoyed by the crowd.

Nearly everybody made a trip to the University farm some time or other during the day.

This year's crop will be worth over $1,000,000,000 more than last year's on the basis of farm prices on July 1, 1923, compared with prices a year ago, according to a recent forecast of the U. S. Department of Agriculture.

WINNERS OF TOURNAMENT

Walter and Harry Torbert

Brothers, 15 and 17, Win Horseshoe Cup for DeWitt

Walter and Harry Torbert, 15 and 17 years old, are the farm bureau "barnyard golf" champions of Illinois as the result of defeating every team pitted against them and emerging as the only 100 per cent victors among nineteen county farm bureau entries at the I. A. A. Farm Bureau State Picnic, Urbana, June 29.

The youthful champions represent the DeWitt County Farm Bureau and were presented a handsome cup as their trophy of victory, engraved with the record of their conquest. This is the fourth successive year that the honors have gone to DeWitt County, the present champion's father, Ed Torbert, and Joe Haskett having composed a team which won at all three previous state picnics.

Mr. Torbert has trained his two boys for a year for their showing. They are cool, steady and seem equal to any emergency.

Both boys are regular "dirt farmers" and real farm bureau boosters.

In the finals Logan defeated McLean 30 to 26 and DeWitt trimmed Rock Island 30 to 17. Then McLean downed Rock Island 30 to 24 while DeWitt beat Logan 32 to 15.

In the next round DeWitt took the long end of a 30 to 16 score with McLean while Logan defeated Rock Island 32 to 24.

This left Logan and DeWitt for the last game, the latter winning 51 to 18. The last four shoes pitched were ringers.

"Shipping Fever" May be Prevented By Vaccination

The Bureau of Animal Industry of the United States Department of Agriculture has made arrangements to treat all cattle by the vaccination method for hemorrhagic septicemia (sometimes erroneously called "shipping fever") that will be shipped from the Chicago Stock Yards for stocker and feeder purposes.

This treatment is optional with the purchasers of cattle and the vaccine will be furnished at cost, which will be approximately 10 cents per head. An additional charge will be made by the Stock Yards Company for handling stock to and from vaccinating pens.

While the vaccination method is still in the experimental stage, the Department believes it has considerable virtue and advocates it for all stocker and feeder cattle.

Nineteen Counties in I.A.A. "Barnyard Golf" Competition

The following horseshoe pitching teams represented the 19 county farm bureaus who competed for the state championship at the I. A. A. Picnic at Urbana, which was won by the DeWitt county team with Logan county as runners up:

Bureau, Butts and Walters; Cass, Schnepper and Opper; Cumberland, Easton Brothers; DeWitt, Torbert Brothers; Ford, Gee and Carr; Henry, Papenhien and Peterson; Iroquois, Seggebruch Brothers; Kane, Warner and Feece; Kendall, Price and Matrick; Lake, Fenlon and Braske; Logan, Reutchler and Waddell; Livingston, Mertes and Norgaard; McLean, Humphreys and Krusc; Marshall, Peterson and Buck; Richland, Bann and Bunn; Rock Island, Wells Brothers; Sangamon, Fry and Christopher; Stark, Screeton and Reece; Whiteside, Irion and Nice.

Plan Formation of Centralizer at Mt. Vernon

The Jefferson County Cream Producers Association, composed of member locals of that county, passed a resolution to lay plans at once for the formation of a farmer-owned and controlled centralizer at Mt. Vernon to be put in operation when the product from at least 3,000 cows is put under contract.

This organization has been functioning as a bargaining association to sell the cream of its members to private centralizers after competitive bidding. Refusal of the centralizers to bid on the product controlled by the association, led up to the action to form a co-operative centralizer.

Farm Bureau is Praised by Oldest Member, 96

Thomas Watkins, 96, Chandlerville, Ill., of the Cass County Farm Bureau, is the oldest farm bureau member in Illinois. In recognition of this he has been presented a gold medal by the executive committee of his county organization.

Mr. Watkins owns and lives on a 240 acre farm in Richmond Precinct, Cass County. He has lived in the same precinct for more than seventy years.

When John Lucas, the farm bureau solicitor, asked Mr. Watkins to become a farm bureau member, his signature was immediate.

Thomas Watkins

"It is probable that I am too old to get all of the direct benefits of the farm bureau," said Mr. Watkins, "but I have lived just long enough and seen enough phases of American agriculture to realize the value of real farmer organization. I will consider my membership well worth while if it helps to make a good organization and benefits to some extent the agriculture of the county."

Mr. Watkins was born in Kentucky and came to Illinois with his parents at two years of age. He has voted at seventy-six general elections, all but one in his home precinct.

"I have voted for only two Republicans," said Mr. Watkins, laughing, "and one turned out to be a drunkard, the other a forger."

"ROUGHER THEY ARE, THE BETTER!" PLEA FOR BOYS OF SLUMS

More Than 250 Requests For City Children Come To I. A. A.

The boys do get their inning sometimes in the farm bureau outings for slums children of Chicago.

"I'd like two boys about seven or eight," requested Mrs. C. E. Welty, of Amboy, on a recent call to the offices of the Illinois Agricultural Association. "And the more rough and frolicsome they are, the better we will like to have them for a two-week outing."

The Outing Secretary of the I. A. A. got in touch with the United Charities, there was a hurry-up call into the slums of Chicago's West Side and within a few hours two happy and surprised youngsters, all slicked up, were on the Lincoln Highway with Mr. and Mrs. Welty in the car, bound for an unexpected outing.

More than 250 children have so far been applied for by farm bureau folks of a score of counties and the requests are coming in every day.

The children are already beginning to go out upon their vacations.

Growers "Co-op" Resumes Business; Outlook Promising

Prospects are very bright for a successful season for the Alfalfa and Truck Growers Association of Union and Alexander Counties, according to L. M. Mathews, manager of the organization, McClure, Ill.

"Our first year, 1921, was voted a success and the members were well pleased with results," states Mr. Mathews. "In the spring of 1922, an overflow of the Mississippi River destroyed the main crop, alfalfa, and the activity of the association was discontinued for the year.

"This year we find that the alfalfa has been re-seeded and the harvest is very good, in fact, better than during previous normal years. Wheat has had an unusually favorable spring and it has been predicted that there will be more No. 2 wheat here than ever before. Corn is doing fine and the prospects point to a big yield."

The I. A. A.—
ECONOMY OF SERVICE
Money Saved For You
The Operating Expenses of the I. A. A. for the First Six Months of 1923 Were $26,748.75 Less Than in the Same Period of 1921, While Every Effort Has Been Put Forth to Maintain Quality and Extent of Service.

WHEAT COUNCIL OF THE U. S. IS ORGANIZED

PITTSBURGH PLUS FIGHT BEING LED BY MIDWEST BODY

President Thompson of I.A.A. Represents Farming Interests of Illinois

Important steps toward the abolishment of "Pittsburgh Plus," the fake freight charge placed on steel products, were taken in July by the Mid-west Committee appointed to lead the fight. Illinois, Iowa, Wisconsin, and Minnesota are represented on the committee.

The Illinois Commission to investigate "Pittsburgh Plus" is composed of Senator John T. Denvir, Chicago, chairman; Senator Randolph Boyd, Galva; Representatives Robert E. Scholes, Peoria, and J. E. McMackin, Salem; B. F. Baker, Kewanee, representing the Western Association of Rolled Steel Consumers; B. F. Peek, Moline, manufacturer; and President S. H. Thompson, Quincy, representing the I. A. A.

Appointment

This commission was provided for in a bill passed at the recent session of the Legislature and the members were appointed by Governor Small. The sum of $25,000 was appropriated to finance the work of the committee.

Reports on economic phases of the problem were made to the inter-state commission by a committee of experts from the four states who have been making investigations.

Executive Committee

Three members were appointed to serve on the executive committee to carry on the fight for the Mid-west Commission when the most important round of the effort to abolish the unjust freight charge comes up before the Federal Trade Commission. The steel manufacturers of the Pittsburgh district have already put in their case. It is likely that B. F. Peek of Moline will represent Illinois as chairman of the executive committee.

Over 7,000 member-farm-bureau gatepost signs were sent out early in July to 11 counties of Illinois. These signs were ordered by county farm bureaus through the I. A. A., which had made special arrangement with the manufacturer for a special discount on quantity lots.

WANTED—A STRONGER ROPE

OVER $19,000,000

Quite a neat little sum! Yet that's the amount of business that the Chicago Producers handled during the first year of operation. They made a 30 per cent refund too! Illinois shippers gave the "co-op" 52 per cent of its business. Read the whole story on Page 3 of The Record.

Milk Contracts Are Upheld By McHenry Judge

Judge Edward D. Shurtleff, of the Circuit Court of McHenry County, Illinois, has handed down a decision in the case of the Milk Producers' Marketing Company of Chicago vs. Arthur L. Bell, in which the co-operative marketing contract is completely upheld. The court grants the application of the Milk Marketing Company against its member to compel him to specific performance of contract. The decision is regarded as an epochal one, since it is the first time a court ruling has been had in Illinois on the Sapiro contract.

COUNTIES MAY APPROPRIATE T. B. FUNDS LEGALLY

County Boards of Supervisors are entirely within their powers in appropriating funds for the eradication of bovine tuberculosis within the county, according to the provision of S. B. 348 passed at the 53rd General Assembly, which says that "each county shall have power to appropriate funds from the county treasury to be used in any manner to be determined by the board for the suppression, eradication, and control of tuberculosis among domestic animals in each county."

Doubt has been prevalent in many counties of late in regard to the legality of such appropriations due to the decision handed down by Attorney General Brundage, which stated that such appropriations are illegal.

As the new statute expressly provides for the lawfulness of county tuberculosis appropriations, the decision of the attorney general has been pointed out to be in error as affecting such appropriations.

Producer Heads Meet At Chicago, Report Progress

The Board of Directors of the National Live Stock Producers Association met in the Hotel Fort Dearborn, Chicago, on July 23rd, for a three-day session. President John G. Brown, who has just completed a personal survey of the river markets, reported on the progress of the organization.

Fruit Meeting Is Called For Centralia, Aug. 7

The Illinois Agricultural Association is calling a fruit and vegetable marketing conference, in co-operation with the Illinois Fruit Exchange, at Centralia, August 7. Walton Peteet, Director of Co-operative Marketing for the American Farm Bureau Federation, is to be the speaker.

There is to be a free, open discussion of marketing problems. The purpose of the conference is to study fruit and vegetable marketing problems; to make a survey of past experiences and present conditions; and to formulate a program comprehensive of future needs.

All members of the exchange are urged to be present, if possible. It is not in any sense a membership meeting, but one which will help to shape the future of co-operative fruit marketing in Southern Illinois.

SYDNEY ANDERSON NAMED PRESIDENT, OFFICE IN CHICAGO

Large Program For Relief of Grain Grower Set Forth By Organization

(On Page Two will be found a complete statement by the directors of the Wheat Council of the United States as to their objects.)

The Wheat Council of the United States has been legally organized with the following officers: Sydney Anderson, president; Harvey J. Scoone, Vice-President; O. E. Bradfute, treasurer; Grosvenor Dawe, executive vice-president; C. B. Chatfield, secretary.

With offices at 77 West Washington St., Chicago, the organization plans to make all possible efforts and to co-operate so far as possible with all interests for the general welfare of the wheat producer, whose present low prices have aroused the attention of the nation.

The Wheat Council of America is the outgrowth of a meeting called in Chicago in June by Gov. J. A. O. Preus, of Minnesota, and attended by more than 400 delegates from seven middle west states. The Illinois Agricultural Association was represented at this meeting.

This conference went on record in support of co-operative marketing.

"File Claims Promptly," Says Traffic Department

"All shippers should file claims promptly," advises the Transportation Department of the I. A. A. "It operates to their own advantage, as well as to that of the carrier. When claims are filed promptly, the facts and circumstances surrounding a case are much more readily recalled than when they are allowed to run for a considerable length of time."

The Department states that many have lost their rights in the collection of loss and damage claims by reason of negligence or ignorance of the limitations in such matters.

The terms of the uniform livestock shipping contract and the bill of lading provide that claims for loss, damage, or injury to property must be made in writing to the originating or delivering carrier within six months after delivery, or in case of failure to make delivery, then within six months after a reasonable time for delivery has elapsed.

The Transportation Department handles both loss and damage and overcharge claims as part of its service. The legal limit for filing overcharge claims is two years.

Other service that the Department gives includes quoting of rates, information concerning correct routing, assistance in securing various shipping conveniences, and other work looking to the interests of Illinois farmers in freight and traffic matters.

Illinois Agricultural Association
RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by News Publicity Department, L. J. Montross, Director.

Entry as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of ten cents for subscription to the Illinois Agricultural Association Record.

Interested In Feeder Cattle? Write To I. A. A.

It will be to the advantage of any cattle feeder who desires to purchase feeder cattle direct from the range to communicate with the Live Stock Marketing Department of the I. A. A. The Department is in communication with several parties who can furnish feeder cattle and will be glad to put Illinois feeders in touch with them.

August Is Picnic Month For Farm Folk of Illinois

At least 23 county farm bureaus of Illinois will hold their annual picnics during the month of August, according to the Speakers' Bureau of the I. A. A.

This bureau keeps a list of all available speakers and arranges with the counties to furnish them with men to speak who have a wide understanding of agricultural problems of the day.

A. E. Everingham, Hutsonville, of the I. A. A. Legislative Committee, is one of the most popular speakers, judging from the large number of picnic dates that he will fill in all parts of the state. Others who will address farm gala day throngs include J. D. Harper, F. M. Higgins, S. Fred Cummings, Frank O. Lowden, Howard Leonard, J. R. Howard, Senator Cuthbertson, and S. H. Thompson.

Picnic dates scheduled are as follows: Pope, August 4; Richland, 8; St. Clair, 9; Franklin, 10; Edwards, 11; Lawrence, 14; McDonough, 14; Johnson, 15; Calhoun, 15; Woodford, 16; Cass, 16; Wayne, 17; Greene, 18; Monroe, 18; Henderson, 22; Knox, 22; Menard, 22; Lake, 22; [illegible], 23; Coles, 23; Macon, 25; [illegible], 29; Gallatin, 30.

Objects of Wheat Council

The following statement, by the Hon. Sydney Anderson, president of the Wheat Council of America, and authorized by the directors of the organization, gives, briefly, an account of the causes, scope and plans of the movement:

"A survey of domestic and world conditions in the production and marketing of wheat demonstrates that the stabilization of the domestic price at a profitable level and the consequent improvement of the condition of the wheat farmer is dependent upon bringing the control of the domestic wheat price within the borders of the United States. For this three things are necessary. Reduced acreage and production, orderly marketing and increased consumption.

"Under the stimulation of the world war the wheat acreage of the United States was enormously extended. For the past three years wheat acreage in the United States has exceeded the average acreage, 1909-1913, by more than 13,000,000 acres. This is equivalent to an excess production of from 160,000,000 to 200,000,000 bushels annually. The exportation of wheat before the war averaged 15 per cent of the crop. For the past three years it has been in excess of 25 per cent of the crop.

"Since the world war there has been a gradual recovery of the wheat producing countries. These countries in the main by reason of cheaper lands and labor produce at less cost than we do. The greater competition of these countries in the world wheat market defines the price of the whole domestic crop so long as we continue to produce a surplus of considerable proportions.

Reduced Acreage

"The directors of the Wheat Council after full consideration of these facts are fully convinced that a reduction in the wheat acreage and wheat production in this country is absolutely essential to a profitable price for wheat to the American wheat grower.

"While the influences of the World War were working to produce an increase in the acreage and production of wheat in the United States, these influences as well as the organized efforts of the government, were working to produce a reduced consumption of wheat in the United States, and these influences are still being felt. Wheat products constitute a healthful, wholesome food, which is the basis of all meals. Greater consumption of wheat by the people of the United States at this time would not only be a healthful and wholesome thing for them but a patriotic service to the wheat growers of the United States in the emergency by which they are now confronted.

Vast Volumes

"The distressed conditions existing in many wheat growing sections of the country, which are having a tendency to force into the market vast volumes of wheat which cannot be readily absorbed, must inevitably tend to produce lower prices, which more orderly marketing might avoid.

"The Council desires to call attention to the new credit facilities now being furnished under Federal direction through the intermediate farm credit banks, which are available to meet these distressed conditions."

Objects of Council

The objects of the Wheat Council of America have been outlined by the directors as follows:

A. To advance the interests of the producer, by developing and promoting through voluntary action, the application of methods of organizing the production and marketing of wheat in the United States, in order to establish or approximate a balance between domestic production and consumption and to bring the control of domestic prices of wheat within the United States instead of abroad; and to develop profitable outlets for such surplus as may exist.

B. To advance the general welfare of the producer by any and every means deemed advisable and especially by promoting more efficient and effective marketing methods and systems.

C. To interest agriculture, industry, transportation, finance, commerce, labor and consumers in the economic phases of the production, distribution, manufacture and consumption of wheat and wheat products and associated commodities.

D. To increase the consumption of wheat and wheat products by informing the consumer of the advantages to be gained by such increased consumption, and by such other means and methods as may be deemed advisable; and to co-operate with the producers of wheat and the manufacturers and distributors of wheat products to this end.

E. To offer co-operation with every existing agency, national, state and local, working for improvements in methods of producing, storing, handling, manufacturing, marketing and distributing wheat and wheat products.

F. To aid in co-ordinating, or if deemed necessary, to conduct scientific research into the production, manufacture, distribution and consumption of wheat and wheat products.

G. To perform the functions of a Clearing House in the field of advertising, publicity and general business endeavors that are aimed at accomplishing any and all of the foregoing objects.

Chicago Producers' Patrons Urged To Consign Correctly

Live stock shippers who consign their stock to the Chicago Producers Commission Association, the agency of the National Live Stock Producers Association, at Union Stock Yards, are requested to use more care in billing their shipments, as considerable confusion has arisen in the past when cars have come to the yards consigned to "National Producers" instead of "Chicago Producers."

Some shipments billed in this manner have not reached the "co-op" firm at all, the word "national" being connected with a private commission company in the yards.

"To Chicago Producers, Union Stock Yards, Chicago, Ill." is the correct way to consign live stock to the farmers' firm.

New Issue of Federal Bonds Being Floated

A new issue of Federal Farm Loan bonds of 45 million dollars now being floated should result in more money being available before long to be lent through co-operative farm loan associations to farmers wishing to place long term mortgages on their farms. These bonds will yield 4.45 per cent to the redeemable date 1933 and 4½ per cent thereafter to redemption or maturity. They may be purchased in denominations running from $40 to $10,000.

Red Top Growers Hold Annual Meet; Orr Is President

George Orr, Wayne county, was elected president of the Egyptian Seed Growers Exchange to succeed J. S. McDonald of Jefferson county, at the annual meeting of the red top "co-op" held at Flora in July. S. S. Hardin, Clay county, was made vice president.

Other changes include the election of George McElyea of Xenia to the Board of Directors to succeed Curt Anderson, who resigned to accept the position as full time general manager of the exchange. Mr. Anderson was also re-elected secretary-treasurer.

Walton Peteet, director of Co-operative Marketing of the American Farm Bureau Federation, made the principal address at the meeting. He gave a most interesting and practical talk on the fundamental principles of co-operative marketing.

"The aim of co-operative marketing," said Mr. Peteet, "is to substitute orderly marketing of farm products for the old, wasteful practice of dumping and blind selling. Wealth, culture, and power were on the farm two generations ago—now they are in the cities. The change has been brought about by the product of combination of group action in industry against individualism in agriculture. The great hopes for agriculture are more economical production and a better marketing system. Organization is the bedrock for advancement of both of these."

Prospects for the exchange this year are very encouraging. With the new warehouse at Flora practically completed, facilities for handling the red top pool are much improved.

EUROPE INCREASES FOOD PRODUCTION, ECONOMISTS AVER

Lessened Demand For American Farm Exports Is Predicted At Conference

European nations are gradually catching up in food production and will have less and less demand for American agricultural products, according to a survey of the foreign situation made by a committee of farm economists meeting in Washington at the call of Secretary of Agriculture Henry C. Wallace. The farm bureau was represented by H. C. Moorhouse, of the American Farm Bureau Federation.

Issue Statement

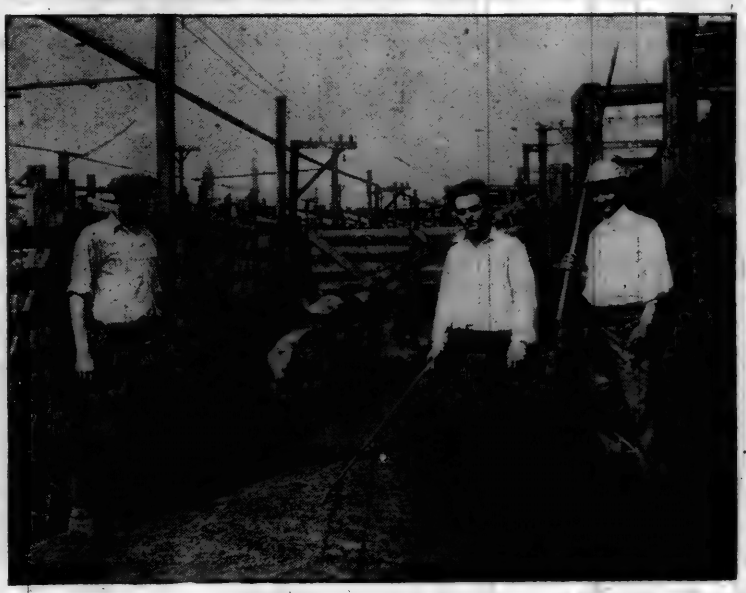
The statement which came from the conference is in part as follows:

"The European nations are gradually approaching their pre-war level in agricultural production, especially importing nations which are endeavoring to make themselves independent of outside food supplies. Twenty-one countries that in 1909 to 1913 harvested an average of 67,000,000 acres of wheat decreased to 58,000,000 acres in 1920, and then rose again to 60,000,000 in 1922. Eleven countries that harvested 48,000,000 acres in 1920 and 51,449,000 acres in 1922 have reported 52,180,000 acres for 1923. Moreover, crop conditions are much more favorable this year. Revival of production in Europe is much more manifest in agriculture than in manufacture.

Other Regions

"During the World War agricultural production in Europe was reduced while the output in several other countries was increased. For example, the total wheat area in the United States, Canada, India, Australia and Argentina was 116,000,000 acres in 1913 as against 127,000,000 in 1923.

"Increased production in these regions has more than offset the decline of production in Russia. There is no evidence to show that the competition of these areas will be less this year than last."



A total of 11,534 farm bureau meetings were held in Illinois last year with an attendance of 543,000.

Even Knockers and Skeptics Are Impressed By First Year's Record of Chicago Producers

TO MARKET WITH THE CHICAGO LIVE STOCK "CO-OP"

HERE'S a scene in the chutes of the Union Stock Yards showing a bunch of porkers just unloaded and being handled by employes of the Chicago Producers Commission Company. This "co-op" has an efficient force of salesmen to care for a big volume of live stock. The man at the extreme right is George Parmenter, head hog salesman, and the other two men are assistants in the hog alleys of this successful farmers' commission firm.

There were the knockers—the skeptics — those who said it couldn't be done—when the National Live Stock Producers Association was formed late in 1921 for the purpose of establishing farmers' co-operative live stock commission companies at the principal terminal markets of the country. Farmers had no business to follow their live stock to market in the first place and they would make a fizzle of it anyway, after they did establish selling agencies.

Then again, the farmers couldn't hope to make a success of co-operation on the Chicago market, the world's largest and most powerful terminal. And when the Producers established the Chicago Producers Commission Association at the Union Stock Yards, the venture was watched with great interest all over the country, for all realized that here would be the hardest struggle with the strongest opposition.

Now for a little more recent history—real history, too, in the progress of co-operative marketing in America. At the end of its first fiscal year of business, June 30, 1923, the Chicago Producers selling agency announced a gross value in business of $19,828,033.54 from the opening date, June 19, 1922, until June 30, 1923. The company's books showed that 11,742 cars representing 751,985 head of live stock had been handled.

Thirty Per Cent Refund

At the same time the Board of Directors of the "co-op" declared a 30 per cent refund in commissions and ordered that an amount approximating $70,000 be paid back to members of the company in the form of patronage dividends.

When the National Producers established an agency in Chicago, it was the third put into motion under their plan, others having already opened at East St. Louis and Indianapolis. The state farm bureau federations of Illinois, Iowa, South Dakota, Minnesota, Wisconsin, Indiana, and Missouri aided in putting the infant co-operative on its feet by urging live stock shipping associations to take out memberships.

Success from Start

Within less than a month after establishment, the Chicago Producers Commission Association was running smoothly and paying expenses. In the fall of 1922, membership fees were abolished and later more than $10,000 in membership fees was returned to the country.

Membership in the agency is now free to shipping associations and to individuals. However, application blanks must be filled out to conform to Federal regulations. Anyone may consign stock to the Producers but must take out membership in order to be eligible to the annual refund.

The Board of Directors of the Chicago Producers is composed of seven members, three from Iowa, two from Illinois, and one each from Wisconsin and South Dakota. It is a rotating directorate. Members are appointed by the state farm bureaus in the respective states to serve for three-year terms.

Board of Directors

The present Board of Directors is composed of Frank Coyne, Montrose, Ia.; M. Sar, Essex, Ia.; A. Sykes, Ida Grove, Ia.; J. W. Crabb, Delavan, Ill.; W. B. Elliott, Williamsfield, Ill.; George McKerrow, Pewaukee, Wis.; and W. S. Hill, Mitchell, S. Dak.

The Chicago Producers Commission Association has experienced a steady growth since establishment. The hog business has developed exceptionally well. Taking the lead in hog receipts among the commission companies on the market in July, 1922, the agency has held this lead practically every week since that time and at present handles between 12 and 15 per cent of the weekly receipts of hogs.

In total receipts of all live stock, the company usually stands first or second each week and handles an average of from five to six per cent of the business on the market. Until recently all sheep consigned to the Chicago Producers were handled by another firm by special arrangement. However, a sheep selling department has been added with an experienced salesman in charge.

Growth in Force

The agency started with a manager, two cattle salesmen, three hog salesmen, a cashier, and small office force. The personnel has been enlarged by an assistant manager, a third cattle salesman, a sheep salesman, as well as additions to the office and yard force. Plans are being made to employ an additional cattle man to buy stockers and feeders.

The members of the entire working force of the Producers have been chosen for their ability and experience in their special line of work. Their fitness is shown by the remarkable growth of the company which would not have been possible without general satisfaction on the part of shipper patrons.

Illinois Leads

It is interesting to note that Illinois live stock shippers have steadily held the lead in volume of business consigned to the Chicago Producers. Fifty-two per cent of the live stock handled by the "co-op" was shipped by Illinois farmers. Iowa easily ranked second by shipping 42 per cent of the "co-op's" volume.

The following table showing shipments by states very clearly portrays the increase in car receipts each month by the agency, as well as showing the sources of receipts.

SHIPMENTS BY STATES

Months	Ill.	Iowa	Ind.	Wis.	Others	Total
June ½	111	60	3	2	0	177
July	265	164	7	8	4	448
Aug.	325	211	8	8	8	561
Sept.	233	177	11	11	7	439
Oct.	295	192	23	26	5	541
Nov.	436	298	13	37	16	800
Dec.	441	411	20	35	15	963
Jan.	682	569	24	24	33	1,332
Feb.	694	570	23	16	20	1,323
March	884	570	20	19	16	1,253
April	548	548	16	34	16	1,176
May	688	483	21	24	50	1,266
June ½	554	424	18	13	18	726
Total	5,797	4,675	218	259	219	11,168
%	52%	42%	1.9%	2.2%	1.9%	100%

From June 19, 1922, until June 30, 1923, the books of the Producers show that 1,144 individual live stock shippers of Illinois patronized the Producers in Chicago, while 191 live stock shipping associations in the state held memberships in the "co-op."

The following are the totals of each class of live stock handled during the year: cattle, 59,639; hogs, 629,024; calves, 18,202; sheep, 45,030; making a total of 751,895 head.

Support Appreciated

"We greatly appreciate the loyal support given the Chicago Producers by Illinois live stock shippers," states S. W. Doty, manager of the agency. "Without it, we could not have reached the success that has been ours during the first year of operation.

"We hope that our efforts to establish a real service in selling live stock co-operatively during the past year will bring us still greater patronage during the coming year. Although an organization as large as we have built up is bound to make some mistakes, our records show that the percentage has been very small in proportion to the business handled. Each shipper should place complaints as soon as they arise and we will do all in our power to adjust them."

Volume Increases Profits

The well known fact that volume of business decreases handling costs is well exemplified in the records of the Chicago Producers. For instance, when 439 cars of stock were handled last September, the lowest receipts of any month, a profit per car of only two per cent was realized. In the month of highest receipts, January, with 1,336 cars, the profit per car was 43 per cent.

"We cannot too strongly emphasize the necessity of a large volume of business in order to obtain the best results," states F. M. Simpson, general manager of the National Live Stock Producers Association. "Volume helps to control the market as well as greatly decreasing the handling costs.

"On the Indianapolis market, where the Producers' agency controls around 30 per cent of the receipts each week, the average market prices have more nearly approached Chicago prices than ever before.

"The big aim of the Producers' agencies is not only to make refunds to shippers but to improve marketing conditions in general and to give better service to the farmer."

Splendid Record

A study of the growth and accomplishments of the Chicago Producers Commission Company after one year of business shows that the confidence which live stock producers have placed in it has not been unfounded.

Having successfully handled over 19 million dollars worth of live stock, declared a 30 per cent refund to patrons, sent back to the country more than $10,000 in membership fees, and built up a service that has commanded the respect of both shippers and competitors, the Chicago Producers' selling agency has accomplished no small task. And when all this has been done in a little over one year in the world's largest and most powerful live stock marketing terminal, it may be considered a still greater accomplishment.

Business men of Kankakee county have put up $10 each and have gone into partnership with 249 pig club boys and girls.

Cow-Testing Is The Subject of New Farm Movie

"Jonathan Barr's Conversion" is the latest picture turned out by Homestead Films, Inc. The picture, originally taken for the Holstein-Friesian Association of America, concerns the cow-testing campaigns and the development of disease-free herds.

It is announced that prints are available from Homestead Films, Inc., 732 South Wabash Avenue, Chicago.

400 Children of Slums Get I. A. A. Outings

PRODUCERS' HEAD ANSWERS CHARGES OF OLD-LINE MAN

Heavy Receipts, Not "Co-ops" Responsible For Hog Market Decline

The charge of Everett C. Brown, president of the National Live Stock Exchange, that the decline in hog prices is due to the success of producer-owned co-operative commission companies in securing such large volumes of business, has been well answered by President John F. Brown of the National Live Stock Producers Association.

"Everett C. Brown's opinion regarding the low hog market is wholly at variance with the facts which he has at hand," states John F. Brown. "Market statistics show that local cattle receipts for the month of June were the smallest since 1917. Light receipts make for higher prices. Likewise the receipts of sheep for June were the lightest in more than 30 years. These good prices were due to sensationally light runs and not to the fact that the 'co-ops' have not yet invaded those departments of the market as fully as they have the hog department.

Hog Run Excessive

"The same market statistics show that more hogs were on the Chicago market this June than ever before in the history of June markets. A similar condition occurred in 1911, with similar effect, and that was long before co-operative marketing of hogs was under way. Too many hogs for the entire market and not just too many hogs for the competitor of the National Live Stock Exchange was the true cause of the break in prices.

"Between November and July, seven western markets received 5,000,000 more hogs than in the same period in either of the two years just preceding. Hog shipments from eleven cornbelt states to all markets increased 32.2 per cent this year as compared with the year preceding in the period from November 1 to June 1.

Producers Capable

John F. Brown also pointed out that the managers of the Producers' agencies are well acquainted with live stock marketing and are making a success of it. He maintained that by controlling an enormous amount of live stock offered for sale, that the Producers stabilize the price much more than would be the case if 15 firms were doing one-fifteenth of the business now being done. The Producers handle from 15 to 35 per cent of the total receipts on markets where they operate, states Farmer Brown.

"Instead of pointing out to us the dangers of our success, the National Live Stock Exchange would be more to the point in explaining to us why it is that the old-line commission firms have always discriminated against the stock raisers in favor of the country speculator," concludes John F. Brown.

"Instead of making loose and unfounded accusations, the Exchange potentates would better tell why they so vigorously opposed the Packer and Stock Yard Control Law and fought it unsuccessfully through all the courts; and why, after its validity was sustained, they boycotted the stock raisers' own selling agency until ordered to cease so doing by the United States Department of Agriculture."

Chicago To Have Federated Fruit Meeting, Aug. 13

The Board of Directors of the Federated Fruit and Vegetable Growers, Inc., will meet in the La Salle Hotel, Chicago, on August 13th. Invitation has been extended to all member associations to have one or more representatives present for an informal gathering of members in conjunction with the board meeting.

By-laws of the Federated Growers provide that the annual meeting of members shall be in February each year. The membership has increased steadily and is still increasing. Rapid development makes desirable the opportunity for members to get together before the date of the next annual meeting.

Freeport "Co-op" Loses Services of A.V. Ahrentzen

A. V. Ahrentzen, who has been manager of the Stephenson County Co-operative Marketing Company since early in 1922, resigned in July and has entered another field of work. The business of the company doubled during the time he was manager.

Pending the selection of a successor, J. A. Phillips, secretary-treasurer of the company, is taking charge of the business affairs of the company.

The Stephenson "co-op" reports the destruction by fire of the creamery at Damascus, one of the local stations. Loss was partially covered by insurance. A new and modernly equipped structure will replace the old building.

CANADIAN CATTLE GOING TO ENGLAND; U. S. IS THE LOSER

I. A. A. Is For Reduction of High Tariff On Stockers and Feeders

Last winter the Live Stock Marketing Department of the Illinois Agricultural Association took the lead in filing an application with the Interstate Commerce Commission for an investigation of the Canadian cattle tariff. It was the contention of the I. A. A. at this time that the tariff was so high as to materially affect Illinois farmers and industry in general. It was also contended that the tariff would have a tendency toward keeping Canadians and Americans residing in Canada out of our markets.

That these contentions were correct is shown by the fact that already 10,000 head of Canadian cattle have been shipped to England and 50,000 more will go before September 1.

Canadian Program

The Canadian Government is putting into effect a program of fattening Canadian cattle in the Eastern provinces for export. Every pound of Canadian beef that goes across the ocean lessens the demand in our markets.

Every stocker and feeder shipped across curtails the already limited supply of high quality stockers and feeders to which our Corn Belt feeders have access. Already the shifting of Canadian buying from the United States to Great Britain is having a noticeable effect upon some of our industries.

"Illinois farmers hope that the Tariff Commission can see its way clear to recommend to the President a reduction in the tariff on Canadian cattle, which at the present time is from 1½ to 2 cents a pound, based upon the weights of the animals," says a statement from the I. A. A. Live Stock Marketing Department. "The President has authority to reduce this rate 50 per cent. Such a reduction would bring Canadian cattle back into our markets."

TO THE VICTORS

Here is the cup presented by the Illinois Agricultural Association to Harry and Walter Torbert, of the DeWitt County Farm Bureau, winners of the state horseshoe pitching tournament for the farm bureau championship, at the State Picnic, Urbana, June 29.

E. L. Bill Hired As Director of I. A. A. Publicity

L. J. Montross, present Director of News-Publicity for the I. A. A., has accepted a position as special writer for a New York City advertising agency. He will leave for New York early this fall.

E. L. Bill, Wheaton, Ill., at present Director of Publicity for the Holstein-Friesian Association of America, has been employed as Director of News-Publicity to succeed Mr. Montross. The date upon which he will take up his new duties has been announced as August 1.

Mr. Bill will work with the present personnel of the department until Mr. Montross leaves, making a special publicity survey.

Mr. Bill was the first director of publicity for the I. A. A., from 1919 to 1921. He resigned in March, 1922, to become secretary of Homestead Films, Inc., and later became a member of the national Holstein-Friesian organization.

The forecasts of wheat production for 16 countries in the Northern Hemisphere is about 1,878,000,000 bushels compared to 1,754,000,000 for 1922, according to the International Institute of Agriculture at Rome. This is a 7 per cent increase.

FARM BUREAU FOLKS PROVIDE VACATIONS FOR 400 CITY 'KIDS'

Outings Project Receives Favorable Comment From All Over Country

Again the members of the Illinois Agricultural Association and Illinois county farm bureaus have shown that times can never be so hard down on the farm but what the farmer can extend a helping hand to the less fortunate. More than 400 requests for children of the Chicago slums for two-week outings in homes of I. A. A. and farm bureau members have been received this summer, according to a recent check-up.

The project is carried on in co-operation with the United Charities of Chicago, and the Chicago Daily News. The charitable organization supervises the children and makes them ready, the railroads furnish free fare, the Daily News provides money and publicity, while the farm bureau folks have acted as hosts.

The generosity of Illinois farmers in this project has aroused newspaper comment all over the country, not only this year but during the last two years, when it was in operation.

One of the most remarkable features of the project is the fact that most of the people who took children last year have called for the same ones this summer. The following are a few of the communities to which parties of children have gone in the last week or two: Viola, Aledo, Seaton, Joy, Geneseo, Cambridge, Hopedale, Shelbyville, Tower Hill, Kirkwood, Monmouth, Mokena, Joliet, Union Hill, Bonfield, Lomax, Galesburg and Oneida.

Too Many Food Dealers In U. S., Says B. F. Yoakum

The United States has a 19,000,000 food-dealer population to a 33,500,000 farm population, or one food dealer to each one and three-fourths of the 6,500,000 farms, according to B. F. Yoakum, Market Commissioner of New York.

This is one reason why the farmers are not sharing to a larger extent in the general prosperity, points out Mr. Yoakum, as it is "too great a burden for any business to carry."

Farmers May Gain Much By Organization--Gompers

"Labor has long since abandoned any hope of salvation through politicians," said Samuel Gompers, president of the American Federation of Labor, in his National Wheat Conference address. "If the wage earners of our country had not the sense and courage to organize, nobody would have much sympathy for them and nobody would take their complaints very seriously.

"Gentlemen, the temptation to say 'Go thou and do likewise' is almost beyond my power to resist. Organization will enable the farmer to pool the thought and the power of the farming industry for a single purpose.

"Wherever there is organization there is a center, a clearing house, for the gathering and disseminating of information of economic experience within your occupation. The records so accumulated will serve to disclose the wisdom or unwisdom of contemplated policies and undertakings. Something like scientific procedure then becomes possible. The recorded experiences of mankind is the only thing that enables us to avoid mistakes that were made a century ago. It is the basis of progress.

"Organization is a means of bringing to a central point for common use the experience of all. Talk and live organization and thus do your bit to put our industry on a plane with other industries of our land."

The I. A. A.—

Looking Into The Future

RELIABILITY OF SERVICE

Whatever the problems of Illinois agriculture for 1925 and 1926 may be, the Illinois Agricultural Association is here to meet them and to cope with them for the best interests of its members.

I A A

Illinois Agricultural Association RECORD

I A A

Volume 1 | August 20, 1923 | Number 11

EXECUTIVE BOARD DISCUSSES WHEAT SITUATION

EXCESS OF $14,953 FOR I. A. A. DURING FIRST SIX MONTHS

Finances of Association From January to July Are Audited

Every six months a certified public accountant makes an audit of the Association finances. At the August meeting of the Executive Committee, Treasurer Robert Cowles presented the audit for the first six months of this year.

The audit shows an income of $176,608.20 for the six months ending June 30, 1923.

The total expenses for the same time totaled $161,654.27, an excess of $14,953.93 of income over expenses.

The figure on the balance sheet of the audit which corresponds to net worth of a corporation with capital stock is $198,533.30. Of this amount there are liquid assets, or assets which can be turned into cash any time, to the amount of $109,061.89. Of this amount $22,033.32 is cash in bank or on hand, and $86,928.32 is in U. S. Government Bonds and securities.

In the audit report it is stated: "During the course of our examination no errors were found and we are pleased to report that the records are being kept in unusually good order. The cash on deposit on regular account as reported by the Sycamore National Bank was reconciled with the general books. The petty cash was counted and found to be intact."

Business Men, Farmers Plan Joint Picnic

The Knox County Farm Bureau plans an innovation in the way of a picnic on Aug. 23—a picnic held in co-operation with the Galesburg Chamber of Commerce.

"It is our belief," said L. R. Marchant, farm adviser, "that both farmers and business men will profit from a closer understanding, as well as having a good time together."

J. R. Howard, former president of the A. F. B. F., and Mrs. Sewell, of Indiana, are to speak. Horseshoe pitching contests and baseball games are to be a part of the program.

ANNUAL MEETING AT GALESBURG

The next annual meeting of the Illinois Agricultural Association—the ninth—will be held in Galesburg.

This decision was made at the meeting of the I. A. A. Executive Committee at its session, Aug. 3. The exact date was not set but it was determined that January would be the month.

The county seat and metropolis of Knox County, in northwestern Illinois, Galesburg is well situated to take care of the big convention. The city was the only contender for the meeting before the executive committee.

450 OUTINGS GIVEN AS SEASON CLOSES; REQUESTS COME YET

A few requests for children for outings in the homes of farm bureau members are still coming in, but the project is nearly finished now for this summer on account of the nearness of the time when the youngsters will have to return to school. Practically every county within two hundred miles of Chicago, however, is entertaining young vacationists at this time.

The total number of outings provided, according to present indications, will fall not far short of 450.

"For the third summer," says Secretary Jones, of the United Charities of Chicago, "members of the I. A. A. and county farm bureaus have contributed nobly to this cause. They have the undying gratitude of hundreds of Chicago families to whom these outings have in many cases meant almost life itself."

Carroll County Plans Pageant At Fair, Aug. 29

A pageant to portray the last hundred years of the history of Carroll County is planned for the county fair of August 29, 30 and 31, with officers and people of the Carroll County Farm Bureau taking an active part. Miss Nina B. Lamkin, who directed the I. A. A. Farm Bureau Pageant at the Farm Bureau Decennial Celebration, DeKalb, June 30, 1922, is pageant director.

A great parade will conclude the three-day program.

SEEING THINGS

16,500 lb. Hog Minimum Case Won by A.F.B.F.

The Farm Bureau has won its hog minimum case.

The Interstate Commerce Commission has ruled that, beginning October 13, 1923, 16,500 pounds shall be the prescribed minimum for the loading of hogs.

Seventeen thousand pounds in the present minimum. The American Farm Bureau Federation was able to establish the fact that the 17,000 minimum increased the risk from overloading to a costly degree.

Federation officials state that with the new minimum savings in freight plus reduction in risk, the saving will average more than $1.50 a car.

In 1922 on twenty markets there was received 402,000 carloads of hogs. From these figures it is estimated that a yearly saving of $603,000 has been made for farmers who ship hogs.

This saving amounts to more than three times the annual cost of running the American Farm Bureau Federation.

Producers' Main Office Moves; More Business

The National Live Stock Producers Association has moved their office from the twelfth floor to room 1976 of the Transportation Building at 608 South Dearborn Street, Chicago. This move was made necessary by the growth of the business.

Executive Board To Spend One Day With Departments

The next meeting of the Executive Committee of the Illinois Agricultural Association will be held at the offices of the organization in Chicago on September 7 and 8. One full day of the two-day session will be devoted to the visiting of the various departments of the I. A. A. by members of the committee.

Members of the committee plan by this means to keep in closer touch with the details of the work than would otherwise be possible. Directors of the various departments will give half-hour talks, explaining just how the duties of their various departments are carried on.

The same plan was carried out with great success late in July by a meeting of the I. A. A. solicitors who are working in connection with county farm bureau campaigns.

'CO-OP' MARKETING OFFERS ULTIMATE SOLUTION, BELIEF

Illinois Seen As One of Offenders in Keeping up an Extended Acreage

To relieve the wheat situation comes the suggestions that farmers withhold wheat from the market by warehousing on the farm, that a reduction be made in acreage, and that the Government take a hand in the situation.

The Illinois Agricultural Association Executive Committee discussed these questions at its August meeting, to determine if the basic principles are correct.

Farm Warehousing

It is the opinion of the committee that warehousing wheat on the farm in Illinois could not carry any degree of guarantee of safe storage for the reason of the hazards of wheat weevil and heat in the bin. Farm granaries do not have the necessary facilities for moving and turning wheat in the bin. Further on this subject is the fact that Illinois wheat is now going to market, a late date to carry on an effective campaign for farm warehousing.

Acreage Reduction

On the questions of a campaign to reduce acreage and of holding wheat on the farm for a set price on certain date, the committee concluded that it would not be wise to advise members to carry on a campaign, for the reason there is no protection or assurance of getting the desired result. Similar campaigns heretofore have not proven successful.

However, it was brought out that on the basis of pre-war acreage, Illinois is one of the chief offenders in maintaining an extended acreage of wheat. It is the belief of the committee that

Federated Holds a Conference in Detroit Aug. 9-10

The meeting of the directors of the Federation Fruit and Vegetable Growers, Inc., which was to have been held in Chicago, on Aug. 13, was held in Detroit, Aug. 9 and 10. The change in the date was made in order that directors might attend the annual meeting of the International Apple Shippers in Detroit.

Illinois Agricultural Association
RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by News Publicity Department, L. J. Montross, Director.

Entered as second class matter Oct. 10, 1918, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 21, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of ten cents for subscription to the Illinois Agricultural Association Record.

ORGANIZED EFFORT SEEN TO DISCREDIT CAPPER GRAIN ACT

Misleading Statements About Law Are Spread—No Basis For Accusation

There appears to be an organized effort by the grain trade to discredit the Capper Tincher Act. In numerous press statements the grain trade blames the Capper Tincher act for the low price of wheat. The contention is that the new law has restricted speculation which has resulted in a decline in the price of wheat.

The Capper Tincher Act does not in any way restrict legitimate speculation, according to the many statements of the Department of Agriculture, which administers the act. It does restrict manipulation of cornering of the market. If Speculation has decreased it is reasonable to believe that heretofore there has been speculation not legitimate.

Trade Claims

Claims of the grain trade have always contended that it is supply and demand that makes the market. Now the grain trade says it is a lack of speculation, and not supply and demand. If this is true, it is time the farmer was finding out the truth about it.

Again it is a fair question to ask why the claimed decline in speculation caused by the Capper Tincher Act has not had the same effect on corn and it is claimed to have wheat prices. According to the word of T. J. Duvel, Supervisor of the Chicago Grain Exchange under the Capper Tincher Act, the act does not have anything in it that the board of trade rules do not already require.

Fair Trial

The Illinois Agricultural Association used its influence to secure the Capper Tincher Act and it now wishes to see the Act given a fair trial.

In answer to a St. Louis banker who asked that the Department of Agriculture not restrict the volume of trading so speculators would be encouraged, Assistant Secretary C. W. Pugsley has this to say. "Continued agitation by the grain trade in regard to these reports exposed it to the suspicion that there is something to conceal which might result in increased criticism and even further legislation of a more drastic character before the actual facts regarding futures trading can be assembled by this department."

'Co-op' Marketing Seen As Wheat Problem Solution

(Continued from page 1)

every member should take this fact into consideration in planning the 1924 crop program. To advise a twenty percent reduction by every wheat grower would not be wise for there are a number of factors on every farm that rightly enter into the decision of amount of reduction.

Government Participation

Government participation has been suggested by setting a minimum guaranteed price, and by setting up a wheat corporation to buy wheat of farmers and sell it to foreign nations. All of the discussion on this subject was opposed to asking the U. S. Government to participate on any basis so far suggested.

Chief among the arguments opposing Government taking action are:

It will mean an expenditure of money that will later rebound to the farmer in the form of taxation.

It would set a further precedent for all other industries to call on the Treasury when in trouble.

It is dangerous to put the fixing of wheat price into the hands of the public, giving opportunity of less control by the producer than he now has opportunity for.

Information Lacking

The discussion brought out the fact that at best, complete and reliable information on the facts of wheat production, consumption, demand and surplus, is lacking. The fact remains that wheat is in the neighborhood of 85 cents a bushel at the country elevator and the wheat dollar is worth about 69 cents when it comes to purchasing the things the farmer uses, as compared with full value in 1913.

Meeting Crises

Various means are being used by the farmer to meet this crisis. Already there has been an unheard of economy.

Any considerable amount of further economy will have a very definite effect on the value of the farm dollar. On this side of the question are other protections every individual can make use of for himself, those of diversified farming and economical production. Illinois is especially well adapted to diversification. To have a variety of crops prevents a total loss when one crop does not pay. Surely the man who produces wheat at the cost of $1.00 a bushel is better off than the man who produces wheat at the cost of $1.25 a bushel. Economical production is a factor.

In discussing economy, diversification and economical production, it was realized that they are but fragments of the real problem, but it is the belief that their practice will be helpful in the present situation.

Co-operative Marketing

The whole problem was recognized as an economic problem which will be solved primarily by self-help through organized agriculture and through the application of business principles to marketing as well as production.

In the opinion of the committee co-operative marketing offers more to ultimately solve the problem than any other one thing in sight. At the same time it was recognized that this remedy is not a quick relief measure, but just because it is a fundamental, will require considerable time to get results.

PRODUCER EARNINGS REACH $140,000 FOR FIRST FIVE MONTHS

Total earnings of the Live Stock Producers Commission Companies for the first five months of this year were $140,000, according to a report recently made by F. M. Simpson, general manager of the National Live Stock Producers' Association.

The report continues:

"During 1922, producer agencies affiliated with the National Live Stock Producers' Association, handled 18,590 cars, which were valued at more than $26,000,000, and represented 6.6 per cent of the total receipts handled by the six markets where our offices were operating.

Gain in 1923

"For the first five months of 1923, the Producers handled 20,719 cars, which was more than they handled during the entire year of 1922, having a value of over $37,000,000. This business represented 8.5 per cent of the total business of the markets where Producer agencies are operating.

"In the eighteen months of operation three Producer agencies have refunded in commissions more than $170,000 and more than $17,000 in membership fees. Three offices have abolished the membership fee entirely and five have started without and membership fee.

Big Increase

"The six months' period ending June 30 shows an 83 per cent increase in business over the first six months in 1922 for the St. Louis Producers. Further, this 83 per cent increase in business shows a 114 per cent increase in savings. Evidence that the greater the volume the greater the saving.

"St. Louis Producers are averaging 14 per cent of all live stock consigned to that market.

"A report from Indianapolis shows 1,219 cars handled in June by the Producers at that market. In June, 1922, the Indianapolis Producers handled just half that number."

I.A.A. REPRESENTED ON EGG COMMITTEE TO FORMULATE PLAN

J. D. Harper Named On National Body; Progress Already Made In State

J. D. Harper, Assistant to the Secretary of Illinois Agricultural Association has been appointed a member of the National Egg Marketing Committee by Chairman, Mrs. W. C. Martin. This Committee is the result of an egg marketing conference called by the American Farm Bureau Federation.

Illinois Progress

Mr. Harper says that Illinois is one of the mid-west states that has demonstrated co-operative marketing of eggs in a limited way. Experience in Shelby and Hancock counties points to the fact that the successful marketing of eggs co-operatively, depends in a large measure on high quality and a sufficient quantity of standardized grades.

Plans are under consideration to co-operate with all agencies to put a higher grade of eggs on Illinois farms by working under Senate Bill 460, the new standardization law. Mr. Harper states that Wisconsin has placed 4,000,000 standard baby chicks from standard inspected flocks under state supervision on Wisconsin farms under a similar law. The new Illinois law will benefit producers in the way of increased price for better quality of eggs, and may easily change completely the poultry population of the state in five years.

Other Members

Other members of the National Committee are as follows:

James L. Whetsel, Vineland, N. J., President, Atlantic Coast Egg Producers Association; L. R. Simons, Ithaca, N. Y., Secretary, Marketing and Transportation Committee, N. Y. State Farm Bureau Federation; Mrs. H. W. Lawrence, Monroeville, Ohio, member Executive Committee, Ohio Farm Bureau Federation; C. R. George, Indianapolis, Ind., Director Dairy and Produce Marketing, Indiana Farm Bureau Federation; Robert W. Bingham, member Executive Committee, Kentucky Farm Bureau Federation; A. S. Chapin, Cookesville, Tenn., poultryman; C. E. Hearst, Cedar Falls, Ia., President Iowa Farm Bureau Federation; J. S. Jones, St. Paul, Minn., Secretary, Minnesota Farm Bureau Federation; Benjamin Brown, Salt Lake City, Utah, President, Utah Poultry Producers, Inc.; J. H. Barber, Petaluma, Cal., General Manager, Pacific Coast Egg Producers' Association.

CROWDED OUT

ON account of the importance of the conference held at Centralia, an account of which is contained in this issue, and of the wheat marketing situation, the usual articles about a co-operative marketing association and a department of the I. A. A. are omitted in this issue.

This series, however, will be continued as before.

Policies of Illinois Fruit Marketing Are Discussed in Meeting at Centralia

What shall be the future policy of co-operative marketing of fruits and vegetables? That was the subject of discussion at a marketing conference held at Centralia, August 7, called by the Illinois Agricultural Association. In approaching this question, the past and present conditions and factors were reviewed by growers and representatives of the Illinois Horticultural Society, Horticultural Department of the University of Illinois, Department of Agriculture at Springfield and Illinois School Exchange.

Seventy fruit growers from sixteen counties attended. A. O. Eckert, chairman of the Fruit and Vegetable Marketing Department of the I. A. A. acted as chairman.

The discussion was with particular relation to the Illinois Fruit Exchange, a going co-operative marketing organization with headquarters at Centralia. The Fruit Exchange has a membership of about 900 and 21 fully formed local organizations, 12 of which have their own packing houses. Last year 500 carloads of apples, 450 cars of peaches and 100 cars of miscellaneous fruits and vegetables were sold through the Exchange.

Surveying production of fruit in southern Illinois, Prof. W. S. Brock, representing the Illinois Horticultural Society, stated that the production of early apples is now nearing the saturation point. Observation and the figures of nurserymen indicate to Prof. Brock that the planting of early apple trees is going on at a rate that will be hard to keep up with in marketing.

No Statistics

"There are not reliable statistics on this question," stated Mr. Brock. "The production of late apples is not alarming and if in any direction, is on the negative side," said Mr. Brock.

Last year southern Illinois shipped out between 2,500 and 3,000 cars of peaches. A few years back this figure was in the neighborhood of 500 cars. Mr. Brock concludes from his survey and observation that the peach crop is liable to reach 6,000 or more cars next year if there is a full crop. The cause is an enormous increase in planting of trees in the past several years.

"This increased production means that our present manner of distribution will fall down," he said. "Care in distribution is needed."

Self Help

Telling of the work and problems of the Fruit Exchange, Manager A. B. Leeper said that it is a problem of fruit growers themselves. "Nobody is going to improve marketing conditions but you."

Several times in the conference it was expressed that standard grades and rigid inspection is one of the first principles that co-operative marketing must put into effect. H. W. Day, of the Department of Agriculture, explained the new Standardization and Inspection law. In co-operation with the U. S. Government the Illinois Department of Agriculture will inspect and issue a Government Certificate on carlots of fruits and vegetables. Mr. Day explained that a certificate will be an insurance of grade and quality to the prospective purchaser, and thus would act as a silent salesman. It would act as a protection to the grower when his produce got into the hands of unreliable buyers who wanted to doubt the quality or grade of produce.

The Department of Agriculture has already employed two men to do inspection work. The Fruit Exchange has stated its intention to make use of this service in shipping peaches. A charge of $5.00 a car is made for this service by the Department. There is nothing in the law that compels growers to have their products inspected. It is a service offered to them.

Peteet Talks

"The aim of co-operative marketing is to substitute merchandising of farm products for the old practice of blind selling and dumping," said Walton Peteet, Director of Marketing for the American Farm Bureau Federation. "Dumping means giving the markets more than they can consume. It means forcing the sale of products. Blind selling is the selling without knowledge of supply, demand, absorbing power of the markets and grade and quality of products.

"As long as we continue to dump our products and to sell blind, we cannot expect to stabilize our markets. Stabilizing means selling like the grocer sells—He doesn't try to sell his summer goods in the first ten days of summer weather. The fruit grower must merchandise his products.

First Principle

"Standardization is the first principle to merchandising or selling through co-operative organizations. There will never be a profit in selling ungraded, bulk products. Second comes the proper package. A study must be made of commercial practice and consumer demands."

Other principles outlined by Mr. Peteet are the extending of demand, handling of surplus and to sell at the point of consumption rather than at home.

To carry out this program Mr. Peteet recommended a strong local organization of growers of one commodity or closely related commodities, as the first step. Second, a state or district organization of the locals, and ultimately a coordination of all state or district associations into a national federation.

Contracts and Pooling

Binding members to sell through their organization by contract and the pooling of products were both recommended as basic principles of success. Contracts to insure the organization of produce to market and furnish a basis for financing, Mr. Peteet stated: "There can be no intelligent merchandising of products without pooling."

Farm Adviser E. W. Rusk, of Macoupin County, asked what arguments could be used to convince large growers to 40 to 150 acres who have developed into salesmen and are satisfied with their results. Mr. Peteet said that the satisfactory price or premium price that the large grower is receiving is based on the present market, which is set by the many little growers. Mr. Peteet believes it is to the interest of the larger grower to get into the co-operative organizations and help get a better market price. He said it is not the only duty of the co-operative marketing organization to sell well on a bad market. The large grower is now carrying most of the cooperative marketing associations.

Perfect—Expand

The suggestions of Mr. Peteet for the improvement of the Fruit Exchange were to perfect and expand the present organization by all organizations represented at the conference working together.

Mr. Peteet further recommended that the Illinois Agricultural Association help and assist in financing co-operative marketing organizations until such time as the co-operative can stand on its own feet. At that time the co-operative marketing association should repay the State Association, in the opinion of Mr. Peteet, so that the same money can be used to foster other organizations.

Secretary George A. Fox, of the Illinois Agricultural Association, approved this plan in the main, however, added that sometimes the plan of organization offered by co-operative associations had not warranted the association lending its assistance.

CHAIRMAN

A. O. ECKERT

Rock Phosphate Sales For July Make a Record

Sales of rock phosphate for July were higher than for the same month of the past two years, says the Phosphate-Limestone Department of the I. A. A. The use of rock phosphate at this time is more with the idea of more production per man which means production at less cost, than with the idea of increasing production.

Overloading of Live Stock May Cause Big Loss

In many instances the Transportation department of the I. A. A. has found erroneous freight charges on mixtures of calves with other species of live stock.

The department urges livestock shipping association managers and others interested to submit copies of account sales on shipments containing mixtures of calves with other kinds of livestock in order that the freight charges on such shipments may be verified.

A FARM BUREAU SERMON

By the Rev. John Acheson, Princeville Ill., Farm Editor of the Peoria Transcript

In the ninth chapter of First Corinthians Paul says: "I fight, not as one that beateth the air."

This expression in the oldest book in all the world opens up an interesting trend of imagination for people who oppose present-day boxing methods.

There is every reason to believe that Paul was referring to some kind of a boxing bout when he wrote this letter to the church at Corinth. True he was pointing a lesson in Christian method when he referred to the manner of his fighting; he also hinted that he knew quite a lot about the ringside vernacular of that time. It must have been honest-to-goodness boxing, too, for he says, "not as one that beateth the air." In other words, he means he landed his punch whenever he could, and there may have been some blows of the knockout type, too.

We are all in a fight of one kind or another, and there is a lesson for all of us in the reference from Paul's writing.

There should be aim. Little Willie Green can put the gloves on and swing his arms about like an old dilapidated windmill wheel in a March gale and get no place in the bout, while a skilled boy in the use of the gloves will accept every opening with a punch and win the decision of the referee and the applause of the crowd.

Here we are, farmers and all other classes, some are beating the air, and at the end of each year have made no progress, and wonder what the trouble is, and become disgruntled with themselves and every one else. Others spar for every opening and get along in the game of life.

Farmers need to fight right. When every farmer was going his own way, without an organization, letting the winds of chance drive him every way, he was beating the air. Some are still swinging without aim, but the great mass of farmers today are fighting their battles with a well organized plan. The A. F. B. F. and the I. A. A. for Illinois, with wise leadership, is helping him to hit the mark of success in his business.

There never was a time in the history of agriculture when farmers needed organization so much as at present. It would be a sham fight, the pity of the age, to see the greatest industry in America swinging its arms as "one that beateth the air."

—The Peoria Transcript.

There's a Long Way To Go Yet in 'Co-op' Marketing

When the livestock marketing work first started several years ago the ultimate goal was to stabilize markets. The co-operative shipping association was recognized as the first step and the co-operative commission company, second, and before stabilizing markets it was said that a volume of business must be had.

We are in the second year of the program. There are 11 co-operative commission companies in operation, three of them in Illinois. The first year the National Live Stock Producers did a business of 26 millions of dollars. The first five months of the second year it did a business of over 37 millions of dollars.

It sounds big but it is only 8½ percent of the whole business. This percent is a little higher in Illinois. There remain 52 markets on which there are no co-operative commission companies.

It is very plain that before starting a program to stabilize, our duty is to perfect our present organizations, widen their business and enter other markets as the time is opportune. This is the program of the National Live Stock Producers. It is not spectacular and it will be harder to follow than the period of organization. Some will get out of patience and may condemn the work for not reaching the ultimate goal sooner. The real friends of co-operation will recognize the problem and will do their share in this period of growth and perfection.

The I. A. A.—

Persistency of Service

KEEPING ON THE JOB

For three years the Illinois Agricultural Association has given constant, untiring effort to problems of our agriculture—marketing and taxation being prominent examples.

New State Department of Standards Created

ILLINOIS TO HAVE NEW DIVISION OF STANDARD GRADES

Office Credited By S. B. 460; H. W. Day To Head Work

You didn't hear so much about Senate Bill 460 when the Illinois Legislature was in session. It is now a law and it says that the Department of Agriculture can fix standard grades and standard packages of farm products.

Director B. M. Davidson of the Department of Agriculture has established a new division in his department to have charge of the inspection and standardization service authorized under the law, and a Farm Bureau man has been named to head this new work.

Day Employed

H. W. Day, for three years associate Farm Adviser in Cook county, has been employed to head this work. Mr. Day was raised in Shelby county, Illinois and is a graduate of the University of Illinois. Later he was on the staff of the Horticultural Department of the College for several years.

Let's see what this means to Illinois agriculture:

One of the first things that the fruit exchange found out was that it was necessary to have a standard product before a reputation and name could be gained. It was not profitable for every grower to have his own standard for grading and for every fellow to put up the kind of package that looked best to him. It meant that when the commission man found a consignment on the door step from Illinois, there was no way of telling just what quality it was. There was no standard, and no guarantee, or reputation for the package. Of course the result was in terms of less money to the grower.

Other lines, too

If Illinois enters poultry or egg marketing work, the first question up will be a standard grade and any kind of package and here is a law that will take care of it. The new law takes in all kind of farm products.

Before standard grades or packages are determined upon the Department makes an investigation and holds public hearings.

Several conferences of growers were held at Carbondale, Centralia and Quincy by Director Davidson to explain the new law and to secure the advice and cooperation of growers for putting the new law service into operation.

Both the Fruit and Vegetable Marketing Department and Legislative Committee of the I. A. A. had a big hand in securing the new law. A standard product is one of the very first business principles in cooperative marketing. This is a very definite forward step.

New York farmers who pooled wool this fall will receive far higher prices than those who didn't, according to F. E. Robertson, manager of the New York State Sheep Growers' Co-operative Association.

APPOINTED

H. W. DAY

I. A. A. MEN APPEAR BEFORE 16 COUNTY BOARDS OF REVIEW

J. C. Watson, Statistician for the I. A. A., has appeared before Tax Boards of Review in thirteen different counties, assisting County Farm Bureaus to get adjustments on valuation of farm lands and farm animals. G. E. Metzger, of the Organization Department, has appeared before three additional counties, making a total of sixteen.

Doing this work in cooperation with County Farm Bureaus, information was presented on the levels of the different classes of property used in assessments for tax purposes. In most cases, Mr. Watson states, land was assessed considerably higher in relation to its value than town and city lots. In some counties all property was assessed higher than the general average of property in the state.

All of the facts presented were based on sale value and full valuations of real estate sold within the last few months and upon a comparison of average full valuations and average Department of Agriculture estimates on values of farm animals.

Counties in which hearings have been held with Boards of Review are Champaign, Shelby, Clinton, Cass, Macoupin, Johnson, DuPage, Kane, Marion, Clay, Montgomery, Franklin, Richland, Lawrence and Stark. Hearings are scheduled in several other counties.

East and West Hold Big Group F. B. Conferences

Two state federation group meetings were a part of farm bureau national activities during August. In the West representatives from six states met at Salt Lake City. Eleven states were represented at the annual eastern get-together, held at Albany, N. Y., on the same two days, Aug. 2 and 3.

J. W. Coverdale, A. R. Simpson and E. P. Taylor, of the American Farm Bureau Federation, were present at the western meeting.

The meeting at Albany was presided over by Enos Lee, president of the New York State Farm Bureau Federation.

ANALYSIS MADE OF MILK SITUATION IN CHICAGO DISTRICT

Prof. H. A. Ross Carries On Dairy Research Authorized By I. A. A.

More than a year ago the Executive committee appropriated $750 for the purpose of helping pay the expense of carrying on some special dairy research work. At that time it was the opinion that more facts and information were needed to go forward with cooperative marketing in the most intelligent manner.

This belief was sustained at the Executive Committee meeting held August 3, when Prof. H. A. Ross, of the University of Illinois who was employed to carry on the work made a preliminary report to the committee. Only a few fragments of information are ready for announcement. A full statement of Prof. Ross's findings will be in the hands of the association later.

The study aims at a thorough analysis of the milk market situation in the Chicago distr.ct. Prof. Ross declared that the big problem centers around the surplus supply of milk.

His Statement

Following is the statement:

"The Chicago dairy district has grown rapidly in the last few years, extending further and further into Wisconsin. Here is found a tremendous reservoir of milk that is now made into butter or cheese or is condensed. A difference of only 5 cents cwt. in the transportation rate makes this great supply of milk available for the Chicago market. This difference in the cost of transportation is not sufficient to counterbalance the lower cost of production of the Wisconsin farmers, which is due to lower wages, cheaper land and higher producing cows.

"The tank car system which is already being used by two Chicago dealers makes economical the bringing of milk from long distances. Milk is shipped in this manner a distance of 118 miles at a cost of 27 cents cwt. The rate for milk shipped in ten gallon cans from the same point is 46 cents cwt. Handled in tank cars milk can come great distances at lower cost than it can be shipped in eight or ten gallon cans from points comparatively near the city.

Have Advantage

"On the other hand Illinois dairymen have the advantage of a large investment in country plants, the successful competition of motor trucks with the railroads and a more uniform seasonal production of milk. These will tend to keep dairying in Illinois.

"The surplus production in one season and the shortage in another increases the cost of handling milk and necessarily increases the margin between the price paid by the consumer and that received by the farmer. Consumption varies from month to month and even from day to day, but this variation is less than the variation in production. By adjusting production to demand, prices will not only be stabilized, but the dealers' margin can be decreased. This means lower prices to the consumers, greater consumption of milk and higher prices to the producers."

Too Many Dealers

Another point brought out by Prof. Ross was the fact that there are too many milk dealers in Chicago. He said that a few companies could do the same work of the many and do it more efficiently and at less cost. The small dealers must travel a long way to sell his milk and must "kid" the house wife to keep her in good humor. This makes his cost more and it makes it possible for the larger companies to charge more.

Several times in the committee meeting, members commented on the fact that this basic research work, getting at the real facts of the situation, was needed for all commodities. Secretary Fox expressed the opinion that the University should supply this sort of information.

Offer $900,000 In Prize Money To Boys, Girls

Nearly $900,000 is being offered in prize money by all agencies in the support of boys' and girls' club work in the United States in 1923. The amounts range from a few hundred dollars in some of the smaller or more sparsely settled states to as high as $75,000 in the larger and more thickly populated states.

This total exceeds considerably the amount offered last year, $734,000, and is an indication of the increased interest in the club movement.

Out of thirty-five states reporting, sixteen have state club buildings, most of them located on the state fair grounds. The best of these buildings cost from $15,000 to $35,000.

A number of the expositions have provided space in their regular buildings to care for club members, exhibits and demonstrations, while a number furnish tents.

Five Counties Start Drives During August

Five counties are scheduled to start reorganization campaigns during this month.

Piatt and Monroe County Farm Bureaus will lead off with drives on the same day, August 13, proving that they're not superstitious.

Schuyler, Scott and Jo Daviess counties have arranged for their campaigns on Aug. 20.

New Hampshire Celebrates Its Tenth Birthday

The Decennial Anniversary of the Farm Bureau in New Hampshire was celebrated in connection with the annual Farmers' and Homemakers' Week at the University of New Hampshire, August 14-17.

Aug. 17, Friday, was celebrated as Farm Bureau Day.

A. O. ECKERT NAMED AS A DIRECTOR OF FEDERATED GROWERS

I. A. A. V. President Appointed At Detroit; Represents Illinois Exchange

A. O. Eckert, Vice-President of the Illinois Agricultural Association, was elected to the board of directors of the Federated Fruit and Vegetable Growers, Inc., at the meeting in Detroit, August 10. Mr. Eckert will represent the Illinois Fruit Exchange on the board.

A. B. Leeper, manager and Loomis, Vice-President of the Illinois Fruit Exchange, both attended the Detroit meeting. These men state that the Federated Fruit and Vegetable Growers is now doing business far in advance of expectations. Manager Leeper says the Illinois Fruit Exchange is well pleased with the selling service it has received from the Federated.

At 100 Markets

The Federated has sales representatives in 100 markets of the United States. In fourteen of these markets the Federated has its own office and representatives. To the fruit grower of southern Illinois who has a carload of peaches or apples to sell, this means he has the advantage of the salesmen of all of these markets, says Mr. Leeper.

Other Members

Other members elected to the Board of Directors of the Federated Fruit and Vegetable Growers, Inc., are J. A. Worman, representing the Wenatchee-Okanagon Cooperative Federation of Okanagon, Washington, and John Walangdon, representing the Inland Empire Cooperative Association of Walla Walla, Washington.

E. T. Early, representing the Mutual Orange Distributors of Los Angeles, California, was elected to the Executive Committee to fill the vacancy caused by the resignation of C. E. Durst. Mr. Durst was recently employed as Secretary for the association.

Live Stock and Meat Board To Continue Work

The National Live Stock and Meat Board, at a meeting held in Chicago, organized a comprehensive educational program for the coming year. This program is designed to promote knowledge of the food value of meat and to teach how to select and prepare it.

R. C. Pollock, secretary of the board, reviewing Meat for Health Week, declared that more than four million pieces of educational literature had been distributed. Howard Leonard, President, Thomas. E. Wilson, Vice President and E. C. Brown, Treasurer, were reelected unanimously.

The American Farm Bureau Federation urges shippers to load promptly and load to capacity in order to avoid another car shortage this fall.

"FOLLOW TAX LAW," SAYS FARM BUREAU TO VERMILION BOARD

Danville Taxed 36 Percent—Farm Lands 52 Percent Of Sales Values

"We want you to carry out the spirit of the law," John Watson was saying. "We insist on equalization in Vermilion County. Farmers are asking no favors. They will gladly bear their share of the tax burden."

Mr. Watson, in charge of tax work for the I. A. A., was talking to the Vermilion County Board of Review at a public hearing. About fifty people were in the room; farmers, real estate men and representatives of the Chamber of Commerce. On the table was a stack of 226 cards, evidence on the tax situation, which the County Farm Bureau had gathered.

"The U. S. Government says land values are lower this year than last year or any other year since 1916," Mr. Watson said. "At the same time city property has increased in value. On these cards is the actual selling value of city and country real estate, and on each is the full assessed value for the same piece of property for this year. We don't care anything about individual cases, but we are mighty interested in the averages. You are welcome to take these cards and verify the information on them. We know that this is not a perfect method to find the value of property, but it is the best way there is. If the Board of Review waits until it finds a perfect method it will never make any change."

Mr. Watson proceeded to tell the results of the Farm Bureau investigation.

Farms Assessed Highest

The city of Danville is in two townships. Twenty-one sales of real estate in Danville in Newell township proved to be assessed at 33.8 percent of their actual sales values. Danville in Danville township is assessed at 36.1 percent of the actual sale values, based on 98 sales.

Georgetown is assessed on 43.6 percent of the actual sale values, based on 32 sales. In Hoopestown, 36 sales showed that real estate is assessed at 46 percent of their sale values. Thirty-nine sales in other towns and villages of the county showed that real estate is assessed 43.4 percent of their sale values.

Farm land is assessed 52.7 percent of the actual sale values, based on 69 sales. Farm land is assessed on about fifty percent more of the sale values than property in Danville.

"Are you going to allow one class of property to pay fifty percent less than another?" Mr. Watson asked the Board. "If so, why did you take the oath of office?"

There wasn't much left to say when Mr. Watson finished. Or at least there was little said.

President C. R. Finley says the Farm Bureau is going through to the end to get results.

No Wheat Price-Fixing, Say I. A. A. Delegates

Voting Delegates at the 1923 annual meeting of the I. A. A. were invited by the Record to express their opinions on the wheat situation. Letters have been received from three. Here is what they say:

L. M. Swanzey, President of the Stephenson County Farm Bureau, says, "We believe the production scare has been overdone. There was too much paper publicity. We feel the Government fixing the prices is wrong either for the farmers or for the railroads because other evils are invited. We advise holding reasonably. Also marketing sympathetically and to keep out of politics."

Tariff and Leaders

Matt House of Franklin County says, "Wheat is a crop that can be held on farms for long periods and should be the easiest to market at satisfactory prices. Farmers had in their possession all the wheat except the carryover. With the co-operative laws we now have and loans from Federal banks on warehouse certificates, all we need as farmers for any price we ask is a tariff sufficient to keep out foreign grown wheat and a leadership that can organize the farmers who grow wheat. To market it collectively through their marketing association and the same tactics applied to other crops may be equally successful if we control production."

Pooling

"I am opposed to any kind of price fixing by the Government. Price fixing of wheat and failure to restrict the prices of other commodities has already cost the farmers untold millions of dollars," writes F. W. Tieken, President of the Ford County Farm Bureau. "I believe pooling is the only satisfactory way to control the marketing end of our business. We should have a corporation to handle our grain in an intelligent way, not depending on the refined system of gambling called speculation to make a market for us. Such an organization could keep posted on the food situation all over the world and use this information for the benefit of the farmer instead of the speculator.

"Some industries sell their products at a loss in foreign fields but by the protection of a tariff are able to make up for it at home.

"Labor has an absolute monopoly. Barring imigration removes competition to almost nothing. Grain prices are down to practically pre-war levels while freight, labor and the things we buy are at a war time level and in some instances more. I believe this is because we do not have the same facilities for marketing our products."

Free Live Stock Shipping For Bureau Members

By a new ruling made by the Adams County Live Stock Shipping Association, members of the Farm Bureau are not charged a fee for shipping. Shippers who are not members of the Farm Bureau are charged five cents a hundred pounds in addition to the regular local rate. Formerly all shippers paid a membership fee of $1.00 a year.

F. A. Gougler, Farm Adviser, says this ruling is not having a material effect on the amount of live stock shipped by non-members.

AT THE FAIR

When you attend the Illinois State Fair at Springfield, September 15-22, look for the large tent facing on the main avenue where the I. A. A. and county farm bureaus will provide a rest room and free checking facilities for Farm Bureau folks. The National Live Stock Producers will be associated with the I. A. A. with an exhibit and representatives in this tent. Look for it!

Red Top Growers First To Apply Under Credits Act

The Egyptian Seed Growers Exchange was the first Illinois co-operative organization to apply for a loan through the workings of the new Intermediate Credit Act. A loan of $40,000 was asked for to finance the red top pool through the Federal Intermediate Credit Bank at St. Louis.

Over $3,000,000 has already been advanced through the new credit system. Banks have been established in the same 12 cities as the present farm land banks to lend for periods running from six months to three years on warehouse receipts representing agricultural commodities or discount agricultural paper from regular banking institutions.

The money thus far loaned has gone largely to farmers' co-operative associations in different parts of the country on such commodities as wheat, in Kansas; cotton, in South Carolina; fruit, in California; and live stock, in Nebraska.

THE FARM BUREAU HOPE OF SOLVING PROBLEMS

There has been some criticism of the work of the Rock Phosphate Department, chiefly from outside sources. Some have accepted this criticism at face value and with others it has raised an honest question mark.

This Department invited Farm Bureau Presidents and Farm Advisers to meet with it to talk over the situation. The attitude of the Association was to get full criticisms and suggestions. The result was a frank discussion of the problems involved. It concluded with a unanimous vote of confidence in the work of this Department.

Here is what President S. H. Thompson had to tell that gathering:

"The Illinois Agricultural Association and all of its departments invites constructive criticism and suggestions, but I do not believe it is a good idea to take outside criticism for the truth, without knowing the facts.

"Understand I do not ask you to always follow your leaders on all of the policies laid down, but I do ask you to stick close to the principle that organized agriculture is our hope of solving problems. The principal of the farmer trying to solve his problems through organization is absolutely correct, and this method should not be departed from."

ROCK ISLAND 'CO-OP' OPENS TO RETAIL DAIRY PRODUCTS

I. A. A. Assists In Organizing; Company Has Capitalized At $50,000

Opening of the new Rock Island Co-operative Dairy Company plant took place on Saturday, August 25, when over 1,500 people of that city and vicinity visited the plant and sampled dairy products which were distributed free during the day. The new dairy co-operative was organized by farmers of the Rock Island County Farm Bureau, assisted by the I. A. A. Dairy Marketing Department.

The milk from 750 dairy farms tributary to Rock Island is under contract to supply the new "co-op." Wagons were started on four retail milk routes in the city on the opening day and more will be added as the business of the company expands. A retail room in the plant dispenses fluid milk, ice cream, cream, soft cheese, buttermilk, and butter.

$50,000 Capital

Capitalization of the new dairy co-operative is $50,000, and shares, selling at $100, are held by over 200 farmers of the county and citizens of Rock Island. Officers are Fred Scherer, Milan, president; John Sievers, Milan, vice-president; C. A. Beers, Rock Island, secretary-treasurer; who with John C. Baker, Taylor Ridge; Arthur Van Dale, Taylor Ridge; John Tindall, Milan; and Chas. Blaser, Milan; constitute the Board of Directors. L. A. Finson is manager of the "co-op." His 17 years of experience in the milk trade in Minneapolis gives him a good background for his new work.

The home of the company is a splendid new brick building with the latest and most modern dairy equipment. It represents a total investment of $55,000. The structure is 40x80 feet in size and has a floor space of 6,400 feet. It is now equipped to handle a capacity of 2,000 gallons of milk daily, but is built so that it can be easily enlarged if the volume of business demands it.

The company is stressing the food value of milk in building up its trade. The sanitation of its product is insured by its most modern pasteurization machinery, recording thermometers, cooling and refrigeration system.

Illinois Agricultural Association
RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by News Publicity Department, E. L. Bill, Director.

Entry as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 21, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of ten cents for subscription to the Illinois Agricultural Association Record.

50 CO-OP'S INCORPORATED

Fifty co-operative live stock shipping associations have incorporated in the past year.

In many cases the shipping association is the largest business concern in the community. Incorporation is one of the first principals of business. Without incorporation the association can not sue or be sued. Officers and members of the association are liable and responsible, collectively and individually for debts and claims against the association.

Out of the 585 co-operative live stock shipping associations in Illinois, about 125 are incorporated.

—o—

MR. HILLMAN'S SOW

A purebred Duroc Jersey sow owned by J. W. Hillman, of Farmington, walked through the railroad fence, got on the right-of-way and was killed. The sow was valued at $300. Mr. Hillman took up the matter with the railroad company but failed to get an answer. He then took the case to the Fulton County Farm Bureau and it was forwarded to the Transportation Department of the I. A. A.

After considerable difficulty in getting the railroad to answer, an offer of $100 was made to settle the case. Later the offer was raised to $150. After more letters from the Transportation Department a settlement of $200 was made.

The Transportation Department undertakes to settle railroad loss, damage and freight overcharge claims for all members. Although this is a very small part of the work of this department, 352 claims have been settled this year.

This is a free service to every member.

—o—

FOR EGYPTIAN SEED GROWERS

A storage and re-shipping privilege for Flora has been secured by the Transportation Department on red top seed. It means the seed can be shipped by freight to Flora from surrounding counties, can be stored at Flora for as long as a year and later shipped to its final destination, at about the same freight rate as if it had not stopped at Flora at all.

On a carload of red top seed shipped from Carmi to Flora and later shipped to Chicago, the storage and re-shipping privilege means a saving of $39. If the final destination was Buffalo, the saving in freight would be $43.

FARM LAND TAXES

The Illinois tax law says that all property must be valued at a price that it will bring at a fair voluntary sale for cash. In case of underassessment, which is almost universal in the State, the Supreme Court declares that all assessments must be uniform.

The sales value of farm land has decreased in the past three years, while the value of city property has increased.

An investigation of the I. A. A. in fifty counties showed that farm land was assessed in 1922 at an average of about 50 percent of its selling value, while city property was assessed at less than 40 percent of its selling value.

There is no public body specifically directed by law to find out facts about the valuation of different classes of property for tax purposes.

With this background, a large number of County Farm Bureaus in co-operation with the Illinois Agricultural Association, have carried on investigations to find if farm land was paying more than its share of taxes. From the records in the county recorder's office, a card catalogue has been made of all sales of real estate for a period of several months prior to or including the assessment date. The full assessed values of the same properties were copied from the 1923 tax books. These figures have been used to find what average percent the full assessed values were of the actual sales values.

Here is an example to illustrate the point: In Macoupin County the card catalogue showed that city property was assessed at 31 percent of its actual sales values. Farm lands were assessed at 49 percent of their actual sales values.

In some counties there was not enough difference upon which to base a case. In many counties the figures showed that farm lands were paying more in proportion to their sales value than city property.

The Constitution of Illinois directs that, "The General Assembly shall provide such revenue as may be needful by levying a tax, by valuation, so that every person or corporation shall pay a tax in proportion to the value of his, her or its property." The Illinois Supreme Court has interpreted this to mean, "One person can not be compelled to pay a greater portion of taxes, according to value of his property, than another."

It is the duty of the County Board of Review to carry out the law to the best of their knowledge and ability, and in taking their oath of office they pledge themselves to do so.

With a full understanding of the law and the facts about sales values and assessed valuations of both farm lands and city property, eighteen County Farm Bureaus have held hearings before their Boards of Review.

In some counties the Farm Bureau was welcomed with its information. In a few counties the Boards of Review have resented the presenting of information by the Farm Bureau. In several places the representatives of city property and corporations were present to protect their interests.

RESULTS

In counties where the facts did not warrant a hearing, the information compiled placed the Farm Bureau in a position to protect the interests of land owners in any contemplated change, either by the Board of Review or by the Tax Commission.

Six counties have secured results at this writing.

In Macoupin County a reduction of 33 percent was made in valuations of farm lands.

The Champaign County Board of Review has stated that they will increase city property in Champaign ten percent and decrease farm lands ten percent. A decrease of ten percent in land valuations was made by the assessors last spring. However, investigation proved that city property had also been decreased nearly ten percent at the same time.

The Clay County Board of Review has planned a 25 percent reduction in farm lands and a ten percent increase in Flora real estate.

In Scott County all real estate is assessed at 50 to 55 percent of its value, which is at least ten percent higher than the average of the State. The Board of Review has decreased all real estate ten percent as a result of the Farm Bureau hearing.

Valuations were increased 50 percent in the city of Mt. Vernon, Jefferson County. In five townships, village property was increased 10 to 25 percent—in one township lots were reduced 10 percent and in the other ten townships, town and village property remained stationary. Valuations on farm lands were not changed.

In Peoria County the hearing was intended to convince the Board that the 25 percent average reduction made in valuations of farm lands last spring by assessors was fair and just. No further change has been made to date.

Refusals to equalize are expected in two or three counties. In many other counties a partial adjustment at least is expected. Boards of Review close their books on September seventh.

For two years the Illinois Agricultural Association has been working on the state tax problem. This is the first time the county and local tax question has been approached by the Farm Bureau. Ninety percent of the taxes are paid for local and county expenditures.

—o—

"WHY I DIDN'T RENEW"

A letter was sent to sixty former Farm Bureau members asking them why they did not renew their memberships in the campaign this year.

Ten days after this letter was mailed, eight answers were received. Here are the answers:

"The reason I did not renew my membership in the last campaign, I did not think it was worth the money."—W. O., Mercer County.

"In reply to your letter of the seventeenth, will say the reason that I did not renew my membership in the county, I was not farming, although I know it is a good thing and before I would see them vacate this county, I would gladly renew if I thought that would keep them in the county."—J. D., Cass County.

"I am in favor of the Farm Bureau, but am not actively engaged in farming."—H. Z., Pike County.

"I did not renew because I did not see any of your solicitors, nor did they come to see me, but I will see our County Advisor just as soon as I get a chance, to renew."—M. J. K., Putnam County.

"I think if you will examine your records you will find that W. D. Perry of Table Grove is a member of the association. He and I are in partnership and I was a member of the Bureau for three years and he was not. Now he is keeping up the membership for me the next three years. That is the reason I did not belong to the Farm Bureau."—F. B., Fulton County.

"I have sold my farm and taken up other work so do not think it to my advantage to hold membership in the association."—G. M. W., Lake County.

"The only reason is that I quit farming."—J. W. G., Mercer County.

"I have quit farming and am working in a store."—E. R. W., Christian county.

Lower Land Taxes In Six Counties Result of Reciting Facts and Law

John Watson, in charge of tax investigation work for the I. A. A., says the way most of us express our protest against high taxes is by cussing out the collector when we pay the bill. "Might as well tell the cat," says John, "for all the good it does."

The Farm Bureau has another way of tackling the tax problem. With columns and yards of figures in one hand and the law in the other, Mr. Watson has made a good many Boards of Review sit up and take notice.

For two years this department has been working on the problem of state taxes, and this year for the first time, the Farm Bureau has approached the county tax problem. In eighteen different counties hearings have been held before Boards of Review. At this writing six of them have secured results.

In general, the facts are these: City property is assessed lower than farm lands. However, this is not invariably true. Village property is usually assessed higher than city property. Farm lands have been going down in value and at the same time city property has been increasing in value. There has not been sufficient adjustment to make an equal basis of taxation.

Getting Facts

"The facts of the case within the county, is what counts," Mr. Watson says. So the first thing to do is to make an investigation. To get the sale value of city property and farm lands, the actual sales are taken from the books of the county recorder. These figures are compared with the actual full assessed values of the same properties, taken from the books for the same year.

Many of the Boards of Review invited and welcomed Farm Bureau arguments. Others seemed to resent the fact that farmers are taking an interest in tax problems. In several places there has been some warm battles. But the Farm Bureau policy of having the amunition, the facts, before going to battle has made it necessary for the opponents to do most of the looking on.

Watch Dog Needed

Some of the discoveries made go to show that it would be a pretty good thing to have a watch dog on the job all of the time. In one county it was found that a very large business was assessed for $200,000. It didn't look just right, so the case was followed up. The balance sheet of that corporation showed that it owned property in the county to the value of $3,200,000. In another county, several small corporations were assessed for less than ten percent of their value.

The whole story cannot be told in this issue. We are going to do a lot of talking on this subject from now on. This fall the question of state taxes will be up again, and we hope there will be more to talk about.

Let's see what results the counties are getting:

In Macoupin County

Last spring the Macoupin County Farm Bureau made a thorough investigation of their tax situation. They found out that farm land was assessed at 49 percent of its transfer value and city property at less than 31 percent. Farm land was carrying the heavy end of the tax burden.

The Farm Bureau executive committee and tax committee met with the assessor of the county and pointed out that the law required all classes of property to be assessed on an equal basis.

In July another investigation was made. The actual sales of farm lands and city property since January 21 was compared with the new assessed value. It was found that city property had been assessed 32.1 percent of its transfer value, while farm land was assessed at 32.5 percent of its transfer value.

Lawrence Is Equalized

The Farm Bureau investigation in Lawrence County showed that real estate in the city of Mt. Vernon had a full assessed value amounting to 39.1 percent of the actual sales value. The actual sales value was determined by taking the average of 102 sales in the city.

In other towns and villages of the county, real estate was assessed at 43.2 percent of the actual sales value.

The investigation covered the sale of farms comprising 1,950.84 acres. The total transfer value was $105,484 or $54.07 per acre. The total full assessed valuation of this land is $46,624 or $24.41 per acre. The ratio of full assessed valuations to actual transfer values is 44.2 per cent.

The Board of Review was told that it would be necessary to decrease the present assessed valuation on farm lands about 33 percent or increase the full assessed valuation on city real estate by 48.8 percent, in order to place the assessments on the same basis.

Mt. Vernon Increased 50 Percent

Here is what happened: Real estate in the city of Mt. Vernon was increased to 50 percent on full valuations. In five other townships, town and village real estate was increased from 10 to 25 percent. In ten townships village and town lots remained stationary, and in one township village real estate was decreased 10 percent. Valuations on farm lands will remain the same.

This change in valuations practically evens up the situation in Lawrence County.

Good Case In Clay

The Clay County Farm Bureau has a good case. The investigation disclosed that Flora real estate and improvements was assessed 36.9 percent of actual sales values. Towns and villages in the county were assessed 50.6 percent of actual sales value, and farms were assessed 53.5 percent of actual sales value.

Farm Adviser W. E. Hart says, "Our Board of Review is working on a reduction on farm lands amounting to something like 25 percent. Flora real estate has been brought up something like nine percent and they are planning to increase it still further. It may be that the percent suggested will be approximated at least. So far as I know there is no serious opposition being made to the changes requested, although the board was very slow to make any decision."

Scott Decreased

The Scott County Farm Bureau investigation showed that farm lands and city property was assessed at about the same percent of its real value. There was no problem of equalization, but the figures of the Farm Bureau proved that Scott County real estate was being assessed at a much higher percent of its sales value than the average for the whole state. This meant that it was paying more than its share of state taxes.

As a direct result of the Farm Bureau hearing, the Board of Review has decreased all real estate ten percent which means a saving of about $4,000 in state taxes. A large share of the real estate in the county is in farm lands.

Industries Hire Best Attorneys

Farm Adviser Alden Snyder, of Montgomery County, writes: "Glad to say that we were able to get two members of our tax commission on the County Board of Review. Their plan is to cut farm lands 15 percent. This, no doubt, will make considerable difference in the reduction of taxes on farm land.

"There has been some increase on the value of city property, however, we did not have much success in getting an increase in the valuation of industries, such as the smelters, coal mines, etc., as these industries in all cases are represented by a firm of the best lawyers in the county."

Trouble In Kane

"We obtained the record of all sales for both farm land and town real estate from January 1 to June 1," says W. B. Richards, Farm Adviser of Kane County. "We also secured the amounts these properties were assessed for from this year's books. This investigation shows that farm lands have been assessed at 45.7 percent of the sale value. The town real estate was assessed at 34.6 percent of its sale value. These facts were presented by J. C. Watson at a hearing before the Board of Review on August 6. To date we have not been advised what action the board is going to take as a result of this hearing. It has come to me indirectly that they do not intend to take any action.

I am very much disappointed with the attitude of the Board of Review toward the work we are doing. They seem to resent the fact that we are investigating these matters. This is not to be wondered at, considering that heretofore no one has ever attempted to get an equalization between different classes of property.

"In this county it is very important that real estate be assessed on an equal basis of farm land, inasmuch as it represents a large amount of property in the county. I do not doubt but what we will get a decrease on farm land in some townships as a result of this hearing."

Champaign Checks Up

In Champaign County the assessors were instructed to reduce land valuations ten percent. C. H. Oathout, Farm Adviser, says this was done approximately, but the assessors in the towns of Champaign and Urbana also did the same thing, so it left the farmer in the situation as before.

"We had a hearing with the Board of Review on July 29," says Mr. Oathout. "They received us very pleasantly and favorably and told us they were glad to get all of the information that we could give them because so many complaints were made without any grounds.

"The facts as we presented them to the Board of Review showed that farm land in the county is being taxed upon approximately 40 percent of its real value, property in Urbana on 37 percent of its real value, small towns in the county on 42 percent, and the city of Champaign on only 24.1 percent of its real value.

"The committee seemed inclined at first to simply reduce farm lands 10 percent more. I do not know whether it was this investigation or not that stirred up the people in Champaign. At any rate, we furnished these figures to the City Board of Commissioners and a number of citizens of Champaign have become considerably stirred up because they found that the taxable property in Champaign was decreased more than one-half million dollars in the face of the fact there has been a great deal of building here for some time and is still going on. They have taken up the matter with the Board also. D. J. Holterman, a member of our committee, was told that they would decrease land another ten percent and increase Champaign ten percent.

"I think that eventually these investigations will bring about much good, as they show people what great inequalities and injustices there are in the whole taxation system."

Cut Price On Phosphate 50c; $1.00 To Elevators

A reduction in price of 50 cents a ton, from $6.50 to $6.00, is announced by the Phosphate-Limestone Department for raw rock phosphate containing 13 percent phosphorus. This price reduction is retroactive to July 15.

To encourage elevators and dealers to carry a supply of rock phosphate on hand, the department announces a price of $5.00 a ton. This concession is made by the production companies and is for a limited time only.

"Accounting Records and Business methods for Live Stock Shipping Associations" is the title of a new bulletin announced by the U. S. Department of Agriculture.

"Our Farm Bureau" Is Latest Movie Release of A.F.B.F.

"Our Farm Bureau," a one-reel feature, is the latest release of the Motion Picture Department of the American Farm Bureau Federation, 58 E. Washington St., Chicago.

While not long enough for an evening's entertainment, it fits in well with any other picture. It contains a bit of good acting, some animated cartoons, beautiful farm scenery and good common sense most happily blended into a happy presentation of the Farm Bureau idea.

RED TOP GROWERS GET STORAGE AND RE-SHIP RIGHTS

Means Freight Saving of $39 On Carload From Carmi To Chicago

A storage and re-shipping privilege goes into effect at Flora on red top seed on September first, which will mean a very definite saving in freight costs. On a carload of seed from Carmi to Chicago with a stop-off at Flora, the saving will be $39 on a carload.

The Egyptian Seed Growers' Exchange with headquarters and warehouse at Flora, had a problem in transportation. All of the red top seed in the eight counties which the association is marketing must go to Flora to be cleaned and stored. A large share of this seed is shipped in, and later it is shipped on to its destination. The short freight haul is a high rate, and the longer freight haul, from Flora to the market, is a much lower rate.

The problem was taken to the Transportation Department of the Illinois Agricultural Association. The whole facts of the case were presented to the railroad. The case later went before the Illinois Freight Association with the result that the privilege of storing and re-shipping of red top seed and other related products was granted, to go into effect September first.

This means that seed may be shipped in carloads from any point in Illinois to Flora, for cleaning and storing, to be re-shipped later to some other point of final destination in Illinois, Wisconsin, Michigan, Indiana, Ohio, and a portion of New York, on the basis of the through rate from the point of origin to final destination plus a small transit privilege charge.

The Answer in Dollars

At the present the freight charges on a carload of seed from Carmi to Flora is 16½ cents a hundred pounds or $49.50 a carload. If this seed should be re-shipped from Flora to Chicago the rate would be 26½ cents a hundred pounds or $79.50 a carload. The total freight cost from Carmi to Chicago with the stop-off at Flora, would be $129.

Saves $39 on Carload

Under the new transit arrangement the seed can be shipped from Carmi, in carloads, to Flora, and later be shipped to Chicago, at the through rate in effect between Carmi and Chicago. This through rate is 30 cents a hundred pounds or $90 a carload. On this instance, there is a saving of $39 on a carload.

The new arrangement will not make a saving in cases where there is a back haul to Flora.

July Business of Live Stock "Co-op" Shows Big Gain

An increase of 137 percent in the business of the Chicago Producers Commission Company was shown for July, 1923, compared with the same month last year. A total of 1,303 cars of live stock was handled in July this year, compared with 550 during July, 1922.

Rock Phosphate Problems Discussed By Farm Bureau Presidents and Advisers

At the McLean County Farm Bureau office, Bloomington, on August 17th, 40 Farm Bureau Presidents and Farm Advisers met on invitation of the Illinois Agricultural Association, to discuss the problems involved in the phosphate supply and the relation of the work of the I. A. A. Phosphate-Limestone Department to those problems.

The work of this Department has been attacked repeatedly during the last year or two, chiefly by one of the phosphate producing companies that has not been contracting its product through this Department.

Some have been disposed to take these criticisms at their full value or as having some foundation, while in the minds of others the criticisms have raised honest question marks. The meeting was called with the hope of bringing out the facts; making clear the policies and methods of the Department and securing all possible criticism and suggestion.

A Dependable Supply

H. T. Marshall, of LaSalle County, first chairman of the Phosphate Advisory Committee, told briefly of the conditions leading to the establishing of the Department nearly four years ago. At that time there was much trouble in securing satisfactorily prompt deliveries. Often shipments were delayed several months after the time they were desired. The quality could not be depended upon. There was no satisfactory way of securing fair analysis. In short, there was no dependable and reliable supply. The price at that time was, temporarily at least, inflated out of reason.

The Phosphate Department contracted for a large tonnage at an improvement in price and an office and laboratory were established in the phosphate fields in Tennessee, so that the many details of shipment, sampling, and accurate analysis would be taken care of on the ground at the time of shipment.

Several times during the meeting comments were made from the floor which conceded that the work of the Department had solved the problem of prompt delivery and correct analysis.

The Present Situation

In discussing the present situation, Mr. Frank D. Barton of Livingston County, present chairman of the Phosphate Advisory Committee, stated that the financial condition of the farmer during the last couple of years had seriously reduced the demand for rock phosphate and that the demand has not been sufficient to keep the mills running economically. Mr. Barton stated that there is danger that the big commercial fertilizer interests will gradually absorb the better properties of the weakened independent producers of ground rock phosphate. He stated further that the Department has endeavored to keep the phosphate business going as much as possible in order to preserve a source of supply for the future need. The demand in July of this year was greater than that for the same month in either of the past two years.

Future Supply Important

"There is great opportunity for the Illinois Agricultural Association to preserve an adequate supply of rock phosphate for Illinois farmers," said Frank I. Mann of Iroquois County, a member of the Phosphate Committee. He went on to say—"The farmers must get down to brass tacks in economical production. The Illinois System of permanent agriculture including the use of limestone, the growing of legumes and applying phosphate, is the key to such economical production. The application of raw rock phosphate is the cheapest and in the end the most satisfactory way of supplying the phosphorus which is needed in our soils."

Phosphate Quality

Talking on the subject of the measure of quality in raw rock phosphate, Dr. F. C. Bauer of the University of Illinois said that rock phosphate should be purchased on the basis of the total phosphorus it contains as determined by the accepted laboratory methods and that the product should be ground finely enough so that substantially all will pass through a 100-mesh sieve. The fine grinding makes the phosphorus more easily available to the plant roots. He said that these two determinations are the major considerations and that the quantity of iron or aluminum is of no consequence so far as raw rock phosphate is concerned. He pointed out that the manufacturer of acid phosphate finds it necessary to use only material which is low in iron and aluminum for the reason that they effect his chemical processes.

Sources of Supply

Speaking of the question of supply, J. R. Bent, Director of the Phosphate Department, mentioned the various major sources and markets throughout the world and particularly this country, and summed up the situation by stating that Tennessee must continue to be relied upon to take care of Illinois' needs. Competition and freight rates eliminate other fields of production so far as we are concerned.

Secretary Geo. A. Fox said that the I. A. A. would like to make the phosphate supply work of the Phosphate-Limestone Department as nearly self-supporting as possible. On account of the small business the past two years it has not been quite self-supporting. Naturally, the cost of this service depends largely upon the volume of business done. The Association has found it necessary to subsidize the work thus far. Mr. Fox stated that the Association has determined that it is not proper for it to carry sales of phosphate to its members on open account, thus absorbing large amounts of funds and taking some risk, and that therefore the method now being used is that of shipping on order form bill of lading with sight draft attached.

Permanency Largest Interest

"At one time prompt delivery and accurate quantity and quality of the product was a real problem," said Mr. Fox. "These problems have been solved by the Department. Will these problems rise again if this work is discontinued? Or are they permanently in the past? That is one of the questions facing us. Our largest interest in this problem is bound up with the permanency of our agriculture—that of an adequate future supply. The effort is worth while if there is anything we can contribute toward the safety and economy of this future supply."

Producer Finds Fault

The head of one of the Tennessee phosphate companies that has been bitter in his attack upon the Association, was present at the meeting and he was invited to state his criticisms and to make suggestions before the meeting. He accused the Department of selling an inferior and unsatisfactory quality of rock. A major project of the Department has been to secure that grade which gives the maximum amount of phosphorus for the minimum amount of cost to the farmer. Several Farm Advisers expressed their satisfaction in the results of this work and in finding that they can depend upon the Phosphate Department for quality and delivery.

This Phosphate producer said that the I. A. A. largely controlled the business in Illinois and that it would neither push sales itself nor allow other companies to go into the field and do so. His suggestion was for dealers to handle phosphate on a margin of profit and to act as salesmen in pushing its use.

Sales Campaign

"Shall the Department enter a sales campaign to increase the demand?" was one of the chief subjects of discussion. One Farm Bureau representative expressed the opinion that the Phosphate Department had little grounds upon which to ask for support unless it carried on as active a campaign for sales throughout the counties as would be done by the producers themselves. The general opinion of the meeting, however, was to the effect that it would not be wise, especially at this time, to allow indiscriminate and promiscuous sales effort. The chief reasons expressed for this opinion were that many farmers might be induced to purchase, the condition of whose soil or whose method of farming or crop rotation were not as yet such as would insure satisfactory results.

Another criticism which this producer made was that the low price at which the Department is distributing phosphate will have the effect of driving the producers in Tennessee out of business. He named several companies which had already discontinued and others that are in bad financial shape. Director J. R. Bent answered this point in detail. One after another, he named all of the leading companies—told the history of each and the conditions which have led to the suspension of operation or financial trouble of those that have gone down or quit. He showed that the effect of the business secured through the Phosphate Department had been to preserve and encourage the producers who had been willing to contract through the Association and not to discourage or hurt, and that the difficulties which faced the industry as a whole find their origin in the general economic situation and financial inability of the farmer, which has resulted in small tonnage. Mr. Bent emphasized the point that in his opinion the phosphate industry needs volume of business more than it does improvement in price. He stated that the companies with whom the Association has dealt, endorse its work and Mr. Marshall confirmed this statement of Mr. Bent's.

Under-Selling I. A. A.

One Farm Bureau President asked why other independent companies could sell phosphate cheaper than the I. A. A. The criticism of producers has been that the I. A. A. price is too low. Mr. Barton answered this by saying that it is the same question that comes up every time a farmer's organization attempts to go into business in competition with others. The companies or concerns whose toes are stepped upon retaliate by cutting prices to a point even of serious loss in order to discredit and eliminate, if possible, the work of the farmers' organization. Often the price-cut is at the sacrifice of quality.

At the close of the discussion Mr. Fox summed up the matter by saying that the accusations against the work and the personnel of the Department have been without facts or proof. He invited any further statements for discussion which might prove these accusations and told the audience that if the work of this Department is not being conducted along the most effective lines, or is not important enough to be worth while, it is an easy matter to change its character or abolish it altogether.

The meeting concluded by a motion giving a unanimous vote of confidence to the Phosphate Department and urging it to continue.

The DuPage County Farm Bureau offers a reward of $125 to anyone who will give information that will arrest and convict any person stealing from a Farm Bureau member's farm or place of business.

TRANSPORTATION DEPARTMENT

Do You Have Any Trouble In Getting Cars? Write the Transportation Department.

Little Chance Seen For Price-Fixing Schemes

"I see nothing to encourage the belief that Congress will pass legislation which will fix the price of wheat or that Congress will go into the business of buying and selling wheat or in any statutory way do anything to put the Government in the wheat business," stated Gray Silver, Washington Representative of the American Farm Bureau, recently.

In speaking of the same proposed plans, Secretary of Agriculture Henry C. Wallace, said, "I am not hopeful of good results from either of these plans. How would the Government dispose of the surplus accumulated? What effect would either action have on wheat acreage? What effect would it have on the acreage and price of other grains and of livestock? Would the same policy be adopted in case of ruinously low prices for other farm products?

LOOKING FOR FEEDERS?

If you are in the market for feeder live stock of all kinds—cattle, hogs, or sheep, write to the Live Stock Marketing Department of the I. A. A. which can furnish names of parties who can supply the needs of Illinois farmers in feeder stuff.

POOL YOUR WOOL!

The Live Stock Marketing Department of the I. A. A. announces that all who have wool to consign to the pool should do so as soon as possible as the first pool will close at a very early date.

The Clinton County Farm Bureau held a public auction of 75 feeder hogs on August 27.

The Adams County Farm Bureau picnic, August 27, included a trip by steamboat up the Mississippi river to the Keokuk dam.

VALUATIONS CUT IN CASS COUNTY AFTER HEARING

Farm Lands Get 10 Percent Reduction; Beardstown Increased $226,000

As a direct result of the hearing before the State Commission in Springfield, the Cass county Board of Review has announced a flat reduction in valuations of farm lands and increases in duck lands and Beardstown township.

"The Tax Committee of the farm bureau in a meeting with the Board of Review, secured a flat reduction of 10 per cent on farm lands of the county, with an increase on duck land, and an increase on Beardstown township of $226,000, over the assessments of 1923," writes Vice-President J. H. Taylor, who presented the farm bureau case at the Springfield hearing.

Further Cut Promised

"They also promised us an additional decrease of five per cent on farm lands, providing the tax committee of the farm bureau can present figures to show that the best farm lands of surrounding counties, and counties of central Illinois are not assessed at a valuation over $85.00 an acre."

A full account of the situation in Cass county is given in another story in this issue of the Record.

Large Supply of Limestone Makes Lower Quotations

Now is an excellent time to buy agricultural limestone, according to the Phosphate-Limestone Department of the Illinois Agricultural Association. Owing to the fact that the demand has been below normal for the past three years, due to the farmers' financial condition, the quarries have a large supply on hand and the price now in many quarries is at a point below its relative share in the cost of production.

The heavy demand for commercial crushed stone for concrete purposes, hard road making, and building construction has kept the limestone quarries busy. The specifications call for the elimination of all fine material. It is this by-product, known as limestone screenings, which is in most cases well adapted for agricultural purposes and is sold for agricultural limestone.

GETTING THE CHORES DONE

Land Valuations Decreased In Seven More Counties

Seven more county farm bureaus have been notified of changes in valuation of real estate for tax purposes which equalize or partly equalize the inequalities in assessments. They are Franklin, Richland, Lawrence, Stark, Christian, Clinton and Kankakee.

The counties of Randolph and Monroe have held hearings before the Boards of Review since the last issue of the Record. No changes in valuations have been announced in these counties.

Franklin Equalizes

Cuts of ten to twenty per cent were made in full valuations of farm lands in all but one township of Franklin county. In that township land was raised 15 per cent to place it on a level with the other townships. Valuations of city property were increased from 10 to 20 per cent. Mr. Metzger, of the I. A. A. office, who assisted in this hearing, says that these changes come very near equalizing the situation.

Cities Raised in Clinton

The full valuations on farm lands in Clinton county proved to be about 50 per cent of the sales values, and the full valuations of city property about 40 per cent of the sales values. Before the farm bureau made an investigation last spring, the assessors were instructed to make a cut of 10 per cent on land. The result was that a number of assessors also made a similar cut on city property.

The Board of Review has notified the farm bureau that an increase had been made in every city except New Baden and Trenton. The reduction of 10 per cent made in land last spring was left the same.

In Richland

In Richland County the farm bureau investigation gave a basis for the Board of Review to make changes, however, Farm Adviser W. B. Bunn states that the Board was rather favorable to the farmer. "It was found that the assessed value in each case was practically equal, it being approximately 63 per cent of the actual sales values," writes Mr. Bunn. "Mr. Metzger thought that this county was perhaps paying an excessive state tax. He recommended that the assessed value of farm lands be cut to aproximately $20,000 in this county. They were reduced from a general average of aproximately $25.00 to a fraction over $22.00 by the board."

Lawrence Gets Out

In the September 5 issue of the Record it was stated by mistake that Lawrence county was equalized. The figures used for Law-

(Continued on page 4)

Exchange Sells Peaches Higher Than Growers

Manager A. B. Leeper reports that the Southern Illinois Fruit Growers' Exchange sold sixty carloads of peaches this year. Last year the Exchange sold 400 carloads. The explanation of this big difference is in the size of the crop, says Mr. Leeper. He states that the crop was very light; however, the Exchange had the same number of shippers as last year.

Prices secured by the Exchange ranged from $3.00 to $3.40 a bushel at the shipping point. Speculators or track buyers offered $1.75 to $2.75 a bushel, reports Mr. Leeper. The selling charge to members was 15 cents a bushel. The bulk of the crop was sold in Kentucky, Tennessee, Indiana, Illinois and Ohio.

FEEDING TRANSIT RATES SECURED BY I.A.A. DEPARTMENT

After the request had been made by R. G. Hinch, Marseilles, representing sheep feeders of that locality, that the I. A. A. Transportation Department take action to secure a feeding transit rate on the Chicago, Rock Island, and Pacific Railroad on feeder sheep shipped to that point from western states, the Department secured a special rate, not only to Marseilles, but to all points on the Rock Island in Illinois, intermediate to Chicago.

The rate applies to both feeder sheep and cattle and will result in a saving of 13 cents per hundred or approximately $15 per car on single and $28 on double deck shipments of live stock fed in transit. The total saving will amount to quite a large sum, as 5,000 feeder sheep will be purchased by Marseilles farmers alone, it is stated.

Feeder stock may now be rated from point of origin to Chicago, unloaded on Illinois points on the Rock Island in Illinois intermediate to Chicago, fed for the period of a year or less, and reloaded for the market at an additional charge of 8½ cents per hundred, which covers transit privileges. Previous to the reduction, farmers would have had to pay 21½ cents per hundred for reloading.

SERIES DISTRICT CONFERENCES WILL START ON SEPT. 26

Farm Bureau Policies To Be Discussed By Officers and Advisers

A series of district conferences to establish a better understanding of the problems confronting farm bureaus and the I. A. A. will be held in each of the Fifteen Congressional Districts starting September 26 and ending October 26. These meetings will be in charge of President S. H. Thompson, Secretary George A. Fox, and other I. A. A. officials.

Policies, relationships, and program of work of the county bureaus and state association will constitute the scope of the conferences. The marketing problem and the relation of both farm bureaus and the I. A. A. to co-operative commodity marketing enterprises will receive major attention on each day's program.

Walton Peteet, Director of Co-operative Marketing for the A. F. B. F., will attend the meetings to lead marketing discussions. It is likely that Aaron Sapiro, Co-operative Marketing Counsel for the A. F. B. F., will speak at one or two of the assemblies.

All county farm bureau officers and executive committees, voting delegates, farm advisers, co-operative marketing organization officers and managers, and others interested will attend the conferences in their respective districts.

The various district meetings will be held at the farm bureau offices in the respective places designated at 10 a. m. of the days scheduled, except at Carbondale, where the conference will be at the Normal School, and at Centralia in the Fittinger hotel.

Date	District	Place
Sept. 26	20th	Carbondale
Sept. 27	22nd	Belleville
Oct. 2	18th	Vincennes
Oct. 3	19th	DeKalb
Oct. 4	11th	Wheaton
Oct. 16	10th	Danville
Oct. 17	24th	Pinnela
Oct. 18	25th & 23rd	Springfield
Oct. 19	23rd & 24th	Centralia
Oct. 23	17th	Bloomington
Oct. 24	16th	Peoria
Oct. 25	15th	Galesburg
Oct. 26	14th	Monmouth

PUBLICITY CONFERENCE

State farm bureau publicity directors will meet at American Farm Bureau Headquarters, Chicago, September 20, 21, and 22, primarily to establish policies of the farm bureau in relation to motion pictures. Other matters of bureau publicity work will be discussed.

Illinois Agricultural Association
RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by News Publicity Department, E. L. Bill, Director.

Entry as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of ten cents for subscription to the Illinois Agricultural Association Record.

HERE'S CO-OPERATIVE MARKETING

Sixty carloads of peaches were sold by the Southern Illinois Fruit and Vegetable Growers' Exchange this year for prices ranging from $3.00 to $3.40 a bushel. The charge to members was 15 cents a bushel.

Track buyers or speculators offered $1.75 to $2.75 a buahel.

The Exchange knows today how many peaches and what kind will be ready to start to market tomorrow. This kind of a wire goes out to 20 or 30 salesmen of the Federated Fruit Growers, with which the Exchange has a contract: "Offer ten cars number one Albertas, Government Inspected, three dollars and half f. o. b." Answers will come back in the evening or in the morning. If sufficient orders do not come in, the Exchange gets busy on the phone with these salesmen on the different markets, and closes a sale.

The Exchange member has the selling ability of these salesmen on all of the different markets.

The individual growers can sell to the track buyer at the price offered, or start his cars rolling to market and take the price that is offered on the market when they arrive.

"STEAL" DOLLARS

Every time you buy a keg of nails or a spool of barbed wire, you pay 45 cents of "Pittsburg Plus," even though the steel is manufactured in Illinois.

A corn cultivator costs you $1.23 "Plus," a mower $1.28, disc harrow $1.89, $6.88 for a corn binder and $19.80 for a tractor. These are the figures of the Deere Company at Moline.

The American Farm Bureau Federation says "Pittsburgh Plus" costs farmers of the United States $75,000,000 each year. The Western Association of Rolled Steel Consumers says the 237,181 farms of Illinois pay an average of $10.00 "Plus" a year, or a total of $2,371,810.

"Pittsburg Plus" is the practice of charging for freight on steel from Pittsburg to the point of consumption, regardless of whether it is produced in Pittsburgh, Gary, Indiana, or anywhere else. The Illinois Agricultural Association is represented on committees which are working to abolish this practice.

BOX SCORE ON TAX RESULTS

Champaign: Farm land valuations reduced 10 per cent. City of Champaign increased 10 per cent.

Christian: Farms reduced 10 per cent. This is in addition to a 15 per cent cut made last spring by assessors.

Clay: Board announced plan to reduce farms 25 per cent and increase Flora real estate 9 per cent.

Clinton: Decrease of 10 per cent made by assessors last spring will stand. Board announces increase in lots in all but two towns.

Franklin: Farms reduced 10 to 20 per cent in all but one township. Increased 15 per cent in one township. City property increase 10 to 20 per cent.

Jefferson: Mt. Vernon increased 50 per cent. Town and village property increased 10 to 25 per cent in five townships, remain stationary in 10 townships, reduced 10 per cent in one township. Farms remain stationary.

Kankakee: Reduction of 15 per cent on full valuation of farm lands.

Lawrence: Reduced farms 10.7 per cent.

Macoupin Reduction in farm lands of 33 per cent.

Peoria: Reduction of 25 per cent in lands made last spring still stands.

Richland: Reduced farms 12.5 per cent.

Scott: Ten per cent reduction in valuation of all real estate in county.

Stark: Farm lands reduced 10 per cent.

THE BATTING AVERAGE

County farm bureaus and the Illinois Agricultural Association held hearings before 24 county Boards of Review. Evidence was presented to show the facts about valuations and real values of different classes of real estate. In most counties the evidence showed that the full valuations on farm lands this year is a much higher per cent of the real sales values, than are the full valuations of city property of the actual sales values. The farm bureau asked for equalization.

In twelve counties definite results were secured: In six counties where wide inequalities existed, and the Boards of Review refused to equalize, the farm bureau asked the State Tax Commission to order reassessments. The State Tax Commission has promised that if these counties do not equalize, it will order a reassessment.

Equalization is expected in three additional counties. In one county there was not much need for equalization. One county, where wide inequalities were found, will be called before the State Tax Commission for a hearing.

WHAT IT MEANS

In counties where reductions have been made and there is no increase in the tax rate on farm lands, the decrease in dollars and cents will be the same per cent as the reductions. Where tax rates are raised there may not be any difference in the amount of taxes, but farm lands will pay less of the total amount of county taxes. It is believed that the per cent of reduction on farm land taxes will be 50 or 60 per cent of the per cent of reduction in valuations of land. The I. A. A. will report the actual savings in money later.

FOR FEEDERS ON ROCK ISLAND

Special feeding transit rates have been secured by the Transportation Department on all stations between Chicago and the western Illinois line, on the Rock Island railroad.

It means that feeders can ship cattle and sheep to these towns, hold and feed them for as long as a year, and ship them on to the Chicago market, at about the same rate as the through rate from original point to Chicago. Before the special feeding transit rates were secured, feeders paid one rate from the original point to their farms, plus the local rate from the farm to the Chicago market.

The saving in freight cost varies with the distance of the town from Chicago. In the case of Marseilles, which is in a large sheep feeding territory, the saving will be 13 cents a hundred pounds. The carload saving will be $15.00 for single deck and $28.00 for double deck carloads of sheep.

S. B. 460 IS WORKING

Senate Bill 460 is the new grading and inspecting act passed by the last State Legislature. Government inspectors working under this act inspected a large share of the peaches sold by the Fruit Growers' Exchange at Centralia this year.

The words "Government Inspected" carry weight with buyers. They have faith in Government inspection. When several quotations come to a buyer on the same day and at the same price, he picks the one that is inspected, for it is insurance to him. The Exchange is using S. B. 460 to good advantage.

SERVICE AND QUALITY

The old idea of a quality product and service has been adopted by the Rock Island Co-operative Dairy Company as a principle to get and hold business. "Make one quart of milk sell another," is the motto of the employes of the company.

The contract with producers states that milk must be cooled to 60 degrees on the farm. Collections start at six o'clock in the morning. At nine o'clock all milk is in the plant. It is all pasteurized and on the ice at 11:30 o'clock.

The delivery wagons are white and are washed every day. Employes in the plant wear white suits, clean every day. Sixty per cent of the labor in the plant is to clean and sterilize equipment.

The Rock Island Company preaches and recognizes that quality and service is one way to increase consumption.

A CHANGE OF HEART

The Cass County Board of Review, one of the six Boards called before the State Tax Commission at the request of the Illinois Agricultural Association to explain why it had not equalized valuations of different classes of property, has changed its mind.

The Cass County Farm Bureau has been notified that a flat decrease of 10 per cent will be made in valuations of farm lands and possibly an additional 5 per cent. Real estate in Beardstown township will be increased $226,000.00 in full valuation.

FIFTEEN DISTRICT CONFERENCES

To find the weak links in farm bureau work, to glean the ideas and suggestions of leaders, and to determine policies, relationship and a program of work, is the purpose of fifteen conferences throughout the state, scheduled to start Sept 26.

The selling agencies of the National Live Stock Producers Association handled 7.3 per cent of the business in the markets on which they were operating, during the first six months of last year. In the same months this year, the selling agencies handled 9.1 per cent of the business in the markets on which they are located. The Producers Association has commission companies on eleven leading markets of the country.

The Indianapolis Producers handled 835 cars of live stock in August. This is 23.24 per cent of the receipts on the market for the month. The nearest old line firm handled 377 cars.

The I. A. A. Transportation Department offers to help you in your problem of securing cars.

State Tax Commission Upholds I. A. A. In Demand For Equalization

Reassessments will be ordered in six counties by the State Tax Commission if the County Boards of Review do not equalize valuations of different classes of property.

That is what the Illinois Agricultural Association asked for after a hearing before the State Tax Commission September 5, at which county farm bureaus and Boards of Review presented their cases. The counties in which the State Commission has said they will order reassessments if valuations are not equalized are Cass, DuPage, Kane, Marion, Montgomery and Vermilion.

In 24 counties the farm bureaus and Illinois Agricultural Association held hearings before the local Boards of Review. The results of long investigations were presented, showing that the full valuations of farm lands was a much higher per cent of the actual sales values than the full valuations of city property were of the actual sales values. And in each case the Board of Review was told that the law directs that valuations must be equalized between classes of property.

The Excuses

In a large share of these counties the farm bureau hearings were taken seriously and in many of them adjustments were made to equalize valuations or at least partly equalize. In the six counties named above, the Boards of Review didn't take much stock in the farm bureau information, and they refused action. "Taxes are already too high" is the brand of weak excuses that were made by the Boards. "We haven't got time," was another, and others are: "It will cost money," and "It's not fair to tax homes as high as farms and business concerns because they have no income."

But there was nothing in the law that made any one of these a valid excuse. So far as the County Board was concerned, there was nothing left for the farm bureau to do. At this point of the game, the State Tax Commission was asked for a hearing of the cases in these six counties. The County Boards of Review were called in by the Tax Commission and the farm bureaus were on hand with their facts.

One by one the county farm bureau representatives were called on to give the facts of their case and the Boards of Review were given opportunity to defend their position. John Watson, in charge of tax work for the I. A. A., and Attorney Newton Jenkins were there to help in making the charges against Boards of Review.

The following table shows the facts of the case in Montgomery county as presented by the farm bureau. The valuation ratio is the per cent which the full valuation is of the actual sales values for each class of property or for towns or cities named.

Kind of Property	Val. Ratio
Farm land	49.9
All towns	37.5
Nokomis	40.8
Litchfield	30.7
Hillsboro	40.9

Martin Bray, a farmer, member of the farm bureau and a member of the Board of Review, testified to the effect that there were inequalities in valuations and it was his opinion that they should be corrected.

The two members of the Board who refused to equalize classes of property did not appear to defend their position.

Kane County Fights

W. C. McQueen, Vice-President of the Kane County Farm Bureau, presented the results of their investigation. Following are the figures showing what per cent the full valuations are of the actual sales values:

Kind of Property	Val. Ratio
Farm land	45.7
Aurora	32.1
Geneva	38.
Batavia	60.
Dundee	39.
Elgin	35.5
St. Charles	30.7

J. W. Winterhalter and H. O. Peterson, two members of the Board of Review, who appeared, tried to excuse their refusal to equalize among the cities, towns and villages and between lots of land by the usual argument of injury to some property owners. One member of the Board argued that homes could not be assessed as high as farms, but later admitted that there was no warrant in the law for such action.

Vermilion Board Split

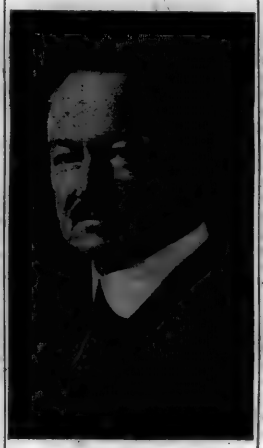
A former member of the Board of Review, H. L. Bracken, presented the farm bureau case for Vermilion county. Following are the valuation ratios for different classes of property and towns:

Kind of Property	Val. Ratio
Farm lands	52.
Danville	34.1
Hoopestown	46.0
Georgetown	43.6
Small towns & villages	43.3

Two Board members appeared before the Commission—one in opposition and one in favor of equalization. Chairman Snyder, who is an attorney in Danville, had refused to equalize. He said that the Board had considered the matter and that there was not time to do it. He stated that the Board would be glad to "pass the buck" to the state commission if they wanted to take some action.

Sam Purnell, a second member of the Board, strongly supported the farm bureau contention.

The assessor of Danville admitted having received instructions which implied a 60 per cent level of valuations in assessments, yet he lowered assessments on property already assessed last year, making a total decrease of $388,000 in full valuations of town and city lots in his portion of the city.



In Marion

Two hearings were held before the Board in Marion county. In the second, the assessor from Centralia, after receiving instructions, with other assessors, to fix full valuations of all property at 70 per cent of the fair cash value, acknowledged that he had tried to fix them at one-third, or less than half the percentage named in the instructions given by the supervisor of assessments.

A wide variation of valuation rates was found in Marion. The figures for different classes of property and for cities follow:

Kind of Property	Val. Ratio
Farm land	59.5
Centralia	38.6
Salem	45.7
Sandoval	59.2
Patoka	41.4
All other towns	42.7

The Board of Review has unanimously agreed to equalize land among the several townships, but two members inconsistently refused to take similar action on equalizing among the cities, towns and villages. The same two men refused to equalize between classes of property. The third man of the Board heartily favored equalization both among cities, towns and villages and between classes of property. He expressed his belief that the farm

JOHN C. WATSON

bureau figures were a substantially accurate measurement of the inequalities existing.

DuPage Stayed Home

The DuPage County Board of Review was not present to explain its action; but the Assistant States Attorney of the county was there to represent the Board, but when the case was called, there was no States Attorney in sight. President Fischer, Farm Adviser E. A. Carncross and several others were on hand to tell their story.

Here are the figures:

Kind of Property	Val. Ratio
All city property	34.7
Downers Grove	41.22
Wheaton	35.
Glen Ellyn	33.
Hinsdale	27.6
Elmhurst	32.6

One member of the DuPage County Board of Review admitted in the Farm Bureau hearing that for years he had known of inequalities in assessments of different classes of property and had not corrected them. His chief defense in refusing to remedy the inequalities of present valuations was the lack of time and the cost it would involve.

Cass Refuses

The three members of the Cass County Board of Review refused to equalize between classes of property. Their only action has been to make some adjustments of individual properties and to reduce valuations of a comparative small amount of farm land. At the Springfield hearing their excuse was that equalization would do injustice to some property owners.

Following are the ratio figures for Cass county:

Kind of Property	Val. Ratio
Farm land	42.46
Swamp or duck land	29.48
Beardstown	35.22
Other cities and towns	59.13

It was way past milking time when all of this information was presented.

At ten o'clock the next morning Mr. Watson and Attorney Jenkins appeared before the commission to sum up the case and ask for action.

Mr. Watson named the facts in each case and accused the Boards of Review of evasion of their sworn duty to observe the law. Mr. Jenkins followed with an interpretation of the law showing that the State Tax Commission not only has the power to call for a reassessment in counties, but that it is its duty to do so. Mr. Jenkins stated that there was not an iota of evidence given by any of the counties that was defensible and not a single Board of Review questioned the power of the State Tax Commission to demand reassessment.

Reassessment was asked for in all of the counties and without any hitch the State Tax Commission gave its answer. It stated to the I. A. A. representatives that it would immediately inform the Boards of Review in the six counties that equalization between classes of property must be made or a reassessment would be ordered.

Farm Bureau To Broadcast Weekly Programs By Radio

The American Farm Bureau Federation installed a regular weekly radio service on Wednesday night, September 5, at Station KYW, Chicago, when President O. E. Bradfute spoke on "The Voice of the Farmer," followed by Secretary J. W. Coverdale, talking on the theme, "Together We Win."

On each Tuesday night following this, the Farm Bureau program will be broadcasted at 8:01 p. m., standard time. Broadcasting is made possible through the courtesy of the Radio Corporation of America and the co-operation of Westinghouse.

Farm Bureau leaders and others with real messages for farmers will speak on the new radio service. Farm Bureau news bulletins will be broadcasted from Station KYW every day as they occur.

The McLean County Farm Bureau has ordered 14 cars of rock phosphate for distribution thus far in 1923.

MADISON WAITS TO TELL BOARD OF TAX FACTS

Livingston Valuation 78.1 Per Cent; Worden, 21.4; Both in Same Twp.

Another chapter is written in the tax situation in Madison county. The Farm Bureau first had trouble in getting access to the tax books so it could make an investigation. After that trouble was ironed out and the case was ready to present, a date was made with the Chairman of the Board by Farm Adviser Alfred Raut, as he states.

But when the Farm Bureau Committee and John Watson of the I. A. A. went to see the Board, the chairman appeared at the door and said that no arrangements had been made for a Farm Bureau hearing and it would be impossible to hear the Farm Bureau before September 7, which happens to be the last day, by law, on which the board may be in session with pay.

The Farm Bureau did not want to run the risk of losing its legal rights by having the information reach the Board later than the seventh of September, so it put the facts of the investigation on paper and handed it to the chairman.

The investigation shows that the full valuations of farm lands are a much higher proportion of the actual sales values than the full valuations of city property are of the actual sales values.

The following table shows what per cent the full valuations are of the actual sales values, for the principal towns in the county and for farm lands.

Place	Per cent
Alton	34.9
Collinsville	28.
East Alton	25.1
Edwardsville	27.2
Granite City	25.6
Madison	29.7
Venice	45.9
Wood River	22.6
Livingston	78.1
Worden	21.4
All other towns	36.2
Farm lands	49.5

Livingston, with a full valuation of 78.1 per cent of the actual sales values, is in the same township with Worden, which has a full valuation of 21.4 per cent of the actual sales values. In only a few instances city property is assessed as high a per cent of the actual sales values as is farm lands, and in several cases the ratio for city property is less than half that of farm lands.

WOOL BLANKETS

The I. A. A. Live Stock Marketing Department has several hundred wool blankets for sale to farm bureau members at $11 and at $13 to non-members.

"OUR WAGON PASSES YOUR DOOR," SAYS ROCK ISLAND CO-OP

WHITE wagons, drawn by well-groomed gray horses and driven by gray-uniformed drivers, carry milk and other dairy products to the doors of customers of the recently opened plant of the Rock Island Dairy Company. This "co-op" is making the attractiveness and cleanliness of its wagons and other equipment speak of the quality of its products.

E. ST. LOUIS CO-OP DISCHARGED FROM BANKRUPTCY COURT

Committee Assembles Claims of Creditors to Effect Composition

The United States District Court of East St. Louis has discharged the Illinois-Missouri Cooperative Milk Marketing Company from bankruptcy and has restored full property rights to the company as the result of a hearing before special Master-in-Chancery Thomas on August 28.

Discharge from bankruptcy was brought about through the efforts of the Milk Producers' Advisory Committee. The advisory committee assisted in assembling claims of creditors in effecting an arrangement which was accepted by the court. The Illinois Agricultural Association, through the services it rendered, made it possible for the assets of the company to be preserved and through advances properly secured, court charges have been paid.

Plans for the reorganization of the company are in the hands of the Milk Producers' Advisory Committee, composed of E. B. Heaton, Marketing Director of the A. F. B. F., Chairman; Asa B. Richardson, Secretary; George A. Fox, Secretary of the I. A. A.; John L. Boland, President of the Missouri Farm Bureau Federation; and Pearlie Haygraft, President of the Southern Illinois Milk Producers Association.

Treasurer R. A. Cowles, of the I. A. A., is trustee to secure advances made by the I. A. A. and county Farm Bureaus.

Why I Did Not Renew Membership In Farm Bureau

Here is another, "Why I didn't renew my membership," which the Record asked sixty former farm bureau members for. This makes nine answers.

M. E. Z. of Hancock county, writes:

"My reasons for not renewing my membership in the farm bureau and I. A. A. are numerous. I believed I could invest $45.00 where I could see returns. I don't approve of the large salaries farm advisers and others are receiving. The three years I was a member I never saw the farm adviser in our locality. I could go on and give other reasons I have, but will stop.

"I don't wish to be misunderstood. I am not a knocker on the farm bureau or I. A. A. I think there is a great work ahead to be done and I hope to see the day when American farmers are so strongly organized that they will be rewarded for their labor. I have talked with hundreds of farmers over all the central states who feel that the small farmer and renter pays the same dues as the big farmer, who think they get the attention.

"I am wishing the whole I. A. A. success and expect to become a member again as soon as a few objectional features have been eliminated, and when I am sure I can make a net profit of $15.00 a year, to pay dues, on an 80-acre farm."

READY TO SERVE THE PUBLIC

THIS new dairy plant, the home of the Rock Island Co-operative Dairy Company, is open to the public for inspection at all times. With its modern equipment for handling dairy products, it represents an investment of about $55,000. The structure is 40x80 in size and has a floor space of 6,400 feet. It is now equipped to handle a capacity of 2,000 gallons of milk daily, but can be easily enlarged if volume of business demands it.

LAND VALUATIONS CUT IN SEVEN MORE COUNTIES

(Continued from page 1)

rence county belonged to Jefferson county.

A cut of 23 per cent was asked for in valuations of farm lands in Lawrence county, figured on the basis of the 1923 figures of the assessors. The Board of Review has made a reduction of 10.7 per cent.

Stark Cut 10 Per Cent

"I am glad to say that a 10 per cent reduction in the valuation of farm lands was secured as a result of the hearing and facts presented by Mr. Watson," writes E. E. Brown, Stark County Farm Adviser. "The Board received Mr. Watson and our tax committee in a very friendly and courteous manner, and they were seemingly impressed by the facts and data presented."

10 Per Cent In Clinton

The Christian County Board of Review has announced a ten per cent cut in land valuations. This is in addition to a cut of 15 per cent made by the assessors last spring. The farm bureau figures showed that lands had a full valuation of 46.8 per cent of their sales values and city property 37.4 per cent.

"Our Farm Bureau Executive Committee is satisfied with the decision as made by the Board of Review," writes C. E. Hay, Farm Adviser. The local tax committee will check up to see that this reduction is made."

15 Per Cent In Kankakee

Real estate in the city of Kankakee has a full valuation of 34.4 per cent of the actual sales values, according to the farm bureau investigation. Bradley has a valuation of 34.2 per cent of the actual sales value and all other towns and villages have a valuation on property of 40.6 per cent of the actual sales values. Farm Adviser John Collier and Mr. Watson, of the I. A. A., presented these facts to the Board of Review on August 29. The Board has announced a reduction of 15 per cent on the full valuation of farm lands.

New Hearings

The Randolph County Board of Review was so eager to get the Farm Bureau information that it waited until nine o'clock on the evening of August 30 for the figures to be completed. Sparta real estate has a full valuation of 30.3 per cent of the actual sales values, according to the investigation. In Chester, real estate has a full valuation of 45 per cent. In other towns and villages of the county, property has a valuation of 48 per cent of the actual sales values. Farm lands in the county have a full valuation of 54.6 per cent of the sales values. The Board stated their intention of making changes that would equalize classes of property.

In Monroe

In Monroe county the Farm Bureau survey showed that farm lands are assessed on 52 per cent of actual sales values while city and town real estate is assessed on 49.8 per cent of the actual sales values. No change has been announced by the Board.

Sangamon Bureau Reports Tax Cut of 32.5 Percent

The Sangamon County Farm Bureau has secured a total reduction of 32.5 per cent in farm land valuations, writes Farm Adviser I. A. Madden. "Last spring our Tax Committee requested the supervisor of assessments to recommend a reduction of one-third in valuations of farm lands. He recommended a cut of one-fourth. When the assessors' books were turned in, the farm bureau Tax Committee went before the board and requested a further reduction in order that the total of one-third reduction would be made. The Board of Review agreed to make another cut of 10 per cent."

Traffic Dep't Is Ready To Assist In Securing Cars

Individual Farm Bureau members or farmers' co-operative associations who have difficulty in securing freight cars should notify the Transportation Department of the I. A. A. as it is ready to assist shippers in every way possible. Telegraphic complaints receive special attention from the department.

It seems hardly possible that this year will go by without a car shortage, according to the department, and all shippers are urged to load and unload cars as promptly as possible and to order only the number of cars actually needed.

From 4.9 to 9.2 Percent Shows Growth of Co-ops

The gradual growth of the various agencies of the National Live Stock Producers Association is demonstrated by the following percentages of the total stock yards receipts handled by all agencies on the markets where they are operating:

Month—	Percentage of total receipts
July, 1922	4.9
August, 1922	5.4
September, 1922	5.1
October, 1922	5.5
November, 1922	7.7
December, 1922	6.5
January, 1923	8.7
February, 1923	9.4
March, 1923*	7.7
April, 1923*	8.3
May, 1923	8.9
June, 1923	9.2

*Declines in percentages during these months are due to the starting of the Kansas City office. The Producers have found that starting on a large market like Kansas City always lowers the percentages, but that within a short time an increase is again shown.

A. F. B. F. Research

Prices of eighteen important farm products were higher than a month ago and six are lower, according to the Department of Research, American Farm Bureau Federation, in a September 4 report. Compared with a year ago, twenty-one are higher and three are lower.

Wool, flax, potatoes, hides, and sugar were lower on September 4 than a month before, while wool, kafir, and hides are the only products lower than a year ago.

1923 Farm Income

Estimates based on the latest production reports and recent market trends indicate that farmers' cash income, from sales, for the crop year 1923-24, will be about $200,000,000 greater than in 1922-23, according to the Department of Research, American Farm Bureau Federation.

This contradicts the current statement that the farmers' income will be one billion dollars greater than last year. The latter figure was derived from an estimate which assumes that all farm products will be sold for cash value. The A. F. B. F. considers cash income as more significant. For instance, only about 20 per cent of the corn will be marketed as corn, while the rest will be sold as pork, beef, etc.

The Department of Research estimates that corn in all forms will yield the farmer practically the same income this year as last, with the pork and beef price trends taken into consideration. The difference between the two methods of computation in the case of this one crop is, therefore, $600,000,000.

WHY I JOINED THE FARM BUREAU, MEMBERS EXPLAIN

Organization Is Best Bet For Solving Problems of Farm

"The greatest reason is that it binds the farmers in one great organization," writes I. A. B., of Crawford county, in answer to the question why he joined the farm bureau. The Record asked sixty members to answer this same question. Here is what some of them say:

"If we ever get anywhere we have got to stick together," writes T. O. H., of Pike county.

"I joined the farm bureau with the thought that co-operation would bring better prices for our products, which I think must come or farming must stop," is the answer of P. G. L., of McLean county.

Chinch Bugs to Taxes

"Organization is the only thing left for us to do," writes R. L. B., of Cass county. "The farm bureau has been a great benefit to all members in the way of culling chickens, spraying orchards, combating chinch bugs and other things. And also our taxes are going to be looked after."

C. A. P., of Marion county, owns a farm and runs a business in town. He says, "I am for our county, state and national organizations, strong, and I am just half a farmer at that. I renewed my membership because I thought it was worth more than it cost. Since all classes are organized there will be slim picking for the farmers until they do likewise."

Good Farm Adviser

"Our farm bureau agent is a great man, always kind, helpful, and a man who knows his business. I find him a friend in trouble," writes C. F. N., of Kendall county. "I can do my vaccination for nearly half the cost of previous years and just as satisfactory. I hope to have my cows tested through the bureau and have applied for a chicken culling demonstration in September at my home."

"In unity there is strength. We farmers must stick together if we expect to accomplish things."—L. M., Vermillion county.

I. A. A. AT TAX CONFERENCE

John C. Watson, in charge of tax work for the Illinois Agricultural Association, will attend the National Tax Conference at White Sulphur Springs, West Virginia, September 24 to 28.

TRANSPORTATION DEPARTMENT

Load and Unload Cars Promptly. It Helps to Prevent Car Shortage.

DEAN E. W. HUMFORD,
COLLEGE OF AGRICULTURE,
UNIVERSITY OF ILLINOIS,
URBANA, ILLINOIS. 10-W.L-7-22

Illinois Agricultural Association

RECORD

Volume 1 | Oct. 5, 1923 | Number 14

RATES REDUCED ON MIXED LOADS OF LIVE STOCK

Saving Will Be Made On 45,000 Carloads of Illinois Stock

The new freight rates on mixed carloads of live stock, which the Illinois Agricultural Association has been working on for over a year in cooperation with the American Farm Bureau Federation and other agencies, went into effect September 28.

Under the old rule, the charges on mixed shipments of live stock in carloads were computed on the basis of the highest rate and highest minimum weight applicable on any species of stock in the car. In other words if the mixed shipment contained hogs and cattle, the rate on hogs would be used, because it was the highest rate and the minimum weight on cattle would be used as it was also the highest. Railroads used the best combination they could.

Under the new ruling of the Interstate Commerce Commission the freight charge must be computed on the rate and minimum weight of one species of live stock in the car. Carriers can not use the rate on one kind of stock and the minimum weight of another kind.

Illinois Saving

The four markets which Illinois feeders patronize: Chicago, Peoria, East St. Louis and Indianapolis, receive approximately 45,000 mixed carloads a year from Illinois, says C. A. Stewart, Director of the Live Stock Marketing Department. He estimates the average saving caused by the new ruling will be $6.00 a carload.

Start Renewal of Memberships In Seven Counties

Piatt, Monroe, Schuyler, Bond, Jo Daviess, Scott, Henderson, Richland and Johnson counties started reorganization campaigns during September under the direction of the Organization Department of the I. A. A.

Jefferson and Clinton counties have made plans to reorganize during the fall. They will complete the list for 1923. The memberships in only six county bureaus will expire in 1924, making the reorganization work considerably lighter for the next year.

THE SLUMS KIDDIES

A total of 2,342 children of Chicago slums had vacations on the farm this year, through the efforts of the United Charities. This number is more than double that of last year.

The I. A. A. placed 391 of that number, and the Prairie Farmer, cooperating on this project, placed 358. Let's help double it again next year.

Action Is Taken Toward Violation T. B. Regulations

Northern Illinois farm advisers, officers of the Illinois Holstein-Friesian Association and others interested held a conference in the I. A. A. offices in September at which resolutions were passed that everything possible be done toward apprehending violations of the rules and orders regulating tuberculosis eradication.

Recommendations were made that farm advisers, herd owners and county breed associations do their utmost to expose all unlawful introduction of untested cattle from without the state into Illinois and to apprehend the violators.

Co-op Spuds Beat Price of Local Market

Sixty carloads of potatoes sold by the Illinois Fruit Exchange shipped out of Belleville, Mascoutah and Quincy, netted growers from 25 to 75 cents more per hundred pounds than the local wholesale prices, according to A. B. Leeper, Manager of the Exchange. This is the first year that the Exchange has marketed any large amount of potatoes.

Prices received for Early Ohios ranged from $1.65 per hundred to $1.90, and Irish Cobblers ranged in price from $1.90 to $2.40 per hundred. The large share of these potatoes were sold in Ohio, Indiana and Illinois. Mr. Leeper states that Illinois potatoes were outstanding in quality this year and for that reason sold at a minimum of about 25 cents a bushel over potatoes from other states.

"One of the lessons learned in marketing potatoes this year," Mr. Leeper says, "is that our quality and neatness of pack is not as good as it might have been." The Exchange is promoting the use of modern grading machinery at local packing sheds to overcome this difficulty.

KEEPING 'EM AWAY

Inspection Plans To Be Considered By Poultrymen

A state-wide meeting of poultry breeders and hatchery owners will be held in Springfield on October 10 to consider a plan of inspection of farm poultry flocks and hatcheries. The purpose of the plan is to insure that they are purchasing eggs of the breed represented and to guarantee purchasers that baby chicks from state accredited hatcheries will mature true to breed.

For several months, J. D. Harper, Assistant to the Secretary of the I. A. A. has studied the Wisconsin plan of accredited farm poultry flocks and hatcheries. At his suggestion a meeting was held at Springfield attended by C. P. Scott, chief Poultryman for the Illinois Department of Agriculture; A. D. Smith, assistant to Mr. Scott; Dr. Leslie E. Card, Head of Poultry Department, University of Illinois; H. W. Day, Supervising Inspector, Illinois Department of Agriculture; and representatives of several large hatcheries of the state.

This body unanimously endorsed the Wisconsin plan and decided to call a meeting of all poultry interests in the state to consider establishing a similar plan in Illinois.

Under the new inspection act, Senate Bill 460, which farm bureau interests were instrumental in passing at the last legislature, it is planned to inspect farm flocks for purity of breed and to place them on a certified list.

Following certification of flocks, hatcheries will purchase eggs only from flocks on the certified list. Hatcheries will also be subject to inspection by the Illinois Department of Agriculture. The ones that pass the requirements demanded will be placed on an accredited list. This list will be made public.

Wisconsin Success

Under a similar plan in Wisconsin, four million certified baby chicks were placed on Wisconsin farms this year, Mr. Harper states. He also says that there has been a phenomenal growth in the hatchery business in the past several years. In his opinion there is a tendency to abolish the old setting hen and home incubator and to purchase baby chicks. A large share of the business done by hatcheries is with farmers. Not all hatcheries have been able to get the quality of eggs for incubation they desired and as a result, black feathers in White Leghorns when

(Continued on page 4)

CONFERENCES OPEN WITH CARBONDALE MEETING, SEPT. 26

Essentials For Success In Co-op Marketing Emphasized

"A sound program, sound management, and a sound finance plan are the three essentials of every co-operative marketing project," said Geo. A. Fox, Secretary of the I. A. A. at the close of the conference of farm bureau and co-operative marketing association leaders for the 25th District at Carbondale on Wednesday, September 26.

"The ups and downs of co-operative marketing organizations vary with these three things," stated Mr. Fox.

The Carbondale meeting was the first of the district conferences called by the Illinois Agricultural Association to find the weak links in the work of farm bureau and co-operative marketing organizations and to define future policies.

Seventy agricultural leaders from seven counties in the district attended the meeting. There are 15 local co-operative associations in the district, mainly live stock and fruit marketing organizations.

The second meeting of the series was held for the 22nd District at Belleville on September 27 but no details were available when the Record went to press.

The following is the schedule of meetings following those at Carbondale and Belleville:

Date	District	Place
Oct. 2	12th	Freeport
Oct. 3	17th	DeKalb
Oct. 4	11th	Wheaton
Oct. 16	19th	Danville
Oct. 17	18th	Tuscola
Oct. 18	20th & 21st	Springfield
Oct. 19	23rd & 24th	Centralia
Oct. 23	17th	Bloomington
Oct. 24	16th	Peoria
Oct. 25	15th	Galesburg
Oct. 26	14th	Monmouth

St. Louis "Co-op" Seeks 20% Cut In Commission Rates

Filing of a new schedule of livestock commission rates approximating 20 per cent reduction from present charges has been made by the Producers Livestock Commission Association at National Stock Yards, Ill. The proposed schedule, if approved by the Packers and Stock Yards Administration, was to be declared effective October 1.

FOR ALL SHIPPING ASSOCIATIONS

A new freight rate on mixed carloads of live stock went into effect last week.

Two factors make up the freight charge in live stock. One factor is the rate per hundred pounds which is different with each class of stock. The other factor is the minimum weight of the carload which shippers must pay on. On mixed carloads of live stock the practice of the carriers has been to charge the whole load at the highest rate for any one kind of stock in the car, and charge for the highest minimum weight represented in the car. The combination that made the charge highest was used.

The rate from Galesburg to Chicago on cattle is 18½ cents a hundred pounds, and the minimum weight per car, 22,000 pounds. The hog rate is 22½ cents a hundred and the minimum weight 17,000. The rate on sheep is 29 cents a hundred and the weight minimum, 12,000 pounds. If all three kinds of live stock were in a mixed carload, the rate would be based on the sheep rate and the cattle minimum weight under the old ruling. The charge on this basis from Galesburg to Chicago would be $63.80 per carload.

The new rule of the Interstate Commerce Commission says that both rate and weight minimum must be used on one class of live stock in the car, the one that figures the most freight cost. In the case of the Galesburg example the sheep rate and minimum weight would be used which would make the freight charge $49.30 a car. On this case the saving would be $14.50 the car. It is estimated that 45,000 carloads of mixed livestock are shipped from Illinois in a year. The Live Stock Marketing Department has estimated the saving at $6.00 a carload.

The Illinois Agricultural Association has been working with the American Farm Bureau Federation and other agencies for over a year to secure the new mixed carload rate.

BIG ORCHARDISTS JOIN FRUIT EXCHANGE

Within the last month, five large orchardists have joined the ranks of the Illinois Fruit Exchange, largely of their own accord.

A problem and admitted weakness of the Exchange has been the lack of big growers in its membership. At a marketing conference a month ago this subject was discussed. It was said that big growers have developed into salesmen and were fairly well satisfied with the results they were getting.

In the meantime the Fruit Exchange has been selling the products of its members. It is not very proud of the prices received for early apples this year but claims that it sold for higher prices than individual growers or other organizations. This claim is not disputed. The last issue of the Record told how it sold peaches higher than others. This month the Exchange reports the sale of sixty carloads of potatoes at prices from 25 to 75 cents higher than local wholesale prices. In the same paragraph it gives the prices received for different varieties so comparison can be made.

The problem of getting the big grower to sell through the Fruit Exchange is dwindling.

—o—

WATCHING FOR LEAKS

A packing company over in Iowa asked the Interstate Commerce Commission that freight rates on dressed meats to New York be decreased to the same rate as live stock, and that the rate for other packing house products, such as cured meats, be decreased to three-fourths of the live stock rate. Other western packers joined in on the request. It doesn't sound so bad on the face.

But such a reduction would make it cheaper to ship dressed and cured meat than to ship stock on the hoof. To do that would deprive the Chicago market of twenty per cent of its business which now goes to eastern buyers. It would eliminate competition and work to the disadvantage of live stock producers. The Chicago market is the lead for all other markets of the country and thus the effect would be felt by all live stock producers.

In the interest of live stock producers the Illinois Agricultural Association has taken a hand in the matter. It is presenting the producer's case at hearings before the Commission.

—o—

THE LITTLE RED HEN

At the suggestion of the Illinois Agricultural Association a meeting will be held in Springfield on October 10, to consider a plan of inspecting farm poultry flocks for the purpose of supplying certified eggs to hatcheries, which in turn will be inspected and placed on an accredited list. The purpose of the plan is to improve the quality of poultry products in Illinois. A quality product is recognized as the first step in successful co-operative marketing.

Illinois stands second in the United states in number of farm fowls. The 1919 census gives the value of Illinois poultry and eggs as $69,000,000. The value of dairy products is only $72,000,000. The value of fruit and vegetables is $45,000,000.

—o—

FOR SUCCESSFUL MARKETING

A sound program, sound management, and a sound finance plan as the three essentials for co-operative marketing projects are being emphasized at the series of district conferences being held by the I. A. A.

Two years ago farmers of Stephenson county began marketing dairy products co-operatively. They organized as the Stephenson County Co-operative Marketing Company. In order to build and equip their rapidly growing business, it was necessary to use $80,000. Only $55,000 of stock was sold. This proved a handicap and money had to be borrowed.

Too much attention was paid to doing a large volume of business; too little to costs of various operations.

The I. A. A. was asked to help analyze the situation. It conducted a business survey and the recommendations included:

1. A marketing agreement to be entered into between milk producers in the county and the co-operative association for the orderly marketing of the commodity.

2. That new money, through stock sale, be gotten into the business sufficient to handle it effectively.

3. That the company come under the provisions of the new co-operative marketing act.

4. That an appropriate and adequate system of records be installed.

5. That reserves, exclusive of overhead and expense, be created and maintained to take care of emergencies that may arise in business and to provide a basis for obtaining credit if needed.

These recommendations were approved by the company and they have placed organization men in the field to put the new program into operation.

—o—

CONCERNING THE PRODUCERS

With the opening of the Producers at Evansville, Ind., in September, Illinois live stock shippers now have the service of co-operative selling agencies at practically all markets to which live stock from the state is consigned.

The Chicago, St. Louis, Indianapolis, Peoria, and Evansville markets all have agencies operating under the plan of the National Live Stock Producers Association. There is no membership fee in any of these "co-ops" to farm bureau members. Anyone may ship to them, but under the ruling of the Packers and Stockyards Administration shippers must be members in order to participate in the refund.

Thirty per cent refund was sent back to shippers by the Chicago, Indianapolis and St. Louis agencies. Peoria refunded 20 per cent. Approximately $32,500 was mailed back to Illinois shippers by the Chicago Producers alone.

The Producers are proving that farmers can successfully see their live stock to market. The larger volume of business they handle the cheaper it can be done and the larger the refund to patrons. For instance the St. Louis Producers report net earnings of $43,398.51 or 32 per cent of the commissions charged during 1922. During the first six months of 1923, total earnings were $52,303.02 or over 40 per cent of the commissions charged.

—o—

TRUTH THROUGH RESEARCH

A summary of the agricultural and business situation from the monthly review of the Department of Research, American Farm Bureau Federation, appears on Page 4 of the Record under the heading "A. F. B. F. Research."

Each issue of the Record will contain a brief summary of the agricultural situation as determined by the Department of Research. These statements represent a great amount of study and work in searching for the truth in figures from many sources such as the United States Department of Agriculture, United States census, market reports, and economic bureaus.

At an early date the Department of Research will have figures which apply to Illinois agriculture alone and the Record will publish the findings.

This department of the American Farm Bureau has made perhaps the most thorough investigation of actual facts concerning sales of farm products of any agency. It secures the facts for the farmer. Never before the farm bureau was formed did farmers have in their employ statisticians to secure up-to-date economic truths.

This research work is being done primarily for the use of farmers so that they may know the facts of the agricultural situation and probable trend of prices. Large banks, mail order houses, implement firms and railroads all realize the value of the published figures from the Department of Research.

—o—

THE SLUMS KIDDIES

In the slums of Chicago, right here in our own state there are hundreds of little mouths that know nothing about the taste of oatmeal and cream, bacon and eggs, or even a red apple. The glory of sunshine, green grass and the orchard is not to be found in their world.

A farm vacation for 391 of these slums kiddies is the contribution made by the Illinois Agricultural Association, through its members this year.

No Action By Commission As Tax Situation Gets Hot

The Madison county Board of Review confesses that valuations on farm lands are higher than on city and town property, the Montgomery Board uses the argument that it can not reduce valuations of farm lands for the reason that it promised large corporations it would not make a reduction of over fifteen per cent, and in the mean time the State Tax Commission has not announced what it intends to do.

In short this brings the tax situation up to date.

Three weeks after the hearings before the State Tax Commission at Springfield, September 5 and 6, no action has been announced by the Commission.

At that time the Illinois Agricultural Association asked for reassessments in the seven counties of Kane, DuPage, Madison, Vermilion, Cass, Montgomery and Marion. The Commission promised that it would order reassessments in all of these counties if the Boards of Review did not equalize valuations of city and farm property of their own accord.

Following is the letter sent to the county Boards of Review by the Commission following the Springfield hearing:

Commission Letter

"Complaints having been filed with the State Tax Commission by the Illinois Agricultural Association, and a hearing held thereon, we desire to call your attention to the matters presented. Upon the hearing of this complaint, it was charged that the inequalities in valuations for assessment between classes of property in your county existed, with special reference to the valuations of real property in your county, which it is charged are not properly equalized with other classes of property and as between different taxing districts.

"Section 1 of Article 9 of the Constitution of Illinois and the Statutes passed in pursuance thereof, require that all property shall be so valued for assessment as to equitably distribute the tax burden. The fourth and fifth paragraphs of Section 35 of the Revenue Act of 1898 direct and empower the Boards of Review in each county to equalize individual assessments and also equalize classes of property in their respective counties, so that the rule of uniformity of assessed values prescribed by the Constitution may be obtained.

"Subdivision 1 of Section 2 of the Act creating the Tax Commission is mandatory and directs that the Tax Commission "Shall direct and supervise as provided by this Act, the assessment for taxation of all real and personal property in this State to the end that all assessments of property be made relatively just and equal."

"Considerable evidence was introduced at the hearing in support of the complaint of the Illinois Agricultural Association and their representatives requested that the State Tax Commission issue an order for the reassessment of the real property your county.

"Realizing the burden of expense which would be imposed upon the taxpayers of your county and the consequent delay which would result from an order for reassessment as outlined above, we urge you to make every possible effort to adjust such inequalities as exist between individual properties in your county and between classes of property and especially the real property, to the end that your final certification of values may represent as nearly as possible an equitable distribution of assessed values as between the several classes of property in your county.

"It is neither the desire nor the purpose of the Tax Commission to attempt to invade the province of your duties, or the exercise of your judgment under oath of office in the performance of your duties, but we respectfully urge your co-operation to the fullest extent in consideration of these complaints that they may be equitably adjusted and further action rendered unnecessary."

The Cass county board of Review immediately made adjustments in valuations. Since that time no other one of the seven counties has announced any action, and up to the time of going to press, the State Commission has not intimated how soon it would take action.

Madison Confesses

The Madison county Board of Review did not show up at the first hearing, however, made arrangements for a later hearing. Thomas Williamson, U. S. Attorney for the southern Illinois District represented the Madison Board.

In that hearing Chairman Pearl Smith of the Madison Board admitted that valuations on city and town property are not as high as valuations on farm lands. He said that the tax rate is so high in towns and cities that it would be an imposition to increase the valuations on a level with farm lands. He stated that farm lands were valued at about 60 per cent of their real value while city and village property was valued at 40 to 45 per cent of their real value.

State Commissioner Malone asked Mr. Smith if any consideration had been given to the reason why the tax rate was so high in cities. The question was not answered.

The other two members of the Madison Board stated they agreed with Chairman Smith that farm land valuations are higher than city property.

Montgomery Comes Back

At this second hearing, two members of the Montgomery Board of Review, who did not come to the first hearing, explained their reasons for not equalizing. A letter was read into the record written by the Mayor of Litchfield in which he said that Litchfield property is inflated from 25 to 40 per cent. It was stated that the Mayor is also in the real estate business.

Promised Corporations

A second argument used by the Montgomery Board for not equalizing farm land values was the fact that the Board had agreed with the large corporations of the county that it would not make a greater reduction in farm lands than fifteen per cent.

Clay Changes Mind

In the last issue of the Record it was stated that the Clay County Board of Review had announced their intenton of reducing farm land values 25 per cent and increasing Flora real estate nine per cent. The cut made by the board on farm lands amounts to 8.6 per cent and the increase on Flora real estate 6.5 per cent.

With this change farm lands of Clay county are valued on a basis of 50 per cent of their actual values and Flora property at only 40 per cent of its sales value.

Overcharged On Freight Bills? Write To I. A. A.

Farm bureau members are requested to send any freight bills on which they feel they have been overcharged to the I. A. A. Transportation Department. This applies to both carload and less than carload shipments of inbound and outbound shipments.

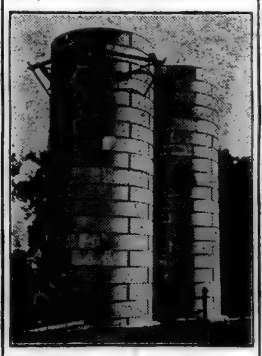
The department finds that many farmers have been incorrectly charged. This is particularly true on shipments of ground phosphate rock and agricultural limestone. In a great many instances the agents at smaller stations are unfamiliar with the freight rates and in many cases do not have the proper tariff to determine the correct rate.

All freight bills sent in will be handled promptly.

"Co-op Marketing—The Golden Rule of Agriculture"

What is the name of the new book published under the insignia of the American Farm Bureau Federation.

It tells the story of the development of growers' co-operation in America. It is a picture book of the co-operative marketing movement. It presents the facts as they exist. Every person interested in co-operative marketing will find value in this new book.



In size and material contained, it is equal to books selling for twice the cost. The price is $1.00 post-paid. Send your order to the American Farm Bureau Department of Information, 58 E. Washington St., Chicago; or to Publicity Department, Illinois Agricultural Associaties.

A.F.B.F. Committee To Work Out 1923 Program of Work

A Steering Committee charged with the duty of working out a program of work for the American Farm Bureau Federation for next year, was elected at a meeting of the Executive Committee held in the A. F. B. F. offices, September 22. This Committee will report back to the Executive Committee and to the annual convention to be held in Chicago, December 10 to 13.

The Committee is composed of Wm. H. Settle of Indiana, Frank App of New Jersey, John K. Orr of Texas and John F. Burton of Utah.

AT EL PASO

HERE'S the new phosphate storage plant of the El Paso Co-operative Phosphate Company in Woodford county. It has a capacity of 600 tons. The picture shows the plant in process of construction.

El Paso Farmers' Phosphate Plant Near Completion

The new phosphate storage plant at El Paso, Woodford county, is practically completed, states J. R. Bent, Director of the I. A. A. Phosphate-Limestone Department. It has a capacity of 600 tons and is the property of the El Paso Co-operative Phosphate Company, an association composed of leading farm bureau members in the vicinity of El Paso.

Both of the Tennessee phosphate quarries under contract to supply rock phosphate through the I. A. A. are running at full capacity, according to Mr. Bent. The department is keeping abreast of all orders and can fill new orders promptly.

Huey County Live Stock Shippers received $2,187.24 as their share of the 20 per cent refund declared by the Chicago Producers.

Producers Report Success At New Evansville Agency

The Evansville (Ind.) Producers Commission Association, the twelfth agency to open under the plan of the National Live Stock Producers Association, is handling a proportionate share or about one-third of the business on that market, although it only opened for business on September 1, states F. M. Simpson, General Manager of the National Live Stock Producer's Association.

The Evansville market is a small one, serving nearby counties in Indiana, Kentucky and Illinois. There are three commission firms operating on the market now, including the Producers.

Membership is free to live stock shipping association or farm bureau members. Others may obtain membership by paying a five dollar fee. Anyone may consign to the agency, but only members are eligible to the refund.

Formation of the new co-operative was made possible by the backing of state and county farm bureaus of Indiana, Kentucky and Illinois. The principal Illinois counties tributary to the market are White, Gallatin, Wabash and Edwards. L. L. Pinnell, New Haven, Gallatin county, represents Illinois on the board of directors of the agency.

MORE MEMBERS GIVE REASONS FOR RENEWING

"I renewed my membership in the farm bureau because I believe that it is slowly but surely bringing good results to the farmer," states J. E. G. of Menard county. "If we do not stand by the bureau in its struggles, we cannot expect it to succeed."

This is one of the replies that the Record received from farm bureau members in many counties of the state as to their reasons for renewal of membership. Here's some more of them:

"I consider it a farmer's duty to join an association that is trying to help him in his daily tasks. If he will seek the assistance of his farm adviser along with the corps of assistants of the state university and the benefits of legislation secured by the state and national farm bureaus, and will make use of the same, the money paid for membership is well invested." Thus writes E. T. B. of Marion county.

Two Big Reasons

R. M. G., Winnebago county, has many reasons for supporting organized agriculture and he tells the Record two which he considers sufficient to warrant his membership.

"First, I want to be identified with any movement which aims to uplift and advance the farmers' interests, and second, I believe that indirectly I more than receive the amount of my membership fee," says Mr. G.

Money Well Spent

"Every farmer should be a farm bureau member," states J. E. H. of Sangamon county, "because if is money well spent and it comes back tenfold. Where there is union there is power!"

F. B. of Coles county sees in organized agriculture the only hope for farmers but he desires more progress if his support is to be secured again.

Says Mr. B.: "I renewed my membership in the agricultural organization because I was for it, knowing that it is our only hope, but if it doesn't make more progress by the time my three years are up I don't think I will renew again."

DANGER AHEAD IN PACKER REQUEST FOR FREIGHT CUT

Would Eliminate Eastern Buyers From Chicago Market

On the grounds that eastern live stock buyers will be forced out of Chicago and other western markets, which will eliminate competition to the disadvantage of live stock producers, the Illinois Agricultural Association has intervened against interior Iowa packers in a case before the Interstate Commerce Commission asking for freight rate reductions on fresh meats and other packing house products moving east.

Interior Iowa packers asked for an eastern freight rate on dressed meats the same as the live stock rate, and on other packing house products, 75 per cent of live stock rates. Swift and Wilson packing companies filed a separate complaint asking for similar reductions which Iowa packers may receive. Other big packers intervened along with smaller companies, some on behalf of the original complainants and some on behalf of the defendants.

Eastern packers oppose the freight reduction, western packers favor it and packers doing business in both east and west are taking a neutral position.

Objections

The outstanding contention of the Illinois Agricultural Association is that these reductions would make it impossible for the eastern packer to buy in the Chicago market and would thus eliminate competition. That the activity of eastern packing interests is a very desirable competitive factor in Chicago, is shown by the fact that an average of 20 per cent of live stock on the Chicago market goes east. Lower prices to the producer caused by eliminating this competition would reflect to all markets of the country.

I. A. A. at Hearings

L. J. Quasey, Director of the Transportation Department, says that packers have not asked for increases in rates on live stock rates. However he is not sure that an increase would not be asked for if organized agriculture was not represented. The Transportation Department appeared at hearing June 14 and September 12, and again at New York, October 3.

RADIO PROGRAM

The Farm Bureau radio program from Station KYW, Chicago, 8:01 P. M. is as follows: on Sept. 9: "The Farmer's Wagon," by James R. Howard, former president of the A. F. B. F. and talk by A. R. Simpson of the Relations Department, A. F. B. F. On Sept. 16, C. V. Gregory, editor of Prairie Farmer, will speak.

LARGE GROWERS SIGN UP WITH FRUIT EXCHANGE

Five Large Orchards To Market Through Cooperative

Snedeker Brothers, owners of 200 acres of orchard in Macoupin county and four other large orchards in Jersey and Bond counties have signed contracts with the Illinois Fruit Exchange for the marketing of their produce.

The Shackelford orchards, located at Grafton, one of the largest orchards in Jersey county, is also a new member of the Exchange. The three largest commercial growers of Bond county have recently become members of the Exchange. They are Arthur Merrill and Son located at Mulberry Grove, Dr. L. A. Floyd whose orchards are located at Keysport, and Talmage Defrees of Smithsboro.

At a marketing conference in Centralia a month ago, Manager A. B. Leeper stated that one of the handicaps of the Exchange was the fact that few large growers were selling their produce through the Exchange.

Co-op Gets Prices

Mr. Leeper states the Exchange has sold, early apples, peaches and potatoes at higher prices than individual buyers secured. Peaches and potatoes sold at very satisfactory prices. The price of early apples was not very satisfactory, Mr. Leeper states, chiefly for the reason that there was a large amount of poor grade fruit on the market which hurt prices. However, Mr. Leeper says the Exchange price for early apples was better than the price received by individual growers or other organizations.

Ask Commission To Cut Canada Cattle Tariff

"Write to the Tariff Commission in Washington if you are interested in reducing the tariff on Canadian cattle," says C. A. Stewart, Director of the Live Stock Marketing Department.

This department of the Illinois Agricultural Association was instrumental in the filing of an application with the Tariff Commission asking for an investigation of the situation. The Association contends that the tariff resulted in Canadian cattle going to England which worked a hardship on American live stock producers by curtailing our supply of feeders and by hurting our export demand.

The preliminary investigation has been made and the commission will probably report soon. The President has the power to reduce the tariff up to the amount of 50 per cent if the Commission's report appears to justify it. Mr. Stewart says that now is the time to get our arguments to the Commission.

The Canadian cattle tariff amounts to 1½ cents a pound on all cattle weighing up to 1,050 pounds and 2 cents for cattle over that weight. Up to this date over 60,000 Canadian cattle have been shipped to England.

FOR RED TOP STORAGE

THIS warehouse, located at Flora, Clay county, is the property of the Red Top Growers Warehouse Company, a subsidiary of the Egyptian Seed Growers Exchange. The Exchange stores a large part of its pooled red top seed in the structure. It is 50x100 feet in size, has 14-ft. eaves and is constructed of red tile, covered with steel sheeting. Three large clipper mills clean the red top before storage.

Cleaning Red Top Seed Keeps Exchange Busy

Three large clipper mills are running ten hours a day in the big new warehouse of the Egyptian Seed Growers' Exchange at Flora, and they will continue to run for the next three months cleaning red top seed for the 800 grower members of the association. A second warehouse and cleaning establishment owned by the Exchange is located at Geff.

A little group of counties in Southern Illinois including Clay, Wayne, Marion, Jefferson, White and small portions of several others produce 95 per cent of all the red top seed in the country. Growers say that the buyers were well organized. They had their meetings and even divided territory in which each would buy. Whether this is true or not individual growers had little opportunity to know the size or worth of the crop. The buyers named the price.

Must Stick Together

It was to overcome this difficulty that the Exchange was organized. "The idea of all growers uniting together, doing their own cleaning and selling looks right to most all of the growers," says Manager Curt Anderson, "but not all of them are ready to ride the road that is necessary to get there. The buyers are not giving up their business without fighting. The Exchange has made some mistakes which it is best for us to admit to our members, and it will probably make more. The success of the Exchange depends upon how well it is managed, how efficient the organization can be in all of its dealings. But if we ever expect to market our seed we have got to go through the first stages of opposition and getting experience."

The Exchange started in late last year. It did not have its own warehouses or cleaning plants. The warehouse with which the Exchange contracted to do its cleaning did not start work until November.

Rather than doing its own selling, a contract was made with one of the largest seed dealers in the United States to sell the seed. The Board now believes that was a bad mistake. Mr. Anderson has reason to believe that the Exchange was boycotted in its sales work.

Crop Short

The crop of red top seed was short and prices were high. The Exchange sold eight carloads at high prices. Thirty-two carloads were held over. When the contract with the large seed company expired July first, other companies started to purchase and considerable seed has moved at very satisfactory prices.

"If growers are willing to base their judgment of the exchange over a five year term, I am sure it will be a winning game," said Mr. Anderson. "The dealers laughed at us at first, but they are active fighters now. The Exchange is a factor in affairs of red top seed now and we have a voice in the market. I'll say again that success depends upon the faith of members and the management of the Exchange."

The Exchange has applied to the St. Louis Intermediate credit bank for a loan of $100,000 to be used as advance on seed in their warehouses. It secured a loan of $40,000 on last years seed, but used only $4,800 of it.

MEET TO CONSIDER POULTRY PROBLEMS AT SPRINGFIELD

(Continued from Page One)

the chicks matured has not been uncommon.

"This plan," states Mr. Harper, "will insure farmers when buying chicks that they are getting the breed that is represented. It will weed out the unscrupulous hatcheries and will protect the large majority who desire to carry on an honest business. It will make a higher quality product which in time will make a reputation for the state that will bring greater profits. A quality product is the first step of importance in marketing."

White Diarrhea Control

The control of bacillary white diarrhea, one of the worst enemies of the poultry industry, will be discussed at the Springfield meeting. Dr. Robert Graham, Veterinarian at the U. of I., has made blood tests for white diarrhea in a large number of flocks. He states that infection ranges from two to 80 per cent. The estimated loss to Illinois poultrymen amounts to over a million dollars per year. The disease is preventable and can be eliminated from a flock by the blood test.

The Richland County Farm Bureau secured reductions from limestone companies which lowers the price of limestone to $1.90 per ton to any railroad point in the county. Previous to July it was $2.20 per ton to B. & O. points and $2.00 to I. C. points in the county.

Decision Gives Co-ops Exemption From Income Tax

A statement has recently been issued by the Internal Revenue Department showing how co-operative associations may be exempt from income tax. This clears up a question which has been asked by many co-operative buying and selling organizations.

In every case where exemption is given, the organization will be required to show that the ownership of capital stock has been restricted as far as possible to actual producers and that the association has not voluntarily sold or issued stock to non-producers.

A. F. B. F. Research

According to the monthly review of the agricultural and business situation published September 20 by the Department of Research, American Farm Bureau Federation, a very favorable trend is shown in the general economic situation of the nation.

Out of 24 agricultural commodities, 14 are above a year ago, nine are below, and one remains the same. Compared with last month, 14 are higher, seven are lower and three are unchanged.

Total cash income gives promise of being greater this present crop year than last for the following commodities: corn and other cereals except wheat, cotton, potatoes, dairy products and poultry products. Hogs will probably yield less income. Tobacco, cattle, sheep and wool should bring about the same gross receipts as last year.

Wheat

Wheat, from its low point last month rebounded nine cents per bushel and then began to decline when the larger crop estimates from Canada were published. Figures of exportable surplus for the United States and Canada, now current in the grain trade, range as high as 650 million bushels compared with around 500 million bushels last year. There appears to be no foundation for this present high estimate of surplus in face of a total supply for the two countries, including both crop and carry-over, of 1369 millions bushels this year compared with 1360 last year.

Industrial

Industrial production shows no let-up. Manufacturing output which was 23 per cent below normal in the middle of 1921, the period of low activity, is now about 15 per cent above normal. Building operations which gave some sign of slumping two and three months ago, are now showing a greater gain over last year.

Freight car loadings continue at record levels.

Prices

Central market prices of farm products as reported by the U. S. Department of Labor, are three per cent above last month and six per cent higher than last year. Decline from last year in prices of non-agricultural commodities came exclusively in the fuel and lighting group. The gain over a year ago in farm purchasing power in terms of the price ratio is therefore largely theoretical as the farmers' purchases of these items are comparatively small.

Trends covering the last three or four months are more favorable and are slowly narrowing the gap between farm and other prices at points that will yield practical benefits.

NEW CO-OP LAW BASIS FOR VITA-GOLD COMPANY

Stephenson County Producers Organizing Under New Contract

After a financial survey had been made by the I. A. A. for the Stephenson County Co-operative Marketing Company, Freeport, formation of a new non-profit, non-stock organization to come under the provisions of the new Illinois Co-operative Marketing Act was decided upon. This new company was incorporated on September 17 as the Vita-Gold Dairy Products Company.

The old marketing company will be re-financed to be used as a holding company to hold the physical assets and property and the issuing of stock to increase its capital. The financial survey showed that the old "co-op" was under-capitalized, the amount invested in plant and equipment exceeding the amount of capital stock by almost $30,000.

A contract will be entered into between the old company and the new one to use the facilities of the old company and to handle and prepare the milk and cream for market.

The active campaign for membership in the Vita-Gold Dairy Products Company has started with Robert N. Clark in charge of organization.

The producers' contract for the new company is the standard one worked out by the I. A. A., and contains several new and desirable features. It is already being used by the Rock Island Co-operative Dairy Company.

Are Your Freight Bills Correct? We Can Check Them for You.

UNIVERSITY OF ILLINOIS,
URBANA, ILLINOIS, 10-N.L.-7-22

Illinois Agricultural Association RECORD

Volume 1 | Oct. 20, 1923 | Number 15

IMPROVED QUALITY IS AIM OF POULTRY INSPECTION PLANS

Plans Launched To Certify Flocks and Hatcheries; I. A. A. Backs Move

For the purpose of improving quality and building a reputation for Illinois poultry products, a plan of inspection and certification of farm poultry flocks and hatcheries was inaugurated at a meeting of fifty poultry breeders and hatchery men at Springfield, October 10.

The Division of Standardization and Inspection of the State Department of Agriculture will inspect farm poultry flocks for purity of breed, production qualities and disease. There will be a further inspection service for hatcheries which will use eggs from inspected farm flocks only. Hatcheries passing the required standard will be placed on an accredited list and their products will carry a state accredited label.

Guarantees Chicks

"This plan will not only insure hatcheries of quality eggs, but will be a protection against unscrupulous hatcheries and will be a guarantee of quality baby chicks to the purchaser," said Lyle Funk of Bloomington, chairman of the meeting.

A second part of the plan is to test farm flocks for Bacillary White Diarrhea, the most dangerous disease to poultry, and placing disease free flocks on a state accredited list similar to state accredited herds of cattle free from tuberculosis. State Veterinarian, Dr. F. A. Laird will supervise this work. Accredited veterinarians will take blood samples and tests will be made by the University of Illinois.

To Appoint Committee

The meeting directed D. E. Hale of Chicago to appoint a committee composed of representatives of breeders, hatchery owners, University of Illinois, Illinois Agricultural Association, State Department of Agriculture and Illinois Poultry Breeders Association to promote and carry out the plan. Representatives of these associations were present at the meeting.

At the close of the general meeting, hatchery owners formed a state association and voted to affiliate with the International Baby Chick Association.

OVERLOADING THE BOAT

Important Facts Revealed At District Conferences

That many co-operative live stock shipping associations are standing still and some are falling off in business, was one of the outstanding things disclosed at the first five district conferences held at Carbondale, Belleville, Freeport, DeKalb and Wheaton.

This is not true with all associations, but judging from discussions, it is a real factor to be faced. Another weakness is that not all shipping associations are shipping to the Producers' Commission companies.

As these things were discovered, the conferences proceeded to the cause for these conditions. Here are the reasons:

Discredit Co-operation

Stock buyers and old-line commission companies are spreading false stories to discredit co-operative effort.

Farm bureaus and shipping associations are doing little to overcome this opposition.

The only meetings of shipping associations are annual meetings and they are poorly attended.

No remedies were discussed for these conditions.

On the question of increasing the business of Producers' Commission Companies, it was suggested that salesmen be placed in the field. C. A. Stewart, Live Stock Marketing Director of the I. A. A., announced that definite arrangements had been made with the Producers' Companies for employing three fieldmen to work with Illinois shipping associations.

Farm Bureau Relation

On the question of farm bureau relation to shipping associations, the trend of discussion was to the effect that there would be some definite relations. However, it was not expected that a relation could be maintained unless some definite service is rendered the shipping associations by the farm bureaus. Secretary George Fox said that farm bureaus cannot afford to talk co-operative marketing unless they continue a lively interest in it.

Fruits and Potatoes

Local units of the Illinois Fruit Exchange are doing a satisfactory business, it was stated at Carbondale and Belleville. Education and increased membership are needed. Manager A. B. Leeper announced that a campaign has been planned for this winter. A need and desire for co-operative marketing of potatoes was expressed at Belleville. This district produces one-fifth of the potatoes of the state.

Over-production of milk loomed up as a problem at Wheaton and

(Continued on page 4)

National Judging Contest Won By Whiteside Team

In competition with teams from many other states, the Whiteside county dairy judging team, consisting of Donald Williams, Elwyn Folkers, and Harold Gaulrapp, captured first honors in the National Boys' Dairy Judging Contest at the National Dairy Show at Syracuse, N. Y.

This year's team, coached by Farm Adviser L. O. Wise, is the second team from Whiteside county to win the national contest, a team from the county winning last year at St. Paul.

Jefferson and White Counties Sign With I. A. A.

Jefferson and White county farm bureaus have joined the Illinois Agricultural Association and American Farm Bureau Federation. This leaves only two county organizations in Illinois that do not have a joint membership in the state and national associations.

White county starts a membership campaign next Monday and Jefferson county started on October 10. The two counties which are not members of the I. A. A. are Calhoun and Massac. Calhoun county is considering joining when their organization work starts this fall.

Field Men Will Be Employed For Producer Co-ops

Authority was given the I. A. A. Live Stock Marketing Department at the last meeting of the Executive Committee to make arrangements with the Chicago, St. Louis, Indianapolis, and Peoria Producers' agencies to employ field men who will devote their entire time to work for the Producers.

These men will be employes of the I. A. A. to work under the direction of the Live Stock Marketing Department, but will be financed exclusively by the selling agencies.

They will devote their entire time to calling on managers, boards of directors of shipping association, straight load shippers, attending live stock meeting, shipping association meetings, and will assist in organizing shipping associations.

Arrangements have already been made with Chicago, Peoria, and St. Louis agencies and the activity will start by November 1 if capable men can be found to fill the positions.

WHEAT MARKETING ON NATION-WIDE BASIS IS PLANNED

Ex-Governor Lowden Heads Committee To Formulate Plan of Action

At the call of Judge Robert Bingham of Louisville, Kentucky, a meeting of men identified with cooperative marketing movements of the United States and others met in Chicago, October 8, and formulated plans for a nation-wide organization of wheat growers into standard commodity marketing associations.

According to the statement issued, state associations will be organized along the lines similar to cotton and tobacco cooperatives and to the wheat marketing associations in the northwest and southwest states.

Executive Committee

An executive committee was formed headed by Ex-Governor Frank O. Lowden of Illinois. Other members of the committee are Robert Bingham, W. H. Settle of Indiana, Geo. C. Jewett of Minnesota, Carl Williams of Oklahoma, Dan Wallace of Minnesota, and Senator Arthur Capper of Kansas.

Eugene Meyer, Jr., Managing Director of the War Finance corporation was a visitor at the conference. He pledged the support of the War Finance Corporation. Frank W. Mondell of the War Finance Corporation assured the confernce that their work would have the approval of President Coolidge and the national administration.

Walton Peteet, speaking for the American Farm Bureau pledged the support of that organization. Mr. Jewett, representing nine northwest cooperative wheat marketing associations, pledged their support.

Aaron Sapiro was employed as council.

Each state will direct its own campaign with the general approval and support of the National Committee, according to the statement. The national committee was not named.

Others Present

Others present at the meeting named in the statement are Geo. A. Buis of the American Wheat Growers Association, J. C. Chappelle of Kansas, Alexander Legge of Chicago, Bernard Baruch of New York, C. V. Gregory and Herman Steen of Chicago, and H. S. Yohe of the U. S. Department of Agriculture.

LARGE GROWERS SIGN UP WITH FRUIT EXCHANGE

Five Large Orchards To Market Through Cooperative

Snedeker Brothers, owners of 200 acres of orchard in Macoupin county and four other large orchards in Jersey and Bond counties have signed contracts with the Illinois Fruit Exchange for the marketing of their produce.

The Shackelford orchards, located at Grafton, one of the largest orchards in Jersey county, is also a new member of the Exchange. The three largest commercial growers of Bond county have recently become members of the Exchange. They are Arthur Merrill and Son located at Mulberry Grove, Dr. L. A. Floyd whose orchards are located at Keysport, and Talmage Defrees of Smithsboro.

At a marketing conference in Centralia a month ago, Manager A. B. Leeper stated that one of the handicaps of the Exchange was the fact that few large growers were selling their produce through the Exchange.

Co-op Gets Prices

Mr. Leeper states the Exchange has sold, early apples, peaches and potatoes at higher prices than individual buyers secured. Peaches and potatoes sold at very satisfactory prices. The price of early apples was not very satisfactory, Mr. Leeper states, chiefly for the reason that there was a large amount of poor grade fruit on the market which hurt prices. However, Mr. Leeper says the Exchange price for early apples was better than the price received by individual growers or other organizations.

Ask Commission To Cut Canada Cattle Tariff

"Write to the Tariff Commission in Washington if you are interested in reducing the tariff on Canadian cattle," says C. A. Stewart, Director of the Live Stock Marketing Department.

This department of the Illinois Agricultural Association was instrumental in the filing of an application with the Tariff Commission asking for an investigation of the situation. The Association contends that the tariff resulted in Canadian cattle going to England which worked a hardship on American live stock producers by curtailing our supply of feeders and by hurting our export demand.

The preliminary investigation has been made and the commission will probably report soon. The President has the power to reduce the tariff up to the amount of 50 per cent if the Commission's report appears to justify it. Mr. Stewart says that now is the time to get our arguments to the Commission.

The Canadian cattle tariff amounts to 1½ cents a pound on all cattle weighing up to 1,050 pounds and 2 cents for cattle over that weight. Up to this date over 60,000 Canadian cattle have been shipped to England.

FOR RED TOP STORAGE

THIS warehouse, located at Flora, Clay county, is the property of the Red Top Growers Warehouse Company, a subsidiary of the Egyptian Seed Growers Exchange. The Exchange stores a large part of its pooled red top seed in the structure. It is 50x100 feet in size, has 14-ft. eaves and is constructed of red tile, covered with steel sheeting. Three large clipper mills clean the red top before storage.

Cleaning Red Top Seed Keeps Exchange Busy

Three large clipper mills are running ten hours a day in the big new warehouse of the Egyptian Seed Growers' Exchange at Flora, and they will continue to run for the next three months cleaning red top seed for the 800 grower members of the association. A second warehouse and cleaning establishment owned by the Exchange is located at Geff.

A little group of counties in Southern Illinois including Clay, Wayne, Marion, Jefferson, White and small portions of several others produce 95 per cent of all the red top seed in the country. Growers say that the buyers were well organized. They had their meetings and even divided territory in which each would buy. Whether this is true or not individual growers had little opportunity to know the size or worth of the crop. The buyers named the price.

Must Stick Together

It was to overcome this difficulty that the Exchange was organized. "The idea of all growers uniting together, doing their own cleaning and selling looks right to most all of the growers," says Manager Curt Anderson, "but not all of them are ready to ride the road that is necessary to get there. The buyers are not giving up their business without fighting. The Exchange has made some mistakes which it is best for us to admit to our members, and it will probably make more. The success of the Exchange depends upon how well it is managed, how efficient the organization can be in all of its dealings. But if we ever expect to market our seed we have got to go through the first stages of opposition and getting experience."

The Exchange started in late last year. It did not have its own warehouses or cleaning plants. The warehouse with which the Exchange contracted to do its cleaning did not start work until November.

Rather than doing its own selling, a contract was made with one of the largest seed dealers in the United States to sell the seed. The Board now believes that was a bad mistake. Mr. Anderson has reason to believe that the Exchange was boycotted in its sales work.

Crop Short

The crop of red top seed was short and prices were high. The Exchange sold eight carloads at high prices. Thirty-two carloads were held over. When the contract with the large seed company expired July first, other companies started to purchase and considerable seed has moved at very satisfactory prices.

"If growers are willing to base their judgment of the exchange over a five year term, I am sure it will be a winning game," said Mr. Anderson. "The dealers laughed at us at first, but they are active fighters now. The Exchange is a factor in affairs of red top seed now and we have a voice in the market. I'll say again that success depends upon the faith of members and the management of the Exchange."

The Exchange has applied to the St. Louis Intermediate credit bank for a loan of $100,000 to be used as advance on seed in their warehouses. It secured a loan of $40,000 on last years seed, but used only $4,800 of it.

MEET TO CONSIDER POULTRY PROBLEMS AT SPRINGFIELD

(Continued from Page One)

the chicks matured has not been uncommon.

"This plan," states Mr. Harper, "will insure farmers when buying chicks that they are getting the breed that is represented. It will weed out the unscrupulous hatcheries and will protect the large majority who desire to carry on an honest business. It will make a higher quality product which in time will make a reputation for the state that will bring greater profits. A quality product is the first step of importance in marketing."

White Diarrhea Control

The control of bacillary white diarrhea, one of the worst enemies of the poultry industry, will be discussed at the Springfield meeting. Dr. Robert Graham, Veterinarian at the U. of I., has made blood tests for white diarrhea in a large number of flocks. He states that infection ranges from two to 80 per cent. The estimated loss to Illinois poultrymen amounts to over a million dollars per year. The disease is preventable and can be elliminated from a flock by the blood test.

The Richland County Farm Bureau secured reductions from limestone companies which lowers the price of limestone to $1.90 per ton to any railroad point in the county. Previous to July it was $2.20 per ton to B. & O. points and $2.00 to I. C. points in the county.

Decision Gives Co-ops Exemption From Income Tax

A statement has recently been issued by the Internal Revenue Department showing how co-operative associations may be exempt from income tax. This clears up a question which has been asked by many co-operative buying and selling organizations.

In every case where exemption is given, the organization will be required to show that the ownership of capital stock has been restricted as far as possible to actual producers and that the association has not voluntarily sold or issued stock to non-producers.

A. F. B. F. Research

According to the monthly review of the agricultural and business situation published September 20 by the Department of Research, American Farm Bureau Federation, a very favorable trend is shown in the general economic situation of the nation.

Out of 24 agricultural commodities, 14 are above a year ago, nine are below, and one remains the same. Compared with last month, 14 are higher, seven are lower and three are unchanged.

Total cash income gives promise of being greater this present crop year than last for the following commodities: corn and other cereals except wheat, cotton, potatoes, dairy products and poultry products. Hogs will probably yield less income. Tobacco, cattle, sheep and wool should bring about the same gross receipts as last year.

Wheat

Wheat, from its low point last month rebounded nine cents per bushel and then began to decline when the larger crop estimates from Canada were published. Figures of exportable surplus for the United States and Canada, now current in the grain trade, range as high as 650 million bushels compared with around 500 million bushels last year. There appears to be no foundation for this present high estimate of surplus in face of a total supply for the two countries, including both crop and carry-over, of 1369 millions bushels this year compared with 1360 last year.

Industrial

Industrial production shows no let-up. Manufacturing output which was 28 per cent below normal in the middle of 1921, the period of low activity, is now about 15 per cent above normal. Building operations which gave some sign of slumping two and three months ago, are now showing a greater gain over last year.

NEW CO-OP LAW BASIS FOR VITA-GOLD COMPANY

Stephenson County Producers Organizing Under New Contract

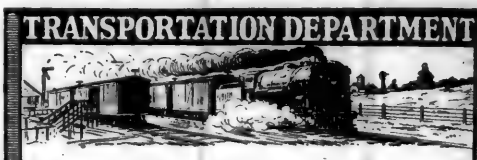
After a financial survey had been made by the I. A. A. for the Stephenson County Co-operative Marketing Company, Freeport, formation of a new non-profit, non-stock organization to come under the provisions of the new Illinois Co-operative Marketing Act was decided upon. This new company was incorporated on September 17 as the Vita-Gold Dairy Products Company.

The old marketing company will be re-financed to be used as a holding company to hold the physical assets and property and the issuing of stock to increase its capital. The financial survey showed that the old "co-op" was under-capitalized, the amount invested in plant and equipment exceeding the amount of capital stock by almost $30,000.

A contract will be entered into between the old company and the new one to use the facilities of the old company and to handle and prepare the milk and cream for market.

The active campaign for membership in the Vita-Gold Dairy Products Company has started with Robert N. Clark in charge of organization.

The producers' contract for the new company is the standard one worked out by the I. A. A., and contains several new and desirable features. It is already being used by the Rock Island Co-operative Dairy Company.



Freight car loadings continue at record levels.

Prices

Central market prices of farm products as reported by the U. S. Department of Labor, are three per cent above last month and six per cent higher than last year. Decline from last year in prices of non-agricultural commodities came exclusively in the fuel and lighting group. The gain over a year ago in farm purchasing power in terms of the price ratio is therefore largely theoretical as the farmers' purchases of these items are comparatively small.

Trends covering the last three or four months are more favorable and are slowly narrowing the gap between farm and other prices at points that will yield practical benefits.

IMPROVED QUALITY IS AIM OF POULTRY INSPECTION PLANS

Plans Launched To Certify Flocks and Hatcheries; I. A. A. Backs Move

For the purpose of improving quality and building a reputation for Illinois poultry products, a plan of inspection and certification of farm poultry flocks and hatcheries was inaugurated at a meeting of fifty poultry breeders and hatchery men at Springfield, October 10.

The Division of Standardization and Inspection of the State Department of Agriculture will inspect farm poultry flocks for purity of breed, production qualities and disease. There will be a further inspection service for hatcheries which will use eggs from inspected farm flocks only. Hatcheries passing the required standard will be placed on an accredited list and their products will carry a state accredited label.

Guarantees Chicks

"This plan will not only insure hatcheries of quality eggs, but will be a protection against unscrupulous hatcheries and will be a guarantee of quality baby chicks to the purchaser," said Lyle Funk of Bloomington, chairman of the meeting.

A second part of the plan is to test farm flocks for Bacillary White Diarrhea, the most dangerous disease to poultry, and placing disease free flocks on a state accredited list similar to state accredited herds of cattle free from tuberculosis. State Veterinarian, Dr. F. A. Laird will supervise this work. Accredited veterinarians will take blood samples and tests will be made by the University of Illinois.

To Appoint Committee

The meeting directed D. E. Hale of Chicago to appoint a committee composed of representatives of breeders, hatchery owners, University of Illinois, Illinois Agricultural Association, State Department of Agriculture and Illinois Poultry Breeders Association to promote and carry out the plan. Representatives of these associations were present at the meeting.

At the close of the general meeting, hatchery owners formed a state association and voted to affiliate with the International Baby Chick Association.

OVERLOADING THE BOAT

Important Facts Revealed At District Conferences

That many co-operative live stock shipping associations are standing still and some are falling off in business, was one of the outstanding things disclosed at the first five district conferences held at Carbondale, Belleville, Freeport, DeKalb and Wheaton.

This is not true with all associations, but judging from discussions, it is a real factor to be faced. Another weakness is that not all shipping associations are shipping to the Producers' Commission companies.

As these things were discovered, the conferences proceeded to the cause for these conditions. Here are the reasons:

Discredit Co-operation

Stock buyers and old-line commission companies are spreading false stories to discredit co-operative effort.

I. A. A. STAND ON GRAIN MARKETING

The Illinois Agricultural Association is in favor of co-operative grain marketing.

The Association has demonstrated this fact by appropriating large sums of money and spending much time and effort in perfecting and carrying out plans.

The Association has not endorsed any one plan of co-operative grain marketing since the start of the U. S. Grain Growers, Inc. Its policy on grain marketing is expressed in a resolution unanimously endorsed by Mid-West State Farm Bureaus, and subsequently approved by the Executive Committee of the I. A. A.

The resolution follows:

"Resolved by this meeting of President and Secretaries of Mid-West Farm Bureaus in session at Chicago, July 3, 1923:

"1. That the American Farm Bureau Federation be requested through its Co-operative Marketing Department, to formulate a national grain marketing policy, based on organization of producers by states, with long-term contracts, pooling by grades on basis of milling value, core to be dealt with separately and that appropriate action be taken to conduct organization campaigns in the several grain growing states in the order of their readiness to begin such work.

"2. That we request the Executive Committee of the U. S. Grain Growers to co-operate with the American Farm Bureau Federation in carrying out the program outlined above.

"3. That pending the organization of state co-operative grain marketing organizations as above, we approve the plan of the Board of Directors of the U. S. Grain Growers, Inc., to engage in grain selling on the plan submitted to us today, the same to be merged into or supplanted by the organizations contemplated in paragraph 1 hereof at such time as the latter are ready to begin operations."

In this resolution a definite plan of co-operative grain marketing is asked for. It states that the plan devised shall carry provision for merging or supplementing the U. S. Grain Growers, Inc. The Illinois Agricultural Association believes the plan expressed in the mid-west resolution to be correct and fundamentally right.

The new national plan of wheat marketing, announced in this issue of the Record, has not been submitted to the Association otherwise than in the form of a press statement. It is the desire of the Illinois Agricultural Association that the plans of the new association will carry out the principles expressed by the mid-west committee.

LET'S FACE THE FACTS

The district conferences were scheduled primarily for farm bureau and co-operative marketing association leaders to tell about their troubles, to find the weak links in their work. Here are some of the troubles and weak links disclosed at the first five conferences that must be faced and solved.

A few live stock shipping associations are falling off in business and many are standing still.

Local stock buyers and old-line commission companies are working hard to get business, even going to the extent of spreading false stories to discredit co-operative effort.

Farm bureaus and shipping associations are doing little to overcome this opposition, or to increase or hold business.

Many co-operative shipping associations are sending only a part of their business to co-operative commission companies.

The manager is the leading spirit in many shipping associations, little part being taken by officers or executive committees.

These weaknesses were reiterated by live stock shippers at several meetings. In the same discussions where these faults were told, opinion was unanimous in favor of co-operative marketing of live stock and many experiences were told of the good work of shipping associations and Producers' commission companies.

One remedy has already been started to overcome these weak links. The Illinois Agricultural Association has perfected arrangements with the Producers' commission companies at Chicago, Peoria, St. Louis and Indianapolis for paying the expenses of three men to work in the field with local shipping associations, under the direction of the I. A. A. Live Stock Marketing Department.

A big part of the problem must be solved by the local association. There were no discussions or suggestions how shipping association associations or county farm bureaus could overcome these problems, at the conferences. In counties where these conditions exist these problems must be faced with action.

—o—

LEGISLATIVE PROGRAM OF A. F. B. F.

At a luncheon with President Coolidge, members of the American Farm Bureau Legislative Committee outlined the legislative program of the Federation for the next session of Congress.

It is restricted to eight general points, as follows:

1. **Immigration.**
   Favors further restriction.
2. **Price Fixing.**
   Opposes governmental price fixing.
3. **Taxation.**
   Opposes sales tax.
4. **Consolidation of Railroads.**
   Decision held pending referendum.
5. **Merchant Marine.**
   Wants Merchant Marine without subsidy.
6. **Crop Insurance.**
   Desire government to investigate.
7. **Truth-in-Fabric.**
   Insists goods to be labeled showing percentage of virgin wool.
8. **Muscle Shoals.**
   Favors original Ford offer and amortization plan.

—o—

S. B. 460 AGAIN

Senate Bill 460, passed by the last State Legislature comes into swing again on the program of inspection, certification and state accrediting of farm poultry flocks and hatcheries.

The work of inspection will be carried on by the Division of Standardization and Inspection, created by the new act. It is the machine that makes it possible to carry out the poultry program.

S. B. 460 is one of the several bills which the I. A. A. worked for in the last legislature.

CO-OP MARKETING RESULTS

Co-operative fruit and vegetable marketing saved the situation at Quincy.

There was practically no market for strawberries at Quincy this year. The Quincy local of the Illinois Fruit Exchange sold 8,320 crates of strawberries at a net average of $2.10 to growers.

At the same time Quincy dealers were offering 75 cents per crate for cabbage, the Exchange sold carloads at a net average to growers of $1.04.

Local dealers offered from 50 to 60 cents a bushel for potatoes. The Exchange sold 26 carloads of potatoes for 78 cents net to growers.

These are the facts that can be proved by figures. What would have happened to prices of strawberries, cabbage and potatoes, if all the business of the Exchange had been dumped on the Quincy market?

—o—

FOR POULTRY BREEDERS

Problems arose with the passing of the setting hen and with the coming of the baby chick business. One of them was the unscrupulous hatchery which sold White Leghorn chicks that matured with a few black feathers. Another was the problem of hatcheries getting eggs that could be relied upon.

The Illinois Agricultural Association studied this problem, visited other states, found that Wisconsin had a plan of inspection, certification and accrediting that is working. Poultry interests of Illinois were called together and the problem was talked over.

All forces joined together at Springfield, October 10, and inaugurated a program to overcome these problems and will improve quality and build a reputation for Illinois poultry products. This is progress for the poultry industry of Illinois. Let's make it work.

—o—

FACTS ON SALES

Last year Illinois farmers sold almost $469,500,000 worth of farm products; in 1921, $386,000,000 worth; in 1920, $564,000,000 worth; in 1919, $770,500,000 worth; and in the pre-war year, 1909, sales totalled $381,400,000.

Corn and hogs brought Illinois farmers 34 per cent of last year's cash receipts; cattle supplied 12 per cent; dairy products, 18 per cent; and poultry, 8 per cent.

These are facts derived from an exhaustive study of sales of Illinois farm products over a period of several years, by the Department of Research, American Farm Bureau Federation.

These facts, together with more detailed ones, are told on page 4 of this issue of the Record. Study them.

—o—

NO REASSESSMENT DECISION

The I. A. A. has no information from the State Tax Commission as to any steps taken to correct the inequalities of valuations between city and farm real estate in the counties on which hearings were held before the Commission.

We hope to give this information in the next issue of the Record.

—o—

TUNE IN ON THE FARM BUREAU

Every Tuesday night at 9:01, standard time, the farm bureau's voice is "in the air" from Station KYW, Chicago. Wave length is 536 meters. At that time the American Farm Bureau Federation presents two speakers with a worth-while message for farmers. Fifteen-minute talks are given by each individual.

Announcements of programs are given in the Record as they are available in advance. Have you tuned in yet?

—o—

The unanimous sentiment of delegates at the National Tax Conference in West Virginia was that a comparison of actual sales values is the most practical way to determine real values of real estate for tax purposes. This upholds the method used in tax work of the I. A. A. and county farm bureaus this year.

Apple Marketing and Transportation Are Big Problems of Calhoun County

The party will visit the cider mill first, Farm Adviser J. H. Allison announced, and there was a scramble to find jugs.

The Calhoun County Farm Bureau had invited a little party to tour the county and see the apple industry. In the party there were Professors Lloyd and Brock of the University, Manager Leeper and A. O. Eckert, of the Illinois Fruit Exchange, Walton Peteet, Marketing Director of the American Farm Bureau, and from the Illinois Agricultural Association, President S. H. Thompson and Earl Smith, executive committee member from the district.

After the cider mill raid, the party drove for nine miles up and down crooked, narrow roads from Hardin to Hamburg, and every foot of the way within a stone's throw of heavy-laden apple orchards.

A half million barrels of apples will go to market from Calhoun this season. That comes close to being half of the apple production of the state. When the young orchards of the county get into bearing, that figure will reach the million mark on good production years. Mr. Allison told the party.

No Better Quality

On the question of quality all of the horticulturists agreed there is no better to be found any place than in Calhoun. No, not even in the far northwest. Growers opened up barrels to show the quality when we visited packing crews and some of them took out a stave to prove that the middle of the barrel was the same as the ends. There was no question about quality.

Mr. Eckert compared methods with St. Clair county and discovered that it takes about half of the spraying in Calhoun that it does in other southern Illinois apple districts. Part of the reason for that is because there are no apple orchards full of disease, Mr. Allison thinks. He does not know of an orchard in the county that is not sprayed.

It was about noon when the party reached the top of the ridge with a view of the Mississippi in the valley. The old gentleman on the ferry boat had told us there was a ridge from one end of the county to the other. At some points the Illinois river can be viewed on one side and the Mississippi on the other. In his description of the county he said there was not a railroad or negro in the county. He might have added, not a half-mile of road without a crook.

A Marketing Problem

Down a winding road the party drove, headed for the river town, Hamburg. Three teams with sixty barrels of apples pulled to a siding to let the party pass.

On the streets of Hamburg there were six thousand barrels of apples, stacked up in front of business houses right out to the wagon path. "I have apples here on the streets that have been here a week," said Banker Spencer Waldron. Mr. Leeper added that 24 hours in the sun would ripen the fruit as much as thirty days in the cooler.

With all of the wonderful quality, color and enormous production, Calhoun county has some problems. Those 6,000 barrels were waiting for boats. The big boats can make only two trips to St. Louis a week and there are more apples than they can carry. The party was told that conditions are better this year than last. "But if they don't stack up here, they stack up on the levee at St. Louis," Mr. Allison said.

Dump On Market

"The trouble is that we market the whole crop in a very few weeks," stated Mr. Allison in telling about marketing methods. "We dump them on the market. Close to a hundred thousand barrels are shipped out of the county every week for six weeks. Most all of them are consigned to commission men in St. Louis. Only a few are sold in the orchard or put in the cooler. The buyers take advantage of our dumping and they buy them at their own price."

The party hurried back to Hardin for a meeting with the executive committee of the farm bureau. On the way, Mr. Allison told about the Farm Bureau Federal Farm Loan Association in the county, the Farm Bureau Mutual Fire Insurance Company, about pruning and spraying demonstrations and the purchase of spray material, and he wound up by saying "The future work of the farm bureau must be to improve our marketing methods."

Calhoun Sets Price

The question was faced squarely at the farm bureau meeting. Transportation and marketing are the big problems of Calhoun county farmers. Mr. Peteet talked about co-operative marketing for a little while and he promised to come back and tell the whole county about it. Manager Leeper of the Fruit Exchange said it was a purely selfish mission that brought him there. "Calhoun county apples set the price that we sell on, and we are anxious to see you tackle the marketing problem," he said.

President Thompson told the Executive Committee that the Illinois Agricultural Association was organized upon the principle that there are problems in every county that can not be solved by farmers within that county alone. "Marketing is one of those problems," he said. "Transportation is another and taxation is a third."

Mr. Peteet carried a gallon jug of cider with him when the party was loaded into an auto, ferried across the river and taken to railroad towns. It is said that the cork blew out of the jug while he was in a restaurant in St. Louis that evening.

APPLES, APPLES EVERYWHERE

HERE'S a scene at the pier on the Mississippi at Hamburg, Calhoun county, showing hundreds of barrels of apples from that county ready for shipment by boat to the St. Louis market. Hamburg is one of the chief shipping points for apples in Calhoun county. The county has no railroads.

Big Increase In Use of Phosphate Among Producers

Phosphate shipments over Illinois showed an increase of 75 per cent in September, 1923, over September last year, according to J. R. Bent, Director of the I. A. A. Phosphate-Limestone Department. Limestone shipments show a big increase also.

Mr. Bent attributes this increase to better financial conditions among farmers and to the fact that many have learned the value of the use of phosphate and limestone through actual experience.

A. F. B. F. Receipts Show Illinois At Head of List

The Illinois Agricultural Association led all other state farm bureaus in amount paid in to the treasury of the American Farm Bureau Federation from January 1 to September 1, 1923.

The I. A. A. had paid in $25,562.40. Iowa ranked second with $25,304.70, while Ohio was third with $17,176.29. Illinois headed the list in amount paid in for 1920 and 1922, and was third in 1921, being surpassed by Iowa and Ohio.

Illinois Broom Corn Growers In Plan To Organize

Broom corn growers in the district of which Coles county is the center have appointed a committee of seven to formulate plans toward the formation of a permanent organization for the orderly marketing of the crop raised in that section.

This is the outcome of a temporary organization formed last year for the growers to better inform themselves on market conditions, acreage, and other factors affecting the price received for the broom corn crop.

Some very well attended meetings have been held in Mattoon by the farmers interested, as many as 400 to 500 being in attendance. Frank Harry, Mattoon, is chairman of the temporary organization, and H. E. O'Hair, Bushton, is secretary.

Illinois, Oklahoma, and Texas are the leading states for the production of broom corn in the country. Oklahoma growers already have an organization and are co-operatively marketing this year's crop.

STEERING COMMITTEE

A mistake was made in naming the American Farm Bureau Steering Committee in the October 5 issue of the Record, the name of President O. E. Bradfute as chairman, being omitted. Mr. Bradfute, together with Frank App, New Jersey; W. H. Settle, Indiana, J. T. Orr, Texas, and J. F. Burton, Utah, constitute the committee which will make plans for 1924.

Legislative Committee Outlines Plans of A.F.B.F.

Members of the American Farm Bureau Legislative Committee, composed of O. E. Bradfute, president; General E. H. Wood, Kentucky; Frank App, New Jersey; W. G. Jameson, Colorado; and Edward B. Reid, assistant Washington representative, lunched with President Coolidge on October 4 and discussed in detail with him the farm bureau legislative program for the next session of Congress.

Eight Points

Here are the eight general points of the program:

1. Selective immigration as at present, but that the passports should be vised at ports of embarkation and that the quota should be based upon the numbers of foreign born in this country as reported in 1890 instead of 1910.

2. Opposition to price fixing and such legislative panaceas, the price fixing position to be further established by referendum.

Oppose Sales Tax

3. On taxation, if more money has to be raised, the farm bureau favors an excess profit tax and will fight a general sales tax.

4. Decision on the proposed plan for consolidation of rail roads is to be reserved until a referendum is taken and further studies made by Transportation Department of A. F. B. F.

5. While believing that farmers want a merchant marine and believe in co-operative effort between the government and shipping interests in keeping our flag on the sea, the farm bureau is opposed to a direct subsidy.

6. Favor crop insurance and want Federal Government to make available such information as is now being obtained upon which reliable crop actuarial tables can be formed.

Want Truth-in-Fabric

7. Will fight for Truth-in-Fabric legislation.

8. Farmers favor Henry Ford's Muscle Shoals offer—the manufacture of cheap fertilizer and amortization of hydro-electric power.

GROWERS NET GOOD PRICES THROUGH FRUIT EXCHANGE

Quincy Organization Beats Offers of Local Dealers; Makes Market

The Western Illinois Fruit Exchange, Quincy, a subsidiary of the Illinois Fruit Exchange, has secured very good results in shipping fruits and vegetables for its members during the summer and fall. It has virtually "made" a market for some products and has beaten the prices of local dealers in handling others.

The Exchange handled 26 cars or 12,810 bushels of potatoes, receiving $12,780.81 in gross receipts or an average of 99 cents per bushel. The net price returned to growers was 78 cents per bushel, compared with an average of between 50 and 60 cents per bushel paid by local dealers in Quincy.

During June and early July, the Exchange handled 28 cars of strawberries, two of cherries, and several smaller shipments of peas and beans. Sales of these commodities totalled $21,497.46, and $20,116.67 was returned to growers. A net price of $2.10 per crate was paid to growers for 8,320 crates of strawberries. According to A. R. Waite, Manager of the Exchange, there was practically no local market for strawberries.

Sells Cabbages

The "co-op" sold 23 cars of crated and three cars of bulk cabbages for members. An average of $1.71 gross per crate or $1.04 net-to-grower was received for the cabbage crop. At the same time Quincy dealers were offering an average of 75 cents per crate for cabbages.

There was hardly any local market for black raspberries, according to Mr. Waite, and the Exchange shipped out seven cars which returned $7,731.87 net to growers.

"While we beat the prices of local dealers in handling potatoes and cabbages by a considerable margin," states Mr. Waite, "it must be kept in mind that without the Exchange, these 26 cars of potatoes and 31 cars of cabbages would have been dumped on the Quincy market and local markets for these products would have been much lower than they were."

Tax Conference Upholds Farm Bureau Method

On the question of how to find real values of real estate for tax purposes, the unanimous sentiment of the National Tax Conference held at White Sulphur Springs, West Virginia, was for comparison of actual sales values, John Watson of the I. A. A. states, upon his return from the conference.

"The conference discussed the very method that the I. A. A. and country farm bureaus used this year," says Mr. Watson, "and it upheld that method. Any number of states and even state commissions are using this same method. I only wish that the county boards of review that objected to our plan, and the State Tax Commission could have heard this discussion."

FACTS GIVEN ON SALES OF ILLINOIS FARM PRODUCTS

Sources of Income Listed; Comparison By Years Made By A.F.B.F.

Prospects for the new crop year, 1923-1924, are somewhat better in Illinois than for the country as a whole, according to the Department of Research, American Farm Bureau Federation.

Corn and oat crops are especially large compared with last year and the general price tendencies for these grains have been upward. The income from the large cattle and hog feeding and dairy industries promises to be at least no less than last year, states the Department of Research.

Last year, Illinois farmers sold $470,000,000 worth of products. There are 237,181 farms in Illinois and the gross sales receipts were therefore $2,066 per farm. The value of all farm property in Illinois in 1919 was $6,667,000,000 and the sales turnover was 12.6 per cent of this capital sum.

Sources of Income.

Further research shows that 38 per cent of the cash income of Illinois farmers last year was derived from sales of crops, 35 per cent from live stock, and 27 per cent from animal products.

The leading items were hogs, of which $89,000,000 worth were sold; dairy products, furnishing $85,000,000 cash return; corn, $71,000,000; cattle, $55,000,000; wheat, $47,000,000; poultry and eggs, $17,500,000; and oats, $24,000,000.

Corn and Hogs Lead.

Corn and hogs together brought in $160,000,000 or 34 per cent of the total cash receipts. Cattle supplied 12 per cent of the gross receipts; dairy products, 18 per cent; and poultry, eight per cent.

Farm income in Illinois the past fifteen years has shown somewhat different trends from that of the country as a whole, which is attributed to the fact that the state has long been a highly developed agricultural region.

Comparison.

At the present time, income from sales in Illinois is 123 per cent of the 1909 receipts; for the United States it is 157 per cent. From 1909 to 1919 the increase in Illinois was 100 per cent; for the country as a whole, 150 per cent. Illinois farm sales declined 50 per cent from 1919 to 1921, which was somewhat greater than the average of all states. The Illinois figure for this year was barely above the 1909 level, whereas the total for the country remained 30 per cent above 1909 figures.

Severity of Depression.

Deflation of wheat prices, low prices for corn and oats, and the short crops of oats in 1921 and 1922, made the severity of the depression intensified in Illinois.

The increase in wheat growing was made largely at the expense of corn. Wheat in 1909, furnished but eight per cent of the farm income and corn 22 per cent. In 1919, wheat had risen to 17 per cent in the sales account and corn had declined to 18 per cent. Wheat acreage has remained large since that date, but price declines have reduced its relative standing, wheat sales supplying but 10 per cent of last year's receipts.

Hogs Gain.

Hogs have gained substantially in relative importance since 1920, while horses, which in 1909 were an important sales item, have fallen to a position of minor significance.

Dairy and poultry products about held their own between 1910 and 1920 in relation to total sales, but have gained relatively since that time as a result of the severe deflation of crop farming.

SUMMARY OF SALES—ILLINOIS

(In millions of dollars)

	1909-1910	1919-1920	1920-1921	1921-1922	1922-1923
Crops:					
Corn	$ 82	$136	$ 81	$ 49	$ 71

Total Sales	$381.4	$770.5	$564	$388	$469.5

Traffic Dep't Can Secure Lowest and Best Rail Routings

The I. A. A. Transportation Department states that it can serve farm bureau members through the correct routing of shipments so that the lowest rates and quickest service can be secured.

An example of incorrect routing was the complaint received by the department from Paris, Ill., when the freight charges on a car of cattle shipped there from Waukesha, Wis., seemed excessive.

Investigation by the department disclosed the fact that the shipment was badly misrouted, going from Waukesha to Leithton, Ill., to Coster, Ill., to Indianapolis, Ind., and then to Paris. The through rate on this routing is 67½ cents per hundred.

The shortest routing would have been from Waukesha to Chicago to Danville and then to Paris, the through rate being 43 cents per hundred for this routing.

Nothing could be done by the Transportation Department as the shipper had accepted the bill of lading with the specific routing and so signed his name to it. In cases of this kind if the consignee is in doubt as to the best routing, the information will be given by writing to the department, which should be done, of course, before the shipment leaves its shipping point.

Farm Bureau Radio Program

Every Tuesday evening the Farm Bureau Radio program is broadcasted from KYW, Chicago, starting at 9:01 P. M. The time has been temporarily changed to this hour.

"From Orchard To Table," will be the subject of C. E. Durat of the Federated Fruit and Vegetable Growers on Tuesday, October 23. At 9:20 P. M. A. F. Taylor of the American Farm Bureau will speak on, "A Little Group of Farm Folks At The Cross' Roads."

On Tuesday evening, October 30, J. D. Harper of the Illinois Agricultural Association speaks on, "Farm Worker and Wage Worker," at 9:01 P. M. H. N. Noble, Secretary of the National Committee on Boys and Girls Club Work will follow on the subject, "Our Farm Boys and Girls."

Grain Growers Funding Debts With Debentures

Debentures have been tendered to the creditors of the U. S. Grain Growers, Inc., to fund the debts of the organization and acceptance had been general when this issue of the Record went to press.

The I. A. A. is recommending to its members this step of the Grain Growers, which includes, in brief, the pledging of all present tangible assets (except needed office furniture) to creditors and in addition is making provision, whereby its debentures may sometime be paid in full.

This is being done in such a manner that the obligation to such future payment will not prejudice its admission to membership privileges on contract grain exchanges and will not jeopardize future operations.

A. F. B. F. Research

"Prices of fifteen important farm commodities are higher than a month ago, eight are lower, and one is unchanged. Compared with a year ago, seventeen are higher and seven are lower." This is the summary of the report of the American Farm Bureau Department of Research on October 2.

Hogs

Hog price decline is partly seasonal as spring pigs are arriving in large numbers. Receipts continue abnormally heavy compared with previous years. Nevertheless, the stocks of hogs in storage are being distributed at a satisfactory rate. Domestic consumption remains high and exports continue to run ahead of last year. Foreign countries purchased about one-third more hog products during the first eight months of 1923 than in the same period of 1922.

Cattle

An increase in receipts of shortfed cattle has caused a decline in prices on practically all grades. Total arrivals have been in excess of the corresponding time a year ago and well above the seasonal average. Stocker and feeder shipments into the main feeding states have been heavier than in the corresponding period last year.

Sheep and Lambs

A heavier market supply of sheep and lambs than last year has weakened prices somewhat. Shipments of feeder lambs and sheep from the leading markets have been about 60 per cent heavier than last year.

The wool market, while lower than a year ago, is beginning to show more firmness and activity. Foreign markets are strong at prices above an importing basis so that but little wool is coming into this country. Consumption by domestic mills continues at a fairly high rate.

More Opinions Received From Voting Delegates

Expressions of their opinion on the wheat situation have been received from more voting delegates of the Illinois Agricultural Association. Letters were sent by the News-Publicity Department to all voting delegates to get their opinions on the solution of the wheat situation after the I. A. A. Executive Committee issued its wheat statement in August.

"I am heartily against price-fixing by any political organizations," states T. R. Lovett, Clark county, "I am strongly in favor of co-operative marketing of any or all farm products and I feel that I speak for the more progressive body of our farmers here when I say that we are sure that such marketing will be the only salvation from the present condition.

Better Marketing.

H. B. Koeller, Madison county, sees more common sense in marketing as a great aid to the situation. He says, "Farmers as a rule are poor business men. Very few pay much attention to that end of farming—the most important. We don't market produce today; we dump it at the consumer's door as fast as we produce it and nearly always at a loss—then raise a big howl the way they treated us. It's up to us to help ourselves and we can do it. We need a marketing system that starts right on the farm."

Mr. Koeller urges warehousing on the farm if a certain standard type of warehouse can be agreed upon. Then a marketing system built with township, county, state and national units could be built up.

World Market

Fixing of a minimum price on wheat by law would cause more vexing problems than it would solve, according to George Fulk, Moultrie county. He sees the farmers' big difficulty caused by selling his products on a world market.

"The truth that hurts is that we are selling on a world market and being denied the privilege of buying on this same market. If we wheat farmers, after selling on the world market today were allowed to turn around and buy on this same market, we should all have a balance left in our bank accounts," writes Mr. Fulk.

Mr. Fulk says it would be hopeless to try to force the prices of grain far above the world market prices but thinks that a lowered tariff will compel the manufacturer to lower his prices through competition with lower-priced goods from abroad. Farmers could buy on a world market.

Eliminate Competition

"I believe that we should practice efficient farming, diversified farming, and co-operative marketing," writes John P. Stout, voting delegate of Sangamon county, "but until we, as farmers, are relieved of world competition just as the manufacturers and the laborers have been relieved of it, we will never find farming a profitable business.

"Until our leaders are willing to take some aggressive action toward solving this big problem of world competition, we may expect to donate our labor and that of our families to produce food for those who are protected from world competition."

Mr. Stout thinks that the next 15 or 20 years will decide whether American agriculture is to be maintained on the standards of today or whether the standards will be those of farming in Europe.

MANY IMPORTANT FACTS REVEALED AT CONFERENCES

(Continued from Page One)

DeKalb. Many carloads of dairy cattle are coming into the dairy district. This district is not supporting the Chicago Milk Marketing Company, it developed. At Belleville a plan for reorganizing the Illinois-Missouri Milk Marketing Company was announced.

Business Methods Needed

A need for better business methods in all co-operative marketing associations was outstanding in the discussions. In all of the conferences co-operative marketing was looked upon as the solution of the economic problem facing farmers.

President S. H. Thompson, Secretary George Fox, and Walton Peteet, Marketing Director of the American Farm Bureau Federation, are attending all of the conferences.

This week conferences were held at Danville, Tuscola, Springfield, and Centralia.

On October 23, a conference will be held at Bloomington for the seventeenth district; October 24, at Peoria; October 25, at Galesburg; and on October 26 at Monmouth.

The Pike County Farm Bureau collected $200 rain insurance for which it paid $16 premium when a heavy rain the night before and threatening weather during the picnic caused a small attendance.

Illinois Agricultural Association RECORD

Volume 1 | Nov. 5, 1923 | Number 16

WATERWAY BILL SHOULD PROTECT FARMS ON RIVER

I. A. A. Takes Stand On Bill To Open Waterway From Chicago To Gulf

"The development of water transportation must come and the Illinois Agricultural Association is for it," President S. H. Thompson told U. S. Senators at a hearing on the McCormick waterway bill in Chicago, "but while you are providing for this public improvement you must also protect farm lands along the Illinois river from an increased flow of water."

The McCormick bill provides for an appropriation of $5,700,000 to be expended under the direction of the war department for making a nine foot navigable channel from Utica, Illinois, down the Illinois and Mississippi rivers to a point below the mouth of the Ohio river. There is already a 9 foot channel from that point to the gulf, and an Illinois appropriation provides for the completion of a navigable channel from Utica north to Lockport. From Lockport to Lake Michigan at Chicago there is a navigable channel which is controlled by the Chicago Sanitary district.

In the bill the Chicago Sanitary District is authorized to withdraw water from Lake Michigan. This is for the purpose of taking care of Chicago sewerage.

The I. A. A. Stand

The I. A. A. takes the position that the flow of water out of the lake should be controlled by the Government rather than by Drainage District, and that the bill should carry provision to protect farm lands against the increased flow of water. These provisions would protect land owners and would make the Government responsible.

The association also contends that Chicago sewerage should be purified before dumping in the river, as a health precaution.

Railroads Grant Reduced Fares To A. F. B. F. Meeting

Arrangements have been made with the railroads for reduced round trip passenger fares applying from all points in the United States to Chicago for the annual convention of the American Farm Bureau Federation which will be held December 10-14, inclusive.

Pass Resolution To Support I. A. A. In Co-op Marketing

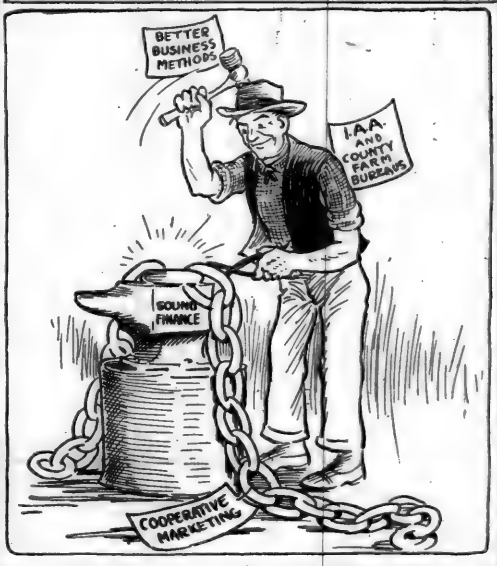
The following resolution was passed by representatives of the 15th district in conference at Galesburg on October 25:

"Resolved that we, as members of the Conference on Marketing Problems for the Fifteenth Congressional District, do heartily endorse and pledge our support to any program backed by the Illinois Agricultural Association for the marketing of farm products. We do this with the full knowledge that the farmer will only come to his own when he properly organizes for marketing."

I. A. A. Taking Part In Better Sire Campaign

The I. A. A. is co-operating with agricultural departments of railroads, University of Illinois, Illinois State Dairy Extension Division, dairy breed associations and dairy manufacturing associations in a campaign of dairy improvement work under the name of the Illinois Allied Dairy Interests.

Placing of better dairy sires on Illinois farms is the main purpose of the campaign. Dairy trains will be chartered to stop in towns throughout the state. The work will extend over a period of several months and will start at once.



I. C. C. Announces General Inquiry Into Grain Rates

A nation-wide inquiry into rates and charges on grain and grain products has been announced by the Interstate Commerce Commission to begin shortly. This will apply to rates on common carrier shipments on rail and by water and by rail and water.

This action follows requests by the American Farm Bureau Federation and Secretary of Agriculture Wallace that reductions in export rates be made. The A. F. B. F. asked a cut of 20 per cent on export wheat, while Secretary Wallace has suggested 25 per cent reduction on all agricultural commodities.

The Transportation Department of the I. A. A. expects to take part in this investigation as affecting Illinois farmers.

AT THE CONFERENCES

Conference Sidelights

"It is no reflection if a co-op goes bad now and then, if we profit by their experience."—Peteet.

Two shipping associations in Knox county are trying out the idea of having signed contracts with members.

"Some times our own folks accept the criticism of outsiders without first finding the facts."—Secretary Fox.

"There is too much tendency to leave the whole work of the shipping association to the manager."—McLean Co. man.

"Send the best man you have in the district to the I. A. A. executive committee, regardless of what county he is from."—Fox.

"Our big trouble is that there is too much sentiment and not enough business in a lot of our cooperatives."—President Thompson.

"Every shipper wants to see the cooperative commission companies tried out, but they want the other fellow to do the trying."—At Peoria meeting.

"The way the truck haulers pull business for the old-line commission companies, it looks like they might have a personal interest in it."—Fulton Co. man.

"Half of our stuff is going to the Producers and it is increasing. We have got to talk to some of our managers."—Putnam county man.

"We have monthly meetings of the Board and direct the business of our shipping association, rather than leaving it all to the manager."—Coles county man.

"The Chicago Producers need to tighten up on their cattle sales. They have done so well selling hogs that they almost have a monopoly on our business."—Farm Adviser Allison.

"The class of service performed in your organizations will be no better than the men you have. This is a fundamental question."—Secretary Fox.

"There was only one case of propaganda against the Producers in Ford county and we got the facts and nailed it in a hurry. That was all that was necessary."—Farm Adviser Swaim.

"You red top men must control the large part of the crop in your marketing association. It is better to wait a year than to start without it. Then you must know more about red top than any one else in the world."—Peteet.

CO-OP MARKETING DECISION MADE BY BROOM CORN MEN

Peteet Speaks At Mattoon Meeting; Committee To Work Out Plan

A meeting of 200 broom corn growers at Mattoon, October 19, instructed an organization committee to go forward with the organization of a cooperative marketing association on the commodity basis with five year binding contracts and pooling by grade and quality.

Growers in the Mattoon district have a verbal agreement to hold for the price of $300 a ton. Weekly meetings are being held to find crop conditions and prices offered in the different sections of the district. At the October 19 meeting it was agreed to continue the holding policy.

Walton Peteet, Director of Cooperative marketing of the American Farm Bureau Federation, explained the commodity plan at the meeting. He advised growers to do the work of soliciting for contracts rather than hiring experts, and to sign up at least sixty per cent of the crop before permanent organization. "If you can't do this you had better not start at all," he said.

Secretary George A. Fox of the I. A. A. told the growers at the meeting that the Commodity plan is sound and the best that has been worked out.

The new association will not attempt to market the 1923 crop.

The counties of Coles, Cumberland, Douglas, Shelby, Jasper and Moultrie produce 15,000 acres of broom corn which is practically all of the Illinois crop, according to Melvin Thomas, chairman of the organization committee. Other members of committee are Howard Barker, Arcola; Ernest Hogland, Mattoon; W. A. Temple, Oakland; Charles Lucas, Sullivan; C. J. Fearda, Neoga; and J. Brewster, Mattoon.

Red Top Exchange Sends Out Final Checks For Pool

The Egyptian Seed Growers Exchange, Flora, closed the 1922 red top pool on October 10 and has been busy of late sending out final checks to members. An average of 12¾ cents per pound was received for the pool, netting growers 10.9 cents. An advance of 3 cents per pound was made when the crop was delivered.

Illinois Agricultural Association
RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by News Publicity Department, E. L. Bill, Director.

Entry as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of ten cents for subscription to the Illinois Agricultural Association Record.

THE DISTRICT CONFERENCES

At thirteen district conferences representatives of the Illinois Agricultural Association, county farm bureaus and cooperative marketing associations gathered to talk over their problems, to dig into the troubles and to find the reasons for the weak links in the work of organized agriculture.

Certainly there is great encouragement in the fact that we are facing the problems. Because there are problems is no reason to be discouraged. We should not be ashamed to admit our weaknesses, nor should we shrink from them.

The chief topic of discussion at all of the meetings was cooperative marketing, and many problems and weaknesses were found. Criticisms were made by friends of the movement and in a constructive way, rather than destructive. A hopeful angle of the question is that there are organizations in every district that have avoided many mistakes and are successful. From these organizations, others can learn.

If the conference idea is worth while, the idea of talking problems together, swapping experience and admitting faults, why not have county conferences? Why not make it a year around affair by visiting successful organizations, studying their methods and profiting by the experiences?

—o—

IF IT HAD BEEN IN COURT

At several of the district conferences, officers and directors of cooperative marketing associations were asked when they first found out that the association was in trouble. The usual answer was at the end of the year when the books were audited and a statement of the financial conditions made out, long after the mistake had been made.

This question followed: Do you have a financial statement once a month, analyzed in such a way that you can tell what part of the business is making money and what part is losing money? Many times the answer is no.

The lesson in the questions and answers is very apparent, but for the sake of clinching the lesson let us imagine that the scene had been in court before a jury, and attorneys were doing the questioning.

Question: Then you admit that you served as a director for a year without knowing the financial conditions of your organization?

Answer: Well no, we had a statement every month, but it was so complicated that I could not understand the meaning of it.

Question: You were aware then, at every meeting during the year that you did not know the financial conditions of your company?

Answer: Yes Sir.

Question: Being conscious of the fact that you did not know the financial condition of your company, did you ever admit it to the board of directors, or did you ever demand or ask for an explanation of the statement?

Answer: No sir.

A lawyer could make a pretty good speech to the jury on these questions and answers, couldn't he? Let's not give the lawyer a chance to make that speech.

—o—

TAX COMMISSION FAILS TO ACT

After waiting six weeks for the Illinois Tax Commission to take action toward equalizing valuations of farm and city real estate in six counties where wide inequalities were admitted by the Commission, the following letter was sent to the Commission under the date of October 20.

The Illinois Tax Commission,
Hon. Percy B. Coffin, Chairman,
Springfield, Illinois.

Sirs:

On September 6, following the hearing given by the Illinois Tax Commission to the complaints filed by the Illinois Agricultural Association, the Commission unanimously sustained the contention of the Illinois Agricultural Association and the County Farm Bureaus participating in the hearing that gross inequalities still existed in the assessment of farm land in six counties as compared with the assessments of town and city lots. At that time, also, against the protests of the representatives of the Illinois Agricultural Association, you asked that the Boards of Review be given further time in which to correct the inequalities of assessments of the different classes of property, with clear expression of your intention to order reassessments if the inequalities complained of were not corrected. You assured us that the delay would not be permitted in any way to prejudice the complainant's case.

On September 12, your honorable body gave a hearing to the Board of Review of Madison County and to two members of the Board of Montgomery County. In this hearing the members of the Madison County Board of Review, though not admitting the comparative figures submitted by the Illinois Agricultural Association, did, however, admit that farm land in that county was assessed, full valuations, at 60 per cent of their fair value and that town and city lots were assessed at 40 or 45 per cent of their fair value. The arguments presented by the two members of the Montgomery County Board of Review also clearly implied that they were setting up mere speculation as to the course of future values as the basis of 1923 valuations. They also testified that certain corporation lawyers had aided them not only in fixing the valuations placed upon the corporate property in the county but upon that of farm lands as well.

The Illinois Agricultural Association has information that the inequalities complained of in Cass County have only partly been corrected. It has no information about any action or refusal to act in Marion County. In the other five counties it is certain that nothing has been done. In fact, two Boards of Review, though they knew that a decision was pending, adjourned on September 7, before they could receive any official notice from the Tax Commission.

More than a month has now passed since the hearings were held. There is widespread comment on the delay of the Tax Commission in taking action toward correcting the inequalities of assessments which were admitted, either openly or by implication, by the Boards of Review. The delay of the Tax Commission has seriously prejudiced the complainant's case, if the Commission refuses to correct these flagrant inequalities in valuations. The land owners in the counties affected, together with the farmers all over the state, are wanting to know why the Illinois Tax Commission has failed to act in this important matter.

I am writing, therefore, to ask that the Tax Commission give me a statement of what it has done or why it has failed to act, or of what it proposes to do to correct the inequalities complained of.

Respectfully yours,
Newton Jenkins.
Legal Counsel, Illinois Agricultural Ass'n.

Copies of the above letter were sent to all members of the State Tax Commission. As we go to press a week after this letter was mailed, no answer or explanation has been made by the Commission.

—o—

MALONE FLAYS THE COMMISSION

Wm. H. Malone, member of the State Tax Commission forwarded the Record copy of a letter which he sent to Chairman Percy B. Coffin of the Commission. The letter follows:

Colonel Percy B. Coffin, Chairman,
Illinois Tax Commission,
306 South Wabash Avenue,
Chicago, Illinois.

My dear Colonel Coffin:

I have just been advised by Mr. Newton Jenkins, who represented the Illinois Agricultural Association before our Commission, that you had not ordered the local assessors in the counties complained of to make a re-assessment. This information was indeed a surprise to me for you will recall that it was understood and unanimously agreed upon by our Commission that in all of the counties where the testimony clearly proved the law was violated to the detriment of the farmer, a re-assessment would be ordered.

The Commission agreed that the element of time or expense could not justly be raised by the various local assessors as an excuse to avoid the work of re-assessing in their various districts.

The witnesses representing the farm bureau, as well as the members of the various Boards of Review, established very definitely the fact that the local assessors did not comply with the law to the end that the farmer in the districts complained of is carrying more than his fair share of taxation.

The various industries of the country are indeed prosperous, work plentiful, wages good and most of our industries running overtime. This prosperity, however, is unknown to the farmer. All the goods which he buys are at peak prices, and yet he is compelled to sell everything he produces at a much lower price then for years past. Coupled with this is the fact that his taxes are higher than ever in the history of our nation. SOMETHING MUST BE DONE FOR THE FARMER. Particularly do I believe that we, as Tax Commissioners, ought to do everything in our power to protect him.

The great industries of the nation are not paying their just share of taxes in spite of the fact that they are enjoying an unusual run of prosperity, and when these large industries, railroads and public utilities escape paying their just part, the burden falls upon the shoulders of those less able to pay. The corporations of the State, as you know, employ the best legal talent money can afford to watch and protect their every interest. The farmer has no such talent at his disposal. This being true for so many years, the burden has been skillfully and deliberately shifted to those who can least afford to carry it.

I am one of those who believe that the very foundation of our government rests upon the great open fields of farm land, and that it is the duty of every patriotic public servant to direct his attention toward the protection of this foundation. With this thought in mind I urged a re-assessment in all of the assessing districts complained of by the representatives of the Illinois Agricultural Association. I recognize the weaknesses of the law under which we operate and realize that even though a re-assessment is ordered the same assessors will do the work. However, that does not relieve the Tax Commission from its responsibilities, and I know of no better way to make the weaknesses of a law apparent than by its enforcement.

The law under which the Tax Commission is operating stipulates that "whenever it shall appear to the Tax Commission that the real or personal property in any county or any assessment district thereof has not been assessed in substantial compliance to the law, or has been unequally or improperly assessed, the Tax Commission may in its discretion in any year order a reassessment for such year of all or any class of the taxable property in such county or assessment district thereof."

I urgently request that we notify at once all the assessors in the districts complained of to re-assess with the hope that the farmers may receive some relief from a condition which I believe to be unfair.

Very respectfully yours,
Wm. H. Malone.

Here Is Aim and Plan of Commodity Marketing

It was the same story, the story of commodity marketing that Walton Peteet, James Stone and Aaron Sapiro told at the district conferences.

Mr. Peteet, Marketing Director of the American Farm Bureau Federation spoke at all but one conference and led the marketing discussions. At Springfield and Centralia, Mr. Stone, President and Manager of the Burley Co-operative Association of Lexington, Kentucky, told how commodity marketing is solving the problems of tobacco growers of the south.

Walton Peteet

At the Peoria conference, Aaron Sapiro, Attorney for a number of organizations, including the marketing department of the American Farm Bureau related the results of commodity marketing in California.

To Merchandise

The aim of cooperative marketing is to merchandise, the three speakers said in one way or another. It is to stop dumping crops on the market without knowledge of the supply, demand, absorbing power of markets, and grade of product.

The first of the six steps in merchandising is to grade and standardize the product. In the next issue of the Record will be a story about what standardization has done for the Quincy milk cooperative. Manager Leeper of the Illinois Fruit Exchange says grading is one of the most important things in fruit marketing. Mr. Sapiro says we sell wheat on Government grade while the miller buys on its gluten content.

To have the right kind of package is the second step. This point don't mean so much when it comes to grain and live stock, but it has significance in the marketing of eggs, fruit, butter and other products that go direct to the consumer.

Extend Markets

The third step of merchandising is to extend the market. The Fruit Exchange is selling apples in many states where they never sold before. The Quincy milk company extended its market by selling milk to factory workers and to the schools.

To get people to eat more is the next thing. That means we should be interested in selling two bottles of milk in the place of one to a family.

Control Flow of Product

We must control the flow of the product so no market will be glutted and no market will have a famine. In other words we don't want a big run of livestock on the market today that breaks the price and a famine tomorrow. Mr. Sapiro said 70 per cent of the wheat crop is sold in 60 days and he added that it is rotten merchandising.

The last of the six points of merchandising is to make the price at the point of consumption and not at the point of production. We should our own grain until we sell it to the miller rather than selling at home. When we sell at home it goes into the hands of other people and the opportunity of merchandising is lost.

These six things are the aim of cooperative marketing. Mr. Peteet said the aim of cooperative marketing is not intended to fix prices or hold for high prices.

Binding Contracts

A long time binding contract with growers calling for the delivery of their crop to the association is the very heart of the plan all three men stated. It holds the man that might sell for a few cents higher to a competitor who is trying to break the co-op. It makes possible the borrowing of money so growers can be advanced a share of the price immediately. It gives the association title of the product so it can merchandise. It assures the organization that it will have the product to do business with.

How To Do It

The first principle of organization is to organize by the commodity and not by locality. If we are ever going to sell grain so we will not have gluts and famines, all the growers of grain in the country must be organized or tied together in one organization. Now every grower sells when he gets ready. All of the farmers' elevators sell without knowing what other elevators are doing. One little elevator for one little locality cannot merchandise grain. When the whole commodity is organized together there is opportunity to merchandise.

Aaron Sapiro

Cooperative association should be organized not for profit with democratic control, all three men said.

Pooling

Pooling by grades and quality is another principle of organization. In the burley tobacco association all the tobacco of one grade is pooled together, and every man in the pool will get the same price. Without the pool the problem arises of whose tobacco will be sold today on the good market and whose a month from now on a poor market.

This is the commodity plan of cooperative marketing and is the plan used by burley tobacco growers, by cotton growers and by practically all of the cooperative associations of California.

APPOINTED FIELD MAN

F. H. Kelley, farm adviser of Edwards county, will take up his work as field man for the St. Louis Producers on Nov. 5, having been hired by the I. A. A. Live Stock Marketing Department. He will be financed by the selling agency and will travel in all the Illinois territory which is tributary to the St. Louis market.

GALLATIN TO REORGANIZE

The Gallatin County Farm Bureau has made arrangements with the I. A. A. Organization Department to start its three year reorganization campaign on November 10. The township unit plan will be used.

Tune In On These!

Here are the Farm Bureau Radio programs for the next three Tuesday evenings. The time has been set permanently at 8:01 p. m., from Station KYW, Chicago.

Tuesday, Nov. 6, John G. Brown, president of the National Live Stock Producers, will speak on "Orderly Marketing of Live Stock," followed by E. H. Heaton, Dairy Marketing Specialist of the A. F. B. F., with the subject, "A Bottle of Milk."

E. G. Thiem, secretary of the Illinois Holstein-Friesian Association, will be the first speaker Tuesday evening, Nov. 13, with the subject, "Exit the Scrub." Immediately following, H. W. Moorhouse, Research Director of the A. F. B. F., will talk on "Price Fixing."

On Nov. 20, C. B. Hutchins, of the National Transportation Institute, and R. C. Pollock, managing director of the National Live Stock and Meat Board, will talk. Their subjects have not been announced yet.

RULES ANNOUNCED FOR CERTIFICATION OF FARM FLOCKS

At a meeting in Springfield, Oct. 27, the committee in charge of poultry flock and hatchery certification formulated rules specifying requirements which flocks and hatcheries must meet in order to be accredited.

This committee is composed of D. E. Hale, Chicago, chairman; J. D. Harper, assistant secretary of the I. A. A.; C. P. Scott, chief of poultry department, Illinois Department of Agriculture; L. E. Card, head of U. of I. poultry department. Miss Dorothea Rainey, representing the hatcheries; and Lyle Funk, representing the breeders.

Rules

Any poultry flock supplying eggs to an accredited hatchery must meet and maintain the following standards and requirements which are hereby officially prescribed.

1. No breeding birds other than those passed by an authorized inspector shall be kept in these flocks during the hatching season.

2. All birds must be pure bred.

3. Only one variety shall be allowed on a farm, unless where more than one variety is kept, ample provisions have been made to keep these varieties and their eggs separate.

4. Each bird must conform in a reasonable degree to the standard for the breed and variety as set forth in the American Standard of Perfection. This shall be construed as meaning that no birds decidedly off type or color or disqualified specimens shall be allowed to remain in the flock.

Egg Production.

5. Each bird must conform in a reasonable degree to the standard for high egg production as set forth by the Poultry Division of the College of Agriculture of the University of Illinois. It is suggested that every flock owner keep a record of the daily egg production of the flock.

For the season of 1924 this shall be construed as meaning that females shall have medium length heads, prominent eyes, deep, rectangular bodies, soft and pliable in the abdominal region. No extremely small or unusually large coarse birds or those lacking in strength and vitality shall be passed. Males should be quick maturing, medium size for the breed and show vitality as indicated by the head and body shape.

Diseased Birds.

6. If disease should develop during the breeding season, the affected birds shall be immediately removed from the flock.

7. Each male bird and female shall be sufficiently matured at the time of inspection to reach with reasonable care full growth and maturity by January 1, preceding the hatching season.

8. Close inbreeding shall not be practiced and a statement of the name of the breeder and the known blood lines of all males shall be made to the inspector.

9. Each bird passed by the inspector will be banded with a sealed numbered leg band furnished at cost by the Division of Standardization and Markets.

10. When the flock meets the above requirements an inspection certificate is issued to the flock owner.

Trade-Mark

The Illinois Department of Agriculture has designed and will furnish a distinctive trade-mark to be used on Illinois chicks produced by accredited hatcheries subject to the following regulations which are hereby prescribed:

1. Only chicks hatched from eggs produced by accredited hatchery flocks may be sold under the State Trade-Mark.

Grades of chicks shall be recognized as follows:

Grade A: Chicks from flocks meeting the foregoing requirements.

Grade AA: Chicks from flocks that in addition to meeting the foregoing requirements have been accredited by the State Veterinarian as being free from Bacillary White Diarrhea. Additional grades based on production records will be recognized later.

Inspect Chicks.

2. Chicks must be carefully inspected at the time of shipment and must be normal. Delayed hatches, "helpouts," premature hatches, partially absorbed yolk-sacs, weak, deformed, crippled, fed, watered, chilled, or chicks injured in any other way shall not be sold under the State Trade-Mark.

3. Chicks over forty-eight hours old shall not be sold under the State Trade-Mark.

4. Off-color chicks not representative of the variety shall not be sold under the State Trade-Mark.

5. No chicks shall be sold for resale as day-old chicks under the State Trade-Mark.

Stone Tells of Co-op Tobacco Merchandising

"I was a speculator for twenty-five years," said James C. Stone, President and Manager of the Burley Tobacco Growers' Cooperative Association, at the Springfield and Centralia conferences.

James Stone

"In 1919 I sold 42 acres of tobacco for $46,000 and the next year that same 42 acres lost me $14,000. It was too much for me. No business can stand up under such fluctuations. It is the thing that brought cooperative marketing of burley tobacco."

From 12 to 21 Cents

"In 1920 the price of tobacco was approximately 12 cents a pound. The first pool of the association in 1921 averaged approximately 21 cents a pound. Of the 200 million pounds in the 1922 pool, 155 million pounds have been sold and my judgment is that the average price to growers will be twice as high as the 1920 price. The whole overhead cost of the association in the first year was $1.55 per hundred pounds. Of that amount 30 cents was for the purchase of warehouses and is an investment rather than a cost."

"The greatest thing we have in the Burley Association is the Social Service Department which works with the growers in the field. The aim of cooperative marketing is to first get a fair return for the product, but after all the final result is in how that money is spent.

The Valley Cabin

"On the hill there is a mansion and there lived the landlord family with all the refining influences that money could buy. In a cabin in the valley the tenant family lived, toiling out a meager living in the tobacco fields—mpther, kids and all. It is wrong. You can't make good citizens out of that condition."

NO RAISE WANTED IN FRUIT RATES, DECLARES I. A. A.

Traffic Department Enters Protest In Complaint Made Before I.C.C.

The I. A. A. Transportation Department is representing the interests of Illinois shippers in protesting a possible raise in fruit and vegetable rates in the state as a result of the complaint brought before the Interstate Commerce Commission by the Indiana Public Service Commission against the Baltimore & Ohio and other railroads.

The complaint charges that rates on fruits and vegetables from points in Indiana to Chicago are unreasonable and unduly indiscriminatory to shippers from that state in comparison with rates paid by Illinois shippers.

"We are trying to prevent any raise in rates for fruit and vegetable producers of southern Illinois," states L. J. Quasey, Director of the Transportation Department. "We do not object if the Indiana rates are lowered, but we do protest any raise in our rates. Although the railroads are defendants in this case, they would welcome an increase in Illinois rates, because they have made attempts in the past to have them raised."

Mr. Quasey says that present economic conditions among southern Illinois fruit growers do not warrant any increase in rates on fruits and vegetables and would hinder development of the industry.

He also states that the present rates have been in effect for many years.

Inspection Law Backed By I. A. A. Is Working Well

That the grading and inspection service of the Illinois Department of Agriculture is functioning well for the benefit of growers is shown in the following examples cited by H. W. Day, Supervising Inspector of the Division of Standardization and Markets.

In one case, two growers who lived 10 miles apart each shipped 15 to 18 cars of peaches during the season, the quality being approximately the same. Both sold through the same broker. One used the state grading and inspection service. The other did not.

The grower who used the service averaged about 20 cents more per bushel for his entire crop than the other grower. The reason was, states Mr. Day, that the graded and inspected shipments were sold on the basis of government inspection certificates.

In another case, a grower shipped a car of peaches from Centralia to Memphis, Tenn. The car was inspected at the shipping point. The market on peaches dropped while the car was en route and the buyer wired back on receipt of the shipment that it was not up to grade and asked for disposition of car.

The shipper ordered the car reinspected in Memphis and it was found up to grade as reported. The buyer took the car without further argument.

Here Are Yours Answers To The Problems of Illinois Agriculture

To begin with, it was the first time the Illinois Agricultural Association and county farm bureaus have deliberately faced their troubles. At every one of the thirteen district conferences, a large part of the day was spent in digging into the troubles of farm bureaus and cooperative marketing associations.

Next comes the fact that our greatest problem is with marketing and distribution of crops. Cooperative marketing was the major subject at every conference. This question was discussed up to the very last hour of the day, and even then it was hard to get away from it.

Not once in any one of the conferences was there an expression of doubt about cooperative marketing being the way to solve the problems of selling and distribution. At four of the meetings, the questions of political action, tariff, and price-fixing were introduced, but with very little discussion or support. Over and over there was very definite expression showing that you are expecting to go forward on a program of cooperative marketing.

The whole question was recognized very definitely as an economic problem which must be solved by an economic remedy, and by farmers themselves if it is to be solved at all.

Live Stock Marketing

Cooperative live stock shipping associations and producers cooperative commission companies were discussed at every meeting. The sum-up of the evidence on shipping associations points straight to the conclusion that where there is a board of directors who are meeting regularly, a good manager has been employed, and all work together on the job, at that point the shipping association is successful and growing. The only exception to this is where there is not sufficient business to support an association or trucking has taken the place of shipping by rail.

Let's take a look at some of the admissions made. Some testimonials were made that boards of directors do not meet more often than once a year, some not more than two or three times, and some just when they have to.

Some of you stated that your managers, the men you hired, are not sold on cooperative marketing.

Many of you declared that old line commission companies and local stock buyers are fighting you and a few said that not much is being done to overcome this opposition.

Many of you stated that your association is not incorporated.

Practically all shipping associations were organized by farm bureaus. In the majority of cases the farm bureau has a relation to the association and is helping to work out its problems, but in a few instances this is not true.

Cooperative Commission Companies

Not all associations are consigning all of their shipments to Producers' cooperative commission companies at Chicago, East St. Louis, Peoria, and Indianapolis, but all of them are hoping that the commission companies will grow to such an extent that they will be the dominating factor and can stabilize live stock prices.

After all, the manager of the association has more influence in determining the place where stock shall be shipped than any other person, according to all of the evidence presented. In a few cases the boards of directors have passed a resolution to the effect that all stock is to be shipped to the Producers' companies.

If there was one outstanding criticism of the Producers' companies, it was that there is need of a field service to go into the country and explain the whole thing. All evidence pointed to the fact that the confidence of shippers in the Producers' companies is growing and a larger percentage of shipments are going to them. Several times it was said that farmers want the Producers' companies to have the most expert salesmen there are to be found.

Grain Marketing

A discussion of farmers' elevators in several districts revealed the fact that many concerns are stock companies rather than cooperative elevators. Several elevators paid dividends in the face of the fact that they had not earned the money. An outstanding weakness, according to many men, is that they do not have an analyzed statement of the financial affairs of the elevator oftener than once a year. Mistakes usually happen because they do not have the facts.

There Is a Bright Side

Yes, there is a wonderful story of achievement of the work of organized agriculture in Illinois, but at this particular series of conferences, the weak links were being hunted.

Just keep in mind that only 13 years ago the first farm bureau was organized; that today there are 95 of the 102 counties that have organizations and that all have combined together in a business organization.

Don't forget that the live stock marketing plan started less than two years ago, and that today there are 525 cooperative shipping associations in the state handling approximately 20,000 carloads of live stock; that the Producers Co-operative Commission companies on the four markets to which we ship are substantial, going concerns.

There is a bright side, but looking at the bright side all of the time will never make both sides bright, will it?

At all of the conferences in the grain section, Robert Cowles, Treasurer of the I. A. A., speaking for the U. S. Grain Growers, Inc., explained that every effort is being made to get the financial affairs of the organization in shape so it can sell grain on the Exchange.

It was explained that officers of mid-west State Farm Bureaus requested the Marketing Department of the American Farm Bureau to form a national grain marketing plan based on contracts with growers and pooling by grade. In the same resolution the officers approved the plan of the U. S. Grain Growers, Inc., to sell through the Grain Exchange, with the idea of later merging the U. S. Grain Growers, Inc., with the national plan when it was approved.

Walton Peteet, Marketing Director of the American Farm Bureau Federation, stated that the new national wheat marketing plan recently announced was intended to fulfill the first clause of the mid-west resolution.

The new national wheat marketing plan has not yet been submitted to the I. A. A.

The Fruit Exchange

The Texico unit of the Illinois Fruit Exchange is functioning one hundred per cent and growers are well satisfied. The Alma unit is handling about 50 per cent of the produce of the district. There, many growers have not kept their contracts. Representatives of locals said they are well pleased with the sales work of the exchange, but more members are needed and there are several production centers that want organization. It is probable that the Exchange will carry on a campaign this winter to increase membership and organize new local associations.

Confidence in Co-ops

"The confidence of men of mature judgment in cooperative marketing is the thing that impresses me," President S. H. Thompson says about the district conferences. "Poor management and the lack of an accounting system has caused more failures than any other thing. No, the directors can not blame the manager, it is their own fault."

"The need of leadership is apparent," Mr. Thompson says. "There is too much of the 'let George do it,' idea in our organization after they are started."

The Next Step

"The time has come for the next step in live stock marketing," said Mr. Peteet in summing up the conferences. "Shipping association do not have the feeling of ownership of the commission companies, which they must have. After all it is their commission company. Our organization is too loose.

"Where the board is active, the organization is uniformly good and growing. Where the whole thing is left to the manager, it may be good and it may be bad."

Greene County Man Tells What Bureau Means

"What is the Farm Bureau?" asks L. R. Lee, Roodhouse, Ill., in the Green county newspaper Farm Bureau special edition. "It is not our office at Carrollton. It is not our farm adviser. It is not our executive board. It is an organization of farmers, for farmers, and run by farmers. It has saved the farmers money directly through their taxes, shipping associations, farm loan associations, legislation, and in many other ways.

"But its greatest good is done indirectly, which we can see if we look deep into the very points that I have mentioned. Every other industry seems to realize what the Farm Bureau does better than the farmers does himself," concludes Mr. Lee.

Mr. Lee is president of the Greene County Farm Bureau.

The Knox County Farm Bureau reports the strongest demand for limestone in the history of the county bureau. Several elevators and shipping associations are now handling the product at the request of the farm bureau.

THE LATEST DEVELOPMENTS IN TAXATION

Since the letters on page 2 were put in type, the press has carried an account of the resignation of Col. Percy B. Coffin, Chairman of the Illinois Tax Commission. In some quarters his resignation has been ascribed to charges brought against him by the Illinois Agricultural Association. Whatever the reason for Colonel Coffin's resignation, the Association wishes it understood that it has made no charges against any individual on the Tax Commission. It has charged the Tax Commission with breaking its promise and with failure to do its lawful duty. Before Colonel Griffin's resignation the Illinois Tax Commission was on trial before the farmers of Illinois. The resignation of the chairman of the Commission, and the appointment of a new member have not changed the situation in the slightest degree. The Tax Commission is still on trial before the farmers of Illinois. One member of the Commission has declared himself ready to carry out his promise and perform the duty laid upon the Commission by the law which created it. What are the other members of the Commission going to do?

A. F. B. F. Research

Under date of October 23, out of 24 farm commodities, 9 are above a year ago in price and 15 are below. Compared with last month, 13 are higher, 9 are lower, and 2 remain unchanged. Cattle, hogs, and sheep are under last month and last year. Corn is the only grain above a year ago. Dairy and poultry products are running about the same.

Corn Higher

Corn production is forecast at a trifle over three billion bushels. About one-fifth will be sold as corn. Price at Chicago is now 14 cents higher than last month and 31 cents above the same date last year. The average price for this crop year promises to be enough above last year to yield at least $100,000,000 additional income.

Wheat Situation

Wheat is six cents higher at Chicago than a month ago and 10 cents above three month ago, but five cents under one year ago. Wheat shipments abroad since July 1, have been 40 per cent less than the same period in 1922. Foreign demand yet to be exerted, coupled with low supply east of the Rockies, and the thirty cent tariff give hope for a rising wheat market.

FOUR FUNDAMENTALS FOR COOPERATIVES BY SECRETARY FOX

Correct Organization--Proper Finance--Good Management and Accounting

"There are four fundamentals that we must carry out in our cooperative marketing associations," said Mr. Fox. "The first one is to be organized right. The directors have a proper function in the management of the organization that can not be carried on in any other way. The manager can not afford to do without the judgment of the directors.

"The second point is that you must be properly financed. Better not start until you are financed right.

"You must have good management and that means the directors of the association as well as the hired manager.

"Next comes a good accounting system. If at the end of every month your board of directors could have a financial statement analyzed so that it shows the profit or loss of each department of work, I would trust their judgment in directing the affairs of the association. But the trouble is that the Boards of directors do not have such a statement.

"We consulted one of the foremost accountants in Chicago and he told us how the books of 127 elevators in Minnesota are kept in one office. Every night that office knows the exact standing of every association. Cooperative associations are not now getting that kind of service, but they must get it. We are studying a plan to do that thing now."

Big Gain Shown In Receipts and Profits of Agency

The Indianapolis Producers Commission Association received 3,217 cars of live stock during June, July and August, 1923, as compared with 1,683 cars for the same period last year. This is an increase of 91 per cent.

At the same time, the profits for the period showed an increase of 170 per cent this year over 1922. Profits for June, July and August, 1922, were $7,449.81; for the same months this year, $20,480.84.

This example illustrates how handling costs are reduced with volume of business and larger refund is assured to member shippers.

Illinois Agricultural Association RECORD

Volume 1 | Nov. 20, 1923 | Number 17

I. A. A. ANNUAL MEETING TO BE HELD JAN. 16-17

Sessions At Galesburg; May Hold State-wide Markets Conference Jan. 15

The ninth annual meeting of the Illinois Agricultural Association will be held in Galesburg on January 16 and 17. These dates were set by the executive committee at their meeting November 9.

A meeting for managers, boards of directors and officers of marketing organizations is planned for January 15, the day prior to the annual meeting proper. Definite announcement will be made later.

Committees Appointed.

By motion of the committee the president was asked to appoint a committee on constitution and by-laws which will make a study of the constitution and will review all changes suggested. The motion carried the suggestion that proposed changes be sent to this committee thirty days prior to the annual meeting date.

Budget Committee.

A committee to prepare the budget for next year, composed of President S. H. Thompson, Secretary George A. Fox and the Finance Committee, composed of Charles Finley, Henry McGough and A. O. Eckert, was elected by the executive committee. The report of this committee will be in the form of a recommendation to the new executive committee elected at the annual meeting.

New Fruit Committee

An advisory committee of six for the Fruit and Vegetable Marketing Department was appointed upon the recommendation of A. O. Eckert, chairman of that committee. The new members of the committee are Prof. W. S. Brock and Prof. W. H. Lloyd, both of the Horticultural Department of the University, I. D. Snedeker, Jerseyville; Willis Seward, Quincy; Robert Endicott, Villa Ridge; and Frank Lanter of Belleville.

Co-op Marketing Day To Precede A. F. B. F. Meet

A co-operative marketing conference has been called by Walton Peteet, Marketing Director of the A. F. B. F. for Saturday, December 8, which precedes the four day annual meeting of the Federation.

Reward Offered For Bootleggers of T. B. Cattle

To stop the bootlegging of T. B. cattle into the state, the Illinois Agricultural Association offers a reward of $100 on the first conviction in each county for violation of state or national law or regulation, prohibiting the importation of tuberculous cattle into the state.

The I. A. A. offer is made on the provision that the farm bureau within the county offers a similar amount for first conviction, making a total reward of $200. The conviction must be for a violation committed after this reward offer is made, and is not retroactive.

Numerous reports clearly indicate to I. A. A. officials that tuberculous cattle are being smuggled into the state without regard for law. This is especially true on the northern border line of the state.

An urgent demand by many interested in eradicating tuberculosis in the state has resulted in this action.

Many Poultrymen Apply for Use of Inspection Plan

A large number of poultrymen and hatchery owners have applied to the I. A. A. and the State Department of Agriculture at Springfield for inspection of flocks and hatcheries under the new plan of state-certified flocks and accredited hatcheries, according to J. D. Harper, assistant secretary of the I. A. A.

An examination for inspectors to work under the plan was held at the University of Illinois on November 13, and subsequent examinations will be held as men are needed for the work.

Trip To Europe Is Planned For Illinois Boys

Plans were made for sending the Whiteside county dairy cattle judging team, champions of the United States, to the Royal Stock Show in England to compete for world honors, at a recent meeting of farm organization and dairy manufacturing interests.

Secretary George A. Fox of the I. A. A. was appointed chairman of a committee to finance the trip and Mr. L. P. McMillan, Banker of Rockford was appointed secretary-treasurer.

PULL OUT, PLOW AROUND, OR TURN IN FOR THE DAY?

It's at Galesburg, Jan. 16 and 17!

At Galesburg, January 16 and 17, the ninth annual meeting of the I. A. A. will be held. Save these dates and make plans to be on hand. Make a vacation out of it and bring your wife along; it will help to make the work easier all year.

The program in the making promises to be one of the best. A previous one day meeting is planned for executives and managers of marketing companies, a new feature for the annual meeting.

Send your hotel reservations to the I. A. A. office. Other definite announcements of the meeting will appear in the next issue of the Record.

More Than 165,000 Pounds of Wool To 1923 Illinois Pool

Illinois farmers have consigned approximately 165,000 pounds of wool to the 1923 wool pool which is about 20,000 pounds more than last year, according to C. A. Stewart of the I. A. A. Live Stock Marketing Department.

The wool market is very slow at present, says Mr. Stewart, and it is not likely that conditions will favor movement of the pooled wool in the near future.

TO USE NEW LAW

Officers of the Ozark unit of the Illinois Fruit Exchange, in Johnson county, are making plans to reorganize soon and to incorporate under the Illinois Co-operative Marketing Act which went into effect July 1. This unit will be the first to come under the act. All other units are expecting to reorganize during the winter.

Fruit Interests Asked To Fight Freight Boost

Effort is being made by the I. A. A. Transportation Department to get all fruit and vegetable interests of the state to assist in the fight against an increase in freight rates.

The Indiana Public Service Commission complained before the Interstate Commerce Commission that freight rates on fruits and vegetables to Chicago are out of line with Illinois rates to Chicago. A hearing was held March 7, at which time the fruit and vegetable interests of Illinois were not represented.

The I. A. A. and Illinois Commerce Commission have petitioned the Interstate Commerce Commission for a rehearing of the case. The I. A. A. is inviting al interests to work with the Transportation Department on this problem.

FARMERS NOT OUT OF THE RUNNING ON TAX PROBLEM

All Illinois Knows That State Body Has Broken Its Promise

The State Tax Commission knows that the farm bureau is able to sit up in bed even if valuations of farm land are not of line with city real estate in seven counties.

At the same hour the last Record was going to press, I. A. A. Information Department released a story to the press charging the Commission with evading their lawful duty as laid down by the act that created the Commission and of breaking their promise made to the Illinois Agricultural Association to order reassessments in seven counties where wide inequalities of assessments existed.

In the Press.

The next morning the Chicago Tribune carried a front page column story telling all about the I. A. A. charge and printing part of the letter Attorney Newton Jenkins sent to the Commission. All of the Chicago papers carried the story, the press wire associations ticked the charge off to papers all over the state, and a few days later the Orange Judd Farmer and Prairie Farmer both carried first page stories.

The Chicago American waited a few days and came out with an editorial warning the powers-that-be that it would be a good idea to play square with the farmer crowd.

But No Answer.

But no answer or excuse has come from the Tax Commission to the I. A. A. office, in the face of this barrage.

A few days after the newspapers carried the story that

(Continued on page 4)

A. F. B. F. Meet To Hear About I. A. A. Tax Work

"The taxation work accomplished by the I. A. A. is the best project carried on by a state farm bureau that I know of," says Secretary John Coverdale of the American Farm Bureau Federation.

Mr. Coverdale has asked John C. Watson, in charge of tax work for the I. A. A., to tell about his work at the annual meeting of the Federation in December.

Illinois Agricultural Association
RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by News Publicity Department, E. L. Bill, Director.

Entry as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 21, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of ten cents for subscription to the Illinois Agricultural Association Record.

THE REAL TAX PROBLEM

Not a word from the State Tax Commission. No answer to our letter asking what it has done, why it has failed to act, or what it proposes to do.

This is after the Commission agreed with us that our contentions are correct. This is after the Madison County Board of Review admitted to the Commission that farm land valuations are higher than city real estate. It is after the Montgomery Board of Review testified to the Commission that it could not reduce valuations on farm land because it had an agreement with corporations of the county. The State Tax Commission has not answered our letter after 23 days of waiting, even though it promised us that it would order reassessments in seven counties where there are wide inequalities of assessments, if the county Boards of Review did not correct the inequalities of their own accord.

The Commission has not offered an argument why it cannot do the thing it promised. It has not offered an excuse. It has not refuted an argument.

That is where we are in this question of reassessments in seven counties, but the immediate question begins to look like the small end of the real problem facing Illinois farmers. With the I. A. A. Tax Department on the job, and with plenty of ammunition left, let us leave that question for a moment to look at the big problem.

The State Tax Commission is created to carry out a state law. The members take an oath of office, swearing they will do their duty.

County farm bureaus and the Illinois Agricultural Association have presented a problem to this Commission. The farm bureau has spent much time and money on getting facts and truth to present to the Commission. The farm bureau presented hard, cold facts to the Commission, not bunk, not half truths. It has steered clear of politics, wire-pulling and trickery to win its case. It has played a clean, square game. It has not had to back up on any point. And up to this date the Commission created to carry out a state law has not shown the courtesy of an answer.

If this is the kind of treatment that organized farmers will continue to get, the big problem is not the reassessments in these seven counties.

While we are on the subject, let us not forget that it is organization that has made the whole work on the problem of farm taxes possible. It is not a mere "happen-so." It is self-help. Illinois farmers are paying the bill through their membership fees to county and state farm bureaus. The tax work started three years ago. This is the first year that the county tax problem has been tackled.

If we are going on and solve the tax problem, get the final answer to it, it will be accomplished by self-help, by organization. Mere promises will not solve the problem. The right kind of laws may have a part in it, but the real answer is organization. We are down the main highway to another crossroad on the tax problem.

—o—

CO-OPS AND FARM BUREAU

What relation should the county farm bureau have to co-operative marketing associations within the county? That was one of the questions up for discussion at the district conferences. From the evidence presented, not many county farm bureaus have a very definite relation to the marketing associations. The general trend of thought leaned toward the idea that the county farm bureau must have some kind of interest in marketing organizations if they foster their organization. Several times it was stated that a few farm bureau members said they did not need the farm bureau after the live stock shipping association was organized.

In this issue of the Record Farm Adviser Eyman tells how Jersey county has solved this problem. The Jersey county plan is working well under the conditions of that county.

Let's make the Record a clearing house of experience on this question the next several months. Write us the experience you have had in your county. Will the Jersey county plan work in your county, and if not, why not? Should there be a relation between farm bureau and marketing associations? Send the Record your ideas.

—o—

CLEAN MILK INCREASED DEMAND

The experts say that a standard, quality product is the first thing for cooperative marketing organizations to strive for. Is it all theory and bunk or is there some truth in it?

Here are some cold facts bearing on the subject that come from a year and half of experience of the Quincy Cooperative Milk Producers' Association.

In 1921 fifty-five milk dealers of Quincy were charged with selling unsanitary milk. There was more milk than there was demand for.

The Quincy co-op produced a clean, standard product and advertised it. Milk consumption has increased 25 per cent in the past year and the demand is greater than can be supplied. The City Health Department is a real friend and help to the Quincy cooperative association.

Quincy consumers used good judgment in not drinking more milk when 55 dealers were charged with selling unsanitary milk. The wonder is that they drank any milk. No, the idea of a standard quality product is not theory or bunk. City folks are not much different from farm folks. If we go to town and get in a dirty restaurant, we don't eat much, and we don't go back, and we warn our friends to keep away from that place.

Ask your wife if she ever got a bad sack of flour, and if she has, ask her if she still buys that brand of flour. Her answer will be the answer to the question of standard and quality in the product that we sell through cooperative marketing associations.

A standard, quality milk produced by the Quincy association has given city consumers faith and confidence in milk, with the result that they buy more.

—o—

An increase of 29,099 paid up members is the record of the American Farm Bureau Federation for 1923 over last year.

LIVE STOCK MARKETING

During the week of November first, the savings of the East St. Louis Producers' Live Stock Commission Company was 40 per cent of the total commission charges. This is in the face of the fact that the Producers' company has a commission rate 20 per cent lower than other commission companies at that yards. The Producers handled 295 carloads of stock that week which is 14 per cent of the business of that market.

This is a fine showing and it denotes efficiency but according to the things said at the district conferences it is not the answer to the live stock marketing problem. What do you fellows expect this live stock marketing plan to do for you anyway? That was the question put up to the audiences at most of the meetings. The unanimous answer was that it is expected to go on and grow to the point that it will dominate the market so that it can be in a position to stabilize prices. It is to stabilize prices, to cut out gluts today and famine tomorrow, that the live stock marketing plan is expected to accomplish.

—o—

ORGANIZATION LESSONS

The organization department points out three significant findings in its work this year.

Community organizations within the county are a big help in organization work. Where the shipping association is going good and is tied to the farm bureau, there is little organization trouble. A definite program mapped out and carried out by the county farm bureau is a real asset in organization work.

All over the state there are county organization chairmen, township and community chairmen, farm advisers and others who have been through organization work this year. You men can add to this experience and all counties can profit by it.

The Record will hold some space open for your letters on this question in the next several issues. Come on with your organization experience.

—o—

LIKE THE RECORD?

At several of the district conferences it was stated that there is need for more information about what the I. A. A. is doing. The Record, going to all members twice a month is our chief means of telling you what is going on.

How do you like the Record? Do you stop everything to read it through when it arrives, and do you know any more about what is going on after you have read it? Do you find what you want to know about the I. A. A. in the Record? We would be very glad to have your criticisms and suggestions.

—o—

GOOD MANAGEMENT

How often does the board of directors of your cooperative marketing association meet? At the district conferences several members of shipping association boards said that they did not meet oftener than once a year. Others said they did not meet more than two or three times a year. One said the board was called together when there was trouble.

Good management is held up as one of the essentials of success in cooperative marketing associations. Sure that means to have a good manager, but doesn't the direction and responsibility of management rest with the board?

—o—

FOR FRUIT AND VEGETABLE SHIPPERS

There is a move on foot to increase freight rates on Illinois fruits and vegetables. The Transportation Department of the I. A. A. is watching this problem and fighting to prevent an increase.

—o—

The experience of the Cass County Farm Bureau points to the fact that farmers must be interested in how their tax money is spent as well as in knowing that they are paying their just share of taxes.

Quality Plus Co-operation; That's What Turned the Trick at Quincy

"The present rate of milk consumption is fully 25 per cent greater than it was a year ago"—so reads the annual report of the Quincy, Ill. Board of Health of April 1, 1923.

In an adjoining paragraph we read: "The development of the Quincy Cooperative Milk Producers Association by upwards of 75 of the former raw milk producers and its increasingly successful operation as a milk pasteurizing plant during the past eight months, has not only greatly reduced the number of raw milk distributors but has materially aided in raising the general standard of purity of milk throughout the city."

To find the "whys and wherefores" of such statements as the above, we visited the city of Quincy early in October to get this story of "quality" through co-operative marketing, for such it seemed to be.

We found the home of the Quincy Co-operative Milk Producers Association on east Broadway. The building was a large battery shop when taken over by the farmers' company. Some changes and the addition of up-to-date dairy equipment fitted the structure into a first class milk plant.

J. A. Connery, manager, and E. L. Selhaver, superintendent, showed us through the building.

Home of the "Co-op"

The business office and retail room of the "co-op" are located in the front of the plant. Directly behind the retail room is the refrigeration room, where all the milk and other products are kept cool before going out to customers.

Patrons unload their milk on the receiving platform in the rear of the plant, where it is weighed, samples are taken, and the testing is done. From the receiving vat, most of the milk is pumped through a filter up into the pasteurizer which is on a platform raised about ten feet from the floor. Correct pasteurization temperature is assured by a recording thermometer, which records in red ink on a chart both the temperatures and time of holding.

After pasteurization, the milk flows by gravity over a brine cooler before being bottled on the rotary bottling machine.

Everything Clean

A cream separator, cottage cheese vats and churn comprise the major portion of the remainder of the equipment. We noticed that the plant was well-screened and that the floor, walls, and all equipment seemed scrupulously clean. Even the basement, which contains the ice machine and provides room for storage, was well swept.

In remarking concerning this fact, Mr. Selhaver said: "We always try to keep everything looking clean and in such condition that we are never ashamed to show our customers or other visitors through our plant. Since our opening day, when we had 'open house' to the people of Quincy, we have aimed to be always ready for inspection."

Mr. Selhaver and Mr. Connery gave us some facts concerning the organization.

How It Was Organized

Plans were started toward the formation of the association in 1921 through the Adams County Farm Bureau. Advisory aid was given by the Dairy Marketing Department of the I. A. A. The plant was capitalized at $50,000. After the stock sale and other preliminary arrangements, the company opened for business on May 30th, 1922.

"Open House" to the people of Quincy featured the opening of the new plant. Over 1500 gallons of milk was given away during the day. Two movie films from the National Dairy Council were shown. Everything possible was done toward interesting folks in quality milk and other dairy products.

Milk In Schools and Factories

"We have introduced milk into the schools and factories," stated Mr. Connery. "Each noon we take cases around to thirteen factories to supply the employes for their noon lunch, one factory alone taking from 7 to 14 cases each day. Last year 'co-op' milk was used in several schools of Quincy and the demand has increased materially this year. We cannot get enough milk to supply the demand."

Further insight into the "supply and demand" problem disclosed the fact that whereas farmers near Quincy seemed to produce more milk than the city could consume before the coming of the "co-op," now the producers cannot keep up with the consumption. The association is receiving milk trucked in from 30 to 40 miles away from Quincy.

Pays $3.50 per Hundred

At no time has the company paid less than $2.40 per hundred for 3.5 milk we learned. When we made our visit, $3.50 was being paid, with five cents added or deducted for each point above or below 3.5 milk.

One remarkable fact is that milk in Quincy retails for only 10 cents per quart, which is said to be the lowest price for any city in the country of the size.

"Creamy Products"

The association is now operating eight retail and three wholesale milk routes. The wagons, drawn by gray horses, display the "Creamy Products" brand with "The Taste That Wins" as the slogan.

Besides selling milk, the Quincy co-operative handles culture buttermilk, cottage cheese, cream, butter, and the chocolated drink, "400." Only sweet cream is purchased for the manufacture of butter. The high quality of that product is attested by the fact that it commands a premium of from three to five cents per pound over the market price of butter in Quincy. And still they cannot secure enough cream to supply the demand for quality butter.

Business Has Grown

The growth in sales of the Quincy Co-operative Milk Producers Association is shown in a comparison of the first year's business with the second. For the first seven months that the company operated—June through December, 1922, the average monthly sales were $11,979.87. For the next eight months, from January through August, 1923, sales averaged $15,007.38, an increase of $3,027.51 per month.

Producers Get 61 Per Cent

July and August business statements of the association show that members of the company were paid approximately 61 per cent of the consumer's dollar.

In July, the total sales were $15,194.99 and the amount paid patrons was $9,323.03. In August, out of sales totalling $15,491.84, patrons received $9,307.93. Deductions included sales expense, operating expense, depreciation, dividend reserve, and general reserve fund.

Six Per Cent Divided

At the close of its first year's business, six per cent dividend was paid to stockholders of the association.

Noting the good volume of business of the "co-op" as well as the increase in dairy products consumption, we interviewed other milk dealers in Quincy to find out what had been their experience since the co-operative organization had become a factor in the milk market.

"It has not hurt our business in the least," stated George Durst, of Durst Brothers, who wholesale milk and ice cream. "We have been on the most friendly terms with the 'co-op' at all times and believe that such relations are best between competitors."

Competitor is Booster

When we met E. M. Hodgdon, proprietor of Hodgdon's dairy, we found an enthusiastic booster for the producers' association instead of a disgruntled competitor, which one so often finds.

"I really don't know how to express my gratitude to the 'co-op' for the way it has helped me," declared Mr. Hodgdon. "I'll admit that when it started up I thought it was going to hurt my business. Instead, my business has increased my milk trade at least 35 per cent.

"I was the first dealer to pasteurize milk in Quincy," he continued, "but somehow people didn't know what it was and seemed prejudiced against it. Along came the 'co-op' and gave pasteurized milk a lot of advertising which helped me greatly.

Quality Did It

"And when they stressed quality and sold milk that wouldn't sour over night, all other dealers in the city commenced to take better care of their milk, to ice it, and the result has been a higher quality of milk throughout the city with the resultant increased consumption."

A short history of the milk situation in Quincy was related to us by Dr. J. W. H. Pollard, Public Health Officer of the city.

Health Officer's Statement

"We have never had a city ordinance requiring pasteurization of milk," said Dr. Pollard. "Most of the milk sold up to the formation of the co-operative organization was raw milk. It was not satisfactory.

"During 1921 we had 55 milk dealers who were charged with selling unsanitary milk. I made a visit to several grocery stores and found that people were buying hundreds of cases of 'canned' milk. They were afraid of our raw milk supply. Thus you can see why the Health Department backed the establishment of the co-operative association to better Quincy's retail milk supply. And the result is stated in our last annual report."

Ninety Members

There are about 90 members under contract in the Quincy Co-operative Milk Producers Association at this time, according to Mr. Connery, manager of the company. John B. Peters is president; Joe Bockhold, vice president; Albert Hecke, secretary; and Wilbur Coe, treasurer. These men with Anton Hoebing, Hugh Reeder, William Boge, George Wissman and John Hemme, constitute the Board of Directors.

He's From Missouri, Too

Let C. M. Gray, who lives over the river near Palmyra, Mo., express the sentiment of patrons of the Quincy "co-op:" "The Quincy co-operative milk plant has been a help in making better market for us. We have received quite an advance in price for our milk—perhaps as much as 15 per cent.

"The feeling is very favorable indeed for co-operative milk marketing among producers around here."

QUINCY'S QUALITY DAIRY PLANT

THIS is the home of the Quincy Co-operative Milk Producers' Association, an organization formed through the efforts of the Adams County Farm Bureau and the Illinois Agricultural Association. The company "has materially aided in raising the general standard of purity of milk throughout the city," says the Quincy Board of Health. Milk consumption increased fully 25 per cent in the city since the "co-op" opened for business, states the Board.

Radio Programs!

As the Record goes to press, the American Farm Bureau radio service was uncertain as to whether future programs would be broadcasted at 8:01 on Tuesday or Wednesday evenings, as Station KYW, Chicago, was making a change in its schedule.

On Nov. 20 (or 21), at 8:01 p. m., C. B. Hutchings, secretary of the National Transportation Institute, will speak on the subject, "The Transportation Knot," followed by H. C. Pollock, director of the National Live Stock and Meat Board, on "The Nation's Food Supply."

For Nov. 27 (or 28), at the regular hour, Walton Peteet, director of marketing for the A. F. B. F., will discuss "Co-operative Marketing of Wheat." He will be followed by D. O. Thompson of Homestead Films, Inc., who will speak on some phase of farm movie work.

Do you tune in on the Farm Bureau programs? If you do, write the Record about it and tell us how you like them.

DELEGATES CHOSEN FROM ILLINOIS FOR A. F. B. F. MEETING

Five Will Serve As Voting Directors From Illinois; Dates Dec. 10-14

S. H. Thompson, Quincy, president of the I. A. A.; Henry McGough, Maple Park; C. R. Finley, Heopeston; Curt Anderson, Xenia; and D. J. Holterman, Sadorus were elected as members of the House of Directors of the American Farm Bureau annual meeting by the executive committee at their monthly session, November 9.

Earl C. Smith, Detroit, was elected first alternate and Frank D. Barton, Cornell, second alternate. All of the directors were chosen from the executive committee.

Meeting in December.

The A. F. B. F. annual meeting will be held in Chicago, December 10-14.

According to the constitution of the American Farm Bureau Federation, each state is entitled to one voting director and one additional director for each 20,000 paid up members or major portion thereof. The paid up members are counted from December 1 to December 1.

Others as Delegates.

The remaining members of the I. A. A. governing committee will attend the A. F. B. F. annual meeting as members of the House of Delegates where they will have all the privileges of directors except the right to vote.

Each state is allowed one delegate for every 10,000 paid up members.

Watson Gives Aid To Cass County In Examining Records

John C. Watson, Statistician for the I. A. A., was called to Cass county by the farm bureau recently to examine county records and to make a report showing how the taxpayers' money is being expended in maintaining the county offices.

The township plan of government for Cass county was up to the people for vote in the November 6 election and farmers and most of the people in towns outside of Beardstown were for its adoption, as they believed that it would make fairer representation for the Board of Supervisors and would help to make more economical county government.

Mr. Watson's findings confirmed previous showings of extravagance in county expenditures and the existence of a much larger floating debt than was generally known. His report was given much publicity and in the election the township plan carried five to one.

All Co-ops in Jersey County Linked To Bureau

When the Jersey County Farm Bureau started co-operative marketing work, action was taken right then and there to see that a working relationship was maintained between the organizations formed and their 'daddy," the Farm Bureau. So today Jersey county farmers find it well worth while to tie up with the bureau if they expect to market live stock through the shipping association, fruit through the Illinois Fruit Exchange, or purchase serum through the Jersey County Farm Bureau.

There were two big reasons why the action was taken, according to Farm Adviser, R. L. Eyman.

"First, we wanted everything that we did tied up with the farm bureau because without counsel and our help the thing might go wrong," he states, "and second, because if it was a success we wanted it to strengthen the organization. We didn't want to trust to luck that the fellows whom we were helping would, out of gratitude hold up the hands of the parent organization. We just expected that human nature wasn't that way."

Fifty Cents Per Hundred.

A man must be a farm bureau member to ship through the Jersey County Shipping Association at its regular charges. If he is not a member, he must pay 50 cents per hundred extra for the privilege of the service.

This results in most live stock shippers joining the farm bureau, states Mr. Eyman. Once in a while a man who has only a little stuff ships it through, but whenever his extra costs are going to amount to as much as $15.00, right away he joins the farm bureau, "and when we get him in we can do a lot of things for him other than shipping his live stock."

Fruit Exchange.

The farm bureau has made it a ruling that if a man belongs to and ships through local units of the Illinois Fruit Exchange, he will be charged a sum greater than his membership in the bureau if he is not already a member. They naturally take the option that is cheaper, says Mr. Eyman. However, it is not compulsory that farmers be farm bureau members in order to belong to the fruit exchange.

Serum Purchasing.

Another activity that the Jersey County Farm Bureau controls is serum purchasing. It makes arrangements with a local dealer to handle serum, dictating to him where it shall be bought, the price paid for it, and the margin of profit. Under the terms agreed upon, the dealer cannot sell to anyone except farm bureau members or the agency is taken away from him.

The result is that many farmers just naturally come in and join the farm bureau because, in their mind, the organization is greatly strengthened and is doing much for them.

Farm Bureau at Head.

"Farm bureau leaders in Jersey county are very anxious at all times that organized agriculture, and especially the farm bureau shall have complete control of organized activities of our county at all times," declares Mr. Eyman, "and this is the reason why we have everything sewed up in the farm bureau."

Series of Farm Bureau Business Meetings Are Held

R. A. Cowles, Director of the Finance Department of the I.A.A. is holding a series of farm bureau business meetings over the state at points to serve the best convenience of all county farm bureaus.

The purpose of these conferences is to provide opportunity for officers and farm advisers of each county to discuss the business problems of the farm bureau, particularly collection problems. The I. A. A. collection plan is being fully explained at the gatherings.

Meetings have been held recently at Kankakee, Bloomington, Tuscola, Taylorville, Belleville and Murphysboro. One is scheduled for today at Harrisburg; Olney, Nov. 21; Jacksonville, Nov. 22; and Quincy, Nov. 23.

FARMERS NOT OUT OF THE RUNNING ON TAX PROBLEM

(Continued from Page One)

Chairman Percy Coffin had resigned from the commission, a second announcement appeared stating that James Telford, member of the Commission from Marion county had been appointed chairman. The story carried the intimation that this move was made to please the farmers.

"Whether there is any truth in that or not," says John C. Watson, in charge of tax work for the I. A. A., "the only thing that is going to please the farmers is for the Commission to act, to carry out the law and their promise."

"We Want Action."

"I want it understood that the Association is not attacking any individual member of the Commission. We have tried to steer clear of wire pulling and political angles of the whole question. We based our arguments on facts, facts that took long hours and hard work to get.

"And these facts have not been questioned by the Commission. The Commission as a whole agreed with us and made us a promise, and we have not even had the courtesy of an answer. No, any changes which have been made in the personnel of the Commission is not going to satisfy. What we want is action by the Commission. We want the Commission to live up to its oath of office."

MEETINGS WELL ATTENDED

G. E. Metzger of the I. A. A. Organization Department, who has been addressing many annual meetings throughout the state this fall, reports that there is a larger attendance and more interest displayed on the part of the farm bureau membership than ever before.

THREE FIELD MEN ARE EMPLOYED FOR PRODUCERS' CO-OPS

Kelley, Grimes and Orndorff Engaged Through Joint Agreement With I. A. A.

The three field men, whose appointment was authorized by the I. A. A. executive committee about two months ago, have been employed by the Live Stock Marketing Department of the I. A. A. to work for the Producers' commission companies at Chicago, Peoria, and East St. Louis.

F. H. Kelley, formerly farm adviser in Edwards county, started work November 5, for the St. Louis agency. He will cover all southern Illinois territory from which shipments go to that company.

Grimes Continues

I. C. Grimes, who has been doing field work for the Chicago Producers Commission Association, started work November 19, to cover the Chicago territory in Illinois, exclusively, under the agreement with the I. A. A.

To work for both the Chicago and Peoria Producers' agencies, R. B. Orndorff, president of the Tazewell County Farm Bureau, has been employed.

Duties

These three field men will be financed exclusively by the Producers' agencies. They will endeavor to strengthen the relationship existing between the agencies and the farm bureaus; make personal calls on managers and directors of shipping associations, individual live stock feeders, and all others interested in consignment of live stock to terminal markets; assist in organizing shipping associations and attend meetings of associations; and, when requested, aid in adjusting complaints.

Feeding-Transit Rates Granted On C. & N. W. Railroad

Feeding-in-transit rates on cattle and sheep to apply at points in Illinois directly intermediate to Chicago have been announced on the Chicago and Northwestern railroad, according to information received by the I. A. A. Transportation Department.

The Transportation Department will be glad to advise any shippers along the C. & N. W., who contemplate buying feeders in the West, as to how the rates apply and what advantages they may have in its use.

WANT A WOOL BLANKET?

On these cool and shivery fall nights with winter coming on soon, just think how much more "comfy" you'd be after you crawl into bed if you had one or two of those virgin wool blankets which the I. A. A. Live Stock Marketing Department has for you. They are double blankets, 72x84 inches in size, and weigh six pounds. Only blue and gray colors are left. They're going fast so you'd better get your order in soon. Remember the price is $11 to farm bureau members and $13 to non-members.

J. C. Sailor Will Retire On Dec. 1st From I. A. A. Work

Our John Sailor, who has been traveling the state ever since the I. A. A. was first organized on the five dollar membership basis, handling organization crews and preaching the gospel of organized agriculture, told the Executive Committee that he will retire from active service December first.

J. C. Sailor

Mr. Sailor was one of the early leaders of th farmers' elevator movement and later was president of the state organization. With the coming of the Farm Bureau he first tied into the county organization work and in 1919 took charge of organization work for the I. A. A.

Under Mr. Sailor's direction a farm bureau membership of a hundred thousand was rolled up in Illinois. Mr. Sailor gave all that he had in him to this big work and he put it over.

"We appreciate your faithful work," the Executive Committee told Mr. Sailor. "Good-bye and good luck to you."

A. F. B. F. Research

Of date November 6, 1923, prices of seven farm products were higher than a month previous, fourteen were lower, and three were unchanged, according to the Department of Research, American Farm Bureau Federation. Compared with a year ago, thirteen were higher and eleven were lower.

Cattle, butter, eggs, rye, barley, kafir and cotton were higher than a month ago; hogs, lambs, sheep, cheese, poultry, wheat, corn, rye, hay, sugar, apples, onions, beans, and flax were lower; while hides, potatoes, and wool remained unchanged.

Compared with a year ago, sheep, butter, cheese, eggs, corn, kafir, barley, hay, cotton, potatoes, onions, sugar and apples were higher than a year ago; while hogs, cattle, lambs, wool, poultry, wheat, oats, rye, flax, beans, and hides were lower.

It is interesting to note that 26 per cent more hogs were slaughtered at markets under federal inspection in the first eight months of 1923 than in the same interval of 1922. Average weights were practically the same both years.

45 COUNTIES HOLD MEMBER CAMPAIGNS DURING THIS YEAR

Four Bureaus Affiliate With I. A. A.; Gain Lessons From Organization Work

Forty-five county farm bureaus have carried on reorganization work this year, reports the Organization Department.

Johnson, Clinton, White and Jefferson counties are winding up campaigns now and Gallatin county has just started. Eleven other counties are doing clean-up organization work.

Four New Counties

During the year four county farm bureaus have affiliated with the state and national organizations. They are Lawrence, Pulaski, White and Jefferson. Calhoun and Massac counties are the only two not affiliated with the I. A. A. and A. F. B. F.

Organization Lessons

"Where the live stock shipping Association is functioning in good shape and is closely tied up with the county farm bureau, we have little or no trouble in organization," says G. E. Metzger of the Organization Department, in commenting on the work of the year.

Community Organizations

"Another outstanding thing," says Mr. Metzger, "is the fact that not in a single county have we had any particular difficulty in organization work where community organizations have been developed.

"Where the county farm bureau has mapped out a definite program of work and has carried out that program, it has been of great help in organization work," Mr. Metzger says.

Junior Winners To Banquet With I. A. A. Officials

Two hundred farm boys and girls, winners of county club work, will be entertained by the I. A. A. on the evening of December 5, during their visit to the International Live Stock Show.

The full executive committee and all employees of the Association will banquet with the club winners, after which there will be entertainment given by both the boys and girls and I. A. A. officials. Six thousand boys and girls took part in club work in Illinois this year. This number exceeds last year by 600, according to E. I. Pilchard, in charge of junior club work at the College of Agriculture.

Illinois Agricultural Association RECORD

Volume 1 | Dec. 5, 1923 | Number 18

MARKETING, TAXES, TRANSPORTATION--AT I.A.A. MEETING

Expert Authorities Will Lead Discussions At Galesburg, January 16-17

Co-operative marketing, farm taxes, and transportation will be the chief subjects of discussion when delegates from every Illinois county farm bureau get together at the ninth annual meeting of the I. A. A. at Galesburg, January 16-17.

Marketing problems will occupy the major part of the first day's program. There will be no special marketing day on January 15 as previously announced.

Stone to Speak

James C. Stone, President and General Manager of the Kentucky Burley Tobacco Growers Association, will be the principal speaker on cooperative marketing. Mr. Stone is well known to farmers who heard his talks at the Springfield and Centralia district conferences in October.

George E. Frazer, Chicago, a national authority on accounting and business methods, will speak upon the necessity of sound business methods for successful marketing associations.

Tax Speaker

Richard T. Ely, Professor of Economics at the University of Wisconsin, has been secured to discuss taxation. He is considered a national authority on the subject.

Other speakers who will appear on the program will be announced later.

Talk Limestone Situation At Six Meetings

A series of six meetings are being held by the Phosphate-Limestone Department of the I. A. A. to discuss the agricultural limstone situation and problems. The first of the meetings was held at St. Louis for a group of nine counties in that territory supplied with limestone from East St. Louis quarries.

Other meetings are planned for the extreme southern Illinois, for western Illinois which gets its supply of limestone from Buffalo, Linwood and Bettendorf, Iowa; for the southeastern section depending on Greencastle and Mitchell, Indiana, for their supply; for the Chicago territory supplied by quarries at Chicago, Kankakee and Joliet; and for the extreme north group of counties supplied by Rockford quarries.

If You're Going!

If you're planning to attend the I. A. A. Annual Meeting at Galesburg, Jan. 16 and 17, better send in your reservations immediately to Reservation Committee, Knox County Farm Bureau, Galesburg, saying for what night or nights you desire rooms.

I. A. A. Employs Accountant and Finance Expert

In recognizing the need for more knowledge on the technical and practical side of finance and accounting problems of cooperative marketing association, the Illinois Agricultural Association has employed George E. Fraser of Chicago as consulting accountant and financial adviser. Mr. Fraser will be at the call of the association on these problems.

Mr. Fraser is one of the outstanding men in his line of work. He was Professor of Public Accounting and Comptroller at the University of Illinois from 1913 to 1915. He devised the Illinois state financial system in 1917, and he acts in an advisory capacity to several large organizations in Chicago.

Hearing Secured Before Tax Body On December 6

The Illinois Tax Commission has granted the I. A. A. an all-day hearing in Springfield on December 6, to take up the question of equalization of valuations for state tax purposes.

This will be the third year that the I. A. A. has appeared before the State Commission with the question of state taxes. John C. Watson, in charge of tax work for the association figures that the reductions in valuations of farm land the past two years, caused by the interest of the farm bureau, has saved Illinois farmers $1,070,000 in state taxes. It is the hope of Mr. Watson that every county in the state will be represented at the hearing.

Although valuations of farm lands have been equalized for state tax purposes by the Commission, city property has not been touched since 1917, Mr. Watson states.

MARKET CONFERENCE

A general marketing conference has been called by the A. F. B. F. in Chicago, Dec. 8. It will convene at the Sherman Hotel.

OPEN SEASON IS HERE!

War Is Declared in Five Counties on T. B. Outlaws

Five county farm bureaus have matched the $100 reward offer of the I. A. A. for conviction of the first offender of laws and regulations forbidding trafficking of tuberculous cattle within the county. Several other counties have stated their intention of accepting the offer, but have not taken formal action.

The five counties offering rewards in cooperation with the I. A. A. are Whiteside, Boone, DuPage, Will and Rock Island. DeKalb and McHenry counties have signified their intention of accepting the offer, according to M. H. Peterson, who is assisting in this work for the association.

Six counties have formed local associations for the purpose of carrying out a program of clean-up. These six counties are Whiteside, McHenry, DuPage, Cook, Lake and Boone.

Following is the reward offer being published by the five counties:

The Illinois Agricultural Association will pay $100.00 and in addition thereto, the.....County Farm Bureau will also pay $100 for information and evidence which will be the basis for the first arrest and conviction in.....County of any person violating the law of the State of Illinois or of the United States forbidding the transportation or disposition of tubercular cattle into or within the State of Illinois for a violation on or after the.....day of....., 1923.

Information and evidence of violation must be furnished to .....of....., Illinois, who shall have the conclusive right to determine as between informants the first and best evidence upon which to base a prosecution.

Tax Commission Still Marking Time-No Answer

Nothing new on the county tax situation except that the State Tax Commission has let another fifteen days slip around without giving Illinois farmers an answer to their letter. It is now 37 days since the Commission was asked what it was going to do.

In the meantime both Orange Judd Farmer and Prairie Farmer have continued their exposure of the State Commission. A long editorial in the Chicago American quotes from both farm papers and the I. A. A. Record, showing the feeling of Illinois farmers on this question.

SUBJECTS NAMED FOR DISCUSSION AT A.F.B.F. MEET

Nationally Known Speakers To Talk On Leading Farming Problems of Today

When the fifth annual meeting of the American Farm Bureau Federation convenes in Chicago, December 10, 11 and 12, legislation, marketing, transportation, taxation, community development and program building will be the outstanding subjects of discussion.

Several nationally known speakers will address the sessions which will be held in the Hotel Sherman.

Herbert Hoover Speaks

Herbert Hoover, Secretary of Commerce, is on the program for the first day and will speak on the subject of commerce and its relation to agriculture.

Gray Silver, farm bureau Washington representative, will lead a discussion on agricultural legislation the first day, and B. H. Hibbard, Professor of Agricultural Economics at the University of Wisconsin, will talk on basic agricultural economics.

Sapiro and Howard

Aaron Sapiro, co-operative marketing counsel of the A. F. B. F., will discuss marketing on the second day, while James R. Howard, former president of the A. F. B. F., will present a national picture of the farmers' transportation problem.

John C. Watson of the I. A. A. will talk on a uniform taxation program and Mrs. H. W. Lawrence of the Home and Community Committee of the A. F. B. F. will talk on her subject as other features of the second day.

Farm Credits

Farm credit will be the chief subject for the third day of the annual meeting. E. H. Cunningham of the Federal Reserve Board, will tell of the functions of that board, and W. L. Corey of the Federal Farm Loan Board will explain how organized farmers can use intermediate credit.

The 1924 executive committee of the A. F. B. F. will go into session immediately after the adjournment of the annual meeting.

TO TAKE REFERENDUM

The American Farm Bureau Federation is planning to take a referendum to get the opinion of farmers on the American Merchant Marine at an early date, from which the Federation's legislative policy on that question will be based.

Illinois Agricultural Association
RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by News Publicity Department, E. L. Bill, Director.

Entry as second class matter Oct. 16, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of ten cents for subscription to the Illinois Agricultural Association Record.

62,000 MEMBERS

Maybe you have heard the story already, that the farm bureau is going to the dogs, lost most of its membership, won't last much longer. One story that is going the rounds is that the big loss in membership is a demonstration of farmer opinion against the passage of the Capper-Tincher Act, the Board of Trade regulation law, and the Stock Yards Administration Act. Looks like these two laws are drawing a little blood. One thing sure they would never be on the statutes if it hadn't been for organized agriculture.

Next we are liable to hear that the work in reducing farm taxes is the reason.

There are 62,000 members of county farm bureaus, Illinois Agricultural Association and American Farm Bureau Federation in Illinois. It is not a paper membership. Every member is signed up for three years on a post-dated check. The whole family isn't counted.

This record of membership was made at the bottom of a financial depression, as against a period of prosperity in the first round. Just a lot of men have said they are in sympathy with the farm bureau but could not take on the additional debt of $45.00 for three years dues.

In the first round of organization there was a lot of good-will membership. Often business houses took out several memberships to get the work started, business men joined in many counties and both land owner and tenant joined in a good many cases. The need of economy has cut a lot of this good-will membership.

On the first round of membership campaign, the soliciting for members was done largely by men employed to do that work, with experience in their line. Farmers themselves did not take a big hand in it.

Quite different this time. The large share of this membership was signed by farmers, the organization department says four-fifths of it. It means that the membership was interested enough in the organization to do this work. It is the first time this plan has been tried out. This has resulted in much good to the men that sold the membership too. It has made them realize how much or how little their organization is doing. It has made them more interested men, made that many more leaders in the work.

There is no need to be ashamed or to make excuses for a membership of that number. It may be a greater achievement than a membership of 100,000 three years ago. The man that must look for excuses is the man that is not a member, the man that wants to ride on a free ticket. There are some that want taxes reduced, want fair railroad rates, want better prices for products and all the other things that come with organized agriculture but don't want to join.

The testing-time comes in hard times doesn't it? Many times the argument comes in that the 62,000 membership is a real one, one that understands and believes, one that will help in the program, one that doesn't need to be bolstered up every week, one that will speak out when a false tale is told on the farm bureau.

There is no use trying to "kid" ourselves into believing there are no troubles in organization work, for there are. Sure, the farm bureau should have a membership of a hundred thousand or more in Illinois. It must aim at that membership and work for it. There is no stronger way to do it than for every member of the organization to sell his neighbor.

—o—

THAT'S THE SPIRIT, ROCK ISLAND

There was some sad talk and long faces as members of the Rock Island Cooperative Dairy Company filed into a meeting a few nights ago. You know a hundred and ten dairymen started to retail milk out there on September 25. Everybody was happy at the end of the first month for the milk check amounted to $2.67 a hundred. But the check for the second month was for only $1.09 per hundred pounds.

If that little crowd of dairymen was like all other crowds, among them were some who saw the new little brick building, the fine equipment, the new white delivery wagons, go floating off to be added to the list of dead co-ops.

No one was dead anxious to have the first crack at the meeting. What were the facts about it anyway? Well, the first month, to tell the truth, the company didn't earn $2.67 a hundred. In fact the income just paid for the labor and that is all. The $2.67 was taken out of the capital stock. It sounded bad.

But you know all the milk was given away on the opening day. Yes, and there wasn't a customer on the list next morning when the company started business. A lot of the skim milk was returned to members, wasn't it? Well, that's true.

The bookkeeping and accounting system was a good one. The answer to a penny was there in black and white at the end of the month. Couldn't stay in business long at that rate. The thing to do would be to pay what the company earned. That is exactly what was done the second month. You mean to say it earned $1.09 per hundred the second month and did not pay more than the labor the first month? Yes, that is right. Well, that looks like we are going up hill.

There is a little more explanation to that. You know the company has a bonded indebtedness of $15,000 that must be taken care of by paying one-tenth of it a year. The share for the month was taken out before paying $1.09. And the share of interest on that debt was taken care of. The amount for dividends for the two months was taken out too. In addition to that the insurance fund decided upon at the start, was taken out. That amounted to three per cent. Then the answer is that all of these things were taken care of, all overhead and other expenses were taken care of and the company still paid $1.09 per hundred? Certainly. Not so bad.

And how are things going now?

The company started without any customers and you will remember we decided not to buy any routes. Now there are four good routes and 750 quarts of milk a day are being retailed. The routes are worth money. The first month the company handled the milk of only thirty members. That is all it could take care of. Now we are handling the milk of all 110 members. The wholesale business is growing fast. It was necessary to put on another truck. Listens pretty good, doesn't it?

And something else. Our sales in September brought us in about $85 per day; in October, $146 per day; and this far in November we are getting an average of $231 in sales daily. That's not so bad either, is it?

And then some one got up, pulled an I. A. A. Record out of his pocket and read the story of the Quincy Cooperative Milk Producers Association, how they had increased consumption of milk 25 per cent, how they claim that quality counts, that producers are receiving $2.50 per hundred and that the company is 18 months old.

The crowd had full faith in their cooperative organization. It was about ten o'clock and time to get home. But wait a minute. There is a motion to be made. I move you that when the Rock Island Cooperative Dairy Company receives 18 cents a gallon for milk, that all over that amount be laid aside to pay back what the thirty men lost on last month's milk check. The motion carried and the meeting adjourned.

There are a dozen good lessons in that little meeting of dairymen. One of them is that the laws of business must be followed when farmers start in business. Another is that the value of an accounting system that will tell the exact standing of the company at the end of every thirty days. A third lesson is the necessity for having full and complete information about every detail of the business and giving that information to members of the association.

—o—

BUSINESS METHODS

The existence of cooperative marketing associations in Illinois has clearly demonstrated the need for an accounting system that would give a clear and simple statement of the standing of the association, a statement that would tell at the end of every month which parts of the business are making money and which are losing. More recently the district conferences showed that few cooperatives have such an accounting system.

Probably more cooperative organizations have failed because they disregarded the fundamentals of business and finance than for any other reason. There has been a feeling that cooperative business is peculiar and different from other forms of business. But we are beginning to learn that co-op business is not much different from other business. The rules of the business game are the same in cooperative business as in business run by a corporation or individual.

Finance problems come up in cooperation as well in the corporation. Accounting is as important to co-op marketing organizations as it is in the grocery business. Organized agriculture is awakening to the realization that the business world has a long and wide experience that is useful to cooperative marketing organizations. The lesson of instituting business principles into cooperative marketing organizations has been costly. It has cost the life of many organizations.

To help solve this problem the Illinois Agricultural Association has drafted a man from the business world, a man with technical training and a volume of practical experience in the business world. In this issue of the Record the employment of a consulting accountant and financial advisor is announced.

—o—

ATTEND THE HEARING!

The Illinois Agricultural Association will hold a hearing before the State Tax Commission on Thursday, Dec. 6, at Springfield. Facts and figures will be presented to prove that there should be further equalization of valuations between farm lands and city property for state tax purposes.

At similar hearings held in 1921 and 1922, a large number of farm bureau members, representing many counties, appeared to strengthen the I. A. A. stand. It is hoped that one or more men from every county in Illinois will be present at this hearing to back the I. A. A. case for fair taxation.

Fourth Year of A. F. B. F. Completed in December

The annual meeting of the American Farm Bureau Federation in Chicago, December 10-14, winds up the fourth year of our national organization.

The fifty cent membership dues of Illinois farm bureau members, along with the dues from 43 other states makes the American Farm Bureau possible. Our representatives along with those from other states determine the policies of the national association. Let's look back over the year and see what the results are.

O. E. Bradfute, President

From a list of 44 accomplishments, we have picked those of greatest importance to Illinois. In addition to these, many other worth while things were accomplished, laying a foundation for the future protection of agriculture.

Cooperative Marketing

Cooperative marketing has been a major project of the Federation this year. The big work of this department has been to build a national program of commodity marketing, a program for each commodity made so that all growers of the country can work together. In doing this it has helped many states in securing uniform cooperative marketing laws, and has given 21 states direct assistance in marketing projects.

62 Days in Illinois

The men in this department spent 62 days in Illinois, at marketing conferences and helping fruit, red top, and dairy marketing organizations and assisting with the Illinois cooperative act.

This department developed a national potato marketing plan and helped in eight state campaigns. It developed a national onion marketing plan and helped the first state to organize. Illinois growers of these commodities may want to join with these agencies. It fostered the national live stock marketing plan which is in operation to a large extent in Illinois. It backed up the Federated Fruit and Vegetable Growers, Inc., through which the Illinois Fruit Exchange is now selling.

Legislation.

Probably more worthwhile legislation for farm people was passed by the last Congress than all the farm legislation of the last decade. The American Farm Bureau Federation initiated or championed 26 laws passed by the Sixty-seventh Congress.

Of very direct help to Illinois farmers is the amendment to the Federal Farm Loan Act, which increases the amount that an individual can borrow from $10,000 to $25,000.

Our National Federation was the outstanding champion of the Intermediate Credits act written into the laws of the nation. Through the twelve Federal Farm Loan Banks this act gives farmers an ultimate credit reservoir of $660,000,000. An Illinois law does not make this act of great value to individuals in this state, however, it can be used to good advantage by cooperative marketing associations, and is being used by the Egyptian Seed Growers' Exchange.

Capper-Tincher Act.

The Federation worked for the Capper-Tincher Act placing the grain exchanges under the supervision of the U. S. Department of Agriculture for the prevention of injurious speculation in grain.

Other outstanding laws secured are the Warehouse Act amendment which increases facilities for borrowing money on farm products stored in licensed warehouses; the revival of the War Finance Corporation for the year; a flexible tariff provision; a law protecting dairymen against adulterated milk products by prohibiting interstate shipment of filled milk; and an act establishing an 80 per cent butter standard.

Transportation Work.

The Transportation Department helped to secure a cut of $1,000,000 in the farmers' freight bill through a favorable ruling of the Interstate Commerce on mixed carloads of live stock, a fight waged since 1920. It means a very definite saving to every Illinois farmer who ships live stock in mixed carloads.

J. W. Coverdale, Secretary

This Department helped to lower the minimum weight on single deck loads of hogs upon which freight must be paid in ten states, however, there is a chance that Illinois shippers will be allowed this decrease later on.

A booklet on the pros and cons of the transportation act was issued by this department, giving full information on this national question.

Research Work.

Research is a high sounding name, but the big idea of this work sounds practical.

This Department recognizes that there are two fundamental factors in profitable farming. The first is production in the volume for which there will be a demand at a price that will yield a profit, and second, marketing when and where the profit will be the greatest.

Reason for Research.

It is the work of the Research Department to give us all of the facts and figures involved in these questions, so we can act with knowledge. For instance, of how much importance is the income from wheat in Illinois as compared with the total income? Do the facts of the last twenty years show that it pays to hold or sell wheat at threshing time? What do all the conditions of business and agriculture point to for the next few months? Is there likely to be a large foreign demand for our grain in the next few months.

The Research Department has issued regular reports on agriculture and business conditions. In the last several issues of the Record, a sum-up of these reports has been printed.

PROGRAM STARTED TO STOP TRAFFIC OF T. B. CATTLE

Committee of Five Named To Recommend Program of Action To Executive Committee

A committee of five to study the problems of enforcing laws and regulations pertaining to the importation of tuberculous cattle has been named by President S. H. Thompson.

This committee has been asked to recommend a program of action to enforce laws and regulations, to the I. A. A. executive committee at the December 5th meeting. The committee is composed of Henry McGough, Kane county, Chairman; George Hunt, McHenry county; Harry Wood, Tazewell county; Carlton Trimble, Crawford county; and C. E. Bamborough of Ogle county.

T. B. Association asked Help

This action was taken after the Illinois Anti-T. B. Vigilance Association asked the Illinois Agricultural Association to take charge of the problem of law enforcement.

M. H. Peterson of Lake county who has been working with the Vigilance association has been employed temporarily by the I. A. A. to assist the committee.

Other Associations Favor

Secretary George A. Fox talked the proposition of enforcing tuberculosis laws and regulations with the Illinois Bankers' Association and Illinois Chamber of Commerce. Secretaries of both organizations stated that they are ready to go along on a program of law enforcement.

Grain Committee Will Make Study Of Wheat Growers

It is probable that the new National Wheat Growers organization will be discussed at the December 5th meeting of the executive committee. The grain marketing committee of the I. A. A. will meet on the day previous to the executive committee meeting to discuss this and other subjects.

The grain marketing committee is composed of H. E. Goembel of Hoopole, Curt Anderson of Xenia, D. J. Holderman of Sadorus, G. E. Reder of Mendota and W. A. McNeill of Chandlerville.

Lynch Advises Milk Producers At Mt. Carmel

A. D. Lynch, Director of Dairy Marketing for the I. A. A., made a survey of the milk situation at Mt. Caramel in November at the request of the Wabash County Farm Bureau. At a meeting with dairymen furnishing milk to that city, Mr. Lynch advised the producers upon methods for improving the quality of milk, increasing its consumption in the city, and standardizing prices.

Definite decision was reached to test all herds so that the milk supply of Mt. Carmel will be from tuberculosis-free herds only.

In a visit to Granite City, Mr. Lynch assisted Farm Adviser Raut and a Madison County Farm Bureau Committee in a study of the milk supply of that city with special reference to the possibilities of increased use in schools and factories.

62,000 MEMBERS IS NEW RECORD OF FARM BUREAU

Four-fifths By Neighbor-Sign-Neighbor Method; The Tide Has Turned

A membership of over 62,000 with the prospects of adding several thousand more before the end of the year, is the record for the second three-year period of organization of county farm bureaus and Illinois Agricultural Association.

During the past two years all but seven of the 92 county farm bureaus affiliated with the I. A. A. have conducted reorganization campaigns. Forty-five of that number carried on campaigns this year.

"An outstanding feature of this second round of membership campaigns, is the fact that about four-fifths of the members have been signed up by neighbor signing neighbor," states G. E. Metzger, Director of Organization work.

Going Up Hill

"Conditions are getting better all of the time," Mr. Metzger states. "State solicitors were signing up from 8 to 10 members a week a few months ago and now they are signing up from 8 to 20 members a week, and in some cases more. It looks as if the bottom of the depression is over.

"I attended 16 annual meetings in October and nine in November, and only two of them had an attendance of less than 100. At some of the meetings there were as many as 600 present."

White Going Good

Word from the White County Farm Bureau states that 200 members have been signed up in four townships. There are four townships left to work. Gallatin county signed up 43 members the first day of its campaign.

Baby Chicks Looked Like Cross Between Leghorn and a Crow

Experience has led Mrs. Guy Smith of Shawneetown to believe that the new plan of inspecting and accrediting farm poultry flocks and hatcheries is a good thing. Mrs. Smith writes the following:

"I wanted to get some new blood in my flock so I ordered 100 baby chicks of the best quality from a hatchery. They all looked like Barred Rocks until they feathered. Some looked like a cross between a Leghorn and a crow after they feathered out. I wrote the hatchery asking if they guaranteed their chicks and I never heard from them, so you see, I believe in inspected flocks."

Leadership and Clubs Are Organization Helps

The local community club and local leadership are great helps to the farm bureau at the time of organization, according to letters from several counties.

The community organization is the very heart and soul of the farm bureau, John Conrad of Whiteside county, tells the Record. The community club unifies the community and makes it possible for all to work together on their problems, he says.

The township is divided into school districts and every district has a chairman in Whiteside county. The township club meets every two weeks in the winter at one of the schools. The school teacher is held responsible for a social program put on by local talent. There is a talk and discussion on some problem of the farm.

"This kind of organization has made it possible for us to use the farm bureau and it has made us of use to the farm bureau," says Mr. Conrad.

Leadership

Marrobone township, Moultrie county, has one-fourth of the farm bureau membership in the County. Farm Adviser Allen Higgins was asked the reason for it. Here is what he says: "I believe that local leadership is the biggest factor in successful organization and I believe that the same results can be obtained in almost any township where a few loyal members will give as freely of their time and effort as they did in Marrobone township.

"A successful farmers' elevator at Bethany has been of considerable influence. The men who have been the backbone of the elevator and are responsible for much of its success are largely the men who have been active in supporting the farm bureau and making it a success."

A Church Community

"You ask if we have any community that is stronger in membership than another, and the reason for it," writes Farm Adviser L. R. Marchant of Knox county.

"We have one community with a rural minister as director," Mr. Marchant says. "That community leads in membership. In this particular case every member of this church is a member of the farm bureau."

Hog Vaccination

"We found that the hog vaccination program has added membership to the farm bureau and made old members stronger boosters," writes L. S. Griffith, Farm Adviser of Lee county. "Soil testing by the new method, ordering limestone at a saving in price, and our eight-page publication going out twice a month are other services of special interest to membership."

THE ADAMS COUNTY FARM Bureau Executive Committee recently took action authorizing the offer of $50 reward for the arrest and conviction of a person stealing chickens from a farm bureau member. Preliminary steps are being taken for the organization of local protective units in each township.

A. F. B. F. Steering Committee To Meet For 1924 Program

The A. F. B. F. steering committee, composed of President O. E. Bradfute; Wm. H. Settle, Indiana; Frank App, New Jersey; John K. Orr, Texas; and J. F. Burton, Utah; will meet at the Chicago office December 4 to work out an A. F. B. F. program of work for 1924. It will report to the final general meeting of the 1923 executive committee on December 8.

Many Counties Secure Tax Cuts During 1923 Through Self-Help

While John C. Watson of the I. A. A. Tax Investigation department has been busy in about 50 Illinois counties getting facts and figures to find out if farmers ware paying more than their just share of taxes and presenting these findings in hearings before Boards of Review, many county farm bureaus have, of their own accord, made an investigation of local taxes this year and secured substantial reductions in farm taxes, where justified.

From Macon county comes word that last spring the county farm bureau tax committee recommended a general cut of 25 per cent in farm valuations. Farm Adviser E. H. Walworth states that the Board of Review followed this out for the most part and that land valuations were pretty well equalized throughout the county.

A member of the Board of Review was chairman of the farmers' tax committee in Macon county.

Grundy Gets Reduction

The farm bureau tax committee was on the job in Grundy county and was able to secure a general reduction of 12½ per cent in land valuations. There was no change in town property valuation.

Two members of the farm bureau executive committee were on the Board of Review in that county.

Cut in Jersey

The farm bureau cooperated with the supervisor of assessments and the Board of Review in Jersey county, according to Farm Adviser R. L. Eyman. A blanket cut of 10 per cent in land valuations was made in comparison with 1922.

Much work was done by the farm bureau to get a uniform valuation on properties for all townships in the county. This was the first year that the supervisor of assessments has given out instructions to his assessors, states Mr. Eyman.

Livingston cuts 10 per cent

In Livingston county, Farm Adviser H. O. Allison appeared before the Board of Review and was instrumental in securing a cut in valuations of 10 per cent in farm lands, compared with the 1919 basis. There was no reduction in city property valuations.

In Cumberland

Chas. B. Price, farm adviser in Cumberland county, writes that the president of the farm bureau and other farmers met with assessors last spring and made recommendations.

The result is expressed in a statement which shows that farm lands have been reduced approximately 29.8 per cent in assessed valuations, compared with 1922. There was a very slight reduction in town and city lots.

15 per cent in Coles

The Coles County Farm Bureau recommended a cut in land valuations to the supervisor of assessments. A general reduction of 15 per cent on farm lands with little or no change in city property assessed valuations was secured, states Farm Adviser Melvin Thomas.

In Pike County

The Pike County Farm Bureau was denied the right to appear before the board of assessors by the county treasurer, writes Otis Kercher, farm adviser. However the farm bureau made known its wishes for a reduction in valuations on farm lands before the board through one of the assessors.

A committee of farm bureau members in each township offered its services to local assessors in equalizing valuations. About 50 per cent of the assessors accepted the services of these committees. After these equalizations were made, the I. A. A. checked over the figures from the county and found that town lots and farm lands were assessed on the same basis.

Reduce in Warren

In Warren county, average assessed valuations on land were reduced 15.6 per cent while town and city lots were decreased only 2.9 per cent this year.

Farm Adviser A. A. Olsen, states that the farm bureau does not claim any credit for this reduction but thinks that perhaps the work that the I. A. A. has been doing in other counties did influence the Warren county Board of Review.

Equalize in Gallatin

Farmers in Gallatin county brought pressure to bear upon the Board of Review which resulted in equalization of assessment between townships in the county, states Farm Adviser Simpson.

There was little difference found between the assessed valuations of farm lands and town property, he says.

In Jo Daviess

Two members of the farm bureau executive committee upon the Board of Review in Jo Daviess county have taken care that no unjust discrimination has been made against farm property, writes Farm Adviser Banter. Investigation by the farm bureau has disclosed that valuations are equitable there.

Decrease in Henry

Comparison of land valuation in Henry county with that in surrounding counties helped a great deal in securing reduction in land valuations of 4.6 per cent, according to J. W. Whisenand, farm adviser.

At the same time, city lots were increased very slightly, .03 per cent. Farm animals were decreased in this county; horses, 19.3 per cent; cattle, 6.2 per cent; hogs, 8.8 per cent. Personal property was decreased 12.7 per cent.

White reduces lands

In White county, assessed valuations on lands have been decreased 5.3 per cent for 1923 while town lots have been increased 1.6 per cent, states Farm Adviser Creighton.

In commenting on the reduction, Mr. Creighton says that it cannot be directly attributed to farm bureau work, but that indirectly, the I. A. A. tax work was responsible.

Decrease in Woodford

Last January the Woodford County Farm Bureau appointed a tax committee which gathered facts concerning farm land valuations. This committee and the farm adviser met with the Board of Assessors when it received instructions. The bureau also secured the appointment of a farmer on the Board of Review.

To this activity on the part of the farm bureau is attributed the decrease of 29 per cent in land valuations and the increase of 9 per cent in town and city lots, the comparison being made on the 1922 basis.

In Mason County

Farm Adviser Isaacs writes that in Mason county, the farm bureau had a tax committee which met with the assessors and also with the Board of Review. The result was that a reduction of a little over 10 per cent was made on farm land valuations.

At the same time, town and city lots were increased in valuation. In the city of Havana, the increase was 7.4 per cent.

20 per cent in Henderson

In Henderson county, Farm Adviser Bane reports that the farm bureau executive committee met with the assessors early last spring and secured an agreement whereby the assessed valuation of farm lands would be reduced 20 per cent and the valuation on town and city lots not changed.

A check-up by the I. A. A. late in the summer indicated that this agreement was carried out very effectively. The reduction left the assessment of town property on a basis of 46.3 per cent of its actual sales value and reduced farm lands to 51.5 per cent, which the farm bureau decided was not sufficient difference to make further change this year.

Adams cuts 15 per cent

Adams county farm lands are assessed at 15 per cent below 1919 valuations, due to farm bureau activity. Quincy property was left on the old basis.

In Bond county the bureau was on the job and farm lands were reduced approximately 9 per cent in valuation with no change in town property.

De Witt County

A reduction of from $90 per acre on prairie land to $60 with poorer land in proportion was secured in De Witt county, with no change in town and city assessments.

Both town and city property have been reduced 15 per cent in Effingham county this year.

Reduce in McLean

The average reduction secured in McLean county on land valuation is 9% per cent, compared with 1919, and town and city lots remain unchanged.

In Marshall county, land assessments are 10 per cent lower than those of 1919.

Mercer does well

The Mercer County Farm Bureau was on the job last year to reduce county taxes and secured 17½ per cent decrease in valuations which means a saving of about $80,000 in taxes both last year and this year.

Sangamon county assessors cut land assessments 25 per cent this year and the Board of Review took off 10 per cent more, making 32½ per cent in all. The farm bureau was active in this reduction.

Big Cut in Winnebago

After facts and figures were presented by the Winnebago County Farm Bureau, assessors cut land valuations 40 per cent which was approved by the Board of Review. This is one of the largest cuts secured in the state.

Farm property in Will county was reduced 10 per cent in valuation while values of town and city lots were left standing. The farm bureau had a hand in securing this reduction.

I. A. A. in Williamson

Williamson county was one of those not previously reported in the Record where the I. A. A. helped to get the facts and figures and the farm bureau held a hearing before the Board of Review. The result was a reduction of 18 per cent in farm land valuations and an increase of 3.4 per cent in city property.

In other counties

With some activity on the part of the farm bureau, the assessed valuations of farm lands were decreased by 10 per cent in Peoria county, states Farm Adviser Wise.

The Fulton County Farm Bureau was on the job, and while finding that assessed valuations of farm and city property were practically on a par, it helped to secure considerable adjustment between the different farm lands in taking care of the equalization of property values between the townships.

Ralph E. Arnett, Farm Adviser of Tazewell county, writes that in response to a request from the farm bureau, the Board of Supervisors asked the assessors to make a 10 per cent reduction in farm land valuation. He says, "It is my opinion that there would have been no reduction this year had not the farm bureau been on the job."

Town and city lots were also decreased 10 per cent in Tazewell county.

For Radio Fans!

On November 26, the American Farm Bureau started broadcasting programs from Station WRC, Washington, D. C., with a fifteen-minute talk by Edwy B. Reid, assistant Washington representative of the farm bureau. Programs will be broadcasted from this station regularly each Monday night at 8 o'clock, Washington time, under farm bureau auspices.

As the Record went to press, the only future programs available from the A. F. B. F. for its radio service at KYW, Chicago, at 8:01 Tuesday nights, were as follows: Dec. 4, "The Farm Problem an International Problem," by C. T. Crofton, State Speaker, Illinois Farmers' Institute, followed by Arthur Page, Editor, Orange Judd Farmer, who will have the subject, "The Farmer, Builder;" and on Dec. 11, "News on the Fifth Annual Meeting," by S. L. Strivings, New York, ex-member of the A. F. B. F. Executive Committee.

A. F. B. F. Research

The new corn crop, together with the carry-over of old corn will furnish a bushelage approximately one per cent greater than last year but less in feeding value, according to a recent report of the Department of Research, American Farm Bureau Federation. The quality of the new crop is 79.4 per cent compared with 85 per cent in 1922.

The number of hogs, cattle and sheep to be fed is greater than last year but the present tendency is to use corn more frugally and larger crops of oats, barley, grain sorghums and the use of more low-grade wheat will take care of part of the increase in feeding requirements.

Sell More Corn

Due to the unfavorable feeding ratio between prices of hogs and corn, the present tendency is to curtail hog production and to sell more corn. Furthermore, corn prices may have some stimulating effect on acreage next spring. The outcome is likely to be lower prices for corn and a higher hog market ultimately but it will take some time to bring this readjustment about.

Based on present indications, corn prices until well along in 1924 should remain as high or higher than in the corresponding months of last year. It is not likely, however, that the extremely high prices which prevailed in October this year will be duplicated.

Receipts Small

Receipts of corn at primary markets have been small during the last six months. Reserves at terminal points accumulated during the winter were practically used up by midsummer so that arrivals have commanded good prices. The market has declined to some extent as the new crop reached a better condition for shipment and a further moderate decline may take place during the heavy winter movement.

BROOM CORN MEN "READY TO GO" ON CO-OP MARKETING

New Feature in Agreement; Will Organize Under Five-Year Contract With Pooling

A meeting of broom corn growers at Mattoon on the night of November 21, donated $200 to pay for printing contracts and marketing agreements for their proposed cooperative marketing organization. At a second meeting, November 28, plans for a membership campaign were made.

An unusual feature of the marketing agreement, which outlines in detail how the association shall be organized, is a clause calling for three outside men on the board of directors. The agreement calls for 12 members on the board, one of which is to be nominated by the Bankers' Association of the district, one to be nominated by the Dean of the College of Agriculture and one by the President of the Illinois Agricultural Association.

Represent Public

The primary purpose of these three men on the board, according to the agreement, is to represent the interests of the public. The membership fee will be $10, and the association will market broom corn only and for members of the association only.

Must Sign Half Crop

The agreement stipulates that an acreage equal to one-half of the 1923 crop in the counties of Coles, Cumberland, Douglas, Jasper, Moultrie, Shelby, Clark and Edgar must be signed up by contract before May first. It also provides that legal organization must be made before July 1.

The contract binds growers to sell their broom corn through the association for five years and provides for pooling. Both the agreement and contract have the full approval of the I. A. A.

Adams Co. Wants Live Stock Loan Equal To Grain

In view of the movement on foot for Government appropriations to extend loans to foreign nations for the purchase of grain, the Adams County Farm Bureau has asked that similar consideration be given to live stock products.

TRANSPORTATION DEPARTMENT

Let us know if railroad fences are defective.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 1 | December 20, 1923 | Number 19

GRAIN MEN WANT ACCOUNTING FOR FARM ELEVATORS

Farmers' Grain Dealers Ask Committee To Make Plan of Co-operative Accounting

Meeting at the invitation of the Illinois Agricultural Association, officers of the Farmers' Grain Dealers Association of Illinois and managers of several elevators asked a committee of four to outline a definite accounting and auditing plan for farmers' elevators.

The Committee is composed of President Fred A. Mudge of Peru and Secretary Lawrence Farlow, of the Grain Dealers' Association and President S. H. Thompson and Secretary George A. Fox of the I. A. A. This committee will work with George E. Frazer, consulting accountant of the I. A. A.

Recognize Problems

Recognizing that farmers' marketing organizations have a very definite problem in accounting, bookkeeping and auditing, the I. A. A. made a study of this subject and recently employed Mr. Frazer to advise and assist in the work. Presidents of several successful elevators were asked in to talk over the relation of the problem to their organizations. Later a second meeting with both presidents and managers was called.

It was the opinion of these meetings that standardized accounting and centralized bookkeeping would be an advantage. With each organization doing

(Continued on page 3)

Incorporate New Producers Dairy Co-op at Decatur

Articles of incorporation have been received by the Producers Co-operative Dairy of Decatur, the newest co-operative dairy company started with the help of the I. A. A. Dairy Marketing department. It is capitalized at $75,000.

The Macon County Farm Bureau with E. H. Walworth, farm adviser, was instrumental in starting this organization. Plans are being laid at present for the sale of stock and the purchase of a business location.

Incorporators of the new association are: John A. Record, Guy E. Hockaday, Lewis Bear, James F. Watkins, Guy Heckel, Valentine Cravens, C. E. Weikel, L. V. Wheeler, J. E. Underwood, Howard A. Beverly and H. L. Butt. All except the last two named are members of the Board of Directors.

Three More Added To Budget Committee

Three additional members were elected to the I. A. A. Budget Committee for 1924 at the December meeting of the Executive Committee. They are C. E. Bamborough, W. H. Moody, and Vernon Lessley.

Other members of the committee, chosen in November, are President S. H. Thompson, Secretary Geo. A. Fox, Chas. Finley, A. O. Eckert, and Henry McGough.

"Eradicate T. B." Aim of County Farm Bureaus

Logan, Ogle, and Marshall-Putnam counties have recently hired veterinarians to start area testing for bovine tuberculosis, according to reports coming to M. H. Petersen, in charge of tuberculosis eradication for the I. A. A. Adams county has secured an appropriation to hire a county veterinarian.

Educational campaigns toward securing county appropriations have been started by the Washington, Henry, Carroll, and DeKalb county farm bureaus, states Mr. Petersen.

Grain Committee Making Study of Marketing Plans

Pending a thorough understanding and working agreement between the National Wheat Growers Advisory Committee and the U. S. Grain Growers, the I. A. A. grain marketing committee recommended to the executive committee at the December 5 meeting, that action or endorsement be deferred.

The grain committee considered the recent report of the U. S. Grain Growers announcing that the organization is ready to sell grain, and it met with representatives of the National Wheat Committee, who offered a plan for starting an Illinois wheat growers' organization and working relation with the Grain Growers.

The grain committee asked that it be given more time to study the plan submitted. In its report the committee stated that the I. A. A. should do everything within its power to aid co-operative marketing and to encourage co-operation between farmers' organizations engaged in co-operative marketing. In making the report, Chairman H. E. Goembel stated that the committee is just as anxious as all others to see a plan started, but he thought it best to have a thorough understanding first.

HE IS GOING TO SOLVE IT

(This cartoon first appeared in 1921. It is reproduced by request.)

"Give Us Equal Values," Forty Co. Bureaus Ask

"We ask you to place valuations of all classes of property on the same basis in the counties where the facts prove that farm land valuations are high, and we ask you to treat all classes of property alike in raising or lowering valuations in the counties where valuations are now on an equal basis," John C. Watson of the I. A. A., told the State Tax Commission at a hearing in Springfield, December 6.

One hundred representatives from 40 county farm bureaus were there to present the facts in their counties. The hearing was on the question of state taxes. The final figures of county boards of review are taken by the Commission as a basis for state taxes. It is the duty of the Commission to equalize for state tax purposes, to see that valuations of all classes of property are on the same basis.

City Values Same

Mr. Watson was first on deck. He told the Commission that the figures from 99 county boards of review showed that the average valuation of city real estate is somewhat lower this year than last. "We know that there has been a big increase in building, yet we find no real increase in this class of property," Mr. Watson said.

Lands Reduced 10.6

"The figures from the same 99 counties, not including Cook, Lake and LaSalle, show that farm land valuations were reduced 10.6 per cent under the valuations of 1922," Mr. Watson told the Commission. "This reduction is about half as much as it should be to be on the same basis as city real estate. Our investigation shows that farm land valuations average 45 per cent of their real values and that city real estate is valued at less than 40 per cent of their real values. It will take another reduction of ten per cent to equalize farm lands for state tax purposes."

Counties Testified

In support of this argument representatives of 10 counties told how they had carried on investigations to get the facts on valuations of different classes of property, and they presented evidence showing that farm lands are valued higher than city real estate.

(Continued on page 3)

STATE TAX BODY PRESS STATEMENT IS NOT CORRECT

Commission Figures Reduction Made in 1922 Twice; Failed To Equalize

According to a press statement made by the State Tax Commission, the Commission has approved the valuations made by county boards of review in 99 counties of the state for state tax purposes. The counties not included are Cook, LaSalle and Lake.

In the statement the Commission says, "There was a decrease of $105,894,378, or 10.6 per cent under the valuations of 1922." It further states that "the total reductions of land valuations in the state for state tax purposes by the Commission in the years 1921 and 1922 amounted to $126,235,708; adding this to the reductions made by the boards of review in 99 counties this year, we have a total reduction of land values in three years, under 1920, for state tax purposes of $288,130,086.

Is Not True

The figure $288,130,086 is an error, says John C. Watson of the I. A. A. The reduction of $68,922,086 made in valuation of land in 1922 is included twice in the total figure, Mr. Watson states. It is first included in the reduction made by the State Commission in 1922 and again in the county valuations of land for assessment purposes this year.

The total reduction for state tax purposes is about $220,000,000 as compared with 1920, rather than $288,130,086, Mr. Watson states.

Refused in 7 Counties

The Commission's acceptance of the valuations of land placed by county boards of review for state tax purposes means that it has refused to equalize valuations in the seven counties discussed at the Sept. 6 hearing for either county or state taxes.

A complete statement of the results of the tax work will be made in the next issue of the Record by Mr. Watson.

ASKS FOR HEARING

The I. A. A. Transportation department has asked for a hearing before the Illinois Freight Association for the purpose of securing the co-operation of the railroads in the observance of the strictest sanitary precautions in loading pens, cars, etc., to aid in the tuberculosis eradication campaign.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by News Publicity Department, M. L. Bill, Director.

Entry as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of ten cents for subscription to the Illinois Agricultural Association Record.

A. F. B. F. PROGRAM

Following is a digest of the chief resolutions passed by the voting directors at the fifth annual meeting of the American Farm Bureau Federation, signifying the trend of thought for the program of work next year:

Organization Work.

We urge throughout the coming year that organization be made a major activity of the A. F. B. F.

National Taxation.

We re-affirm the three principles adopted last year as the basis of our tax work. These principles were stated as follows:

The measure of ability to pay taxes for the support of the national government is net income.

The tax should be progressive; that is, the greater the income the higher the rate.

Insofar as it is practicable, taxes should be so laid as to tend to the equitable distribution of wealth.

We re-affirm our objection to a General Sales Tax.

We recommend that the issuing of all tax-free securities be stopped.

We recommend that all deductions allowed in figuring income taxes first be set-off against tax-free income.

We urge that steps be taken to stop the leaks in the 1921 tax law, including an amendment whereby profits derived from the sale of stock, received as stock dividends, shall be taxable at the regular surtax rates.

We urge upon the President and Secretary of the Treasury the necessity of speeding up income and profits tax adjustments and of securing a more efficient Income Tax Bureau to the end that these forms of taxation be not brought into disrepute by poor administration.

We oppose any reduction of income taxes. We believe that the excess of national income over expenditures should be applied towards reducing national indebtedness.

We recommend that federal statute number 5219 be so amended so all states can tax national banks as other business and farmers in the locality are taxed.

Price Fixing.

We believe government price fixing for agricultural commodities to be unsound and that it has heretofore failed to serve the purpose for which it was intended.

Truth in Fabric.

We reaffirm our stand in favor of the truth-in-fabric bill which merely calls for common honesty in the labeling of woolen goods.

Foreign Marketing.

We commend the Department of Agriculture and the Department of Commerce for the work they are doing in the foreign marketing field and urge that it be continued.

Transportation.

We urge upon Congress the great importance of establishing a co-ordinated policy of transportation involving farm-to-market roads, the railroads, the construction of the Great Lakes-St. Lawrence and Lakes to Gulf Waterways, and an American Merchant Marine so that the products of the farm may be moved to the consumer rapidly, cheaply, and efficiently.

All facts incident to costs and division of costs should be investigated by Congress. Not only should it look into the basis upon which the Interstate Commerce Commission has arrived at the valuation of railroads, but it should determine carefully what revenue the railroads require in order to obtain a fair return on a fair investment valuation. It should indicate the proper distribution of this revenue as between passenger and freight and as between different kinds of freight. It should go into the situation thoroughly as regards possible consolidation and indicate a policy for further governmental dealing with the railroads.

Further immediate action should be taken by the Interstate Commerce Commission to reduce freight rates on agricultural products which are sold at low prices.

Standerdization and Grading.

We favor the further study and development of grades of agricultural commodities, the improvement of present grades, and promulgation of laws, rules and regulations as rapidly as feasible.

Immigration.

We favor a limitation of the number of immigrants permitted to enter this country to approximately the present total.

We recommend that all immigrants be selected after physical, mental and other tests, in the land of their nativity by representatives of our Government and that the Congress take proper steps to put such plan into operation.

Intermediate Credits.

We urge an amendment to the intermediate credit act changing the minimum loan period from six to four months.

Federal Reserve Rate.

We favor an amendment to the eligibility clause of the federal reserve act to limit all rediscounts including commission and brokerage, to 2 per cent above the base federal reserve rate.

Tuberculosis Eradication.

The present excellent progress in the eradication of bovine tuberculosis should be continued and accelerated.

Merchant Marine.

We favor a well balanced and properly equipped merchant marine for carrying our goods by the most direct route to the principal distributing ports of the world. We are opposed to subsidies or other gratuities.

Tariff.

We believe that the making of tariff schedules is of such great importance that the United States no longer can afford to permit it to be subjected to political determination. We urge a vigorous, continuous study by the Tariff Commission with authority to change schedules as changing conditions warrant.

Flood Control Bill.

We urge Congress to appropriate annually the full amount authorized under the Flood Control Act for levee construction and channel improvement along the Mississippi River and its tributaries.

Licensing of Commission Men.

We recommend the adoption of a plan for the licensing of all commercial dealers and shippers engaged in interstate shipments of agricultural products, by the U. S. Department of Agriculture.

Purnell Bill.

We favor the Purnell Bill calling for additional appropriations for agricultural research in the State Experiment Stations under a stipulation that the additional funds be designated for research in marketing, finance, and betterment of conditions of rural life.

Truth in Seeds.

We favor the enactment of a federal truth-in-seeds law to the ends that purchasers may be protected against adulteration and false labeling.

Muscle Shoals.

We reaffirm our advocacy of the Henry Ford offer relating to water power, steam power and nitrate plants at Muscle Shoals and urge Congress to give us a vote upon this matter without further delay.

Grain Futures Act.

We confirm our endorsement of the grain futures act and packers and stockyards control act.

Marketing.

We reaffirm our endorsement of co-operative marketing as offering the most practical means of stabilizing agriculture on a profitable basis and urge universities, colleges, public schools and high schools to establish regular courses in co-operative marketing based upon successful experience.

Livestock Producers.

We endorse the work of the National Live Stock Producers and recommend a closer co-operation with the farm bureau.

State and County Recommendations.

We earnestly urge that every county and state farm bureau adopt such methods as are necessary to bring about a full transmission of membership dues regularly every month.

We suggest that states still relying upon the General Property Tax undertake a careful study of State and local tax methods. A tax committee should be formed in each state federation for the study of state taxation, and in each county farm bureau for the study of local tax problems.

We recommend that state farm bureau officials in co-operation with the counties, actively participate in the promotion of a comprehensive program of vocational education in agriculture adapted to the needs of rural communities with proper committees in each county which shall co-operate with teachers of vocational agriculture.

We recommend a full development of the home and community program and urge that the county, state and national organizations place women on their governing boards so that the whole program, social, economic, legislative and marketing may be worked out by men and women together.

We believe that a liberal interpretation should be placed upon the powers of the county agents, home demonstration agents and boys and girls club agents in lending assistance to farmers in the building and maintaining of co-operative and general farmers' organizations.

Super Power.

Super power, hydro-electric development and the storage and utilization of water for electrical purposes should be synonymous terms in America. The cost factor as regards power must be decreased, and the price of hydro-electricity must be such as will permit and encourage its use for agricultural purposes.

Waterpower resources should be developed so as to provide cheap power for all, when used for production purposes, in large or small amounts.

Foreign Relations.

We urge the immediate adoption by the American government of a vigorous foreign policy designed to carry out America's obligations resulting from her war aims and the terms of the armistice.

500 At Fifth Meeting of American Farm Bureau

O. E. Bradfute of Xenia, Ohio, was unanimously re-elected President of the American Farm Bureau Federation at the fifth annual meeting in Chicago, December 10, 11 and 12. J. F. Reed of Minnesota was elected Vice-President. President S. H. Thompson of the Illinois Agricultural Association was elected a member of the executive committee from the central section. Nine new members were elected to the executive committee of twelve.

O. E. Bradfute
Re-elected

About 500 people were present at the meeting. Thirty-four states were given voting privilege, based on the paid up membership. Illinois and Iowa stood highest in number of voting directors, each having five. Ohio was entitled to four voting directors and all other states had three or less.

Illinois Active

On two different occasions Illinois took part in the national convention. On Tuesday afternoon John C. Watson of the I.A.A. addressed the meeting on the subject of taxation as a farm bureau project. On Wednesday evening voting directors of Illinois made a plea for passing a resolution endorsing the National Wheat Growers' Advisory Committee of which Frank O. Lowden is chairman.

The resolution also endorsed the work of the A. F. B. F. co-operative marketing department in the formation of the National Wheat Committee and instructed the marketing department to work in close harmony with the wheat committee. The resolution was reported to the convention without recommendation.

Thompson For Action

Walton Peteet talked in favor of the resolution. S. H. Thompson made a motion that the resolution be adopted. In talking for the resolution Mr. Thompson said that mid-west farm bureaus and American Farm Bureau had been working on the grain marketing problem for three years. He said that the resolution adopted by the mid-west committee and approved by President Bradfnte had been accepted as the grain marketing policy, for the A. F. B. F.

S. H. Thompson
On Committee

The mid-west resolution called for a national grain marketing plan, based on state organizations with contracts and pooling. Pending the organization of the national plan, the resolution committee approved the selling plan submitted by the U. S. Grain Growers, Inc., the same to be merged into or supplanted by the national plan when it was ready to begin operation.

Must Go Forward

"Our people expect us to go forward on the problem of grain marketing," Mr. Thompson said. "We cannot continually pass up this important question."

Secretary George A. Fox of the I. A. A. stated that he wished those who objected to the resolution would take the responsibility of offering a substitute resolution that would settle the question of grain marketing.

The resolution was referred to the new executive committee with power to act. Immediately after this action, Mr. Peteet resigned as marketing director.

New Board

The executive committee is made up of three representatives from each of the four sections, west, south, east and central sections. Following are the members of the new executive committee by sections:

Western Section
A. C. Hardison.....California
Frank Evans.....Utah
C. E. Gibson.....Colorado

Southern Section
E. P. Cohill.....Maryland
E. O. O'Neill.....Alabama
W. D. Ferris.....Texas

Eastern Section
G. M. Putnam...New Hampshire
F. M. Smith.....New York
S. M. Buckingham..Connecticut

Central Section
C. E. Hurst.....Iowa
S. H. Thompson.....Illinois
Ralph Snyder.....Kansas

O'Neill, Putnam and Smith are the only members of the committee re-elected.

Secretary Asked to Quit

At the December 8 meeting of the A. F. B. F. executive committee, Secretary John Coverdale was asked to resign.

The new executive committee meeting on December 13 had not employed a secretary up to the time of the Record going to press.

Speaker Points Out Economies of Deep Waterway

"It costs 25 cents per hundred pounds to ship grain by rail from St. Louis to Baltimore, 18 cents per hundred to ship from St. Louis to New Orleans by rail, and 11½ cents from St. Louis to New Orleans by water."

This statement was made by Theodore Brent of the Mississippi and Warrior Service, a government agency. He was speaking at a luncheon for those interested in the Chicago to the Gulf waterway project, at the A. F. B. F. annual meeting. It was attended by several I. A. A. leaders and Geo. A. Fox presided at the meeting.

Producers Make $84,000 Profit First 11 Months

Joe Fulkerson, former executive committee member of the I. A. A. and now director of the East St. Louis Producers' Commission Company, tells the Record that the earnings of the agency up to December first of this year is about $84,000, twice as much as the full year of 1922. "Be sure to tell your readers that this earning will not mean a larger dividend than last year," Mr. Fulkerson said, "because business of the company is nearly double the last year."

This earning is in the face of the fact that the Producers' commission charge was 20 per cent lower than other firms on the market, during the last two months.

COUNTIES ASK FOR EQUALIZED VALUES

(Continued from page 1)

Following are listed the counties where wide inequalities of valuations between classes of property exist. The figure opposite each county is the per cent of reduction necessary to place farm land valuations on the same basis with city and town lots. These reductions are necessary on the present valuations of farm lands within the county.

County	Reduction Necessary
Cass	15% to 20%
Clay	10%
Champaign	10%
DuPage	10%
Kane	20%
Madison	33%
Marion	30%
Montgomery	25%
Peoria	18%
Vermilion	20%

The Cass county reduction is on farming land only. Land belonging to duck hunting clubs is valued even lower than city and town lots.

Many other counties testified that farm land valuations now on an equal basis with city property, or close to it, and they asked that all classes of property be treated the same if the State Commission raised or lowered the values set by county boards of review, for state tax purposes.

In 54 counties there has been no change in valuations of city property for 21 years, Mr. Watson told the Commission. "For six years you have not touched the values of city property. We maintain that it is not fair where all classes of property are assessed on the same basis to equalize one class of property without equalizing all."

Railroads Low

A valuation of only 23 per cent is made on the 1500 miles of railroads on the lines of the Nickel Plate, Lake Erie and Western, and Toledo, St. Louis and Western in Illinois, Mr. Watson said, based on the appraised value placed on these roads by engineers employed by the Guarantee Trust Company of New York for the purpose of issuing securities on the properties.

In answer to this argument, Oscar Carlstrom, acting chairman of the Commission, said that it was his belief that some allowance must be made when railroads are in a bad financial condition or are on the verge of bankruptcy. He said that if railroads had to discontinue business it would mean a loss to every community through which the road runs.

"What are you going to do about the valuations on these farms where their owners are going bankrupt?" asked Mr. Watson. Mr. Carlstrom said that he did not know.

Counties Represented

The counties represented at the hearing were Monroe, Livingston, Tazewell, Macoupin, Franklin, Adams, Kendall, Coles, Mason, Woodford, Morgan, Henry, Clay, Winnebago, Pike, Marshall, Stark, Rock Island, Johnson, LaSalle, Putnam, Gallatin, Effingham, Brown, Randolph, McDonough, Moultrie, DeWitt, Will, Sangamon, Kane, DuPage, Vermilion, Cass, Montgomery, Madison, Peoria, St. Clair, Champaign and Christian.

J. R. Bent, director of the Phosphate-Limestone department, has called a state-wide meeting at the Chicago office, Jan. 9 and 10, to discuss the agricultural limestone situation and problems.

U.S. Grain Growers Handling Grain On The Chicago Market

The U. S. Grain Growers, Inc., announced on November 28 that it was ready to handle grain on the Chicago market. Since that date several cars of grain have been consigned to the concern. Officials of the organization report that the grain which has come in has been unsolicited, no active work having been done to date to secure shipments.

The co-operative has filed an application for membership on the Chicago Board of Trade, which had not been acted upon as the Record went to press. With the application, a surety bond of $50,000 was filed, guaranteeing integrity of its contracts made on the Board. A one million dollar line of credit has been contracted for by the U. S. Grain Growers, Inc.

GRAIN MEN WANT ACCOUNTING SYSTEM

(Continued from page 1)

business its own way, an advantage was seen in comparing costs. There was need for strengthening the weaker elevators.

This body was convinced that a worthwhile plan could be worked out. However, it wanted to get the support and co-operation of the Farmers Grain Dealers' Association.

Committees

The original committee of presidents and managers of elevators is composed of Homer W. Bell, Manager of the Watseka Farmers' Elevator Company; G. E. Mellen, Manager of the Mason Farmers' Elevator Company; D. J. Holterman, President of the Sadorus Co-operative Elevator Company; and L. A. Null, President of the Blandinsville Farmers' Elevator Company.

This group asked in the following representatives of the Grain Dealers' Association to consider the project: President Fred A. Mudge of Peru; Secretary Lawrence Farlow of Bloomington; Director Herman Danforth of Washington; H. M. Wood of Delavan and Fred Stout of Ashkum, President of the Managers' Association.

Homer Bell Says Accounting Will Give Protection

Homer W. Bell, Manager of Watseka Farmers' Grain Company, is of the opinion that something along the line of a uniform system of accounting and auditing as recommended by the Illinois Farmers' Grain Dealers Association and the I. A. A., for co-operative elevators is absolutely necessary to the permanent success of the movement.

"It should give the same means of protection to the investors in stock of these companies and their patrons that the state bank examination gives to banks," writes Mr. Bell. "The very fact that elevators belong to this branch of the association and have an audit at least four times a year and supervision at all times, should give them financial standing in their communities equal to that of state or national banks.

"No co-operative elevator in the state can afford to be without this service. The cost of this service should be slightly more than that of a prolonged audit at the end of the fiscal year."

WALLACE FAVORS BOARD OF TRADE AND PACKER LAWS

If Their Claims of Efficiency Are True, Official Confirmation Will Help, Not Hinder

Henry Wallace, Secretary of Agriculture, had many good things to say about the packer and stockyards act and the futures trading act, designed to regulate the big packer and the board of trade, at the fifth annual meeting of the A. F. B. F.

"Producers and consumers should have the opportunity to know about these agencies," said Mr. Wallace. "Nobody knew the amount of future trading going on. The Capper-Tincher act is giving us the answer and in a few years we will know if that is a fair way to determine grain prices.

"The packer stockyards act forbids unfair practices, unfair to producer and consumer. Among other things it requires packers and others to keep their books and records in such a way as to fully and correctly disclose all transactions. The packers seem to think it is none of our business how their books are kept. Now they propose to appeal to the courts to keep us from knowing the truth. What is there they do not want us to know? If what they have claimed in the past as to their efficiency of their methods, and the reasonableness of their costs and profits is true, then official confirmation would help them, not hurt.

"Congress has deemed the packing business vested with public interest and subject to supervision as such. The packers' books are no more sacred than the books of banks which are examined in the most thorough way."

The farm bureau worked hard for these two regulation laws.

Central Illinois Bureaus Organizing For Baseball

At a wild duck supper given at Virginia by the Cass County Farm Bureau baseball team, November 27, steps were taken toward the formation of a county farm bureau baseball league in central Illinois. Representatives from Morgan, Sangamon, and Macoupin counties were present and indicated their support while farm advisers of Mason, Menard, and Logan counties have given approval.

A committee was appointed to make plans for organization and eligibility rules and as soon as various counties have organized teams and selected managers, a meeting will be called to make a schedule of games for next summer.

This committee is composed of Geo. R. Cline, Virginia; E. W. Rusk, Macoupin county adviser; E. L. Corbin, I. A. A. executive committeeman from Macoupin county; I. A. Madden, Sangamon county adviser; and J. H. Checkley, Logan county adviser.

Interest in farm bureau baseball teams was started when games were played in connection with the farm bureau picnics of Menard and Cass counties in 1920 and 1921, according to Farm Adviser Dickenson, Cass county.

During the summers of 1922 and 1923, Cass county farmers had a team which played other teams in the vicinity,

ST. LOUIS MILK CO-OP TO REOPEN PLANT, JANUARY 1

Will Receive Cream and Make Butter; Lynch Aids In Re-establishment

The plant of the Illinois-Missouri Cooperative Milk Marketing Company at E. St. Louis will resume cream shipments and begin to manufacture butter on January 1, 1924, according to an announcement of the Farm Bureau Advisory Committee appointed by President O. E. Bradfute of the A. F. B. F. last spring to assist the dairymen in freeing themselves from bankruptcy.

A. E. Richardson, secretary of the committee, has been vigorously carrying out the liquidation program since the company has been out of court and states that enough funds have been collected from outstanding accounts and sale of property to make available immediate cash payments for cream claims, to reduce substantially the indebtedness to the I. A. A., and to have left a working fund sufficiently large to handle daily cream receipts and to pay spot cash for all such shipments.

Lynch Gives Help

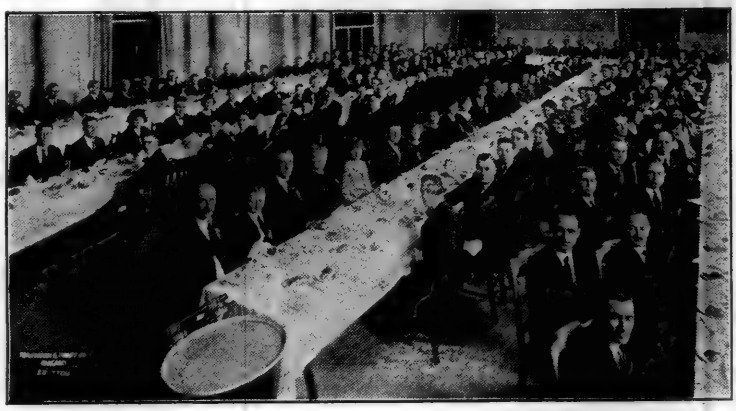
A. D. Lynch, director of Dairy Marketing for the I. A. A., has spent some time recently at the plant making suggestions pertinent to the operation of the plant as a butter factory. He reports that the plant is back in good shape for that purpose.

"As high a quality of butter as possible will be made under a brand name," states Mr. Lynch. "Distribution is contemplated, as in the past, among retailers in St. Louis, E. St. Louis, and surrounding towns. Prior to closing about a year ago the plant was turning out about 1,000 lbs. of butter daily and had a ready market for it."

Has Good Name

The company has already established a reputation among cream shippers for square and honest dealing, Mr. Lynch says. It is generally believed that many of the former shippers will return, once they are assured of the company's readiness to resume handling their business.

"A large cream business means not only a better market for cream shippers but in due time, with good management, should assure earnings to apply on the funded indebtedness of the marketing company," declares Mr. Lynch.



A meeting of dairymen of the district to explain the reopening plans was held December 18.

Macoupin Claims Largest Annual Meet Attendance

"You should have been down to the Macoupin county annual meeting," said E. L. Corbin of that county and member of the I. A. A. executive committee. "Over 1,200 people were present and we had a fine time. We claim that's the record for any county bureau annual meeting in the United States."

Macoupin county has 1178 farm bureau members. There are 26 organized communities. "These community organizations are responsible for much of the interest in the farm bureau," Mr. Corbin declared. "You're not in the swim at all if you don't belong to the bureau in Macoupin county."

WHEN ILLINOIS CLUB WINNERS WERE ENTERTAINED

I. A. A. Banquet Best Event Of Week, Say Club Winners

"Say, is this the fourth or fifth banquet we've been to since we've been in Chicago?" said a club boy from Ford county to another from Marshall county just before the I. A. A. banqueted the youngsters at the Lexington hotel, Chicago, on Wednesday evening, Dec. 5.

"Gosh! I can't remember. We've been on the go so much that I haven't tried to keep track of all the banquets we've eaten or all the sights we've seen up here at the International," replied the Marshall county boy.

Anyway, they were all there, the 150 Illinois boys' and girls' club champions and their leaders, the I. A. A. Executive Committee, and the entire I. A. A. office force. All were determined to have the best possible time at this get-together of the present and future leaders of organized agriculture in Illinois.

Everybody Sings

The banquet was served and between courses E. I. Pilchard, club work specialist from the U. of I., led in community singing. "Smiles," "There's a Long, Long Trail," "I'll Liza Jane," and lots of other familiar tunes were sung with farm bureau and club work variations.

"I'm mighty proud to speak in behalf of the Illinois Agricultural Association in welcoming the boys and girls who are champions in the club work in Illinois," said President Sam Thompson of the I. A. A., who presided as toastmaster. "The association is interested in you and we want you to know that we're back of you in the splendid piece of work that you are doing."

Introduces I. A. A. Family

President Thompson introduced Secretary Geo. A. Fox, who spoke a few words before introducing the entire I. A. A. family of "bosses" and employes.

"You've probably heard about many of the members of our family before," said Mr. Fox, "and now I want you to get personally acquainted with them."

Several of the club winners were introduced by President Thompson. Arthur Manock, Peoria county, who is 1923 state champion in pig club work, made the first talk. Arthur lives with his aunt on a Peoria county farm and takes an active part in the farm operations. He is president of his local pig club. His winnings this year included first on Chester White litter and second on gilts in the club class at the Illinois State Fair and first, second, and third on boar, first on gilt, and first on litter at the National Swine Show in the club classes.

Club Work Valuable

"Pig club work is certainly interesting as well as educational," Arthur said. "Last spring I became a little discouraged and didn't go into the work at first. However I finally joined the club again and helped increase its membership. I certainly wish I had started when I was younger. Next year I will be too old to join the pig club, but I am going to encourage every boy and girl that I can to get into club work."

Donald Williams of the national champion dairy judging team from Whiteside county spoke. "We sure felt our responsibility at the National Dairy Show in representing the boys' and girls' clubs of all Illinois, and we determined to do our best, not for selfish reasons, but for those whom we represented," he said, "and when we get to the judging contest in England next spring we are going to do our best for Illinois."

Winning Whiteside Team

Donald introduced the other members of his team, Harold Gaulrapp and Elwyn Folkers, and also the coach, Farm Adviser "Dad" Wise. "It's an honor to stand up with such boys as these," said "Dad."

Other club champions spoke. There was Dorothy Basting, McLean county, state champion in girls' work, Geneva Smith, Woodford county, member of the winning agricultural demonstration team, and Helen Wade, member of the Rock Island county home economics demonstration team.

"We certainly appreciate this entertainment by the I. A. A.," said Helen Wade. "When we go home, we boys and girls are going to interest other boys and girls in club work and soon we will have a much greater army of coming leaders for the farms of Illinois."

Six Thousand Enrolled

Mr. Pilchard, club work specialist from the university, spoke. "Six thousand Illinois boys and girls have been enrolled in junior club work this year," he declared.

IT was a happy event when 150 boys' and girls' club winners and their leaders were entertained at a banquet by the I. A. A. executive committee and entire office force on Wednesday night, Dec. 5, during the International Live Stock Exposition. Everyone enjoyed it.

"Next year we are going to work for an enrollment of 10,000."

"Not many years hence these young folks who are here tonight will be the leaders in the I. A. A. and county farm bureaus," stated John W. Coverdale, secretary of the American Farm Bureau. "In the place of these men who are sitting around this table tonight will be these boys—trained for a better agriculture through club work."

"Finish Well"

H. W. Mumford, Dean of Agriculture at the university, was a speaker. "Finish well," he said. "After you have completed your club work, enroll at the university of Illinois to further fit yourself as leaders in agriculture."

Howard Leonard, former president of the I. A. A., and D. O. Thompson, former secretary, also spoke words of greetings to the club folks. Then the tables were cleared away and lively games were entered into under the leadership of Nina B. Lamkin, well-known as the director of the Farm Bureau Decennial Pageant at DeKalb last summer.

"The kids voted the I. A. A. entertainment the best of the entire week's program," declared Mr. Pilchard the next day. "They're strong for the I. A. A. Watch for us next year."

Farmers Week at the University of Illinois is scheduled for January 19-26, and an open rate of fare and one-half has been granted by the railroads from Illinois points.

VIGOROUS ACTION AGAINST T. B. IS VOTED BY I. A. A.

Farm Bureau Will Co-operate With All Agencies in Fight; Ask Budget of $7,000

Action was taken at the December 5 meeting of the Executive Committee authorizing that the I. A. A. assist in every way possible to make the campaign for the eradication of tuberculosis more effective and to do everything in its power to aid both federal and state authorities in enforcing the law.

A recommendation was made to the budget committee that the sum of $7,000 be provided for the work. It will be handled jointly by the I. A. A. Live Stock and Dairy Marketing departments. M. H. Petersen, who was employed temporarily to start the work, will continue in charge of it.

Endorse I. A. A. Action

Since the I. A. A. took over the work a few weeks ago, a large number of counties have asked that the association continue its activities.

Iroquois, DeKalb, DuPage, McHenry, Rock Island, Will, Jo Daviess, Crawford, Boone, Kendall and Whiteside counties have matched the $100 reward offer of the I. A. A. for the first arrest and conviction of T. B. cattle bootleggers within the counties.

The association has helped to organize vigilance committees in nine counties and 14 more have stated that they desire help in forming such organizations.

Much Interest

Two counties not now doing tuberculin testing have asked for help in planning a campaign to secure an appropriation to help them carry on the work. Several counties desire help for an educational campaign with a view of obtaining an appropriation from their board of supervisors during the coming winter.

Program

In its program for the eradication of bovine tuberculosis, the I. A. A. will carry on an educational campaign to give the facts regarding the T. B. situation and will coordinate the efforts of all counties in uniform methods of attack.

It plans to co-operate with state and federal authorities, medical associations, chambers of commerce, women's clubs, bankers' associations, milk dealers, railroads and other forces which can help to bring about tuberculosis-free herds in Illinois.

The Macon County Farm Bureau has opened a public market in the farm bureau building in Decatur.

TRANSPORTATION DEPARTMENT

Farming and Transportation Are Mutual Interests

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 2 | January 5, 1924 | Number 1

ALL ABOARD FOR ANNUAL MEETING JAN. 16 AND 17

Election of Officers and Banquet First Night—Complete Program

All aboard for the ninth annual meeting of the Illinois Agricultural Association! This year it will be at Galesburg, January 16 and 17. Another year has rolled around and it is time to get together to discuss problems and elect officers.

The large part of the first morning will be spent in reports of the Secretary, Treasurer and the President's Address. The program calls for the appointment of committees at that time.

James C. Stone

Co-op Marketing

Co-operative marketing will take up practically all of the first afternoon, O. B. Goble of Charleston, Director of the Indianapolis Producers will talk on livestock marketing. Two angles of the financial control of co-operative associations will be discussed, one by George Wicker of the Minnesota State Department of Agriculture and one by George E. Frazer, Consulting Accountant to the I. A. A. On the same program, James C. Stone, President and Manager of the Burley Tobacco Growers Co-operative Association of Kentucky will talk about the managerial control of co-operatives.

Nominations

At the close of the afternoon sessions, voting delegates from the districts will caucus to nominate members of the executive committee. The election will be held at the end of the evening program.

George E. Frazer

Banquet

At 6:30 P. M. the whole meeting will banquet together followed by addresses from Dr. Tilden, President of Lombard College, John Camlin, President of the Illinois Chamber of Commerce and James C. Stone. Election of officers will conclude the evening program.

Second Day

Richard T. Ely, Professor of Economics, University of Wisconsin, outstanding authority on farm land taxes will speak at nine o'clock. Congressman C. A. Newton of Missouri will follow on the subject of transportation. A round table discussion will be conducted after each address.

Community Centers

Benjamin H. Darrow, Secretary of the County Y. M. C. A. at Revenna, Ohio, will talk on the organization of community centers at 1:30 P. M. Reports of the committees on resolution and constitution and by-laws will follow. The remainder of the afternoon will be devoted to round table discussion.

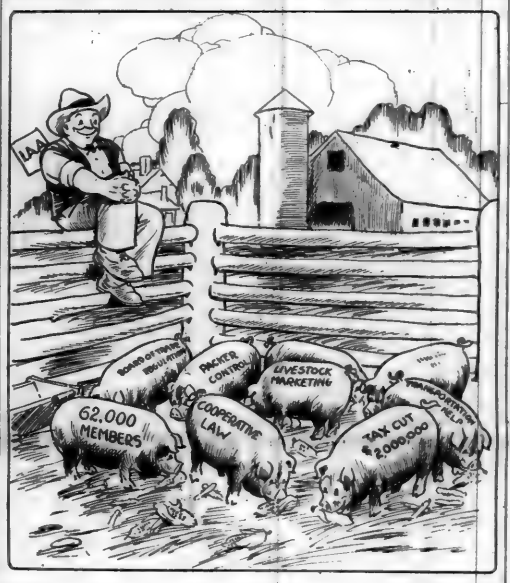
This Edition

With this issue the Record is summarizing the work of the I. A. A. for the past year, relating some of the more important accomplishments of each department of work as secured from the annual reports of each director. The only report omitted is the 1923 financial statement, which will appear in full in the January 20 issue.

He Got Results When the I. A. A. Got After 'em

R. E. Fildes, Farm Bureau member of Wayne County, sent a check to a poultry farm for four cockerels in September, asking for prompt delivery. By November 26 he had no cockerels and no reply to three letters which he had written to the poultryman. So he wrote to the I. A. A. to take up the matter to see if action could be secured.

Here's what Mr. Fildes wrote to the I. A. A. in December: "Will say that I received my cockerels within about four days after I got your first letter informing me that you had taken the matter up with the poultry farm. This proves to me that the I. A. A. can get results after individuals fail. I thank you for your services."



New Directors of Chicago Producers Will Be Elected

The election of three directors will be among several important considerations at the first annual meeting of the Chicago Producers Commission Association at Chicago, January 8.

Directors will be chosen to succeed W. B. Elliott, Williamsfield, Ill., and Frank Coyne, Montrose, Ia., whose one-year term of office expires at this time, and the third member will fill the vacancy made by J. W. Crabb, Delavan, Ill.

Each member is entitled to one vote at the meeting.

ANOTHER ILLINOIS TON LITTER

Stewart Reports Growth in Shipping Associations

The livestock shipping association movement has continued to spread, says C. A. Stewart, Director of Live Stock Marketing for the I. A. A., in his annual report.

C. A. Stewart

Judging from reports from one-fourth of the shipping associations, Mr. Stewart estimates that 20,000 carloads of livestock, valued at $25,000,000, have been shipped to terminal markets. All but ten counties of the State are served by shipping associations.

Some Failures

Yes, there have been some failures, but not many. Not more than 50 associations can be classed as inactive or defunct, Mr. Stewart reports. The outstanding reason, he says, is that some organizations were organized before there was real need or demand for them by the livestock producers of the community. Poor management and lack of business methods contributed to the downfall of some and the fact that others accorded their managers the privilege of buying livestock caused the reorganization of several.

I. A. A. Help

The department has attended meetings in 38 counties, assisting shipping associations. It has helped with the incorporation of 38 associations. Four shipping association schools were held in different sections of the State in co-operation with the Extension Department of the University.

A number of associations adopted the accounting system recommended by the department and others have patterned after it. The membership agreement drafted by the department has been placed into effect by three associations and two county organizations have adopted it as part of their constitution.

Farm Bureau Relation

Sixteen local and three county shipping associations have amended their constitutions to accord recognition to farm bureau members and there is increased interest in this form of organization in other sections of the state, Mr. Stewart says.

Three counties are now being organized on the county basis and there is a growing tendency on the part of local associations in a number of counties to form county federations.

WHAT'S COMING IN NEXT FIVE YEARS FOR FARM BUREAU?

Secretary Fox: "Organized Agriculture Will Be Established"

The next five years of farm bureau work should build much more rapidly and more substantially than the past five years during which time leaders were pioneering their way to practical lines of work, states Secretary George A. Fox in reviewing the past and looking into the future.

"The I. A. A. begins 1924 with confidence and assurance. The past year practically closes a two-year period of membership reorganization. The renewals and new members represent a stronger membership personnel than ever before in the history of the institution," Mr. Fox says.

Notes Progress

"The farm bureaus and the I. A. A. started with ideals and without a well defined program or a background of actual experience. Today both have a wealth of experience, both good and bad, successful and otherwise, from which to draw valuable lessons for future guidance.

Substantial Membership

"The I. A. A. has a substantial solid membership. Its financial condition is sound, and it has well defined lines of service with many substantial accomplishments to its credit. The future was never brighter. Another five years should thoroughly establish organized agriculture in Illinois."

Secretary Fox will give a report of work for the year at the opening session of the annual meeting at Galesburg.

Like Backing Winning Horse, Sweetnam Says

"It makes a fellow feel good to hear that the organization he belongs to is going strong," writes R. L. Sweetnam of Sweet Clover Stock Farm, Lee County. "It is like backing the winning horse.

"It is sure amusing to hear people stand around and tell how little they know about what the Farm Bureau is really doing. Most of those birds are too cheap to belong to anything. When you do convince them to join, they want their money back the next day.

"The I. A. A. is doing good work. More power to its efforts."

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, E. L. Bill, Director.

Entry as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

OFFICERS

President, S. H. Thompson, Quincy.
Vice-President, A. O. Eckert, Belleville.
Treasurer, R. A. Cowles, Bloomington.
Secretary, Geo. A. Fox, Sycamore.

Bent; Legal, Newton Jenkins.

DOLLARS IS NOT THE ONLY MEASURE

All of us like to see the results of the farm bureau set down in terms of cold dollars and cents saving, but the projects that can be figured in money saved are not always the projects that mean the most for agriculture.

There is the packer control law and the grain exchange futures act, both designed to make fair play for the producer, with the government as referee. Your officers believe they mean much to agriculture, but there is no way of measuring the benefit in money saved.

The new filled milk law prevents the manufacture and sale of milk substitutes in Illinois. Illinois dairymen do not compete with cocoanut milk now. The truth-in-advertising law put a stop to butter substitutes sailing under the flag of the dairy cow. It prevents the use of dairy terms and names in advertising substitutes for dairy products.

The Illinois wool pool is another example. Our pool along with the pools from other states has helped to bring about orderly marketing of wool. It has prevented a break in wool prices, the Live-stock Marketing Department says. It would be a guess to try to determine the value of this work in dollars and cents.

The advice given one county by the Limestone-Phosphate Department on the question of opening up a local limestone quarry, saved farmers of that county from going forward on a project that would ultimately fail.

The very fact that there is a farm bureau looking out for agricultural interests has a moral effect, or at least many believe that it has, but there is no way to measure the value.

THE COMMUNITY CLUB

The local community club and local leadership are two great helps to the farm bureau, several counties say in telling about their reorganization experience. Leadership is responsible for one-fourth of the membership of Moultrie county being in Marrobone township. We are told by a Whiteside county man that the local club is the very heart and soul of the farm bureau. In Knox county the largest membership is in the neighborhood of a rural church where the pastor is the leader of the community.

Is it true that the farm bureau is going good in the community where there is a good community organization? Does a community club help to develop leadership? In what township do you have the largest membership and what is the reason for it? Tell us about your community club and what it has done for the farm bureau.

WATCHING FARMERS' TRAFFIC PROBLEMS

You know there is a continual change going on in freight rates and rulings. Hearings are going on before the Interstate Commerce Commission and state commerce bodies. Every week or two a new tariff schedule is issued showing the changes made.

Practically every interest has a department watching every change, studying its particular problems and plugging for its side. A change in the brick freight rates in Iowa may mean all the difference in the world to cement interests of Illinois. Their transportation department knows all about it the minute a change is mentioned, and is right after it with all the facts and arguments.

In the scramble of interests to protect themselves, you can guess what happens to the interest that is not continually studying and working on the problem. That is just what has happened to farmers for a long time. Outside of hollering pretty loud when we get hurt, not much work has been done on the freight rate problem until the last few years.

The purpose of the I. A. A. Transportation Department is to be on deck where there is an issue that affects Illinois farmers. This year the department attended some eighty hearings, conferences and various meetings concerning traffic matters. On another page the result of this work is told about.

The new lower rate on mixed carloads of live-stock is an outstanding example. A lot of time was put on the case to lower the minimum weight of a carload of hogs necessary to pay freight on, but Illinois did not get the decrease in this instance.

A reduction was obtained from the Wabash on cattle and hogs from points west of the Illinois river to East St. Louis. A grazing-in-transit privilege was obtained from the Rock Island railroad for all points on that road in Illinois on stock shipped from Montana. A transit privilege on red top seed was secured at Flora. Four East St. Louis terminal roads sought to relieve themselves of the provision made for icing service. The department took up the case with the Interstate Commerce Commission and Illinois Commerce Commission and the case was dismissed.

Right now the department is fighting a proposed increase in fruit and vegetable freight rates, and also working against a proposed decrease in rates of dressed meat products, which would drive eastern buyers out of our livestock markets, the department maintains.

These are a few of the outstanding examples. The problem is not always in lowering rates. Sometimes it is in preventing a higher rate, sometimes it is checking up on a road that has not put a new rate or ruling into practice, and often it is securing a so-called privilege on a certain product for a territory.

ORGANIZATION IS THE ANSWER

"If agriculture is ever to accomplish anything either in shaping revenue laws which will be fair to farmers, or in securing an honest and effective administration of fair revenue laws, it can only be done by organization."

That is what John C. Watson told the American Farm Bureau annual meeting in Chicago. And further on this subject he said:

"Legislation nearly always operates to the advantage of those who are least able to resist. The administration of the law is subject to the same influences. It is entirely proper and necessary, therefore, that farmers' organizations should make taxation one of their projects. It is the only way by which farmers can find out the facts, give them the necessary publicity, formulate sound policies, secure fair legislation, defeat unfair legislation and establish efficient administration.

"The program is not a temporary one, but a continuous performance. It will cost money to maintain the program, but it should save farmers a hundred times, perhaps a thousand times, as much as it costs."

NO LUCK ABOUT IT

The total assessed valuation of farm land for tax purposes in 99 counties was decreased $106,000,000 in 1923, as compared with valuations of 1922.

It is estimated that this decrease in valuation will make a reduction of at least $2,000,000 in taxes paid by land owners.

There was no good luck about it. It is the result of hard work by many people, the result of organized effort of farmers. It first started three years ago when the I. A. A. began to study taxation, thinking there might be some need for farmers to spend some time on this problem. At the beginning of 1923 it was apparent that assessed valuations of farm lands were higher, according to their real value, than assessed valuation of town and city lots.

Then the work of getting the proof started. Dozens of farm bureau people spent weeks in county court houses making investigations to get the actual figures. The assessors were first approached. Then the question was taken up with county boards of review and later with the State Tax Commission. The proof of a real case was made by the farm bureau. Often the farm bureau men had more facts at hand than the tax bodies, both county and state.

More than the reduction of $2,000,000 is the example of what is possible to do through organized effort. It is a starter, just half the reduction which should have been made this year, and it is only one of several problems connected with the whole taxation question. It is reason to be encouraged, to go forward and finish the job.

$67,000 SAVED ON LIVESTOCK FREIGHT

The new lower freight rate on mixed carloads of livestock was in effect the last three months of 1923. After considerable figuring it was estimated that the reduction is saving Illinois farmers $6.00 per carload. Illinois farmers ship in the neighborhood of 45,000 mixed carloads of livestock per year.

If one-fourth of the livestock was shipped during the last three months of the year, the cash saving was $67,000. If the ruling remains in effect all of this year, the saving will be $270,000.

PROVIDING FOR THE FUTURE

Every month the Rock Island Co-operative Dairy Company deducts three per cent of the net amount due to the producer-members to place in an emergency fund. This fund will be kept growing until it reaches an amount equal in volume to the largest previous month's volume of business. While it remains the property of the producer, it is the intention of the company to invest the money for him in good bonds or liquid securities.

Why do this? The president of the "co-op" says, "It is because we are not building for today alone but for the future. We want a good reserve just as a bank or any other sound business institution has a reserve."

For example—if there are bad accounts or some calamitous emergency arises, this fund is available without causing undue burden upon the producers who are selling at the time. When a producer goes out of the milk business or withdraws from the company for any reason, his pro-rata share of the emergency fund is paid him as soon as it has reached its required volume. In addition to this emergency fund, the company has its other reserves, for depreciation of plant and equipment, interest, taxes, insurance, dividends, and other overhead items.

$115,000 IN COMMISSIONS RETURNED

Illinois farmers shipped approximately 19,000 carloads of livestock to the four Producers Commission Companies at Chicago, Peoria, East St. Louis and Indianapolis, in 1923.

The rebates on commission charges to Illinois farmers for the year will be in the neighborhood of $115,000.

Forward Farm Bureau—A Year of I. A. A. Work

OVER 31,000 SIGN DURING YEAR IN 45 FARM BUREAUS

Organization Department Sells Bureau Accomplishments to Farmers of State

"No apologies need to be offered for the work of the farm bureau, county, state and national," says G. E. Metzger in making the annual report of the Organization Department. "Their accomplishments are plentiful," he states.

G. E. Metzger

"The big work facing the department in the future is to sell the accomplishments to the ments to the farmers of the state," Mr. Metzger says.

Signed 31,000

During the year organization work has been carried on in 45 counties and membership campaigns have been completed in 33 counties. Some clean-up membership work remains to be done in 12 counties. In addition to work in these 45 counties, clean-up work carried over from last year has been completed in 11 counties. In these campaigns over 31,000 members have been signed up for a three-year period.

Township Unit Plan

Toward the close of the year a new plan of organization was tried out in seven counties. Instead of having one county school of instruction for local solicitors, three such meetings were held in each township, teaching from 7 to 15 men in each community how to solicit membership. After three days of teaching the fourth day the men attending the three township meetings are called together for final instructions and are assigned territory to solicit.

The township membership is then cleaned up before the county organization director and I. A. A. man leave the township which does away with the long drawn-out clean-up campaign which accompanies the county unit plan of reorganization.

In discussing the neighbor-sign-neighbor method of campaigns Mr. Metzger says that it has trained from 50 to 300 men in each county to sell the farm bureau to their neighbors and to meet opposition in quite an effective way.

Community Clubs

Without exception the cost of reorganization is lower in counties where community organizations have been developed, Mr. Metzger states. Through community meetings a connecting link is established with the membership.

"We observe that where the membership is meeting regularly in community meetings, studying the problems of agriculture and probably not devoting all of their time to hard work, but spending some time socially, the leadership has developed so that it is a comparatively easy task to carry on work in that community," Mr. Metzger says in his report.

Recommends Local Clubs

"We recommend local community organization as one of the projects which should be featured during the present organization period. It is the belief of the department that if community organization can be developed and a good program worked out which will fit the needs of each community, the cost of organization in the future will be materially reduced."

Lawrence, Pulaski, Jefferson and White counties, not heretofore affiliated with the I. A. A., were reorganized during the year under the joint membership plan.

PRESIDENT

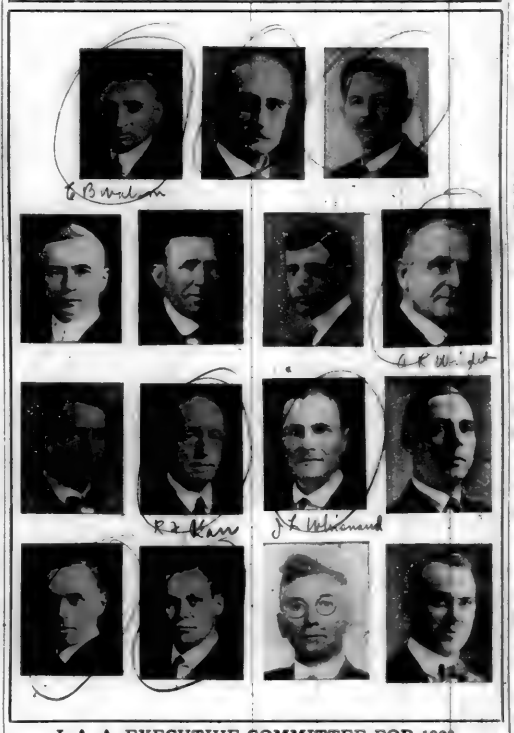
S. H. Thompson

Lots for I. A. A. to Do Yet, Says Pres. Thompson

"We don't need to be discouraged because all of our problems have not been solved this year," says President S. H. Thompson. "Of course we would like to be strong enough to be a real factor in marketing, but after all the I. A. A. has had only four years of real organization work, and in that time we have had difficulty in finding ourselves.

"There is one thing sure—organization of farmers is the way to solve our problems. We can't do without it. It is common talk that if this thing fails, the effects of it will be felt for twenty-five years.

"This organization has got to go on and stabilize prices. There is no sense in hogs being worth fifty cents more today than yesterday. The grain market is so sensitive that it is subject to a telegram or a drought scare. The organization is a fizzle if it does not solve this big problem."



I. A. A. Seeks Equal Distribution of T. B. Indemnity Funds

Approximately 75 per cent of the state and federal indemnity appropriation of over $700,000 yearly is being used in the 43 counties which have employed area veterinarians, while the remaining 25 per cent is spread over the 59 counties which have made no appropriation, states M. H. Petersen, in charge of tuberculosis eradication work for the I. A. A.

"The amount of taxes contributed to the indemnity appropriation is proportionally the same in every county in Illinois," he declares, "but the farmers in counties which have not appropriated money to hire an area veterinarian are paying for the reactors found in the herds of farmers who live in counties that have."

To correct this state of affairs, the I. A. A. is giving help to many County Farm Bureaus to aid them in securing appropriations from their Boards of Supervisors for funds to hire area veterinarians.

THEY GOVERNED THE I. A. A. IN 1923

Not in picture: Stanley Castle, Alton, 22nd district.

Legal Department Doesn't Bring $$ But It Saves 'em

You can't always figure up the value of an I. A. A. department by the amount of money it saves the farm bureau membership in cold cash. Such is true of the Legal Department of the association, composed of Newton Jenkins, Director, and Donald Kirkpatrick.

Newton Jenkins

But whenever another department desires assistance in legally setting up a co-operative association, or a co-operative organization wishes to reorganize, or a county farm bureau wishes to incorporate, all find that lawyers are pretty handy to prevent possible legal pitfalls which would be disastrous later on.

Bureaus Helped

The work which the Legal Department is doing for county farm bureaus is each year becoming more extensive, says Mr. Jenkins in his annual report. Legal assistance has been given to 64 county bureaus this year. Fifteen have been incorporated with help from the department. Some have had their charters amended so as to broaden their powers. Personal matters effecting members have often been referred by farm advisers to the department.

Aids Tax Work

When John C. Watson wished to find out just how far the I. A. A. could legally go in its tax investigations, he consulted the Legal Department, which also assisted in presenting evidence before the Illinois Tax Commission.

Thirty-eight shipping associations have been incorporated during 1923 with the aid of the department, co-operating with C. A. Stewart of the Livestock Marketing Department.

Assists with Legislation

"There was more legislation of interest to agriculture secured at the last session than has been obtained in many previous sessions of the General Assembly," states Mr. Jenkins in his report. "The Legal Department rendered some assistance to the Legislative Committee both in the preparation and interpretation of various measures considered during the session."

Every other department of the I. A. A., Finance, Limestone-Phosphate, Transportation, Fruit and Vegetable Marketing, Dairy Marketing, have all received legal aid from Mr. Jenkins and Mr. Kirkpatrick

FARMERS SECURE BENEFICIAL LAWS AT SPRINGFIELD

Co-op Act, T. B. Measures and Inspection Laws All Secure Passage

The Co-operative Marketing Act stands out as the big piece of state legislation passed at the last session of the Illinois Legislature at Springfield. From the time the bill was introduced early in the session until it was passed in the closing days, the I. A. A. Legislative Committee

was on hand to see it through. Already a number of co-operative marketing organizations have found it to their advantage to organize under the new act and several others are planning reorganization under the act.

Three T. B. Laws

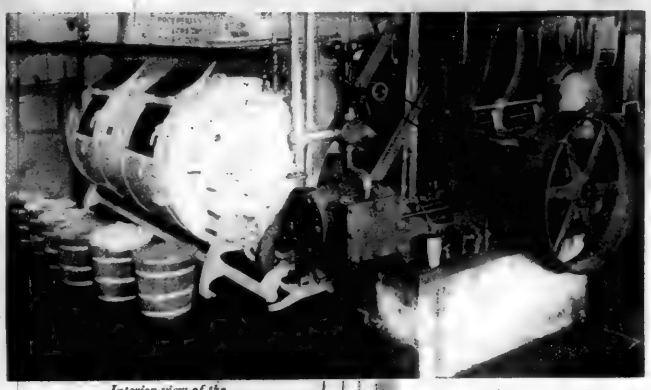
Three laws with the aim of eradicating bovine tuberculosis were passed, all championed by the Farm Bureau. First came the appropriation of a million dollars to assist in payment for condemned cattle.

A law was passed permitting the state to pay out money up to the limit of the appropriation to the extent of two-thirds of the appraised value of animals condemned, in case the Federal Government should withdraw its support or its funds be inadequate. The third law permitted county boards to appropriate money to carry on eradication work.

Inspection Law

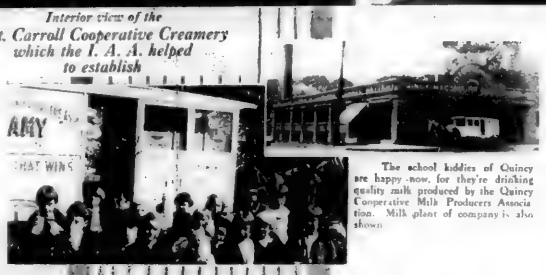
A law making possible standard grades of farm products and inspection by the state at local shipping points was enacted. The Illinois Fruit Exchange made good use of the inspection service this year, and the poultrymen found that it was just the legislation needed in setting up their new hatchery and farm flock inspection plan.

For Dairymen



The committee helped dairy interests to secure the Truth in Advertising Law, prohibiting the use of dairy terms in advertising dairy substitutes, and the Filled Milk Law which prohibits the manufacture and sale of fake milk products.

Newspapers Serve Farm Bureau with Special Editions



That Illinois newspapers, both daily and weekly, are fully alive to the importance of the Farm Bureau is shown by the fact that 36 special Farm Bureau Editions of newspapers have been published during 1924 in every part of the State in connection with reorganization campaigns.

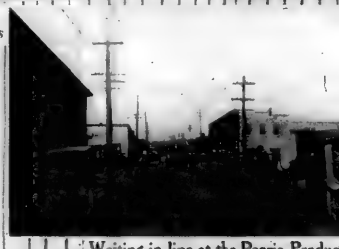
Preparation of these editions, which varied in size from 8 to 38 pages, shows what can be secured through co-operation, for newspapers, county farm bureaus, the I. A. A. Information and Organization Departments, and the American Farm Bureau Information Service co-operated to make the editions tell the Farm Bureau story

A GLIMPSE AT FARM BU

Interior view of the Mt. Carroll Cooperative Creamery which the I. A. A. helped to establish

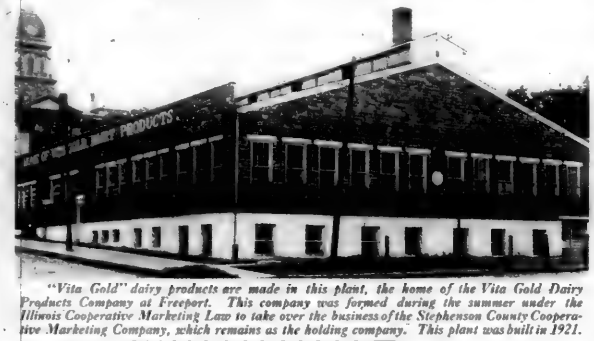
The school kiddies of Quincy are happy now, for they're drinking quality milk produced by the Quincy Cooperative Milk Producers Association. Milk plant of company is also shown.

The Illinois-Missouri Cooperative Milk Marketing Company, E. St. Louis, wh cream and manufacture butter on January 1, 1924. It has not been in operation for creditors. The I. A. A. helped to make it possible for the plant to open again.



Offices of Indianapolis Producers

"Hey! Skinney! Look what we got!" The I. A. A. believes in cooperation in all fields to make lives happier so it has cooperated with United Charities for the past three years in placing Chicago slums children into the homes of Farm Bureau members for two-weeks outings. This year 391 kiddus were sent out through the I. A. A.



Here we have the home of the Piatt County Cooperative Soy Bean Milling Association, only one of the many enterprises started in Illinois through Farm Bureau work.

Waiting in line at the Peoria Produc

The four Producers Livestock Commissi at Chicago, Peoria, East St. Louis and Indian ized by Illinois farmers, received 47,390 carloa in the first two months of 1923. This is the business of 1922. There are 585 loc livestock shipping associations in the state.

"Vita Gold" dairy products are made in this plant, the home of the Vita Gold Dairy Products Company at Freeport. This company was formed during the summer under the Illinois Cooperative Marketing Law to take over the business of the Stephenson County Cooperative Marketing Company, which remains as the holding company. This plant was built in 1921.

The Farm Bureau believes in play, too. This is the champion "barnyard golf" team of Illinois, Harry and Walter Torbett of DeWitt County, who won the cup offered by the I. A. A. at the annual picnic at Urbana, June 29. They won over 18 other Farm Bureaus teams in pitching horseshoes.

Most recent to start among the co-ops helped by the I. A. A. is the Rock Island Cooperative Dairy Company, which began distributing Riverside milk and other dairy products on August 25. Pictured above is the plant and lineup of the delivery wagons of the co-op.

Many Illinois Farm Bureaus have splendid homes. the McLean County Farm Bureau, Bloomington. It Bureau market place.

ARM BUREAU ACTIVITIES

cting Company, E. St. Louis, whose home is shown above, started to buy It has not been in operation for over a year, being forced into bankruptcy by for the plant to open again.

In the Chicago Producers Cattle Pens

in line at the Peoria Producers

ducers Livestock Commission Companies East St. Louis and Indianapolis, patron- ners, received 47,390 carloads of livestock nonths of 1923. This is nearly double 922. There are 585 local cooperative associations in the state.

n Bureaus have splendid homes. This is headquarters for arm Bureau, Bloomington. It also contains the Farm

Yes, the I. A. A. helps in marketing problems. Red top seed is one of them. Here are pictures of wagon loads of seed ready for the red top pool which is stored in the warehouse of the Egyptian Seed Growers Exchange at Flora. The two gentlemen in the center are George Orr, president, and Curt Anderson, manager of the exchange.

All aboard for the Illinois Wool Pool! Loading Sangamon County wool at Springfield consigned to the National Wool Warehouse and Storage Company, Chicago. Farm Adviser I. A. Madden is at steering wheel. Illinois farmers shipped nearly 200,000 pounds of wool to the farm bureau pool in 1923.

LIMESTONE NO LIMESTONE

Results of applying limestone on sweet clover in Stark County

NO PHOSPHATE PHOSPHATE

Results of applying rock phosphate on wheat in Livingston

The chief object of the I. A. A. Limestone-Phosphate department is to assure Illinois farmers an adequate and economical supply of agricultural limestone and raw rock phosphate, the two important mineral elements called for in the Illinois system of permanent agriculture.

"Farm Bureau, you're up to bat!" This is the Cass County Farm Bureau baseball team which has been organized for the last two years. It is the nucleus for a Central Illinois Farm Bureau baseball league, now in process of formation.

Ever taste the delicious "Illini" brand of fruit? Here's scenes at the Ozark local of the Illinois Fruit Exchange, which helps to collect, grade and pack fruit for distribution by the exchange to all parts of North America. The Ozark packing shed—the largest in southern Illinois—has a capacity of five cars daily.

Transportation Dept. Is Watchdog for Farmers

The new lower freight rate on mixed carloads of livestock probably means more in direct saving than any other one project worked on by the I. A. A. Transportation Department in 1923. However, it is only one of a long list of similar problems which the department has solved or had a big hand in.

L. J. Quasey

It is estimated that the new mixed carload freight rate will save Illinois farmers on the average of $6 a carload, Illinois farmers ship about 41,000 mixed carloads of livestock a year.

A Cut on Wabash

As a result of negotiations extending about a year, a reduction in rates was obtained from the Wabash Railroad on cattle and hogs from points west of the Illinois River at East St. Louis.

Rock Island Privilege

A grazing-in-transit privilege was obtained from the Rock Island Railroad for all points on the road in Illinois intermediate to Chicago on stock cattle, calves and sheep from Montana.

Taking Marseilles, Ill., as an example, the arrangement would result in a saving of 13 cents a hundred pounds, or about $15 for a single car and $28 for a double deck car of sheep. Previously a feeder was required to pay the rate from Montana to Marseilles and later the rate from Marseilles to Chicago. Now the sheep may be fed for a period of a year or less and reshipped to Chicago at the through rate from Montana plus a small additional transit charge.

Mr. Quasey reports that similar action is being taken with other roads.

Red Top Privilege

A similar transit privilege on red top seed was secured at Flora, Ill., for the Egyptian Seed Growers' Exchange. The privilege applies on seed moving from points in Illinois to Flora, to be cleaned, graded and stored, and then reshipped to other points in Illinois, Wisconsin, Michigan, Indiana, Ohio and New York.

For Fruit Shippers

Of particular interest to fruit and vegetable shippers of southern Illinois is the case of four railroads of East St. Louis which sought to relieve themselves of the provisions made for icing service. The department objected to the Interstate Commerce Commission and Illinois Commerce Commission and a hearing before the Interstate Commerce Commission was granted. At the hearing a representative of the lines informed the commission they would drop the matter.

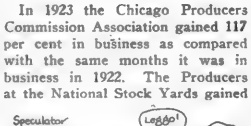
Algonquin Saved $45 a Day

Considerable survey work was done on milk and cream rates by the department. This was largely supplementary to work done in 1922. The principal purpose of these surveys was to get complete information about rates in various sections of the state.

Mr. Quasey points to a case of milk and cream shipment from Algonquin to Chicago, to show what was made possible through the rate survey. Algonquin is so situated that the mileage to Chicago can be figured two separate routes. The rate in question was figured on the longer route and of course at a higher rate. The matter was taken up with the railroads and adjustment was made. Here is what B. B. Stewart of Algonquin wrote to the department:

"You secured the lower rate for us and we get 8 cents a hundred pounds more than before. We are shipping about 56,000 pounds a day from this station. That makes a daily saving of $45."

Producer Agency Buys 600 Cars of Feeder Live Stock



Lee Divine, formerly with the I. A. A. Live Stock Marketing Department and now in charge of the stocker and feeder division of the East St. Louis Producers Commission Company, tells the Record that 600 carloads of stock were purchased for feeders by the Producers this year. It's going fine, Lee says.

Last year the stocker and feeder division purchased 345 carloads of stock for farmers. The idea of having a farmer representative on the market every day in the year, a man who knows cattle and market prices, is apparently gaining headway fast. Mr. Divine says that 90 per cent of the cattle purchased for feeders came back to the Producers to be sold.

BIG GAINS SHOWN IN BUSINESS OF PRODUCER CO-OPS

Farm Bureau Support Is Great Help to Agencies; I. A. A. Starts Field Service

In 1923 the Chicago Producers Commission Association gained 117 per cent in business as compared with the same months it was in business in 1922. The Producers at the National Stock Yards gained

73 per cent, the Indianapolis Producers gained 67 per cent and the Peoria Producers gained 100 per cent. These are the four Producers companies patronized by Illinois farmers.

"No one recognizes better than the National Live Stock Producers Association that this growth is the result of support given by the Farm Bureau," says C. A. Stewart, Live Stock Marketing Director of the I. A. A.

Field Service

This department has devoted much time to the promotion of these selling agencies. Among other things, it recognized the need of a field service and worked out a plan. Three field men are already at work, financed by the selling agencies but working under the direction of this department of the I. A. A.

F. H. Kelley represents the department in the St. Louis territory, R. B. Orendorff is the representative in the Peoria and Chicago territory and I. C. Grimes in the Chicago territory. No one has been engaged for the Indianapolis territory.

Make Personal Contact

These men make a personal contact for the selling agencies with shipping associations and producers. They attend meetings of farm bureaus, shipping associations, adjust complaints and call on association managers.

1923 WOOL POOL CONTAINS OVER 198,000 POUNDS

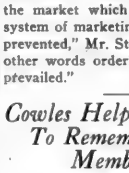
Beats 1922 Pool by Over 50,000 Pounds; Pooling Has Stabilized Market Prices

The 1923 Illinois wool pool, with 198,283 pounds to date, beats the pool of 1922 by over 50,000 pounds. LaSalle County is the leading consignor with over 18,000 pounds from 73 individuals. In all 786 individuals consigned to the pool. The average amount pooled is 258 pounds, 36 pounds above the average of 1922.

To date the National Wool Warehouse and Storage Company has disposed of the following grades of Illinois wool at the prices quoted:

¾ Blood Staple	49c
¾ Blood Clothing	46c
½ Blood Staple	46c
½ Blood Clothing	41c
¾ Blood Semi	43.3c
¼ Blood Semi	40c
Low ¼	41c
Braid	36c
Medium Burry & Seedy	37c
Cotts	31c
Dead	33c
Murraine Dead	19c
Tags	14c

These prices are all f.o.b. warehouse and may be subject to slight change. Because these sales were made recently, the Live Stock Marketing Department states that returns cannot be made for a short time and it may be necessary for those having fine grades of wool to wait somewhat longer.



Orderly Marketing

The average price paid in the country was 33 cents a pound, Director C. A. Stewart of the department states, six cents higher than local prices paid in 1922. Many independent dealers became overzealous in their efforts to prevent wool from being consigned to the pool and paid higher prices than the market justified. Much of that wool has already been sold at a loss, Mr. Stewart states, and the pools now control quite a percentage of the wool yet unsold.

"By marketing wool only as fast as the trade could absorb it, the pools have prevented a decline in the market which the independent system of marketing could not have prevented," Mr. Stewart states. "In other words orderly marketing has prevailed."

Cowles Helps You To Remember Your Membership Dues

You know there are bound to be a few among the 62,000 members that will forget all about the Farm Bureau membership dues.

R. A. Cowles

But if there is to be a Farm Bureau there must be membership dues. When the problem of collecting dues arose, Robert A. Cowles, treasurer, figured out a series of reminder letters and other suggestions. Mr. Cowles held a series of meetings over the state at which he invited Farm Bureau officials and Farm Advisers. The problems of collecting dues and other business problems of the county organizations were discussed at these meetings.

Mr. Cowles has assisted co-operative marketing associations in their problems of bookkeeping and financing. He says co-operative associations must play the game of business according to the rules of the game. A complete financial report of the I. A. A. will be given by Mr. Cowles in the next issue of the Record.

SECRETARY

Geo. A. Fox

LIMESTONE SURVEY MADE DURING YEAR BY ASSOCIATION

Illinois Farmers Used 300,000 Tons in 1923; Give Help in Phosphate Purchasing

Where is the best place for our county to purchase limestone, taking into consideration the quality, price and freight cost? To answer questions of that kind, the Phosphate-Limestone Department made a survey of practically all of the commercial quarries in Illinois and neighboring states. The survey covered 31 plants in Illinois, three in Indiana and six in Iowa.

J. R. Bent

Helps with Problems

The department has acted as representative for many county farm bureaus and individuals in dealing with producers in the interest of improving service and making adjustments on quality, weight and price. It has assisted nine counties in the problems surrounding the possibility of starting local limestone crusher and storage plants. At the present time the department is holding a series of seven district meetings to make further study of the limestone problem.

Probably 300,000 tons of agricultural limestone have been used by Illinois farmers in 1923, Director J. R. Bent states in his annual report. Practically every county in the state is now a user of limestone and a future greater user.

Rock Phosphate

The department has continued to serve as the purchasing agent for the collective buying of raw rock phosphate for members of the farm bureau. The branch office at Columbia, Tennessee, has sampled and analyzed every shipment and has supervised shipping, billing and accounting. The tonnage for the year, as in 1921 and 1922, has been below normal. However the commissions earned in this business have been more than enough to pay all the cost of shipping office and laboratory in Tennessee.

Hatchery Work Is Progressing, States Mr. Day

Eight hatcheries have sent applications to the Illinois Department of Agriculture for inspection under the new accredited hatchery plan, according to H. W. Day, Supervising Inspector. Two or three others have stated that they want inspection.

Mr. Day states that inspectors are now at work inspecting farm flocks. Quite a large number of applications are coming in from flock owners, notably in Montgomery and Wayne counties. "It is our desire to develop the work slowly during the first season and to give service rather than to have more hatcheries accredited than we can efficiently take care of," declares Mr. Day.

ILLINOIS IS GOING STRONG IN PROGRAM OF T. B. ERADICATION

I. A. A. and County Farm Bureaus Cooperating in Campaign of Education and Action

Illinois now has the largest program for the eradication of bovine tuberculosis of any state in the Union, according to M. H. Petersen, in charge of eradication work for the I. A. A. A total of 44 counties either have county veterinarians employed or have appropriations for their hire to test herds in the county for tuberculosis.

M. H. Petersen

About the middle of November the I. A. A. offered a reward of $100 for the first arrest and conviction of a bootlegger of tuberculous cattle within the county, with the provision that the county match with a similar sum, making the reward total $200.

Fourteen Make Reward

To date, 14 counties have matched this reward, states Mr. Petersen. These counties are, Iroquois, DeKalb, Dupage, McHenry, Rock Island, Will, JoDaviess, Crawford, Boone, Whiteside, LaSalle, Kendall, Peoria, and Cook.

"Sixteen counties are now cooperating with the I. A. A. in conducting educational campaigns to secure county appropriations from boards of supervisors," states Mr. Petersen. "And eight have definitely formed vigilance committees working to stamp out T. B."

Committee Takes Action

At its December meeting, the I. A. A. Executive Committee passed a resolution stating that the association would go forward on a vigorous program to make the program for the eradication of T. B. more effective. It will co-operate to the fullest extent with state and federal authorities.

Recommendation was made that the Budget Committee provide $7,000 to carry on the work in 1924 under the direction of the Livestock and Dairy Marketing Departments, with Mr. Petersen in charge.

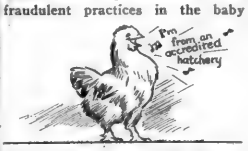
New Farm Bureau Markets Doing a Lively Business

The Producers' Market which was opened by the Logan County Bureau at Lincoln, November 27, is doing a fine business, according to J. H. Checkley, farm adviser. He reports that average sales each Saturday from 26 booths are $600. The Farm Bureau Seed Department last year cleaned and found a market for $30,000 worth of clover, timothy, and soy beans, he states.

In Decatur, the Macon County Farm Bureau started a producers market in the farm bureau building on November 10. Average returns each Saturday are around $500. Most of the farmers holding booths come from 10 to 25 miles from Decatur, Farm Adviser Walworth says.

I. A. HELPED TO DEVELOP HATCHERY INSPECTION PLANS

Harper Predicts That Higher Quality of Poultry and Eggs Will Result



The I. A. A. took a very active part in starting the plan of farm poultry flock inspection and accrediting of hatcheries which was put into operation in the fall. Machinery which made the plan possible was afforded through the farm products inspection and grading law, passed by the 1923 General Assembly, and actively sponsored by the I. A. A. Legislative Committee.

J. D. Harper

In his 1923 annual report, J. D. Harper, in charge of egg and poultry marketing for the association, has the following to say regarding the poultry improvement plan.

"Early in the year complaints and several claims against hatcheries for misrepresentation of baby chicks called my attention to the fraudulent practices in the baby

chick business," says Mr. Harper. "This was connected with the fact that the quality of Illinois eggs was below that of some adjoining states on the terminal markets.

Studies Wisconsin Plan

"A trip was made to Madison, Wis., early in the summer to study their accredited hatchery plan. H. M. Lackie, Chief Hatchery Inspector for the Wisconsin Department of Agriculture, gave me the plan of their state inspection of flocks and accrediting of hatcheries.

"Mr. Lackie consented to come to Chicago and discuss the whole subject with a committee selected to hear him.

Adopt Plans

"As a result of a conference on this subject in June plans have been developed in co-operation with the University of Illinois Poultry Department, the Division of Standardization and Markets, and the Poultry Division of the Illinois Department of Agriculture until at this time inspectors are at work and a number of hatcheries will be available on the list to furnish state-inspected standard Illinois baby chicks this coming season.

"The accredited hatchery will be a guarantee to farmers and others buying baby chicks that they are getting chicks true to variety and name from state-inspected breeding stock.

Will Help Egg Marketing

"Improvement of the quality of farm flocks of the state will surely follow the breeding-up of flocks supplying baby chicks which are being sold in increasing numbers annually," predicts Mr. Harper.

CONSTITUTION COMMITTEE

A committee of five has been named to review all proposed changes to the constitution and by-laws, and to make a report to the annual meeting. Members of the committee are: Frank Barton, Earl C. Smith, Carlton Trimble, H. E. Goembel and C. E. Bamborough.

Annual Meeting Program

OPENING SESSION 10:00 A. M., JAN. 16

Invocation.....Rev. M. Guy VanBuskirk, Oneida
Address of Welcome.....Ray Arnold, Galesburg
President's Address.....S. H. Thompson
Treasurer's Report.....R. A. Cowles
Secretary's Report.....George A. Fox
Appointment of Committees.

AFTERNOON SESSION 1:00 P. M.

Accomplishments in Livestock Co-operative Marketing.....
.....O. B. Goble
Illinois Director of Indianapolis Producers
State Financial Control of Co-operatives.....Geo. Wicker
Department of Agriculture, State of Minnesota
Self-Imposed Financial Control of Co-operatives....Geo. E. Fraser
Consulting Accountant, I. A. A.
Managerial Control of Co-operatives.....James E. Stone
President and General Manager of Burley Tobacco Growers' Co-operative Association
Nomination of Executive Committee Members by Districts.

EVENING SESSION

Banquet—6:30 P. M.
Address.....Dr. Tilden
President of Lombard College
Organized Co-operation in Community Improvement..John Camlin
President of Illinois Chamber of Commerce
Merchandising a Farm Crop for Three States.....James C. Stone
Election of Officers.

MORNING SESSION 9:00 A. M., JAN 17

Music.
The Taxation of Land.....Richard T. Ely
Professor of Economics, University of Wisconsin.
Transportation Problems of the Mississippi Valley.....
.....Hon. Cleveland A. Newton
United States Congressman, Missouri
Discussion.

AFTERNOON SESSION 1:30 P. M.

Organizing Community Centers.....Benjamin H. Darrow
Secretary of County Y. M. C. A., Ravenna, Ohio
Report of Resolutions Committee.
Report of Constitution and By-Laws Committee.
Round Table Discussion.

Fruit Exchange Has Good Year Says Manager Leeper

The average prices received by the Illinois Fruit Exchange during 1923 were quite satisfactory, according to A. B. Leeper, Centralia, manager of the organization. This is particularly true of strawberries, potatoes, cabbage and peaches, he states.

A. B. Leeper

"In the case of peaches the average price net-to-growers was the highest we have heard of in 1923," declares Mr. Leeper. "The apple and pear prices were the exception. The apple prices were not satisfactory in a good many cases but when comparative prices received by the exchange and prices received in other apple-growing sections of the United States are considered, in almost every case we find a very favorable margin in favor of Illinois fruits.

Apple Crop Large

"The enormous apple crop which was moved during the year was one of the largest ever moved in the same length of time and it was only by distributing apples in carlots to practically every small town in the country that they were able to be sold at any price in the short period in which they were forced on the market.

600 Cars Volume

"Last winter the weather man dealt roughly with the southern Illinois fruit growers and the early apple and peach crops throughout most of the section were badly injured or killed," states Mr. Leeper. "The falling-off of these two important crops reduced the tonnage of the Illinois Fruit Exchange by practically 50 per cent.

"However, there was a considerable gain in the late apple crop and the exchange will finish the season having marketed around 600 cars of fruit."

Shipping Point Inspection

The establishment of government shipping point inspection during 1923 has been a decided step forward in the marketing of Illinois fruits, Mr. Leeper says.

"The Exchange was the first to call on the Illinois Department of Agriculture for this service and it was used on practically all the peaches shipped and also on a great many of the apples.

Insures High Grade Fruit

"There is considerable sentiment among the members of the exchange to install government inspection on every car of fruit shipped by the organization next year," declares Mr. Leeper.

He predicts that if this is done, added to the general supervision of inspection already in use by the exchange, the co-operative will put on the market a product of uniformity and also of superior grade to that of any other growers or shippers in Illinois.

Annual Reports

The annual report of the association for 1923 will be ready for distribution in booklet form at the annual meeting at Galesburg. Detailed summaries of the work of each department are included in the annual report. If you want a copy, secure it at the annual meeting or send your name to the I. A. A. and one will be mailed to you as soon as they are off the press.

HAVE ANY TROUBLE WITH RAILROADS? WRITE THE I. A. A.

Transportation Department Helps With Fences, Livestock Pens and Loading Platforms

H. N. Ripling of Galena wrote the Transportation Department saying that the railroad fences adjoining his property had been bad for a number of years and he was not able to get in touch with anyone locally who could take care of the matter for him.

Upon taking up the case, the railroad informed the department that instruction had been given to put the fences in first class condition. Later Mr. Ripling thanked the I. A. A. for securing a new fence.

The Dahinda Livestock Shipping Association, Knox County, asked that watering facilities and shelter be provided at the local stock pens. The railroad did not respond favorably at first, contending that the volume of business did not warrant any improvements. They stated that there were a number of trees around the yards to give sufficient shade. Photographs of the yards revealed a different situation, however. After submitting the matter to the management again, word was received that the division superintendent had been authorized to provide water and shade at the stock pens.

Bad-Acting Buyers

Another shipping association desired additional pens and wanted to lease a piece of ground for scales. Investigation disclosed that local buyers were not friendly to the shipping association and they tried to hinder it in its operations.

Buyers endeavored to get their cattle to the pens first and to distribute them in as many pens as possible The scale owned by the local buyers was in poor shape and led to much trouble.

The Transportation Department took the matter up with the railroad company with the result that the lease for the scale site was cancelled and given to the shipping association. The railroad promised to make necessary changes in the pens to accommodate shippers.

416 Like These

The Transportation Department has handled approximately 416 matters similar to these instances, Director L. J. Quasey states in his annual report.

NOT WHO, BUT HOW

The question is not who, but how and when, President Bradfute said at the annual meeting of the American Farm Bureau Federation. He was discussing politics of the convention and his meaning was that how and when the needed work was to be done is more important than who is to have the glory and profit in doing it.

Our own annual meeting is coming in two weeks.

I. A. A. DEPARTMENT COLLECTS NEARLY $10,000 IN CLAIMS

Traffic Department Represents Farmers' Interests in Railroad Losses

A total of 519 claims were filed and 335 were collected to the amount of $9,457.98, during 1923, by the I. A. A. Transportation Department, according to the annual report of L. J. Quasey, director of the department.

These were all strictly railroad claims and those filed included 161 freight overcharge claims, 325 loss and damage claims, and 33 general loss and damage claims.

Freight Overcharge Example

"Under the first group we have claims that are occasioned either through the application of an improper rate or improper routing and an overcharge is the result," Mr. Quasey states. "In many cases where errors were found, claims were filed and money recovered.

"A member of the McLean County Farm Bureau had a shipment of stock cattle moving from South St. Paul to his local station on which he was charged $106 freight. He suspected that something was wrong and referred the matter to us. Upon checking the rate, we found that he had been charged the fat cattle rate instead of the stock cattle rate. The correct charge should have been $80.80. The difference of $25.20 was refunded by the railroad company."

Live Stock Delayed

Loss and damage claims often arise from loss and damage to shipments en route, states Mr. Quasey's report. In the case of live stock it may be due to delay in arriving at the market thus causing a shrinkage or drop in the market. An example is cited of C. B. Watson, of DeKalb, who shipped a carload of cattle to the Chicago yards which was delayed in getting to market.

The claim was placed with the department for handling and included shrinkage, drop in the market, and extra feed, the total amount of which was $84.16. This settlement was obtained for Mr. Watson. In acknowledging it, he wrote:

"I received check for $84.16, settlement in full from the C. & N. W. railway for claim on load of cattle. I appreciate your efforts in this and the other claim adjusted. It is excellent service you are rendering the farmers of Illinois in getting live stock and other claims adjusted. I hope the time will come when more farmers will avail themselves of the service which the I. A. A. is giving."

Loss by Fire

"Under general loss and damage claims are the fire losses and stock killed along railroad right-of-ways," says Mr. Quasey. "The claim of Mr. J. C. McWhinney serves as an illustration of this class of claims. Mr. McWhinney sustained a loss of 17 acres of meadow and length of fence. The damage amounted to $100. The railroad offered to pay less than half that amount, stating that according to their records that amount covered the loss.

"We made further investigation of the matter and insisted that the full amount of the claim be paid. The claim agent then informed us that he could not pay more than that, whereupon we asked him for evidence to back up his contention. He then sent us the report of the section foreman which he relied upon in making the settlement. This disclosed that the section foreman had greatly underestimated the actual damage. Our evidence was comprehensive and complete and after taking the matter up with the railroad company again, they passed it for payment in the full amount."

$2,000,000 Cut in Taxes Through Organization

TAX VALUATIONS GET GENERAL CUT OF TEN PER CENT

I. A. A. Will Continue Tax Work in Many Other Tasks to Be Done, Says Watson

In spite of the fact that equalization of valuations of farm land in 1923 has not gone more than half as far as it should have gone, it is probable that the decrease in taxes on land owners this winter will amount to at least $2,000,000, according to John C. Watson, Director of Taxation and Statistics for the I. A. A.

J. C. Watson

This is the encouraging news that comes at the end of a year of hard work on the farm tax problem.

10 Per Cent Decrease

The total reduction in assessed valuations of land from 1922 to 1923, is nearly $106,000,000, or about a 10 per cent decrease, Mr. Watson

states in his annual report. If this reduction were all reflected in decreased taxes, it would mean a cut of $4,000,000, Mr. Watson states. However, increased tax rates, particularly for schools, are likely to offset the effect for 40 or 50 per cent of the reduction.

Most all of Illinois knows the story of how investigations were carried on in 56 counties to find the actual values of farm lands and city property and how the assessed values were compared with the actual values to see if they were assessed on the same basis. And then how this information was taken first to county boards of review and later to the State Tax Commission.

Future Program

"The department proposes to continue its efforts to secure equalization in counties where any serious inequalities throw an unfair burden on farm land," Mr. Watson says. "In many counties assessments of farm animals are at a much higher percentage of their actual values than is true of city property, or in a good many cases even of farm land. Some very substantial decreases in such valuations have been made this year. Further adjustments in the valuations of personal property should be secured through the assessors next spring. Unless it is made by assessors, it is not likely to be made at all.

Tax Laws

"Questions of constitutional and statutory changes to make the revenue laws fairer to farmers and other tax payers are becoming increasingly important in Illinois The department proposes to give careful consideration to such questions, and to continue gathering information on the working and administration of our present revenue laws.

Tax Expenditures

"Taxpayers of the state are entitled to information in a form they can understand about expenditures of tax money. At present they do not have such information. Wherever public funds are spent inefficiently, extravagantly or dishonestly, high taxes will be levied.

"A proper system of checks on expenditures, of auditing, and of analyses promotes efficiency, economy and honesty in handling public funds. There can be little doubt that the greatest opportunity for reducing tax levies lies in this direction. The department proposes to give this subject as much attention as its other duties permit."

Just Like Pulling Teeth!

No, the farm bureau doesn't claim all the credit for the decrease of $2,000,000 in farm taxes of 1923. It is possible that some decrease might have been made without organized agriculture taking any hand in it at all.

But a large number of county farm bureaus and the I. A. A. Taxation Department knows that a lot of that reduction came like pulling teeth. Do your own guessing of how much reduction farmers would have received if continual study and work had not been centered on this problem by the farm bureau.

Mr. Kelker Is New Assistant to Secretary

The I. A. A. office has handled 18,000 outgoing telephone calls, 1,250 long distance calls and has sent out 1,400 telegrams in the year 1923, reports J. H. Kelker, Assistant to the Secretary, who was employed by the Association November 1.

J. H. Kelker

During the year, 19,602 typewritten letters were sent out and 27,788 pieces of first class mail received. The addressing section which keeps up the list of 70,000 names and mails the Record, the multigraph section, the stock room and filing work all come under the direction of Mr. Kelker. There are 11 persons employed in these lines of work. The real truth of the matter is that this department does everything that does not come under some other department of the Association, including everything from making arrangements for meetings to ordering Farm Bureau signs.

Arthur Says Club Work Is Great; Enjoyed Banquet

"I am writing to thank you for the fine banquet that was given to us boys and girls," says Arthur Manock, Peoria County, boys' pig club champion of Illinois, in a letter to the I. A. A. "It sure was a fine get-together. I enjoyed hearing our I. A. A. leaders speak and also to meet them.

"We belong to the I. A. A. and the Peoria County Farm Bureau. This is an organization that every farmer ought to belong to. If it had not been for the farm bureau, I expect I would never have heard of club work until it would have been too late. As it is, I have had three successful years. It is work that has been an education in itself. I am a club booster forever and ever."

ISSUE TAKEN WITH PRESS STATEMENT OF TAX COMMISSION

Watson Says Body Forgot All About City Lots Increase; Count Reductions Twice

In his annual report, John C. Watson, of the I. A. A., points to more holes in the press statement issued by the State Tax Commission, in which they tell about decreased valuation of farm land.

In addition to the error, as Mr. Watson calls it, of counting the $68,000,000 land reduction made in 1922, twice, the Commission forgot all about the increased number of lots and new buildings when telling about the big increase made in valuations of city property.

In explaining increases in town and city lots the statement released by the Commission reads:

Statement of Commission

"During the same period of two years (1920 to 1922), town and city lots have been increased $28,173,463 by the boards of review, and this year the increase in town and city lots has been $7,960,416, making a total increase in the valuation of town and city lots of $36,133,879. This increase fairly represents the normal increase on the number and value of town and city lots."

In reply, Mr. Watson says, "Anyone who knows anything about the great increase in the value of city real estate in the last three years will take issue with the deductions in the last sentence quoted above. The number of new lots assessed in the state increased 56,706 from 1920 to 1922. The value of new improvements on lots is not known but it ran into hundreds of millions of dollars. In Chicago alone, the estimated cost of buildings for which permits were issued in 1920 and 1921 was more than $204,000,000.

Does Not Consider Value Increase

"The increase in assessed valuations of town and city lots in the two years was a very small fraction of the value of new property. It takes no account whatever of the enormous increase in the value of lots and improvements already assessed in 1920. The same comment applies to the assessments for 1923 of 29,752 new lots and new improvements on lots in the 99 counties, exclusive of Cook, Lake and La-Salle. The increase of $7,960,591, in assessed valuations of all lots and improvements thereon in these counties is inadequate to represent the increase in new property alone."

Much Serum Secured Through Purchasing Committee Contract

C. A. Stewart, Director of Live Stock Marketing Department, served as secretary of the Illinois Serum Purchasing Committee during 1923. Others on the Committee were Farm Advisers J. H. Lloyd, L. R. Marchant, J. R. Shinn, and F. E. Fuller.

As a result of the committee's work, 31 counties contracted for 18,000,000 ccs. of serum and virus from a commercial serum plant at 75 cents per hundred ccs. Up to December 1, a total of 17,117,000 ccs. of this contract had been consumed. Several other counties were also given aid in serum purchasing.

I. A. A. Has Standard Milk Marketing Contract in Use

A standard milk marketing contract for use when Illinois dairymen desire to form co-operative dairy marketing associations has been worked out by the I. A. A. this year, according to the report of A. D. Lynch, Director of Dairy Marketing.

A. D. Lynch

It is now being used by the Rock Island Co-operative Dairy Company and the Vita Gold Dairy Products Company, Freeport.

"This marketing contract departs from others chiefly in that provision is made to penalize the man who produces a surplus as against the man whose production is uniform by paying a less price for the excess production than the fluid milk price," states Mr. Lynch.

"The period of low production is determined conclusively by the company and is based upon its period of least receipts. The provision is intended to influence production toward more uniformity with more equity to individual producers than usually provided for. This contract was worked out after considerable discussion with officers of the I. A. A. and with the advice and assistance of the association's attorneys."

Investigational Work

The Dairy Marketing Department finds that a very important step in the organization of a co-operative dairy enterprise is the pre-organization or investigational work to find if there is ample demand for its services and a reasonable assurance that it will succeed, states Mr. Lynch.

"The department finds it necessary at times to advise dairymen not to begin the business they might have in mind and for which they believe a need exists," Mr. Lynch says.

Examples Given

"In Union County, for example, a survey with the local farm bureau was made in the interests of getting a condensary into the county. After an investigation of the county's dairy development and future possibilities, cow testing associations and cream shipping organizations were suggested as the present need."

However in Decatur, Macon County, the department found a city of nearly 50,000 of good purchasing power without a dependable milk supply. Over 100 individuals and small dealers were found to be peddling raw milk. The conclusion was reached that there existed on this market an opportunity for a co-operative milk distributing association on the part of dairymen who deliver milk and others in order to standardize their product and merchandise it according to approved business practice.

Good Year for Dairymen

"The dairy industry has gone through a satisfactory year in many ways," concludes Mr. Lynch in his report. "The price of butter has ruled from 8 to 10 cents higher than in 1922. The market has been particularly free from excessive fluctuation. There is indication of a larger disappearance of dairy products into consumptive channels judging from reports of the large primary and consuming markets.

"The price of fluid milk around the large population centers is generally lower throughout the country. High prices for fluid milk evidently have stimulated dairymen to patronize such markets more extensively. It is apparent that production has increased in the Chicago territory and some dairymen already feel that lower prices will be in order unless they associate more effectively in an orderly marketing plan."

Fruit Co-op Will Reorganize Under Marketing Act

Officers and members of the Illinois Fruit Exchange are looking forward to the organization of a number of new units this winter, states A. B. Leeper, Manager. Never has the interest of the growers in co-operative marketing been as great as it is at present, he says.

Decision has practically been reached that the fruit exchange will get a new charter and incorporate under the new Illinois Co-operative Marketing Act. This will mean that the reorganized exchange will take over by contract the crop the present organization will have and will organize all new units under the "co-op" act.

As soon as arrangements are made for such incorporation, the exchange expects to engage in an extensive membership campaign under the direction of the Fruit and Vegetable Marketing Department of the Illinois Agricultural Association. Many requests are already on file for this organization work which will be started early in January, Mr. Leeper states.

It Pays to Check Over R. R. Rates, Department Finds

All railroad tariffs on agricultural products are kept on file in the office of the Transportation Department of the I. A. A. Every time there is a supplement or a reissue, the department carefully checks them over to ascertain any changes in rates that concern the farmer.

In an instance that took place the latter part of the past year, the department found that the new ruling on mixed shipments of live stock as ordered effective by the Interstate Commerce Commission on September 28, had not been made effective by the Chicago, Burlington & Quincy Railroad on Illinois traffic until November 1.

The matter was taken up with the management of the railroad. It appealed to the Illinois Commerce Commission for authority to refund all overcharges on mixed shipments that moved between September 28th and November 1st.

Up to the present time, the Transportation Department has filed over 40 claims amounting to approximately $300 with the C. B. & Q. for these overcharges.

EMPLOYMENT SERVICE

The I. A. A. Dairy Marketing Department conducts an employment service for organizations desiring managers, superintendents, or other employes, says the annual report of A. B. Lynch, director. A list of available or prospective men is kept on file and from it boards of directors get in touch with prospects and the department aids them in conducting interviews with men in whom they are interested.

COLLEGE OF AGRICULTURE,
UNIVERSITY OF ILLINOIS,
URBANA, ILLINOIS.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 2 | January 21, 1924 | Number 2

ORGANIZATION IS ESSENTIAL, SAYS PRES. THOMPSON

Efficient Production Alone Will Not Solve Farm Problems Is Opinion of I. A. A. Chief

"Future progress of agriculture depends today more than at any time in the history of our country on strong organization of farmers," said President S. H. Thompson in his address at the opening of the ninth annual meeting of the I. A. A. at Galesburg, Jan. 16. "Efficient production alone will not solve the present day problems.

"We must put agriculture on a sound basis, on equal footing with every other successful business of our country. If we would keep our children on the farm and continue the business, we must put agriculture on a substantial paying basis that will bring returns that are satisfactory so that they can make the home and farm attractive and really worth while for the best of men.

S. H. Thompson

Farm Bureau Won Voice.

"We have through the efforts of the farm bureau, won a voice in the affairs of county, state, and nation and have been instrumental in securing the passage of constructive legislation that will help the farmer to get his business on an equal basis enjoyed by the other businesses of the country and thus have opened the way for cooperative effort, making it possible for him not only to produce efficiently, but also to join with

(Continued on page 3)

John Had Talk All Ready But Censors Didn't Approve It

John C. Watson, Director of Taxation for the I. A. A. was scheduled to tell the world about "Taxation as a Farm Bureau Project," over the American Farm Bureau radio from Station KYW, Chicago, January 4, but his manuscript, prepared in advance, was rejected as "political" by KYW censors. Station KYW is owned and controlled by the Westinghouse corporation. If you want a copy of John's "censored" talk, write the I. A. A.

Annual Meeting Report

As the Record goes to press on the eve of the ninth annual meeting, advance copies of several addresses have been secured and are summarized in this issue. The next issue of the Record will contain further report of this meeting.

Series of Shipping Association Schools To Start on Feb. 12

Farm advisers, directors, managers, and members of livestock shipping associations are invited to attend one-day shipping association schools in their districts, which will be held starting February 12, by the I. A. A., College of Agriculture, and National Live Stock Producers Association, cooperating.

The discussions will be led by C. A. Stewart and L. J. Quasey of the I. A. A.; E. T. Robbins and V. Vaniman of the College of Agriculture; and F. M. Simpson, general manager of the National Producers. The managers of each of the four Producers selling agencies at Chicago, Peoria, E. St. Louis, and Indianapolis will attend the schools in their respective territories and the three I. A. A. fieldmen, F. H. Kelley, R. B. Orndorff, and I. C. Grimes will divide their time between the meetings.

The schools are scheduled as follows: Olney, Feb. 12; Carbondale, Feb. 13; Centralia, Feb. 14; Springfield, Feb. 19; Decatur, Feb. 20; Gilman, Feb. 21; Galesburg, Feb. 26; Dixon, Feb. 27; and Chicago, Feb. 28.

Uniform Purchase Plans Being Made For Limestone

Two more district meetings have been held to discuss plans for the future purchase of limestone on a uniform basis among the county farm bureaus, according to J. R. Bent, Director of the Phosphate-Limestone Department. A meeting was held at Joliet on January 9, and one was planned for Galesburg on January 17 in connection with the annual meeting.

One is planned for Southern Illinois on February 6, at Centralia.

Mr. Bent states that the statewide conference which representatives selected at the district meetings will attend, will probably be held at Springfield, February 20 and 21.

"The meetings are evidencing that the use of limestone is rapidly increasing in all parts of the state, especially in the northern and central parts," Mr. Bent says.

UP TO BAT WITH 1924

Secretary Fox Charts New Year's Program of Work

In his address at the ninth annual meeting, Secretary George A. Fox reviewed and discussed the work of the past five years. He pointed to the failures and strongholds, and made recommendations for the future.

Following are a few outstanding things said by Mr. Fox:

Cooperative Marketing

"We have had four years of intensive experience with marketing problems, some satisfactory and some not. We may become discouraged and overwhelmed or we may capitalize upon our mistakes and make them serve us. The greatest obstacle to overcome at this time is the strife over leadership.

Livestock Marketing

"Where possible livestock shipping associations membership should be confined to farm bureau membership and a differential charge be made for handling in favor of members. Each association would profit by requiring its members to enter into a binding agreement which will be just and fair and at the same time secure the maximum efficiency. Boards of directors need control. Managers need not fear this control. The members do need to fear the lack of control by a board of directors. Well-established locals are the guarantee of successful terminals.

Grain Marketing

"If Illinois is willing to accept U. S. Grain Growers' obligations in Illinois as Illinois obligations, and no longer regard them as obligations of the national institution, then Illinois may contemplate a state grain marketing program. The resolution passed by the mid-west presidents and secretaries in July and later approved by the A. F. B. F. Executive Committee is the best expression of a national policy that has been put forward.

"The National Wheat Committee and the U. S. Grain Growers have not defined their position with reference to this resolution. Until the policy of these two organizations are made clear and points of antagonism between the two removed, there can be no national program upon which Illinois can embark with safety without first accepting that the U. S. Grain Growers obligations in Illinois are state obligations, and thereby assuming the hazard of impairing, if not destroying, the

I. A. A. NET WORTH TOTALS $214,293 START OF NEW YEAR

$150,000 In United States Bonds And Cash—Treasurer R. A. Cowles Comments

With a net worth of $214,293, of which $150,000 is in Government bonds and cash, the Illinois Agricultural Association starts the year 1924.

On another page is printed the balance sheet of the association, certified by public accountants, and following are comments by Treasurer Robert A. Cowles:

"The balance sheet of the association shows its general fund reserve balance at December 31, 1923 to be $214,293.64. These figures represent the conservative 'net worth' of the association, after having made deductions in ample amount for probable losses, doubtful accounts receivable and advances to affiliated organizations, and reserves for depreciation, and, having listed under its liabilities all accounts payable and other obligations, of every nature.

Other Property

"There might have been listed with some propriety among the assets of the association as a deferred charge, an additional item of substantial amount representing prepaid organization expenses, since during 1922 and 1923 the greater part of the membership in the farm bureaus and the Illinois Agricultural Association has been signed to new three year contracts.

"The item listed under accounts receivable, $18,409.93, represents membership dues collected by the farm bureaus and unremitted at December 31, 1923. A substantial part of these unremitted balances were received during the first days of January following.

$120,000 In U. S. Banks

"The association has been able during the year to increase its

(Continued on page 3)

Chronic Kickers Past Redemption Says Riplinger

"That banquet given to the boys' and girls' club winners was a hundred per cent good act," writes Henry M. Riplinger of Galena. "The young Americans on the farm are the people that will make America worth while.

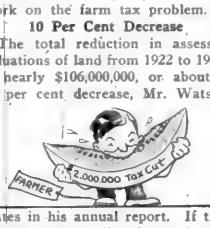
"The old chronic kickers are past redemption. They should keep quiet. Keep going and all will be well before long."

$2,000,000 Cut in Taxes Through Organization

TAX VALUATIONS GET GENERAL CUT OF TEN PER CENT

I. A. A. Will Continue Tax Work in Many Other Tasks to Be Done, Says Watson

In spite of the fact that equalization of valuations of farm land in 1923 has not gone more than half as far as it should have gone, it is probable that the decrease in taxes on land owners this winter will amount to at least $2,000,000, according to John C. Watson, Director of Taxation and Statistics for the I. A. A.



J. C. Watson

This is the encouraging news that comes at the end of a year of hard work on the farm tax problem.

10 Per Cent Decrease

The total reduction in assessed valuations of land from 1922 to 1923, is nearly $106,000,000, or about a 10 per cent decrease, Mr. Watson

states in his annual report. If this reduction were all reflected in decreased taxes, it would mean a cut of $4,000,000, Mr. Watson states. However, increased tax rates, particularly for schools, are likely to offset the effect for 40 or 50 per cent of the reduction.

Most all of Illinois knows the story of how investigations were carried on in 56 counties to find the actual values of farm lands and city property and how the assessed values were compared with the actual values to see if they were assessed on the same basis. And then how this information was taken first to county boards of review and later to the State Tax Commission.

Future Program

"The department proposes to continue its efforts to secure equalization in counties where any serious inequalities throw an unfair burden on farm land," Mr. Watson says. "In many counties assessments of farm animals are at a much higher percentage of their actual values than is true of city property, or in a good many cases even of farm land. Some very substantial decreases in such valuations have been made this year. Further adjustments in the valuations of personal property should be secured through the assessors next spring. Unless it is made by assessors, it is not likely to be made at all.

Tax Laws

"Questions of constitutional and statutory changes to make the revenue laws fairer to farmers and other tax payers are becoming increasingly important in Illinois The department proposes to give careful consideration to such questions, and to continue gathering information on the working and administration of our present revenue laws.

Tax Expenditures

"Taxpayers of the state are entitled to information in a form they can understand about expenditures of tax money. At present they do not have such information. Wherever public funds are spent inefficiently, extravagantly or dishonestly, high taxes will be levied.

"A proper system of checks on expenditures, of auditing, and of analyses promotes efficiency, economy and honesty in handling public funds. There can be little doubt that the greatest opportunity for reducing tax levies lies in this direction. The department proposes to give this subject as much attention as its other duties permit."

Just Like Pulling Teeth!

No, the farm bureau doesn't claim all the credit for the decrease of $2,000,000 in farm taxes of 1923. It is possible that some decrease might have been made without organized agriculture taking any hand in it at all.

But a large number of county farm bureaus and the I. A. A. Taxation Department knows that a lot of that reduction came like pulling teeth. Do your own guessing of how much reduction farmers would have received if continual study and work had not been centered on this problem by the farm bureau.

Mr. Kelker Is New Assistant to Secretary

The I. A. A. office has handled 18,000 outgoing telephone calls, 1,250 long distance calls and has sent out 1,400 telegrams in the year 1923, reports J. H. Kelker, Assistant to the Secretary, who was employed by the Association November 1.

J. H. Kelker

During the year, 19,602 typewritten letters were sent out and 27,788 pieces of first class mail received. The addressing section which keeps up the list of 70,000 names and mails the Record, the multigraph section, the stock room and filing work all come under the direction of Mr. Kelker. There are 11 persons employed in these lines of work. The real truth of the matter is that this department does everything that does not come under some other department of the Association, including everything from making arrangements for meetings to ordering Farm Bureau signs.

Arthur Says Club Work Is Great; Enjoyed Banquet

"I am writing to thank you for the fine banquet that was given to us boys and girls," says Arthur Manock, Peoria County, boys' pig club champion of Illinois, in a letter to the I. A. A. "It sure was a fine get-together. I enjoyed hearing our I. A. A. leaders speak and also to meet them.

"We belong to the I. A. A. and the Peoria County Farm Bureau. This is an organization that every farmer ought to belong to. If it had not been for the farm bureau, I expect I would never have heard of club work until it would have been too late. As it is, I have had three successful years. It is work that has been an education in itself. I am a club booster forever and ever."

ISSUE TAKEN WITH PRESS STATEMENT OF TAX COMMISSION

Watson Says Body Forgot All About City Lots Increase; Count Reductions Twice

In his annual report, John C. Watson, of the I. A. A., points to more holes in the press statement issued by the State Tax Commission, in which they tell about decreased valuation of farm land.

In addition to the error, as Mr. Watson calls it, of counting the $68,000,000 land reduction made in 1922, twice, the Commission forgot all about the increased number of lots and new buildings when telling about the big increase made in valuations of city property.

In explaining increases in town and city lots the statement released by the Commission reads:

Statement of Commission

"During the same period of two years (1920 to 1922), town and city lots have been increased $28,173,463 by the boards of review, and this year the increase in town and city lots has been $7,960,416, making a total increase in the valuation of town and city lots of $36,133,879. This increase fairly represents the normal increase on the number and value of town and city lots."

In reply, Mr. Watson says, "Anyone who knows anything about the great increase in the value of city real estate in the last three years will take issue with the deductions in the last sentence quoted above. The number of new lots assessed in the state increased 56,706 from 1920 to 1922. The value of new improvements on lots is not known but it ran into hundreds of millions of dollars. In Chicago alone, the estimated cost of buildings for which permits were issued in 1920 and 1921 was more than $204,000,000.

Does Not Consider Value Increase

"The increase in assessed valuations of town and city lots in the two years was a very small fraction of the value of new property. It takes no account whatever of the enormous increase in the value of lots and improvements already assessed in 1920. The same comment applies to the assessments for 1923 of 29,752 new lots and new improvements on lots in the 99 counties, exclusive of Cook, Lake and La-Salle. The increase of $7,960,591, in assessed valuations of all lots and improvements thereon in these counties is inadequate to represent the increase in new property alone."

Much Serum Secured Through Purchasing Committee Contract

C. A. Stewart, Director of Live Stock Marketing Department, served as secretary of the Illinois Serum Purchasing Committee during 1923. Others on the Committee were Farm Advisers J. H. Lloyd, L. R. Marchant, J. R. Shinn, and F. E. Fuller.

As a result of the committee's work, 31 counties contracted for 18,000,000 ccs. of serum and virus from a commercial serum plant at 75 cents per hundred ccs. Up to December 1, a total of 17,117,000 ccs. of this contract had been consumed. Several other counties were also given aid in serum purchasing.

I. A. A. Has Standard Milk Marketing Contract in Use

A standard milk marketing contract for use when Illinois dairymen desire to form co-operative dairy marketing associations has been worked out by the I. A. A. this year, according to the report of A. D. Lynch, Director of Dairy Marketing.

A. D. Lynch

It is now being used by the Rock Island Co-operative Dairy Company and the Vita Gold Dairy Products Company, Freeport.

"This marketing contract departs from others chiefly in that provision is made to penalize the man who produces a surplus as against the man whose production is uniform by paying a less price for the excess production than the fluid milk price," states Mr. Lynch.

"The period of low production is determined conclusively by the company and is based upon its period of least receipts. The provision is intended to influence production toward more uniformity with more equity to individual producers than usually provided for. This contract was worked out after considerable discussion with officers of the I. A. A. and with the advice and assistance of the association's attorneys."

Investigational Work

The Dairy Marketing Department finds that a very important step in the organization of a co-operative dairy enterprise is the pre-organization or investigational work to find if there is ample demand for its services and a reasonable assurance that it will succeed, states Mr. Lynch.

"The department finds it necessary at times to advise dairymen not to begin the business they might have in mind and for which they believe a need exists," Mr. Lynch says.

Examples Given

"In Union County, for example, a survey with the local farm bureau was made in the interests of getting a condensary into the county. After an investigation of the county's dairy development and future possibilities, cow testing associations and cream shipping organizations were suggested as the present need."

However in Decatur, Macon County, the department found a city of nearly 50,000 of good purchasing power without a dependable milk supply. Over 100 individuals and small dealers were found to be peddling raw milk. The conclusion was reached that there existed on this market an opportunity for a co-operative milk distributing association on the part of dairymen who deliver milk and others in order to standardize their product and merchandise it according to approved business practice.

Good Year for Dairymen

"The dairy industry has gone through a satisfactory year in many ways," concludes Mr. Lynch in his report. "The price of butter has ruled from 8 to 10 cents higher than in 1922. The market has been particularly free from excessive fluctuation. There is indication of a larger disappearance of dairy products into consumptive channels judging from reports of the large primary and consuming markets.

"The price of fluid milk around the large population centers is generally lower throughout the country. High prices for fluid milk evidently have stimulated dairymen to patronize such markets more extensively. It is apparent that production has increased in the Chicago territory and some dairymen already feel that lower prices will be in order unless they associate more effectively in an orderly marketing plan."

Fruit Co-op Will Reorganize Under Marketing Act

Officers and members of the Illinois Fruit Exchange are looking forward to the organization of a number of new units this winter, states A. B. Leeper, Manager. Never has the interest of the growers in co-operative marketing been as great as it is at present, he says.

Decision has practically been reached that the fruit exchange will get a new charter and incorporate under the new Illinois Co-operative Marketing Act. This will mean that the reorganized exchange will take over by contract the crop the present organization will have and will organize all new units under the "co-op" act.

As soon as arrangements are made for such incorporation, the exchange expects to engage in an extensive membership campaign under the direction of the Fruit and Vegetable Marketing Department of the Illinois Agricultural Association. Many requests are already on file for this organization work which will be started early in January, Mr. Leeper states.

It Pays to Check Over R. R. Rates, Department Finds

All railroad tariffs on agricultural products are kept on file in the office of the Transportation Department of the I. A. A. Every time there is a supplement or a reissue, the department carefully checks them over to ascertain any changes in rates that concern the farmer.

In an instance that took place the latter part of the past year, the department found that the new ruling on mixed shipments of live stock as ordered effective by the Interstate Commerce Commission on September 28, had not been made effective by the Chicago, Burlington & Quincy Railroad on Illinois traffic until November 1.

The matter was taken up with the management of the railroad. It appealed to the Illinois Commerce Commission for authority to refund all overcharges on mixed shipments that moved between September 28th and November 1st.

Up to the present time, the Transportation Department has filed over 40 claims amounting to approximately $300 with the C. B. & Q. for these overcharges.

EMPLOYMENT SERVICE

The I. A. A. Dairy Marketing Department conducts an employment service for organizations desiring managers, superintendents, or other employes, says the annual report of A. D. Lynch, director. A list of available or prospective men is kept on file and from it boards of directors get in touch with prospects and the department aids them in conducting interviews with men in whom they are interested.

URBANA, ILLINOIS

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 2 | January 21, 1924 | Number 2

ORGANIZATION IS ESSENTIAL, SAYS PRES. THOMPSON

Efficient Production Alone Will Not Solve Farm Problems Is Opinion of I. A. A. Chief

"Future progress of agriculture depends today more than at any time in the history of our country on strong organization of farmers," said President S. H. Thompson in his address at the opening of the ninth annual meeting of the I. A. A. at Galesburg, Jan. 16. "Efficient production alone will not solve the present day problems.

"We must put agriculture on a sound basis, on equal footing with every other successful business of our country. If we would keep our children on the farm and continue the business, we must put agriculture on a substantial paying basis that will bring returns that are satisfactory so that they can make the home and farm attractive and really worth while for the best of men.

S. H. Thompson

Farm Bureau Won Voice.

"We have through the efforts of the farm bureau, won a voice in the affairs of county, state, and nation and have been instrumental in securing the passage of constructive legislation that will help the farmer to get his business on an equal basis enjoyed by the other businesses of the country and thus have opened the way for cooperative effort, making it possible for him not only to produce efficiently, but also to join with

John Had Talk All Ready But Censors Didn't Approve It

John C. Watson, Director of Taxation for the I. A. A. was scheduled to tell the world about "Taxation as a Farm Bureau Project," over the American Farm Bureau radio from Station KYW, Chicago, January 4, but his manuscript, prepared in advance, was rejected as "political" by KYW censors. Station KYW is owned and controlled by the Westinghouse corporation. If you want a copy of John's "censored" talk, write the I. A. A.

Annual Meeting Report

As the Record goes to press on the eve of the ninth annual meeting, advance copies of several addresses have been secured and are summarized in this issue. The next issue of the Record will contain further report of this meeting.

Series of Shipping Association Schools To Start on Feb. 12

Farm advisers, directors, managers, and members of livestock shipping associations are invited to attend one-day shipping association schools in their districts, which will be held starting February 12, by the I. A. A., College of Agriculture, and National Live Stock Producers Association, cooperating.

The discussions will be led by C. A. Stewart and L. J. Quasey of the I. A. A.; E. T. Robbins and V. Vaniman of the College of Agriculture; and F. M. Simpson, general manager of the National Producers. The managers of each of the four Producers selling agencies at Chicago, Peoria, E. St. Louis, and Indianapolis will attend the schools in their respective territories and the three I. A. A. fieldmen, F. H. Kelley, R. B. Orndorff, and I. C. Grimes will divide their time between the meetings.

The schools are scheduled as follows: Olney, Feb. 12; Carbondale, Feb. 13; Centralia, Feb. 14; Springfield, Feb. 19; Decatur, Feb. 20; Gilman, Feb. 21; Galesburg, Feb. 26; Dixon, Feb. 27; and Chicago, Feb. 28.

Uniform Purchase Plans Being Made For Limestone

Two more district meetings have been held to discuss plans for the future purchase of limestone on a uniform basis among the county farm bureaus, according to J. R. Bent, Director of the Phosphate-Limestone Department. A meeting was held at Joliet on January 9, and one was planned for Galesburg on January 17 in connection with the annual meeting.

One is planned for Southern Illinois on February 6, at Centralia.

Mr. Bent states that the statewide conference which representatives selected at the district meetings will attend, will probably be held at Springfield, February 20 and 21.

"The meetings are evidencing that the use of limestone is rapidly increasing in all parts of the state, especially in the northern and central parts," Mr. Bent says.

UP TO BAT WITH 1924

Secretary Fox Charts New Year's Program of Work

In his address at the ninth annual meeting, Secretary George A. Fox reviewed and discussed the work of the past five years. He pointed to the failures and strongholds, and made recommendations for the future.

Following are a few outstanding things said by Mr. Fox:

Cooperative Marketing

"We have had four years of intensive experience with marketing problems, some satisfactory and some not. We may become discouraged and overwhelmed or we may capitalize upon our mistakes and make them serve us. The greatest obstacle to overcome at this time is the strife over leadership.

Livestock Marketing

"Where possible livestock shipping associations membership should be confined to farm bureau membership and a differential charge be made for handling in favor of members. Each association would profit by requiring its members to enter into a binding agreement which will be just and fair and at the same time secure the maximum efficiency. Boards of directors need control. Managers need not fear this control. The members do need to fear the lack of control by a board of directors. Well-established locals are the guarantee of successful terminals.

Grain Marketing

"If Illinois is willing to accept U. S. Grain Growers' obligations in Illinois as Illinois obligations, and no longer regard them as obligations of the national institution, then Illinois may contemplate a state grain marketing program. The resolution passed by the midwest presidents and secretaries in July and later approved by the A. F. B. F. Executive Committee is the best expression of a national policy that has been put forward.

"The National Wheat Committee and the U. S. Grain Growers have not defined their position with reference to this resolution. Until the policy of these two organizations are made clear and points of antagonism between the two removed, there can be no national program upon which Illinois can embark with safety without first accepting that the U. S. Grain Growers obligations in Illinois are state obligations, and thereby assuming the hazard of impairing, if not destroying, the

FORWARD! FARM BUREAU!

Five years ago this month, at the reorganization meeting of the Illinois Agricultural Association at Peoria, 108 farm bureau leaders each signed notes of $300.00 to underwrite the organization.

Today the balance sheet of the association, certified by public accountants, shows a net worth of $214,293. Of that amount some $150,000 is in cash and Government securities.

On another page of this issue is the complete balance sheet accompanied by an explanation.

Collection of Dues

County farm bureaus collected $353,369 in past due joint membership dues in 1923. Past due membership fees are fees which have not been paid to the expiration of the membership. Joint membership means membership in the county farm bureau and I. A. A. This collection of past due membership dues in 1923 is $118,000 more than was collected in past dues in 1922.

The current collections have also improved this year. In 1922 sixty per cent of the current dues were paid up. In 1923 the percentage of current collections reached 78.5.

—o—

1923 BOX SCORE

Here are some of things that the farm bureau, county and state organizations, have helped to bring about in 1923:

Over 20,000 carloads of livestock with a gross value of $25,000,000 were shipped through Illinois shipping associations in the year. The I. A. A. assisted in the incorporation of 38 associations. Three field men are working in Illinois for Livestock Producers Commission companies under the direction of the I. A. A. Ninety-two counties are served by one or more shipping associations.

A law was enacted prohibiting the manufacture and sale of filled milk in Illinois and another law prohibits the use of dairy terms and pictures in advertising substitutes for dairy products.

Forty-seven counties purchased rock phosphate through the I. A. A. in the year.

The Transportation Department handled 431 traffic problems for members in the year, and collected 349 railroad claims amounting to $9,544. The membership was represented in eighty hearings and conferences on transportation problems.

The 200,000 pounds of wool in the I. A. A. pool in 1923, which is an increase of 52,000 pounds over 1922, netted six cents a pound more than average local prices paid.

Three laws were enacted in the year appropriating $1,000,000 for eradication of bovine tuberculosis. Forty-six counties have employed veterinarians for area tuberculosis testing. Ten counties have tuberculosis vigilance committees and fifteen counties have offered rewards to apprehend violators of tuberculosis regulations and laws.

The reduction in taxes on farm land for both county and state purposes in 1923 as compared with 1922 is estimated at $2,000,000. The reduction on farm land taxes since 1920, when the farm bureau first started work on the problem, is estimated at $3,963,733.

In the year farm bureaus ordered 275,000 tons of agricultural limestone. The I. A. A. sampled and analyzed the product of 31 commercial quarries producing and selling limestone.

Illinois cooperative dairy associations sold $4,900,000 worth of products in 1923. The I. A. A. rendered service to 20 cooperative dairy associations in the year.

Thirty-one county farm bureaus purchased 18,000,000 cubic centimeters of anti-hog cholera serum in the year, at a cost of 75 cents per hundred.

—o—

ACCOUNTING FOR CO-OPS

"Farmers' cooperatives simply must have correct accounting and authoritative auditing or their officers and directors are blindly exercising their trusteeship." That is what George E. Frazer, a man of wide experience in the business world, said at the annual meeting. They must get good accounting and good auditing for the protecting of their members or, like other public institutions, the state must step in and regulate them, Mr. Frazer stated.

It was the recognition of the need for better accounting that brought about the legislation in Minnesota under which an accounting division for cooperative marketing was established in the State Department of Agriculture, said George Wicker at another time during the meeting.

When talking about cooperative dairy organizations, Secretary George A. Fox made the statement that every failure is traceable directly or indirectly to faulty accounting and lack of financial control.

—o—

LET'S NOT FORGET TO PLAY

Forget the business problems for a few minutes and read what Benjamin Darrow said at the annual meeting:

"There is a crushing poverty in playless lives. As the relatives and friends have stood in sorrow on the porch of some farm home, the iron hearse has crunched the gravel of the driveway loudly and it has come to carry away the body of a man who should have given ten or twenty years more of his accumulated wisdom and ability and love to his family. He robbed God of many years more of service on earth. His epitaph should be, 'He Forgot To Play.'

"Young people are not the only ones who need more social enjoyment.

"Choring by lantern light has cost the farmer as much as it has made him.

"Laughter wipes away the worries and music soothes the heartaches."

It is startling to hear this kind of talk in the midst of an annual meeting loaded with problems of cooperative marketing, legislation, taxation and so on. But it is easy to recognize what Mr. Darrow is talking about, and if we will admit it, the most of us are guilty.

Mr. Darrow's remedy is a community club, filled with good times.

—o—

STABILIZING LIVESTOCK MARKETS

The big ultimate aim of the National Livestock Producers Association is to stabilize markets, to cut out gluts and lean runs. Before very much can be done in regulating the flow of livestock to market, the Producers commission associations must have a big volume of the business, and before Producers can get a big volume of business they must sell to the satisfaction of their customers.

A few days ago the Chicago Producers Commission Association reported an increase in business of 133 per cent in cattle, 111 per cent in hogs and 239 per cent in sheep, for the last six months in 1923 as compared with the same period in 1922. The Chicago Producers handled 15,855 carloads of livestock in 1923.

The success of Producers livestock commission companies cannot be measured by the size of the dividend declared, but a big dividend does denote efficiency. The association at E. St. Louis announces a dividend of $80,000.

—o—

SANGAMON FIGURES TAX CUT

The Sangamon County Farm Bureau selected 34 farms of 80 acres each at random from 17 townships in the county. It found that the county tax for the 34 farms in 1923 was $980.46, and in 1924 the county tax will be $816.60 for the 34 farms, or a reduction of six cents per acre. It concludes that this reduction applied to the 500,000 acres of farm lands in the county would make a total saving of $30,000.

The assessed valuation of these 34 farms in 1923 was a total of $152,230, and in 1924, $107,120, a difference of $45,110 on the 2,720 acres in these farms, or about $16.50 per acre. This reduction in valuation, applied to the 500,000 acres of the county would be a total reduction in valuation of $8,250,000. Applying the 1924 state tax rate of 50 cents a hundred to this reduction makes a saving of $40,125.

The Sangamon County Farm Bureau concludes that the saving in county taxes is equal to 2,000 farm bureau memberships of $15.00 each, and the saving in state taxes is equal to 2,675 farm bureau memberships.

—o—

EGGS ARE EGGS IN ILLINOIS

With the view of finding out what Illinois farmers can do to better the marketing of poultry and eggs, the I. A. A. sent one of its men to investigate cooperative marketing organizations in the west and south.

After probing into the affairs of marketing organizations in nine states and asking questions of their competitors, the investigator comes to the conclusion that grading of eggs according to quality and appearance is the most important thing which cooperative marketing is giving to egg producers.

Eggs are eggs in Illinois. The good ones, often the bad ones, the white ones, the brown ones, the speckled ones, the dirty ones, the big ones and the little ones, are all sold or traded for groceries at th ne price per dozen. But before they reach th rket, the big eastern market, all of the eggs ar dled and graded. Country egg shippers an mmission buyers in the terminal markets th ut piles of bad eggs that farmers were paid fo

l on't think for a minute you slipped anythi over on the commission man. As well as throwing out some bad eggs the commission man has many eggs that are of the best grade and they are sold for a whole lot more than the producer received. Car lot buyers of eggs in the country have told our investigator that a good share of their profit is in grading.

The consumer demands uniform grade, high quality eggs and he gets them and pays for them, but the producer does not furnish them, nor does he get paid for them. Most eggs are not sold by grade and quality in Illinois. The man who has good quality eggs has no advantage when selling to his grocer or huckster over the man who cares little about quality. There is no incentive to the producer to better the quality. The I. A. A. is working on this problem.

I. A. A. NET WORTH TOTALS $214,293

(Continued from page 1)

holdings in United States liberty bonds and treasury notes from $80,000 to $120,000, par value. The item is shown on the balance sheet as $119,202.82 which represents the 'book value' or cost to the association.

"The U. S. government bonds and treasury notes are 'bearer' securities, coupon form. They are held as the property of the association, in safe-keeping in the vaults of one of the large Chicago banks, so appearing on their books. The bank has issued to the association safe-keeping receipts for the securities as purchased by the association. The safe-keeping receipts are in turn deposited in a safe deposit box by the treasurer of the association. Access to the safe deposit box referred to is had only by your treasurer and in the presence of one of the several designated representatives of the fidelity and surety company who have bonded the treasurer of your association.

Securities Safeguarded

"The fidelity and surety company keep an accurate list of the contents of the box, noting all additions and withdrawals. This protective feature, properly restricting access to the box, is entirely self-imposed by the present incumbent. It has been accepted by your Executive Committee as a permanent policy of the association by resolution addressed to the Safe Deposit Vaults Company. No deviation in any particular from this policy in the future should ever be made except to further strengthen its protective features, if possible. It is fully as important to the membership of this association, or any organization, to know that its securities are properly safeguarded, as it is to know of what they consist and the amount thereof. The interest coupons are clipped by the bank as they mature and its cashier's draft remitted to the association to cover.

Long Term Loans

"Under 'long term loans,' are listed advances to affiliated organizations. These advances are evidenced by six and twelve month notes, but in practice must be paid out of income or through possible refinancing. Liberal reserves have been set up for possible losses in these items.

"The 'liquid' assets of the association are represented in 'Cash on Hand and in Bank' and 'U. S. Government Liberty Bonds and Treasury Notes'—a substantial sum, immediately available, and in very favorable ratio to current liabilities."

Malone Appointed Head of Illinois Tax Commission

Wm. H. Malone, Cook county, has been appointed as head of the State Tax Commission by the Governor. Mr. Malone has been friendly to the I. A. A. and county farm bureaus in their fight for equalized tax valuations. It will be remembered that he severely flayed the chairman of the commission in October when the latter failed to order reassessments in the seven counties where the local boards failed to equalize, after the tax body had promised the I. A. A. that reassessments would be ordered.

E. St. Louis Co-op Plans To Refund $80,000 Earnings

The Producers Live Stock Commission Association of E. St. Louis will refund more than $80,000 saved this year in commissions on livestock sales made for its members, according to H. D. Wright, manager, who made his report at the annual meeting of the association, January 15.

This saving is made in spite of the fact that the agency reduced its rates during the year 20 per cent from those generally saved, thus effecting additional saving. Approximately 450 shipping associations are members of the agency.

Metzger and Cowles To Represent I.A.A. At Regional Meeting

G. E. Metzger, Director of Organization, and R. A. Cowles, Director of Finance, will represent the I. A. A. at a regional conference of organization workers at Lansing, Mich., February 21 and 22. The A. F. B. F. has called the conference and organization and collection programs will be considered.

Representatives from the Ohio, Michigan, Indiana, Illinois and Wisconsin state farm bureaus have been invited to the conference.

THOMPSON SPEAKS ON ORGANIZATION

(Continued from page 1)

his neighbor in the marketing of farm products.

"Up to the present time, farmers could never conscientiously say that they have really had any influence to make a higher or a lower market for any farm products. The only influence that has really created higher or lower markets has been droughts, freeze-outs, war, failures in other countries or something over which they have never had any control themselves.

All Join Together.

"There is no business that could successfully thrive if it could not have anything to say as to what the price of the commodity or production of the factory was to bring. The time has come when farmers of this country, if they are going to put their business on a substantial basis, must join themselves together in a strong organization, thus affording an opportunity to study the markets as to scope and supply and demand, and to use the same business intelligence to the distribution of the products of the farm as every other line of business is doing today.

"The future of our organization depends on the hearty and loyal support of the members back on the farms."

Start Co-op Accounting Or State Must Step In--Frazer

Illinois now has over 1,000 co-operatives in active business and the time is now at hand for these cooperatives to organize a central auditing service of their own, said Geo. A. Fraser, Consulting Accountant of the I. A. A., at the annual meeting where he talked on the subject, "Financial Responsibilities for Farmers' Cooperatives."

George Wicker

"These cooperatives should have established standards of business practice set forth in the form of a uniform bookkeeping system," declared Mr. Fraser. "They should also have authoritative auditing conducted by the leaders among the cooperatives and not merely casual and private auditing under the control of those audited.

A Business Corporation.

"A farmers' cooperative is first, last, and all of the time a business corporation. The fact that it is cooperative does not change any of the fundamental laws of economics and trusteeship that apply to all business corporations. Farmers' cooperatives simply must have correct accounting and authoritative auditing or else their directors and officers are blindly exercising their trusteeships.

"The cooperative is a public institution in the same category as the bank or the insurance company. Banks and insurance companies are under the strict regulations of state laws. They must make detailed financial statements under oath to state officers and must submit to inquisitorial state audits. It is to the credit of banks and insurance companies generally that in addition to state examinations, they insist upon outside auditors employed by themselves.

State May Step In.

"Farmers' cooperatives must get good accounting and good auditing for the protection of their members or else, like other public institutions, the state must step in and regulate them. There is no more reason for a farmer losing money in a cooperative because of the lack of proper accounts and proper audits, than there would be for a farmer to lose money in a savings bank because of the lack of proper accounts and proper audit."

Mr. Fraser suggested that the directors and officers of Illinois farmers' cooperatives would do better to organize an authoritative accounting and auditing service of their own rather than to depend upon casual private auditors on the one hand or upon inquisitorial state auditors acting under laws as the other alternative.

Could Exchange Experience

"With an authoritative central auditing service established by the cooperatives themselves, the leaders of the cooperative movement can exchange comparative statistics as to costs and margins of savings," declared Mr. Fraser. "Such information would be immensely valuable to the new and unsuccessful cooperatives and would be a fair contribution to the cause from the successful cooperatives."

Mr. Fraser closed by declaring that a man has as much right to protection when he invests his crops in a cooperative elevator or creamery as if he invested his money in a savings bank or in buying securities approved under the Blue Sky Laws of Illinois. This can only be assured when directors and officers of cooperatives actually put into practice good bookkeeping and accounting methods, he said.

Wicker Speaks

"In cooperative companies not large enough to employ a competent bookkeeper, the manager is generally required to perform all the duties," said George Wicker, who is in charge of cooperative accounting for the Minnesota Department of Agriculture. "Often the manager has no knowledge of bookkeeping and the records will be inadequate.

State Control in Minnesota

"It was the recognition of this condition that brought about the legislation under which an accounting division for cooperative associations was established in the Minnesota Department of Agriculture. The development of cooperative business will require managers specially trained in business practice, accounting, and a knowledge of the essentials of cooperation."

ILLINOIS AGRICULTURAL ASSOCIATION
BALANCE SHEET—AT DECEMBER 31, 1923

FORWARD! FARM BUREAU!

Five years ago this month, at the reorganization meeting of the Illinois Agricultural Association at Peoria, 108 farm bureau leaders each signed notes of $300.00 to underwrite the organization.

Today the balance sheet of the association, certified by public accountants, shows a net worth of $214,293. Of that amount some $150,000 is in cash and Government securities.

On another page of this issue is the complete balance sheet accompanied by an explanation.

Collection of Dues

County farm bureaus collected $353,369 in past due joint membership dues in 1923. Past due membership fees are fees which have not been paid to the expiration of the membership. Joint membership means membership in the county farm bureau and I. A. A. This collection of past due membership dues in 1923 is $118,000 more than was collected in past dues in 1922.

The current collections have also improved this year. In 1922 sixty per cent of the current dues were paid up. In 1923 the percentage of current collections reached 78.5.

—o—

1923 BOX SCORE

Here are some of things that the farm bureau, county and state organizations, have helped to bring about in 1923:

Over 20,000 carloads of livestock with a gross value of $25,000,000 were shipped through Illinois shipping associations in the year. The I. A. A. assisted in the incorporation of 38 associations. Three field men are working in Illinois for Livestock Producers Commission companies under the direction of the I. A. A. Ninety-two counties are served by one or more shipping associations.

A law was enacted prohibiting the manufacture and sale of filled milk in Illinois and another law prohibits the use of dairy terms and pictures in advertising substitutes for dairy products.

Forty-seven counties purchased rock phosphate through the I. A. A. in the year.

The Transportation Department handled 431 traffic problems for members in the year, and collected 349 railroad claims amounting to $9,544. The membership was represented in eighty hearings and conferences on transportation problems.

The 200,000 pounds of wool in the I. A. A. pool in 1923, which is an increase of 52,000 pounds over 1922, netted six cents a pound more than average local prices paid.

Three laws were enacted in the year appropriating $1,000,000 for eradication of bovine tuberculosis. Forty-six counties have employed veterinarians for area tuberculosis testing. Ten counties have tuberculosis vigilance committees and fifteen counties have offered rewards to apprehend violators of tuberculosis regulations and laws.

The reduction in taxes on farm land for both county and state purposes in 1923 as compared with 1922 is estimated at $2,000,000. The reduction on farm land taxes since 1920, when the farm bureau first started work on the problem, is estimated at $3,963,733.

In the year farm bureaus ordered 275,000 tons of agricultural limestone. The I. A. A. sampled and analyzed the product of 31 commercial quarries producing and selling limestone.

Illinois cooperative dairy associations sold $4,900,000 worth of products in 1923. The I. A. A. rendered service to 20 cooperative dairy associations in the year.

Thirty-one county farm bureaus purchased 18,000,000 cubic centimeters of anti-hog cholera serum in the year, at a cost of 75 cents per hundred.

—o—

ACCOUNTING FOR CO-OPS

"Farmers' cooperatives simply must have correct accounting and authoritative auditing or their officers and directors are blindly exercising their trusteeship." That is what George E. Frazer, a man of wide experience in the business world, said at the annual meeting. They must get good accounting and good auditing for the protecting of their members or, like other public institutions, the state must step in and regulate them, Mr. Frazer stated.

It was the recognition of the need for better accounting that brought about the legislation in Minnesota under which an accounting division for cooperative marketing was established in the State Department of Agriculture, said George Wicker at another time during the meeting.

When talking about cooperative dairy organizations, Secretary George A. Fox made the statement that every failure is traceable directly or indirectly to faulty accounting and lack of financial control.

—o—

LET'S NOT FORGET TO PLAY

Forget the business problems for a few minutes and read what Benjamin Darrow said at the annual meeting:

"There is a crushing poverty in playless lives. As the relatives and friends have stood in sorrow on the porch of some farm home, the iron hearse has crunched the gravel of the driveway loudly and it has come to carry away the body of a man who should have given ten or twenty years more of his accumulated wisdom and ability and love to his family. He robbed God of many years more of service on earth. His epitaph should be, 'He Forgot To Play.'

"Young people are not the only ones who need more social enjoyment.

"Choring by lantern light has cost the farmer as much as it has made him.

"Laughter wipes away the worries and music soothes the heartaches."

It is startling to hear this kind of talk in the midst of an annual meeting loaded with problems of cooperative marketing, legislation, taxation and so on. But it is easy to recognize what Mr. Darrow is talking about, and if we will admit it, the most of us are guilty.

Mr. Darrow's remedy is a community club, filled with good times.

—o—

STABILIZING LIVESTOCK MARKETS

The big ultimate aim of the National Livestock Producers Association is to stabilize markets, to cut out gluts and lean runs. Before very much can be done in regulating the flow of livestock to market, the Producers commission associations must have a big volume of the business, and before Producers can get a big volume of business they must sell to the satisfaction of their customers.

A few days ago the Chicago Producers Commission Association reported an increase in business of 133 per cent in cattle, 111 per cent in hogs and 239 per cent in sheep, for the last six months in 1923 as compared with the same period in 1922. The Chicago Producers handled 15,855 carloads of livestock in 1923.

The success of Producers livestock commission companies cannot be measured by the size of the dividend declared, but a big dividend does denote efficiency. The association at E. St. Louis announces a dividend of $80,000.

—o—

SANGAMON FIGURES TAX CUT

The Sangamon County Farm Bureau selected 34 farms of 80 acres each at random from 17 townships in the county. It found that the county tax for the 34 farms in 1923 was $980.46, and in 1924 the county tax will be $816.60 for the 34 farms, or a reduction of six cents per acre. It concludes that this reduction applied to the 500,000 acres of farm lands in the county would make a total saving of $30,000.

The assessed valuation of these 34 farms in 1923 was a total of $152,230, and in 1924, $107,120, a difference of $45,110 on the 2,720 acres in these farms, or about $16.50 per acre. This reduction in valuation, applied to the 500,000 acres of the county would be a total reduction in valuation of $8,250,000. Applying the 1924 state tax rate of 50 cents a hundred to this reduction makes a saving of $40,125.

The Sangamon County Farm Bureau concludes that the saving in county taxes is equal to 2,000 farm bureau memberships of $15.00 each, and the saving in state taxes is equal to 2,675 farm bureau memberships.

holdings in United States liberty bonds and treasury notes from $80,000 to $120,000, par value. The item is shown on the balance sheet as $119,302.82 which represents the 'book value' or cost to the association.

"The U. S. government bonds and treasury notes are 'bearer' securities, coupon form. They are held as the property of the association, in safe-keeping in the vaults of one of the large Chicago banks, so appearing on their books. The bank has issued to the association safe-keeping receipts for the securities as purchased by the association. The safe-keeping receipts are in turn deposited in a safe deposit box by the treasurer of the association. Access to the safe deposit box referred to is had only by your treasurer and in the presence of one of the several designated representatives of the fidelity and surety company who have bonded the treasurer of your association.

Securities Safeguarded

"The fidelity and surety company keep an accurate list of the contents of the box, noting all additions and withdrawals. This protective feature, properly restricting access to the box, is entirely self-imposed by the present incumbent. It has been accepted by your Executive Committee as a permanent policy of the association by resolution addressed to the Safe Deposit Vaults Company. No deviation in any particular from this policy in the future should ever be made except to further strengthen its protective features, if possible. It is fully as important to the membership of this association, or any organization, to know that its securities are properly safeguarded, as it is to know of what they consist and the amount thereof. The interest coupons are clipped by the bank as they mature and its cashier's draft remitted to the association to cover.

Long Term Loans

"Under 'long term loans,' are listed advances to affiliated organizations. These advances are evidenced by six and twelve month notes, but in practice must be paid out of income or through possible refinancing. Liberal reserves have been set up for possible losses in these items.

"The 'liquid' assets of the association are represented in 'Cash on Hand and in Bank' and 'U. S. Government Liberty Bonds and Treasury Notes'—a substantial sum, immediately available, and in very favorable ratio to current liabilities."

Malone Appointed Head of Illinois Tax Commission

Wm. H. Malone, Cook county, has been appointed as head of the State Tax Commission by the Governor. Mr. Malone has been friendly to the I. A. A. and county farm bureaus in their fight for equalized tax valuations. It will be remembered that he severely flayed the chairman of the commission in October when the latter failed to order reassessments in the seven counties where the local boards failed to equalize, after the tax body had promised the I. A. A. that reassessments would be ordered.

E. St. Louis Co-op Plans To Refund $80,000 Earnings

The Producers Live Stock Commission Association of E. St. Louis will refund more than $80,000 saved this year in commissions on livestock sales made for its members, according to H. D. Wright, manager, who made his report at the annual meeting of the association, January 15.

This saving is made in spite of the fact that the agency reduced its rates during the year 20 per cent from those generally saved, thus effecting additional saving. Approximately 450 shipping associations are members of the agency.

Metzger and Cowles To Represent I.A.A. At Regional Meeting

G. E. Metzger, Director of Organization, and R. A. Cowles, Director of Finance, will represent the I. A. A. at a regional conference of organization workers at Lansing, Mich., February 21 and 22. The A. F. B. F. has called the conference and organization and collection programs will be considered.

Representatives from the Ohio, Michigan, Indiana, Illinois and Wisconsin state farm bureaus have been invited to the conference.

THOMPSON SPEAKS ON ORGANIZATION

(Continued from page 1)

his neighbor in the marketing of farm products.

"Up to the present time, farmers could never conscientiously say that they have really had any influence to make a higher or a lower market for any farm products. The only influence that has really created higher or lower markets has been droughts, freeze-outs, war, failures in other countries or something over which they have never had any control themselves.

All Join Together.

"There is no business that could successfully thrive if it could not have anything to say as to what the price of the commodity or production of the factory was to bring. The time has come when farmers of this country, if they are going to put their business on a substantial basis, must join themselves together in a strong organization, thus affording an opportunity to study the markets as to scope and supply and demand, and to use the same business intelligence to the distribution of the products of the farm as every other line of business is doing today.

"The future of our organization depends on the hearty and loyal support of the members back on the farms."

Start Co-op Accounting Or State Must Step In--Frazer

Illinois now has over 1,000 co-operatives in active business and the time is now at hand for these cooperatives to organize a central auditing service of their own, said Geo. A. Fraser, Consulting Accountant of the I. A. A., at the annual meeting where he talked on the subject, "Financial Responsibilities for Farmers' Cooperatives."

George Wicker

"These cooperatives should have established standards of business practice set forth in the form of a uniform bookkeeping system," declared Mr. Fraser. "They should also have authoritative auditing conducted by the leaders among the cooperatives and not merely casual and private auditing under the control of those audited.

A Business Corporation.

"A farmers' cooperative is first, last, and all of the time a business corporation. The fact that it is cooperative does not change any of the fundamental laws of economics and trusteeship that apply to all business corporations. Farmers' cooperatives simply must have correct accounting and authoritative auditing or else their directors and officers are blindly exercising their trusteeships.

"The cooperative is a public institution in the same category as the bank or the insurance company. Banks and insurance companies are under the strict regulations of state laws. They must make detailed financial statements under oath to state officers and must submit to inquisitorial state audits. It is to the credit of banks and insurance companies generally that in addition to state examinations, they insist upon outside auditors employed by themselves.

State May Step In.

"Farmers' cooperatives must get good accounting and good auditing for the protection of their members or else, like other public institutions, the state must step in and regulate them. There is no more reason for a farmer loeing money in a cooperative because of the lack of proper accounts and proper audits, than there would be for a farmer to lose money in a savings bank because of the lack of proper accounts and proper audit."

Mr. Fraser suggested that the directors and officers of Illinois farmers' cooperatives would do better to organize an authoritative accounting and auditing service of their own rather than to depend upon casual private auditors on the one hand or upon inquisitorial state auditors acting under laws as the other alternative.

Could Exchange Experienc

"With an authoritative central auditing service established by the cooperatives themselves, the leaders of the cooperative movement can exchange comparative statistics as to costs and margins of savings," declared Mr. Fraser. "Such informtaion would be immensely valuable to the new and unsuccessful cooperatives and would be a fair contribution to the cause from the successful cooperatives."

Mr. Fraser closed by declaring that a man has as much right to protection when he invests his crops in a cooperative elevator or creamery as if he invested his money in a savings bank or in buying securities approved under the Blue Sky Laws of Illinois. This can only be assured when directors and officers of cooperatives actually put into practice good bookkeeping and accounting methods, he said.

Wicker Speaks

"In cooperative companies not large enough to employ a competent bookkeeper, the manager is generally required to perform all the duties," said George Wicker, who is in charge of cooperative accounting for the Minnesota Department of Agriculture. "Often the manager has no knowledge of bookkeeping and the records will be inadequate.

State Control in Minnesota

"It was the recognition of this condition that brought about the legislation under which an accounting division for cooperative associations was established in the Minnesota Department of Agriculture. The development of cooperative business will require managers specially trained in business practice, accounting, and a knowledge of the essentials of cooperation."

ILLINOIS AGRICULTURAL ASSOCIATION

PLAY IS MISSING PART OF FARM RATION—DARROW

Hogs Root For Missing Elements, So Do Young Folks, Says Ohio Speaker

The big need of the countryside today is play and it is high time that we give the matter serious attention, declared Benjamin H. Darrow, secretary of the county Y. M. C. A., Ravenna, Ohio, in his address before the I. A. A. annual meeting, "Organizing Community Centers."

B. H. Darrow

"Hogs root for the missing elements of food in their ration," Mr. Darrow said." Young people, too, root for missing elements. If their own community does not provide a balanced ration, they go elsewhere for the missing elements, usually entertainment, and frequently overeat. Or if the social events of their community are weak and uninteresting third rate affairs, they know it.

Older People Too

"Young people are not the only ones who need more of the fats of social enjoyment," continued Mr. Darrow. "There is a crushing poverty in playless lives. Too many folks rob themselves and their families of many of the best things of life because they forget to play.

"Why do the young people desert their community for the city to get their entertainment?" asked the speaker. "Because it is more interesting and, shame to admit it, sometimes because their own community offers nothing of a social or entertainment nature.

It can be done

"To revive enthusiasm in some communities is like trying to start a fire with wet wood. But it can be done. Many a man and woman has given up the task in disgust these last few years. The farm bureau program itself falls far short of its possibilities because township meetings are poorly attended. Leadership in the country is really good, but the followership is terrible. There is no question but that the time is here when farming must have more brains and less brawn in the 'brains and brawn mixture.' And chorning by lantern light has cost the farmer as much as it has made him.

Wipes away the Worries

"Laughter wipes away the worries and music soothes the heartaches. Three or four times a winter every community ought to have a social in which the feature is music. Stunt nights as a feature of community entertainment are valuable. I fully expect to see the time when farmers generally will play just as the business man in the city."

FRUIT GROWERS TO REORGANIZE UNDER CO-OP ACT

"Illinois Fruit Growers Exchange" Will Be Name; Member Campaign To Start Soon

A meeting of the Fruit and Vegetable Marketing Advisory Committee of the I. A. A., officers and directors of the Illinois Fruit Exchange, and several large fruit growers took action to organize a non-stock, non-profit cooperative organization under the Illinois Cooperative Marketing Act to be incorporated as the "Illinois Fruit Growers Exchange," at Centralia, January 5.

The new organization will be, in effect, a continuation of the Illinois Fruit Exchange. However, the latter will not liquidate until some future date, due to unexpired marketing contracts, railroad claims, and present duties and obligations to its members.

Organization under new uniform five-year contracts will be started at an early date under the direction of the Illinois Fruit Growers Exchange and the Fruit and Vegetable Marketing Department of the Illinois Agricultural Association.

The decision to reorganize the Illinois Fruit Exchange has been the result of much thought and study on the part of officials of the exchange. Considerable expansion of the organization was felt necessary and there are many limitations which prevent the Exchange from expanding as it is now organized.

Want R. R. Fences Repaired? I. A. A. Helped This Man

"Let us know if railroad fences are defective," said the I. A. A. Transportation Department's ad in the December 5 issue of the Record. Immediately on receipt of the issue, Chas. R. Birkenmayer, Macoupin county, wrote to the I. A. A. and said that the fence along the C. P. & St. L. railroad adjoining his pasture was badly in need of repair and he wished that the department could at least persuade the railroad to set the posts if he furnished them.

The Transportation Department took the matter up with the C. P. & St. L. general manager. On December 29, the latter wrote: "We have set the posts for Mr. Birkenmayer, furnished wire and staples and he is to do the balance of the work."

And Mr. Birkenmayer wrote to the I. A. A.: "I want to thank you for your efforts with the C. P. & St. L. railroad in having them repair their fence along our land. I think it was a nice favor of you and I truly appreciate it."

JENKINS RESIGNS TO ENTER IN RACE FOR U. S. SENATOR

Restoration of Agriculture Will Be the Paramount Issue

The request of Newton Jenkins, recently announced candidate for United States Senator, to be relieved as legal counsel for the Illinois Agricultural Association was accepted by the executive committee at the January 11 meeting.

In a resolution to Mr. Jenkins the committee stated that the principles of the Association are such that anyone connected with its administrative affairs cannot be a candidate for public office at the same time. The committee extended appreciation of the efficient service rendered to the association and for the courteous manner in which all requests have been handled.

"I am entering the Republican primaries as a candidate for United States Senator," Mr. Jenkins states in his letter to the association.

Agriculture Paramount

"While I expect to appeal to every element of the state's citizenship, Mr. Jenkins continues," the restoration of agriculture will be a paramount issue of my campaign. This issue, of course, is quite non-partisan and I shall do my utmost to carry my message to the farmers in every section of the state."

"We Call Them Cheap Screws Down In Egypt"

"I have been reading my I. A. A. Record and find many good things in it for me that I have helped to do by belonging to the farm bureau," writes Arthur J. Casper, Johnson county. "These things have helped others that don't belong just as well, and won't belong as long as they can reap the harvest without belonging. We call them 'cheap screws' down here in Egypt.

"I am well pleased with what the I. A. A. has done for us. Without organization, we are as far as we can ever expect to get. With organization we can adjust the lid to the lunch box at any degree we desire to fit the agricultural conditions of our country.

"In our drive for membership in December, 1923, we lost more, I think, than we gained. Those we lost were mostly trouble-makers. Those we gained were men that have been reading and making a study of the farm bureau. Not such a bad loss but a better gain."

Mr. Casper asked for 50 January 5, I. A. A. Records to hand out to some of his neighbors.

CHICAGO LIVESTOCK CO-OP SHOWS GREAT GAIN IN RECEIPTS

Handled Nearly 16,000 Cars In 1923; Sykes Says Big Problem Now Is Orderly Selling

The Chicago Producers Commission Association handled 15,855 cars of livestock in 1923, over 72 per cent of which came from cooperative shipping associations, said S. W. Doty, manager, in his report at the annual meeting of the agency, January 8. There are now over 78,000 individual members of the Chicago Producers.

Big Increase

Mr. Doty's report showed the following increase in receipts of the agency from July through December, 1923, compared with the same months in 1922: cattle, 133 per cent; hogs, 111 per cent; and sheep, 239 per cent.

"The big problem before the Producers selling agencies is orderly marketing," said A. Sykes, Ida Grove, Ia., president of the Chicago Producers, in a talk in which he traced the entire growth of the movement. "Refunds are all right but they are not the big thing. There should be closer cooperation between livestock producers so that the flow of livestock to the market can be regulated."

Re-elect Directors

W. E. Elliott, Williamsfield, Ill., and Frank Coyne, Ida Grove, Ia., were re-elected for three year terms as directors of the Chicago selling agency. They were the only directors whose terms expired.

FOX CHARTS NEW PROGRAM OF WORK

(Continued from Page One)

national confidence upon which a national program must be built.

Dairy Marketing

"Dairymen around both Chicago and St. Louis are in need of reorganization. Dairymen around these two cities will never be able to stabilize prices or enjoy the privilege of permanently being the dominating factor in price control until they make adequate provision for local concentration points to care for surpluses and until they are sufficiently well organized to make an equitable distribution of the losses over all producers involved.

"Dairymen around several other cities are making progress in cooperative marketing. Effective organization around these other cities will help in making a successful organization around Chicago and St. Louis. The most difficult factor in all of these efforts is to secure efficient management. Every failure is traceable directly or indirectly to faulty accounting and lack of financial control.

Poultry.

"Standardizing and grading should receive first attention in the poultry and egg marketing question. If egg exchanges and buyers do not fall in line by recognizing grade through prices paid, cooperative marketing of poultry products must and will force the issue.

Fruits and Vegetables.

"The experience of the Illinois Fruit Exchange points the way to successful marketing of Illinois fruits. This institution, while highly successful, needs to be reorganized and its operations extended and improved so as to include more of the successful fruit growers of the state."

Taxation.

Secretary Fox recommended that active work be started in analyzing revenue expenditures for both country and state purposes and he suggested that the project be taken up by the joint efforts of farm bureaus, chambers of commerce, bankers' associations and other groups of citizens.

"The purpose of this undertaking should not be to interfere with the proper functioning of public officials, but should be conducted for the purpose of securing an intelligent understanding of the use that is being made of public money," Mr. Fox said.

Legislation.

In discussing the legislative policy of the association he said that without facts and careful analysis farmers can not hope to arrive at the sound solution of public questions. "In anticipation of the next session of the Legislature, a careful survey and analysis should be taken of the revenue question, the road program, the school problem and law enforcement measures.

Organization.

"Counties that have well developed community centers are maintaining membership at less cost than counties less thoroughly organized. If we will study and develop local community organization within the county, the next campaign should cost less. This should be undertaken in 1924."

Grading Eggs By Quality Is Essential Says Harper

"Grading by quality is the most important service which cooperative marketing is rendering to egg producers," declares J. D. Harper, who has returned from an investigation of cooperative poultry and egg marketing associations in nine western states and in Canada with the view of working out a policy of poultry and egg marketing suitable for Illinois conditions.

"Standardized p[illegible]ts are essential to prop[illegible] marketing. Marketing associ[illegible] that are paying their me[illegible]s on the basis of grade ar[illegible] ones that are succeeding [illegible]etting the best prices for m[illegible]rs.

"In Utah, p[illegible]rmen were paid five cents pe[illegible]n for eggs in May, 1923. [illegible] producers organized a coo[illegible]ve marketing association [illegible]arch, 1923. They pay by gr[illegible] and quality and sell standa[illegible]d products. They now have 1200 members and sold 160 cars of eggs and 20 cars of poultry in 1923. Nearly a million dollars' worth of business was transacted. In 1922, Utah shipped out only 17 cars of eggs. Seven cars were imported."

Similar success with grading by quality was found by Mr. Harper in Washington, Texas, and British Columbia.

Orderly Marketing

"Cooperative poultry and egg associations are able to bring about orderly marketing," declares Mr. Harper. "The great bulk of eggs is produced during about one third of the year and rushed to market and into storage, bringing prices down. By controlling the product and putting the surplus into storage, producers' associations are letting their eggs on the market as they are needed throughout the fall and winter months. This is one of the big services which most of the egg cooperatives are rendering.

All Get Better Prices

"Producers who belong to marketing associations are not, as a rule, getting any more for their products than non-members are," Mr. Harper says. "But members and non-members alike are getting considerably more than they did before the association existed.

"The independent dealers are paying on a much narrower margin as a result of the competition aroused by producer marketing. This was especially noticeable with the cooperative associations in Washington, California, and Texas. A manager in Washington who had been a private dealer for years said that it might be a good thing if the cooperative ceased to function in order to make all producers realize what it is doing for them."

Good Management

Good management was a very noticeable factor which Mr. Harper noted as a prime necessity of successful poultry and egg marketing associations. Most of the managers whom he met were men who were well grounded in experience and a thorough knowledge of the poultry and egg market.

Volume 2 | February 5, 1924 | Number 3

CO-OPS MUST FILE CLAIMS TO SECURE INCOME TAX REFUND

I. A. A. Is Handling Exemption Evidence To Present To Government

The I. A. A., through its consulting accountant, George E. Frazer, is preparing claims for income tax refund for farmers' cooperative organizations of Illinois upon request from such associations. Claims from a dozen companies have already been turned in to the I. A. A. for collection. All must be filed before March 15, 1924, in order to be eligible to refund.

Income tax exemption for cooperative associations was granted by a ruling of the Internal Revenue Department last September, providing such organizations filed proper evidence to secure refund.

Must File Returns

Mr. Frazer will be glad to analyze the claims of any cooperative organization which will send the I. A. A. by registered and insured mail copies of each of their Federal income tax returns for the years, 1918, 1919, 1920, 1921, and 1922, and also copies of their outside auditor's reports for each of those years. If there is no outside auditor's report on any year, the financial statements and copies of trial balances should be sent.

Cooperatives are not denied exemption because they have accumulated a reasonable reserve for the retirement of bonds, for losses or depreciation, or for the purchase of buildings and machinery. The payment of dividends on stock, which must be held by producers themselves, does not defeat exemption, provided it is reasonable and does not exceed the legal rate of interest of the state.

Corbin Goes To Missouri As Head Of Organization

E. L. Corbin, Macoupin county, took up his new work in Jefferson City, Mo., Jan. 21, as Director of Organization for the Missouri Farm Bureau Federation.

During 1922 and 1923, Mr. Corbin served as I. A. A. executive committeeman from the 21st district. He has also been in the employ of the I. A. A. Organization Department as county organizer in several Illinois counties in 1923.

Marketing Head For A. F. B. F. To Be Chosen Soon

Definite plans to employ a marketing director for the American Farm Bureau Federation were made at the January 24 meeting of the executive committee.

A committee consisting of President Bradfute, A. C. Hardison of California, George M. Putnam of New Hampshire and C. E. Hurst of Iowa, was appointed and authorized to select a marketing head at once. A release from the Federation office states that the selection of a marketing director is expected within a few days.

I. A. A. Asked To Make Milk Survey By Farm Advisers

Asserting their belief that any permanent solution of the problems confronting dairymen in the Chicago dairy district is dependent upon the merchandising of milk on a quality basis so that milk shipped in from a great distance cannot compete with milk produced nearby, seven northern Illinois farm advisers in a meeting at the I. A. A. office on January 26, asked the I. A. A. Dairy Marketing Department to conduct a statistical survey of milk production in the Chicago district.

This survey will determine the amount of milk that is produced from tuberculosis-free herds in each county, the total amount of milk exported from each county for the fluid milk market, and the amount of this volume produced from T. B.-free herds.

Appointment of a committee from the I. A. A. was recommended for the investigation of a plan toward the merchandising of quality milk to come from tuberculosis-free herds only, and to determine the possibilities of selling this milk upon the Chicago market at a premium over the ordinary fluid milk price.

Exchange Ships To 98 Markets In 20 States During 1923

Approximately 600 cars of Illinois fruits and vegetables were shipped by the Illinois Fruit Exchange to 98 markets in 20 states during 1923, according to Manager A. B. Leeper. Distribution was secured through the Federated Fruit and Vegetables Growers, Inc.

States to which shipments went were, Alabama, Arkansas, Connecticut, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Michigan, Minnesota, Mississippi, Missouri, North Dakota, New York, Ohio, Oklahoma, South Dakota, Tennessee, and Wisconsin.

ANOTHER PROBLEM TO UNLOAD

Fine Spirit Features Ninth Annual Meeting

The ninth annual meeting of the I. A. A. was a happy and harmonious gathering in the eyes of your interpreter. In the neighborhood of 800 were in attendance representing 91 counties of the state.

At the opening session the executive committee and employees gathered on the platform. The report of work for the year in booklet form was distributed to all, and on the walls of the hall an array of charts and maps visualized the work and activities of the association.

"Future progress depends largely on members themselves," was the keynote of President Thompson's address. The Secretary's report faced issues squarely, and made definite recommendations. Certainly there was encouragement in the financial report.

A New Spirit

In the evening over 600 banqueted together in the Methodist church, visited and sang songs. It was a high spot of the meeting. Between songs and story telling there was a hum of visiting conversation. It seemed there was something different in the air that evening, a new brand of spirit. Later when the crowd retired to the auditorium, Benjamin Darrow called that something, community spirit.

The Election

The election of officers came after the evening program. There was no hesitation in choosing S. H. Thompson for president. Outside of a little contest on vice-president, the election was quiet.

The scheduled program continued on through the second morning. All of the addresses had quite a definite relation and bearing to the work of the association, although there was little time for discussion. Many people expressed the belief that it was the best speaking program of any annual meeting.

Retain Secretary

The new executive committee lunched together at noon. Their opinion was unanimous in retaining Secretary Fox. It was decided that their first meeting will be held January 31.

After one address on the second afternoon, the reports of the constitution and resolutions committees were accepted with little discussion. A resolution which the

A. F. B. F. GOVERNING BODY O. K.'S FARM RELIEF MEASURE

McNary-Haugen Bill Like Wallace Plan—To Increase Buying Power Of Farmer

The McNary-Haugen bill, farmer relief legislation, designed to establish a fair relationship between what the farmer sells and what he buys, was endorsed by the A. F. B. F. executive committee at its meeting in Chicago, January 21 to 24.

In endorsing the purpose and intent of the bill, a resolution passed by the committee stated, "desiring, however, that the bill be amended in such a way as to be more useful in times of emergency and more available to and in harmony with the purposes of farmers' cooperative marketing associations."

First Relief Legislation

The McNary-Haugen bill is the first relief legislation to receive serious consideration by the farm bureau. It will be remembered that Congressman Dickinson of Iowa endorsed the bill in his address at our annual meeting. Secretary of Agriculture, Henry Wallace urged the enactment of the bill before the senate agricultural committee.

The Purpose

The bill provides for an agricultural export commission and an agricultural export corporation with a capital stock of $200,000,000, to be subscribed by the government.

The purpose of the bill is to promote equality between prices of agricultural products and prices of other commodities. As a basis for comparison the bill stipulates that the price of agricultural com-

Voted Yes or No On Every Issue During 4 Years

For four years Henry McGough of Maple Park, Kane county, served on the executive committee of the I. A. A., and during that time he did not miss one meeting, was not late at one meeting and he voted yes or no on every question before the committee.

Mr. McGough was the unanimous choice of the tenth and eleventh districts on the committee for another year, but he declined to serve. In appreciation of Mr. McGough's faithful service, the voting delegates presented him with a gold watch chain.

PLAY IS MISSING PART OF FARM RATION--DARROW

Hogs Root For Missing Elements, So Do Young Folks, Says Ohio Speaker

The big need of the countryside today is play and it is high time that we give the matter serious attention, declared Benjamin H. Darrow, secretary of the county Y. M. C. A., Ravenna, Ohio, in his address before the I. A. A. annual meeting, "Organizing Community Centers."

B. H. Darrow

"Hogs root for the missing elements of food in their ration," Mr. Darrow said." Young people, too, root for missing elements. If their own community does not provide a balanced ration, they go elsewhere for the missing elements, usually entertainment, and frequently overeat. Or if the social events of their community are weak and uninteresting third rate affairs, they know it.

Older People Too

"Young people are not the only ones who need more of the fats of social enjoyment," continued Mr. Darrow. "There is a crushing poverty in playless lives. Too many folks rob themselves and their families of many of the best things of life because they forget to play.

"Why do the young people desert their community for the city to get their entertainment?" asked the speaker. "Because it is more interesting and, shame to admit it, sometimes because their own community offers nothing of a social or entertainment nature.

It can be done

"To revive enthusiasm in some communities is like trying to start a fire with wet wood. But it can be done. Many a man and woman has given up the task in disgust these last few years. The farm bureau program itself falls far short of its possibilities because township meetings are poorly attended. Leadership in the country is really good, but the followership is terrible. There is no question but that the time is here when farming must have more brains and less brawn in the 'brains and brawn mixture.' And chorning by lantern light has cost the farmer as much as it has made him.

Wipes away the Worries

"Laughter wipes away the worries and music soothes the heartaches. Three or four times a winter every community ought to have a social in which the feature is music. Stunt nights as a feature of community entertainment are valuable. I fully expect to see the time when farmers generally will play just as the business man in the city."

FRUIT GROWERS TO REORGANIZE UNDER CO-OP ACT

"Illinois Fruit Growers Exchange" Will Be Name; Member Campaign To Start Soon

A meeting of the Fruit and Vegetable Marketing Advisory Committee of the I. A. A., officers and directors of the Illinois Fruit Exchange, and several large fruit growers took action to organize a non-stock, non-profit cooperative organization under the Illinois Cooperative Marketing Act to be incorporated as the "Illinois Fruit Growers Exchange," at Centralia, January 5.

The new organization will be, in effect, a continuation of the Illinois Fruit Exchange. However, the latter will not liquidate until some future date, due to unexpired marketing contracts, railroad claims, and present duties and obligations to its members.

Organization under new uniform five-year contracts will be started at an early date under the direction of the Illinois Fruit Growers Exchange and the Fruit and Vegetable Marketing Department of the Illinois Agricultural Association.

The decision to reorganize the Illinois Fruit Exchange has been the result of much thought and study on the part of officials of the exchange. Considerable expansion of the organization was felt necessary and there are many limitations which prevent the Exchange from expanding as it is now organized.

Want R. R. Fences Repaired? I. A. A. Helped This Man

"Let us know if railroad fences are defective," said the I. A. A. Transportation Department's ad in the December 5 issue of the Record. Immediately on receipt of the issue, Chas. R. Birkenmayer, Macoupin county, wrote to the I. A. A. and said that the fence along the C. P. & St. L. railroad adjoining his pasture was badly in need of repair and he wished that the department could at least persuade the railroad to set the posts if he furnished them.

The Transportation Department took the matter up with the C. P. & St. L. general manager. On December 29, the latter wrote: "We have set the posts for Mr. Birkenmayer, furnished wire and staples and he is to do the balance of the work."

And Mr. Birkenmayer wrote to the I. A. A.: "I want to thank you for your efforts with the C. P. & St. L. railroad in having them repair their fence along our land. I think it was a nice favor of you and I truly appreciate it."

JENKINS RESIGNS TO ENTER IN RACE FOR U. S. SENATOR

Restoration of Agriculture Will Be the Paramount Issue

The request of Newton Jenkins, recently announced candidate for United States Senator, to be relieved as legal counsel for the Illinois Agricultural Association was accepted by the executive committee at the January 11 meeting.

In a resolution to Mr. Jenkins the committee stated that the principles of the Association are such that anyone connected with its administrative affairs cannot be a candidate for public office at the same time. The committee extended appreciation of the efficient service rendered to the association and for the courteous manner in which all requests have been handled.

"I am entering the Republican primaries as a candidate for United States Senator," Mr. Jenkins states in his letter to the association.

Agriculture Paramount

"While I expect to appeal to every element of the state's citizenship, Mr. Jenkins continues," the restoration of agriculture will be a paramount issue of my campaign. This issue, of course, is quite non-partisan and I shall do my utmost to carry my message to the farmers in every section of the state."

"We Call Them Cheap Screws Down In Egypt"

"I have been reading my I. A. A. Record and find many good things in it for me that I have helped to do by belonging to the farm bureau," writes Arthur J. Casper, Johnson county. "These things have helped others that don't belong just as well, and won't belong as long as they can reap the harvest without belonging. We call them 'cheap screws' down here in Egypt.

"I am well pleased with what the I. A. A. has done for us. Without organization, we are as far as we can ever expect to get. With organization we can adjust the lid to the lunch box at any degree we desire to fit the agricultural conditions of our country.

"In our drive for membership in December, 1923, we lost more, I think, than we gained. Those we lost were mostly trouble-makers. Those we gained were men that have been reading and making a study of the farm bureau. Not such a bad loss but a better gain."

Mr. Casper asked for 50 January 5, I. A. A. Records to hand out to some of his neighbors.

CHICAGO LIVESTOCK CO-OP SHOWS GREAT GAIN IN RECEIPTS

Handled Nearly 16,000 Cars In 1923; Sykes Says Big Problem Now Is Orderly Selling

The Chicago Producers Commission Association handled 15,855 cars of livestock in 1923, over 72 per cent of which came from cooperative shipping associations, said S. W. Doty, manager, in his report at the annual meeting of the agency, January 8. There are now over 78,000 individual members of the Chicago Producers.

Big Increase

Mr. Doty's report showed the following increase in receipts of the agency from July through December, 1923, compared with the same months in 1922: cattle, 132 per cent; hogs, 111 per cent; and sheep, 239 per cent.

"The big problem before the Producers selling agencies is orderly marketing," said A. Sykes, Ida Grove, Ia., president of the Chicago Producers, in a talk in which he traced the entire growth of the movement. "Refunds are all right but they are not the big thing. There should be closer cooperation between livestock producers so that the flow of livestock to the market can be regulated."

Re-elect Directors

W. E. Elliott, Williamsfield, Ill., and Frank Coyne, Ida Grove, Ia., were re-elected for three year terms as directors of the Chicago selling agency. They were the only directors whose terms expired.

FOX CHARTS NEW PROGRAM OF WORK

(Continued from Page One)

national confidence upon which a national program must be built.

Dairy Marketing

"Dairymen around both Chicago and St. Louis are in need of reorganization. Dairymen around these two cities will never be able to stabilize prices or enjoy the privilege of permanently being the dominating factor in price control until they make adequate provision for local concentration points to care for surpluses and until they are sufficiently well organized to make an equitable distribution of the losses over all producers involved.

"Dairymen around several other cities are making progress in cooperative marketing. Effective organization around these other cities will help in making a successful organization around Chicago and St. Louis. The most difficult factor in all of these efforts is to secure efficient management. Every failure is traceable directly or indirectly to faulty accounting and lack of financial control.

Poultry.

"Standardizing and grading should receive first attention in the poultry and egg marketing question. If egg exchanges and buyers do not fall in line by recognizing grade through prices paid, cooperative marketing of poultry products must and will force the issue.

Fruits and Vegetables.

"The experience of the Illinois Fruit Exchange points the way to successful marketing of Illinois fruits. This institution, while highly successful, needs to be reorganized and its operations extended and improved so as to include more of the successful fruit growers of the state."

Taxation.

Secretary Fox recommended that active work be started in analyzing revenue expenditures for both country and state purposes and he suggested that the project be taken up by the joint efforts of farm bureaus, chambers of commerce, bankers' associations and other groups of citizens.

"The purpose of this undertaking should not be to interfere with the proper functioning of public officials, but should be conducted for the purpose of securing an intelligent understanding of the use that is being made of public money," Mr. Fox said.

Legislation.

In discussing the legislative policy of the association he said that without facts and careful analysis farmers can not hope to arrive at the sound solution of public questions. "In anticipation of the next session of the Legislature, a careful survey and analysis should be taken of the revenue question, the road program, the school problem and law enforcement measures.

Organization.

"Counties that have well developed community centers are maintaining membership at less cost than counties less thoroughly organized. If we will study and develop local community organization within the county, the next campaign should cost less. This should be undertaken in 1924."

Grading Eggs By Quality Is Essential Says Harper

"Grading by quality is the most important service which cooperative marketing is rendering to egg producers," declares J. D. Harper, who has returned from an investigation of cooperative poultry and egg marketing associations in nine western states and in Canada with the view of working out a policy of poultry and egg marketing suitable for Illinois conditions.

"Standardized products are essential to proper marketing. Marketing associations that are paying their members on the basis of grade are the ones that are succeeding at getting the best prices for members.

"In Utah, poultrymen were paid five cents per dozen for eggs in May, 1922. The producers organized a cooperative marketing association in March, 1923. They pay by grade and quality and sell standardized products. They now have 1200 members and sold 160 cars of eggs and 20 cars of poultry in 1923. Nearly a million dollars' worth of business was transacted. In 1922, Utah shipped out only 17 cars of eggs. Seven cars were imported."

Similar success with grading by quality was found by Mr. Harper in Washington, Texas, and British Columbia.

Orderly Marketing

"Cooperative poultry and egg associations are able to bring about orderly marketing," declares Mr. Harper. "The great bulk of eggs is produced during about one third of the year and rushed to market and into storage, bringing prices down. By controlling the product and putting the surplus into storage, producers' associations are letting their eggs on the market as they are needed throughout the fall and winter months. This is one of the big services which most of the egg cooperatives are rendering.

All Get Better Prices

"Producers who belong to marketing associations are not, as a rule, getting any more for their products than non-members are," Mr. Harper says. "But members and non-members alike are getting considerably more than they did before the association existed.

"The independent dealers are paying on a much narrower margin as a result of the competition aroused by producer marketing. This was especially noticeable with the cooperative associations in Washington, California, and Texas. A manager in Washington who had been a private dealer for years said that it might be a good thing if the cooperative ceased to function in order to make all producers realize what it is doing for them."

Good Management

Good management was a very noticeable factor which Mr. Harper noted as a prime necessity of successful poultry and egg marketing associations. Most of the managers whom he met were men who were well grounded in experience and a thorough knowledge of the poultry and egg market.

CO-OPS MUST FILE CLAIMS TO SECURE INCOME TAX REFUND

I. A. A. Is Handling Exemption Evidence To Present To Government

The I. A. A., through its consulting accountant, George E. Frazer, is preparing claims for income tax refund for farmers' cooperative organizations of Illinois upon request from such associations. Claims from a dozen companies have already been turned in to the I. A. A. for collection. All must be filed before March 15, 1924, in order to be eligible to refund.

Income tax exemption for cooperative associations was granted by a ruling of the Internal Revenue Department last September, providing such organizations filed proper evidence to secure refund.

Must File Returns

Mr. Frazer will be glad to analyze the claims of any cooperative organization which will send the I. A. A. by registered and insured mail copies of each of their Federal income tax returns for the years, 1918, 1919, 1920, 1921, and 1922, and also copies of their outside auditor's reports for each of those years. If there is no outside auditor's report on any year, the financial statements and copies of trial balances should be sent.

Cooperatives are not denied exemption because they have accumulated a reasonable reserve for the retirement of bonds, for losses or depreciation, or for the purchase of buildings and machinery. The payment of dividends on stock, which must be held by producers themselves, does not defeat exemption, provided it is reasonable and does not exceed the legal rate of interest of the state.

Corbin Goes To Missouri As Head Of Organization

E. L. Corbin, Macoupin county, took up his new work in Jefferson City, Mo., Jan. 21, as Director of Organization for the Missouri Farm Bureau Federation.

During 1922 and 1923, Mr. Corbin served as I. A. A. executive committeeman from the 21st district. He has also been in the employ of the I. A. A. Organization Department as county organizer in several Illinois counties in 1923.

Marketing Head For A. F. B. F. To Be Chosen Soon

Definite plans to employ a marketing director for the American Farm Bureau Federation were made at the January 24 meeting of the executive committee.

A committee consisting of President Bradfute, A. C. Hardison of California, George M. Putnam of New Hampshire and C. E. Hurst of Iowa, was appointed and authorized to select a marketing head at once. A release from the Federation office states that the selection of a marketing director is expected within a few days.

I. A. A. Asked To Make Milk Survey By Farm Advisers

Asserting their belief that any permanent solution of the problems confronting dairymen in the Chicago dairy district is dependent upon the merchandising of milk on a quality basis so that milk shipped in from a great distance cannot compete with milk produced nearby, seven northern Illinois farm advisers in a meeting at the I. A. A. office on January 26, asked the I. A. A. Dairy Marketing Department to conduct a statistical survey of milk production in the Chicago district.

This survey will determine the amount of milk that is produced from tuberculosis-free herds in each county, the total amount of milk exported from each county for the fluid milk market, and the amount of this volume produced from T. B.-free herds.

Appointment of a committee from the I. A. A. was recommended for the investigation of a plan toward the merchandising of quality milk to come from tuberculosis-free herds only, and to determine the possibilities of selling this milk upon the Chicago market at a premium over the ordinary fluid milk price.

Exchange Ships To 98 Markets In 20 States During 1923

Approximately 600 cars of Illinois fruits and vegetables were shipped by the Illinois Fruit Exchange to 98 markets in 20 states during 1923, according to Manager A. B. Leeper. Distribution was secured through the Federated Fruit and Vegetables Growers, Inc.

States to which shipments went were, Alabama, Arkansas, Connecticut, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Michigan, Minnesota, Mississippi, Missouri, North Dakota, New York, Ohio, Oklahoma, South Dakota, Tennessee, and Wisconsin.

ANOTHER PROBLEM TO UNLOAD

Fine Spirit Features Ninth Annual Meeting

The ninth annual meeting of the I. A. A. was a happy and harmonious gathering in the eyes of your interpreter. In the neighborhood of 800 were in attendance representing 91 counties of the state.

At the opening session the executive committee and employees gathered on the platform. The report of work for the year in booklet form was distributed to all, and on the walls of the hall an array of charts and maps visualized the work and activities of the association.

"Future progress depends largely on members themselves," was the keynote of President Thompson's address. The Secretary's report faced issues squarely, and made definite recommendations. Certainly there was encouragement in the financial report.

A New Spirit

In the evening over 600 banqueted together in the Methodist church, visited and sang songs. It was a high spot of the meeting. Between songs and story telling there was a hum of visiting conversation. It seemed there was something different in the air that evening, a new brand of spirit.

Later when the crowd retired to the auditorium, Benjamin Darrow called that something, community spirit.

The Election

The election of officers came after the evening program. There was no hesitation in choosing S. H. Thompson for president. Outside of a little contest on vice-president, the election was quiet.

The scheduled program continued on through the second morning. All of the addresses had quite a definite relation and bearing to the work of the association, although there was little time for discussion. Many people expressed the belief that it was the best speaking program of any annual meeting.

Retain Secretary

The new executive committee lunched together at noon. Their opinion was unanimous in retaining Secretary Fox. It was decided that their first meeting will be held January 31.

After one address on the second afternoon, the reports of the constitution and resolutions committees were accepted with little discussion. A resolution which the

A. F. B. F. GOVERNING BODY O. K.'S FARM RELIEF MEASURE

McNary-Haugen Bill Like Wallace Plan—To Increase Buying Power Of Farmer

The McNary-Haugen bill, farmer relief legislation, designed to establish a fair relationship between what the farmer sells and what he buys, was endorsed by the A. F. B. F. executive committee at its meeting in Chicago, January 21 to 24.

In endorsing the purpose and intent of the bill, a resolution passed by the committee stated, "desiring, however, that the bill be amended in such a way as to be more useful in times of emergency and more available to and in harmony with the purposes of farmers' cooperative marketing associations."

First Relief Legislation

The McNary-Haugen bill is the first relief legislation to receive serious consideration by the farm bureau. It will be remembered that Congressman Dickinson of Iowa endorsed the bill in his address at our annual meeting. Secretary of Agriculture, Henry Wallace urged the enactment of the bill before the senate agricultural committee.

The Purpose

The bill provides for an agricultural export commission and an agricultural export corporation with a capital stock of $200,000,000, to be subscribed by the government.

The purpose of the bill is to promote equality between prices of agricultural products and prices of other commodities. As a basis for comparison the bill stipulates that the price of agricultural com-

(Continued on page 2)

Voted Yes or No On Every Issue During 4 Years

For four years Henry McGough of Maple Park, Kane county, served on the executive committee of the I. A. A., and during that time he did not miss one meeting, was not late at one meeting and he voted yes or no on every question before the committee.

Mr. McGough was the unanimous choice of the tenth and eleventh districts on the committee for another year, but he declined to serve. In appreciation of Mr. McGough's faithful service, the voting delegates presented him with a gold watch chain.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by News Publicity Department, E. L. Bill, Director.

Entry as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

Harper.

ANNUAL MEETING RESOLUTIONS

The resolutions passed at the annual meeting express the trend of thought on important questions before us. To an extent they point to the platform or program of work for the year, although they were not adopted with that idea in view.

Following is a summary of the resolutions:

Holding District Conferences

Recognizing the importance of establishing a closer relation between the I. A. A. and county farm bureaus, we hereby direct and require that the executive committee shall direct each member of the committee to hold at least three conferences in his district during the year of county executive committeemen and officers, members of the I. A. A. board of delegates and farm advisers. The meeting places shall be selected by the I. A. A. delegates within the district. Each county shall bear the expenses of its own representatives and all overhead expenses of the meetings shall be prorated among the counties in the district.

To Study School Laws

The stability of institutions and the welfare of our people depend largely upon the proper education of our citizens. The farmer has always been and still is in favor of adequate school facilities. The boys and girls of the farm are entitled to as adequate educational facilities as are the children of the cities and towns. Farmers are willing and should bear their just share of the burden. A study of the school laws and their application reveal the facts that many gross inequalities and acts of injustice are possible and have occurred. We therefore recommend that a thorough and comprehensive survey and study of the entire school system and the laws relative thereto be made to the end that we may give intelligent support to a revision of the laws relative to education which will eliminate as far as possible the injustice which now exists.

Cooperative Marketing

A resolution endorsing the actions of I. A. A. voting delegates at the American Farm Bureau annual meeting in their stand for a constructive program of cooperative marketing and endorsing the actions of the I. A. A. in upholding the grain marketing resolution passed by mid-west farm bureau presidents and secretaries last June. The executive committee of the I. A. A. was urged to take immediate active steps to create and put in operation a comprehensive cooperative marketing plan.

Farm Bureau Relation to Co-ops

We urge the tying together as effectively as possible the farm bureaus and I. A. A. with cooperative commodity associations.

Loyalty to Co-ops

We urge the loyalty of farm bureau members to the various cooperative agencies to the end that a greater volume of business handled by such cooperative agencies may exert every increasing influence upon the stabilization of prices.

Relief Legislation

We urge the consideration and passage of such laws as are economically sound and that have for their purpose the relief of agriculture and the stabilization of prices and the re-establishment of an equitable exchange relation between the products of the farm and other necessaries of life.

Local Community Clubs

We urge the development of community organizations in the county farm bureaus for the purpose of obtaining a closer relationship with the membership. We urge the I. A. A. executive committee to cooperate with county farm bureaus in establishing community organizations and that it take such steps to carry forward and develop our community life as in their judgment may appear to be feasible.

Balanced Production

We recognize the influence of the production of farm commodities to the markets and the prices of said commodities. We therefore urge constructive thought on the part of the farm bureaus and the members of the association with reference to a better balancing of their production to the end that a more stable supply be maintained, thereby rendering a greater degree of stability to the prices of farm products. We recommend the increased use of legumes to supplant a portion of the present large acreage devoted to grain production to the end that over-production of grain may be eliminated and that the soils may be rendered more productive in the future.

Water Transportation

We urge the development of the waterways of the nation wherever development is feasible and we endorse and urge the early construction of the lakes to gulf and St. Lawrence river waterway projects, provided that the rights and interests of parties directly affected shall be properly safeguarded.

Law Enforcement

We urge the rigid enforcement of all laws destined to suppress vice, intemperance and other evils, and we recommend the adoption of such law enforcement agencies free from political control as will give the rural communities adequate protection from law violation.

Pure Seed Protection

In a resolution warning the membership against the purchase of alfalfa and clover seed imported from foreign countries the delegates recommended the adoption of such measures as will protect the purchaser of seed from fraud.

To Consider Office Location

Inasmuch as some difference of opinion may have arisen with reference to the location of the I. A. A. offices, and inasmuch as by our constitution the executive committee is charged with the responsibility of securing the best possible location, we recommend that the executive committee give due consideration to all claims with reference to location and that they act in the matter as may seem to them wise and proper.

—o—

Illinois farm bureaus and the I. A. A. are carrying on an intense program to free Illinois herds of bovine tuberculosis. The big purpose of this work is to fulfill the demand of purchasers and to make a market for Illinois cattle. Now comes the idea that milk from tuberculosis-free herds should be merchandised upon a quality basis.

FARMER RELIEF LEGISLATION

For a long time farmer relief legislation has been talked of, and now the first measure is before Congress in the form of the McNary-Haugen bill. It is explained on another page in this issue.

The purpose and intent of the bill has been endorsed by the American Farm Bureau executive committee, the Iowa Farm Bureau Federation and the Secretary of Agriculture.

Our annual meeting failed to endorse the Wallace plan of an export corporation, which is included in this bill. However, another resolution urged the passage of such laws that are economically sound and have for their purpose the relief of agriculture and the stabilization of prices of the farm products. In no way has the I. A. A. contended that there is not room for constructive legislation to overcome our marketing problem.

A little study of this particular bill shows that it is more than political campaign medicine. It drives at the heart of our problem, the buying power of the farm dollar. The bill delegates broad powers and would put drastic actions into effect. It has teeth.

The I. A. A. is making a study of this bill.

—o—

A FARM BUREAU RECORD

For four years Henry McGough of Kane county was a member of the I. A. A. Executive Committee and during that time he never missed a meeting, never was late, and on every issue put before the committee he voted yes or no. It is a record to be proud of.

There are 1600 county and state officers in farm bureau work in Illinois, and there are several times that number in township and community organizations. All of us cannot be members of the I. A. A. Executive Committee but all have the opportunity and responsibility to do our share in the same faithful way Mr. McGough has carried out his office.

Answer the question of how many officers and members are carrying their end of the load and you have the answer to how fast the farm bureau can make progress.

—o—

THAT FARM BUREAU SPIRIT

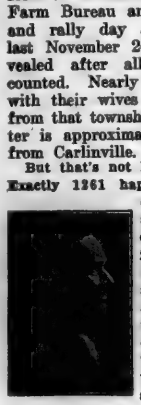
"After all, this farm bureau thing in which we are all so much interested is not a big concrete structure upon which folks may gaze in wonderment but rather it is a thing cherished in the hearts and exhibited in the lives of its members." These are the words of "Farmer" Rusk, farm adviser in Macoupin county, and they express what they call down there "That Macoupin County Farm Bureau spirit."

It was that spirit that brought 1,261 farm bureau members and their wives to the Macoupin annual farm bureau meeting in November. How did they get that spirit? It was through "conscientious, insistent, consistent, continuous community organization work," Mr. Rusk says. They have 36 community organizations in the county and all the way from 150 to 1,000 people gather together regularly to talk over their mutual problems, to see some farm movies, and to enjoy some "eats."

—o—

COMMUNITY ORGANIZATION

Approximately twenty per cent, or $1.00 out of each $5.00 paid into the Illinois Agricultural Association by each member, goes toward the maintainance of state and county membership. Fifty cents of the $5.00 membership fee to the I. A. A. goes to the American Farm Bureau Federation, leaving $3.50 for administrative and other service work of the I. A. A.



Can the cost of maintaining membership be decreased so as to leave a larger amount for other services?

Without exception, the Organization Department states, the cost of maintaining membership is low in counties in which there are local community organizations. The department recommends that community organization work be featured this year.

Community Organization Puts the Pep in the Macoupin Farm Bureau

Farm bureau members from North Otter township were given the reserved seats on the platform at the Macoupin County Farm Bureau annual meeting and rally day at Carlinville last November 24, it was revealed after all noses were counted. Nearly 100 members with their wives were present from that township, whose center is approximately 30 miles from Carlinville.

But that's not half the story. Exactly 1261 happy farm folk dined that day at the expense of the Macoupin County Farm Bureau, and they were all farm bureau members or their wives. "Altogether it was an impressive meeting and we felt that it was the outgrowth of our community organization work," says "Farmer" Rusk, farm adviser.

H. J. Shultz
President

"We had with us that day, Secretary John Coverdale of the American Farm Bureau, and J. C. Spitler, assistant state leader from the University of Illinois, and both stated publicly that they had never attended a farm bureau meeting of its kind before where the right sort of farm bureau spirit was so evident. We call it the Macoupin County Farm Bureau spirit.

Community Organization Did It

"In making a sort of an inventory of the work done during the past three years, we have simply come to the conclusion that after all this thing we call the Macoupin County Farm Bureau spirit is the one thing of greatest importance to all organizations," declares Mr. Rusk. "We believe very strongly that our success thus far in this direction has been due primarily to our conscientious, insistent, consistent, continuous community organization work."

The community organizations are the most important cog in the farm bureau machinery in Macoupin county, Mr. Rusk says. The idea was not born with the organization of the bureau but came as the need developed for a better means of contact with the membership. The plan of community organization was developed after the farm bureau was three years old. The constant working of the bureau through its many branches has been the chief cause of the development of the splendid Macoupin County Farm Bureau spirit existing throughout the organization today.

Bureau Organized in 1917

The farm bureau was organized in the "State of Macoupin" in the fall of 1917 and for two years the membership was 330. Then in the fall of 1919, the big drive was put on and even the farm hands were signed until the number reached upwards of the 1600 mark.

Start to Organize Communities

When "Farmer" Rusk got on the job on January 15th, 1921, there were just three community organizations functioning in Macoupin county. By the middle of February, H. W. Rice, then president of the bureau, had, with the approval of his executive committee, appointed 22 community chairmen over the county and community meetings were started.

How to get the farm folks out to "meetin'" was the next big problem. H. J. Shultz, now president and at that time a member of the executive committee, suggested "eats" as the best means. "H. J." was right, it seems, for from that day to this and for all time to come, Macoupin county farm folks are strongly in favor of "eats."

How They Connected Up

So they began getting in neighborly community groups at the various community centers over the county. In each of these groups they had their community leader who was marshal of the day on these occasions and who at all times was the connecting link between the local community farm bureau group, the executive committee and the county farm bureau office.

"And it came to pass that the bureau looked upon its creation and was pleased," says "Farmer" Rusk. "Indeed the results of the work were gratifying. The county is large with 500,000 big acres within its confines. There was need for more and more community organizations and as this need was recognized, more were created until by the middle of the year 1923 there was a total of 36 community organizations making up the most important part of the Macoupin County Farm Bureau machinery."

Attendance Always Good

The attendance and interest in the community farm bureau meetings in Macoupin county have always been encouraging. During 1922, especially, many summer evening meetings were held on farm lawns with moving pictures shown on the side of the house or barn for a part of the entertainment. Often ice cream and cake were served.

Attendance at meetings ranging from 150 to 1000 made these meetings full of enthusiasm and enjoyment. In 1921, the farm bureau held 145 such community meetings. In 1922, the number was boosted to the total of 151 and during 1923, the total was 111, aside from 23 demonstration meetings held during the year.

What "Farmer" Says

What does the Macoupin County Farm Bureau feel has been gained by three years of community organization activity? "Farmer" Rusk sums it up as follows:

"The Macoupin County Farm Bureau believes that greater success is attained in the solving of farm problems, big and little, through community effort than in any other way, for it has developed that chief among the big jobs of the farm bureau is the job of keeping up the organization and to keep in close touch with its membership in order that the will of the members may be carried out and that the members may keep informed concerning the activities of the organization.

Offers Best Means

"Community and demonstration meetings offer the best means of carrying out this job. More and more the farm bureau is taking on the form of a business-like organization operating as a big extension concern, not for the mutual advantage of its membership alone, but in cooperation with other legitimate organizations for the benefit of agriculture and society in general.

"The farm adviser is not looked upon so much as a hired hand as in the past but more and more as a general manager under the direction of a board of directors of a concern of consequence in the county and state and in which all members must needs interest themselves.

That Macoupin Spirit

"Thus the Macoupin County Farm Bureau spirit is being developed, the sort of a feeling inside of folks that kindles the latent interest in one another—a genuine feeling of hospitality, if you please."

Macoupin Is Doing It!

We would all like to see the farm bureau so well organized that it reaches right down to the everyday life of the individual member. That means not only the county unit but the township or community unit as well. Down in the "State of Macoupin" they've got 36 community organizations and they call them the most important cogs in the farm bureau machinery of the county. The accompanying story tells how they do it.

ADVISERS

Here are the Macoupin county farm advisers, "Cracker" Johnson, assistant, at the left and "Farmer" Rusk, adviser, at the right. They help keep the community work going in Macoupin county.

Gov't Must Deal With Organized Bodies—Dickinson

"No government function can go out and deal with the individual direct," said L. J. Dickinson, Congressman from Iowa and House farm bloc leader, at the I. A. A. meeting. "Every plan devised by Congress thus far for farm relief implies that it will work through cooperative bodies."

This makes the need for farm organization more imperative, he said. Only by cooperation can the farmer hope to survive financially.

Congressman Dickinson stated that he believed that corn growers of Iowa and Illinois can control the price of corn by the farmers' elevators uniting together and selling through a single selling agency.

He also gave his indorsement of the Wallace plan for control of export wheat.

Water and Rail Rate Comparison Made By Newton

Railroads themselves acknowledge that water transportation is practicable and that it is cheaper than by rail by the rates which they establish between water points, declared Congressman Cleveland A. Newton of Missouri at the I. A. A. meeting, arguing for completion of the river projects in the Mississippi Valley.

"The rail rate from St. Louis to New Orleans, a distance of 718 miles, on 100 pounds of first-class freight is $1.73½ because the Mississippi river flows between these points," he said, "while the rail rate on 100 pounds from Ft. Smith, Ark., to New Orleans, 494 miles, but where no water competition exists, is $1.94½. The rail rate on 100 pounds of first-class freight from Dallas, Texas, to New Orleans, 515 miles, is $2.08½.

"From Minneapolis to St. Louis, 586 miles, the freight rate is 96 cents because there is a possibility of water competition between these points while the rail rate on the same freight from Minneapolis to Kansas City, 86 miles less distance and over a more level haul, is $1.29½."

Mr. Newton stressed the need of farmers uniting with other organizations for the improvement and navigation of inland rivers.

ENDORSES FARM RELIEF MEASURE

(Continued from Page One)

modities for the years 1905 to 1914 inclusive, shall be compared with the price of all other commodities for the same time. The ratio between any one agricultural commodity and all other commodities is used for comparison with current prices.

Commission Directs Selling

The commission makes a study of current prices of farm commodities with relation to the current prices of all other commodities. When the current price of a farm commodity is below the ratio of pre-war prices, it makes recommendations to the corporation for purchasing and selling, and it is the duty of the corporation to carry out the recommendations of the commission. When the current price of a farm commodity is more than 10 per cent lower than the pre-war price, the commission shall make recommendation to the corporation to purchase such amounts so as to raise the domestic price to the level of the pre-war ratio price. It can also direct the corporation to sell in the domestic market, but at not less than the ratio price.

Producers Pay Cost

In order that the producers of each agricultural product may pay their share of the expenses of the corporation, and their share of losses sustained by selling surplus in foreign markets, the corporation keeps part of the price paid for an equalization fee and it issues script or a certificate of indebtedness for the amount kept back. Thus the producer of the commodity bears all expenses of the corporation.

The heart of the bill lies in the fact that when the current price of a commodity goes 10 per cent below the pre-war ratio, the corporation buys to the extent, at the pre-war ratio price, that domestic prices will raise to the pre-war ratio price.

CO-OP CREAMERY AT MT. CARROLL HAS GOOD YEAR

Sales Over $115,000; Seven Per Cent Dividend and 1-2 Cent Lb. Refund Declared

The Mt. Carroll Cooperative Creamery Company closed its second year's business on December 31, with total sales of $115,307.16 in butter, poultry and eggs according to the report of Secretary H. P. Hostetter at the stockholders' annual meeting, January 26. This is an increase of nearly $30,000 over gross sales of the same products last year.

A dividend of 7 per cent was declared on all stock and in addition, a patronage dividend of one-half cent per pound was voted for all butterfat delivered to the creamery in 1923, totalling 160,225 pounds. The company added $4,260 worth of new equipment during the year.

The lowest price paid for butterfat was 40 cents per pound and the highest was 50 cents, with an average of 46.8 cents. "This certainly emphasizes the fact that the creamery is making a fine market for our dairymen," states Farm Adviser Bliss, Carroll county. "It also points out how foolish the farmers of this vicinity are who have been bringing this cream to the stations and selling it for four or five cents per pound less than the creamery is paying.

"Even they, however, have profited by the creamery being here, as the stations would probably have paid on the average of four cents per pound less than they have been paying, had there been no creamery. We positively know this to be true from past experience. We have the records back for six years."

Ely Cites Some Startling Facts On Tax Situation

"If the present movement of taxation on farm land continues unchecked, taxes will absorb farm land values and the farmers' land will be confiscated by the state and our farmers will become tenants of the state," declared Richard T. Ely, Professor of Economics at the University of Wisconsin before the annual meeting.

The speaker showed charts to prove his statements. He showed how the total per capita taxes in the United States had increased from about $23 in 1912-13 to around $80 in 1923. The underlying cause of increased and increasing public expenditures, he said, is found in the development of the state and nation as cooperative institutions for promoting the public welfare.

His remedy was for more indirect taxation to supplement direct taxes.

Fruit Exchange To Hold Annual Meet On February 19th

The annual meeting of the Illinois Fruit Exchange will be held in Centralia, February 19, at which time the plan of reorganization will be fully explained and definite action taken toward the campaign. It is expected that incorporation papers will be in the hands of the officers by that time. The reorganized Exchange is to be incorporated as the "Illinois Fruit Growers' Exchange."

SEVEN CHANGES IN OFFICERS MADE AT ANNUAL MEETING

Pres. Thompson Re-elected; De Kalb Man Vice Pres.; Six New Committeemen

President S. H. Thompson of Quincy was re-elected president of the I. A. A. for 1924 at the annual meeting. Frank D. Barton of Cornell, Livingston county nominated Mr. Thompson. The nomination was seconded by E. H. Meyers of Adams county. By unanimous vote nominations were closed and the secretary was instructed to cast the ballot for all voting delegates electing Mr. Thompson.

Former Vice-President A. O. Eckert of Belleville, St. Clair county nominated Charles Finley of Hoopeston, Vermilion county for that office. H. A. Platt of DeKalb county nominated Chauncey B. Watson of Dekalb, and Howard Leonard of Eureka, Woodford county seconded the nomination. The first ballot was a tie, each candidate having 87 votes. A second ballot was taken and Mr. Watson was elected. Mr. Watson received 89 votes and Mr. Finley 83 votes.

Six New Committeemen

Six changes were made in the executive committee of fifteen members. In the tenth and eleventh districts, represented by one member of the committee, Jacob Olbrich of Harvard, McHenry county was elected in the place of Henry McGough who has served on the committee for four years. In the caucus of voting delegates, Mr. McGough was again chosen to represent the district, however he refused to accept the nomination.

Other Changes

In the sixteenth district A. R. Wright of Varna, Marshall county was elected in the place of D. G. Reder. R. F. Karr of Iroquois, Iroquois county took the place of Charles Finley in the eighteenth district. A. R. Whisnand of Charleston, Coles county was elected in the place of D. J. Holterman in the nineteenth district.

In the twenty-first district, Samuel Sorrells of Montgomery county was elected in the place of E. L. Corbin, and in the twenty-third district, J. E. Lingenfelter of Lawrence county was elected in the place of Carlton Trimble.

A total of 177 voting delegates were seated in the meeting representing 91 counties.

TO I. A. A. FIELDMEN

Through the columns of the I. A. A. Record I wish to express my deep appreciation for the beautiful remembrance sent by you. I wish to assure you that I am unable to express the fullness of my feelings to the men whom, through our associations together the past few years, I have had the privilege to learn to know and to love as brothers. You have endeared yourselves to me by ties that only death can sever.

The beautiful gold knife, with the little chain, shall never be used by me to cut or to destroy the relations with you which I love to think about and to cherish. My sincere wish is that you may all enjoy God's richest blessings.

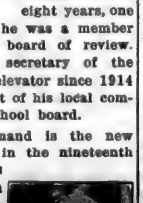
Yours sincerely,
J. C. Sailor.

Meet the New Members Of I. A. A. Committee

Chauncey B. Watson, newly elected vice-president is a cattle feeder on a 480 acre farm in DeKalb county. He is a graduate of the College of Agriculture and was on the University football team. Mr. Watson was a member of the state council of defense during the war. For six years he served as appraiser for the St. Louis Federal Land Bank. He is president of the DeKalb county farmers' institute.

C. B. Watson

With two partners, A. R. Wright of Varna, Marshall county, is farming 690 acres. Mr. Wright is the new member of the executive committee from the sixteenth district. He is president of the Marshall County State Bank located at Varna. He is secretary of the county farm bureau and is an officer in the local cooperative elevator. During the war he served as county food administrator.



A. R. Wright

R. F. Karr is a stock farmer on 350 acres near Iroquois in Iroquois county, new committeeman from the eighteenth district. Mr. Karr was president of the county farm bureau for four years. He served on the county board of supervisors for eight years, one year of which he was a member of the county board of review. He has been secretary of the local farmers' elevator since 1914 and is president of his local community high school board.

R. F. Karr

A. L. Whisnand is the new committeeman in the nineteenth district. His home is in Charleston, Coles county. In cooperation with four tenants he is farming 725 acres on the share system. One of his tenants has been with him for 17 years. Mr. Whisnand was a member of the Charleston school board for 15 years and was county superintendent of schools for one year. He served two years on the county board of supervisors, one year as chairman.

A. L. Whisnand

Samuel Sorrells is a general farmer on 200 acres in Raymond township, Montgomery county. Mr. Sorrells is the new member of the executive committee from the twenty-first district. He is also president of his county livestock shipping association. During the annual meeting he was elected director of the Illinois Farm Bureau Serum Association.

Samuel Sorrells

J. E. Lingenfelter, Lawrenceville, Lawrence county is the new member of the executive committee in the twenty-third district. He is engaged in general farming operations and has always taken a leading part in movements for better farming. He has been president of the Lawrence County Farm Bureau for the past four years.

J. E. Lingenfelter

Jacob Olbrich, new committeeman from the tenth and eleventh districts, is a dairy farmer near Harvard, McHenry county. Mr. Olbrich is a leader in county farm bureau work. He served as treasurer in the county association for four years and was a member of the I. A. A. dairy marketing committee in 1920 and 1921. Farm Adviser A. J. Gafke says Mr. Olbrich was the first to join the cow testing association, first to raise legumes and first in all progressive moves.

FOR MR. SAILOR

A happy event at the annual meeting was when O. L. Hatch, in behalf of the I. A. A. organization force, announced the presentation of a gold watch chain and knife to J. C. Sailor, for five years director of organization work. Mr. Sailor was not at the meeting, being sick in a hospital at Danville. He gave up his work with the I. A. A. last December 1.

Delegates Made Three Amendments To Constitution

The most important of three amendments made to the I. A. A. constitution at the annual meeting is a change providing for executive committee members to serve two years in the place of one.

In order to make this change operative immediately, the amendment provides that the new executive committee members from even numbered districts serve for two years and new committee members from odd numbered districts serve for one year. After this year, all committee members will be elected for two years, half being elected one year and the other half the next.

A second change was made providing that all proposed amendments to the constitution be in the hands of the secretary at least 20 days previous to meetings of the board of delegates and that the secretary supply executive committee members and county farm bureaus with copies of proposed amendments at least 15 days previous to delegate meetings.

The third amendment provides that no member of the executive committee may be a regular paid or salaried employee of the association.

I. A. A. Men On Radio!

G. E. Metzger, A. C. Everingham and Robert A. Cowles, all well known to Illinois farm bureau members, are scheduled to speak upon the American Farm Bureau radio program from Station KYW, Chicago, within the next three weeks. Don't forget to tune in on these programs at 8:01 Tuesday nights.

February 5—"Agriculture under Organization," by G. E. Metzger, I. A. A. Director of Organization, followed by F. A. Wirt of J. I. Case Co., with the subject, "Let the Truth be Known about Farm Machinery."

February 12—"It's What the Farmer Sells," by H. W. Moorhouse, Director of Research, A. F. B. F., and "Balanced Production and Stable Marketing," by A. C. Everingham of the I. A. A. Legislative Committee.

February 19—"Some Business Aspects of Farm Organizations," by Treasurer R. A. Cowles of the I. A. A. and "The Dairy Industry and Its Relation to Public Health," by Louise Fitzgerald, National Dairy Council.

Vision Greater Than Progress O. B. Goble Says

"Greater than all the growth in the business of producers commission companies is the vision that has opened up to the livestock producer as to the possibilities of having within his own grasp the power of having something to say about the price of his livestock," said O. B. Goble of Charleston at the annual meeting.

O. B. Goble

"It has been proven that his own marketing agency can be run intelligently, successfully and economically under the cooperative plan. From a spirit of doubt and despair he has gained a feeling of confidence and an insight into the value of joining with his fellow producers to work cooperatively."

Mr. Goble is Illinois Director of the Indianapolis Producers Commission Company.

Harper Tells Egg Men To Purchase On Quality Basis

In talking before the National Poultry, Butter and Egg Association in Chicago, J. D. Harper of the I. A. A. declared that the time has come for eggs to be purchased on the quality basis, just as grain, cotton and other farm products are purchased.

"When the producer of high quality eggs gets a premium and the low quality producer is penalized, it will mean that consumers will get a much more dependable egg supply, they will eat more eggs, and the producer will find a better market than at present," Mr. Harper said.

During the meeting of the national association, action was taken favoring the adoption of the government standard of grades on terminal markets. Mr. Harper made the point that this action should be followed up by introducing the grading system at country buying points.

I READ EVERY WORD

"I consider the Record a great help to farm bureau work. I read every word of it. I think it is time and money well spent, therefore I say keep the good work going."
—Fred Dietz, Jackson county.

SERUM PURCHASING BODY FORMED BY COUNTY BUREAUS

Directors Chosen To Head Association Which Will Unify Collective Buying of Serum

At a meeting of over 40 county farm bureaus interested in the collective purchasing of serum and virus, the Illinois Farm Bureau Serum Association was formed at Galesburg at the time of the I. A. A. annual meeting.

R. A. Norrish, Whiteside county, was elected president of the organization and chairman of the board of directors of seven. The state was divided into six districts and Mr. Norrish represents the first district.

Directors Chosen

Other directors elected were, J. H. Lloyd, Hancock county, second district; L. F. Boyle, Putnam county, third district; Sam Sorrells, Montgomery county, fourth district; O. B. Goble, Coles county, fifth district; and J. W. Gillispie, Lawrence county, sixth district. C. A. Stewart, director of the I. A. A. Livestock Department, was chosen as director-at-large and secretary-treasurer of the new association.

Membership in the organization is limited to county farm bureaus or other county or state organizations whose membership is limited to farm bureau members. The membership fee is $10.00 with annual dues of the same amount.

Collective Bargaining

The board of directors is authorized to canvass members to obtain the quantity and kind of serum needed and to collectively bargain for the purchase of quantity supplies needed.

Over 21,000,000 cubic centimeters of serum was purchased collectively through county farm bureaus in 1923 at a considerable saving to farm bureau members. The new serum organization puts the purchase of serum upon a more uniform basis, unifying collective purchasing under one association.

Leaders of 21st District To Meet Four Times a Year

During their caucus at the annual meeting, the I. A. A. voting delegates of the 21st district decided that it would be a good plan to have quarterly meetings of farm advisers and county executive committees. A date was set for this group to meet with the Macoupin County Farm Bureau, February 15.

FINE SPIRIT SHOWN AT ANNUAL MEETING

(Continued from page 1)

committee failed to recommend was brought before the convention from the floor, but failed to pass. The resolution endorsed the Wallace plan of a government finance corporation for handling surplus products, charging the cost of the corporation to the producers of the commodity.

In other columns of this issue complete reports of committees, election of officers and summaries of addresses are given.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 2 | February 20, 1924 | Number 4

I. A. A. COMMITTEE ENDORSES FARMER RELIEF MEASURE

McNary-Haugen Bill Is Designed To Establish Fair Prices For Farm Products

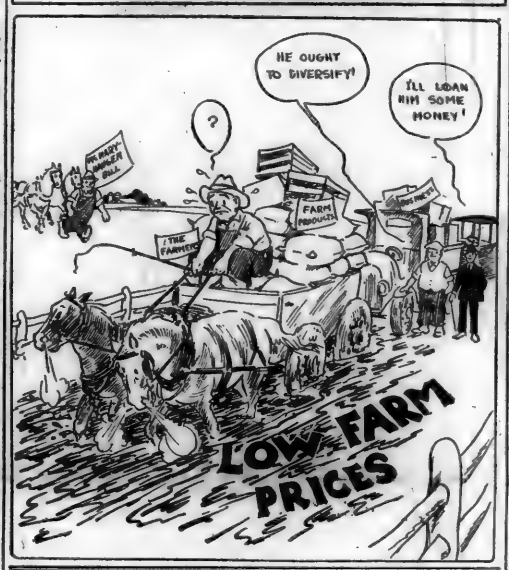
The executive committee at its meeting, Jan. 31, unanimously carried a motion made by F. D. Barton, Cornell, and seconded by Stanley Castle, Alton, that the committee "concur in the resolution passed by the American Farm Bureau Federation at its last executive committee meeting, endorsing the intent and purpose of the McNary-Haugen bill," an emergency relief measure designed to equalize the ratio between the selling price of farm products and the price of what the farmer must buy.

President S. H. Thompson, in speaking for the bill, said, "I feel as I never felt before that there is a real emergency now. There is no doubt about the condition of agriculture. The livestock farmer today is in a worse condition than a year ago. I don't believe in political remedies as a rule, but this bill looks like an honest effort to overcome the emergency problem.

Compulsory Pool

"Both livestock and wheat prices were limited during the war, and it is these two commodities that are in the worst condition now. The chief purpose of the bill is to give a bushel of wheat the same buying power it had in pre-war days. As I see it, the bill is a national compulsory pool with the whole cost of operation on the farmers. It is not paternalism, but does take care of the emergency."

Vice-President C. B. Watson



(Continued on page 4)

Change In I. A. A. Office Location Being Considered

In accordance with the resolution passed at the annual meeting that the executive committee give due consideration to a change in the location of the I. A. A. offices, President Thompson has appointed a committee consisting of Earl C. Smith, Detroit, chairman; Frank D. Barton, Cornell; and Stanley Castle, Alton, to investigate the question thoroughly.

The committee was instructed to report back at the next meeting of the executive board on March 5 and 6 with recommendations and reasons therefore. Springfield is the location that is being considered.

IN CASE OF AN EMERGENCY

Frazer Suggests Co-op Accounting To Elevator Men

Speaking at the twenty-first annual convention of the Farmers Grain Dealers Association of Illinois in Peoria, February 7, George E. Frazer, consulting accountant for the I. A. A., suggested that cooperative elevators form themselves into regional groups to carry on standard accounting and to enforce authoritative auditing.

Mr. Frazer referred to the idea as a farmers' elevator clearing house association. He said that there is no reason why a farmer should not have the same degree of safe deposit on his grain in the elevator as on money in the bank. The I. A. A. service of collecting income tax refunds for cooperative associations was explained by Mr. Frazer.

M. F. B. F. Asks Co-operation In Egg Marketing

The Missouri Farm Bureau Federation has invited Illinois farmers to cooperate with them in the egg marketing association to be started with headquarters at Hannibal.

On Feb. 5 a state meeting at Moberly determined to organize an egg marketing association, the first buying center to be located at Hannibal. The new organization will have contracts with its membership and will buy on the basis of grade and quality and will pool orders and sell at eastern markets.

J. D. Harper, in charge of egg marketing of the I. A. A., was present at the meeting and stressed the point of producing a quality product.

1923 Pool of Red Top Seed Closed; 1,250,000 Pounds

With the exception of about a carload which is to be kept in the warehouse for sale to members for planting purposes, the entire red top pool of 1,250,000 pounds has been closed out and deliveries will probably be completed by March 1, according to Curt Anderson, manager of the Egyptian Seed Growers Exchange at Flora.

Workmen have practically completed cleaning seed in the Flora warehouse.

"The board of directors of the exchange are well satisfied with the pool this year and are making plans to increase our membership in the spring," says Mr. Anderson. "Results have been much better than last year when we organized too late to take advantage of the early market.

"This year's pool promises to net our membership a higher average than non-poolers received. However, the average net price cannot be stated until deliveries are all made and our returns and expenses are calculated."

A. F. B. F. Budget For Year 1924 Totals $160,000

The American Farm Bureau Federation has adopted a budget of $160,000 for the year 1924. This figure was made $30,000 less than the probable income for the year in order to take care of a deficit of that amount carried over from last year.

The I. A. A. executive committee agreed to advance the A. F. B. F. $5,000 of 1924 dues immediately to assist in the present financial condition. Other states are making similar advances. President S. H. Thompson of the I. A. A., has been appointed chairman of the A. F. B. F. finance committee.

Grant Re-hearing In Fruit-Vegetable Rate Case, March 7

The Interstate Commerce Commission has granted the I. A. A. and Illinois Commerce Commission a re-hearing in the fruit and vegetable rate case. It will be heard at 10 a. m. on March 7 at the Great Northern hotel, Chicago. The Transportation Department will represent the I. A. A.

The original proceedings were brought by the Public Service Commission of Indiana, attacking the rates on fruits and vegetables from Illinois points to Chicago, stating that the Illinois rates are discriminatory.

Delegates From 74 Counties Attend Limestone Meets

Seventy-four county farm bureaus have been represented by farm advisers or farm bureau members at the eight limestone meetings which have been held this winter at the call of J. R. Bent, Director of the Phosphate-Limestone Department. Farm advisers from 32 counties attended the last meeting, at Urbana during Farm Advisers' week.

Mr. Bent announces that 25 delegates from these eight meetings will gather at a state-wide conference at Springfield, at a date not yet definitely set, to effect a program for the standardization of limestone buying in the state on a basis that is fair to both producers of limestone and to farmers. The relation of the county farm bureaus and the I. A. A. to limestone purchasing will also be decided, he states.

ILLINOIS LED ALL AS PATRON OF LIVE STOCK CO-OPS IN '23

Shippers of State Saved $130,000 In Commissions By Selling Co-operatively

Illinois shippers consigned 17,431 cars or 25.2 per cent of the livestock handled by all Producers agencies in the United States in 1923, according to figures of the National Live Stock Producers Association. A total of 69,101 cars, 4,831,174 head of stock, with a gross value of $90,073,623.25, was marketed through the 14 Producers selling agencies now operating on as many markets.

Four other states that ranked high as Producer patrons were Indiana, with 14,080 cars; Iowa, 8,037 cars; Missouri, 6,885 cars; and Texas, 4,587 cars. Shipments originating in 39 states and one Canadian province were handled by Producers agencies during the year.

Illinois Savings

Savings in commissions to Illinois farmers who shipped to Producers agencies were approximately $130,000 for the calendar year, 1923. This saving in the form of refunds will come principally from the Chicago, E. St. Louis, Indianapolis and Peoria selling agencies. Illinois shipments to these agencies were as follows: Chicago, 8,147 cars; E. St. Louis, 5,461 cars; Peoria, 2,035 cars; and Indianapolis, 1,739 cars.

Three other agencies received shipments from the state during 1923, as follows, Evansville, 38; Buffalo, 9; and Cleveland, 2.

The Producers Commission Association at Indianapolis handled an average of 24 per cent of the livestock upon that market during 1923. Peoria handled 23 per cent; E. St. Louis, 11.7 per cent; and Chicago, 5.3 per cent.

1922 Comparison

The first Producers agency opened at E. St. Louis early in January, 1922. Six agencies, in all, opened that year and handled 18,590 cars of livestock valued at $26,688,363.17. Comparing these with 1923 figures, the volume of livestock handled by these cooperative commission companies increased 271 per cent in 1923.

They handled 8.4 per cent of all cars of livestock shipped to the markets where they operated, as compared with 6.6 per cent in 1922. Eight new agencies opened in 1923.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, E. L. Bill, Director.

Entry as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

Cowles; Fruit and Vegetable Marketing, A. B. Leeper; Live Stock Marketing, C. A. Stewart; Dairy Marketing, A. D. Lynch; Phosphate-Limestone, J. R. Bent; in charge Poultry and Egg Marketing, J. D. Harper; special representative on Tuberculosis Eradication, M. H. Petersen.

The 1924 Program

The 1924 budget recommended by the outgoing executive committee was one of the chief subjects of discussion at the first meeting of the new committee, January 31. It was decided to defer action on the new budget until the next meeting, at which time a two-day session will be held and all department directors will present their program of work for the year. The next meeting of the executive committee will be held March 5 and 6.

In the meantime the departments are planning their program of work for the year. On February 18 the departments will present their programs to the policy committee, and the policy committee will make definite recommendation to the executive committee. The policy committee consists of ex-presidents of the association, Dean Mumford of the Agricultural College and the President and Secretary.

The President and Secretary were empowered to employ a man to head the grain marketing work of the association by the executive committee. The association has not had an employee to head this work for two years.

The question of employing a man to head all marketing work in the association was discussed but no definite action or conclusion was reached.

—o—

No Room For Personalities

The I. A. A. has not hitched its wagon to any one of the cooperative marketing factions or faction leaders. It believes that cooperative marketing is greater than all faction leaders. It believes in taking the worth-while suggestions and ideas of all factions and applying them to the extent that is possible under existing conditions in Illinois.

This statement is made because leaders have failed to eliminate personal antipathies in the struggle to put over their ideas.

Only a few days ago Theodore Macklin of the University of Wisconsin in a series of lectures before Illinois farm advisers, dealt in personalities in differing with some parts of the Sapiro program of cooperative marketing. Other leaders and men of influence are guilty of the same thing. The incident has caused a stir in the state. There has been much talk about it. That part of Mr. Macklin's teaching has disturbed the confidence of farmers in leaders and in the whole movement.

The farm bureau wants and needs all of the constructive arguments, fundamental differences and suggestions that all leaders have to make. In that way there is hope of finding the right way of carrying out the big program of cooperative marketing. There is no room for personal scraps between leaders.

—o—

To Help Poor Farmer

A new organization called the Association to Restore Free and Unrestricted Grain Markets was recently organized in Chicago. It is composed of grain men, manufacturers and others and its purpose is to "secure such changes in existing statutes as will permit of normal operation with assurance that the necessary speculative and investment trade for carrying the farmer's surplus of grain will not be driven from the market by restrictive laws."

It doesn't say to fight the Capper-Tincher act, but that is what it means.

—o—

We're For Emergency Help

The executive committee endorsed the intent and purpose of the McNary-Haugen bill, now before Congress, because it believes it provides a way to overcome the emergency facing agriculture, the low buying power of the farm dollar.

The general belief and policy of the association is that final solution of the economic problems of agriculture will come through self-help. It has said that cooperative marketing holds forth more hope than any other remedy. In general the association has shied at political remedies.

At this particular time the I. A. A. believes that an emergency exists. Hard working, clear thinking, worthy farmers are going broke. After long waiting and hoping a new year is here with little relief in sight. That an emergency exists is not disputed. The President of the United States and banking and business interests admit it in their eagerness to loan farmers more money.

It is pretty generally conceded that cooperative marketing can not at once meet and cope with this emergency. That does not mean that the marketing program should not go on. The loan of more money to diversify production without better prices in sight is not a solution for the emergency. The McNary-Haugen bill deals directly with the problem. It designs to restore pre-war buying power of the farm dollar. True, it will increase the price to the consumer just as protective tariffs increase the price of many things we purchase, but the consumer will not be paying a greater portion of his dollar for farm products than he paid before the war.

—o—

Future Taxation Program

A saving of $2,000,000 in 1923 taxes sounds big, but, after all, organized agriculture has not much more than scratched the surface of the taxation problem. One of the big opportunities ahead is to secure changes in the constitution and in the revenue laws so that all classes of property will pay their just share of taxes. Another opportunity is to see to it that economy and honesty are used in spending tax moneys.

The resolution passed by the annual meeting expresses the stand of the Association on this question. The resolution follows:

"We recommend such changes in the Constitution and revenue laws of Illinois and in their administration as will equitably distribute the burden of taxation upon the net income of tangible property, intangible property, and personal service in proportion to the ability of such property and such persons to bear the burden.

"We deplore the issue of tax exempt securities, as leading to extravagance in public improvements, diverting vast sums of wealth from productive industry, and by affording easy means of escape from taxation, discourages the ownership of real estate. We recommend, therefore, the adoption of an amendment to the Federal Constitution at the earliest possible moment forbidding the further issue of tax-free securities.

"We demand the strictest economy and honesty, with all necessary safeguards therefor, in the expenditure of public money, national, state and local."

—o—

A Market All The Year Around

The milk condensary closed at Freeport the other day and almost immediately the milk received by the Vita Gold Dairy Products Company doubled in volume. Quite a bit of this increased volume came from former members of the farmers' marketing company who went to the condensary last summer because it was overbidding the market on milk—to get business away from the marketing company, it is said. Such things are common in the lives of most co-ops.

During the last three or four months the condensary's price on milk dropped below that of the farmers' company. It is reported that the condensary had large stocks of condensed milk on hand, the market was low, and that the condensary's headquarters in another city ordered the Freeport plant to close. And then a large number of the producers turned to their own company for a market for their milk.

The condensary at Freeport provided a market for milk just as long as there was profit in condensed milk for the manufacturer. Then it closed down. The same thing happened before the marketing company was started, but at that time the producers could not turn to their own company for a market. The lesson is that the cooperative milk marketing company at Freeport provides milk producers a market all the year around. It pays what the market justifies. It manufactures and markets dairy products in the most profitable form that it can, depending upon seasonable conditions and other factors. It does not close down and leave the farmer without a market when the profit in manufactured milk products is not great.

—o—

Progress of Producers

Cooperative commission companies operating under the National Producers plan handled 271 per cent more cars of livestock in 1923 than they did in 1922. Gross value of livestock handled increased from $26,688,363.17 to $90,073,623.25. The first selling agency opened early in January, 1922, five more opened during that year, and eight in 1923. There are now a total of fourteen Producers agencies in operation.

All Producers companies increased the volume they handled on the markets where they were in operation from 6.6 per cent in 1922 to 8.4 per cent in 1923. This also shows growth. Then there is also the fact that approximately $130,000 in commissions was put aside as savings for Illinois patrons alone during the calendar year, 1923.

These facts are all encouraging.

An annual meeting speaker said that at Indianapolis where the Producers handled an average of 24 per cent of the total volume on the market in 1923, the records of the market show that violent price fluctuations from day to day have been largely eliminated. At Peoria, where the co-op took care of 23 per cent of the 1923 volume, the prices have more nearly approached the Chicago level than ever before.

These are facts from markets where the farmers' commission companies exert a controlling influence. They illustrate what must be done elsewhere. They show that the refund is not the big thing but that increased volume of business is absolutely necessary if the Producers selling agencies are to wield greater influence on livestock markets.

Protection Against Purchase of T. B. Cattle Insured By New Agreement

A uniform selling contract has been made between the Illinois Agricultural Association and the Jefferson county (Wis.) Holstein-Friesian Breeders' Association to regulate the sale of grade and pure bred dairy cattle between members of the two organizations. This action is declared by I. A. A. officials to be the most important step that has ever been taken by the association to insure farm bureau members that they are purchasing tuberculosis-free cattle.

This agreement, which has been signed by President Thompson and Secretary Fox, is the first one of its kind to be made in the United States. The I. A. A. plans to make similar agreements with breed associations, county farm bureaus, and other farm organizations in Wisconsin and other states which have dairy cattle for sale and are looking for a market in Illinois.

What Led Up To It

Last fall, farm bureau members asked the I. A. A. to engage actively in the tuberculosis eradication program. They charged that unscrupulous cattle dealers were unlawfully bringing tuberculous dairy cattle into the state and thus were nullifying the eradication program.

The I. A. A. immediately offered a reward of $100, to be matched by individual counties for the first arrest and conviction of a bootlegger of tuberculous cattle within the county. M. H. Petersen of Lake county, was employed to take charge of the work under the direction of the Livestock and Dairy departments.

Since that time, much help has been given to counties in their campaigns to secure county appropriations and everything possible has been done to encourage testing. Now comes this first sale agreement to protect farm bureau members from the purchase of diseased animals.

Provisions of Agreement

The sale contract made by the I. A. A. with the Jefferson county association is an agreement entered into between the buyer and the seller, fulfillment of the buyer's part being guaranteed by the I. A. A., and that of the seller by his local bank.

The seller agrees to refund to the buyer the purchase price of any animal which may react to the tuberculin test within a designated period, less the salvage obtained by the buyer, providing that the seller is furnished with an affidavit signed by a qualified veterinarian, stating the results of the test and also with a statement from the commission firm showing the amount received from the sale of the carcass.

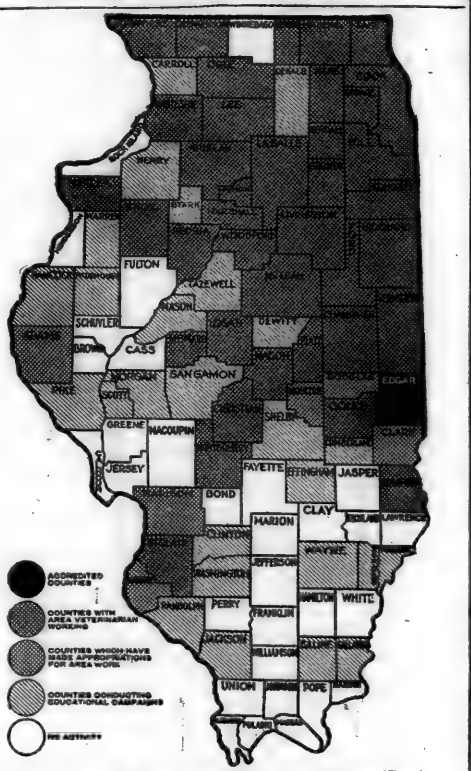
Sanitary Quarters

The buyer agrees to keep animals purchased in sanitary quarters and in a herd which the county veterinarian, working under the federal and state tuberculin testing plan, guarantees is reasonably free from tuberculosis. The premises to which the animals are taken must have been properly cleaned and disinfected since a reactor was found.

The buyer also agrees to notify the seller 15 days before the retest is made and allow him the privilege of having his veterinarian present during the retest.

Demand Increasing

"This contract is especially timely now that Illinois has entered into such an extensive tuberculosis eradication program," states M. H. Petersen, special I. A. A. representative in charge of T. B. work. "Even if the cattle dealer system had been satisfactory in the past, it could not operate successfully with the large number of cattle that must be imported to replace reactors.



"In 1922, government figures show that over 12,000 dairy cattle were brought into the state from Wisconsin alone. That was before testing had become very extensive in the state. For instance, in November, 1922, 485 reactors were tested out of Illinois herds. In November, 1923, the number was 1,879. Corresponding figures for December for the two years were 425 and 1,222."

The number of reactors is increasing every month, Mr. Petersen declares, and farm bureau members must be protected when they replace these animals. That is the big reason for the new selling agreement.

Many Counties Testing

It is estimated that at least 25 counties have embarked upon a tuberculosis eradication program since the I. A. A. actively entered into the work last November. At this writing, 75 of the 102 counties in the state are either testing or preparing for it.

Fourteen counties have duplicated the I. A. A. reward offer of $100 for the first arrest and conviction of bootleggers of tuberculous cattle within the county. A total of 39 counties have county veterinarians now in their employ testing under the area plan. Seven other counties have made appropriations for the hire of a county veterinarian. Twenty-nine counties are engaged in campaigns to secure appropriations from their boards of supervisors for hiring veterinarians.

Progress of Tuberculosis Eradication in Illinois to February 15, 1924

County Progress

Edgar county has completed its second test of all cattle in the county and is expected to be placed on the federal-accredited list of disease-free counties in the near future. It is required that less than one-half of one per cent of all cattle in a county react to the tuberculin test in order to be placed on the federal list.

Mercer county finished its first test in December, and Champaign and McLean counties are now planning a drive to finish their first tests.

Clair Hay Chosen Head of Illinois Advisers' Ass'n

Clair Hay, farm adviser of Christian county, was elected president of the Illinois State Farm Advisers' Association at their meeting in Urbana. Other officers chosen were, J. Franklin Hedgecock, Will county, vice-president; L. S. Griffith, Lee county, secretary; and F. A. Fisher, Wabash county, treasurer.

Members on the advisers' executive board are Harrison Fahrnkopf, McLean county; E. W. Rusk, Macoupin county; and J. H. Lloyd, Hancock county.

Dairy Committee Chairman Active Farm Bureau Man

Jacob Olbrich, whose picture arrived too late to be included with the other new members of the committee in the Jan. 5 issue of the Record, is the new committeeman from the tenth and eleventh districts. Mr. Olbrich, who was also recently appointed chairman of the I. A. A. dairy committee, is a dairy farmer near Harvard, McHenry county, and a leader in county farm bureau work. He served as treasurer in the county association for four years and was a member of the I. A. A. dairy marketing committee in 1920 and 1921.

Jacob Olbrich

Adams Co. Farmers Sold $1,766,676.21 Thru Co-Operatives

A gross business totalling approximately $1,766,676.21 was handled by livestock, dairy, fruit and vegetable, and grain cooperative organizations in Adams county in 1923, according to Farm Adviser Ray E. Miller.

The Adams County Shippers' Association did the largest business, selling 689 cars of livestock with a gross value of $969,068.55. This is one of the largest shipping associations in the United States.

Farmers' elevators did the following business: Ursa, $262,623.59; Chatten, $182,920.78; and La Prairie, $80,000. The Western Illinois Fruit Exchange sold 185 cars of fruits and vegetables with a gross value of approximately $100,000. The Quincy Cooperative Milk Producers Association had total sales for the year of $182,063.29, producer members getting 53 per cent of the consumer's dollar on the average.

Conference Names Curt Anderson On Executive Body

Curt Anderson, executive committee member from the 24th district, was elected to the executive committee of the National Council of Cooperative Associations in Washington, February 8. Mr. Anderson was delegated by the executive committee to represent the I. A. A. at the meeting.

Walton Peteet, former director of cooperative marketing for the A. F. B. F., was employed as secretary for the National Cooperative Council. It was determined that the major work of the organization this year would be in assisting the Wheat Advisory committee in organizing a national pool. The organization will be financed by a 5 cent membership fee from the members of cooperative marketing associations. The plan is to collect this membership fee from the marketing organizations rather than from individuals. Secretary Peteet will have his office in Chicago.

COMMITTEE HEADS OF I. A. A. NAMED BY PRES. THOMPSON

Frank Barton Is Chairman of Both Finance and Legislative Groups; Special Committees

President S. H. Thompson announced, in part, the personnel of the 1924 standing committees for the association at the January 31 meeting of the executive committee in the Chicago office.

Members of the finance committee are Frank D. Barton, Cornell, chairman; Earl C. Smith, Detroit; and W. H. Moody, Port Byron. Mr. Barton is also chairman of the legislative committee. The other members are H. E. Goembel, Hooppole, and A. C. Everingham, Hutsonville.

The various departmental committees of the I. A. A. are headed as follows: dairy marketing, Jacob Olbrich, Harvard; livestock marketing, G. F. Tullock, Rockford; poultry and egg marketing, C. E. Bamborough, Polo; fruit and vegetable marketing, Curt Anderson, Xenia; grain marketing, H. E. Goembel, Hooppole; information, R. F. Karr, Iroquois; organization, Earl C. Smith, Detroit; limestone-phosphate, Stanley Castle, Alton.

Two special committees were named, one on schools headed by J. L. Whisnand, Charleston; and the other on insurance with C. B. Watson, DeKalb, chairman.

Other members of these committees will be announced at the March 6 meeting of the executive committee.

I. A. A. Represented By J. C. Watson At Washington Meet

The I. A. A. was represented by John C. Watson in a conference at Washington, February 8, at which the crop reporting service of the United States Department of Agriculture was discussed.

Mr. Watson took part in the conference at the request of Secretary of Agriculture Wallace. He states that it is generally recognised that there are many shortcomings and flaws in the present crop reporting service, and because this service is the chief source of information, it is important that the information be accurate and reliable.

New Live Stock Schedule On Rock Island Railroad

Beginning February 18, 1924, a new C. R. I. & P. train for livestock shipments to the Chicago market will leave Galva at 12 o'clock noon on Mondays and Wednesdays and will make pick-ups at intermediate points between Galva and Peoria. It will make connections with M. & St. L. trains coming into Peoria, leaving there at 5 p. m., making pick-ups between Peoria and Bureau and arriving in Chicago at 5 a. m. on Tuesdays and Thursdays. This schedule is only temporary, but if the business warrants it, the train will be maintained in the future.

DeWITT FARMERS GET BIG RETURNS FROM INVESTMENT

Over $86,400 Saved In Land Taxes In Two Years of Tax Work By Farm Bureau

Figures talk and the larger they are the louder they talk. That's what the DeWitt County Farm Bureau thinks. Figures taken from the tax books of DeWitt county show that land owners in that county will pay $83,403.81 less land taxes for 1923 than they did for 1922. But that's only part of the story.

The reduction in land valuations for state tax purposes in 1922 secured by the I. A. A. through its appearance before the Illinois Tax Commission clipped $3,063.61 from DeWitt county land taxes that year. Adding 1922 and 1923 reductions, the total is $86,467.42, which is equivalent to 37.4 cents per acre or $63.43 per farm, says Farm Adviser O. M. Allyn of DeWitt county.

Saving over $51,000

"Since its inception six years ago, the DeWitt County Farm Bureau, the Illinois Agricultural Association and the American Farm Bureau Federation has cost DeWitt county farmers $35,097.55," states Mr. Allyn. "Subtracting this from the amount saved in 1922 and 1923 taxes, it leaves a balance of $51,369.87, together with all the other service rendered in a hundred different ways."

During 1923 the DeWitt County Farm Bureau made an investigation of land tax conditions in the county under the same plan that the I. A. A. Taxation Department directed investigations in 56 other counties. Inequalities were found showing that farm land was valued too high for tax purposes. The facts and figures were presented to the county board of review and the reduction, as stated, was secured.

Who Presented Case?

"Some farmers will tell you that the farm bureau didn't have anything to do with the reduction of taxes on farm lands and that they would have been reduced anyway," says Mr. Allyn. "Simply ask them who presented the farmers' case before the local board of review. Ask them who fought the farmers' case before the state tax commission."

Agree To Ship Livestock Thru Marketing Ass'ns

Three cooperative shipping associations have recently adopted a membership agreement which calls for the shipment of all livestock through the association, reports C. A. Stewart of the Livestock Marketing Department.

Lawrence county has organized a county association under this plan and local organizations at Sycamore and Rockford have both reorganized and adopted the membership agreement. Mr. Stewart says that the annual meetings of shipping associations are attended better and more interest is being shown than ever before.

$10,000 MORE SECURITIES

In January an additional $10,000 was invested in Government securities, making a total of $130,000 in the I. A. A. reserve fund.

Ohio Is In Same Boat On Problem Of Land Values

After speaking at the annual meeting of the Ohio Farm Bureau Federation, John C. Watson of the I. A. A., made an investigation of valuations for tax purposes in Wyandot county and found that Ohio farmers have the same problems we are confronted with.

Making the investigation the same as has been carried on in a large number of counties of Illinois, Mr. Watson found that farm land in Wyandot county is valued at 93 per cent of the actual sales values, while town and city lots carry a valuation of only 72 per cent of their actual sales values.

ENDORSES FARM RELIEF MEASURE

(Continued from page 1)

said, "We have protective tariffs for industry and immigration laws to protect labor. This bill is designed to protect the farmer."

Readjust Tariff

The McNary-Haugen bill applies only to commodities of which there is an exportable surplus, and on which the market price is below the ratio based on pre-war prices. Since domestic prices cannot be sustained without a prohibitory tariff, the bill gives fuller power to the President and the commission provided for, to make tariff readjustments with regard to any commodity which it has been found necessary to protect.

The commission also has special power to "collect and disseminate information concerning the supply and demand for agricultural commodities throughout the world, including the conditions affecting such commodities, and to advise producers as to acreage or quantities that it may appear wise to produce."

Two Bodies Provided For

The United States Agricultural Export Commission and the Agricultural Export Corporation, the two bodies to be created by the bill to determine the existence and nature of emergencies and to arrive at what should be fair prices for farm products, would be maintained for ten years. At the end of that time many of their powers would be transferred to the Secretary of Agriculture.

Regarding the question of cooperative marketing being affected by the McNary-Haugen bill, Mr. Thompson stated that he believed it would open up the way if it demonstrated the idea is right, and would be of assistance to cooperatives handling those commodities affected by export surplus.

Speed Settlement When I. A. A. Acted

Three fires in one summer, and no damage settlement! Pretty poor—so thought George E. Kite, of Clark county, after trying vainly for a year to collect from the railroad that started the fires on his farm.

Then, in October, 1922, he wrote to the Transportation Department of the I. A. A., asking what could be done about the matter. A letter from the department to the claim agent of the railroad brought prompt action, and in January Mr. Kite was granted a satisfactory settlement.

THE FIRST STEP IN MARKETING

Constitution Approved For Bureau Baseball League

Illinois county farm bureaus are "ready to go" for an organized program of baseball games. The constitution of the Illinois Farm Bureau Baseball League, drawn up by a committee headed by Farm Adviser R. W. Dickenson, Cass county, was approved by farm advisers interested at Farm Advisers' Week at the University of Illinois. Mr. Dickenson will meet with the I. A. A. executive committee on March 6 to officially present the project to the association.

The constitution provides that any farm bureau member or member of a farm bureau family whose principal dependence is on the farm, shall be eligible to play in the league, providing that the farm bureau membership shall be contracted for in the customary way.

Management

Management in the league is to be vested in an executive committee, elected for one year, consisting of three men, a president, vice-president and secretary-treasurer. The secretary-treasurer will be appointed by the I. A. A. executive committee, and the president and vice-president will be elected by the board of directors, to consist of one director from each farm bureau joining the league.

Each farm bureau team must bear its own expenses in the league and any money received at games through collection, concessions or otherwise is to be equally divided between playing teams at any game.

May District State

The executive committee of the baseball league will district the state when enough counties join, with district directors. Games will probably be scheduled for championship of bureaus within the districts and then between districts, the final game being for the state championship.

According to the constitution, no games shall be played on Sunday.

Fee for membership in the league is $10.00, which should accompany the application of a farm bureau for membership. Mr. Dickenson, as chairman of the league steering committee, requests that applications for membership be sent to him until officials are selected.

Cass First to Apply

Cass county was the first county to apply for membership in the league, action having been taken at the meeting of the farm bureau executive committee on February 4. George R. Cline, who has managed the Cass County Farm Bureau Baseball Team for the past two years, was appointed director from that county.

Macoupin, Logan and Sangamon counties were also active in starting to organize the league, and Morgan, Scott, Pike, Mason, Menard, and Brown counties are among those who may join before spring, as they have shown interest in it.

Carl Lundgren, varsity baseball coach at the University of Illinois, gave help to the organizers of the league and the Extension Department has given its approval of the plan as an asset to the morale and spirit of farm bureau work.

"Illini" Brand of Butter To Be Sold By Ill-Mo Company

The "Illini" brand of butter will be put on the market within a short time by the Ill-Mo Dairy Company at E. St. Louis, according to an announcement from the concern. The Ill-Mo company was recently organized with a capital stock of $16,000 in order to handle the cream business at the plant of the Illinois-Missouri Cooperative Milk Marketing Company.

This company started to buy cream on January 1, and its business has been growing nicely since then. A. E. Richardson, who is managing the affairs of the company, announces that the company is giving accurate weight and test, prompt payment for cream, and pays exactly what the market will permit. "A dependable market for cream shippers all the year around" is the aim of the company.

It is the plan of the management to build up a market for the "Illini" brand quality butter in the St. Louis territory, instead of shipping it at a distance. Profits from the cream business will go toward paying the debts of the old marketing company, released from bankruptcy last fall.

TEN HATCHERIES MAY SELL CHICKS WITH STATE LABELS

Better Poultry Plan Well Under Way; Day Says Public Is Judge of Plan

Ten hatcheries in Illinois have met the requirements to sell baby chicks under the state-accredited hatchery plan which the I. A. A. was instrumental in starting in 1922. They may use state labels on all shipments of chicks which they sell. The following is the list furnished by the Division of Standardization and Markets of the State Department of Agriculture:

Walnut Ridge Hatchery, Mrs. Dorothea Rainey, Butler; Stouffer Egg Farm, W. R. Stouffer, Mt. Morris; O. E. Utech Hatchery, Mr. O. E. Utech, New Holland; Rock River Hatchery, Mr. F. W. Reubensaal, Mgr., Rockford; Metzger Hatchery, Mr. Alvin P. Metzger, Rockford; Chestnut Hatchery, Chestnut; Lake Fork Farm Hatchery, Linn O. Rau, Kenney; Golden Buff Hatchery, Mr. L. A. Werlich, Lincoln; Jones & Howard, Arandel Farm, Heyworth; Mr. George D. Butcher, Wenona.

H. W. Day, Supervising Inspector of the Division of Standardization and Markets, says, "The chick buying public will be the judge of the accredited hatchery plan. Opponents to our plan have stated that people do not care for accredited chicks. It remains for the public to prove or disprove this argument. Already several of the accredited hatcheries have sold their entire output for this season."

According to Mr. Day, a number of large hatcheries could not get their flocks in shape for inspection for this season but have stated that they want to start early next fall and get on the accredited list. In addition to the flocks inspected for the hatcheries, the division has a reserve list of approximately 50 flocks which have been inspected and which will sell hatching eggs. This list may be secured upon application to the office at Springfield.

Pay Full Rates When Shipping In Single-Deck Cars

The Transportation Department advises that when a railroad is unable to furnish double-deck cars for the loading of livestock at country points, and two single-deck cars are furnished instead, the shipper is required to pay charges on the basis of each single-deck car used. The information frequently given by agents at country points that the double-deck rate applies when two singles are furnished is not accurate. Six days is usually required in obtaining a car, and if a double-deck is not furnished, the shipper may expect to pay for each single deck he uses.

UNIVERSITY OF ILLINOIS
URBANA, ILLINOIS 10-N.L-7-22

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 2 | March 5, 1924 | Number 5

21st DISTRICT TAKES A HAND IN I. A. A. WORK

First Meeting of Series Asks Action On McNary-Haugen Bill; Want Office Removed

A meeting of county farm bureau officers and farm advisers of the 21st district at Carlinville, February 15, asked the I. A. A. to send a committee of three men to Washington to support the McNary-Haugen bill, went on record favoring the removal of the I. A. A. offices to Springfield and set forth their reasons in a resolution to the I. A. A., and asked that a survey of the radio field be made with the idea of finding out how the farm bureau can make use of this medium.

You will remember that the annual meeting at Galesburg expressed the desire that executive committeemembers of the I. A. A. meet with leaders of their districts several times a year so that committeemen could become better acquainted with the needs of the district and the district could know more about the work of the I. A. A.

First Meeting of Its Kind

The Carlinville meeting was the first of four similar meetings to be held during the year by the 21st district. In fact it is the first time that the district has met with their I. A. A. committeeman. It was decided that the next meeting will be held at Hillsboro on April 24.

The presidents, farm advisers and a group of county committeemen were present from each of the four counties in the district. The whole group took the attitude that the I. A. A. is their I. A. A., that they were responsible for its success or failure as far as the district was concerned. "We must take a part in the work of the I. A. A." said H. J. Schultz, president of the Macoupin County Farm Bureau, who was chosen chairman of the meeting. "We are not doing our duty if we don't take a hand. We must tell Mr. Sorrells, our committeeman, what the district wants and needs."

Ask Office Removal

A long resolution directed to the I. A. A. executive committee set forth the reasons for moving the offices to Springfield. In the discussion of the McNary-Haugen bill it was stated that if the bill is worth the endorsement of the I. A. A. it is worth working for.

It was decided that the grain marketing question will be the chief subject of discussion at the next meeting.

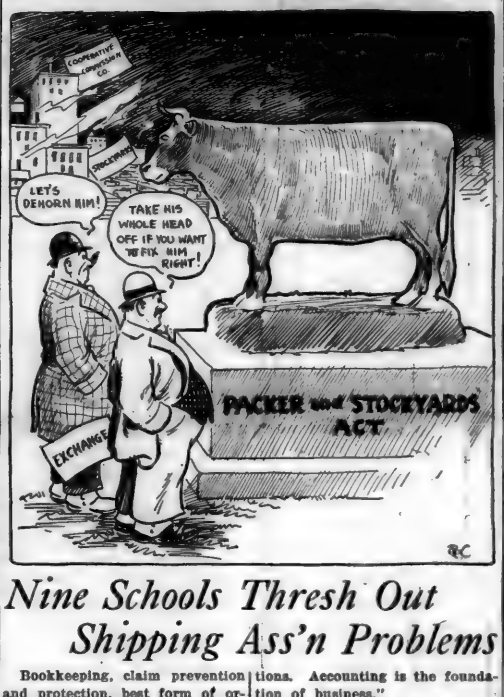
Broom Corn Men Start Campaign For Membership

A meeting of the organization committee of the Illinois Broom Corn Growers Cooperative Association held at Mattoon on February 20, determined to go forward on a membership campaign in March.

The I. A. A. Organization department will assist in the organization work and the Department of Information will help in carrying on publicity. In order to make the membership agreement effective, 75 per cent of the growers of the district must be members of the association by April first. The total number of growers in the district is estimated at about 1,000.

I. A. A. To Fight For McNary Bill At Washington

"I'm ready to go to the mat on the McNary-Haugen bill," said President S. H. Thompson as he left for Washington. "They are having a good time down there passing the buck on relief for agriculture. I am going down to find out the situation on this bill."



Mr. Thompson has suggested to Gray Silver, Washington representative of the American Farm Bureau Federation, that a meeting of presidents and secretaries of mid-west farm bureaus and others interested in relief legislation be called to promote the McNary bill. He believes that an organization should be formed to promote the bill, each state having a representative in Washington to assist in a campaign. The first job, says Mr. Thompson, is get the bill on the calendar.

Sentiment Grows For McNary Bill, Committee Says

The I. A. A. Legislative committee meeting at the office February 25 endorsed President Thompson's action in going to Washington to support the McNary-Haugen bill.

In a report of their meeting to President Thompson, the committee states, "We find a growing and rather insistent demand on the part of the members for the association to take some definite steps toward securing favorable action on the McNary-Haugen bill. We have unanimously decided that a representative of this association should go to Washington to follow this and other relief legislation."

SHALL WE LET 'EM DO IT?

Nine Schools Thresh Out Shipping Ass'n Problems

Bookkeeping, claim prevention and protection, best form of organization, publicity, farm bureau relation and terminal commission companies were some of the subjects of discussion at the nine cooperative livestock shipping association schools conducted by the University Extension division and the I. A. A.

Here is a little glimpse of what happened at the Springfield meeting. There were 50 present at the school, 19 managers. The boys said it was a fair sample of the other schools.

Bookkeeping

"You can't be sure you are efficient unless you have a good bookkeeping system," said V. Vaniman of the University. He exhibited and explained large charts showing a system of keeping records. The I. A. A. has the loose-leaf book forms for sale at cost.

"The aim of the shipping association is to get the greatest return possible to the producer, but you can't tell when you are doing that unless you have the facts and figures. You should keep records if for no other reason than for self-protection. If you don't you have no comeback when some one questions your actions. Accounting is the foundation of business."

Transportation Problems

"You must have facts to hitch to when making a claim," L. J. Quasey of the I. A. A. said. "To protect your rights count the stock as it goes into the car. Your count must be as good as that of the railroad when it comes to settling claims. A post card or some other manner of verifying your car order when made over the phone, is good protection. If you overload, your case will be hurt if you have a loss.

"You have grounds for a claim if stock is delayed on the road to market. With certain exceptions the railroad is responsible for delivery in as good a condition as received. If you think rates are out of line, send the information to some reliable agency or to us. If you continually get cars with several inches of bedding in them, let us know and we will try to straighten the matter out."

Publicity

We can tell our story to a large audience through the newspapers by furnishing them with the news that we have, said E. T. Robbins of the University, who was chairman of the meeting.

(Continued on page 4)

ATTEMPT IS MADE TO CURB ACTIVITIES OF LIVESTOCK CO-OPS

Amendment To Packer-Stockyards Act Would Harm Producers Greatly--Stewart

An attempt on the part of interests inimical to cooperative livestock marketing which, if passed, would make it very difficult for cooperative commission companies to operate as heretofore is seen in H. R. 5044, a proposed amendment to the Packers and Stockyards act. It was introduced by Congressman Thomas S. Williams, Louisville, 24th district of Illinois, and has been referred to the House Committee on Agriculture.

The House committee was scheduled to take up the amendment on February 28. President John Brown and other representatives of the National Live Stock Producers Association and President Thompson of the I. A. A. went to Washington to appear against the amendment.

Would Work Great Harm

"Several sections of this amendment would work great harm to cooperative marketing of livestock," declares C. A. Stewart, Director of Livestock Marketing for the I. A. A. "For instance, one section makes it unlawful for cooperative commission companies to handle the livestock of anyone except its own members.

"Another provision states that each member of a cooperative association of livestock producers must bind himself by written agreement to assume, as an obligation of membership, the responsibilities of such associations. The same provision would apply to a shipping association member of a cooperative commission company, and, in addition, every shipping association must file a declaration with the Secretary of Agriculture that each of its members has consented to membership in the cooperative commission association."

Definition of Co-op.

The amendment would define a cooperative association of livestock producers as an association "entirely composed of and wholly managed and controlled by producers of livestock.

"This might be taken to mean that even the manager of a Producers selling agency would have to be a livestock producer," states Mr. Stewart.

DeWITT FARMERS GET BIG RETURNS FROM INVESTMENT

Over $86,400 Saved In Land Taxes In Two Years of Tax Work By Farm Bureau

Figures talk and the larger they are the louder they talk. That's what the DeWitt County Farm Bureau thinks. Figures taken from the tax books of DeWitt county show that land owners in that county will pay $83,403.81 less land taxes for 1923 than they did for 1922. But that's only part of the story.

The reduction in land valuations for state tax purposes in 1922 secured by the I. A. A. through its appearance before the Illinois Tax Commission clipped $3,063.61 from DeWitt county land taxes that year. Adding 1922 and 1923 reductions, the total is $86,467.42, which is equivalent to 37.4 cents per acre or $63.43 per farm, says Farm Adviser O. M. Allyn of DeWitt county.

Balance over $51,000

"Since its inception six years ago, the DeWitt County Farm Bureau, the Illinois Agricultural Association and the American Farm Bureau Federation has cost DeWitt county farmers $35,097.55," states Mr. Allyn. "Subtracting this from the amount saved in 1922 and 1923 taxes, it leaves a balance of $51,369.87, together with all the other service rendered in a hundred different ways."

During 1923 the DeWitt County Farm Bureau made an investigation of land tax conditions in the county under the same plan that the I. A. A. Taxation Department directed investigations in 56 other counties. Inequalities were found showing that farm land was valued too high for tax purposes. The facts and figures were presented to the county board of review and the reduction, as stated, was secured.

Who Presented Case?

"Some farmers will tell you that the farm bureau didn't have anything to do with the reduction of taxes on farm lands and that they would have been reduced anyway," says Mr. Allyn. "Simply ask them who presented the farmers' case before the local board of review. Ask them who fought the farmers' case before the state tax commission."

Agree To Ship Livestock Thru Marketing Ass'ns

Three cooperative shipping associations have recently adopted a membership agreement which calls for the shipment of all livestock through the association, reports C. A. Stewart of the Livestock Marketing Department.

Lawrence county has organized a county association under this plan and local organizations at Sycamore and Rockford have both reorganized and adopted the membership agreement. Mr. Stewart says that the annual meetings of shipping associations are attended better and more interest is being shown than ever before.

$10,000 MORE SECURITIES

In January an additional $10,000 was invested in Government securities, making a total of $130,000 in the I. A. A. reserve fund.

Ohio Is In Same Boat On Problem Of Land Values

After speaking at the annual meeting of the Ohio Farm Bureau Federation, John C. Watson of the I. A. A., made an investigation of valuations for tax purposes in Wyandot county and found that Ohio farmers have the same problems we are confronted with.

Making the investigation the same as has been carried on in a large number of counties of Illinois, Mr. Watson found that farm land in Wyandot county is valued at 93 per cent of the actual sales values, while town and city lots carry a valuation of only 72 per cent of their actual sales values.

THE FIRST STEP IN MARKETING

Constitution Approved For Bureau Baseball League

Illinois county farm bureaus are "ready to go" for an organized program of baseball games. The constitution of the Illinois Farm Bureau Baseball League, drawn up by a committee headed by Farm Adviser R. W. Dickenson, Cass county, was approved by farm advisers interested at Farm Advisers' Week at the University of Illinois. Mr. Dickenson will meet with the I. A. A. executive committee on March 6 to officially present the project to the association.

The constitution provides that any farm bureau member or member of a farm bureau family whose principal dependence is on the farm, shall be eligible to play in the league, providing that the farm bureau membership shall be contracted for in the customary way.

Management

Management in the league is to be vested in an executive committee, elected for one year, consisting of three men, a president, vice-president and secretary-treasurer. The secretary-treasurer will be appointed by the I. A. A. executive committee, and the president and vice-president will be elected by the board of directors, to consist of one director from each farm bureau joining the league.

Each farm bureau team must bear its own expenses in the league and any money received at games through collection, concessions or otherwise is to be equally divided between playing teams at any game.

May District State

The executive committee of the baseball league will district the state when enough counties join, with district directors. Games will probably be scheduled for championship of bureaus within the districts and then between districts, the final game being for the state championship.

According to the constitution, no games shall be played on Sunday.

Fee for membership in the league is $10.00, which should accompany the application of a farm bureau for membership. Mr. Dickenson, as chairman of the league steering committee, requests that applications for membership be sent to him until officials are selected.

Cass First to Apply

Cass county was the first county to apply for membership in the league, action having been taken at the meeting of the farm bureau executive committee on February 4. George R. Cline, who has managed the Cass County Farm Bureau Baseball Team for the past two years, was appointed director from that county.

Macoupin, Logan and Sangamon counties were also active in starting to organize the league, and Morgan, Scott, Pike, Mason, Menard, and Brown counties are among those who may join before spring, as they have shown interest in it.

Carl Lundgren, varsity baseball coach at the University of Illinois, gave help to the organizers of the league and the Extension Department has given its approval of the plan as an asset to the morale and spirit of farm bureau work.

"Illini" Brand of Butter To Be Sold By Ill-Mo Company

The "Illini" brand of butter will be put on the market within a short time by the Ill-Mo Dairy Company at E. St. Louis, according to an announcement from the concern. The Ill-Mo company was recently organized with a capital stock of $15,000 in order to handle the cream business at the plant of the Illinois-Missouri Cooperative Milk Marketing Company.

This company started to buy cream on January 1, and its business has been growing nicely since then. A. E. Richardson, who is managing the affairs of the company, announces that the company is giving accurate weight and test, prompt payment for cream, and pays exactly what the market will permit. "A dependable market for cream shippers all the year around" is the aim of the company.

It is the plan of the management to build up a market for the "Illini" brand quality butter in the St. Louis territory, instead of shipping it at a distance. Profits from the cream business will go toward paying the debts of the old marketing company, released from bankruptcy last fall.

TEN HATCHERIES MAY SELL CHICKS WITH STATE LABELS

Better Poultry Plan Well Under Way; Day Says Public Is Judge of Plan

Ten hatcheries in Illinois have met the requirements to sell baby chicks under the state-accredited hatchery plan which the I. A. A. was instrumental in starting in 1923. They may use state labels on all shipments of chicks which they sell. The following is the list furnished by the Division of Standardization and Markets of the State Department of Agriculture:

Walnut Ridge Hatchery, Mrs. Dorothea Rainey, Butler; Stouffer Egg Farm, W. B. Stouffer, Mt. Morris; O. E. Utech Hatchery, Mr. O. E. Utech, New Holland; Rock River Hatchery, Mr. F. W. Reubensaal, Mgr., Rockford; Metzger Hatchery, Mr. Alvin P. Metzger, Rockford; Chestnut Hatchery, Chestnut; Lake Fork Farm Hatchery, Linn O. Rau, Kenney; Golden Buff Hatchery, Mr. L. A. Werlich, Lincoln; Jones & Howard, Arundel Farm, Heyworth; Mr. George D. Butcher, Wenona.

H. W. Day, Supervising Inspector of the Division of Standardization and Markets, says: "The chick buying public will be the judge of the accredited hatchery plan. Opponents to our plan have stated that people do not care for accredited chicks. It remains for the public to prove or disprove this argument. Already several of the accredited hatcheries have sold their entire output for this season."

According to Mr. Day, a number of large hatcheries could not get their flocks in shape for inspection for this season but have stated that they want to start early next fall and get on the accredited list. In addition to the flocks inspected for the hatcheries, the division has a reserve list of approximately 50 flocks which have been inspected and which will sell hatching eggs. This list may be secured upon application to the office at Springfield.

Pay Full Rates When Shipping In Single-Deck Cars

The Transportation Department advises that when a railroad is unable to furnish double-deck cars for the loading of livestock at country points, and two single-deck cars are furnished instead, the shipper is required to pay charges on the basis of each single-deck car used. The information frequently given by agents at country points that the double-deck rate applies when two singles are furnished is not accurate. Six days is usually required in obtaining a car, and if a double-deck is not furnished, the shipper may expect to pay for each single deck he uses.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 2 | March 5, 1924 | Number 5

21st DISTRICT TAKES A HAND IN I. A. A. WORK

First Meeting of Series Asks Action On McNary-Haugen Bill; Want Office Removed

A meeting of county farm bureau officers and farm advisers of the 21st district at Carlinville, February 15, asked the I. A. A. to send a committee of three men to Washington to support the McNary-Haugen bill, went on record favoring the removal of the I. A. A. offices to Springfield and set forth their reasons in a resolution to the I. A. A., and asked that a survey of the radio field be made with the idea of finding out how the farm bureau can make use of this medium.

You will remember that the annual meeting at Galesburg expressed the desire that executive committee members of the I. A. A. meet with leaders of their districts several times a year so that committeemen could become better acquainted with the needs of the district and the district could know more about the work of the I. A. A.

First Meeting of Its Kind

The Carlinville meeting was the first of four similar meetings to be held during the year by the 21st district. In fact it is the first time that the district has met with their I. A. A. committeeman. It was decided that the next meeting will be held at Hillsboro on April 24.

The presidents, farm advisers and a group of county committeemen were present from each of the four counties in the district. The whole group took the attitude that the I. A. A. is their I. A. A., that they were responsible for its success or failure as far as the district was concerned. "We must take a part in the work of the I. A. A." said H. J. Schultz, president of the Macoupin County Farm Bureau, who was chosen chairman of the meeting. "We are not doing our duty if we don't take a hand. We must tell Mr. Sorrells, our committeeman, what the district wants and needs."

Ask Office Removal

A long resolution directed to the I. A. A. executive committee set forth the reasons for moving the offices to Springfield. In the discussion of the McNary-Haugen bill it was stated that if the bill is worth the endorsement of the I. A. A. it is worth working for.

It was decided that the grain marketing question will be the chief subject of discussion at the next meeting.

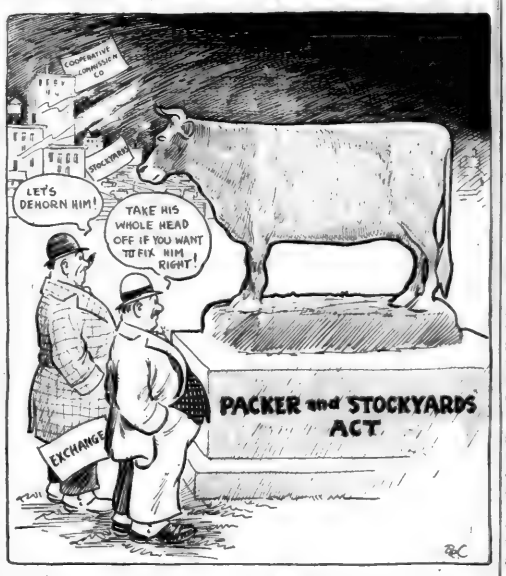
Broom Corn Men Start Campaign For Membership

A meeting of the organization committee of the Illinois Broom Corn Growers Cooperative Association held at Mattoon on February 20, determined to go forward on a membership campaign in March.

The I. A. A. Organization department will assist in the organization work and the Department of Information will help in carrying on publicity. In order to make the membership agreement effective, 75 per cent of the growers of the district must be members of the association by April first. The total number of growers in the district is estimated at about 1,000.

I. A. A. To Fight For McNary Bill At Washington

"I'm ready to go to the mat on the McNary-Haugen bill," said President S. H. Thompson as he left for Washington. "They are having a good time down there passing the buck on relief for agriculture. I am going down to find out the situation on this bill."



Mr. Thompson has suggested to Gray Silver, Washington representative of the American Farm Bureau Federation, that a meeting of presidents and secretaries of mid-west farm bureaus and others interested in relief legislation be called to promote the McNary bill. He believes that an organization should be formed to promote the bill, each state having a representative in Washington to assist in a campaign. The first job, says Mr. Thompson, is get the bill on the calendar.

Sentiment Grows For McNary Bill, Committee Says

The I. A. A. Legislative committee meeting at the office February 25 endorsed President Thompson's action in going to Washington to support the McNary-Haugen bill.

In a report of their meeting to President Thompson, the committee states, "We find a growing and rather insistent demand on the part of the members for the association to take some definite steps toward securing favorable action on the McNary-Haugen bill. We have unanimously decided that a representative of this association should go to Washington to follow this and other relief legislation."

SHALL WE LET 'EM DO IT?

Nine Schools Thresh Out Shipping Ass'n Problems

Bookkeeping, claim prevention and protection, best form of organization, publicity, farm bureau relation and terminal commission companies were some of the subjects of discussion at the nine cooperative livestock shipping association schools conducted by the University Extension division and the I. A. A.

Here is a little glimpse of what happened at the Springfield meeting. There were 50 present at the school, 19 managers. The boys said it was a fair sample of the other schools.

Bookkeeping

"You can't be sure you are efficient unless you have a good bookkeeping system," said V. Vaniman of the University. He exhibited and explained large charts showing a system of keeping records. The I. A. A. has the loose-leaf book forms for sale at cost.

"The aim of the shipping association is to get the greatest return possible to the producer, but you can't tell when you are doing that unless you have the facts and figures. You should keep records if for no other reason than for self-protection. If you don't you have no comeback when some one questions your actions. Accounting is the foundation of business."

Transportation Problems

"You must have facts to hitch to when making a claim," L. J. Quasey of the I. A. A. said. "To protect your rights count the stock as it goes into the car. Your count must be as good as that of the railroad when it comes to settling claims. A post card or some other manner of verifying your car order when made over the phone, is good protection. If you overload, your case will be hurt if you have a loss.

"You have grounds for a claim if stock is delayed on the road to market. With certain exceptions the railroad is responsible for delivery in as good a condition as received. If you think rates are out of line, send the information to some reliable agency or to us. If you continually get cars with several inches of bedding in them, let us know and we will try to straighten the matter out."

Publicity

We can tell our story to a large audience through the newspapers by furnishing them with the news that we have, said E. T. Robbins of the University, who was chairman of the meeting.

(Continued on page 4)

ATTEMPT IS MADE TO CURB ACTIVITIES OF LIVESTOCK CO-OPS

Amendment To Packer-Stockyards Act Would Harm Producers Greatly--Stewart

An attempt on the part of interests inimical to cooperative livestock marketing which, if passed, would make it very difficult for cooperative commission companies to operate as heretofore is seen in H. R. 5964, a proposed amendment to the Packers and Stockyards act. It was introduced by Congressman Thomas S. Williams, Louisville, 24th district of Illinois, and has been referred to the House Committee on Agriculture.

The House committee was scheduled to take up the amendment on February 28. President John Brown and other representatives of the National Live Stock Producers Association and President Thompson of the I. A. A. went to Washington to appear against the amendment.

Would Work Great Harm

"Several sections of this amendment would work great harm to cooperative marketing of livestock," declares C. A. Stewart, Director of Livestock Marketing for the I. A. A. "For instance, one section makes it unlawful for cooperative commission companies to handle the livestock of anyone except its own members.

"Another provision states that each member of a cooperative association of livestock producers must bind himself by written agreement to assume, as an obligation of membership, the responsibilities of such associations. The same provision would apply to a shipping association member of a cooperative commission company, and, in addition, every shipping association must file a declaration with the Secretary of Agriculture that each of its members has consented to membership in the cooperative commission association."

Definition of Co-op.

The amendment would define a cooperative association of livestock producers as an association "entirely composed of and wholly managed and controlled by producers of livestock.

"This might be taken to mean that even the manager of a Producers selling agency would have to be a livestock producer," states Mr. Stewart.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, E. L. Bill, Director.

Entry as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

Co-op Marketing Results

We have started out to find what cooperative marketing is doing for us in Illinois, to find out if it has increased the price to the producer and if so, to find just how a better price is secured.

According to our information the Illinois Fruit Exchange has increased the price to the producer. The two chief things which have made it possible for this cooperative to secure higher prices are standardizing and improving the quality of the products and securing wider distribution of sales. Both of these things are impossible under the old marketing system, and neither of them have been attained to the highest degree that is possible by the exchange.

The greatest obstacle of this particular organization is the lack of a large volume of business. Other obstacles are the lack of interest and loyalty of the membership and the failure of the organization to keep its members well informed.

Rather astonishing, isn't it, to find that the greatest factor in getting a better price and the answer to the obstacles of the exchange are to be found in the growers' own orchard? The grower himself is the only man who can improve the quality and standardize his product, and he is the only man who can overcome the obstacle of volume of business and interest in the association.

If these things are true, if the answer is up to the grower himself, certainly we have no license to be grumbling about the progress that is being made. What do you think about it?

We are going to get the answers to these same questions for the other cooperative marketing projects of Illinois, as near as it is possible, and tell about them one by one in the Record.

—o—

A Hopeful Sign

Carrying out the spirit of a resolution passed at the annual meeting, the twenty-first district held its first meeting with its member of the I. A. A. executive committee on February 15. It was the first time farm bureau officials of the district had met with their committeeman.

From a list of farm bureau problems the meeting took up one question at a time, faced the issue squarely, talked it out and in some cases made recommendation to their committeeman or to the I. A. A. executive committee. There were about fifty present and before the day was over most every person was acquainted with almost everyone present.

The whole group took the attitude that the I. A. A. is their I. A. A., that they carry the responsibility for the success or failure of the I. A. A. as far as that group of four counties is concerned.

If it is true that the future of the farm bureau depends on what the membership chooses to make it, the meeting of the twenty-first district is a most hopeful sign. This district has planned three other meetings during the year. Cooperative marketing will be the subject of discussion at the next meeting.

—o—

We Champion Co-op Marketing

Last issue we announced the new association of grain men organized to kill the Capper-Tincher act. Now we discover a new bill in congress, introduced by an Illinois man, carrying a number of vicious amendments to the Packers and Stockyards act. The amendments would practically put the cooperative commission companies out of business.

The farm bureau worked hard for these two laws. After a year of operation the farm bureau believes that both laws are a forward step in our big task of marketing. The I. A. A. is a champion of cooperative marketing. It is one of the outstanding points of our program and we believe in it. An I. A. A. representative is now in Washington to keep an eye on the new bill.

—o—

Co-operation and Human Nature

It was an interesting meeting that the Illinois Fruit Exchange held the other day at Centralia. It started promptly on time, disposed of its reports, elected officers and made resolutions with little delay, had no long speeches and set to work to thresh out the problems of its members in a business-like way.

All right, let's hear from each of the units, said the chairman. Give us the truth. Tell us about the kicks. If your local don't like the management, say so. We'll hear from Alma first.

Well, things have never gone smoothly. There's lots of bunk up there. There was no interest in our local annual meeting and the few that were there wrangled and complained. They have kicked on the management. Many of them say they won't sign up again under the present management. They say the manager is to blame because pears didn't sell well. They sold peaches outside of the unit. There has been no kick by the big growers and they say that the fault has been mostly local.

Here's a representative from the Anna and Cobden units. He says that some of the members are not good cooperators down there. They kicked on prices received from several cars. He says he believes it all comes back to the members in the way they pack their stuff. They have no packing shed. He says he believes that most of the members should turn around and kick themselves.

All right, here's Belleville. Nineteen cars of potatoes were shipped from that unit in 1923. The majority are well satisfied. No kicks against the manager heard. The only trouble was that they didn't sell their potatoes early enough.

Cartter unit is next. Not much to say from Cartter. Not very strong. Only had 8 members at the annual meeting. No kicks to speak of. Centralia, you're next. Members are pretty well satisfied with the exchange. Have had no kicks except from one fellow who talked of wanting to get out of it.

Here's the man from Creal Springs. We have 28 members down there. Half of them were at the annual meeting. There's general harmony and no complaints. Everybody seems well satisfied, especially with the Jonathan prices.

Here's a man from Carbondale. Nothing to say. Didn't do any business and haven't had any kicks.

What's been doing at the Flora unit? Nothing much. The speaker says he's the only one that has sold through the exchange, and he got better prices than his neighbors. One of the officers of the Flora unit calls the Illinois Fruit Exchange a bunch of grafters.

Here's a man from the Kell unit. Interest is only luke warm. No kicks. Probably we had better kick ourselves. We don't cooperate with the local manager enough. Several members have used the exchange as a lever to extract higher prices from the local buyers.

Let's hear from Makanda. Interest fairly warm. No complaints against the management. Thinks the local should be more particular with the grades that it puts up. Shouldn't sell No. 2's through the exchange. Biggest objection is that the contract is too long. Mascoutah, you're next —108 members in this unit. Most of them are not interested. Some of the members have only about a half acre of potatoes. Shipped three cars of potatoes. Started to sell too late. Not enough business to hire a manager and the officers are too busy with their own business to tend to shipping.

Quincy is next. Have done a big business. Sold 142 cars. One member trying to raise trouble. Declares the exchange and Federated Fruit and Vegetable Growers didn't give them a square deal. Trying to get the unit to market through some commission company in Chicago.

Here's a man from Ozark which has the largest packing house of any of the units. Have had knocks on the officers, packing house, packing and prices. Says he thinks most of the knocks are through ignorance. Don't know how they'll come out in the reorganization. Need some one to explain the plan to them. Another man from Ozark explains the use of the packing house for community purposes. Have weekly movies when there is good weather. Hold good short course in horticulture. Also have farm and home bureau meetings in the building. People are getting together as a result of the meetings.

Here is a man from the Texico unit. Not many kicks from Texico. Just a few on apples. Sold 16 cars of peaches. Some of the members took their peaches to Marion and West Frankfort but they won't tell what they got for them. It took the wind out of their sails. Have a good packing house in Texico. Think it is essential as a home for the unit. Think most of the growers want to stay with the fruit exchange.

Lastly, we'll hear from Villa Ridge. The knocks are mostly local. Some of the members lost 70 to 80 cents a bushel on peaches by not shipping through the exchange. Main crops are asparagus and strawberries. Asparagus growers netted 10 cents more than outsiders got.

That finishes reports from the units. Mr. Leeper, the manager, says the reports are just as he expected. Most of the knocks come from districts where there are few farm bureau members. The proposition was oversold to men who are not cooperative. "We've got to have cooperative men to have a cooperative association," he says.

Other men get in the discussion. One man says that too many of the members think that cooperative marketing is no good if it can't always get more than they can get locally. Too many people expect cooperative marketing to revolutionize things in one year. The whole trouble is often with local management and leadership.

The meeting discusses various other subjects, shipping point inspection, restricting membership of exchange to farm bureau members, etc. Meeting is concluded with reading of an explanation of the reorganization plan and its unanimous approval.

What is Co-operative Marketing Doing in Illinois and How?

What is cooperative marketing doing for us in Illinois? Is it getting a better price for our products, and if so what are the things that make it possible to get a better price?

Is it wider distribution that makes it possible for a cooperative association to sell better, or is it because a cooperative can standardize and improve the quality of the product? Does a large volume sold through a cooperative marketing organization make it possible to get a better price? Can a co-op sell for less cost than every man selling his own product?

The Record will attempt to get the answer to these questions for our own cooperative associations here in Illinois. We are starting with the Illinois Fruit Exchange in this story. In the next several issues we will take up other organizations. After this kind of a survey has been made of our leading cooperative marketing projects it may be that a summary of facts can be made. Anyway it won't do any harm to look for the answer to what cooperative marketing is doing for us and how it is doing it.

The Illinois Fruit Exchange with headquarters at Centralia has marketed two crops. In 1922 it sold 1,100 carloads of fruits and vegetables for members and in 1923 it sold 600 cars.

Higher Prices

The average price to growers for fruits and vegetables sold through the Illinois Fruit Exchange has been higher than the average price received by outside growers. This is the opinion of Manager A. B. Leeper and of many growers interviewed. It is impossible to get the average price of outside growers to make a comparison. The fact that several large growers have joined the exchange of their own accord in the past year supports the argument.

We are starting on the assumption that the exchange has netted the grower an average higher price than outside growers have received. If you differ with this assumption, let's have the facts you have.

Standardization

Mr. Leeper placed standardization and quality at the head of the list in the several factors that made it possible for the exchange to get a better price. The market demands a standard product, he says. The better the quality the better the price. He thinks it is impossible to get a uniform product without the producers' own marketing association. The exchange has promoted standardization and quality and has attained it to such a degree that it has been a factor in increasing the price.

Wider Distribution

Chicago was the chief market for fruits and vegetables before the exchange started. The exchange is in touch with about a hundred markets every day in the selling season. In 1922 it sold produce on 115 different markets and in 1923 on 98 markets.

This wider distribution has been the second large factor in getting a better price through cooperative marketing. By avoiding glutted markets and selling on markets where supply is short and demand is better, an increased price has been secured.

Less Selling Expense

The exchange has lowered the cost of selling to some extent. The usual commission charge for selling is ten per cent. In 1922 the exchange cost was eight per cent and in 1923 it was a little lower. Experience shows that the cost of packing and grading is less when done at central points through the cooperative association than for every man to do this work for himself.

Obstacles

The exchange needs more volume of business. Mr. Leeper says that volume must be had to do efficient cooperative marketing. Without volume it is hard to get standardization and hard to get wide distribution which are the two chief things that have made cooperative marketing worth while, according to the experience of the exchange.

One of the greatest hold-backs of the work is the lack of interest in the association by members. A number of members disregarded their contracts with the association. They have publicly criticized the organization rather than taking the attitude that it is their own organization.

One reason for this, Mr. Leeper states, is that the association has not given out full information about the association. A field service to keep members informed would help this condition, he believes.

What Members Think

What are the biggest benefits that cooperative marketing has brought to fruit growers in Illinois? What are the biggest drawbacks to successful cooperation? These questions were asked of several members of the Illinois Fruit Exchange by a representative of the Record.

"The biggest benefit from cooperative marketing thus far is grading and putting our fruit in proper shape for the market," said W. L. Cope, Tonti. "Under the old system every fellow puts up his packages as he sees fit but now the stuff must come up to quality requirements. This boosts prices to both the outsider and members of the exchange. The exchange practically sets the price with its quality product. Marketing is now by known grades, quality and sizes.

"The biggest draw-back to our success is that many of the members expect too much of cooperative marketing."

What Newman said

E. W. Newman, Cobden, said that the biggest benefits of cooperative marketing as he sees them are grading, orderly marketing and wide distribution.

"Our biggest draw-back is that the exchange was oversold," he said. "Members expect too much of it. If prices aren't always higher through the exchange than from local dealers, many are prone to say that it is a failure. Lack of interest in the organization on the part of members is another draw-back."

Grading Biggest Benefit

"Grading by size and quality is the main benefit that cooperative marketing has brought to our locality," said Norman W. Casper, New Burnside. "It has also practically made a market for us," he declared. "One of the reasons why we organized at Ozark was because local buyers often failed us by not being there when we needed them. As it is now, when buyers come in they come to our packing house to fill their orders.

"A good example of how the exchange practically built up a market for us was in the case of Kinnaird apples. They were practically unknown on the markets. We built up a demand for them and sold them for as much as $4.50 per barrel while outsiders were content with $1.50."

TAX-EXEMPT BONDS MENACE TO SOUND FINANCES--WATSON

I.A.A. Man Tells Farmers' Institute That Stopping Them Will Help Remedy Conditions

"The first and most important step in correcting the present unsound tax conditions is stopping the further issue of tax-free securities at the earliest possible moment," said John C. Watson, in charge of Taxation and Statistics for the I. A. A., in an address before the Illinois Farmers' Institute at Dixon, February 21.

"If the revenue history of the United States in the last few years has demonstrated anything, it is that high surtaxes are not compatible with a practically unlimited issue and supply of tax-exempt securities. The decreasing receipts from the higher brackets of the revenue act are clear proof of shifting of investments in order to avoid taxation."

Objections

According to Mr. Watson, large sums of taxable moneys and credits have been withdrawn from industry and business enterprises for investment in tax-exempt bonds. The difference in interest rates between taxable and non-taxable securities is frequently spoken of as a tax paid by the owner of the otherwise tax-exempt security, but such a difference is inflexible and cannot be fixed according to the ability of the owner to pay. It is not uniform with taxes on other property of like value. It is not properly distributed, all the revenue going to the department of government issuing the bonds.

"Unless the issue of such securities is stopped," said Mr. Watson, "they will probably destroy our income tax laws. Payers of the normal tax and of the lowest surtaxes are likely to rebel when they know that men of great wealth and of high incomes are escaping the tax."

Must be Done

In Mr. Watson's opinion, an attempt to save the tax-free feature of the Federal Land Bank bonds will only delay the stopping of the issue of other tax-exempt securities, and in the long run it will be better for the farmers to give it up provided it is eliminated for all other securities. "At the best, an amendment eliminating tax-exempt bonds can scarcely be put into effect before 1928, but it can eventually be done because it must be done. That may be poor logic, but it states a fact."

Stephenson Farm Bureau Has Market Place In Freeport

The latest addition to the list of farmers' markets under the supervision of county farm bureaus is the one at Freeport which was opened February 2 by the Stephenson County Farm Bureau. It is located on the first floor of the building in which the farm bureau office is situated.

There are 11 booths where farm bureau members display farm produce to customers. An average of from $250 to $300 has been done each Saturday recently. G. F. Baumeister is in charge of the market. The home bureau cooperates in the project, a unit of the organization having charge of a lunch booth each market day.

Push Farm Relief Bill Hard, Says Monmouth Man

"Push the McNary-Haugen bill hard!" is the gist of a letter from William Beste of Monmouth, Illinois, expressing the views of the farmer regarding this legislative measure. Mr. Beste writes:

"Am just in receipt of my copy of the Record and note with delight that it contains something relative to the McNary-Haugen bill.

"What concerns the rural population just now is how their status in the economic life of the country can best be equalized with that of the city dwellers. After the war the farmers' business was thrust on the rocks when the Federal Reserve board, following a period of propaganda in which the farmer was made the goat for the high cost of living, instituted a policy of forced liquidation. Special legislation, such as the Esch-Cummins act and the Fordney-McCumber tariff, since enacted has tended to keep agriculture down. Why should a policy of protection be made to work for the benefit of one class of citizens and denied to others?

"The McNary-Haugen bill now before Congress must have the utmost support from farmers and farm organizations, and particularly the farm press, if it is to get very far. What is needed to put this bill through is a noise loud enough to be heard in Washington. Only one farm paper that I know of has given much emphasis to this bill. A united campaign of the farm press and a persistent appeal for its passage from the farmers themselves and their organizations would put the bill over. Let's concentrate on this thing and do it quick. I would suggest that each and every farm organization ask its members to write their congressmen urging favorable action on this bill."

Fruit Co-op Elects Board of Directors To Serve This Year

The board of directors elected by the Illinois Fruit Exchange for 1924 were, W. L. Cope, Tonti; O. V. Cummins, Dix; N. W. Casper, New Burnside; R. K. Loomis, Makanda; R. B. Endicott, Villa Ridge; Frank Lanter, Belleville; and I. D. Snedeker, Jerseyville.

FRUIT EXCHANGE WILL REORGANIZE UNDER CO-OP ACT

Improved Pooling, Larger Tonnage, And Field Service Seen As Greatest Needs

Reorganization of the Illinois Fruit Exchange as the Illinois Fruit Growers Exchange under the Illinois Cooperative Marketing act was unanimously voted by delegates at the third annual meeting at Centralia, February 19. As contracts of members in the exchange expire, they may join the new organization which will take over the work of the present exchange as its business is liquidated.

Manager A. B. Leeper, in making recommendations for 1924, stressed the following points: First, it is important that every member realize that he is a partner in this business and take the same interest in its development. Second, that the financing of local associations is an open problem and must be met by the members interested in that particular locality. Third, that increased tonnage will lower overhead costs both of the exchange and local associations.

Pooling Should Be Improved

Fourth, that the pooling system should be improved by extending over a larger territory and a longer period. The average of the season prices shows the advisability of larger pools. Fifth, that as soon as the tonnage will justify the expense, the exchange should establish a field service department, which department should be headed by a man competent to advise the members in matters of production as well as grading and packing.

Mr. Leeper stated that the exchange had marketed 464 cars of fruits and vegetables in 1923 through the Federated Fruit and Vegetable Growers, Inc. Thirty more cars are now in storage. With cars sold to track buyers, approximately 600 cars were marketed during the year by the exchange and its locals. These shipments went to 98 markets in 20 states.

Prices Favorable

"The prices received by the Illinois Fruit Exchange compare very favorably with those of any other producing section of the entire United States," said Mr. Leeper. "The year 1923 has demonstrated more forcibly than ever before the necessity of quality production.

"Each year intensifies competition with other producing sections and the growers of Illinois can no longer afford to depend upon their geological location to help them dispose of poor grade products. If the Illinois Fruit Exchange is to succeed as it should, the members must produce a product that can be offered to the trade of just a little higher standard than the average that is produced in this section."

The report of Norman W. Casper, New Burnside, secretary, showed that the Illinois Fruit Exchange had done a business of approximately $1,000,000 since its organization in 1922. He declared that the biggest need of the exchange is more tonnage of fruits and vegetables to lower overhead costs. Many large growers are ready for cooperative marketing now, he said.

Red Top Grower Lost $300 By Co-op Marketing, But--

Steve Golden of Flora, Clay county, says he lost $300 last year because he marketed his red top seed through the Egyptian Seed Growers Exchange. One of his neighbors, Ray Graham, was also a member of the pool and he declares that he doesn't consider he lost any money by pooling because he says it's hard to tell what the price would have been if there hadn't been any pool.

But Steve Golden has not lost faith in cooperative marketing simply because it might seem that he lost money through it. Instead he told the writer an interesting story of his experience in the pool. He has been marketing red top seed ever since it has been marketed in the territory, probably for 40 years. He is now retired, lives in Flora, but is very actively interested in his three farms in the county.

"The highest price that I ever received for red top seed was 20 cents per pound," he said. "That was in 1921. Early in the season the price was 12 cents. Then the dealers dropped down to 10 cents and we growers were pretty dissatisfied. So 45 of us formed the first red top pool with 50,000 pounds of seed. We made arrangements with a local seed dealer to store the pool.

Up Went the Prices

"In the meantime, after our pool was started, prices paid by local dealers suddenly went up. They began paying up to 17 cents. After awhile they got interested in our pool and made us offers for it. Finally we closed it out to a dealer in a neighboring town for 20 cents per pound which was just 19½ cents net to us as we paid ½ cent per pound storage.

"Results of the first pooling attempt encouraged us and many thought it would be a good idea to start a big pool the next year, 1922. We got Bob Clarke down here to help us organize. Well, I went out and helped with the soliciting because I was in the first pool and besides I have always gone in for anything down here that looked as if it might improve farming conditions. You know we had every fellow that signed the five-year contract also sign a note for $100 so as to give our pool financial backing. That was a hard thing for a lot of the fellows to do and many refused to join for that reason. About a fourth of the growers joined the pool.

Had Some Hard Luck

"Our directors made arrangements with a local seed warehouse to store the pooled seed but not long after that the warehouse burned down and it was some time before we got another place to store the seed. I think that it was a mistake not to begin selling the pool right away in the fall. As it turned out, it was held too long and there was not much demand for red top as the dealers had about all they needed. You know the best red top market is the fall and early winter. Fact is, that us fellows held the seed that wasn't needed very badly.

"But Curt Anderson, the manager, did his best to sell it last spring and all last summer and when the pool was finally closed out, all of us poolers got about 11 cents per pound on our seed in the final settlement. The outsiders were paid 14 or 15 cents on the average from local dealers. Not very encouraging and the fellows that wouldn't join thought they had the laugh on us. But it is hard to tell what the price might have been if there had been no pool. That is something none of us can say for sure."

Lots of Kicks

Mr. Golden related something of the attitude of members of the cooperative association. Although not an officer or a director of the organization, he hears many of the complaints of friends who are in the pool. Being an old and experienced farmer in the county and knowing most of the facts about the exchange, his opinion is highly respected.

"Lots of the members come to me and ask me about the pool, things that they won't ask the manager," he said. "When we were building the warehouse here in Flora last summer, now and then a fellow would come to me and ask, 'Where's the money coming from to build that building?' I told them it was borrowed, of course, where else did they think we'd get it?

"Then they'd kick to me that the manager was getting too much salary and so was the seed tester. I don't know if they knew what salaries these men were getting. I don't myself but it's because I'm not worrying about their salaries.

New Contracts Signed

"But the kicks have pretty well died down during the past few months and things look better. Now if the pool price will net the members just a little more than the outsiders got from dealers, things will be all right and there will be lots more confidence in our organization.

"A few men have joined the 1923 pool of their own accord. One man out northwest of here that I didn't sign up when I was soliciting joined last fall. I happened to meet him on the road coming from town one day and saw that he had some of the pool sacks in his wagon. I asked him how he happened to have them and he said, 'Well, I've been thinking over the proposition all summer and I've decided it's the right thing to do. So I signed my contract up in the office today.' Quite a few are coming to that way of thinking."

What Graham Says

Ray Graham, who was a member of the pool in 1922 but who didn't raise any red top in 1923, voiced sentiments much the same as Mr. Golden. He said that there is no doubt but that 1922 seed prices paid by local dealers were up much higher on account of the pool.

"One reason for this," he says, "is because dealers were approached by growers for offers on their red top and when a high enough price was not offered, the growers threatened to join the pool. Many dealers raised their prices on such occasions so they could get the seed.

A New Spirit

"A lot of exchange members are worried that they will lose the $100 that they signed a note for when they joined the pool. One fellow was asking me one day how he could get out of paying the note. I told him it would be very easy to get out of it. He brightened up and asked how. I said, 'If you and your neighbors and every other fellow in the pool will loyally back it up and keep working for it until its success is assured, you'll never have to pay that note.'"

And the writer believes that it is just that spirit, the spirit of loyalty and cooperation, that is growing in the red top country and will make the Egyptian Seed Growers Exchange continue to be the biggest and most powerful factor in the marketing of red top seed.

9 SCHOOLS THRESH CO-OP SHIPPING ASS'N PROBLEMS

(Continued from page 1)

The newspapers are a valuable means of publicity that all shipping associations should make use of, he said.

Form of Organization

The county livestock shipping association is more efficient than the local, C. A. Stewart, Director of Livestock Marketing of the I. A. A., said at the series of shipping association schools throughout the state. "A county organization is better qualified to get good men. There has not been a failure of a county association in Illinois."

Shipping associations should recognize the farm bureau for the reason that all progress in Illinois in livestock marketing has been made possible by the farm bureau, Mr. Stewart stated. The membership of shipping associations should be limited to farm bureau members, but not the service, he said. He recommended that an additional charge be made for handling stock of non-farm bureau members.

On the county association question, Mr. Robbins said that it is too big a jump from the local association to the terminal commission company. To him it seems logical and necessary to have a county association.

Protecting The Cow

Manufacturers can still copy the products of the cow, so long as they don't offend the pure food inspector, but they can't use her portrait or her name to advertise their wares. Since January 1, it has been against the law in Illinois to use in butter substitute advertisements the word "Butter," "Creamery" or "Dairy" or the name or picture of any breed of dairy cattle (Texas Longhorns not included). We want this law enforced, so if you see any advertisements which you think is violation of the law, write to the I. A. A. about it, and we will investigate the matter.

How Do You Vote—Baseball Team or Teams in the Field?

Shall we play baseball? A baseball team will take several teams out of the field, but on the other hand all work and no play makes it hard to keep the boys at home.

The meeting of the 21st district discussed the farm bureau baseball league at their Carlinville meeting. "We have got to have a little fun in this old world," said Mr. Moffet of Modesto. "We have been working sixteen hours a day for six days a week. I believe a half day off on Saturday will help."

After quite a long discussion Editor McCleland of the Carlinville Democrat, one of the real fans of the county, popped up. Said he could not sit still any longer. He believes farm people must meet the changing conditions. He thinks baseball will help to solve the problem of keeping the boys at home and contented.

"But who is going to pay the hired man for the half day he is off playing ball?" asked another man who proclaimed himself of the old school.

What do you think about it? Is the farm bureau baseball league idea right?

Head of Chick Association Endorses Hatchery Plan

Harry R. Lewis, president of the International Baby Chick association, has written J. D. Harper of the I. A. A. heartily endorsing the accredited hatchery plan which was started last October by the I. A. A., the University of Illinois and the State Department of Agriculture. The plan provides that hatcheries which agree to sell only state-inspected baby chicks from state-inspected farm flocks may sell their chicks under the brand "Illinois Standard Chicks."

Mr. Lewis says, "The I. B. C. A. voted unanimously to go on record in favor of these activities at the last annual convention, and will stand by you to the fullest to defend the plan.

Offers Best Solution

"Something must be done in a definite, organized, official way to materially improve the quality of baby chicks. While many breeders are themselves attempting to do this, and succeeding in many cases, yet the accredited hatchery plan offers the best solution of the problem yet presented."

Accredited hatcheries, says Mr. Lewis, have been organized and worked successfully in Wisconsin, Southern California and Washington, while Connecticut, New Jersey and Indiana are seriously contemplating the establishment of the system this year.

Cost is 3½c Each

According to H. W. Day, Supervising Inspector of the Illinois Department of Agriculture, the cost of inspection averages 3½c per bird. He has received some very fine reports from the hatcheries that are on the accredited list. One hatcheryman writes: "Orders are coming in fine and we give your department credit." Another writes, "All our orders are so large and coming so rapidly that we will have to have larger flocks in all varieties. It certainly pays to be accredited."

Fourteen counties have a list of reserve flocks. Macoupin and Montgomery counties each report 23 flocks, Wayne county 5, Cass county 3, Champaign, Hancock, Grundy and Menard, 2 each and Adams, Douglas, Logan, McLean, Morgan, Peoria and Sangamon, 1 each.

FREEPORT CO-OP DOES NEARLY HALF MILLION BUSINESS

Over Half of 1923 Sales Were From Butter; Macklin Talks On Co-operative Principles

The report of J. A. Phillips, secretary-treasurer and manager of the Stephenson County Cooperative Marketing Company at its annual meeting in Freeport, February 23, showed that the company had done a gross business of $490,418.39 in 1923. The largest single item of sale was butter, $256,089.09 worth being sold.

"The loyal members who have stuck to the boat through thick and thin are the fellows to whom credit is due for keeping our company together," said Mr. Phillips. "It takes the full 100 per cent cooperation of everyone to win in the end. I hope that every milk producer in the Freeport territory will sign the new contract, for only by doing this can we get what we should for our milk."

About 150 members of the company were present to hear the report of last year's business, to elect officers and to hear talks by Dr. Theodore Macklin of the University of Wisconsin and A. D. Lynch, Director of the I. A. A. Dairy Marketing Department.

"To cooperate, a man must know what cooperation is," said Dr. Macklin. "Cooperatives can learn only by experience. They may not make money at first.

Dealers' Profit

"The least important reason for cooperating is the elimination of the dealers' profit," he declared. "The most important reasons are that it reduces the cost of marketing, improves old and creates new marketing services for its members, readjusts standards of production so that farmers understand what products pay best, gives farmers confidence in the marketing system that they patronize because they own it and control its policies, gives producers confidence that their products are being marketed as well as they can be, and lastly, it teaches cooperators the commercial point of view, which is the great ultimate benefit from successful cooperation."

Mr. Lynch in a short talk said, "We increase our strength and our power as we overcome obstacles. We should always be sure that we apply our strength in the right direction."

Directors for 1924

Clayton Maise and William Seiferman were re-elected to the board of directors and William Roberts was a new member elected. Holdover members who will serve on the board for 1924 are William Frank, J. A. Phillips, Wm. F. Brown, H. M. Phillips, John Kachelhoeffer and D. M. Brubaker.

WANTS SOYS AND COW PEAS

Robert H. Engle, county agent Lee County, Donnellson, Iowa, writes that the farm bureau there is in the market for soy beans and cow peas, and that he would appreciate hearing from any Illinois counties having these seeds for sale.

The McLean County Farm Bureau at a recent meeting endorsed the McNary-Haugen bill for an agricultural export corporation.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 2 | March 20, 1924 | Number 6

BROOM CORN CO-OP STARTS CAMPAIGN FOR MEMBERSHIP

Seventeen Local Meetings Held; I. A. A. Assisting In Organization Work

The Illinois Broom Corn Growers Cooperative Association is in the midst of its membership campaign. A series of 17 local meetings were held in the broom corn producing district during the week of March 10 under the leadership of G. E. Metzger, director of organization for the I. A. A., and F. M. Higgins of the organization department field force.

Following a school of instruction for solicitors at Mattoon which was to have been held on or about the 17th, the work of signing membership agreements was started. The solicitors are all local broom corn growers.

The formation of the association was started last August when a committee was appointed to investigate the cooperative broom corn marketing association of Oklahoma and to work out a plan for organizing Illinois growers. The committee was assisted by officials of the I. A. A. and by Walton Peteet.

Melvin Thomas, farm adviser of Coles county, is chairman of the organization committee and Fred H. Lebrecht of Mattoon is secretary. "The aim of the association," declares Mr. Thomas, "is to market Illinois broom corn in an orderly, intelligent and business-like manner through a well organized and efficiently managed cooperative association organized under the Illinois cooperative marketing law."

The plan of the committee calls for a membership representing 75 per cent of the broom corn growers in Coles, Cumberland, Douglas, Jasper, Moultrie, Shelby, Clark and Edgar counties. This membership must be secured by April 1, 1924.

Baseball League O. K'd By I. A. A.

The I. A. A. executive committee gave its endorsement of the plans of the farm bureau baseball league at the March meeting and voted to appoint an employee of the I. A. A. as secretary-treasurer of the league as provided for in its constitution. Farm Adviser R. W. Dickenson, Cass county, presented the project to the committee. He stated that at least 15 counties have signified their interest in the league and several have joined.

RESULTS ARE WHAT WE WANT

Protest Any Raise In Illinois Fruit and Vegetable Rates

Illinois fruit and vegetable growers were represented by L. J. Quasey, director of transportation of the I. A. A., and by the Illinois Commerce Commission at a hearing before the Interstate Commerce Commission in Chicago, March 7, opposing the proposed increase in rates on fruits and vegetables from Illinois points to Chicago.

The case was filed by Indiana fruit and vegetable shippers through the Public Service Commission of Indiana, complaining that they were being discriminated against and asking that the commission prescribe rates from Indiana points to Chicago which would put them on a parity with Illinois shippers.

"We do not object if Indiana shippers are given rates similar to those of Illinois but we don't want Illinois rates raised," declares Mr. Quasey. "But any adjustment that may be made in these rates is likely to cause a nation-wide investigation on fruit and vegetable rates.

"If the rates from Indiana should be reduced to the same level as those of Illinois, it would mean that all eastern shippers would ask to be placed on the same basis. This, of course, would affect the heavy fruit-bearing territory in Michigan.

"On the other hand, if Illinois rates are increased to place them on a parity with Indiana, it will mean that the western states will have a lower basis than from Illinois points and naturally it would lead to a readjustment in western points which would place them on the same basis as Illinois."

1924 Budget of $300,000 Passed By I.A.A. Board

A budget of $300,000 for 1924, with the provision that it may be changed by the executive committee at any time they see fit, was passed by the committee at its March meeting. Of this amount, $46,500 was allotted to the livestock, grain, dairy, fruit and vegetable, and poultry and egg cooperative marketing departments.

Service departments, including legal, taxation and statistics, transportation, speakers' bureau, organization, information, legislation, phosphate-limestone and tuberculosis eradication, were allowed $128,000. Much of the work of the service departments goes toward the work of the cooperative marketing departments and to service to cooperative marketing associations, as well as to county farm bureaus.

There is a total decrease of $34,247 in the budget this year compared with the 1923 budget.

Write To Washington!

The McNary-Haugen bill has been reported favorably out of both the Senate and House Agricultural Committees. If you want copies of records of these hearings, write to your Senator or Representative. Let them know that Illinois farmers want action on this relief measure and want it badly.

Lincoln Will Be Scene of State Picnic For 1924

After a delegation of Logan county folks had set forth the advantages of Lincoln as a suitable site for the 1924 I. A. A. and county farm bureau picnic, the executive committee accepted their invitation. No date was set for the event. Lincoln has chautauqua grounds that are ideal for such a picnic, the committee said, with facilities for handling a crowd of 20,000.

It is expected that the state farm bureau championship horseshoe pitching tournament will be staged at the picnic as in the past. In case it is held late in the summer, suggestions have been made that the state championship farm bureau baseball game be played there.

Office Location Not To Be Changed, Committee Decision

The I. A. A. office will remain in Chicago, according to the decision of the executive committee which voted on the proposition of moving to Springfield at the March meeting. This was after a committee of Earl C. Smith, Frank D. Barton and Stanley Castle had reported the results of their investigation of the merits of each place.

"More prompt and efficient service can be rendered to the membership at large from Chicago than from Springfield," the report said. A great saving in traveling time was shown to the advantage of Chicago. To attend a one day's executive committee meeting, it would take the committeemen a total of 662 hours and 3 minutes away from home for the Springfield trip and it now takes 470 hours and 39 minutes for the Chicago trip with no saving in traveling costs to the advantage of Springfield. The same is applicable to I. A. A. employees. The financial cost to maintain an office would be approximately the same in either location, the investigation showed.

COUNTY PRESIDENTS STATE STAND ON FARM LEGISLATION

Demand Active Support of McNary-Haugen Bill By Illinois National Legislators

Resolutions demanding that Illinois senators and representatives actively support the McNary-Haugen bill for an agricultural export corporation, urging that they back the passage of all legislation which will strengthen the administration of the Packers and Stockyards act, and stating their opposition to the amendment known as the Williams bill, dangerous to cooperative livestock marketing, were passed by the meeting of farm bureau presidents on March 6 in Chicago.

The resolution on the McNary-Haugen bill reads as follows:

Whereas agriculture has been reduced to a condition which not only endangers the future and permanency of the basic industry of the nation, and which if continued, will also demoralize and destroy the prosperity now existing in other lines of business and industry and

Restoration Paramount

Whereas, the restoration of agriculture is the paramount issue before the American people today, it is important that emergency federal relief legislation be immediately enacted by the Congress of the United States; and

Whereas, the McNary-Haugen bill as now pending in the Congress of the United States, if passed, would furnish this emergency legislation necessary to bring about this relief,

Now, therefore, be it resolved, that we, the presidents and other representatives of 85 county farm bureaus of the state of Illinois and the members of the executive committee of the Illinois Agricultural Association in conference assembled, hereby endorse and approve the emergency relief measure for American agriculture as is set forth in Senate Bill 2012 and in House Bill 5563, known as the McNary-Haugen Bill, and do hereby respectfully request, urge, insist and demand that our representatives in Congress, earnestly, unqualifiedly and actively support and vote for this emergency relief measure and use all their influence and power to secure the enactment of this measure at the earliest possible date.

Packers-Stockyards

Following is the resolution on amendments to the Packers and Stockyards act:

Be it resolved by the presidents

(Continued on page 3)

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, E. L. Bill, Director.

Entry as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

OFFICERS

President, S. H. Thompson, Quincy.
Vice-President, C. B. Watson, DeKalb.
Treasurer, R. A. Cowles, Bloomington.
Secretary, Geo. A. Fox, Sycamore.

Directors of Departments
I. A. A. Office

General Office and Assistant to Secretary, J. H. Kelker; Organization, G. E. Metzger; Information, E. L. Bill; Transportation, L. J. Quasey; Statistics, J. C. Watson; Finance, R. A. Cowles; Fruit and Vegetable Marketing, A. B. Leeper; Live Stock Marketing, C. A. Stewart; Dairy Marketing, A. D. Lynch; Phosphate-Limestone, J. R. Bent; In charge Poultry and Egg Marketing, J. D. Harper; special representative on Tuberculosis Eradication, M. H. Petersen.

THE PROGRAM OF WORK

A program of work for the year has been developed. After working with the policy committee and executive committee, each department has put down on paper what it hopes to accomplish this year. The new program of work outlines a definite course for the association to follow, it starts the year with a definite aim and makes a standard to live up to and to answer for at the end of the year. The adoption of this program does not mean that changes or additions can not be made as emergency demands.

Herewith is a summary of the I. A. A. program of work for 1924.

Taxation

Continue the effort to secure equalization of valuations of different classes of property for taxation in Illinois.

Make a study of constitutional and statutory changes necessary to make the revenue act and its administration fair to farmers.

Offer services, as far as time permits, in the analysis of county and local expenditures of tax funds.

Organization Department

To cooperate with county farm bureaus in maintaining a supporting membership in county bureaus and I. A. A. There will be eight reorganization campaigns in 1924.

To train men for organization work.

To gather and summarize information which will be of assistance to field men in their work.

To cooperate with I. A. A. departments in organizing commodity marketing organizations and furnishing and recommending men well trained in the technique of organization.

To council and advise in a general way with county farm bureaus on questions pertaining to organization, community service and programs of work.

It has been quite evident in the past that community organization is a great asset in farm bureau work and it is the aim of this department to make a careful study of the community organization work in Illinois with the idea of offering some sort of service to county farm bureaus for the advancement and development of the work.

Livestock Marketing

To give assistance to cooperative livestock shipping associations in organization work, in the application of business principles and in operation. In application of business principles is included incorporation, bonding of managers, frequent meetings of the board of directors, accounting and reports. Assistance in operation includes advertising, installing own scales, pro-rating where the volume of business is sufficient, and other similar problems. This part of the program will be promoted through the field service by attending meetings and writing frequent letters to shipping associations.

To support and promote Producers' selling agencies through field men attending meetings of shipping associations, farm bureaus and livestock organizations and by mail.

To promote favorable legislation, particularly amendments to the Packers and Stockyards act.

To promote the wool pool through county farm bureaus.

To give membership information relative to source of supply of cattle, hogs and sheep.

Dairy Marketing

The dairy department will continue to render advisory service in the form of field service, organization and marketing problems of dairy cooperatives.

Particular attention will be given to grading and quality production. The department is in a position to locate markets for Illinois dairy cooperatives, providing there is definite assurance that the cooperative will furnish uniform and dependable merchandise.

A special effort will be made in 1924 to coordinate the efforts of the cooperatives already etsablished. The aim is to harmonize business policies of the cooperatives and promote efficiency by group action, especially in accounting and selling. When the cooperatives begin to work together there will be developed real leaders from the ranks who are to take the positions of employees, managers and directors.

Tuberculosis Eradication

To assist in the Illinois tuberculosis eradication program along the following lines: educational, cooperative work, legal and statistical.

Under educational to assist counties in getting appropriations from boards of supervisors to carry on area tuberculosis eradication work. To supply a uniform sale contract between county farm bureaus and organizations which have cattle for sale. To assist in carrying on slaughter and cleanup demonstrations. To disseminate a set of rules for accredited herds and an outline of proper cleanup and disinfective measures.

Under cooperative work to enlist the support of other organizations in cleanup work. To work with the Illinois Department of Agriculture in developing a method of positively identifying feeders, obtaining more prompt payment for reactors and adding men to the eradication forces to aid in cleanup work. To work with the railroads to bring about a proper cleanup of local loading pens. To help farm bureaus to organize vigilance committees.

From the legal standpoint to obtain evidence of violations of cattle quarantine laws. To offer rewards for information leading to the conviction of violators. To introduce bills into the next legislature to make testing compulsory after 75 per cent of cattle owners in a county have tested their herds. To require a retest of all animals brought into Illinois and to require the branding of feeders at terminal markets.

Under statistical work to list the approved veterinarians for Illinois and adjoining states. To list county breed associations with whom the I. A. A. has completed buying arrangements and to list tuberculosis-free areas.

Limestone-Phosphate

The chief purpose of the Limestone-Phosphate department is to protect the interests of farm bureaus and farm bureau members in their purchase of agricultural limestone and raw rock phosphate by seeing that there is an adequate and economical supply of these fertilizers available for the soil of Illinois.

To attain this end, the program of the department for 1924 specifies that it will investigate and study the underlying conditions and developments which control or affect the present and future supplies of agricultural limestone and crude ground rock phosphate. This work covers matters of the ownership and operation of the sources of supply, quality, quantity and price of the products and conditions and costs relating to transportation and distribution.

To act as a bureau of information for farm bureaus and their members in relation to limestone and phosphate and to inform the producing industries when such information will react to the interest of farmers.

To act as the spokesman for farm bureaus or individual members in their negotiations with the producers for the adjustments and correction of abuses covering prices, weights, quality, service, etc. To advise regarding the development of local farmer-owned production enterprises, storage facilities and other problems.

To give information on sources of supply and cost of other fertilizers, such as potash, nitrates, acid phosphate, and bone meal. Questions in regard to the developing, selling or leasing of coal rights by landowners and collective purchase of coal by members will also be handled by the department.

Transportation Department

To represent Illinois farmers in proceedings before the commerce commissions and railroads. This work includes filing formal and informal complaints before the Interstate Commerce Commission or the Illinois Commerce Commission, presenting evidence and giving testimony in proceedings where the interests of the members are involved, filing briefs and giving argument in connection with such proceedings.

To propose matters for consideration of railroad rate committees and appear before such committees when the interests of the membership is involved. Negotiate with individual railroads in matters of rates, train schedules and shipping facilities.

To maintain a freight rate service which will include the quotation of rates and routing on agricultural commodities and the making of survey of freight rates on certain commodities demanding attention.

To assist members, cooperative associations and county farm bureaus in securing cars.

To assist in securing side tracks and other shipping conveniences, and in changes and adjustments in freight train service.

To help in preventing claims against railroads by obtaining necessary repairs and improvements to livestock pens and by giving out information to shippers on the reducing of losses in transit.

To maintain a railroad claim collection service for freight overcharge and freight loss and damage claims.

To carry on investigation of highway and water transportation problems.

Information

Continue publication of the I. A. A. Record and improve it, with the view of making it a more potent factor in informing and holding the membership.

Continue the information service to the public press, including farm papers, dailies and weeklies. Improve the quality of material sent out in this service.

Give county farm bureaus more specific help in their information and publicity problems.

Maintain a publicity and advertising service to cooperative marketing associations. To the extent that this work can be done without addi-

(Continued on Page 3)

FARM MEASURES ARE DISCUSSED BY BUREAU LEADERS

"We Should Study Legislation" Says President Thompson; Bills Explained

"I believe that it is important that we, as farmers, should give careful study to the legislation proposed for agriculture at Washington," declared President Thompson of the I. A. A. in opening the meeting of county farm bureau presidents in Chicago, March 6. "The I. A. A. has always had a well-defined policy on legislation in Illinois. We must use our influence to get good and to kill bad legislation. We must center our strength on the measures we want most."

Presidents or other representatives of 85 of the 94 Illinois farm bureaus were present at the meeting, called two days previous by the I. A. A. for the purpose of acquainting them with agricultural measures now being considered in Congress.

Taking up the McNary-Haugen bill as the most important piece of legislation under consideration, President Thompson asked John Faissler, DeKalb county attorney, to give an explanation of the bill.

What Can You Buy?

"What can you buy when you sell a pig or a steer or a bushel of corn?" asked Mr. Faissler. "That's what determines the worth of farm products. Five years ago five bushels of wheat would buy a pair of shoes—now it takes 10 bushels. We are selling our farm products on a world market price but for merchandise and farm labor we pay the home market price.

"The McNary-Haugen bill would so arrange it that the prices of farm products would be in a line with what the farmer buys," he explained. "If the bill was in force today, wheat would be from $1.40 to $1.50 per bushel instead of $1.00. It should be $1.59 to be on the same level as non-agricultural commodities."

Purpose of Bill

The purpose of the bill, as explained, is to put the purchasing power of farmers on the same level as it was in the 10 pre-war years, 1905-14, thus putting them on a fair trading basis with other industries. It proposes to do this by a government corporation to buy the surplus of any farm commodity when its sales price is 10 per cent below the pre-war ratio. The cost of this operation would be borne by all farmers selling the commodity below ratio by the issuing of scrip for a share of the commodity price.

For illustration, it was stated that in November, 1923, with the price of hogs at $7.05 per hundred, if the price had been on a ratio with the purchasing power of hogs in the 10 pre-war years, they would have brought a price of $10.85 per hundred.

Emergency is Great

"The present emergency in agriculture has had no parallel in the history of our country," declared President Thompson. "Many say that the same conditions prevailed in 1893. But at that time the depression hit the business man, the professional man and all industry as well as farming. Everyone was on the same basis. But today the farmer is not on a fair trading basis with other industries.

"This bill proposes to put agriculture on this fair trading basis with other business. It will start men to thinking as they have never thought before. It will give us the same chance as industry, labor and every other class.

Intelligent Production

"It has been said that the bill will lead to increased production. I do not believe that it will. Overproduction will cause a large surplus to go on the world market at a lower price and this lower price will come right back to the producer in a lower value for his scrip.

"In my opinion, rather than leading to increased production, it will lead to intelligent production and a study of supply and demand on the part of the farmer. The bill is the result of the thought of the best agricultural minds of our country and it reflects the true sentiments of those who have the best interests of agriculture at heart.

"While it may not remove all difficulties it is better than anything else that has been proposed for the relief of agriculture."

Co-op Marketing

Asked what the effect of the measure would be upon cooperative marketing, Mr. Thompson said that he could not see that it would be harmful to its progress. A free discussion of the bill was entered into by the meeting to clear up questions before the resolution was passed that is printed in another column of the Record.

A large number of county farm bureau representatives stated that their executive committees had already taken action endorsing the McNary-Haugen bill.

EVERY CORNER OF ILLINOIS REPRESENTED HERE

Packers-Stockyards

C. A. Stewart, director of livestock marketing, was called upon to discuss the proposed amendments to the Packers and Stockyards act. Some of the amendments would strengthen the act slightly, according to Mr. Stewart, but in the main they would have little effect on Illinois livestock shippers.

Amendment Dangerous

"However, the amendment known as the Williams bill is very dangerous," said Mr. Stewart. "It would practically put cooperative commission companies out of business. According to its provisions, everyone connected with a Producers' agency would have to be a producer, even the manager.

"It provides that each member of a shipping association that desires to join a cooperative commission company must file his written application with the Secretary of Agriculture. It would practically be impossible to get the written consent of every member of a livestock shipping association in order to join a cooperative commission agency. Again, it provides that each member of such a company must assume personal liability for the association. Another clause would make it impossible for a non-member to ship to a Producers' agency."

Has Little Chance

Mr. Stewart said that the amendment had little chance of passage out of the House Agricultural Committee. Representative Williams, Illinois, who introduced it by request, is now one of its strongest opponents, stated Mr. Stewart. The National Live Stock Producers appeared against the amendment at a hearing on March 8 in which the livestock exchanges were proponents of the measure.

Who Are Fighting It?

The metropolitan press had been giving the McNary-Haugen bill the "silent" treatment until recently. But now, especially since the I. A. A. meeting with farm bureau presidents came out unanimously for passage of the measure, propaganda against the bill from the grain exchanges, livestock exchanges and other big interests is being "played up" and many of the big city newspapers are protesting editorially against its passage.

Committee Gives Thompson Power To Fight For Bill

After the meeting of farm bureau presidents had stated their stand on the McNary-Haugen bill in no uncertain terms, the executive committee passed the following motion: "That President Thompson be authorized to be in Washington sufficient time and further be empowered to call for or to employ any assistance that he may deem necessary to safeguard the interests of our association and agriculture in general and that everything possible may be done to assist in the passage of the McNary-Haugen bill."

O. K. RELIEF MEASURE

Endorsement of the McNary-Haugen bill was made by the Mazon Farmers' Elevator Company at its annual meeting March 8, which was attended by 800 farm folks of Grundy county. George E. Mellen is manager of the company.

PROGRAM OF WORK FOR I. A. A. IN 1924

(Continued from page 2)

tional cost to the association, it is the intention to do it free of charge. Service to cooperative associations which calls for additional outlay of money by the department will be extended on a cost basis.

Carry on survey to determine value of radio as a means of publicity and if it is determined a worth while means, make provisions for broadcasting I. A. A. information regularly.

Finance Department

To supplement the collection service rendered farm bureaus through a field man to go to farm bureau offices to put in a uniform collection plan and to unify, as far as practical, business practices and methods in farm bureaus, such as auditing, bonding financial statements, handling and disbursing of funds and other office details.

To make available to the farm bureaus an annual audit and render a report thereof in standardized form to their executive committees for presenting to membership.

To make this service available first to those county farm bureaus having smaller memberships.

To render service and counsel upon terms to be mutually agreed upon to cooperative associations at the joint request of the cooperative and farm bureau or bureaus interested.

Legal Department

To advise the heads of the I. A. A. departments and the executive officers on legal matters which affect the association or its department activities.

To assist in the organization and legal setup of cooperative associations fostered by the I. A. A.

To assist county farm bureaus or their members in legal matters affecting them.

To serve the legislative committee and special committees that have the direction of legislation affecting agricultural interests.

To act as a clearing house through which attorneys representing cooperative associations shall be able to receive advice on the enforceability of producers' contracts and on the rulings of courts throughout the state on all statutes and questions related to cooperatives.

Poultry and Egg Marketing

The program for the poultry and egg marketing department will be to encourage as far as possible the buying of eggs on a graded basis at country points. By cooperation with the Illinois Poultry and Egg Shippers Association it is believed that most progress can be made by assisting them in getting the egg business on a graded basis at the earliest possible moment.

In addition to this the program is to be planned from the facts to be obtained by a survey of the present poultry and egg marketing machinery, beginning with the huckster and country grocer on through the list to the commission and storage companies. This survey is to be conducted in cooperation with the dealers, shippers and others interested along with the University of Illinois Poultry division and the Department of Agriculture at Springfield.

22nd DISTRICT LEADERS ENDORSE FARM RELIEF BILL

Favor I. A. A. Radio From St. Louis; Meeting Freely Discusses Farm Bureau Plans

A meeting of farm bureau leaders of the 22nd district at Waterloo on March 9 with I. A. A. executive committeeman, Stanley Castle, passed resolutions favoring the McNary-Haugen bill, condemning the Williams bill amending the Packers and Stockyards act, asked the I. A. A. to help the district to get a test plot to try out the Monroe county plan of eradicating wild garlic and appointed a committee to investigate the advisability of organizing a cooperative produce company in St. Louis.

There was a feeling, Mr. Castle says, that the I. A. A. is not getting close enough to the farmer. The suggestion was made at the meeting that the I. A. A. endeavor to broadcast its information over the St. Louis radio stations.

In discussing the question of candidates for public office, Mr. Castle said that the farm bureau should not get into politics by endorsing candidates and working for them, but he believes it the duty of the farm bureau to advise the membership to support candidates who have supported agriculture and men who know and understand agricultural problems.

"It was about as free a meeting as I have ever been in," Mr. Castle says. "It gave an opportunity for all to get acquainted. After a few meetings like this, they will know who in the best man to pick for the I. A. A. executive committee. I feel that I am better able to represent the district."

The next meeting of the district will be held the latter part of May at Greenville.

STATE STAND ON FARM LEGISLATION

(Continued from page 1)

and other representatives of the county farm bureaus of the state of Illinois and the members of the executive committee of the Illinois Agricultural Association in conference assembled at Chicago on this 6th day of March, 1924, that we urge the senators and representatives in Congress from Illinois to actively support all amendments to the Packers and Stockyards act which will strengthen the administration provisions of the act and hereby declare our unqualified opposition to the passage of House Bill 5944, commonly known as the Williams bill.

MILK PRODUCERS AT GALESBURG FORMED CO-OP ASSOCIATION

Will Consider Problems In Mutual Way; Lynch of I. A. A. Helps In Movement

Sixty dairymen of the territory adjacent to Galesburg met with A. D. Lynch, director of dairy marketing for the I. A. A., March 11, and voted to organize the Galesburg Cooperative Milk Producers Association. It will be incorporated under the Illinois cooperative marketing act with no capital stock but with a small membership fee. The meeting was called under the auspices of the Knox County Farm Bureau.

The association will be composed of three classes of dairymen, those who retail milk in Galesburg, those who sell to milk distributors, and those who sell cream. "The men who attended the meeting expressed the thought that a dairymen's business organization is something that has been needed there for a long time," states Mr. Lynch.

Will Study Problems

"It is not the intention of the association to go into the milk distribution business at this time. Rather they intend to get acquainted, study their mutual problems and get their interests harmonized."

"The spirit of the meeting seemed to be that the basis of competition between the milk producers should be quality and service rather than price-cutting," declares Mr. Lynch. "The association is planning an advertising budget to stimulate the consumption of milk."

Choose Officers

The new association elected directors and officers as follows, for terms of one to three years: for 1 year, M. C. Craft, Galesburg, vice-president; E. B. Wagoner, Galesburg, secretary; Dr. W. E. Miller, Abingdon. For 2 years: Clyde Olinger, Galesburg; E. V. Babbitt, Avon; H. E. Rose, Galesburg. For 3 years: Ed Gumm, Galesburg, president; C. L. Fairchilds, Galesburg, treasurer; R. L. Goldsberry, Galesburg.

Macoupin Bureau Defines Politics; Endorses Rinake

A resolution passed by the Macoupin County Farm Bureau calls attention to the need for farmers to pay more attention to the records of men running for important political offices.

"It is not politics," the resolution states, "but strictly a farm bureau activity for us and all of our members to see to it that each political party selects candidates who appreciate, understand and will work for the good of agriculture." The resolution states it is not the business of the farm bureau to help such candidates get office.

With this explanation, the Macoupin bureau calls attention of republican farmers of the county to the candidacy of Judge Lewis Rinake, a large farmer and stockman of Modesto, who is running for Lieutenant-Governor, subject to primaries April 8, and endorses his candidacy to republican voters.

It is understood that the Macoupin executive committee is about equally composed of democrats and republicans.

E. L. Bill Chosen Program Director For Radio Station

Edgar L. Bill, Director of Information for the I. A. A., has been chosen as director of programs for the Sears Roebuck Agricultural Foundation broadcasting station in Chicago. He will take up the new work on April first.

"I see a wonderful opportunity to do a great good for agriculture in this new work," says Mr. Bill. "Radio is the new means of spreading information, education and amusement. Through this new medium, the best talent in all phases of the agricultural field can be made available to the most remote farm house."

Mr. Bill states that he hopes to make use of much of the talent in county farm bureaus, home bureaus, community clubs and boys and girls club work. He invites the cooperation and suggestions of the whole farm bureau crowd.

The Sears station, which will start broadcasting about April 1, will be the only farm station in the United States. It will be a 500-watt station with a wave length of 448 meters, powerful enough to reach all corners of the United States.

Mr. Bill was Director of Information for the first three years after the association was reorganized on a $5 membership basis, and again last August was asked to take charge of this work. Mr. Bill's successor in the I. A. A. has not been named.

McHenry County Farmers Secure Big Tax Decrease

For each of the 2,874 farms in McHenry county there is an average decrease of $13.87 per farm in 1923 taxes due to the work of the McHenry County Farm Bureau. The total decrease, due to the decrease in valuations of farm land, is $39,876.58. McHenry county made the first complete report to the I. A. A. after John Watson of the Taxation department had asked all counties for reports on taxes to be paid this year.

The valuations on which taxes were extended on lands decreased $1,551,536 from 1922 to 1923, or 11.48 per cent. The taxes extended on the valuations for 1923 decreased $38,530.22 or 7.31 per cent. However, part of this decrease, or $6,411.32 is due to a decrease in tax rates. This leaves $32,118.90 decrease due solely to decrease in valuations.

But there was an increase in the state tax rate of 42.3 cents to 50 cents per $100 of assessed valuations, in no way caused by decreased valuations. Had there been no decrease in valuations, the state taxes would have been $7,757.68 higher than they are. Adding $7,757.68 to $32,118.90 makes a total of $39,876.58 which is the total decrease.

Thomas Watkins Oldest Bureau Member, Dies

Thomas Watkins, oldest citizen of Cass county and the oldest farm bureau member in Illinois, passed away on February 26, at the age of 96 years, 6 months and 3 days. Mr. Watkins may have been the oldest farm bureau member in the United States.

He was born in Kentucky, Aug. 23, 1827, moved to Cass county when a young man and resided on a farm there until his death. When solicited for membership in the farm bureau last year, he signed immediately, saying that, "while I may be too old to get all of the direct benefits of the farm bureau, I have lived just long enough and seen enough phases of American agriculture to realize the value of real farmer organization."

ILLINOIS COTTON GROWERS START ORGANIZATION PLANS

Cowles Represents I. A. A.; Farm Bureaus Take Lead In Helping Growers

Cotton growers of southern Illinois met at Mound City, March 8, and took the first steps toward the formation of a growers' association by naming Lee Lingenfelter, Pulaski county, as chairman of an organization committee of 11. Two representatives from each of the following counties will be chosen for the committee, Pulaski, Alexander, Massac, Union and Johnson.

R. A. Cowles, treasurer of the I. A. A., attended the meeting and made a talk in which he stressed the value of organization and explained how the I. A. A. would be able to help. Marketing problems of cotton growers were discussed by C. O. Moser, secretary of the American Cotton Growers Association. At a bankers' meeting at Mounds the same day, Chas. G. Henry, president of the Arkansas Cotton Growers Exchange, told them how cooperative marketing improves economic conditions.

Bureau Started It

The meeting was called by the Pulaski County Farm Bureau which was largely responsible for starting cotton culture in southern Illinois last year. Between 1500 and 2000 acres were successfully raised in 1923, and prospects point to planting of over 20,000 acres this year. There is much enthusiasm in the project.

The farm bureaus of southern Illinois are doing much to assist growers in securing strains of seed adaptable to the district and in helping with proper cultural methods for cotton.

No Boll Weevil

Cotton has been raised with profit in southeastern Missouri for several years with no appearance of the boll weevil. It is said to be too far north in that district and in southern Illinois for the weevil. There has been an overproduction of truck crops in that part of Illinois and producers are looking to cotton to help the region through diversification.

Decatur Milk Co-op Starting Sale of Stock

The Producers Cooperative Dairy of Decatur through John A. Record, secretary of the organization committee, has secured the services of H. L. Hough of the I. A. A. organization department to start the campaign for selling stock and signing contracts for the cooperative.

The company is capitalized at $75,000 and is incorporated under the Illinois cooperative marketing act. The management plans to lease facilities in Decatur as soon as possible so that the association can enter the business of merchandising pasteurized quality milk.

Harper Resigns; Going With Nat'l Producers Ass'n

J. D. Harper, for the past few months in charge of poultry and egg marketing for the I. A. A., has resigned and on April 1 will take up his new duties with the National Live Stock Producers Association, with whom he has accepted a position. He will take over many of the duties which have been in charge of F. M. Simpson, formerly general manager of the National Producers, but who is now manager of the Producers' selling agency at Kansas City.

Mr. Harper has been connected with the I. A. A. for three and one-half years. Prior to taking over the poultry and egg work, he served as assistant secretary of the association, having charge of the I. A. A. offices and carrying on special investigational work.

Last fall he was very active in promoting the accredited hatchery plan now in successful operation. He has also done much to acquaint poultry and egg buyers with the necessity of adopting standard government grades for eggs and buying them at country points on the basis of quality. Both the National Poultry, Butter and Egg Association and the Illinois Poultry and Egg Shippers Association have passed resolutions favoring these improved practices in egg marketing.

T. B. Appropriations Made By DeWitt -Douglas Counties

The DeWitt and Douglas county farm bureaus are the latest additions to Illinois counties that have secured appropriations for area tuberculosis testing from their boards of supervisors. Each of the counties will start testing soon after a veterinarian can be hired.

Winnebago county is starting an educational campaign to secure appropriations for testing.

EGG SHIPPERS O. K. BUYING ON BASIS OF UNIFORM GRADES

Harper Tells Meeting of Present Injustices To Producers; To Help Make Survey

The Illinois Poultry and Egg Shippers Association at its annual meeting at Peoria, March 7, in resolutions endorsed the efforts that have been made for the establishment of uniform egg quality standardization and the principle of buying eggs on a quality basis at country points in order to stimulate the production of higher and more uniform quality eggs and poultry.

The meeting also asked that a committee be appointed to formulate plans for cooperation with the I. A. A., University of Illinois, and State Department of Agriculture to conduct a survey of the poultry and egg business of Illinois in order to get at the necessary facts on which to base an intelligent program for the future.

"The greatest injustice in present methods of marketing eggs in Illinois is the prevailing practice of buying all classes and grades on the basis of an average price," J. D. Harper of the I. A. A., told the convention before the resolutions were passed. "This price, which does not make for exorbitant profits to dealers, greatly penalizes the producers of quality eggs who are, for the most part, farm bureau members."

The survey to be made with the help of the I. A. A. will determine all the facts concerning the marketing of eggs, according to Mr. Harper. It will give a picture of the desirable and undesirable trade practices now in vogue in the marketing of eggs and will determine a basis for the intelligent buying of eggs in the future.

Survey Shows Over 21,000 Farmers Are Radio Fans

Between seven and ten per cent of the farmers in Illinois have radio receiving sets, according to the results of a survey just completed by the I. A. A. Department of Information. Reports from 74 county farm advisers show a total of 21,045 receiving sets on farms in these counties.

The purpose of the survey was to determine the extent of the use of radio on farms, the type of programs the farmers like best, practical benefits of the radio, and what features the I. A. A. might develop that would be of special interest to Illinois farmers.

News of pending legislation, crop reports, cooperative marketing talks, farm organization news, market reports, and short talks on good farming practices were some of the main points suggested for the I. A. A. radio programs. Good results were mentioned from the market reports now being broadcast by the various stations near Illinois, and replies from most of the counties show that many farmers tune in on the weekly farm lectures broadcast each Tuesday night from station KYW, Chicago, under the auspices of the American Farm Bureau Federation.

A number of farm communities have receiving sets installed in schoolhouses, country churches or community houses for their meeting programs. Logan county reports four rural schools having sets. In Greene county there are no regular community sets as yet, but private sets are frequently loaned and installed for community meetings.

The counties near broadcasting stations show the most sets. Madison county, in the vicinity of St. Louis, has 2,550 sets; Rock Island county, near Davenport, has 900 and in Henry county, also near Davenport, the report shows that nearly one-third of the entire population has sets. Coles county has had 100 sets installed in the last six months.

USING WATSON IN OHIO

John C. Watson, in charge of Taxation and Statistics for the I. A. A., went to Wood County, Ohio, March 11 and 12 to work with Secretary Murray Lincoln of the Ohio State Farm Bureau Federation in a demonstration for county tax valuation work.

Stanley Castle, Alton, reports that a farm bureau market has been opened in Edwardsville similar to the markets at Kankakee, Bloomington, Freeport and other cities.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

IAA IAA

Volume 2 | April 5, 1924 | Number 7

LIMESTONE PRICE EFFORTS OF I. A. A. BRING FIRST FRUIT

One Producer Agrees To Farm Bureau Recognition; Will Rebate 10 Cents Per Ton

"One of the large limestone producing companies has agreed to the I. A. A.'s proposition for recognition of farm bureaus in the price of limestone" states J. R. Bent, Director Phosphate-Limestone department.

"They quote a price of 50 cents per ton in carload lots at the quarry to all farmers and will rebate to each county farm bureau, once a month, 10 cents per ton on the orders sent in by that county. While this is granted as a recognition of the service rendered by the county bureau it will be permissible for each county bureau that chooses to do so, to remit in turn to each purchasing farmer. It is anticipated that other limestone producers will also agree to this plan."

Committee Negotiated

A committee of representatives from various parts of the state, headed by the Phosphate-Limestone department of the Illinois Agricultural Association, was appointed and authorized at the state-wide conference on limestone at Springfield to negotiate with the various quarry companies for such recognition of the farm bureaus and favorable prices.

The conference urged the Phosphate-Limestone department of the I. A. A. to continue its supervisional work on quality of stone furnished and service rendered by the various companies and that it handle all matters of adjustment of complaints on quality, weight and service.

U. of I. to Help

The University of Illinois was asked to determine more exact and dependable information as to the relative value of the different types of limestone and the degree of fineness economical to seek in especially pulverized stone.

A committee consisting of J. R. Bent of the I. A. A., Dr. F. C. Bauer of the University of Illinois and Frank I. Mann of the Farmers' Institute, was appointed to carry on negotiations with the higher railroad managements for the maintenance and furtherance of the lowest possible freight rates on agricultural limestone.

MORE REASONS FOR McNARY-HAUGEN BILL

SUSPENDED ANIMATION
—Harper in the Birmingham *Age-Herald*.

WHAT'S THE MATTER WITH THAT CRUTCH?
—Harding in the Brooklyn *Eagle*.

Trying To Divide Agricultural Ranks On Muscle Shoals

"In spite of the determined efforts of those who have spent hundreds of thousands of dollars to kill the Ford offer on Muscle Shoals, the measure has made encouraging progress," declares President Thompson of the I. A. A. "It has passed the House by a vote of 227 to 142 and is now in the hands of the Senate Agricultural Committee."

Mr. Thompson states that opposing interests have striven hard to divide the ranks of those who seek agricultural relief on the Muscle Shoals proposition, which, with the McNary-Haugen bill, are the two principal planks in the farm bureau legislative program.

"Of course no legislation affects or interests all sections of the country alike," Mr. Thompson says, "and the opposition soon realized that there were sections which did not use fertilizer whose representatives could perhaps be brought to oppose the Muscle Shoals legislation."

The I. A. A. was one of the first farm bodies to investigate the proposition of developing the nitrate plants at Muscle Shoals for the benefit of farmers. The Ford plan was approved by the association in resolutions and there has been no change in the I. A. A. attitude since that time.

32 Counties Have Joined New Serum Purchasing Ass'n

Membership has been taken out by 32 county farm bureaus in the Illinois Farm Bureau Serum Association, according to C. A. Stewart of the I. A. A., secretary of the organization. The association was organized in Galesburg at the last annual meeting.

Seven other counties have signified their intention of joining the organization, giving prospects for a membership of 39 counties out of the 44 which will handle serum this year.

Mr. Stewart estimates that approximately 26,000,000 cubic centimeters of serum and virus will be handled by county farm bureaus this year, about two million more than last year. The association has received bids from nine serum companies.

Alexander County Considering Bureau

G. E. Metzger, director of the I. A. A. organization department, has been invited to speak before a meeting of the Kiwanis club with Alexander county farmers at Cairo on April 17 to explain farm bureau work. Alexander county is considering the organization of a county farm bureau. It is one of the seven unorganized counties in Illinois.

The I. A. A. Answer

On the four-page insert of this issue of the Record are reproduced two letters. One is from Congressman Rainey to President Thompson asking why the I. A. A. has committed itself to the McNary-Haugen bill and bringing in about all the objections that have been raised against the measure. The other letter is President Thompson's reply to Mr. Rainey answering these objections and definitely setting forth the reasons why the I. A. A. is demanding the passage of the bill.

Geugler To Head Poultry and Egg Work For I. A. A.

F. A. Gougler, Urbana, has been employed by the I. A. A. as director of the Poultry and Egg Marketing department to succeed J. D. Harper, who on April 1 entered the employ of the National Live Stock Producers Association. Mr. Gougler is at present taking advanced work in poultry husbandry at the University of Illinois and will be on a part time basis with the I. A. A. until June 1, when he will be on full time.

Mr. Gougler was farm adviser in Adams county for about four years until his resignation last September. Previous to that he was in county agent work in Missouri. He completed his collegiate work at the Oklahoma A. and M. College.

Increased Use of Limestone in 1924 Is Anticipated

Forty-three counties used more limestone in 1923 than in any other year, according to reports secured from county farm bureaus by the Phosphate-Limestone department. A total of 298,623 tons of limestone were used in the 95 farm bureau counties in 1923, an average of 3,176.84 tons per county. Much the largest portion of the limestone business in Illinois in 1923 was carried on through county farm bureaus.

However, 1919 was the maximum year for the use of limestone in Illinois as a whole, as reports from that year indicate that over 363,000 tons were used. Last year's volume was second in tonnage.

"The anticipated tonnage to be used in the organized counties of the state in 1924 is over 250,000 tons," states J. R. Bent, director of the department. "This is an average of 4,212.51 tons for each county."

The report showed that there are 135 local farmer-owned limestone crushers in operating condition in Illinois.

TIME IS SHORT ON RELIEF BILL SAYS THOMPSON

Tell Senators and Congressmen To Act Before Congress Adjourns, Advice

S. H. Thompson

"The McNary-Haugen bill is the real remedy for our situation," says our president, S. H. Thompson. "We are going through to the end to make it a law.

"Keep in touch with your Congressmen," Mr. Thompson asks you. "Not only ask their support but ask them to use their influence with their fellow members to secure the passage of this bill. Talk it over with your neighbors. Tell your business men and bankers about it. Show them the fairness and merits of it.

"The time is short. It is now well understood that Congress will adjourn in June, which means that we must put on all the power we have to get the McNary-Haugen bill passed during this session.

"It is conceded by all that the present condition of agriculture justifies the passage of this bill. It does not add any burden to our government or any unnecessary burden to the consuming public. The entire cost is charged back to the commodity.

"If you are for this emergency measure now is the time for every farm bureau member to declare himself to actively engage in the battle to make it a law. Your officers are counting on your help."

ENDORSE McNARY-HAUGEN BILL

After the DeWitt County Farm Bureau and the Clinton Chamber of Commerce held a joint meeting, the chamber of commerce passed a resolution endorsing the McNary-Haugen bill and directed that a wire be sent to 19th district Congressmen urging them to support the measure.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, E. L. Bill, Director.

Entry as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

General Office and Assistant to Secretary, J. H. Kelker; Organization, G. E. Metzger; Information, E. L. Bill; Transportation, L. J. Quasey; Statistics, J. C. Watson; Finance, R. A. Cowles; Fruit and Vegetable Marketing, A. B. Leeper; Live Stock Marketing, C. A. Stewart; Dairy Marketing, A. D. Lynch; Phosphate-Limestone, J. R. Bent; in charge Poultry and Egg Marketing, J. D. Harper; special representative on Tuberculosis Eradication, M. H. Petersen.

Thompson Answers Rainey

The full texts of both Congressman Rainey's letter to President Thompson and our president's reply are printed in this Record. Read both and you will find the stock objections to the relief measure and effective answers to them.

—o—

Our Duty On April 8th

Farm bureau members have an important duty to perform Tuesday, April 8, 1924, on primary day. It is more than a duty to self—it is a duty to agriculture as well as to our country. The responsibility to vote on primary day is equally important, if not more so, than to vote on election day. Candidates are to be nominated for United States Senator, for Governor, as well as other responsible public offices.

Agriculture needs broad-minded and honest public servants. It needs sympathetic friends in public office. It is therefore important to carefully scrutinize the character and record of candidates.

The duty of farm bureau members is not only to vote but also to influence others to vote for able and friendly candidates. The I. A. A. and farm bureaus have often asked public servants for their support of agricultural measures. Public servants have been told that their record was being watched. They have not been promised the use of I. A. A. or farm bureau organizations for re-election. However, men in public service who have served faithfully and ably have a right to expect every farm bureau member to do his duty by voting at the primary and using all proper methods to get others less interested to vote.

Primary day not only brings a duty but an opportunity to demonstrate our right to demand faithful and honest service from men in public office. Let's work, and vote. It is a sacred duty we owe to our country, to agriculture, to our organizations and to ourselves.

—o—

Cooperatives and the Farm Bureau

We are trying to find ourselves in the relation of county farm bureaus and cooperative marketing associations. Many county farm bureaus have a direct tie-up with local livestock shipping associations, and many more are planning a direct relationship between the membership of the farm bureau and the shipping associations.

The Illinois Fruit Growers' Exchange ran into this same problem in discussing the policy in regard to qualifications for membership, and the following motion was adopted:

"In counties where there are farm bureaus, it shall be the policy of the Board of Directors to require individual members in the Illinois Fruit Growers' Exchange to become members of the county farm bureau and the Illinois Agricultural Association; and in counties where there are no farm bureaus, it shall be the policy of the Board of Directors to require the members joining the Illinois Fruit Growers' Exchange to agree to join the farm bureau and the Illinois Agricultural Association if organized in that county."

The farm bureau in Illinois, both county and state organizations, has championed cooperative marketing. It has worked hard in many different ways to help cooperative associations over the rough places. Now the question is whether the farm bureau shall cut loose entirely from the marketing associations or shall it have some definite relationship with them. The action of shipping associations and of the Illinois Fruit Growers' Exchange throws some light on this question. What do you say about it?

—o—

We Champion Cooperative Marketing

In the March 5 issue under this same head we told about the Williams bill, carrying a number of amendments to the Packers and Stockyards Act which would practically put the cooperative livestock commission companies out of business.

The Williams bill is dead now. An I. A. A. representative went to Washington and explained to Congressman Williams what it would do to cooperative marketing and Mr. Williams withdrew the bill.

—o—

"Strictly Clean" Doesn't Mean Washed Eggs

Following the recommendation of the Illinois Poultry and Egg Shippers Association, many egg buyers at country points are now buying eggs on a graded basis. The I. A. A. was very active in promoting this plan of paying a premium to producers of quality eggs.

These buyers are offering five cents per dozen more for "strictly clean (not washed), fresh eggs; free from cracks and checks; weighing 1½ pounds or more per dozen; no duck, bantam, guinea or small eggs."

Reports come to the I. A. A. that many people are washing their eggs and thus losing the advantage of the higher grade.

Most of the eggs sold during this period of the year are sold for storage purposes and washed eggs will not keep in storage. Washing removes the protective covering, permitting germs and molds to enter very readily, bringing about decomposition much earlier than otherwise.

Only eggs that go into the retail trade at once should be washed.

—o—

The 1923 Wool Pool

There has been some dissatisfaction with the net prices received by the wool pool in Illinois in 1923. Around 200,000 pounds of wool were consigned to the National Wool Warehouse and Storage Company in 1923 as the Illinois share of the pool.

Poolers with the better grades of wool were as a whole well pleased with the results of the pool. They received an average net price of 41 cents for their wool compared to an average of 36 cents paid by local dealers. Of course there were some instances where local dealers bid especially high in order to discourage pooling, causing complaints in such localities on the pool price.

The fact that wool graded lower than during 1922 resulted in a somewhat lower price. If the grading had been on a par with the previous year the pool would have netted about two cents per pound more. No satisfactory explanation can be given for the difference in grading of the two clips but the fact remains that Illinois wool in the 1923 pool was as a whole of poorer quality than that of the previous year.

One big difficulty with last year's pool was that much of it was shipped in small lots, causing heavy transportation charges. It cost from 7 to 8 cents a pound to market wool through the pool when small amounts were shipped by freight or express to their destination. Contrasted with this is the example of a shipment from a western Illinois county of 17,000 pounds in one carload with total transportation and handling costs of 4 cents per pound until the wool was warehoused.

Counties which expect to enter the wool pool in 1924 must assemble their wool at a definite time to ship in carload lots if they expect satisfaction. Good results cannot be obtained when small shipments of wool are made indiscriminately throughout the season. The costs are too high.

Just as in the cooperative marketing of any other commodity, there must be volume of the product in order to bring the lowest transportation and other handling charges.

—o—

Cream Producers' Problems

Figures taken from cream buying stations at Paxton, Ford county, using the prices paid for butterfat on the 26th of each month from May, 1923, to February, 1924, compared with prices on the Chicago market for 92 score butter on the same days, showed that the farmers received a variation of all the way from one to seven cents for their butterfat below the Chicago market price for 92 score butter. In the ten months, on the 26th of each month, the prices for fat at Paxton varied from 32 to 53 cents with an average of 41.8 cents. The Chicago market for 92 score butter on these same days fluctuated from 43½ to 54 cents, with an average of 49.7 cents.

On March 18 the I. A. A. Dairy Marketing department met with an organization committee of Ford county farm bureau members interested in changing such conditions as the above. On the same day the cream buyers paid 45 cents for butterfat and the Chicago market for 92 score butter was 43½ cents, or one and one half cents above the Chicago butter price.

Wasn't it quite a coincidence that the cream buyers' butterfat price went above the Chicago butter market on the same day that farm bureau members met to consider the proposition?

The 1923 report of the Mt. Carroll cooperative creamery, which was organized with the aid of the I. A. A., showed that the co-op paid its members from 40 to 50 cents for butterfat during 1923, or an average of 46.8 cents. That shows what cooperative marketing can do.

The dairy marketing department did not recommend the organization of a cooperative creamery in Ford county as the amount of cream produced is not sufficient to warrant a creamery. However, the department recommended the organization of a collective bargaining association through which members of the cream producers' association will have their own cream-gathering stations and will contract for cream sales with some large cream buyer. Their organization will study the butter market and will be in a position to know whether or not Ford county producers are receiving what they should for their butterfat.

—o—

Red Top Success

The Egyptian Seed Growers' Exchange, composed of over 600 red top seed producers in Clay, Wayne and neighboring counties, sold 1,169,739 pounds of seed last year and members received a net price of 11.6 cents per pound with the final settlement that has recently been made. This beat the average price paid by local dealers in the pooling district by about one half cent per pound.

HERE'S WHY WE ARE FOR McNARY-HAUGEN BILL

This is the Letter that Rainey Wrote to Thompson

WASHINGTON, D. C.
March 12, 1924.

HON. S. H. THOMPSON,
Illinois Agricultural Association,
608 South Dearborn Street,
Chicago, Illinois.

My dear Mr. Thompson:

I am in receipt of your communication in the matter of this McNary-Haugen bill. I am studying the bill now. It contains many most objectionable features. I think if it passes it will be vetoed by the President.

I am a farmer, and live on my own farm, and farm it myself. I am also a member of the Farm Advisory Committee of fifteen, appointed by our Illinois State University, and am therefore much interested in this subject.

I started out with the intention of supporting this bill, if possible, for the reason that Farm Organizations were endorsing it. But, the more I study it, the less I think of it. I am assuming that the Illinois Agricultural Association in a matter as important as this is to agriculture, has thoroughly studied the question before committing itself to the proposition, and before the Association reached the conclusion to "hereby request, urge, insist, and demand that our Representatives in Congress earnestly, unqualifiedly, and actively support and vote for this emergency relief measure and use all their influence and power to secure the enactment of this measure at the earliest possible date"

Insists on Answers

The Illinois Agricultural Association, therefore, has so thoroughly committed itself to this measure, that I feel that I am entitled to be advised by you representing the Association as to some of the proposals in the bill, which seem to me to be exceedingly objectionable. I am anxious to have your views as to the matters which I will attempt to outline. Inasmuch as the matter may come up very soon, and inasmuch as you speak for the Illinois Agricultural Association, I am therefore urging and insisting that you furnish me a discussion from your viewpoint of the matters I suggest below at the earliest possible moment:

Asks 25 Questions

1. The bill proposes an issue of "scrip" which will evidently not be less in amount than $200,000,000 or $300,000,000; and if the bill is made to apply to all the commodities enumerated in the bill, the issue of "scrip" may amount to several times that amount. The only thing we know definitely about this issue, as to its value, is that it will never be worth its face. It will not on its face purport to be legal tender, but it can be passed from hand to hand just as a coupon bond is passed from hand to hand.

(a) Under the above circumstances, will it not in reality operate to bring about a period of expansion in our currency?

(b) An issue of "scrip" of this kind may amount to as much as one-fifth of our present circulating medium. Would not its issue in the amounts I have indicated, or even in smaller amounts, in effect increase our circulating medium without increasing in the least our gold base?

(c) Do you think farmers would be satisfied with a "scrip" issue in part payment for their wheat, which will have an indefinite value, and which may have no value?

Speculative Value

2. Inasmuch as the "scrip" in question can be passed from hand to hand, and inasmuch as it is redeemable in the hands of the ultimate holder when the time comes to redeem, will it not always have a speculative value; and is it not likely to be quoted in Bucket Shops and similar places; and will not its vague and unsettled values have a demoralizing effect on agriculture and commerce generally in the United States?

What About Livestock Industry?

3. When the law is applied to the Livestock industry, as it will be, will not the law make it necessary for the Government to go into the business of slaughtering and packing food animals? Can you think of any way by which, under this bill, the entry of the Government into this great industry—one of the greatest in the world—can be avoided?

(a) It could be avoided, of course, by resorting to the primitive methods of long ago and exporting food animals alive. Would you advise that the Government resort to this obsolete method? What would the effect on agriculture be if we turned back the clock of progress in marketing and handling food animals and resort to these methods abandoned so long ago?

(b) Have you any idea as to what immediate investment the Government would be required to make in Packing Plants, Stock Yards, Terminals, etc.?

(c) What would the effect of the entry of the Government be into the packing business upon the great packing industry we now have in the United States?

(d) How would the Government's entering into an industry of that kind, involving perhaps the expenditure of billions of dollars in railroad switches, terminals, yards, packing plants, cold storage warehouses, refrigerator cars, etc., etc., be financed?

(e) Would you finance it by issuing "scrip"?

(f) Would you finance it by a Federal bond issue?

(g) If by a Bond issue, would you issue tax-free bonds?

Asks About Bond Issue

(h) What effect would a bond issue of this kind have upon our market at the present time, when Government 4¼ Per Cent Bonds are not yet selling at par?

(i) Would it not have the effect of still further depressing on the market the value of bonds now in the hands of citizens of the United States?

(j) What interest rate would you make? If a 4¼ Per Cent Government Bond will not sell at par now, what rate would you expect to make these bonds in order to get purchasers to take them at par?

(k) If you make a higher rate than 4¼ Per Cent, would it not still further decrease the market value of our outstanding issues?

Expenses Increasing

4. In view of the fact that the expenses of the Government are continually increasing; that all classes of Government employees are demanding, and will receive very soon, largely increased compensation, is it not time to keep the Government out of business as much as possible, especially when that business will involve an additional indebtedness of the Government and more interest for tax payers to pay?

5. Do you not think the vague, indefinite method of maintaining a price level provided for in this bill is unworkable and impracticable, and that in the end the farmer will be the greatest sufferer from its imposition, if it should become a law?

What About Wool?

6. The bill applies to wool. When we import more than half our requirements of wool, how can a ratio price affect wool, the object of this bill being essentially to take care of our exportable surplus, and by obtaining the very best world price for our exportable surplus keep up the domestic price? In the matter of wool, however, we have no exportable surplus. We use twice as much wool as we produce.

7. Would not the ratio price of cotton be now below the present price? Under these circumstances, what benefit would cotton derive from this bill?

8. Please explain how this bill can be arranged so as to apply to hogs and cattle in such a way that the farmer will be benefitted to any degree by its application.

9. Is it not true that it is intended that the bill have no real application, except as to wheat?

10. If wheat is to be the only product upon which the law will operate, is it not true that the remaining products are put into the

(Continued on page 4)

I. A. A. Answers Rainey

Under date of March 12, Congressman Henry T. Rainey of Illinois, Twentieth District, addressed a long letter to President S. H. Thompson of the I. A. A., stating that the McNary-Haugen bill contains many objectionable features, prophesying that it would be vetoed if passed, asking 25 questions about the bill and insisting upon a discussion of the bill from the standpoint of the association.

Mr. Rainey's letter was released to the public press, it was broadcasted over the Chicago Board of Trade Radio Station and it has been given wide distribution in a printed form.

Herewith is the full text of Mr. Rainey's letter and our answer.

--And Here is Thompson's Answer--The I. A. A. Stand

CHICAGO, ILL.
March 31, 1924.

HONORABLE HENRY T. RAINEY,
House of Representatives,
Washington, D. C.

My dear Mr. Rainey:

Your letter and memorandum of March 12, 1924, are at hand. We are in full concurrence with your conclusion that "farmers of the country are in a desperate condition;" that "agriculture is in a deplorable condition." We note your insistence that we reply immediately to your attack on the McNary-Haugen bill, an insistence which you base on the assumption that we "have studied the question and are expert in these matters" but qualified by your fears that the communications you have received from farm bureaus are inspired by the officers of this association since they are "all couched in practically the same language."

You further fear that these farm bureaus who are now writing members of Congress in favor of the bill have not studied the questions involved, have not reached conclusions for themselves, but are, on the contrary, victims of propaganda, impliedly ours. You complain that the whole demand for your support resolves itself into a wish that you should act as a rubber stamp.

You lay great stress on the similarity of language in all communications received by you in favor of this bill.

Is it pertinent to inquire whether you have seen the letter signed (and presumably composed) by Sydney Anderson to Mr. Selvig of Crookston, Minnesota? That letter also attacks the McNary-Haugen bill and, as shown in a reply to Mr. Anderson, seems to be based largely on the special interests of millers and grain men and to be opposed to the interest of farmers.

Extraordinary Similarity

We ask whether you have seen this letter because we, on our side, wonder whether you have studied the question addressed by your letter or whether you have merely accepted the conclusion of some other analyst. It must be remarked that there is an extraordinary similarity, not only between the language in your letter and that of Mr. Anderson's but also in the general plan of your letter, its heads of argument, its conclusion, its misinformation and its obvious source of inspiration.

Can it be possible that you are consorting more with the special interests opposed to the bill than with the basic underlying interest of American agriculture which is simply another way of saying the interests of the general American public?

We ask these questions before we answer yours (and in the same communication in which we do answer yours) merely that we may stand on even ground in this discussion. There must be some dissemination of information and argument to the farmers of this country in respect of the measures being considered at Washington in their behalf, otherwise their needs must be left entirely at the mercy of those whose interests may not in all things lie parallel with theirs and who have better methods than they of presenting to Congress of a particular point of view.

Rapidly Crystallizing Opinion

But it has not been our observation that the outstanding individualist of our national community—the American farmer—takes his ideas ready made from the hands of any man. The communications you and other congressmen are receiving from the broad face of this country in increasing number represent a rapidly crystallizing opinion, based on the equity of a claim which we shall attempt to discuss more in detail in the latter paragraphs of this letter. If this be a representative government, then we do think that a member of Congress ought to record the impressions—not of a particular association—but of the constituents who chose him to represent them.

With these few words explaining our general point of view on the more critical assertions of your letter, we will proceed to consideration of its argument.

Question Almost Ridiculous

You first ask whether the scrip proposed by the McNary-Haugen bill will not operate to "expand our currency." In the sense you are attempting to import into the discussion (that it is a government issue, not based on gold) the question is almost ridiculous. In the last paragraph of your letter you make your meaning clear when you call it "fiat money"—you are dealing in technical terms with no knowledge of their intendment. The scrip is only evidence of a right to participate in a residue, by its very terms of less value than the face amount of the scrip.

Currency is an obligation to pay a stated face amount—fiat money is paper stating a value plus a law requiring its acceptance at that value. This scrip is the direct antithesis of either. Therefore both of your suggestions of "inflation" and "fiat" hardly merit a serious answer. The scrip is not a government issue in the first place, being of unnamed and uncertain value it is not even "negotiable paper." Specifically the answer to your ill-considered and ill-informed question is "No."

Scrip Offsets Expansion

To an extent, all values upon which credit is based operate to "increase our circulating media," which is quite another thing. A higher price for any agricultural product would operate, *pro tanto*, to do this. The fact that a portion of the increase in price is represented by scrip of less than face value would tend to offset the expansion that would occur if the entire price were paid in cash.

(Continued on page 5)

"Since It Will Relieve Him---

Rainey Asks 25 Questions On Farm Relief Measure

(Continued from page 3)

bill for political purposes only, in the hope that farmers will be fooled into believing they are going to get some advantage out of the passage of this legislation?

Has Farmer Benefitted?

11. Inasmuch as Congress so far has passed every piece of alleged remedial legislation Farm Organizations have asked, is it not time to inquire into what benefits farmers have derived from the legislation, presumably passed at the demand of the Farm Bloc in Congress and Agricultural Associations?

(a) Has the farmer benefitted by the protective tariff Congress has given him on practically everything he produces?

(b) I notice that hogs are now going up on the Chicago markets. Is this due to the protective tariff, inasmuch as there is no protective tariff on hogs?

(c) Would it not be advisable for the Illinois Agricultural Association to advocate a reduction in the tariff on all articles the farmer buys?

(d) Is it the position of the Illinois Agricultural Association that the tariff does not add to the price the farmer pays for things he is compelled to purchase?

Why Not Have Rye?

12. Can you explain why the bill does not include in its provisions, rye, oats, and barley?

(a) Is it not true that in certain countries to which we export wheat, rye is used interchangeably with wheat, and the price of wheat is affected very directly by the price of rye?

(b) If the above is true, and I think you will answer that it is, then why not include rye in the provisions of this bill?

Raise Commodity Index

13. If we raise artificially the price of all farm products to correspond with the level of prices of all commodities, will we not be compelled also to raise the all commodity index, and if we do that, how in point of fact can we ever get these prices into adjustment with the basic ratio price?

Asks About Ratio Price

14. Where is the ratio price to be applied? Is it to be based on New York, Chicago, or some other point?

(a) Will there be different ratio prices for all these terminals?

(b) How will the ratio price be reflected back to the farmer through the local elevator?

(c) There are a number of classes of wheat, and a number of grades within each class, and how can the intrinsic value of each class and grade to the miller be controlled by ratio prices established by the Government?

What Will Miller Do?

(d) If the miller buys the grade which represents the best value for the ratio price, what will be the effect on the market of the less valuable grades?

(e) Will not the miller buy only on a limited basis; will he not buy wheat only to fill orders he is able to get for flour at a price which will protect him?

(f) Is it not true that the miller will be unable to make flour for the export trade at all unless he is assured against loss?

(g) Is there any authority in the bill by which the miller can be indemnified against possible loss?

(h) If he is not indemnified against loss, will he not desert the foreign field for his products?

(i) What effect would this have upon the farmer if the miller refuses to take chances and engage in the business of exporting flour?

Asks All About Wheat

15. Is it not true that the consumption of wheat in the United States fluctuates from one year to another more than one bushel per capita — 110,000,000 bushels a year?

(a) Is it not true that wheat is harvested somewhere in the world every month in the year?

(b) If to each of the above questions your answer is Yes, then, how is it possible to estimate months in advance the questions of production, exportable surplus, or foreign prices?

(c) If it is impossible to so estimate in the above matters, how can a ratio price be established?

What Will Be Expense?

16. What will be the expense of the operation of the agencies of the Government contemplated in this bill?

(a) How many employees will there be?

(b) Will there not be many thousand employees?

More About "Scrip"

17. Does not the ultimate value of the "scrip" depend upon the loss made on foreign sales and the expense of operating the Government's agencies. If the "scrip" so issued depends on these uncertain elements, and if it can be transferred, does it not present a splendid opportunity for speculation and fraud?

(a) If it does furnish such opportunities, are the penalties provided sufficient, inasmuch as they are only civil penalties?

They'd Be Bribed

18. At the present time, there are frauds in every Department of the Government so far investigated, and civic honesty seems to be at a discount. Even Cabinet Members have been bribed.

(a) When conditions are as above indicated, is it not unwise to create another Department such as is contemplated in this bill, and with a large personnel of officials, all of whom would be subjected to unusual temptations in the matter of bribes, etc.?

Lots of Experiments, He Thinks

19. During the period of the World War, and since then, is it not true that every sort of experiment in Government control of food prices has been tried in this country and abroad?

(a) Can you point to any method so far adopted by this Government in the matter of controlling food prices which has been successful?

(b) Has not every method adopted so far in numerous bills passed by Congress, all of which your organization has advocated, resulted merely in increasing the overhead of farmers by giving them more enticing opportunities for borrowing money?

(c) Will you call my attention to a single instance in the world of a satisfactory maintenance of price of food products over a considerable period of time?

20. Is it not true that the only way to maintain a price is to have a buyer willing and able to take everything offered at the price specified?

(a) Will this bill have that effect?

Will It Increase Acreage?

21. If the fixed price is high enough to do the farmer any good, will it not have the effect of increasing the acreage?

(a) Your answer to the above must, of course, be Yes; and, if the acreage is increased and the production of the product is continually increased will not the increased production make it always more and more difficult to maintain a price level?

Oklahoma Wheat Growers

22. In the same mail which brought me your letter this morning, I received information to the effect that the Oklahoma Wheat Growers Association, consisting of 11,000 producers of wheat denounce the McNary-Haugen bill as a new and dangerous burden to be borne by the farmer.

(a) Oklahoma is a great wheat producing state. They produce about as much wheat as we do in Illinois. In 1920 they produced over 54,000,000 bushels. In that year we produced in Illinois only 45,000,000 bushels. The 1920 wheat production in Oklahoma is a larger production than we have ever attained in Illinois from 1909 to the present time, except in 1922 when we produced slightly more than this.

Have They Studied It?

(b) Oklahoma farmers are more vitally interested in wheat than Illinois farmers. Their production of corn in Oklahoma is negligible as compared to our production. They produce usually about 1-5th as much corn in Oklahoma as we produce.

(c) It is therefore reasonable to suppose that the Oklahoma Wheat Growers Association have given as much study to the subject as the Illinois Agricultural Association.

(d) How do you account for the absolutely different conclusion reached by the Oklahoma Wheat experts as contrasted with the conclusion your Organization has reached?

(e) What is a Member of Congress to do when two agricultural organizations—equally important and equally interested — reach such absolutely different conclusions?

(f) Under these circumstances, do you think you have the right to demand that a Member of Congress from Illinois shall "unqualifiedly and actively support and vote for" the McNary-Haugen bill?

Thinks We Advised Reduction

23. Under the advice of Agricultural Organizations in Illinois, including I think the Illinois Agricultural Association, farmers have been urged to restrict wheat acreage and to use wheat land for other crops, in order to bring up the price of wheat.

(a) Acting upon this advice a great many farmers in Illinois have sown less wheat. If the position of the proponents of this legislation is correct, and the McNary-Haugen bill produces a better price for wheat, how can you square yourself with those farmers who have accepted your advice and who have sown less wheat?

Government in Grain Business

24. Would not the McNary-Haugen bill put the Federal Government actively into the grain business?

(a) Your answer, of course, must be in the affirmative to the above question. If the Government goes actively into the grain business, can you think of any reason why it should not engage in other kinds of business? And, if it engages in other kinds of business, why not in all other kinds of business?

(b) Is your proposition, therefore, not socialistic? Will it not lead to the same results if carried out logically that the movements in Russia have attained?

Compares It With Bolshevism

(c) But, the Russian Soviets could not succeed in any measure until they took over also the land. Would you not regard this result as destructive of all our ideals and of civilization itself?

(d) Fortunately, however, even in Russia the Government has now abandoned the control of land and has commenced recently to recognize absolute free trade in bread grains.

(e) Do you not think the Russian experiment with its dead numbering over 7,000,000 ought to dissuade our people from proceeding in that direction?

(f) Would we not be proceeding in that direction if we accepted in this particular the advice of the Illinois Agricultural Association?

Wonders If We Know What We're Doing

25. I have commenced to receive communications from Farm Bureaus in Illinois, evidently inspired by your letter to me, which I am now discussing. These communications are all couched practically in the same language, and all "insist that our representatives in Congress unqualifiedly and actively support and vote for" the McNary-Haugen bill.

(a) Do you contend that the Farm Bureau advisers who are now sending these Resolutions to Members of Congress have studied the question; or, have they simply accepted your advice?

(b) If they have studied this most important question and reached these conclusions for themselves, how does it happen that in their Resolutions they use the exact language you use in your communication to me?

(c) Do you really think a conscientious Member of Congress ought to be influenced by propaganda of this kind; or, do you think he ought to reason these matters out and study them carefully?

(d) Do you think a Member of Congress ought to become a mere rubber stamp to record the impressions of the Illinois Agricultural Association?

MEMORANDA

I have suggested hurriedly above only a part of the objections which occur to me now to the legislation you so enthusiastically champion; and I am asking for a full and satisfactory reply from you before I can consent to vote as you have demanded that I vote in this matter.

You will pardon me I am sure for imposing upon you the burden of replying to this communication, but, inasmuch as you "demand" that the Representatives in Congress from Illinois unqualifiedly and actively support the McNary-Haugen bill, I feel that I have the right to demand and unqualifiedly insist that you, as the head of the Illinois Agricultural Association, which stands for this bill, favor me with a reply to all the above suggestions, so that I can print in the Congressional Record, if possible in parallel columns, this letter of inquiry addressed to you and your reply to the same.

Deplorable Condition

I realize that Agriculture is in a deplorable condition, but it can be made much worse than it is by the adoption of dangerous methods of relief. Since the World War many suggestions have been made for stabilizing prices, ranging from the commodity dollar of Irving Fisher (which seems plausible and possible), and the "Barley dollar" of some of the Balkan states, to the vague and indefinite agricultural "scrip" proposed by this bill. It would be much easier for me in an agricultural district like mine, so far as the next election goes, to accept your suggestions and avoid the implied threat which goes with them, than to oppose this bill. But, a Member of Congress is required to take an oath and assume an obligation in all these matters; and, therefore, before making up my mind unqualifiedly to support the measure for which you stand, I am addressing this communication to you. If your answers are satisfactory and remove the doubts in my mind, I will support it. If your answer is not satisfactory I expect to vote against the bill as it stands now.

Answers Will Have Great Weight

Inasmuch as I have immediately responded to your letter (I received your letter of March 10th only a few minutes ago), I am asking you to show me a like courtesy by immediately responding to this communication, so that in reaching my conclusions I can have the benefit of your reply. I am assuming, of course, that you have studied the question, and that you are an expert in these matters, and therefore your answers will have great weight with me, and I am sure with many other Members of Congress.

It has become the habit in this dangerous period of our economic life as a nation, for Members of Congress to vote for a measure upon the theory that it is the only relief proposed, and that while it is not everything that could be desired, still it promises something. This is the excuse many Members of Congress make for supporting some of the vague indefinite propositions now submitted. The passage of a measure, however, so revolutionary as this measure, so destructive of all our present systems of exchange and marketing, involving the possible destruction of the present primary markets for farmers is fraught with grave possibilities, and may result in untold injury to an industry which is now almost prostrate.

Don't Think "Scrip" Will Help

Farmers of the country are in a desperate condition. I do not think you can allay their suspicions nor restore their confidence by handing to them in part payment for things they produce a "scrip" about the value of which we can know nothing except that it will not be worth its face. With

(Concluded on page 5)

---Why Should You Object?"--I.A.A.

Thompson Refutes Arguments Against McNary-Haugen Bill

(Continued from page 3)

In short, the effect of the bill to increase price would increase the credit obligations in the money market, but the increase would be eminently sound because the increased value would proportionately increase the basis of that credit. The effect of the issue of scrip as part of the price would tend to limit the increase and whether it did or did not your objection is without merit—even almost without coherency.

An Unworthy Objection

If you object to the raising of the price of agricultural products to a fair exchange value (no higher) and base your objection on the ground that it would increase circulative media, then there is no more to be said. But since we all admit that the present price is less than cost of production, your opposition would reduce to this—that you advocate taking the farmer's crop away from him at less than its fair value because, to do otherwise, would increase the circulation of evidences of credit granted. We regard this objection as unworthy if not immoral and we feel sure that, on careful thought, you will abandon it.

Much Smaller Ratio

Regarding the matter from another point of view, the bill establishes a corporation with power to buy and sell export products. It authorizes this corporation to emit its obligations in a very much smaller ratio than that employed by industrial corporations in financing their operations. To the extent that any debtor emits obligations of such sundries that they may pass from hand to hand as negotiable paper, he is increasing the media of commercial exchange.

Such is the ordinary and salutary customs of the commerce of the United States. Such, but in much smaller proportion than is common in industry, would be the custom of this corporation. This latter custom is sound commercially and financially and the objection to it on the ground that it "expands the currency" is merely a brave banner of words signifying nothing.

Would Farmer Object

You ask whether farmers would be satisfied with a scrip issue in part payment for their wheat? If a farmer who now receives $1.00 a bushel for his wheat, for example, has the choice of receiving $1.55, 45 cents of the increase being in cash and 10 cents in scrip, will he refuse the 45 cents because the 10 cents is not in cash? We think the question answers itself.

Speculative Value

You ask if the scrip will not have a speculative value. Of course it will have a speculative value. Wheat has a speculative value and the speculation in scrip will have precisely the range of uncertainty that wheat now has—no more and no less. It may be quoted in bucket shops and similar places just as wheat is quoted—no more and no less.

What boots it to the farmers or indeed to any other citizen that this is so and why should it have any more "demoralizing effect on agriculture and commerce generally" than the speculative element in the value of wheat, corn, cotton, live stock, meat products, oil, or any other commodity of commerce?

"A Terrifying Monster"

Your third numbered paragraph partakes of the method of him who constructs a terrifying monster and then adds to the gaiety of the nations by girding on his armour, attacking it fiercely and boldly and cutting it to pieces.

You say that when the law is applied to the live stock industry it will make it necessary for the government to go into the business of slaughtering and packing food animals and you want to know how this enormous investment is to be financed, whether we have any idea of the amount of the investment, how the government could enter into so complicated an industrial operation.

You advert to this same argument elsewhere as though wheat were to be sold to millers only at the domestic price, thus preventing them from exporting flour, even as you think the bill would prevent the packers from exporting meat products because they could not compete with the lower foreign prices.

Misconstrued Bill

In all this you have simply misconstrued or neglected to read the bill. The latter is quite possible since the objection appears elsewhere. The bill would not create any mechanism at all.

Is there anything complicated or difficult in commissioning existing grain, cotton, meat or milling companies to buy a product until price reaches a certain figure? Is there anything impracticable in commissioning the same or others to sell to export a certain quantity of the products purchased? Individual operators do this daily, single handed and alone. Is there anything complex or difficult about allowing the owners of existing mechanism a commission to manufacture certain products for export, a differential representing the loss in export sales, and charging same to the corporation to be absorbed by the scrip fund?

Not Government Dep't

You seem to forget that it is not a department of the government that is entering these operations. It is only a corporation similar in nearly all respects to an industrial corporation which has been permitted by the government—as all corporations must be permitted by state or national government—to carry on certain operations.

You entirely overlook the fact that it does not have to duplicate one single bit of existing machinery and that it will utilize existing machinery with the least disturbance to present methods and customs that it is possible to imagine.

Not Vague or Indefinite

You ask whether we do not think that the "vague, indefinite method of maintaining a price level provided for in this bill is unworkable." There is nothing vague or indefinite about the method proposed. Indeed, mathematics could scarcely be more incisive, emphatic and accurate. You fear that the farmer will suffer by a restoration of his price levels to their pre-war exchange values? He is suffering enough now in all conscience and if you will be kind enough to point out one head of suffering imposed by the bill, we promise to consider it with the greatest care.

You are quite correct in saying that as long as we import wool, the tariff alone can be made to give the wool grower ample protection.

Hasn't Studied Cotton

We are amazed as to your inquiry as to "what benefit cotton would derive from this bill." We conclude that you have not given much time to the study of the history of cotton. Do you know that the tariff operates on the producer of a crop of which we export a surplus as a subsidy of industry at his expense? Do you know that this fact was the economic cause of the Civil War inaugurated by the cotton exporting South against the protected industrial North?

One need go no further back than three years to find the time when the price of cotton was far below this pre-war exchange value. If the boll weevil and the parsimony of nature have, for a brief time, cured this situation, surely you would not advocate bringing all other farmers within the protection of the tariff but leaving the cotton farmer in his old inequitable position. As to any crop, at any time that its domestic price is above pre-war exchange value, the corporation simply would not function.

Amends Tariff for Farmer

The bill should be regarded as an amendment to the tariff law acting promptly and effectively for the protection of the farmer of any product whenever he needs protection and remaining dormant whenever he does not. At present the cotton farmer does not need the protection of the bill but it will be there for his salvation when he does.

Hogs and Cattle

You ask us to explain how this bill can be arranged so as to apply to hogs and cattle. We have already done so in the answer to your apprehension lest the government be involved in a great industrial operation and if you have paid any attention at all to hearings of the bill you have already been fully answered.

You ask whether it is not true that it is the intention of the bill to have no real application except as to wheat, and suggest that the remaining products are put into the bill for political purposes only.

Bill Means What It Says

The answer is that the bill means just what it says, and, insofar as it restores equality to agriculture, it will have a most important political bearing. Concerning your suggestion that other products were included only to deceive, you are quite wrong. But suppose that the bill was intended only to relieve the wheat farmer at this time. Since it will relieve him, why should you object? Why should anybody object?

Is it not true that the suggestion that the bill would apply only to wheat cannot honestly be considered as an objection to the merits at all but must be branded for what it is— a piece of political claptrap intended to arouse the jealousy, the envy, and the opposition of those who, if sufficiently deceived and incited, might feel that, if there were no salvation for them they would see to it that there should be no salvation for anyone else. Is this statesmanship? Is this your meaning?

Other Legislation

You ask whether the farmer has benefitted from any legislation thus far passed in his behalf and especially whether he has benefitted from the higher tariffs on agricultural products. The difference between the measures you mention and this bill is that they were not based on economic analysis addressed to the true cause of the farmers' trouble.

You will have great difficulty in demonstrating that such is the case with the McNary-Haugen bill. It is the only measure yet proposed which has any bearing on the real cause of the agricultural depression which it meets fairly at every point, effectually corrects and beyond any possibility of doubt would immediately be effective to restore the pre-war exchange of the products to which it is applied.

At no place in your argument do you contest this effect. In other words, here is a bill, the essense and purpose of which is to raise the price of farm products no higher than to an equitable parity with the price of other products, and yet, in discussing this bill, you entirely overlook that fact and content yourself with a repetition of the unsound and alarmist objections that have thus far characterized the opposition to the bill.

Why Include Rye?

You ask us to explain why the bill does not include in its provision rye, oats and barley, and you say that in the countries to which we export wheat, rye is used interchangeably and that the price of wheat is affected by the price of rye.

The answer to your question is another question. Why should rye be included? The bill will not change the price of wheat in the foreign market nor will it affect the relative consumption of wheat and rye in that market. In order that operations be not too greatly complicated, the bill, making use of the knowledge that the price of rye is a complement of the price of wheat, contents itself with addressing wheat for the simple reason that it is unnecessary to include other small grains.

"Creaking Old Argument"

You ask whether by raising the price of farm products to correspond with the price of all commodities we will not be compelled to raise the commodity index and if we do that, you assert that we can never get prices into adjustment with the basic ratio price. We recognize this creaking old argument and we know its source.

A rise of 20 points in the wheat index raises the general price index 1 point, and the lesser products have a fraction of this effect. Considering an example in which the figures are taken for convenience of computation, we shall suppose that the wheat index and the general price index both stand at 100. The bill passes and raises the wheat index to 150. This would raise the general index 2.5 to 102.5. This would raise the wheat price again to 153.75 which in turn would raise the general price index but only a very small amount this time—.1675 points or to 102.6875. Up goes the wheat index but only by .28125 on this calculation, which in turn raises the general price index an amount so small that it would not be considered—.0140 or to 102.7015.

"Silly Calculations"

On the next calculation the increment in the general price index would be only .00105 and since only two decimal points are computed the terrifying process is at an end. The argument is scholastic—"how many angels can stand on a needle's point?" If one cared to carry on these silly calculations, he would find that, whereas restoration of wheat to its pre-war exchange value would raise the general price index 2.5 points, ten thousand subsequent calculations made on this nonsensical argument would not raise it another half point and every subsequent calculation would carry the increment another decimal point nearer zero. In other words, the increment rapidly becomes infinitesimal and would be disregarded in practice on the third calculation.

Present Prices Mean Loss

But in order to get a view of the morals of all these arguments, suppose it were literally true that restoration of fair exchange value to agriculture would raise the cost of living substantially. Pre-war

(Continued on page 6)

Congressman Has Fears that Bill will be Ruinous

(Continued from page 4)

reference to this method of payment, the farmer can only definitely know that he will never get the agreed price for his products. He can never know what the price will be. It does not appear to me now from the study I have so far given the question that this measure will appease the unrest which prevails today in agricultural circles, and if it does not have that effect, it will only increase the farmers' suspicions and his distrust of his Government and its agencies.

Needs Foreign Market

It seems to me that what the farmer needs most of all are consuming units abroad for his products who are able to pay a price for his surplus, which will enable the American farmer to obtain a living wage on his farm. Under an unfortunate leadership, this country has abandoned its relations with other nations and is pursuing a policy of isolation. Whenever we abandon our policy of isolation and assume those world responsibilities which are ours, and do our part toward quieting the distrust of each other which prevails among nations which consume our surplus food products, then we will have done much in the matter of restoring that confidence to food-consuming nations, which will enable them to engage again in industry and earn the money with which to pay the prices they ought to pay for our surplus.

It seems to me now the "scrip" issues provided for in this bill constitute a "fiat" currency not dreamed of before since the capitalistic period commenced in the world by any considerable responsible group in any commercial nation in the world.

Very truly yours,

HENRY T. RAINEY,
Member of Congress,
20th District Illinois.

"Since It Will Relieve Him---

Rainey Asks 25 Questions On Farm Relief Measure

(Continued from page 3)

bill for political purposes only, in the hope that farmers will be fooled into believing they are going to get some advantage out of the passage of this legislation?

Has Farmer Benefitted?

11. Inasmuch as Congress so far has passed every piece of alleged remedial legislation Farm Organizations have asked, is it not time to inquire into what benefits farmers have derived from the legislation, presumably passed at the demand of the Farm Bloc in Congress and Agricultural Associations?

(a) Has the farmer benefitted by the protective tariff Congress has given him on practically everything he produces?

(b) I notice that hogs are now going up on the Chicago markets. Is this due to the protective tariff, inasmuch as there is no protective tariff on hogs?

(c) Would it not be advisable for the Illinois Agricultural Association to advocate a reduction in the tariff on all articles the farmer buys?

(d) Is it the position of the Illinois Agricultural Association that the tariff does not add to the price the farmer pays for things he is compelled to purchase?

Why Not Have Rye?

12. Can you explain why the bill does not include in its provisions, rye, oats, and barley?

(a) Is it not true that in certain countries to which we export wheat, rye is used interchangeably with wheat, and the price of wheat is affected very directly by the price of rye?

(b) If the above is true, and I think you will answer that it is, then why not include rye in the provisions of this bill?

Raise Commodity Index

13. If we raise artificially the price of all farm products to correspond with the level of prices of all commodities, will we not be compelled also to raise the all commodity index, and if we do that, how in point of fact can we ever get these prices into adjustment with the basic ratio price?

Asks About Ratio Price

14. Where is the ratio price to be applied? Is it to be based on New York, Chicago, or some other point?

(a) Will there be different ratio prices for all these terminals?

(b) How will the ratio price be reflected back to the farmer through the local elevator?

(c) There are a number of classes of wheat, and a number of grades within each class, and how can the intrinsic value of each class and grade to the miller be controlled by ratio prices established by the Government?

What Will Miller Do?

(d) If the miller buys the grade which represents the best value for the ratio price, what will be the effect on the market of the less valuable grades?

(e) Will not the miller buy only on a limited basis; will he not buy wheat only to fill orders he is able to get for flour at a price which will protect him?

(f) Is it not true that the miller will be unable to make flour for the export trade at all unless he is assured against loss?

(g) Is there any authority in the bill by which the miller can be indemnified against possible loss?

(h) If he is not indemnified against loss, will he not desert the foreign field for his products?

(i) What effect would this have upon the farmer if the miller refuses to take chances and engage in the business of exporting flour?

Asks All About Wheat

15. Is it not true that the consumption of wheat in the United States fluctuates from one year to another more than one bushel per capita — 110,000,000 bushels a year?

(a) Is it not true that wheat is harvested somewhere in the world every month in the year?

(b) If to each of the above questions your answer is Yes, then, how is it possible to estimate months in advance the questions of production, exportable surplus, or foreign prices?

(c) If it is impossible to so estimate in the above matters, how can a ratio price be established?

What Will Be Expense?

16. What will be the expense of the operation of the agencies of the Government contemplated in this bill?

(a) How many employees will there be?

(b) Will there not be many thousand employees?

More About "Scrip".

17. Does not the ultimate value of the "scrip" depend upon the loss made on foreign sales and the expense of operating the Government's agencies. If the "scrip" so issued depends on these uncertain elements, and if it can be transferred, does it not present a splendid opportunity for speculation and fraud?

(a) If it does furnish such opportunities, are the penalties provided sufficient, inasmuch as they are only civil penalties?

They'd Be Bribed

18. At the present time, there are frauds in every Department of the Government so far investigated, and civic honesty seems to be at a discount. Even Cabinet Members have been bribed.

(a) When conditions are as above indicated, is it not unwise to create another Department such as is contemplated in this bill, and with a large personnel of officials, all of whom would be subjected to unusual temptations in the matter of bribes, etc.?

Lots of Experiments, He Thinks

19. During the period of the World War, and since then, is it not true that every sort of experiment in Government control of food prices has been tried in this country and abroad?

(a) Can you point to any method so far adopted by this Government in the matter of controlling food prices which has been successful?

(b) Has not every method adopted so far in numerous bills passed by Congress, all of which your organization has advocated, resulted merely in increasing the overhead of farmers by giving them more enticing opportunities for borrowing money?

(c) Will you call my attention to a single instance in the world of a satisfactory maintenance of price of food products over a considerable period of time?

20. Is it not true that the only way to maintain a price is to have a buyer willing and able to take everything offered at the price specified?

(a) Will this bill have that effect?

Will It Increase Acreage?

21. If the fixed price is high enough to do the farmer any good, will it not have the effect of increasing the acreage?

(a) Your answer to the above must, of course, be Yes; and, if the acreage is increased and the production of the product is continually increased will not the increased production make it always more and more difficult to maintain a price level?

Oklahoma Wheat Growers

22. In the same mail which brought me your letter this morning, I received information to the effect that the Oklahoma Wheat Growers Association, consisting of 11,000 producers of wheat denounce the McNary-Haugen bill as a new and dangerous burden to be borne by the farmer.

(a) Oklahoma is a great wheat producing state. They produce about as much wheat as we do in Illinois. In 1920 they produced over 54,000,000 bushels. In that year we produced in Illinois only 45,000,000 bushels. The 1920 wheat production in Oklahoma is a larger production than we have ever attained in Illinois from 1909 to the present time, except in 1922 when we produced slightly more than this.

Have They Studied It?

(b) Oklahoma farmers are more vitally interested in wheat than Illinois farmers. Their production of corn in Oklahoma is negligible as compared to our production. They produce usually about 1-5th as much corn in Oklahoma as we produce.

(c) It is therefore reasonable to suppose that the Oklahoma Wheat Growers Association have given as much study to the subject as the Illinois Agricultural Association.

(d) How do you account for the absolutely different conclusion reached by the Oklahoma Wheat experts as contrasted with the conclusion your Organization has reached?

(e) What is a Member of Congress to do when two agricultural organizations—equally important and equally interested — reach such absolutely different conclusions?

(f) Under these circumstances, do you think you have the right to demand that a Member of Congress from Illinois shall "unqualifiedly and actively support and vote for" the McNary-Haugen bill?

Thinks We Advised Reduction

23. Under the advice of Agricultural Organizations in Illinois, including I think the Illinois Agricultural Association, farmers have been urged to restrict wheat acreage and to use wheat land for other crops, in order to bring up the price of wheat.

(a) Acting upon this advice a great many farmers in Illinois have sown less wheat. If the position of the proponents of this legislation is correct, and the McNary-Haugen bill produces a better price for wheat, how can you square yourself with those farmers who have accepted your advice and who have sown less wheat?

Government in Grain Business

24. Would not the McNary-Haugen bill put the Federal Government actively into the grain business?

(a) Your answer, of course, must be in the affirmative to the above question. If the Government goes actively into the grain business, can you think of any reason why it should not engage in other kinds of business? And, if it engages in other kinds of business, why not in all other kinds of business?

(b) Is your proposition, therefore, not socialistic? Will it not lead to the same results if carried out logically that the movements in Russia have attained?

Compares It With Bolshevism

(c) But, the Russian Soviets could not succeed in any measure until they took over also the land. Would you not regard this result as destructive of all our ideals and of civilization itself?

(d) Fortunately, however, even in Russia the Government has now abandoned the control of land and has commenced recently to recognize absolute free trade in bread grains.

(e) Do you not think the Russian experiment with its dead numbering over 7,000,000 ought to dissuade our people from proceeding in that direction?

(f) Would we not be proceeding in that direction if we accepted in this particular the advice of the Illinois Agricultural Association?

Wonders If We Know What We're Doing

25. I have commenced to receive communications from Farm Bureaus in Illinois, evidently inspired by your letter to me, which I am now discussing. These communications are all couched practically in the same language, and all "insist that our representatives in Congress unqualifiedly and actively support and vote for" the McNary-Haugen bill.

(a) Do you contend that the Farm Bureau advisers who are now sending these Resolutions to Members of Congress have studied the question; or, have they simply accepted your advice?

(b) If they have studied this most important question and reached these conclusions for themselves, how does it happen that in their Resolutions they use the exact language you use in your communication to me?

(c) Do you really think a conscientious Member of Congress ought to be influenced by propaganda of this kind; or, do you think he ought to reason these matters out and study them carefully?

(d) Do you think a Member of Congress ought to become a mere rubber stamp to record the impressions of the Illinois Agricultural Association?

MEMORANDA

I have suggested hurriedly above only a part of the objections which occur to me now to the legislation you so enthusiastically champion; and I am asking for a full and satisfactory reply from you before I can consent to vote as you have demanded that I vote in this matter.

You will pardon me I am sure for imposing upon you the burden of replying to this communication, but, inasmuch as you "demand" that the Representatives in Congress from Illinois unqualifiedly and actively support the McNary-Haugen bill, I feel that I have the right to demand and unqualifiedly insist that you, as the head of the Illinois Agricultural Association, which stands for this bill, favor me with a reply to all the above suggestions, so that I can print in the Congressional Record, if possible in parallel columns, this letter of inquiry addressed to you and your reply to the same.

Deplorable Condition

I realize that Agriculture is in a deplorable condition, but it can be made much worse than it is by the adoption of dangerous methods of relief. Since the World War many suggestions have been made for stabilizing prices, ranging from the commodity dollar of Irving Fisher (which seems plausible and possible), and the "Barley dollar" of some of the Balkan states, to the vague and indefinite agricultural "scrip" proposed by this bill. It would be much easier for me in an agricultural district like mine, so far as the next election goes, to accept your suggestions and avoid the implied threat which goes with them, than to oppose this bill. But, a Member of Congress is required to take an oath and assume an obligation in all these matters; and, therefore, before making up my mind unqualifiedly to support the measure for which you stand, I am addressing this communication to you. If your answers are satisfactory and remove the doubts in my mind, I will support it. If your answer is not satisfactory I expect to vote against the bill as it stands now.

Answers Will Have Great Weight

Inasmuch as I have immediately responded to your letter (I received your letter of March 10th only a few minutes ago), I am asking you to show me a like courtesy by immediately responding to this communication, so that in reaching my conclusions I can have the benefit of your reply. I am assuming, of course, that you have studied the question, and that you are an expert in these matters, and therefore your answers will have great weight with me, and I am sure with many other Members of Congress.

It has become the habit in this dangerous period of our economic life as a nation, for Members of Congress to vote for a measure upon the theory that it is the only relief proposed, and that while it is not everything that could be desired, still it promises something. This is the excuse many Members of Congress make for supporting some of the vague indefinite propositions now submitted. The passage of a measure, however, so revolutionary as this measure, so destructive of all our present systems of exchange and marketing, involving the possible destruction of the present primary markets for farmers is fraught with grave possibilities, and may result in untold injury to an industry which is now almost prostrate.

Don't Think "Scrip" Will Help

Farmers of the country are in a desperate condition. I do not think you can allay their suspicions nor restore their confidence by handing to them in part payment for things they produce a "scrip" about the value of which we can know nothing except that it will not be worth its face. With

(Concluded on page 5)

--- Why Should You Object?"--I.A.A.

Thompson Refutes Arguments Against McNary-Haugen Bill

(Continued from page 3)

In short, the effect of the bill to increase price would increase the credit obligations in the money market, but the increase would be eminently sound because the increased value would proportionately increase the basis of that credit. The effect of the issue of scrip as part of the price would tend to limit the increase and whether it did or did not your objection is without merit—even almost without coherency.

An Unworthy Objection

If you object to the raising of the price of agricultural products to a fair exchange value (no higher) and base your objection on the ground that it would increase circulative media, then there is no more to be said. But since we all admit that the present price is less than cost of production, your opposition would reduce to this—that you advocate taking the farmer's crop away from him at less than its fair value because, to do otherwise, would increase the circulation of evidences of credit granted. We regard this objection as unworthy if not immoral and we feel sure that, on careful thought, you will abandon it.

Much Smaller Ratio

Regarding the matter from another point of view, the bill establishes a corporation with power to buy and sell export products. It authorizes this corporation to emit its obligations in a very much smaller ratio than that employed by industrial corporations in financing their operations. To the extent that any debtor emits obligations of such sundries that they may pass from hand to hand as negotiable paper, he is increasing the media of commercial exchange.

Such is the ordinary and salutary customs of the commerce of the United States. Such, but in much smaller proportion than is common in industry, would be the custom of this corporation. This latter custom is sound commercially and financially and the objection to it on the ground that it "expands the currency" is merely a brave banner of words signifying nothing.

Would Farmer Object

You ask whether farmers would be satisfied with a scrip issue in part payment for their wheat? If a farmer who now receives $1.00 a bushel for his wheat, for example, has the choice of receiving $1.55, 45 cents of the increase being in cash and 10 cents in scrip, will he refuse the 45 cents because the 10 cents is not in cash? We think the question answers itself.

Speculative Value

You ask if the scrip will not have a speculative value. Of course it will have a speculative value. Wheat has a speculative value and the speculation in scrip will have precisely the range of uncertainty that wheat now has—no more and no less. It may be quoted in bucket shops and similar places just as wheat is quoted—no more and no less.

What boots it to the farmers or indeed to any other citizen that this is so and why should it have any more "demoralizing effect on agriculture and commerce generally" than the speculative element in the value of wheat, corn, cotton, live stock, meat products, oil, or any other commodity of commerce?

"A Terrifying Monster"

Your third numbered paragraph partakes of the method of him who constructs a terrifying monster and then adds to the gaiety of the nations by girding on his armour, attacking it fiercely and boldly and cutting it to pieces.

You say that when the law is applied to the live stock industry it will make it necessary for the government to go into the business of slaughtering and packing food animals and you want to know how this enormous investment is to be financed, whether we have any idea of the amount of the investment, how the government could enter into so complicated an industrial operation.

You advert to this same argument elsewhere as though wheat were to be sold to millers only at the domestic price, thus preventing them from exporting flour, even as you think the bill would prevent the packers from exporting meat products because they could not compete with the lower foreign prices.

Misconstrued Bill

In all this you have simply misconstrued or neglected to read the bill. The latter is quite possible since the objection appears elsewhere. The bill would not create any mechanism at all.

Is there anything complicated or difficult in commissioning existing grain, cotton, meat or milling companies to buy a product until price reaches a certain figure? Is there anything impracticable in commissioning the same or others to sell to export a certain quantity of the products purchased? Individual operators do this daily, single handed and alone. Is there anything complex or difficult about allowing the owners of existing mechanism a commission to manufacture certain products for export, a differential representing the loss in export sales, and charging same to the corporation to be absorbed by the scrip fund?

Not Government Dep't

You seem to forget that it is not a department of the government that is entering these operations. It is only a corporation similar in nearly all respects to an industrial corporation which has been permitted by the government—as all corporations must be permitted by state or national government—to carry on certain operations.

You entirely overlook the fact that it does not have to duplicate one single bit of existing machinery and that it will utilize existing machinery with the least disturbance to present methods and customs that it is possible to imagine.

Not Vague or Indefinite

You ask whether we do not think that the "vague, indefinite method of maintaining a price level provided for in this bill is unworkable." There is nothing vague or indefinite about the method proposed. Indeed, mathematics could scarcely be more incisive, emphatic and accurate. You fear that the farmer will suffer by a restoration of his price levels to their pre-war exchange values? He is suffering enough now in all conscience and if you will be kind enough to point out one head of suffering imposed by the bill, we promise to consider it with the greatest care.

You are quite correct in saying that as long as we import wool, the tariff alone can be made to give the wool grower ample protection.

Hasn't Studied Cotton

We are amazed as to your inquiry as to "what benefit cotton would derive from this bill." We conclude that you have not given much time to the study of the history of cotton. Do you know that the tariff operates on the producer of a crop of which we export a surplus as a subsidy of industry at his expense? Do you know that this fact was the economic cause of the Civil War inaugurated by the cotton exporting South against the protected industrial North?

One need go no further back than three years to find the time when the price of cotton was far below this pre-war exchange value. If the boll weevil and the parsimony of nature have, for a brief time, cured this situation, surely you would not advocate bringing all other farmers within the protection of the tariff but leaving the cotton farmer in his old inequitable position. As to any crop, at any time that its domestic price is above pre-war exchange value, the corporation simply would not function.

Amends Tariff for Farmer

The bill should be regarded as an amendment to the tariff law acting promptly and effectively for the protection of the farmer of any product whenever he needs protection and remaining dormant whenever he does not. At present the cotton farmer does not need the protection of the bill but it will be there for his salvation when he does.

Hogs and Cattle

You ask us to explain how this bill can be arranged so as to apply to hogs and cattle. We have already done so in the answer to your apprehension lest the government be involved in a great industrial operation and if you have paid any attention at all to hearings of the bill you have already been fully answered.

You ask whether it is not true that it is the intention of the bill to have no real application except as to wheat, and suggest that the remaining products are put into the bill for political purposes only.

Bill Means What It Says

The answer is that the bill means just what it says, and, insofar as it restores equality to agriculture, it will have a most important political bearing. Concerning your suggestion that other products were included only to deceive, you are quite wrong. But suppose that the bill was intended only to relieve the wheat farmer at this time. Since it will relieve him, why should you object? Why should anybody object?

Is it not true that the suggestion that the bill would apply only to wheat cannot honestly be considered as an objection to the merits at all but must be branded for what it is— a piece of political claptrap intended to arouse the jealousy, the envy, and the opposition of those who, if sufficiently deceived and incited, might feel that, if there were no salvation for them they would see to it that there should be no salvation for anyone else. Is this statesmanship? Is this your meaning?

Other Legislation

You ask whether the farmer has benefitted from any legislation thus far passed in his behalf and especially whether he has benefitted from the higher tariffs on agricultural products. The difference between the measures you mention and this bill is that they were not based on economic analysis addressed to the true cause of the farmers' trouble.

You will have great difficulty in demonstrating that such is the case with the McNary-Haugen bill. It is the only measure yet proposed which has any bearing on the real cause of the agricultural depression which it meets fairly at every point, effectually corrects and beyond any possibility of doubt would immediately be effective to restore the pre-war exchange of the products to which it is applied.

At no place in your argument do you contest this effect. In other words, here is a bill, the essense and purpose of which is to raise the price of farm products no higher than to an equitable parity with the price of other products, and yet, in discussing this bill, you entirely overlook that fact and content yourself with a repetition of the unsound and alarmist objections that have thus far characterized the opposition to the bill.

Why Include Rye?

You ask us to explain why the bill does not include in its provision rye, oats and barley, and you say that in the countries to which we export wheat, rye is used interchangeably and that the price of wheat is affected by the price of rye.

The answer to your question is another question. Why should rye be included? The bill will not change the price of wheat in the foreign market nor will it affect the relative consumption of wheat and rye in that market. In order that operations be not too greatly complicated, the bill, making use of the knowledge that the price of rye is a complement of the price of wheat, contents itself with addressing wheat for the simple reason that it is unnecessary to include other small grains.

"Creaking Old Argument"

You ask whether by raising the price of farm products to correspond with the price of all commodities we will not be compelled to raise the commodity index and if we do that, you assert that we can never get prices into adjustment with the basic ratio price. We recognize this creaking old argument and we know its source.

A rise of 20 points in the wheat index raises the general price index 1 point, and the lesser products have a fraction of this effect. Considering an example in which the figures are taken for convenience of computation, we shall suppose that the wheat index and the general price index both stand at 100. The bill passes and raises the wheat index to 150. This would raise the general index 2.5 to 102.5. This would raise the wheat price again to 153.75 which in turn would raise the general price index but only a very small amount this time—.1875 points or to 102.6875. Up goes the wheat index but only by .28125 on this calculation, which in turn raises the general price index an amount so small that it would not be considered—.0140 or to 102.7015.

"Silly Calculations"

On the next calculation the increment in the general price index would be only .00105 and since only two decimal points are computed the terrifying process is at an end. The argument is scholastic—"how many angels can stand on a needle's point?" If one cared to carry on these silly calculations, he would find that, whereas restoration of wheat to its pre-war exchange value would raise the general price index 2.5 points, ten thousand subsequent calculations made on this nonsensical argument would not raise it another half point and every subsequent calculation would carry the increment another decimal point nearer zero. In other words, the increment rapidly becomes infinitesimal and would be disregarded in practice on the third calculation.

Present Prices Mean Loss

But in order to get a view of the morals of all these arguments, suppose it were literally true that restoration of fair exchange value to agriculture would raise the cost of living substantially. Pre-war

(Continued on page 6)

Congressman Has Fears that Bill will be Ruinous

(Continued from page 4)

reference to this method of payment, the farmer can only definitely know that he will never get the agreed price for his products. He can never know what the price will be. It does not appear to me now from the study I have so far given the question that this measure will appease the unrest which prevails today in agricultural circles, and if it does not have that effect, it will only increase the farmers' suspicions and his distrust of his Government and its agencies.

Needs Foreign Market

It seems to me that what the farmer needs most of all are consuming units abroad for his products who are able to pay a price for his surplus, which will enable the American farmer to obtain a living wage on his farm. Under an unfortunate leadership, this country has abandoned its relations with other nations and is pursuing a policy of isolation. Whenever we abandon our policy of isolation and assume those world responsibilities which are ours, and do our part toward quieting the distrust of each other which prevails among nations which consume our surplus food products, then we will have done much in the matter of restoring that confidence to food-consuming nations, which will enable them to engage again in industry and earn the money with which to pay the prices they ought to pay for our surplus.

It seems to me now the "scrip" issues provided for in this bill constitute a "fiat" currency not dreamed of before since the capitalistic period commenced in the world by any considerable responsible group in any commercial nation in the world.

Very truly yours,

HENRY T. RAINEY,
Member of Congress,
20th District Illinois.

"No Shadow of Evidence"--S. H. Thompson

Export Plan is Simply Justice for Farmer—I.A.A.

(Continued from page 5)

exchange value means only cost plus a very small profit or no profit at all. Present prices mean a loss to the farmer on every pound and bushel sold.

Argument for maintenance of the present condition is simply argument for taking the farmer's crop away without paying cost for it—"justified" in this case by a desire to keep the cost of living down. Nearly every one of these arguments strips to a similar motive. The McNary-Haugen bill will pass not only because it is sound and right but because the oppposition to it is unsound and wrong.

No Difficulty

Your next question as to where the ratio price is to be applied we shall answer simply by referring you to the operation of the United States Grain Corporation during the war. There is no difficulty here any more than there is in the present system under which, as you know, the farmer farthest from terminals receives the least for his crop. Exactly the same answer applies to your question as to the grades which represent the values for the basic ratio price.

Your apprehension about the miller has also already been answered. Flour or pork are as much exportable surplus of wheat and swine as the raw material and the bill recognizes this and provides for it. The corporation will absorb the difference between the domestic and the export price of wheat and swine purchased on the domestic market and sold as flour or pork for export.

Nothing to Do with Case

It is quite true, as you say, that the consumption of wheat in the United States fluctuates slightly; that wheat is harvested somewhere in the world every month in the year, but like the flowers that bloom in the Spring, these astute observations have absolutely nothing to do with the case in point and your remarks that it will not be possible to estimate months in advance the questions of production, surplus and foreign price and therefore that it will be impossible to establish a ratio price, are equally inappropriate.

The ratio price of any of these products is established at any time simply by determining the ratio which the price bore to the general price index before the war and then computing what price would bear the same ratio to the general price index, at such time. The questions you ask have nothing to do with this computation. Doubtless you did not get your mentor's question and what you are trying to ask is how it will be possible to compute the proportion of price to be paid in scrip. It would be possible, for example, to take the widest range of price variation in experience, though it will not be necessary to do so. Even if that extreme precaution were thought necessary, the net result would be that the farmer would get a very much greater price for his product in cash than he gets now and a considerable addition to that increase as soon as the actual loss were determined.

How Many Employees?

You ask how many employees the new corporation will hire and whether there will not be many thousand. There will not be many thousand. The expense of operation will not be great. You are proceeding on what some one has told you the bill means. We have already shown you that the bill does not put the government into industrial operations.

Your question as to whether scrip does not present a splendid opportunity for speculation, we have already answered. Your further question as to whether it does not present an opportunity for fraud is not very important and we doubt whether it was intended to be very helpful. The question goes to excellence of administration of the law and not to the merits of the law. Your only observation on this head that is worthy of an answer is whether the penalties provided are sufficient to prevent fraud. You speak as though the only penalties against fraud and crime in the United States were to be found under this bill. Of course you know better.

Most Amazing Observation

Your eighteenth observation is one of the most amazing that has come to our attention. You say, "There are frauds in every department of the government so far investigated, and civic honesty seems to be at a discount. Even cabinet members are bribed and when conditions are as above indicated, is it not unwise to create another department such as contemplated in this bill, and with a large personnel of officials, all of whom would be subjected to unusual temptations in the matter of bribes?"

This objection seems to say that you are convinced that the whole machinery of government ought to be thrown over because it is rotten to the core. Such a sweeping conclusion puts our mind in doubt as to the conservatism of the balance of your argument. We have not seen any evidence of fraud "in every department of the government so far investigated" and we do not believe that "civic honesty is at a discount."

"You are Inaccurate"

You are inaccurate when you say that the bill creates another department with a large personnel of officials. You are inacurate when you say that the bill offers unusual temptations in the matter of bribes. If you mean that bribery could affect the determination of the ratio price, you are wrong.

The ratio price is determined under the bill by a mathematical operation and it is beyond the power of any person to affect it by an act of discretion. If you mean something else, you ought to say what you mean because the bill offers no more opportunity for bribes and speculation than is offered in any private corporation or any other enterprise, public or private, of which we are aware.

No Attempts to Fix Food Prices

You ask whether, during the period of the war and since then, it is not true that every sort of experiment in government control of food products has been tried in this country and abroad. The answer is "No." We would like to have you give us one instance of any such attempt except, perhaps, the Brazilian coffee valorizations, some of which have been very successful. There were no attempts by this government to fix food prices during the war. There were certain minimum prices guaranteed to produce production and we fear that you have completely confused and misunderstood the war-time operations of this and other nations.

What Alternative Has He?

You ask whether bills thus far passed have not resulted merely in "increasing the overhead of farmers by giving them more enticing opportunities for borrowing money." We might ask what alternative the farmer has. He is operating at a loss. He has only two choices—to give up his farm or attempt to carry it against a hope in the future. He can do the latter only by borrowing money. What do you propose that he do?""

You ask us to call your attention to a single instance in the world of a satisfactory maintenance of price of food products over a considerable period of time. We gladly hasten to comply—the American doctrine of protection as applied to every food product except those of which we export a surplus.

Supply and Demand

You ask whether it is not true that the only way to maintain a price is to have a buyer willing and able to take everything offered at the price specified. The answer is "yes," and the more supply exceeds demand, the lower the price. When supply equals or about equals demand, price is usually cost of production plus a profit. Supply and demand without some qualification mean nothing or next to nothing. The demand for a product is all that is asked for at a certain price. The demand for a product at a low price is greater in quantity than the demand at a high price.

The McNary-Haugen bill removes from the domestic market by a skimming process, all of the product for which there is no demand at the pre-war price relationship. When this is done, you will find, beyond any question of doubt, that the domestic price of any of the products affected by the McNary-Haugen bill will bear the pre-war relationship to the general price index. The bill does not suspend the law of supply and demand. It utilizes it. The bill will have the effect of creating a situation in America where we shall have buyers willing and able to take everything offered at the price specified—that price a fair one. During these years, have you heard of anyone refusing to take or eat our farm products. Demand has been avid. It is price that we lack.

Will It Increase Acreage?

You now ask another question that amazes us because we do not believe that you would ask it if you had given careful reflection to its real meaning and the inequitable position in which it automatically places its proponent. "If the fixed price is high enough to do the farmer any good, will it not have the effect of increasing the acreage?"

In the first place, there is nothing so attractive about a pre-war price relation (reduced, be it remembered, by the loss on export) as to persuade anybody to increase acreage. This is not a measure to inflate price. It is only a measure to stop loss.

Penalizes Overproduction

In the second place, the effect of increased production to reduce price will be far more certain and emphatic than it is now. The hold-back in scrip will be directly proportioned to the surplus, and will be the most significant warning against inflated production that could be well imagined.

In the third place, the pre-war price relationship crystallized the pre-war acreage. Only that relationship is proposed. Logically only that acreage will ensue and, because we have a considerably increased population since then, at least that acreage should be maintained. And if the argument be "Even so; let them keep the pre-war acreage but do not restore the pre-war price relation" (and it is only to this that the argument can reduce) then it is a bold, bald argument in favor of depriving agriculture of all profit—an argument immoral, unworthy and unutterable.

Who Cares If It Does?

In the fourth place, who cares if it does increase production? Not the American people for, no matter how great the surplus, price to them can never rise above the pre-war relationship by that cause, and, under the bill, will never fall below. The only person who is interested in the harmful effect of increased production is the farmer. He and he alone stands the loss on surplus.

But how much is he affected? Let us take the most extreme case. Suppose restoration of pre-war prosperity (scant enough in all conscience) should raise production to the extreme limit of reasonable possibility—1,200,000,000 bushels of wheat for example. Suppose we consider 900,000,000 a normal crop and 600,000,000 a normal domestic consumption. How does this hellish fault affect the farmer? He is the only one concerned.

Today without the bill and the swollen surplus he would get, let us say, $900,000,000 for his crop —$1.00 per bushel.

How It Would Work

With this bill and the increased surplus he would get $1.50 for the domestic consumption, $900,000,000. For the 600,000,000 bushels of surplus he would get only $600,000,000 — $1,500,000,000 for the whole crop as against $900,000,000 today—$1.25 per bushel for 1,200,000,000 bushels against $1.00 per bushel for 900,000,000 bushels—an increase of 66-2-3 per cent in income, 25 per cent in unit price, and since the unit cost of the larger quantity would be far less than that of the smaller, an increase considerably above 25 per cent in net profit. The public would not suffer by so much as one cent in the price it paid but it would be gainer by an increase of some $600,000,000 in national income and increase in national wealth.

The whole argument of increased production due to the McNary bill is a scarecrow. As a matter of fact the co-relation of American crop quantities would prevent such increase in price and the great good fortune just related. The production of a 600,000,000 surplus by reason of this bill is a wild dream and if it were not so, as just shown, it would be too good to be true.

Argument Reacts

The argument reacts upon itself in another way. Every fair person must admit the farmer should have a fair exchange value for his product. If he is to have it, it will be a price equal to or greater than that obtained for him by the McNary-Haugen bill. On the argument suggested by the question you ask, however, if that price is attained it must increase the acreage. In other words, you are in the position of saying that while you yearn for a fair deal for the farmer you can't give it to him because it would increase the acreage given over to the particular crop in question.

In your next paragraph you bring forth the arguments contained in the resolution of the Oklahoma Wheat Growers' Association.

"Truly Pitiful"

It is truly pitiful to read that resolution because it reveals how grievously these gentlemen have been deluded by someone who has much to answer for. The resolution starts by saying, "The act carries with it all of the features necessary to arbitrary control of the prices of farm products * * * The object of said bill is to fix and control prices * * * and the act provides for a small commission or corporation with complete power to attempt to set aside the law of supply and demand."

Of course the gentlemen who voted the resolution earnestly believed these words were true, but some person who advised them must have known that there is not a vestige of truth in them. The proposed corporation would fix nothing. It can only buy up the surplus. In doing this it can continue buying only until the product in question raises to a price that bears the same relation to the general index that the pre-war price bore.

No Power to Fix Prices

Since the general index fluctuates precisely with the condition of business in the country, the price of the product considered will also so fluctuate and no power is given by the bill to anybody to fix and control prices. The resolution goes on to say that the bill would add to the expense of marketing and thus to show that whoever "sold" the idea of these resolutions to this group of farmers led them to believe that this supposed added cost would come out of the already low price they now receive for their products.

He omitted to show them that if the added cost of marketing is anything at all, it comes out of an added price of about 50 cents a bushel for their product. In other words, the resolutions themselves demonstrate that the signers thereof were deluded and cozened into thinking and saying that the effect of the bill will be to decrease the price of their product to themselves. No wonder they signed the resolution.

Misinformed!

This delusion is further demonstrated by another amazing sentence, "The public cannot afford to pay more." When we reflect that the public is paying less than cost of production, no fair mem-

(Concluded on page 7)

"Member of Congress Should be Equitable, Sound and Fair"

(Continued from page 6)

ber of the public would be heard to say that he could not afford to pay more and no informed farmer would make a statement like this. We can only conclude that these farmers were not informed or, more likely, were misinformed as to the nature, the purpose, and the effect of the bill.

Should Follow Right Course

You ask what a member of Congress is to do when two agricultural organizations — equally important and equally interested —reach such absolutely different conclusions. We think you are in no real doubt as to what he should do. He should follow that course which is right, equitable, sound and fair. He should consider the greatest good to the greatest number so long as that can be accomplished without injustice to a minority. Under these circumstances, we most certainly do think that we have a right to "demand that a member of Congress from Illinois shall unequivocally and actively support and vote for the McNary-Haugen bill."

You ask whether we will not be in an equivocal position due to the fact that we have advised farmers to restrict wheat acreage, if the McNary-Haugen bill passes and raises the price of wheat? We have given no such advice. The McNary-Haugen bill is not a law and it was not a law when such advice may have been given by others and if many Congressmen are minded as you seem to be, it will never be a law.

We have already answered your question as to whether the McNary-Haugen bill would put the government in the grain business. The answer is "No," and for the reasons stated.

Is It a Precedent?

Your next question becomes inappropriate since you say that if it does put the government into the grain business, should it not engage in other kinds of business? We shall not, however, attempt to escape the query that was in your mind. You mean that if the government removes this ancient inequity of the farmer, should it not, as occasion arises, be ready to do a similar thing for others? In other words, is this not a bad precedent?

The precedent was established when we enacted the tariff—and omitted the farmer from protection. The bill merely rectifies the omission. It is not a precedent. It is a sequel. It is not even the first sequel. The immigration law gave labor its protection but left agriculture still out in the blasts of a wintry world. So far as we know, this is the last breach in the protective wall. It is a breach that must be closed—not in favor of agriculture but in favor of the whole United States, and in common justice to the farmer.

Simple Justice

But even if there were other classes equally prejudiced, is a precedent of simple justice something to be avoided? If there be another segment of our population equally sinned against, the suggestion that their wrongs should also be righted is no argument against righting this great wrong.

Not long ago industry asked the right to combine for export trade. It was granted instantly. It has long been the custom for industries to sell in export at less than domestic prices. Agriculture seeks no greater or different privilege. The precedents are all behind us. There is no other class in like case with agriculture. The McNary-Haugen bill closes the last gap in our protective outworks and rights the last great wrong.

No More Socialistic Than Tariff

You ask if this proposition is not socialistic and then amuse yourself with another array of straw men — this time Russian Bolshevist. The bill is no more socialistic than the tariff. Perhaps that is paternalistic or communistic but, having thus launched into Bolshevism in favor of ¾ of our people at the expense of the other third, what kind of good faith is it to refuse exactly the same protection to the other ¼ on the plea of "individualism"?

Who has the cynical audacity to say that what is the sound foundation rock of our economic policy for New England is communism for the agricultural portions of Illinois?

Farmer Bears Expenses

But this bill does not "put the government into business," it does not "interfere with business." It permits a corporation to combine farm products for export sale just as the Edge and the Webb bills now permit industry to combine. The government then does nothing but give the corporation its sanction. It creates no governmental bureau or department. It permits the agricultural corporation, organized in the only way it can be organized, to go into the market and buy and sell, thus correcting an insufferable condition. The government as such does nothing. The farmer pays every cent of expense and bears every risk of loss.

Scant Attention to Affirmative

This completes a categorical reply to every one of your questions. The affirmative arguments for this bill are doubtless in your hands but your letter indicates that they have had scant attention from you. It further indicates that the arguments of the opposition have received an enthusiastic reception at your hands. Every one of them that has yet appeared parades through the pages of your letter with a great deal of sound and fury.

Not once in your entire screed do you refer to the beneficial result of this bill to the farmer. Not once do you suggest any alternative measure to alleviate his condition although you are very emphatic in your recognition of that condition.

No Argument or Evidence

You call the McNary-Haugen bill revolutionary, destructive of all our present systems of exchange, marketing, and involving the possible destruction of the present markets for farmers, and you say it may result in untold injury to an industry which is now almost prostrate. Yet you do not support any one of these conclusions with a shadow of argument or evidence. Since these are the only real conclusions we find most of your letter containing only interrogations—we can not escape the suspicion that your chief concern is with the system of exchange and marketing which have brought the farmer to his present situation.

Hope Arguments Not Wasted

Perhaps our conviction of the inequity of opposition to this bill drives us too far in our thought, gained from perusal of your letter, that your mind is no longer open and that the arguments herein advanced are wasted on you. We trust that such is the case. We have endeavored to weigh both sides of this question in a judgmatical frame of mind.

We have come to the conclusion that the essential principles of the McNary-Haugen bill are absolutely sound in economics and that the opposition is unsound, that it springs rather from grievances than from argument, and that from this basic fact it results that no man can advocate the opposition without finding himself mired in a morass of evasions, sophistries and deceits.

In conclusion, I wish to say that I do not pose as an expert on technical matters involved in this bill and I believe it proper to here acknowledge my indebtedness for the able and conscientious assistance freely given by those versed in the technical matters involved and by the proponents of this measure.

Responding to Pleas for Help

I know the condition of agriculture and realize my responsibilities well enough to respond to the pleas for help by men in this great industry. I would be derelict in my duty if I ignored the justifiable and insistent demand for some relief from Congress or any other possible source. It would be unpardonable if the Association I have the honor to represent did not use every means at hand to give you and others in positions of authority the composite judgment of agricultural leaders in the state.

The people of this state expect from me fair consideration of agricultural problems and proposed remedies. I am equally as sure they have a right to expect the same from you.

Yours very truly,

S. H. Thompson.

Edgar County Now Getting Packers' Premium On Hogs

Edgar county is now one of the 26 counties in the United States upon the federal accredited list as being practically free from bovine tuberculosis. To get on the accredited list requires that all cattle in the county pass two annual or three semi-annual tests with less than one-half of one per cent of reactors.

All hogs from Edgar county sold on terminal markets in car lots are now receiving a 10-cent premium over the selling price, as promised by the meat packers. Frank Trogden of Vermillion shipped the first load of hogs to Chicago that received the premium. He received $7.65 per cwt., the top of the market, and after the sale he was given a check for over $15.00 as the 10 cents per cwt. premium on 60 head of hogs.

It is estimated that the total cost of eradicating T. B. in Edgar county was $11,500, and this will be returned by the premium on about 700 carloads of hogs. Edgar county started this eradication work in July, 1921, and completed it in about two years. In the first test on about 14,000 cattle, 2.25 per cent reacted and in the second test in February, 1923, .2 of one per cent reacted.

All Committeemen of I. A. A. for 1924 Named and Approved

The complete personnel of standing committees for the association to serve during this year, as announced by President Thompson and approved by the executive committee, follows. In each case, the first-named in each committee is the chairman.

Finance: F. D. Barton, Cornell; Earl C. Smith, Detroit; W. H. Moody, Port Byron.

Legislative: F. D. Barton, Cornell; H. E. Goembel, Hooppole; A. C. Everingham, Hutsonville.

Dairy: Jacob Olbrich, Harvard; Henry McGough, Maple Park; C. H. Rehling, Breese.

Livestock: Geo. F. Tullock, Rockford; Samuel Sorrells, Raymond; J. E. Lingenfelter, Lawrenceville; L. R. Marchant, Galesburg.

Fruit and Vegetable: Curt Anderson, Xenia; J. Vernon Lesley, Sparta; A. O. Eckert, Belleville; J. W. Lloyd, Urbana; Guy C. Beauman, Tunnel Hill.

Poultry: C. E. Bamborough, Polo; Lyle Funk, McLean.

Phosphate - Limestone: Stanley Castle, Alton; H. T. Marshall, Serena; Frank I. Mann, Gilman; Melvin Thomas, Charleston.

Grain: H. E. Goembel, Hooppole; A. R. Wright, Varna; I. A. Madden, Springfield; W. A. McNeill, Chandlerville.

Information: R. F. Karr, Iroquois; J. M. Beckett, Blue Mound; L. O. Wise, Morrison.

Organization: Earl C. Smith, Detroit; J. H. Checkley, Lincoln.

Insurance: Chauncey B. Watson, DeKalb; R. F. Karr, Iroquois; Geo. F. Tullock, Rockford.

Educational: J. L. Whisnand, Charleston; A. C. Everingham, Hutsonville; E. W. Rusk, Carlinville.

T. B. Eradication: A. R. Wright, Varna; Geo. Hunt, Woodstock; Wm. E. Hedgcock, Peoria.

Choose Thompson As Member of Car Service Committee

President S. H. Thompson of the I. A. A. was elected as a member of the executive committee of 17 of the Mid-west Regional Advisory Board of the Car Service Division, American Railway Association, at a meeting of the board in Chicago, March 27. With President Hearst of the Iowa Farm Bureau Federation, Mr. Thompson will represent the interests of farmers upon the committee.

"The purpose of this board," states L. J. Quasey, director of the I. A. A. Transportation department, who took an active part in the meeting, "is to form a common meeting ground between shippers and railroads for the better mutual understanding of local transportation requirements, to analyze transportation needs in its territory and to assist in anticipating car requirements."

Mr. Quasey states that farm organizations are adequately represented upon the various commodity committees, such as livestock, grain, fruits and vegetables, and dairy products.

The Mid-west Regional Advisory Board has for its territory, Iowa, most of Illinois and Wisconsin and the western part of Indiana.

CREAM PRODUCERS ORGANIZING ASS'N IN FORD COUNTY

I. A. A. Advising On Organization; Also Assisting With Proposed Creamery At Prophetstown

Cream producers of Ford county are organizing a collective bargaining association with a membership agreement submitted by the I. A. A. Dairy Marketing department. At a meeting called by the Ford County Farm Bureau in Paxton, March 18, A. D. Lynch of the department, met with the 18 members of the organization committee to discuss plans of organization. The association plans to manage its own cream buying stations at Paxton and Gibson City and will contract for cream sales with some large cream buyer.

"Cream producers have become dissatisfied with the low and greatly fluctuating prices paid by the cream stations in Ford county," Mr. Lynch states. "They want an organization of their own so that they will get fair prices. A survey showed that local prices paid for butterfat in Paxton were practically always below the Chicago butter prices. They have not followed the Chicago butter market at all reasonably.

"It was interesting to note that the day of the cream producers' meeting, the stations paid considerably higher for butterfat than had been their custom.

At Prophetstown

Mr. Lynch met with farm bureau members in the vicinity of Prophetstown, Whiteside county, on March 22 to discuss with them the organization of a cooperative creamery there. He advised them that they should have the production of at least 1,000 cows to insure a profitable enterprise.

Farm bureau officers are now making a survey of the territory to report back at a future meeting upon the possibilities for a creamery. Marketing of eggs by the cooperative creamery is also contemplated.

Twelfth District Meet Discusses Relief Measure

Every county in the 12th district was represented at a conference called by executive committeeman Geo F. Tullock held at Aurora, March 20. The McNary-Haugen bill now before Congress was endorsed and each county was asked to urge its Congressman to support this bill. This action was taken after a long discussion. President S. H. Thompson of the Illinois Agricultural Association explained the bill.

A committee of three, consisting of Henry Park of DeKalb county, H. T. Marshall of LaSalle county and F. E. Longmire of Grundy county, was appointed to organize the district more thoroughly for the purpose of acting as a district unit on I. A. A. problems rather than each county acting alone.

Mr. Tullock believes that the district conference idea is well worth while. It is planned to hold three other similar meetings during the year in the 12th district.

RED TOP POOLERS GET HIGHER PRICE THAN OUTSIDERS

Beat Dealers' Average By 1-2 Cent Per Pound; Expenses Greatly Lowered In 1923

The net price received by the members of the Egyptian Seed Growers' Exchange for the 1923 red top pool was 11.6 cents per pound. An advance of 8 cents per pound was made at the time the growers delivered their seed, and a final return of 3.6 cents has just been made.

The exchange sold 1,168,739 pounds of red top for a total of $154,699.10. The total expenses for cleaning and warehousing, freight, insurance, interest, sales expense and operating overhead was $18,596.12, leaving a net for the growers of $136,102.96, or 11.6 cents per pound. The operating costs for the 1923 pool were $7,344.85 less than the same costs in 1923.

Unhulled Seed Sales

Sales of unhulled seed brought the exchange $16,220.04, within $2,400 of paying the total operating expenses of the pool. It is interesting to note that in the past, local buyers have allowed the growers nothing for unhulled seed.

"All red top growers will agree that the 1923 pool was a success," says Curt Anderson, manager of the exchange. "The price that poolers have received is probably at least one-half cent per pound higher than that received by non-members of the pool. We find that there was not a great deal of difference in the two prices in such localities as around Flora where the pool is the strongest. But take it where there are few or no poolers, and we find that the seed buyers have paid considerably less than the pool price of 11.6 cents.

Paid Only 7-8 Cents

"We have a reliable report from Effingham county that the price paid by a local dealer at Dieterich averaged only 7 or 8 cents a pound for last season. That indicates what many of the growers in the whole district might have expected had there been no cooperative marketing organization of growers."

National Egg M'k't'g Committee To Work Out Co-op Plans

The I. A. A. was represented by J. D. Hasper of the Poultry and Egg Marketing department and C. E. Bamborough, Polo, chairman of that committee, at a national poultry and egg marketing meeting called by the National Council of Cooperative Marketing Associations in Chicago, March 24.

A resolution recommended that a national advisory egg marketing committee be created to consider and formulate plans for organizing a national cooperative egg marketing sales agency and to consider and deal with all questions relating to cooperative egg marketing. The conference recommended that this sales agency shall be formed when as many as 15 state or regional cooperative egg marketing associations are ready to become members of it.

A. F. B. F. Working For Regulations Of Feed Yards

As a result of a series of complaints from livestock shippers in various parts of the country showing that the usual feeding charge in federal controlled feed yards varies from $4.50 to $6.50 a car while the private yards charge from $20 to $30 a car, the American Farm Bureau Federation has launched a campaign to obtain necessary legislation for the proper control of private feed yards.

According to O. W. Sandberg, Director of Transportation for the A. F. B. F., neither the Department of Agriculture nor the carriers have control over the charges at the private yards, and the shippers have no recourse whatever against prices charged at these yards. If the shippers make a protest against the charges they are informed by the railroads that the charges are what the private feed yards assessed against the shipment and as the carriers have no control over the private yards there is nothing further that can be done and the claim is denied.

Radio Makes Money For Members of This Shipping Association

From $500 to $700 gain on shipments of hogs from the Montgomery County Live Stock Shipping Association during the months of December, January and February is the result of radio market reports received by the First National Bank at Raymond, Illinois, according to Lewis Lessman, manager of the shipping association.

"Frequently," says Mr. Lessman, "I get out from one to three loads of hogs after getting the market report at 9:40 a. m. and get on a good market. For instance, in December I had three loads of hogs ready to go on a certain day. The market was bad—$6.60 per hundred. After getting the market report at 9:40 I phoned and held back two cars and shipped one, which brought $6.60. I held the other two cars for three days until I received a favorable market report and then shipped them. They brought $7.45, a gain over the earlier price of $289.00 for the two cars.

"The radio is hard on the trader but fine for the producer."

Renewal Campaigns In Tazewell and Clay

The first county farm bureau reorganization campaign for 1924 will start in Tazewell county, April 9, with H. L. Hough, Grundy county, a member of the I. A. A. organization field force, as local manager. Clay county will start its membership renewal campaign on May 20, with F. M. Higgins, La Salle county, in charge. Each of these counties will be reorganized under the township unit plan used very successfully by the I. A. A. in 1923.

Durst Is Editor Of Fruit Magazine

C. E. Durst, for three years director of the I. A. A. Fruit and Vegetable Marketing department, has accepted a position as editor of the American Fruit Grower, Chicago, a leading fruit journal. During the past year he has been taking graduate work in the University of Illinois.

Play Ball!

Is your county farm bureau going to play ball this summer? If so, Mr. Metzger of the I. A. A. wants your application, so that plans can be laid for scheduling the farm bureau league games. He says that he wants all applications in during April, so that the first games may be started in May, if possible. Three counties have joined the league, twelve more say that they are interested. Ten dollars is the membership fee. Let's keep the ball rolling!

Lynch Meets With McDonough D'rymen

A. D. Lynch, director of Dairy Marketing, met with farm bureau dairymen from near Macomb, McDonough county, to consider their marketing problems. He made a survey of the situation and suggested that the most logical thing to do would be for the cream producing dairymen to form a collective bargaining association.

Going To Play Ball? Write To Metzger of I. A. A.

G. E. Metzger of the I. A. A. has been named secretary-treasurer of the Illinois Farm Bureau Baseball League and is ready to receive applications for membership from all bureaus which plan to put a team in the field. Ten dollars should accompany the membership application.

According to last reports, three counties have formally applied for admission into the league, Cass, Sangamon and Logan counties. Carroll, Jo Daviess, Stephenson, Ogle and Morgan counties say that they will have teams and favorable comment has been received from McLean, Tazewell, Clark and Pike counties.

INCOME TAX REFUNDS

George E. Frazier, consulting accountant for the I. A. A., is going to Washington in April to file the briefs of the claims for refund on income taxes paid by Illinois farmers' elevators and other cooperative associations. Thirty-one of these claims have been filed with the I. A. A.

"It Won't Work With Broom Corn" Says Mattoon Dealer

Cooperative marketing may be all right for marketing cotton and tobacco, but it won't work with broom corn, according to a prominent broom corn buyer of Mattoon, who took the floor at the booster meeting of the Illinois Broom Corn Growers' Association in that city, March 20, attended by 80 broom corn growers from the producing district of Coles and surrounding counties.

"Experience has taught me that buyers are mighty poor sources of cooperative marketing information for the commodity in which they deal," was the answer by Walton Peteet, Secretary of the National Council of Cooperative Associations, to this statement.

"It's a marvelous thing that dealers approve cooperative marketing in everything but what they sell! I have a lot more respect for the dealer who comes right out and says he is opposed to cooperative marketing because it will hurt his business than for one who says he is doing it to protect the grower."

Previous to that Mr. Peteet had spoken on the advantages of cooperative marketing. The buyer, who said that he spoke as a grower-dealer-banker, then arose and outlined his stand on cooperative marketing.

Sign Away Rights

"For 38 years," he said, "I've been a buyer here, and I'm for the broom corn grower. We buyers have paid out over $75,000,000 to you farmers and have served you right. There is a decreasing demand for broom corn, and what you growers should do is to decrease your production of broom corn. You'll never decrease your crop under the cooperative method. You're only signing away your rights by joining this cooperative association. I'm for leaving the farmer free and independent to sell his broom corn as he wishes."

The speaker implied that if the growers joined the association they need not expect any financial backing from his bank. "But," he stated, "if it is finally proved to me that cooperative marketing of broom corn is a success, I'll be for it."

Peteet's Reply

"If everyone waited to see if a project was a success before they were for it," replied Mr. Peteet, "the world wouldn't move ahead very far. Most of you bankers were against the Federal Reserve system until you saw that it was a success.

"You say that cooperative marketing will cause increased production. In saying that, you are admitting that the cooperative method brings higher price levels. How in the world are the growers going to bring about decreased production unless they organize and get the facts about broom corn marketing?

Banks and Farming

"As for your implication that if the growers join the association they needn't come to your bank for money, don't think for a minute that all the banks are going to commit such a suicidal act. Banks are interested in farming, because they are dependent on it. The practice in all commodity marketing associations has been to borrow from local banks as much as possible before using governmental credit agencies.

"Now, Mr. Dealer, we know how your system works. Certainly cooperative marketing can't work any worse than your system."

Buyer Convinced Him

At the close of the meeting one of the growers said to Mr. Metzger of the I. A. A.: "Well, I've just signed the contract. But it was that dealer and not you or Mr. Peteet that persuaded me to do it. When I found that he was against it I was convinced that the plan must be right. And I've got another contract with me that I'm going to have my neighbor sign on the way home."

WOOL POOL NETS GOOD PRICE FOR BETTER GRADES

Net Average Price of Pool For Higher Grades Was 41 Cents Compared With 36 Cents Locally

An average of 41 cents per pound was the net price received by poolers of the better grades of wool in the 1923 Illinois pool as compared with an average of 36 cents paid by local dealers, states C. A. Stewart of the I. A. A. livestock marketing department. Two hundred thousand pounds of Illinois wool was in the pool.

"One of the main reasons why some were dissatisfied with pooling results in 1923 was because Illinois wool graded lower than in 1922," declares Mr. Stewart. "The pool would have netted about two cents per pound more if the grading had been on a par with the previous year. No satisfactory explanation can be given for the difference in grading of the two clips but the fact remains that Illinois wool in the 1923 pool was as a whole of poorer quality than that of the previous year."

Another thing that must be kept in mind, says Mr. Stewart, is the fact that the returns of many poolers were cut down due to the high transportation and handling costs caused by shipment of wool in small lots. It cost shippers from 7 to 8 cents per pound to market wool through the pool when it was shipped in small amounts, while this cost was reduced to about 4 cents per pound when shipped in carload lots.

Peteet Tells Co-op Story In Calhoun Co.

Walton Peteet, secretary of the National Council of Cooperative Associations, was secured to address a series of fruit growers' meetings in Calhoun county, April 1 and 2, under the auspices of the Illinois Fruit Growers Exchange. Calhoun county, the largest apple growing section in Illinois, may organize to market through the exchange.

Thought Cartoon Hit Nail On the Head

"I think the cartoon in your February 20 issue sure locates the farmer," writes C. M. Elsberry, Paris. "To diversify and loan him money won't do him any good. We pay 10 cents a loaf for bread, the same as when wheat was $2.80 a bushel. It has been proven that if the farmer gave his wheat away it would lower bread costs less than 1 cent a loaf. I sold a nice beef hide this last winter for $1.44 that would make 5 pairs of shoes. How much cheaper would the shoes be if hides were donated?

"We can't continue to be the 'richest nation on earth' if we persist in pauperizing our citizens."

56 IN POULTRY CLUB

Fifty-six Adams county boys and girls have joined the Adams County Poultry club, formed by the county farm bureau. The Quincy Poultry association is cooperating in the work by furnishing hatching eggs.

I.A.A. LAYS PLANS FOR BUSINESS AND ACCOUNTING SERVICE

Wicker Employed To Head Work; Effective Accounting and Business Control a Necessity

The establishment of an accounting and business service for Illinois farmers' cooperative associations is rapidly being perfected by the I. A. A. George Wicker, who has had an extensive and successful experience in developing a similar service for Minnesota cooperative associations by the Minnesota Department of Agriculture, has been employed by the I. A. A. to take charge of this new department.

George Wicker

Mr. Wicker has been active in the organization and management of farmers' cooperative companies in Minnesota for years. As a member of the Minnesota Legislature he wrote the General Cooperative law for Minnesota and also prepared and introduced laws for the regulation of live stock markets. As director of cooperative accounting in the Minnesota Department of Agriculture he has built up a practical and efficient business service for cooperative associations.

George E. Frazer, Chicago, who is nationally known as an accounting authority, has for some time been in the employ of the I. A. A. as consulting accountant. Mr. Frazer will assist the I. A. A. in an advisory capacity in establishing this new business service.

Geo. E. Frazer

Must Be Businesslike

"The local cooperative association must become a modern business institution, properly financed, with effective accounting service and effective business control," states Secretary Fox of the I. A. A. "The I. A. A. has had considerable experience with farmer-owned cooperative companies and has had an opportunity for wide observation as to their methods of operation.

"These observations have led to some definite conclusions. First, cooperative marketing of

McNary-Haugen Bill To Be Discussed at Rock Island Meeting

Farmers, bankers and business men of the Middle West will meet on common ground to discuss the provisions, merits and effects of the McNary-Haugen bill in an important meeting sponsored by the Illinois Agricultural Association at the gymnasium of Augustana College, Rock Island, Thursday night, April 24, at 7:30.

The meeting will be addressed by speakers who are thoroughly informed at first hand on the provisions of the bill, its history and progress to date in Congress.

25th District Men Support McNary Bill; Meet at Carbondale

The first meeting of farm bureau men of the 25th district at Carbondale, April 10, passed resolutions urging the passage of the McNary-Haugen bill and opposing a raise in postal rates. A discussion of poultry and egg marketing was a feature of the meeting.

About 35 representatives of farm bureaus of the district attended the meeting. Secretary Fox of the I. A. A. was present. The next meeting of the district will be held at Sparta.

Community Clubs Advocated by 14th District Meeting

The organization of a community club in each township, the meetings of which would be conducted by home people with the assistance of the county farm adviser and an occasional man from the state association was advocated at the first district meeting of the farm bureaus in the 14th congressional district, held at Rock Island, March 27.

"The farm bureau must be built on the efforts of the individual farmer," said Judge Searle, Rock Island, in addressing the meeting. "Each community must study its own problems and develop its own leaders. In other words, we must build from the bottom up rather than from the top down."

The township unit plan of the organization department of the I. A. A. for reorganization of the county farm bureaus was favorably spoken of by the delegates at the meeting. A resolution was passed endorsing the McNary-Haugen relief bill.

Rock Island, Mercer, Warren and McDonough counties were represented at this meeting.

FOR A HEALTHIER GROWTH

Sale Guarantees and Contracts Now Available

In response to requests from many northern Illinois counties, the Tuberculosis Eradication department of the I. A. A. has perfected the uniform guarantee and sale contract which is now available for use between members of farm bureaus and county breed associations in other states. The guarantee and contract were approved at the last meeting of the I. A. A. executive committee.

The plan is made effective as follows: If, for example, members of any Illinois farm bureau wish to buy cattle from four or five breed associations in another state, the farm bureau, together with the I. A. A., will sign the guarantee with the breed associations from whom its members wish to buy cattle. After signing the guarantee, which expresses the terms and a basis of understanding upon which individuals may buy or sell cattle, the individual farm bureau member is then in a position to buy any cattle he may wish to from the associations with which the guarantee has been signed, under the terms and conditions of the sale contract.

"It is the hope of those who have assisted in perfecting these arrangements that through the use of these contracts a new spirit of trust and mutual understanding may be established in the cattle industry," states M. H. Petersen, in charge of tuberculosis eradication for the I. A. A. "We hope it will eliminate many of the misunderstandings and shady practices of the past."

Jo Daviess Forms First Limestone Crushing Ass'n

The first limestone crushing association in Jo Daviess county has been formed by the county farm bureau in Guilford township with over 20 members. The association is being financed by selling stock at $15.00 per share. Guilford township has an abundance of high testing limerock which can easily be quarried and ground, according to V. J. Banter, farm adviser.

THE TRUTH-IN-FABRIC

The I. A. A. has written to Illinois senators and congressmen reaffirming its position in favor of the Truth-in-Fabric bill and asking their support of the measure.

COOLIDGE SUPPORT OF McNARY BILL ASKED BY BUREAUS

Mid-west Presidents and Secretaries Pass Resolution; Thompson Sends Letter

Presidents and secretaries of the mid-west state farm bureaus in conference in Chicago, April 11-12, passed a resolution asking President Coolidge to give his support to the McNary-Haugen bill. The text of their resolution is as follows:

"Recognizing the critical condition that agriculture in the United States faces, and believing that because agriculture is not on an economic parity with other industries our whole economic structure and national welfare are hereby in danger, the presidents and secretaries of the mid-west group of farm federations, including Michigan, Ohio, Illinois, Indiana, Wisconsin, Minnesota, North Dakota, South Dakota, Nebraska, Kansas, Iowa and Missouri, urgently request that you support the McNary-Haugen bill and do all possible in assisting the same to become a law."

On April 8, President Thompson of the I. A. A. sent a letter to the President calling attention to the latter's New York speech on February 12 in which he presented a clear picture of the existing condition of agriculture. Mr. Thompson, in his letter, showed how the principles of the McNary-Haugen bill are the hope of agriculture and asked the President to aid in the passage of the measure.

A copy of President Thompson's letter appears on Page 3 of this issue of the Record.

How They're Lined Up

It is interesting to note the lineup for and against the McNary-Haugen bill.

For the bill are practically all the national and state farm organizations and marketing associations of the country, the American Federation of Labor, many bankers' associations in farming states, nearly all farm journals and many daily newspapers in farming states.

Against it are the grain exchanges, livestock exchanges, National City Bank of New York, Chase National Bank of New York, and the daily newspapers in grain exchange, packing and financial centers. The only farm bodies that have come out against it are the Oklahoma Wheat Growers, Kansas Wheat Growers and Kansas Farmer Grain Dealers.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, H. C. Butcher, Director.

Entry as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

Good News On "Pittsburgh Plus"

It is reported on credible authority from Washington that Special Examiner John W. Bennett of the Federal Trade Commission, who has been hearing testimony on "Pittsburgh Plus" for two years, has submitted his report and that the report is against this false steel freight charge.

This is very encouraging to the I. A. A. as we have been among the leaders in seeking to abolish the practice. However, the report is "privileged," that is, not released for publication. There seems to be no sound reason for keeping the report secret. The public is deeply interested in "Pittsburgh Plus" and should know the facts about it.

—o—

Three Months in 1924

Looking back over the first three months of I. A. A. work in 1924 we find several high points in association accomplishment. It is difficult to enumerate specifically all that has been done in January, February and March, 1924. In many cases we have merely laid the foundation for future progress in certain lines of work. In other cases a definite piece of work has been accomplished.

The following are 25 of the principal accomplishments of the I. A. A. for the first quarter of 1924:

1. Outlined a definite program of work for 12 cooperative marketing and service departments for 1924.

2. Assisted in the formation of the Illinois Farm Bureau Serum Association to unify the collective purchasing of serum under one head.

3. Cooperated with the University of Illinois and the National Live Stock Producers' Association in holding a series of nine livestock shipping association schools to instruct managers, directors and farm advisers in problems of shipping associations. There was a total attendance of 558 at these schools.

4. Formulated a uniform selling contract for use between county farm bureaus and organizations in other states with dairy cattle for sale to protect farm bureau members against purchasing tuberculous cattle.

5. Directed educational campaigns in 30 counties to secure county appropriations for the eradication of T. B.

6. Assisted in the formation of a milk producers cooperative association at Galesburg.

7. Started a survey to get the facts to aid in the solution of the Chicago milk situation.

8. Assisted in organization of the Ford County Cream Producers' Association.

9. Advised farm bureau members in Whiteside county toward organization of a cooperative creamery at Prophetstown.

10. Assisted the Producers' Cooperative Dairy of Decatur in organization plans.

11. Assisted in the reorganization of the Illinois Fruit Exchange.

12. Assisted the Illinois Broom Corn Growers Cooperative Association in its organization plans.

13. Cooperated with the Illinois Poultry and Egg Shippers Association to push the campaign for buying eggs at country points on the basis of grade. Many buyers are now paying five cents premium for firsts.

14. Represented Illinois fruit and vegetable growers before the Interstate Commerce Commission protesting a proposed raise in fruit and vegetable rates from Illinois points to Chicago.

15. Called a meeting of Illinois county farm bureau presidents to discuss agricultural legislation which endorsed the McNary-Haugen bill. Sent a representative to Washington to actively back the passage of this bill. Actively supported all legislation in the farm bureau legislative program. Helped kill Williams bill which would have harmed cooperative livestock marketing.

16. Made a radio survey in Illinois to determine the use of radio among farmers with the purpose in view of planning programs to disseminate farm bureau information.

17. Participated in a crop reporting conference called by the U. S. Department of Agriculture at Washington.

18. Made analysis of tax figures for 1922 and 1923 in a considerable number of Illinois counties.

19. Furnished speakers for many local meetings in Illinois and several meetings in other states.

20. Held a series of limestone conferences resulting in the drawing up of a definite list of recommendations for the standardization of limestone buying in Illinois and determining the relation of the I. A. A. and county farm bureaus to limestone purchasing.

21. Made arrangements with one big limestone producer to grant special rebate to farm bureaus in purchases of limestone.

22. Filed claims for 31 Illinois cooperative marketing association for refunds of Federal income taxes which they have paid.

23. Made a full investigation into the requirements of county farm bureaus with reference to county organization work.

24. Started definite plans for the establishment of a business and accounting service for Illinois cooperative associations.

25. Published six issues of I. A. A. Record going to the entire membership as well as sending out the news of the association to the public press.

—o—

Another Drawback To Quality Eggs

Last issue we told how the practice of washing eggs prevents them from grading as firsts as they will not keep in storage due to the removal of the protective covering. This is a drawback in the campaign to have Illinois egg buyers pay on the basis of grade with a premium of five cents per dozen for firsts.

Another practice which causes eggs to come out of storage almost a total loss has been called to the attention of the I. A. A. This is the practice of breeders of pure bred poultry to prick a hole with a needle through the shells of the eggs which they market to local dealers in order to prevent their neighbors from buying them at market price. These needle holes are too small to be detected in ordinary grading, but they cause the eggs so treated to decompose rapidly.

Egg buyers state that they would be much more favorable to paying a premium to the producers of quality eggs if such practices as the above are abolished.

—o—

Can the Producers Handle Hogs?

Because of the continued increase in the volume of business handled by the Producers' cooperative commission companies, reports and rumors have been disseminated by interests opposed to these farmers' selling agencies that the Producers are handling far more hogs than their facilities will permit and that the salesmen are overtaxed, bringing about poor service to shippers as well as lower prices. It has also been said that the shrinks on hogs consigned to the Producers have been excessive.

What are the facts? The Chicago Producers Commission Association made a complete investigation of the hog shipments received during the week ending March 28th to get facts to prove whether or not this propaganda was true. This investigation covered the prices received by the Producers' shippers in relation to the average received in the Chicago yards. The co-op handled 260 cars of hogs that week, over 100 cars more than its nearest competitor.

Here are the results:

Day	Yard Average	Producers' Average	Yard Holdover	Producers' Holdover
March 24	$7.48	$7.48	33,000	None
March 25	7.33	7.38	23,000	None
March 26	7.24	7.31	21,000	None
March 27	7.34	7.39	22,000	None
March 28	7.36	7.39	13,800	None

Those five consecutive days' results show that the Producers sold hogs higher than the market average four out of five days and they disposed of all their shipments upon the day of arrival. With a larger number of hogs at their disposal, the Producers are in a position to demand better prices, they are able to sell out every day and they have lighter shrinks.

The average net shrink per head for the Chicago Producers' hog shipments for December was 2.15 pounds; January, 1.23; February, 1.58; March 2.7.

There are reasons for the continued growth in the receipts of the Producers' selling agencies.

—o—

Just Listen To This!

In a recent issue of the Chicago Journal of Commerce in the "Board of Trade News and Gossip" column, we find an interesting comment upon the Capper-Tincher Act, also known as the Grain Futures Act, which the farm bureau was largely instrumental in getting through Congress for the government regulation of the grain trade.

Now the Journal of Commerce has never been accused of praising the Capper-Tincher Act or being at all in favor of it. So the following observation is worth noting: "This relegation (of the Chicago Board of Trade) to third place in the world's grain business is regarded as a result of curtailed speculation following the endorsement of the Grain Futures Act by the Supreme Court. The blame is placed on Senator Capper and Congressman Tincher by most of the members, but those who are fully acquainted with the requirements and provisions of the law are free to admit that the blame is more on those who persist in misconstruing the purposes of the law and who insist on circulating propaganda intended to inflame sentiment against its administration."

What do you think of that? And we've been told all the time that the act itself was to blame for all our grain marketing troubles.

Thompson Asks Coolidge's Support of McNary Bill

Chicago, Ill., April 8, 1924.

The Honorable
The President of the United States.
Dear Mr. President:

In your address to the people of the United States, delivered at New York on February 12, you presented a clear picture of the existing condition in agriculture and its effect on other parts of our national structure. You identified the cause when you said:

"To this depression there have been other contributing causes, but the main difficulty has been the price of farm products."

The situation unmistakably leads to this conclusion, and agriculturally minded men endorse it.

You said on that occasion:

"There is no sound policy which is narrow or sectional or limited. * * When there is a difficulty which affects so large a population, so large an area, and so important an interest as that of agriculture, it is distinctly a national question."

"Real Gleam of Hope"

There is a real gleam of hope for agriculture in your great declaration in the metropolis of America:

"The people of these numerous states cast an enormous influence on the making of the laws by which you are governed. * * This problem is not merely the problem of the agricultural section of our country, it is the problem of industry, of transportation, of commerce, and of banking."

Your remarkable address from which we quote lays down before the nation in language that may not be misunderstood the condition and the cause, and directs attention to the common responsibility of applying the remedy.

Substance of Measure

The hope of agriculture centers upon the principles contained in the McNary-Haugen bill now before Congress. In brief, the substance of this measure is:

1. To enable the producers, through an agency created for them, to purchase or to contract with others to purchase, the exportable surplus of certain basic crops at the same exchange value compared with other commodities that obtained for a normally representative period prior to the war.

2. To protect that value by an adequate tariff.

3. To enable the producers to sell this surplus at the best prices ruling in the world markets.

4. To collect the loss thereon and the costs of operation, from the producer.

5. To return to the Treasury any funds advanced by it.

This measure rests upon the promise laid down in your New York address. It prescribes the remedy for the basic difficulty of discriminatory price. The objections that have thus far been advanced against it rest almost wholly upon misrepresentations of the plan. They are that this is price fixing; that it will impair or destroy existing agencies that perform useful functions; that a circulating medium of indeterminate value will ensue; that international complication will result; that increased production will follow.

Will Not Stand Analysis

Not one of these objections will withstand the test of close analysis. They proceed mainly from one source out of which the element of selfish interest is not lacking. It is only fair that this organization of agricultural producers be permitted to observe that Julius Barnes, grain-exporter, should not be permitted to write the agricultural policies of America. From everywhere intellectual assent has been given to your proposition that agriculture is in distress and that a remedy is called for.

Have the objectors a better plan to accomplish the necessary end? If so, the common interest demands that they make it known.

Asks President's Aid

With deepest appreciation of your great service in calling attention to the critical situation, we wish respectfully to ask you for further leadership in aiding as far as you properly can, the enactment into law of this measure that provides equality for agriculture in the network of protective legislation that supports industry, and finance, and labor, and transportation in our present-day structure.

Yours very respectfully,
Illinois Agricultural Association.
S. H. Thompson,
President.

24th District Asks I. A. A. To Establish Grain M'ktg Plan

A resolution that the I. A. A. get behind a definite grain marketing program and that it actively cooperate in establishing grain marketing work in Illinois at an early date on a feasible national plan was passed at the first farm bureau district meeting of the 24th district, March 24th, at Fairfield.

The I. A. A. was also asked to make an investigation toward securing a cooperative outlet for eggs and poultry. Farm Adviser W. E. Hart of Clay county told of the experience of that county with a cooperative egg shipping association. It was discontinued due to lack of contracts with members, small volume of business and poor grading methods.

The meeting requested the I. A. A. Phosphate-Limestone department to take immediate steps to secure a good strong differential price on limestone as between farm bureau members and non-members.

The McNary-Haugen bill was unanimously endorsed and an expression of appreciation was given to Congressman T. S. Williams of the district for withdrawing his proposed amendment to the Packers-Stockyards Act.

Twenty delegates attended the meeting, representing Wayne, Clay, White, Gallatin, Johnson, Saline and Pope counties.

THE McNARY-HAUGEN BILL

An Act to Create Equality

FOR AGRICULTURE—

In brief, the substance of this measure is—

1. To enable the producers, through an agency created for them, to purchase or to contract with others to purchase, certain basic crops until the price thereof rises to the same exchange value compared with other commodities that obtained for a normally representative period prior to the war.
2. To protect that value by an adequate tariff.
3. To enable the producers to sell the quantity so purchased (which constitutes the exportable surplus) at the best prices ruling in the world markets.
4. To collect from the producer whatever loss there may be on the exportable surplus and the costs of operation of the agency.
5. To return to the Treasury any funds advanced by it.

WITH INDUSTRY—LABOR—

Industry controls its own marketing mechanism, is protected by the Tariff, encouraged by "legislative enactments" to combine for export trade (Webb-Pomerene and Edge bills), and stands its own loss of operations.

Labor is protected by "legislative enactment," i. e., the Adamson law and the restriction of immigration.

20th DISTRICT MEN ASK RAINEY NOT TO HINDER McNARY BILL

Take Representative to Task For Opposing Relief Measure; Pass Resolutions

Forty-two representatives of the nine county farm bureaus in the 20th congressional district met at Jacksonville, April 10, and drew up a letter to Congressman Henry T. Rainey, expressing their disappointment in his attitude in opposing the McNary-Haugen bill and asking him, if he cannot support the measure, at least not to hinder its coming on the floor of the House for discussion and roll call.

The letter also made it plain to Mr. Rainey that they are supporting the measure because they understand the bill and believe in it and it was upon their advice and request, with other farm bureau officers of the state, that President Thompson has taken such an active part in demanding that Illinois congressmen support the bill.

Chicago Sanitary District

The meeting also went on record recommending that the amount of water dumped into the Illinois river by the Chicago Sanitary district be limited by law and that the Illinois river should not become a dumping ground for all Chicago sewage.

M. H. Petersen of the I. A. A. told about the tuberculosis eradication campaign in Illinois and how the association is helping in its progress. A motion was passed instructing the I. A. A. to appoint a committee to investigate the present system of obtaining abstracts for farm property and, if possible, to work out some method which would be less expensive.

The following is the letter sent by the farm bureaus of the district to Congressman Rainey:

Rainey Letter

Our Dear Mr. Rainey:—

We, the presidents, officers, executive committeemen and farm advisers of the farm bureaus of the 20th Congressional District, in our regular quarterly meeting assembled at Jacksonville, on this the 10th day of April, 1924, beg leave to present to you the following statement of facts; which after careful preparation and consideration set forth our individual and collective feelings and convictions as to what is commonly known as the McNary-Haugen bill.

First, Sam H. Thompson, President of the Illinois Agricultural Association, has not dictated to us in regard to this measure, but we have directed him in his former communications to you and he has acted only upon our advice and at our request, along with the advice and request of the officers of the other farm bureaus of the state of Illinois, especially at the meeting in Chicago, March 6th.

Have Studied Bill

Second, we have as individual farmers and members of the farm bureaus carefully studied this bill and thoroughly believe it is a long step in the right direction toward relieving the present distressful state of agriculture.

Third, we felt after your early endorsement of this measure that you would support the same, representing as you do a large agricultural district; but we are much disappointed to find that you have not only failed to support the measure as written and have also neglected to offer any friendly constructive amendments to same and furthermore have taken a very leading part in opposition to this measure.

Fourth, we feel that we have a perfect right to ask you to take one of the following positions; first, support the bill as written, second, failing in that assist in a friendly way in making constructive amendments or additions to the bill. Or, third, at least permit the bill so far as lies in your power, to come on the floor of the House for discussion and roll call.

—20th District Farm Bureaus.

BIGGAR LEAVING I. A. A.

G. C. Biggar, who has served the I. A. A. as Assistant Director of Information for the past 14 months, has resigned to accept a position with the Sears-Roebuck Agricultural Foundation. He will be connected with the agricultural radio broadcasting station which was recently established. His successor in the I. A. A. has not been named.

SCHOOL SURVEY OF STATE LAUNCHED BY ASSOCIATION

Educational Committee Submits Plans; Farm Bureau Folks Asked To Help

Plans for investigation of the school problems of the state with a view to bettering school conditions were outlined by the advisory educational committee at the meeting of the I. A. A. executive committee April 4.

These plans include a survey of the state with the help of the farm bureaus to determine the attitude of the farmers toward such educational problems as consolidation, revenue relationship, enlargement and unification of administration.

A questionnaire will be sent to all farm bureau members living in consolidated high school districts, township high school districts and community high school districts to determine their attitude toward these institutions.

Engage Supervisor

G. W. Willett, Superintendent of Schools at La Grange, Illinois, has been engaged as Supervisor of Investigations to serve on a temporary basis during the summer.

The committee, which consists of J. L. Whinnand, Charleston, A. C. Everingham, Hutsonville, and E. W. Rusk, Carlinville, will make a study of rural school problems from the standpoint of rural school teachers and county school superintendents. It plans also to work in cooperation with J. C. Watson of the taxation department insofar as school problems are related to tax matters.

Suggestions Wanted

Definite suggestions from farm bureau members as to needed changes in school laws will be welcomed by the committee.

"We believe," said the chairman, "that we have an important piece of work to do. We also believe we have a workable plan that will get for the I. A. A. and for all citizens of the state, much needed information."

First Farm Bureau Radio Community Meet Big Success

Farm bureau folks from all over the United States attended the first farm bureau radio community meeting broadcasted from Station KYW, Chicago, under the auspices of the American Farm Bureau Federation, Tuesday night, April 8.

Secretary Coverdale of the A. F. B. F. was chairman of the meeting. Songs, reports of projects, agricultural news and special talks featured the meeting. It was, without doubt, the largest attended farm bureau community meeting in history.

The A. F. B. F. is now broadcasting from Station KYW at 8:20 on Tuesday and Friday nights with special features each time. Arrangements are being made for the formation of a national radio forum, composed of several leading farm organizations, to broadcast agricultural programs from Chicago and other points. Secretary Fox of the I. A. A. is chairman of the committee arranging the new plan.

KANE COUNTY MEN ENDORSE PLAN FOR MILK MARKETING

County Units at Basis to be Federated into Larger Selling Organization

Kane county dairymen, at a meeting in Geneva, April 4, endorsed a plan for milk marketing in the Chicago district based on county units to be organized as independent marketing associations. Federation of these county units into a district-wide marketing company is planned later.

This plan was prepared by the I. A. A. Dairy Marketing department with the assistance of E. B. Heaton, formerly dairy marketing director of the A. F. B. F., and presented to the Kane county men at their request. With independent county units, the members will have confidence in such an organization that they would not have in one covering a larger territory, it is pointed out.

The Geneva meeting appointed a committee of W. C. McQueen, Elgin; Henry McGough, Maple Park; and G. R. Fox, Hampshire, to make further arrangements.

The following resolution was adopted at the Kane county meeting:

WHEREAS: It seems expedient that some sort of a plan be formulated on which the dairymen of the Chicago District can unite for proper merchandising of milk and milk products.

THEREFORE, BE IT RESOLVED: that this group of Kane county dairy farmers at the Kane county court house, April 4, 1924, endorse and pledge our support to the following principles underlying a milk and dairy products marketing organization for Kane county:

1. Milk producers form their own organization by attaching a written agreement to the contract which specifies that the following conditions must be fulfilled before organizaa can be formed:

A. Have local district associations—preferably about a county in size.

B. Must have at least 60 per cent of the milk producers as signers before district associations can be incorporated.

C. District associations are to be organized by a local organization committee.

D. Membership fee of five dollars to be secured to pay the cost of organization campaign.

E. Contract period to be for five years.

2. Association Agreement to provide that after marketing association is formed the following provisions must be carried out:

A. Provides for financing associations by loans through regular deductions from producer members.

B. Provides that when ten local district associations are incorporated that a central marketing exchange for the Illinois part of the Chicago territory can be formed.

C. Provides that association can lease and equip locally owned skimming stations, processing or manufacturing plants as deemed advisable by the Board of Directors.

D. Provides the duties which the exchange and the associations are to perform.

3. The Producer Contract or Marketing Agreement which is attached to the Association Agreement provides:

A. Delivery of all milk and cream for market to association.

B. Have one or more pools—fluid milk, condensed milk, butter and cheese.

C. Specifies maximum deduction of twenty cents per hundred pounds for milk marketed for loan to association for working capital fund, called the Special Advance Fund.

D. Method of payment to producers—80 per cent net pool price the month after delivery and remainder on month following.

E. Average monthly production control with penalty for excess production during surplus months and reward during short period.

F. Liquidated damages for violation of contract with right of injunction.

G. Date of beginning and ending of contract period.

BACKING BUTTER COMPANY

Farm bureaus in the St. Louis dairy district are loyally backing the Ill-Mo Butter Company, a co-op. It opened on Jan. 2, 1924 and is now making over 1,000 pounds of butter per day.

Butcher Is New Publicity Director For Association

H. C. Butcher of Iowa State College, has been employed by the I. A. A. as Director of Information to succeed Edgar L. Bill, who is now director of the Sears-Roebuck Agricultural Foundation radio station, WLS.

H. C. Butcher

Mr. Butcher has been handling publicity work for Iowa State College. During the past year he has also served as editor-in-chief of one of the student publications. He was born and raised on a farm in Iowa and will graduate at Ames in June in agricultural journalism and animal husbandry.

Mr. Butcher has already taken up his work with the Illinois Agricultural Association.

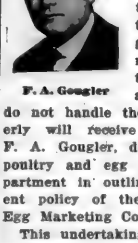
JASPER GROWERS ORGANIZE

A. B. Leeper, manager of the Illinois Fruit Growers' Exchange, writes that the peach growers of Jasper county have voted to form an organization to market through the exchange. However, he states that their crop this year has been winter-killed and that the organization will doubtless be perfected so as to be ready to market the 1925 crop.

Save These Dates!

Mark down on your calendar the dates for two more important I. A. A. events. The executive committee has decided that the I. A. A. and county farm bureau picnic, to be held at Lincoln, will take place on August 26. They also approved January 14 and 15, 1925, as the date for the tenth annual meeting of the I. A. A. It has not been decided where next year's annual meeting will be held.

Metzger To Meet With So. Illinois Cotton Growers



G. E. Metzger, director of organization for the I. A. A., will meet with the organization committee of the cotton growers of southern Illinois at Mound City, April 22. Plans for organizing the cotton growers of the district for cooperative marketing of their crop will be discussed.

It is likely that Illinois cotton growers will not find it advisable to form a separate marketing association as they do not have enough acreage. Federation with either the Tennessee Cotton Growers' Cooperative Association of the Missouri Cotton Growers' Association is anticipated.

Representatives from Johnson, Union, Massac, Alexander and Pulaski county cotton growers have been invited to attend this meeting.

Egg Producers Must Help In Quality Program-Gougler

"Every effort is being made at the present time to get Illinois egg buyers to buying on a graded basis, so that the man who takes good eggs to market will get a price commensurate with their quality and those who do not handle their eggs properly will receive less," states F. A. Gougler, director of the poultry and egg marketing department in outlining the present policy of the Poultry and Egg Marketing Committee.

F. A. Gougler

This undertaking means more to Illinois poultry and egg producers than appears at first thought, Mr. Gougler thinks. It will preserve for Illinois producers a very large egg-consuming center which otherwise might easily be taken by up-to-date poultry producers in other sections.

He calls attention to the fact that California egg producers by assembling quality eggs have shipped them across the continent to New York and have competed successfully with Eastern producers who live next door to the market.

Must Sell Quality Eggs

"If we wish to maintain these large middle west markets we must realize that our quality must be as good or better than that of other producers," states Mr. Gougler. "Many of the large shippers of eggs have expressed a desire to purchase on a graded basis and they are willing to pay a premium for quality eggs."

Mr. Gougler points out the following precautions that egg producers should take in order to deliver good eggs to the buyer:

Precautions to Take

1. Provide hens with clean nests.

2. During hot weather gather eggs twice daily.

3. Keep eggs in cool, clean place. Eggs absorb bad odors very readily.

4. Market at least twice each week during summer months.

5. Try to have eggs uniform in size and color. No. 1's must be 1⅝ inches in diameter or larger.

6. Never wash eggs unless they are to be marketed for immediate consumption.

7. For your own use, use odd-sized, off-color and dirty eggs.

8. Preserve eggs for winter use while they are cheap. Then you can sell your winter eggs for higher prices.

9. Keep male birds away from all hens except the breeding flock at all times.

Only Fair Method

"The egg trade will probably be divided on the grading program," states Mr. Gougler, "and of course some farmers may not wish to line up with the grading system at first. However, this method is the only fair method of handling the egg trade. Illinois producers must deliver quality eggs or their competitors will take their business away from them.

"The success of this movement in Illinois rests on farm bureau members and their wives. Ask your dealer if he is paying a premium on quality eggs and if he is not, ask him why not. We urge all farm bureau members to cooperate with us in this program."

Egg Shippers Are Pushing Grading Program in State

Egg shippers from Peoria and other towns in that part of the state met in that city, April 9, to discuss the buying of eggs on the basis of grade. Mr. Gougler, director of poultry and egg marketing for the I. A. A., was present and reports that practically all in attendance were in favor of buying on grade, and it was voted to begin buying on Monday, April 14, with standard weight to be 24 oz. per dozen on a margin of 5 cents or more per dozen for No. 1 eggs.

"The I. A. A. and county farm bureaus are backing you in this program of paying for eggs on the basis of grade and will do all in their power to make the plan a success," Mr. Gougler told the shippers.

The Peoria meeting was one of several being held over the state by the Illinois Poultry and Egg Shippers' association to acquaint shippers with their plans for buying on the basis of grade.

I. A. A. Gives $200 For Boys' and Girls' Club Judging Teams

The executive committee at its April meeting voted to appropriate $200 for the purpose of helping defray the expenses of Illinois boys' and girls' judging teams to national contests in 1924.

It will be remembered that the I. A. A. gave $250 for this purpose last year. This money helped to send the champion live-stock club judging team to Sioux City, the high school judging team to the International Live Stock Show in Chicago and the state champion dairy judging team to the National Dairy Show at Syracuse, New York.

The latter team, composed of three boys from Whiteside county, carried off the championship in judging at the boys' and girls' contest at the National Dairy Show.

I. A. A. TO HAVE BUSINESS SERVICE

(Continued from Page One)

farm crops by farmers is a sound business policy. There is enough successful experience to warrant this conclusion.

"Second, the semi-failures and deplorable practices prevailing in many concerns have served to bring about a clearer understanding of what is needed to make cooperative companies efficient business institutions.

Must Correct Weak Spots

"To search out the weak spots and help correct these weaknesses is a part of the business of the I. A. A.," continues Mr. Fox. "The business methods of cooperative companies have been the subject of careful consideration for some time. Many conferences have been held with executive officers and managers of successful companies. The universal conclusion has been that there is need for a business service to cooperatives of Illinois such as we are now establishing."

It will be remembered that Mr. Wicker was a speaker at our last annual meeting upon the subject of cooperative accounting. He will join the I. A. A. about June 1.

CUMBERLAND AND RICHLAND FARMS PAY LESS TAXES

Calculations From Tax Book Figures Show Reductions Due To Farm Bureau Effort

Land-owners of Cumberland county are paying a total of $26,016.61 less 1923 land taxes than they would have paid had the farm bureau secured no reduction in land valuations, according to figures of John C. Watson, director of taxation and statistics for the I. A. A. This is an average of $13.13 for each of the 1982 farms in the county.

And land-owners of Richland county pay $10,514.09 less 1923 taxes, or an average saving of $5.45 for each of the 1930 farms in the county, because the farm bureau dug out facts and figures to show that the assessed valuations of farm lands should be reduced, as they were too high in proportion to the valuations of town and city lots.

Figures from each of these counties were taken from the county tax books and the calculations made in Mr. Watson's office.

In Cumberland

In Cumberland county the total reduction in assessed valuations for lands from 1922 to 1923 was $1,101,556 or 26.3 per cent. The reduction in taxes due solely to reduction in valuations was $66,728.22, which, added to the reduction of $1,054.22 due solely to decrease in tax rates, makes a total of $67,782.44. This was offset by increases in tax rates amounting to $51,070.12, leaving a net actual decrease levied on land of $16,713.32.

However, increases totalling $9,304.29 were made in 1923 over 1922 for certain purposes which, it may fairly be assumed, would have been made if there had been no decrease in valuations, makes a total of $26,016.61, or the total saving on land taxes due to farm bureau activity.

Richland Decrease

The total reduction in the assessed valuations of lands in Richland county from 1922 to 1923 was $512,065 or 16.18 per cent.

The reduction in taxes due solely to reduction in valuations was $21,836.40. A further reduction, due solely to decreases in tax rates, was $4,331.31, making a total reduction for both reasons of $26,167.71. This was offset by increases due solely to increases in tax rates amounting to $18,834.11, leaving a net actual decrease in taxes levied on land of $7,333.60.

However, as in the case of Cumberland county, increases in amounts levied for certain purposes from 1922 to 1923 and which, it may fairly be assumed, would have been made had there been no decrease in valuations, were $3,180.49, making a total reduction in taxes levied as compared with what would have been levied with no reduction in valuations, of $10,514.09.

CALHOUN FRUIT MEETINGS

During the week of April 1, Walton Peteet, co-op marketing authority, and A. B. Leeper of the Illinois Fruit Exchange, addressed a series of five fruit marketing meetings in Calhoun county. A large proportion of the growers attended.

UNIV. OF ILLINOIS LIBRARY
URBANA, ILL.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 2 | May 5, 1924 | Number 9

AUDITING SERVICE PLANS COMPLETED; TO START JULY 1

Formation Now Up To Locals; Service To Be Given By Separate Organization—the "I. A. C. A."

Final arrangements for the new auditing and accounting service which has been in the formation for the past month at the I. A. A. offices have been completed to the extent that the whole proposition will now be laid before some group of farmer-owned cooperatives that they may know all the details and scope of the organization and have a part in the actual formation. Contrary to the previous announcements, the service will not be conducted as a department in the I. A. A., but will be a separate organization under the name of the "Illinois Agricultural Cooperatives Association" with the office of George Wicker, the newly hired accounting expert of the Minnesota state department of agriculture, who will be general manager, occupying a part of the general I. A. A. office at Chicago.

Vernon Vaniman

Mr. Wicker announces that the auditing service will be available July 1. He will be on full time at the I. A. A. office about June 15.

Mr. Vaniman to Assist

Vernon Vaniman of Virden, will conduct the work in the field, meeting with local cooperatives and explaining the service to them. Mr. Vaniman has obtained a leave of absence from the University of Illinois, where he has been assistant state leader in agricultural extension work. He has been secretary of the Virden Grain company since 1909, a farmer-owned elevator with a surplus of $36,000 and paying 10 percent dividends, and vice-president of the Virden Mutual Aid Association, a fire and lightning insurance company. He is now actively engaged in his work in the I. A. A. office at Chicago.

I. A. A. to "Mother" the "I. A. C. A."

The Illinois Agricultural Association will "mother" the new association much the same as it has other organizations which have been established by it. The new association will hold its members on a contract basis and is designed to include all cooperative business organizations. The purpose is to provide facilities for audits and accounting, business advisory service and statistical data. Districts are to be organized with an auditor in each district so traveling expenses will be minimized. Separate groups of cooperatives, like the dairy group, the live stock group or the elevator group, will

(Continued on page 8)

Four-Day Cream Buying in Egypt

A. D. Lynch, director of dairy marketing for the I. A. A., was instrumental toward getting the new four-day cream purchasing plan into effect for farmers living south of the Baltimore and Ohio railroad which cuts across the counties of St. Clair, Clinton, Marion, Clay, Richland and Lawrence. Cream sold every four days in this section of Illinois will receive a premium from the buyers.

Southern Illinois Cotton Producers Plan Pooling Crop

Cotton producers of southern Illinois are planning to sell their cotton cooperatively. A committee, representing the cotton growers met at Mound City, April 22 and elected J. E. Lingenfelter, Lawrenceville, executive committeeman of the I. A. A., as chairman, with E. A. Bierbaum, farm adviser of Pulaski county, as secretary. George E. Metzger, organizer for the I. A. A., met with the committee and is helping with the organization of the cooperative.

It is estimated that southern Illinois will produce around 20,000 bales of cotton this year, an amount too small to pool effectively. However, invitations had been received from both the Missouri and Tennessee state cotton cooperative associations to pool the Illinois cotton with theirs. No final action was taken, but during the next month the committe will investigate cotton organizations, and will be ready to make a final report some time in May.

Kane County Milk Plan Meets Favor In District 10-11

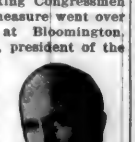
Milk marketing was the center of discussion at the 10th and 11th district meeting at Geneva, April 15. It was expressed by the meeting that the subject of milk marketing is their most important problem, and that it was that the Farm Bureaus of the district take definite steps toward perfecting a more acceptable and unified plan of milk marketing than at present exists in that territory.

The plan for marketing dairy products which was drawn up by E. B. Heaton, under the direction of the I. A. A., and presented to the Kane county men, was brought before the district meeting by Kane county representatives and approved. A resolution was passed asking that the I. A. A. help with the problem of organizing the dairy farmers of the district. The plan is to be known, tentatively, as the "Dairyman's Exchange of Northern Illinois."

Organization under it calls for local, community organization, then expansion into county and district.

THE HAPPY FAMILY

BANKERS AND BUSINESS MEN FAVOR McNARY-HAUGEN BILL AFTER HEARING FARMER'S SIDE



Rousing meetings have been held for the purpose of getting bankers and business men to see the "light" on the McNary-Haugen bill during the last 10 days at Rock Island, Springfield, Danville and Bloomington. That they have seen the "light" is evidenced by the fact that at each one of the meetings, resolutions were passed at the close unqualifiedly favoring the bill and asking Congressmen of Illinois, Indiana, and Iowa, as well as the President of the United States, to work hard for the passage of the measure.

Frank W. Murphy

Discussions and frank objections were voiced in many instances from the floor, but, after the details and principle of the bill had been explained and the questions answered by Frank W. Murphy, farmer and lawyer of Wheaton, Minn., who was the principal speaker at all the meetings, the resolutions were passed unanimously. George N. Peek, president of the Moline Plow Company, spoke at the Danville meeting as did R. A. Cowles, treasurer of the I. A. A. and who has been actively in charge of the arrangements for the series of meetings upon behalf of the I. A. A.

Mr. Cowles broadcasted on the McNary-Haugen bill from WOC, the Davenport radio station. Many thousands of radio fans all over the United States heard "Bob's" voice extol important facts concerning the bill on that occasion. Over 600 farmers, bankers and business men were present at the Rock Island meeting, 300 at Danville, 300 at Springfield and over 1,000 at Bloomington. Enthusiasm was exceptionally strong at Bloomington. Every banker in Logan county was present and other people were there from over 50 miles around. A resolution asking Congressmen to support the measure went over with a bang at Bloomington. S. H. Thompson, president of the I. A. A., spoke effectively at all the meetings. "We are not establishing a precedent," said Mr. Thompson on several occasions, "we are following a precedent. Labor and industry are especially benefitted at the expense of the farmer."

R. A. Cowles

In opening his address at Rock Island, Mr. Murphy said that he farmed, through tenants, about 4,000 acres of land in western Minnesota, but was forced to practice law to help pay the annual deficit which resulted from the operation of his farms. Charging that America is becoming industrialized at the expense of the

(Concluded on page 8)

I. A. A. WINS FIRST SKIRMISH IN FIGHT FOR TAX EQUALITY

Legislative Committee Nails Planks in Both State Party Platforms

Members of the legislative committee of the Illinois Agricultural Association measured, cut, fit and nailed the revenue plank for which the I. A. A. stands into both the Republican and Democratic platforms when the state conventions of those parties were held at Springfield April 18, for the purpose of adopting state platforms. A. C. Everingham, Hutsonville; Frank Barton, Cornell, and H. E. Goembel, Hoopole, are the members of the legislative committee and were assisted materially by President S. H. Thompson. Both parties gave the I. A. A. legislative committee hearty hearings, according to Mr. Everingham.

The I. A. A. principles on the matter of equalization between farm values and intangible properties were presented before both parties. The Republican platform recognized the unfair condition which exists with reference to real estate and other tangible property and favored such action as would equitably distribute the tax burden.

The Democratic platform specifically recommended an amendment to the revenue section of the constitution for the purpose of providing facilities for taxing intangible property that is now escaping taxation.

Adoption of the I. A. A. principles in both party platforms is counted as a valuable victory for the association since it paves the way for the fight for equalization which has been given a strong impetus by the work of John C. Watson, head of the taxation department of the I. A. A.

EXAMINES PHOSPHATE BEDS

J. R. Bent, in charge of the phosphate-limestone department of the I. A. A., has been investigating possible sources of phosphate and endeavoring to arrange satisfactory contracts for County Farm Bureaus with companies in Tennessee and Florida. He reports that all persons who want tests made on fertilizer bought in Tennessee, can have tests made by the branch in Tennessee. Testing will insure quality, he says.

REPORTERS GET STEWART WRONG

C. A. Stewart, head of the livestock marketing department of the I. A. A., met with the Chamber of Commerce at Springfield not long ago and told them of the many difficulties which would be encountered if a packing plant were to be established there. Press reports had it that he said that Springfield could easily have a packing plant operating on a large scale. The reports were incorrect.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, H. C. Butcher, Director.

Entry as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

Chicago Producers Going Strong

Continuing its lead, the Chicago Producers' handled 349 cars of livestock during the week of April 19-25. This was 7.4 per cent of the total receipts for the week at the yards after deducting shipments direct to packers.

—o—

Truth-in-Fabric up 22 Years.

Gray Silver, Washington representative of the A. F. B. F., reports that after 22 years of "hemming" and "hawing" on the Truth-in-Fabric bill, there is now a possibility of its passage. Mr. Silver recently appeared before the House Interstate and Foreign Commerce committee and told why producers and consumers want the bill passed.

—o—

"Equalization Fee" Instead of "Scrip"

The "scrip" feature of the McNary-Haugen bill, which caused so many queries and complaints from various groups throughout the United States, was taken out of the bill by the Committee on Agriculture and a stronger and more definitely conclusive amendment added in its place by a vote of 14-6.

Following is the section of the bill establishing the "equalization fee":

Section 202 (c) "The corporation shall ascertain the standard unit of weight or measure by which each such commodity is commonly sold or traded in, in the terminal markets of the United States, and shall determine the amount to be collected in respect of each sale or other disposition (as defined in section 206) of such unit, as hereinafter provided. Such amount is hereinafter referred to as, the "equalization fee." The corporation shall publish, in each terminal market, the amount of the equalization fee, at the same time and in the same manner as it publishes the ratio price for each basic agricultural commodity."

Receipts to be Given

Receipts are to be given to each producer for the amount which he contributes toward caring for the loss sustained in selling the entire surplus abroad. Following is the clause covering that point:

Section 203: (a) "Whenever a special emergency in respect of any agricultural commodity has been ascertained and proclaimed and until the termination thereof, under section 2, the equalization fee shall be paid, under such regulations as the corporation shall prescribe, by every producer (or the person making the sale on his account) upon every sale or other disposition (as defined in section 206) of such agricultural commodity by or on account of such producer. (b) The corporation may by regulation require the purchaser of any such agricultural commodity to collect such equalization fee from such producer, and may require such purchaser to issue to such producer a receipt therefor, which shall be evidence of the participating interest of the producer in the equalization fund for the commodity. The corporation may, in such case, prepare and issue such receipts and prescribe the terms and conditions thereof——."

—o—

What is the McNary-Haugen Bill?

We find that many people do not understand the McNary-Haugen bill. It is often condemned because it is said to be too complicated. It is not complicated. Read the following explanation of the bill. It tells the whole story simply and clearly. Then write your Congressman and tell him to get busy and help the McNary-Haugen bill become a law. If you have written him once, write again. This is an issue. Will agriculture be recognized or will it be made subservient to industry?

Excepting cotton, the crops of which we produce a surplus for export are selling at less than cost of production to the profound distress of our farm population. Cotton, for the moment in a different case, is usually in the same situation. This results from a fundamental failure in our economic system which can be cured by the principles of the McNary-Haugen bill now before the Congress, and not otherwise.

When there is a surplus of any product, it is elementary economic law that the price of the surplus fixes the price of the whole product. We have to sell our surplus crops abroad, where they come into competition with the crops of other countries operating on standards of cost, price and living very much lower than ours. Our surplus (and hence our whole crop is, therefore, sold at an European price level well below our own. **These crops are the only American products whose domestic price is fixed by world conditions at a level far below that of the home market.**

Industry Is Protected

On the products of industry, the protective tariff keeps out cheap foreign competition and maintains an American plane of prices much above the world level. These are the prices that make the farmer's cost—they are the prices he must pay for all that he buys and a large portion of the population being dependent on agriculture, he buys everything. Herein lies a great injustice. Our tariff makes the farmer buy in a protected market and pay a high American price for all that he buys. The surplus makes him sell his whole crop (of those products of which we export a surplus whether for domestic or foreign consumption) in a free trade market at a world price much lower than the general plane of protected American prices for what he buys.

Before the war this burden was not too heavy because the world level was more nearly the American level. As a result of the war the markets of the world were demoralized and depressed by debt, taxes, and inflated currencies until the spread between the American and the world price planes became so great as to make it no longer possible for our farmer to stand the burden of selling on the basis of an Argentine peasant and buying on the basis of an American citizen. No class of our people should be asked to endure such an inequity. We cannot help it by giving the farmer a higher tariff on export farm products because, since we export more than we import a tariff on export crops would not cure the ill, even if we raised it to the point of complete exclusion. There is only one practicable course and this is proposed by the McNary-Haugen bill.

Bill to Equalize Buying Power

This bill says: "The farmer's export crops ought to have a buying power equal to that which they had before the war, that is, the price of wheat, for instance, ought to bear at least the same ratio to the average general price index of all commodities as it bore before the war." To effect this, the bill gives the farmers a corporation, authorized to go into the American market and buy quantities of such export crops as are selling at less than prewar exchange value until the price rises high enough to bear the pre-war relation to the general price index. Whenever this happens the corporation stops buying and it only buys when, and as long as, the price is below that ratio. When the price is equal to or above that ratio, the corporation does nothing. This insures the pre-war exchange level and permits prices to go freely above that level as far as economic forces will send them.

Of course, it results that the corporation will thus buy up all the supply in excess of domestic demand—which is to say, the surplus at the prewar relation. Its sole function is to skim off this surplus from the domestic market, leaving equality of supply with demand to determine price. There is only one thing to do with this surplus—sell it abroad and at a price less than the price the corporation paid by just so much as the world general price level is less than the American general price level. Who shall stand this loss?

Farmer Himself Stands Loss

The bill charges it back to the farmer by requiring that he accept, as a small fraction of the much increased purchase price vouchsafed by the bill, a few cents in certificates like the "participating certificates" of the cooperatives. It affords a fund to absorb the loss on the surplus and to pay the expenses of the corporation. At the end of the year, when this loss and expense have been accurately determined, the remainder in the fund is returned to the farmer by redeeming the certificates pro rata.

As an example, suppose we raise 850,000,000 bushels of wheat and the domestic demand is 700,000,000 bushels. If the Liverpool price is $1.00 per bushel, the farmer, without the McNary-Haugen bill, gets $850,000,000 for his crop, notwithstanding the fact that a price of wheat in America which would give wheat its pre-war purchasing power would be $1.50 per bushel. At the latter rate the farmer should have gotten $1,275,000,000 and, while he ought not to expect more than the world price for his surplus, he has a right to expect prewar purchasing power for his domestic crop—that is what everybody else gets for what they earn or sell in the domestic market. Exactly this is what the McNary-Haugen bill gives him. For every bushel he sells under that bill, he receives the prewar exchange rate—now about $1.50 per bushel, a small fraction of which is paid in certificates.

How Corporation Functions

The corporation keeps the price to that figure by buying up the surplus at that figure. Of this $1.50 about $1.38 would be in cash—38 per cent more than he now gets—and 12 cents in certificates. But the operation entails a loss to the corporation of 50 cents a bushel on the 150,000,000 bushels sold abroad, amounting to $75,000,000. This loss (about 9 cents per bushel on the whole crop) is paid out of the certificates fund and the other three cents is returned to the farmer by redeeming the certificates. Instead, therefore, of receiving (as he does without the bill) $850,000,000 for his entire crop ($1.00 per bushel) the bill gives him $1,050,000,000 for the portion sold at home (750,000,000 x $1.50) and $150,000,000 (150,000,000 x $1.00) for the portion sold abroad or $1,200,000,000 for his whole crop—$1.41 per bushel as an average price on the whole—an increase of 41 per cent over the price without the bill. **This is all there is to the McNary-Haugen bill.** Exactly the same principles apply to other export commodities, and in executing its functions, the corporation sets up no new mechanism and duplicates no existing facilities. The details of its operation will be more particularly demonstrated in considering the objections that have been suggested.

EVERYBODY ELIGIBLE IN LIARS' CONTEST

Just for fun, the editor is going to start a campaign to see who's the biggest liar amongst the I. A. A. Record readers.

Here's ours for a starter:

A man got on a crowded elevator at the 45th floor and soon after it started, something broke and the elevator began a meteoric plunge for the bottom. Women fainted, strong men screamed and the elevator boy died from fright. The one man who had gotten on at the 45th floor kept his presence of mind. As the car shot downward, ever gaining momentum as it sped toward the bottom past the 30th, 25th, 20th, 10th, and 5th floors, the Irishman be-thought himself as to how to save his life. The thought came as the falling elevator zipped by the 3rd floor at a 50 foot per second rate.

Just as the car struck the cement bottom and plunged the dozen passengers into emaciated oblivion, the Irishman jumped upward with a mighty leap. Being in mid-air when the elevator crushed against the cement bottom, he was not killed. In fact, the only injury he sustained was from striking his forehead on the top of the cage.

Let's see how big a lie you can tell. Send 'em to H. C. Butcher, care of the I. A. A., 608 South Dearborn St., Chicago. The biggest lies will be published.

Mehl Tells of U.S.G.G. Problems in Resignation

Chicago, Illinois, April 17, 1924.

To the Board of Directors,
United States Grain Growers, Inc.

Gentlemen:

"My resignation, effective April 14, was submitted to President Harry L. Keefe, under date of March 28. I am accepting the U. S. Department of Agriculture appointment as Grain Exchange Supervisor. My present purpose is to inform you more fully of my reasons for taking this step and to outline certain impressions I have formed concerning your problems. The latter will be of value mainly as coming from me at a time when my strictly personal interest in these matters has ceased to exist and while certain experience and information are still fresh in my memory.

I need not remind you of the situation existing in the U. S. Grain Growers, Inc., at the time the present directors and officers were drafted to the task of salvaging it. Two major problems confronted us; first, the one of treating with creditors and restoring the organization financially; second, the establishment of grain handling facilities for its members. We were assured that some promise of success in dealing with these two problems would be met with necessary new capital and support by the Farm Bureau Federations of the midwest states.

Debentures Satisfied Most Creditors

On July 2-3, last, representatives of the Midwest Farm Bureaus were presented with a program which did show some promise of success in solving the problems referred to. At least they took action to appropriate $20,000 for the purpose of carrying it into effect, and the U. S. Grain Grower board was instructed to proceed with the program proposed. No part of the $20,000 was ever made available, but the American Farm Bureau Federation, with considerable sacrifice to itself, undertook to maintain our modest office. With this help and about $1,000 received from the Illinois Agricultural Association for printing and incidentals, we proceeded as directed, confident that the appropriations voted by the Midwest Federations would be forthcoming. I do not criticize nor find fault with these federations, but on the contrary shall attempt later herein to justify and explain why the appropriations were not made.

On October 1, there was mailed to U. S. Grain Grower creditors a form of funding debenture having the effect of full legal composition and relieving the corporation from further obligation except as to certain specified sources of future net income. The response by creditors was overwhelmingly one of acceptance. Out of the 800 creditors less than a dozen objected and most of these for reasons which are well known to you and which had no relation to their interests as creditors. Some personal contact work and a limited amount of cash would have brought a 100 per cent acceptance. You will search in vain for a parallel case in the entire history of industrial reorganizations, and for a case in which creditors and members have shown greater patience and faith in ultimate result.

Board of Trade a Barrier

By December 1 our grain sales program was sufficiently far advanced to enable our receiving grain in the Chicago market. A few cars were received during the month and handled to the shippers' entire satisfaction, although the Chicago market was not especially favorable at the time, and we were not yet admitted to Board of Trade representation. Storage and processing facilities had been provided for our members to accommodate several million bushels, and a line of credit procured of a million dollars. Storage was made available to our members at practically one half the regular rates, and we were able to actually handle grain at Chicago in all positions and furnish practically all of the service provided for in members' contracts. Still waiting for the promised funds to be made available, so that we might re-establish contact with members and affiliated elevators in the country, we centered our efforts on securing representation on the Chicago Board of Trade under the provisions of the Grain Futures Act. To this end and as furnishing the necessary financial responsibility to safeguard our shippers we filed with the Chicago Board of Trade a corporate surety bond in the sum of $50,000, guaranteeing the integrity of our contracts, and in addition filed a financing contract whereby our credit and financial responsibility with respect to grain transactions on the Board of Trade were further underwritten to the extent of a million dollars. On this showing and failing to secure any satisfactory answer from the Board of Trade we took our case to the Secretary of Agriculture.

Small Point; Big Objection

The Board of Trade, when pressed to make final answer, took the position that since our creditors had not all accepted the funding debentures the corporation was deemed not to be in a solvent condition, and therefore did not have "adequate financial responsibility" in the sense that this term is used in the Grain Futures Act. This may have been a purely technical objection, for the financing arrangements and bond protection referred to covered fully our responsibility to shippers. Nevertheless, the point was properly raised and the Board of Trade was well within its rights in passing the question to the Secretary of Agriculture and to the courts, if necessary, for adjudication.

The Board of Trade having rested its rejection of the U. S. Grain Growers, Inc., to membership representation on the single objection that the corporation was technically insolvent, we forthwith offered to qualify the U. S. Grain Growers Sales company by the same means provided for the parent organization and showed that the Sales company was unquestionably solvent.

Subsidiary's Recognition Sanctioned

The Sales company, as a pure subsidiary, had all of the essential requirements for representation that did the parent organization, and was free of the one alleged objection to U. S. Grain Growers, Inc. It did not, however, have any considerable cash capital and the result of our negotiations with the Board of Trade, assisted by the Grain Futures Administration, was a proposal from the Board that upon qualifying the Sales company, as suggested, and upon a further showing of $15,000 unimpaired capital, our representation would be granted. We were advised, and I believe the Grain Futures Administration was advised, that this proposal had the approval formally of the board of directors of the Chicago Board of Trade and it was therefore finally and authoritatively sanctioned.

Whether or not the Board of Trade could be forced to accept our original application without the $15,000 of proprietorship capital is not worth while to discuss. The Board of Trade made a proposal which I consider eminently fair and for the cooperatives' own best interests. We of course must recognize that in the cooperatives the Board of Trade sees a menace to the business of certain of its members. It necessarily will look first to protect those who are already members. I have no patience with men who even in this situation find reason for unjustly attacking the exchanges.

Board of Trade Protects Members

Cooperatives must and will rise above this kind of thing if they seek permanent existence. I have at times disagreed with some of you. I have never hesitated to be candid with all of you, and to my way of thinking, the organized grain exchanges of this country, in their legitimate functions, must for a long time yet continue to serve the purpose of show windows wherein is displayed for sale a large part of our surplus grain crops, and where buyer and seller may meet under business customs and trade regulations which insure greatest facility and ease of business conduct. I consider it no less "direct dealing" that a representative of the farmers and a representative of the miller or consumer meet and make their trades in a special market place and exchange hall provided for the purpose.

No Blame on Midwest Farm Bureaus

Reverting to the program approved by the Midwest Farm Bureau Federations last July, I have previously said I find no fault with them for failing to provide the agreed appropriations. A number of deterring factors have entered into this situation and under the circumstances I hardly see how they could have done differently. In the first place, it seems that the U. S. Grain Grower plan of grain marketing, radical though it appeared in the beginning, no longer offers quite the lure and appeal that do other plans featuring more specifically the idea of price control. Sincere friends of the U. S. Grain Growers have said that farmers recently have been promised so many impossible benefits that they will no longer be satisfied with the legitimate fruits of cooperative organization and that it is an inauspicious time for effort along this line. While I do not share that view there is more than a small measure of truth in the suggestion and no doubt the Farm Bureaus have sensed something of the kind as affecting the program of U. S. Grain Grower reconstruction.

Hope in Cooperative Movement

There is much in the cooperative movement as a whole upon which to build hope of a more prosperous and stable agriculture. There is also much in the means by which cooperative marketing is being sold to farmers today that startles and alarms the cooperator of yesterday. He realizes as well as any one, perhaps, that the cooperative idea has never been put up in the attractive package that it deserved. Yet, he can not but wonder what reaction will follow the extravagant claims of some of the more recent converts who have also assumed the role of "Medicine Man" to American agriculture. It is quite certain that to the extent members of cooperative organizations are led to expect impossible results just to that extent will they be disappointed and the cooperative movement as a whole suffer relapse. I do not believe the present board of directors of the U. S. Grain Growers, Inc., will ever have cause to regret their conservatism and refusal to indulge in impossible promises, but it is not improbable that they will find it hard for a time yet to secure enthusiastic support of just an ordinary "hard boiled" business program.

The legitimate fruits of cooperative marketing should be sufficient in themselves to commend the system and encourage its development. No better system of marketing farm products can ever be devised than one which gives the producers themselves control and direction over the machinery of distribution. In this direction and control, however, is contained the whole ment and kernel of cooperative marketing. The machinery of distribution in this country has been built up in much the same way that units of production and specialized functions are introduced and fitted into factory operation to meet expanding needs. It may be necessary at times to change engineers and to replace factory superintendents with men of greater vision and more modern ideas. It is seldom necessary to wreck the factory or even stop the machinery while the change is made.

Managerial Power Not Supreme

In the very nature of things there are certain matters quite beyond the control of managerial power, whether that control be vested in private hands or in a body of producers. Therefore, we cannot expect cooperative marketing to solve certain problems any more than they can be solved by private enterprise. Cooperative marketing will not of itself enable profitable production of a commodity for which there is not an absorbing demand at the profitable price figure. There is no known means of either eliminating the "marginal producer" or of enabling the high cost producer to compete profitably in trade with the low cost producer. In a relative sense these two factors are now and always will be at the bottom of agricultural distress. For cooperative organizations to promise more than the benefits growing in the main out of better methods and standards, increased volume, more orderly distribution and elimination of excessive handling profits, is to flirt with certain failure. I can conceive no more useful work on the part of farm organizations at this time than a carefully planned campaign to educate farmers generally to a true appreciation of the real and legitimate benefits of cooperative effort, in order that they may not be disappointed in failing to receive what they never had a right to expect.

(Signed) J. M. MEHL.

About This Statement—

J. M. Mehl, secretary and acting treasurer of the United States Grain Growers, Inc., resigned from that position recently and has taken a position in the United States Department of Agriculture as Grain Exchange Supervisor. In his statement of resignation presented to the Board of Directors, he gives some pertinent facts about the U. S. Grain Growers which will no doubt interest you. His resignation statement, which is reproduced on this page, is a good analysis of the situation.

J. M. Mehl

Objections and Answers to the McNary-Haugen

Here are the Stock Objections to the Bill

There is opposition to the bill, but it seems to be based in part on insufficient information as to the purpose, principle, and operation of the proposed corporation, and in part, of course, on partisan antipathy or individual interest. It is highly important that each objection be stated fairly, answered fully and thus disposed of.

—1—

"The bill is 'paternalistic,' (or 'communistic,' or 'radical,' or 'politically unsound.')"

This objection is otherwise worded "The government ought not to interfere in business, especially not in favor of any class."

The government has already "interfered" in favor of every other class when it passed the tariff. **By that act it insured an American price higher than the world price to every class in America except the producers of export crops.**

A condition now arrives, due to world depression and the consequent multiplied spread between American and other prices when the burden thus pressed upon the farmer, of paying a high protected price for what he buys and accepting a free trade world price for what he sells, becomes too heavy to bear without bankruptcy because it forces him to sell at a loss. The McNary-Haugen bill simply removes this burden and erases this inequity. **It does not favor the farmer.** It merely brings him to equality of favor with the remainder of the population. **It does not favor, it abolishes disfavor** and puts him on an equal plane with industry.

The Tariff wall had two great breaches. It did not stop the inflow of cheap labor and therefore did not protect labor. We have cured that by immigration restriction. It did not protect the farmer on export crops. We must now cure that by the McNary-Haugen bill.

This bill should be regarded simply as an amendment to the Hamilton Doctrine of protection rendered necessary by a violently distorted world condition.

Perhaps the Tariff is paternalistic but, having afforded this kind of protection to two-thirds of our people, at the expense of the other third, what kind of good faith is it to refuse exactly the same protection to the other third on the pleas of "individualism?" Who has the cynical audacity to say that what is the sound foundation rock of our economic policy for industrial New England is communism for Iowa? Are we repentant of the "political unsoundness" of the tariff and the immigration restriction? The pious penance is to repeal them. It is certainly not to segregate their rich benefit to two-thirds of the population and then flaunt "economic orthodoxy" as a reason for refusing them to the other one-third. Such is not piety. It is scurvy hypocricy. We are not repentant. We adhere to our belief in the principle of protection. But so to adhere we cannot apply it to industry and deny it to agriculture — certainly not on the argument of anti-paternalism. That would add larceny to hypocricy and neither can long endure as a national policy.

By this bill the government does not "interfere in business". It permits a corporation to combine farm products for export sale just as the Edge and the Webb-Pomerene bills now permit industry so to combine. The "Government" itself does nothing but give the corporation a start. It creates no new governmental bureau or department. It simply permits a great agricultural corporation, organized in the only way it can be organized, to go into the market and buy and sell, thus correcting an insufferable condition. But the corporation creates no new mechanism. It utilizes existing agencies for manufacture, storage, transportation, purchases and sales. It operates merely as would an individual buying and selling in the exchanges. The farmer's agents (officers of the corporation) act for him and at his expense—not at government expense—in precisely the same way the officials of an industrial corporation act for its stockholders. The government as such does nothing. The farmer pays every cent of expense and bears every risk of loss. He asks neither favor nor funds of anyone, except the original capital of the corporation which will be returned intact to the Treasury of the United States at the expiration of the emergency.

—2—

"Economic ills cannot be solved by Legislative remedy."

This is almost ridiculous. Legislative enactments affecting commerce are nearly all economic phenomena. If it was an economic ill that America, before protection, was simply a reservoir of raw material, the doctrine of protection, expressed as a legislative remedy cured that ill. If it was an economic ill that hordes of aliens incapable of absorption threatened our labor market after the war, legislative enactment cured that ill. If it was an economic ill that the states under the Articles of Confederation could not exist as a Federal unit, the Commerce clause of the Constitution and the myriad statutes enacted under it stand as refutation of the objection. As has been repeatedly stated herein the McNary-Haugen bill seeks no new invasion of the economic field; it proposes only a restoration of a nice balance between agriculture and industry which has been shattered by many prior invasions—the tariff, the Adamson law, the Esch-Cummins Act, the restriction of immigration, etc., etc.

Such platitudes are unworthy of consideration unless their application to the matter in controversy be shown and there is no application of this creaking fallacy to the point in question here.

—3—

"The proposed increase in price will in turn raise the general price index. This will automatically raise the price of the product. This will again raise the general index and so on. The bill starts a vicious circle of price raising until the cost of living will gradually rise to infinity."

The slightest examination will show that this terrifying objection is without foundation in practice, though it has actually been seriously argued by men otherwise reputed for unusual intelligence. Consider wheat as an example.

A rise of 20 points in the wheat index raises the general price index 1 point. Considering an example in which the figures are taken for convenience of computation, we shall suppose that the wheat index and the general price index both stand at 100. The bill passes and raises the wheat index to 150. This would raise the general index 2.5 to 102.5. This would raise the wheat price again to 153.75 which in turn would raise the general price index but only a very small amount this time—.1875 points or to 102.6875. Up goes the wheat index but only by .28125 on this calculation, which in turn raises the general price index **an amount so small that it would not be considered**—.0140 or to 102.7015. On the next calculation the increment in the general price index would be only .00105 and since only two decimal points are computed the terrifying process is at an end. The argument is scholastic—"how many angels can stand on a needle's point." If one cared to carry on these silly calculations, he would find that, whereas restoration of wheat to its pre-war exchange value would raise the general price index 2.5 points, ten thousand subsequent calculations made on this nonsensical argument would not raise it another half point and every subsequent calculation would carry the increment another decimal point nearer zero. In other words, the increment rapidly becomes infinitesimal and would be disregarded in practice on the second calculation when it becomes less than one-fifth of one per cent.

But in order to get a view of the **morals** of all these arguments, suppose it were literally true that **restoration of fair exchange value** to agriculture would raise the cost of living substantially. Pre-war exchange value means only cost plus a very small profit or no profit at all. Present prices mean a loss to the farmer on the average of every pound and bushel sold. Argument for maintenance of the present condition is simply argument for taking the farmer's crop away without paying cost for it—"justified" in this case by a desire to keep the cost of living down. Nearly every one of these arguments stoops to a similar motive. **The McNary-Haugen bill will pass not only because it is sound and right but because the opposition to it is immoral, unsound and wrong.**

—4—

"The bill is a price fixing measure and the whole history of economics stands as an argument against such 'valorization.'"

"Price fixing" is the attempt to prescribe prices by an arbitrary exercise of human discretion. It is palpably unsound because the discretion that "fixed" price has no power over the elements that make price. Nothing could be farther from this definition than the McNary-Haugen bill. It is the exact antithesis of price fixing. The essence of the bill **is not** the clause **limiting** by a definition of price relationship, the power of the corporation to go into the market and buy. The essence is the power to buy. If the power in the latter clause were not limited in some very powerful and effective way, the corporation could continue to buy until the domestic price rises to $5.00 a bushel. It would sell about the same surplus at $1.00 a bushel and raise the farmers' income to fantastical figures. The price clause is not a grant of power. It is a limitation of power. Its purpose is not to **"raise** prices to an artificial level." It is to maintain them at an equitable level.

The bill merely says to the farmer "We recognize that you are not getting a square deal. We will give you a square deal. You can go into the market and buy till you get a square deal—and not one instant longer. The measure of a square deal is a domestic price for your product equal to its pre-war purchasing power. Purchasing power changes constantly in precise relation with the general price index. Therefore you can keep on buying, at any time, until the price of your product bears the same relation to the general price index at such time as it bore before the war." Thus far you may go and no further.

So there is no price **fixing.** There is only limitation of power. Even that is not a fixed limitation and it is as far removed from human discretion as it would be possible to remove it. The general price index fluctuates constantly with the condition of business in the country and the limit of the power to buy fluctuates with it in mathematical accuracy. Since no man or combination of men can control or affect the fluctuation of that index, no man can control or affect the limit of that power.

Since there is nothing remotely resembling price fixing in the bill, all the anti-price fixing arguments must be dismissed as wholly inapplicable.

—5—

"The increased price will promptly make matters worse by increasing production."

The effect of increased production to reduce price will be far more certain and emphatic than it is now. The hold-back in participation certificates (scrip) will be directly proportioned to the surplus, will be known and will be the most significant warning against inflated production that could be well imagined.

The pre-war price relationship produced the pre-war acreage. Only that relationship is proposed. Logically only that acreage will ensue and, because we have a considerably increased population since then, at least that acreage should be maintained. And if the argument be "Even so; let them keep the pre-war acreage but do not restore the pre-war price relation" (and it is only to this that the argument can reduce) then it is a bold, bald argument in favor of depriving agriculture of all profit—an argument immoral, unworthy and unutterable.

There will be no increased production, but to show how shallow is the argument, suppose there were. Who is hurt? Not the American people, for, no matter how great the surplus, the price will not on that account rise above the pre-war relationship. Under the bill it will never fall **below.** The only person who is interested in the harmful effect of increased production is the farmer. He and he alone stands the loss on surplus.

The whole argument of increased production due to the McNary-Haugen bill is a scarecrow.

—6—

"It is bad precedent. If we do this for farmers we will be called upon to do it for others."

The precedent was established when we enacted the tariff and other economic legislation which omitted the farmer from protection. The bill merely rectifies the omission. It is not a precedent. It is a sequel. It is not even the first sequel. The immigration law gave labor its protection but left agriculture still out in the blasts of a wintry world. So far as we now know, this is the last breach in the protective wall. It is a breach that must be closed—not in favor of agriculture but in favor of the whole nation, and in common justice to the farmer.

But even if there were other classes equally prejudiced (which there are not) is a precedent of simple justice something to be avoided?

Not long ago industry asked the right to combine for export trade. It was granted instantly. It has long been the custom for industries to sell in export at less than the domestic price. Agriculture seeks no greater or different privilege. The precedents are all behind us. There is no other class in like case with agriculture. The McNary-Haugen bill closes the last gap in our protective outworks.

—7—

"The bill will prevent hedging or future trading by millers and grain men."

The ratio price is a minimum price—not a maximum price. Any miller making a future contract to sell flour; any grain man with an eye to future delivery, will have the same incentive in principle as he now has to protect against future price fluctuation, either up or down. Certainly he will have the same facilities and opportunities to do so. It may be true that the latitude of future fluctuation will be less ample than that of the past, but why should any miller or grain dealer do otherwise than applaud? The professional speculator and the gambler might complain. This should give agriculture and legitimate business no concern.

—8—

"The bill will destroy the country elevator."

The country grain buyer is interested in handling as much grain as he can at a margin that includes his handling costs and profit. That opportunity is not restricted or changed by the McNary-Haugen bill. The language of the proposed law requires the corporation to utilize existing agencies in its operations. The plan outlined can neither replace nor tend to destroy the country elevators which perform a useful service in our present grain marketing system.

—9—

"The bill requires a ponderous mechanism, very expensive and administratively unworkable."

The bill confers power to accomplish its purpose. Is there anything unworkable in commissioning existing grain or cotton or meat or milling companies to buy the exportable surplus? Is there anything unworkable in commissioning the same or others to sell to export the quantity of the products thus purchased? Individual operators do this daily—single handed and alone. That is all there is to the operation. It involves no mechanism and incurs much less expense than that now incurred many times over in the repeated commissions reaped on speculative sales. It duplicates no facilities and interferes with nobody's business. The objection is a make-weight, signifying nothing.

Bill Which Farm Bureau Members Should Know

—10—

"Cooperative marketing will cure the ills."

Cooperative marketing will help but cannot cure the condition. A cooperative, handling a commodity consumed in the domestic market can affect price, but not with full effect with a surplus product. Even if it were possible to herd all of the skeptical, the recalcitrant, and the obtuse, among 6,000,000 farmers into one great wheat, corn, cotton, swine, or cattle cooperative, and it is utterly impossible to do this in time to do any good, still that great cooperative could produce but little effect on the terminal price of an export crop unless it had precisely the facilities and powers conferred on the proposed corporation by the McNary-Haugen bill. It would not do so because it would not be able to address the cause.

The cause is the surplus, the distressed world, and the Tariff. It is an extraneous thing. It cannot be reached by effort here less than the segregation of the surplus from the domestic market.

The bill does not oppose cooperation; it fosters, encourages, and makes cooperation possible. It interferes not at all with the benefits derived from cooperation. By just so much as the cooperatives can secure more equitable grading, reduce the cost of domestic distribution, shorten the road from farm to market, can they save for the producer portions of the difference between farm price and terminal price. But without this bill such is the limit of their power. They can do the things above mentioned, bill or no bill. But they can do them far better with the bill than without it and if, during the five years of the bill's emergency existence as a law, they attain to a sufficient unity of purpose and quality of efficiency, they can take over the corporation and live happily ever afterward.

—11—

"Diversified farming will cure these ills."

Our trouble is the surplus product and it applies not to wheat alone, or corn alone, or cotton alone, but to any and all. There are vast areas available only for wheat farming. It is a Barmecide feast to proffer the farmers of these areas "diversified farming."

Diversified farming means "Raise more cattle, corn, swine, eggs, poultry and butter fat." The consumptive capacity of the country for these things is not cosmic. It is being supplied now. Some astute observers believe that a crisis is not far off in each of these products. It is already upon the producers of corn, cattle and swine. If the 20% of the wheat acreage could and would turn to these other products, what would happen? We should have precisely the same situation with the other products that we now have with wheat.

To the extent that the market demands a product at a profitable price, natural laws will supply that product. The moment we produce in excess of the normal demand for that product we destroy the profit thereof. There is no profit in any of the commodities suggested for increased production by the advocates of diversification which indicates that the total supply on the domestic market should be much increased. It could not be increased without destroying profit. Therefore conversion from one to another of these crops will result merely in a shifting of the field of loss and distress.

There is much murky thinking on this subject and to say that diversification offers the slightest help to this grievous situation addressed by the McNary-Haugen bill is either inane or immoral depending on the information of the person saying it. Diversification is a wise counsel for the individual. It is simply the old admonition about not putting all eggs in one basket. But it is nothing more and **it has no application whatever to the basic economic problem addressed by this bill.**

—12—

"We will cure the ills by lending the farmer money."

All the projects to finance the stricken agricultural districts can not cure the farmers' ills. He owes too much to the rural banks, his suppliers, and for taxes to his state and county. What will it advantage him to change his creditor and extend his time when he sees no profit out of which to pay and no future save a deeper debt? What the farmer must have is **an equalized price for his product,** not a change in the person of his creditor.

All this is obvious. What is the purpose of the suggestion? It can hardly be other than an attempt to still his clamor by a deferment of his most persistent present annoyance—and mortgaging of his future. The only help that can be held out in this project is that he can stay on his land hoping for some change for the better. But, if the only possible solution of his problem is elimination of the surplus and the only methods of elimination are starvation of this acreage or segregation of surplus, how does it help the case to lend money to perpetuate the acreage? It does not and cannot do so. The argument that he can stay, diversify, and live, has been shown to be unsound. Whether so intended or not, the project to extend credit is only a soporific to soften his political protest. It is no remedy because, far from eradicating the cause of the difficulty, it simply aggravates and prolongs it.

—13—

"Decrease of expense and cost—not increase in price is the remedy. The farmer must get back to the sturdy self-denying existence of his grandfather. Let him give up his movies, automobiles, radios, phonographs, electric lights, and other fancy contrivances. He can live."

The world moves on. The farmer has not nearly so many of the conveniences of modern living as the common laborer, the clerk or the city dweller in any walk of life. But he has some and of course he has infinitely more than his grandfather. We shall have no more luck in creating a peasant class on our farms than we had in creating a submerged class in our labor. The benefits of the industrial age in America are very great and we have preserved them by the tariff, restriction of immigration, and other "legislative enactments." Restoration of fair exchange value to the farmer will not do one iota of harm to any other class in the country. It will do great good to all. It will restore to the market a great block of buyers who have long been out of it—purchasers of all these things which go to make life convenient and progressively easier. This will give increased employment and profit to every other class and improve the general prosperity.

Frugality in the farmer is necessary and desirable. **Denial to the farmer of a modest share of the conveniences of our constantly improving national life is not only neither necessary nor desirable—it is impossible.**

—14—

"Let the situation alone. It is very bad but it will cure itself."

This is the Manchester doctrine of **Laissez faire.** It is sound in its economics. The situation will cure itself by the immutable law of compensation. **"Laissez faire"** does not, however, follow as a conclusion. Smallpox becomes innocuous to a race if left alone. That is no argument against vaccination. Let us see how the situation could be cured or cure itself. It is due to a combination of two causes: the tariff, raising the American price level above the world price level on all the farmer buys, the surplus, importing the world price level into America for the farmer alone on every crop producing a surplus. Therefore, the cures are these—

I Free Trade — give the farmer world prices for what he buys as well as for what he sells.

II Curing the demoralization of the world and thus raising world prices to the American plane.

III Elimination of surplus by
- (a) Its destruction as such.
- (b) Its consumption at home by a 20% increase in population.
- (c) Its segregation as proposed by the bill.
- (d) Its avoidance by abandonment of acreage.

There are no other ways save these or the combination of two or more of them. Free trade may be dismissed. No matter how ardent a theoretical free trader might be, he would not, being an equally ardent American, favor a sudden throwing down of the dykes and letting in on our guarded domestic structure the existing depression of a world in chaos—an influx of goods representing the hollow-eyed labor of gaunt Europe, entailing the sudden destruction of American living standards. He would not—at this perilous juncture—toss away, for a beautiful theory, the relatively happy state of our whole people. Even the bankrupt farmer — his home threatened and the savings of his life already absorbed—does not ask this.

The most bloodless Manchesterian would not counsel the farmer to wait till the world is restored to something approaching normal prosperity. The causes of its depression are too deep—too menacing of further depression. We can omit to consider as a counsel of value, the voice that tells the farmer "Wait till the world is restored to pre-war prosperity."

Nor would anyone dare suggest that we burn our surplus or sink it in the seas—not in the presence of the hungry mouths that wail across the world. We are hardly ready to espouse such sabotage on a scale so vast.

It is quite true that the time is well within sight when we shall consume our entire farm surplus at home. At the present rate of increase of population, decreased fertility, soil erosion, and considering the fact that we are already near the limit of practicable productive acreage, that time is perhaps not more than fifteen years in the future. But they would be Job's comforters who would sit down at the farmer's barren board and attempt to console him with the thought that all will be well in fifteen years.

Now, the "Laissez faireians" mean that the situation will cure itself much quicker than in any way yet discussed, by the abandonment of, for example, some 20% of our wheat acreage. It is a pretty theory. It will take, say five years of continued depression, to beat down the sturdy resistance and the grim struggle of owners and tenants of the wheat and corn lands to preserve their homes and the remnants of their forutnes. In five years perhaps only 80% of the fittest will have survived and the surplus will have been starved out. The "fittest" does not refer to the most efficient workers. It refers to the most efficient areas—those nearest to markets and most facile. The wrecked homesteads, and deserted villages, the ruined fortupes and the scattered families proposed by opponents of the bill, will not result at once. Five years at least will be required. This breed does not quit in the face of adversity. It sticks. Then we shall have to give further years while the indicator needle of domestic demand shivers nervously and begins the upward swing which will restore tenants to those abandoned lands and so on for five further years, up to the limit of our productive power when we shall either begin to import these products or widen our own borders.

Is this a counsel of sanity? Build up—destroy—build up—in alternating periods of half-decades? Is it not better to use an emergency measure to preserve? For what will happen in these five years of destruction? Are our people a race of yellow-faced economists who will respect this scientific reasoning with stoical indifference behind their horn-rimmed glasses? They are not. They are freckle-necked, hairy chested fighters. Such powerful forces can crush them but not as one could press the life out of a sick kitten. They will press back. There is a social and political bearing in this economic problem.

We know what repercussion, precisely this situation, once did bring to the nation. It brought the bloodiest civil war in the history of the world. Beginning with the South Carolina eruption of nullification, exactly this same subsidy of northern industry, by the tariff, and at the expense of the export-producing agricultural South—exactly this was the economic cause of the civil war and economic causes are the only real causes of modern war. Would it now result in red revolt? Perhaps not, simply because it is not sufficiently sectional and more because we have learned the greater effect of more peaceful means. But it will result in something far more objectionable than the McNary-Haugen bill. It is resulting so. We have here an intrinsic inequity—an immoral policy, a great subversive cause bearing bitterly down on one of the sturdiest and most independent segments of our population. That segment is becoming highly articulate. If its grievances receive no mercy at the hands of the sacred two-party system of our political structure, it knows the power of another way and it can, should, and will use that power ruthlessly against oppression. It has tasted the savor of "Bloc" control. Washington is being invaded by strange, new faces and voices that compel attention if not delight. A general election is upon us, and, dependent **solely** on immediate relief of this oppression,—hangs the quality of the next congress and the policy of the next administration. Our business structure would do well to give ear to a measure economically and politically sound or it may give sections of its smoking flesh to measures which are not so.

There is no argument against the McNary-Haugen Bill which can be said to go to its merits. There are only grievances. These grievances are not for wrongs done or threatened. They are for inequitable privileges, accustomed franchises of subsidy and exploitation, now felt to be threatened. They are protests against the cleansing of an unjust condition. They cannot prevail because they have no right to prevail and no man can advocate them without miring himself in a morass of deceits, inconsistencies and evasions.

"Laissez faire" may be the answer to a proposal to interfere with the working of a natural law in a normal status. But when natural law has already been interfered with by the interposition of arificial controls, such as the tariff, and these artifices create subsidies, oppressions and rank injustice, "Laissez faire" of the resulting condition is a counsel of dissolution. We can either abolish the old interference entirely, or we can amend its evil. But we cannot leave it alone. We are dealing with an American public of the twentieth century and not with a French proletariat of the early eighteenth.

If we are to retain the doctrine of protection (and we are) there is only one practicable way to restore justice and that is to segregate the surplus, sell it abroad and regulate supply to demand on the domestic market. Such is the McNary-Haugen Bill.

—15—

"It is improper that farm prices should be made by the prices of other things. They should be made by cost of production plus a profit."

The price of every commodity is made by "the price of 'other things." That is the essence of the law of barter, the law of trade, the law of supply and demand. The price of a thing is merely the measure of its value in terms of the things for which it is exchanged. The McNary-Haugen Bill did not make this law. God made it. But as far as export farm products is concerned, man amended the Law or at least changed the scene of its operation from Chicago, New York and New Orleans, to Manchester, Liverpool, Havre, Hamburg, Rotterdam and Genoa.

The price of every other American commodity is made by the price of "other things" in Manchester, Liverpool, and other foreign markets where these "other things" are on a price level just as much lower than

Work for the McNary-Haugen Bill--Write Now!

Every Day Brings More Supporters--Help Push!

the American level as the war-shattered world outside our three-mile limit is lower than our fenced and guarded condition within.

The McNary-Haugen Bill merely brings the outcast farmer home and permits the price of his product to be made by the price of "other things" in America.

—16—

"Millers and packers will not manufacture for export if they have to pay a higher price for wheat or swine than their foreign competitors."

This is simply a misconception of the bill. Flour or pork for export are as much a part of the exportable surplus of wheat and swine as the raw material. The bill recognizes this and provides for it. The Corporation will absorb the difference between the domestic and the export price of wheat and swine purchased on the domestic market and sold as flour or pork on the markets of the world.

—17—

"Participation certificates (scrip) would increase our circulating media and thus inflate the currency."

Participation certificates constitute the obligation of the Corporation to pay residue of the amounts withheld by it against loss and expense. As commercial paper it will increase circulating media to the exact extent that the commercial paper of any corporation does so — less rather than more, because, technically, it is not even "negotiable paper". It is ridiculous—mere childish prattle,—to say that it will "inflate the currency". Relatively this issue of commercial paper is insignificant compared with the negotiable paper emitted by industrial corporations of like size.

—18—

"While the bill appears to apply to a variety of products it is really intended to apply only to wheat—not to cotton because the price is above pre-war exchange value—not to wool because we import nearly half our consumption, nor to animal products because it could not so apply without putting the government into the packing business nor to corn because it is exported principally as animal products. Commodities other than wheat are included only for political purposes to stay the opposition of their producers."

The bill applies to no product except when, and as long as, its price falls below the pre-war exchange value. When that happens to a product the bill applies. It would not apply to cotton today because the boll-weevil and a temporary shortage of supply have increased the price. There have been plenty of times in the past when it would have applied. The lack of such a measure once caused Civil War. It is true that the bill would probably never have application to wool because we import wool and can protect that price by a tariff. The assertion that it will not apply to meat products is astounding. Its application is relatively easy and has no effect to put the corporation into the slaughtering and packing of meat. Its application to corn will be both direct and indirect through its effect on swine.

These products are not included for political purposes. The bill means exactly what it says.

—19—

"Foreign nations will construe the McNary-Haugen Bill as 'dumping' and will retaliate."

Here is another objection which deserves an answer only in deference to the very high authority who voices it. Not one ounce greater surplus will reach the shores of other lands than is now the case. Nor will the price abroad be one cent lower. From without no one will be able to know by their own experience that the bill has passed. It prevents the price of the surplus from depressing the price of domestic consumption but it leaves every foreign nation precisely where it was before. Foreign nations can hardly retaliate because the American farmer gets an American price for the portion of his crop consumed in America. The objection is without merit.

Within the last few days Secretary Hoover has complained of pooled operations by foreign nations affecting our Domestic prices and has recommended legislative action to cure it. It is surely a lesser thing to take legislative action to prevent our own method of selling from depressing our Domestic price of agricultural products.

—20—

"The Bill is unconstitutional."

This is a smoke screen. Exhaustive analyses conducted by legal counsel of more than one branch or Department of the government have not discovered one clause in the bill upon which a substantial claim of unconstitutionality can be based. Their conclusions have been single and emphatic on the constitutionality of the bill.

SUMMARY

Such is the nature of the objections to the bill. All will be found to analyze to the theme of those stated which may be fairly regarded as comprehensive of the entire case of the opposition voiced by its ablest advocates. Not one of them goes to the fundamental basis of the bill. Not one contests the economic analysis on which it proceeds. They are apprehensions rather than deductions, epithets rather than arguments, statements of grievances rather than of wrongs. They oppose a great constructive measure addressing a fundamental fault in our economic system and pointing the way at a critical cross-roads in the development of our national policy. For this purpose they seem wholly inadequate, inconsequential, almost frivolous, and it is worthy of emphatic remark that none attempts to consider the effect of enactment of the bill. That speculation is worthy of a thought.

For nearly four years our economic progress has been clogged by the depression of our agriculture. No wide constructive movement in Commerce and industry has been possible against the resistance of that leaden drag. Each forward acceleration has come to a swift and mysterious stop before it could fairly enter its stride. Confidence in any business future more remote than a few months has been conspicuous by its absence. The cause is perfectly obvious. With almost every other circumstance favorable, it goes without saying, that the integral unit of this nation cannot move forward with its basic segment in a ruinous condition. Through this great gap in our protective barriers we have been invaded by the European malady and our progress has been frustrated.

The McNary-Haugen bill would cure this fault almost instantly. Not only would it bring the agricultural segment of our structure promptly abreast of our industry, it would preserve and keep it there. Never again (if during the period covered by the bill the farmers' cooperatives perfect their own marketing mechanism) need we apprehend a shattering of our economic balance in this grave regard. Fundamental prices will forever fluctuate but there will be no paralyzing disproportions in these movements. **The whole structure will move up and down in harmony and unison.** The entire pattern will be stabilized and rendered homogeneous. It makes no great difference whether prices be high or low so long as they are fairly related one to another and the bill will tend to make and keep them so.

Its immediate effect will be to raise the price of wheat nearly one-third and the price of corn and live stock in somewhat lesser proportion but to an equally just relationship. The result in terms of immediate general prosperity need hardly be dwelt upon. It is obvious. 1924 would be a year of wonders in our economic annals and business could look to a sound and equable future with a confidence it has never dared to indulge since the fearful eruption of 1914.

2,200 ENLIGHTENED HEARERS ADVOCATE IMMEDIATE ACTION

Resolutions Drafted At I. A. A. Farmer-Banker-Business Man Meetings Have Firm Meaning

Here is the sentiment of over 2,200 farmers, bankers and business men, representing Illinois and parts of eastern Iowa and western Indiana, who have heard the facts concerning the McNary-Haugen bill. Each one of the resolutions was passed after objections had been raised from the floor and answered by the speakers. That a great deal of opposition to the bill is founded on lack of knowledge concerning the facts, becomes apparent when one considers these resolutions.

Rock Island

At a general meeting of over six hundred farmers, business men, and bankers from Eastern Iowa and Western Illinois, held at Rock Island, Illinois, this twenty-fourth day of April, 1924, the following resolution was adopted:

WHEREAS: There is now before the Congress a bill known as the McNary-Haugen Bill, contemplating immediate relief for agriculture in its broadest sense, and

WHEREAS: It is the sense of this meeting that this is the only measure now before the Congress which will bring about the necessary result, i. e., that of raising the purchasing power of our basic food products to a parity with that of those products which the farmers must buy;

NOW THEREFORE, be it resolved that the Representatives in both houses of Congress, from Illinois and Iowa, be urged immediately to give this measure their active support and cooperation with a view of making this bill a law during the present session of Congress.

BE IT FURTHER RESOLVED, That a copy of this resolution be sent to each member of Congress and to the President of the United States.

Danville

At a joint meeting of Farmers, Bankers, Business and Professional men from Eastern Illinois and Western Indiana, held this 26th day of April, 1924, in Danville, Illinois, the following Resolutions were adopted:

WHEREAS: Basic agricultural commodities such as wheat, corn, hogs and cattle are normally produced by our farmers in volume over and above the domestic needs of this country, and

WHEREAS: The existence of such surpluses, that must ultimately find outlet in the world markets move in trade only on a basis of unprotected world's price, and

WHEREAS: Such price thereby obtains for the whole of the commodity as well as for the surplus, in conformity to economic law, and

WHEREAS: The costs of production to our farmers are highly protected by "legislative enactments" such as the Transportation Act, the Adamson law, Restriction of immigration, the Tariff and other acts, and

WHEREAS: Such "legislative enactments" compel the farmer to produce at high protected costs, and the surpluses of such commodities compels him to sell in a demoralized unprotected world's market or upon such basis the whole of the commodity at correspondingly low prices, and

WHEREAS, a Bill for an Act known as the McNary-Haugen Bill, now before our Congress, is designed to restore to Agriculture equality with Industry and Labor, by skimming off such surplus, selling it in the world's market on that basis; so that the bulk of the commodity moving in domestic trade, according to domestic needs, may sell at a domestic protected price, and

WHEREAS, the Committees on Agriculture and Forestry from the respective houses of Congress have now favorably reported out of Committee this Bill, after extraordinary consideration and deliberation,

THEREFORE BE IT RESOLVED: By this meeting assembled this 26th day of April, 1924, in the city of Danville, Illinois, that we urge upon our Congressmen representing the great state of Illinois at our national Capitol, the immediate need of working for and securing the passage of the McNary-Haugen Bill, and

BE IT FURTHER RESOLVED, That a copy of this Resolution be placed in the hands of our President of the United States and that additional copies thereof be forwarded to our Congressmen from Illinois and Indiana.

Springfield

At a general meeting of over three hundred farmers, business men, and bankers from Central Illinois, held at Springfield, Illinois, on the 25th day of April, 1924, the following resolution was adopted:

WHEREAS: Agriculture is today and has been ever since 1919 sorely distressed, and

WHEREAS: Such distress is directly traceable to the fact that those basic agricultural commodities of which surpluses normally are produced are exchanging in trade for commodities and services required by agriculture at a great disparity, and

WHEREAS: There is now before Congress a measure known as the McNary-Haugen Bill, designed to segregate such surpluses from our domestic market—selling such volume in the world market as we do not exchange in trade in our domestic market on a parity with the commodities and services required by agriculture, restoring to agriculture an equality with industry and labor;

THEREFORE, be it resolved that we endorse the principles as embodied in the McNary-Haugen bill, now reported out of committee, and

BE IT FURTHER RESOLVED, that we urge our members in Congress to work for and secure the enactment into law of this bill at the earliest possible opportunity, and

BE IT FURTHER RESOLVED, that a copy of these resolutions be placed in the hands of the president and every member of Congress from Illinois.

Bloomington

WHEREAS, a grave national emergency exists due to the inequality of values as between farm products and other necessities of life, made possible by conditions which enable the price of farm commodities to be fixed by the comparatively small exportable surplus;

AND WHEREAS, the establishment of permanent business prosperity is dependent upon a restoration of equality in commodity values;

AND WHEREAS, a bill known as the McNary-Haugen bill, has been introduced in Congress, which has for its purpose the restoration of equality of values on a pre-war basis, and which gives reasonable promise to accomplish that result;

THEREFORE BE IT RESOLVED, that we endorse the principles as embodied in the McNary-Haugen bill, now reported out of the Committee, and,

BE IT FURTHER RESOLVED, that we urge our representatives in Congress and the President of the United States to work for and secure its enactment into law at the earliest possible opportunity, and,

BE IT FURTHER RESOLVED, that a copy of these resolutions be placed in the hands of the President and every member of Congress from Illinois.

Many Indorse Bill

Among the men of high finance and big business endorsing the McNary-Haugen bill are the following:

John R. Mitchell, former member of the federal reserve board, and president of the Capital National bank of St. Paul.

Louis W. Hill, chairman of the board of the Great Northern railway.

Ralph Budd, president of the Great Northern.

George Donnelly, president of the Northern Pacific.

Howard Elliott, chairman of the Northern Pacific board.

Bernard Baruch, New York financier.

Otto Kahn, New York financier.

A. F. Wood, president of the University of Maryland.

Dr. Coffin, president of the University of Minnesota.

Eastern Interests and Industrialists Oppose It

ORGANIZING CREAM COOPERATIVE WITH T. B. COWS BARRED

Prophetstown Farm Leaders To Get 100 Signers On I. A. A. Plan; Lynch Shaping By-laws

Cream producers living near Prophetstown are planning to form what will be known as the "Prophetstown Cooperative Creamery Association" and decided, at their meeting in Prophetstown April 25 and 26, to get a minimum of 100 signers for their association agreement by Aug. 1 before final action is taken.

An organization committee was appointed which consists of the following: M. F. Bane, chairman; J. B. Moser, secretary-treasurer; F. M. La Due, W. H. Lamont, H. B. Lyon, and Henry Stewart, all in Prophetstown township. Farmers will be solicited from Whiteside, Henry and Bureau counties. Plans were laid for handling eggs and poultry in connection with the cream cooperative.

Allow T.B.—Free Cattle Only

Requirements for membership in the association state that only men with tuberculosis-free cows can join. According to A. D. Lynch, director of dairy marketing for the I. A. A., who is drawing up their association agreement and by-laws, this is the first organization in the state to set up this requirement for membership.

According to Farm Adviser "Dad" Wise of Whiteside county, Prophetstown township has more farm bureau members than any other one township in the state. There are 176 members representing 90 per cent of the farmers and landowners.

Quasey Trying To Equalize Rates On Molasses and Corn

In an effort to secure an equalization of freight rates between Cuban black strap molasses and corn, L. J. Quasey, head of the transportation department of the Illinois Agricultural Association, met with a joint railroad committee in Chicago last week, and, with their complainants, endeavored to show the disadvantage of corn.

The need for an equalization in this instance, says Mr. Quasey, is that Cuban molasses comes to New Orleans, and through the exceptionally low freight rates on that commodity from New Orleans to distilleries throughout the middle west, places corn at a disadvantage. Molasses and corn are both being used by distillers for manufacturing wood alcohol, a product which has a thousand uses. With the present freight rates, distillers can afford to pay only 33 cents per bushel for corn, thus cutting corn out of a large market. A lower freight rate on corn or an equalization of rates would place corn on a parity with Cuban molasses. By enlarging the demand for the cheaper grades of corn used by distillers, corn demand in general will be increased.

HOLD SCHOOL FOR LEADERS

A school of instruction for Farm Bureau community leaders was held at Bushnell, April 18. An all day session of round-table talks on community leadership resulted in considerable interchange of experience, according to G. E. Metzger, director of the organization department of the I. A. A., who spoke on "What a Community Organization Will Do."

21st District Talks Grain Marketing, Schools and Serum

At a meeting of the Farm Bureau directors and voting delegates of the 21st district, at Hillsboro, April 24, grain marketing was the center of attraction with Farm Adviser I. A. Madden of Sangamon county leading the discussion. It was brought out by Mr. Madden that although there has been considerable ups and downs to various cooperative grain marketing organizations, the sentiment of farmers is crystallizing, but is not unified on any one plan.

If the McNary-Haugen bill passes, it was brought out, cooperative grain marketing will need to be approached from a different angle than now because the surplus will be taken off the market. In case it does not pass, however, it was said by Mr. Madden that it would still be necessary for farmers to take care of their own surplus and to develop a system whereby the surplus may be controlled.

Want School Funds Investigated

Another point of discussion was that of the relation of rural districts and the distributive funds for schools, led by Wm. Acree of Montgomery county and E. W. Rush of Macoupin county. It was pointed out that in practically every school district, there is more money sent out to distributive school funds by rural communities than was returned. Likewise, it was said, cities pay less money to the distributive fund, but get more back than they put in. Suggestions were made that the I. A. A. investigate this angle in its survey of Illinois schools.

Much Serum Used

Progress reports on the serum projects of each of the counties represented, Sangamon, Christian, Macoupin and Montgomery, were presented showing a large amount of serum bought and used by counties in the 21st district. A. E. Satterlee, Roundtree township, Montgomery county, led a discussion on Farm Bureau community organizations saying that they could be bettered by a diversified program which would interest all the folks, and one with plenty of "spice," he pointed out.

George E. Metzger, director of the organization department of the I. A. A., talked on "How Best to Sell the Farm Bureau." George A. Fox, executive secretary of the I. A. A., was also present.

Stewart Likes New Calf Grading Plan

"It is extremely gratifying to note the success with which the Chicago Producers' is meeting in its new method of handling calves," says C. A. Stewart, head of the livestock marketing department of the I. A. A. It is simply the application of the method which has been found most efficient and economical in handling cooperative shipments of hogs at terminal markets—that of handling hogs in as large units as possible.

"It is unfortunate," says Mr. Stewart, "for the general trade that the Chicago market recognizes only two grades of calves, which penalizes the owner whose calves are just a trifle lacking in finish and quality. Under the new system of the Chicago Producers' the intermediate grades are recognized to the same extent as the better grades."

FARMERS TAKE 1,000 TONS LIMESTONE

One thousand tons of limestone have been ordered by farmers in the vicinity of Liberty, Adams county, according to Farm Adviser Ray E. Miller. The question which now confronts them is how to get a crusher.

McLEANERS FROLIC AND FEAST

Two hundred and fifty live farm bureau people in McLean county who rent space and sell farm produce in the McLean County Farm Bureau building at Bloomington have time for social affairs as well as for work. They put on a spread in the hall above their market place recently that would make one's mouth water, then helped digest the food by being entertained by local talent and personality rubs of the pious and near-pious members.

Egg Buyers Favor Graded Basis Idea

Meetings of egg buyers have been held at Quincy, Peoria and Champaign by F. A. Gougler, in charge of egg marketing for the I. A. A., for the purpose of acquainting them with, and determining their reaction to, the buying of eggs on a graded basis. At each of these meetings, according to Mr. Gougler, the egg buyers voted unanimously to buy on a graded basis. In each case they decided to begin purchasing on this basis immediately.

"The basis is of two grades," says Mr. Gougler. "The 'firsts' are fresh, clean, unwashed, free of cracks or checks and of uniform size weighing not less than 24 ounces to the dozen. 'Seconds' are dirty and uneven, weighing less than 24 ounces."

At these meetings, it was voted to pay a differential of not less than five cents between firsts and seconds. Mr. Gougler visits many buyers who assemble eggs and says that, generally, those who have been buying on the graded basis are highly pleased with it.

SCOTT AND MORGAN TEST

Since Scott and Morgan counties have signed up for the area tuberculosis testing, the total number of counties doing testing has been raised to 48, according to M. H. Petersen, special representative of the I. A. A. on tuberculosis eradication.

Lynch Helps Ogle County Dairymen Start Sales Co-op

In Ogle county, a committee of 12 farmers is working to get enough signers for a dairy marketing cooperative so they may enjoy the higher price of seven and eight cents per pound butterfat which is received by their Jo Daviess neighbors who have a cooperative organization. The Commercial Club of Polo became interested in the difference in price between the two rather closely connected counties and its specially appointed committee recommended cooperative marketing for Ogle county.

At a joint meeting of the Commercial Club and farmers, it was heartily decided to organize a cream selling cooperative along the plan suggested by A. D. Lynch, of the Illinois Agricultural Association, who was at their meeting.

The Chamber of Commerce committee reported that, if the farmers of Ogle county cooperated advantageously, prices would be more favorable, there would be more money in the community, land values would have more of a tendency to start upward, more legumes would be raised because of the better dairying conditions, and, last, but most important of all, a brotherhood of farmers would become existent in Ogle county that would later cooperate on many kinds of farm projects.

FEDERATED HAS GOOD YEAR

O. E. Bradfute, president of the A. F. B. F., and Gray Silver, Washington representative of the A. F. B. F., were elected to the board of directors of the Federated Fruit and Vegetable Growers at the close of its first year's business at a meeting held in Chicago, April 24 and 25. Reports showed that 33,510 carloads of fruit and vegetables—over 669 trainloads of 50 cars to the train—were handled by the Federated last year. A. O. Eckert of the Illinois Fruit Exchange was re-elected to the board of directors.

Mr. Buyer--Meet Mr. Seller; Plan of Dairymen's "Mixer"

Every time the sun goes down on Illinois, 58 more tuberculin-reacting cows bite the dust. Approximately 1,000 dairy cattle are being tested in Illinois every day, of which an average of 58 head react and consequently meet their "Waterloo."

M. H. Petersen

With 58 cows returning to the Creator every day in Illinois, it immediately becomes apparent that Illinois dairy farmers must refill their dairy barns with other cattle, tuberculin free, if they are to keep in the milk production game—and it's milk and cream that has been paying the Illinois farmer most consistently these last two or three years, according to M. H. Peterson, head of the tuberculosis eradication department of the I. A. A. Illinois now has the largest tuberculosis eradication program of any state in the Union so far as the number of counties doing area testing are concerned, Mr. Peterson points out, and the work is growing each month with the demand for clean cattle increasing rapidly.

Replacement a Problem

Now, according to Mr. Peterson, comes the problem of refilling the bovine ranks. Fifteen hundred cattle are brought by Illinois farmers from outside the state every month, and 1,400 of these come from Wisconsin alone. Many, many times, the unsuspecting Illinois farmer buys some dairy cows from outside the state through a cattle agent only to find that his mill producers have been "plugged," that is, filled so full of tuberculosis germs that when a few more are added in making the regulation tuberculin test for importation into Illinois, there is no apparent reaction. "Plugging," according to Mr. Peterson, is as effective in the dairy cattle game as printed-to-order Scotch labels are to professional bootleggers.

"And," says Mr. Peterson, "it's the agents that usually cause the trouble and generally do the 'plugging.' The farmers of Wisconsin are just as honest as those of Illinois. What we need is closer contact between the sellers of Wisconsin and the buyers of Illinois. When a farmer buys his own cattle himself, he very seldom gets stung. Let the farmers of Illinois know more

A. D. Lynch

(Continued on page 8)

PLAN EXHIBIT TO PORTRAY PROGRESS, IDEALS OF I. A. A.

Twenty Six Counties to Cooperate and Put on Exhibit Worthy of Farm Bureaus

Letters have been sent by Secretary Fox to all farm advisers in Illinois asking for their consideration of the proposition that the Illinois Agricultural Association put on a worth-while, permanent exhibit of some extent to be shown at the Illinois Products Exposition, Chicago; the Illinois State fair; the Kankakee District fair and the International Live Stock Exposition.

It is planned to present a panorama of the ideals personified by the farm bureau. The exhibit is to be 40 feet long, 10 deep and 8 high. A painting 40 feet long and five feet wide would form the background, according to the plans to date, upon which would be portrayed a road leading through a farm bureau community and indicating the progress made in that community over a period of years. On a horizontal space, probably five or six feet deep, in front of the painting, would be reproduced in miniature such things as a cooperative creamery, elevators, farm life and a general portrayal of what the farm bureau brings to a community. Then, according to the plan under consideration, there will be an endless belt moving, in front of the horizontal space, so arranged that 26 county farm bureaus can have a graphic, moving exhibit of their own to display to thousands their most important accomplishments.

Thousands Would See It

The exhibit would be a show window for the Illinois Agricultural Association; according to its present scope, and would be seen by thousands of people. The plan, if put across, would mean an exhibit that when once seen, would be remembered.

The ratification of the plan and the furnishing of part of the money for its execution will be taken up at the next executive committee meeting, according to George A. Fox. The 26 county farm bureaus which would have a part in the exhibit are being asked to pay $100 each toward the cost of making, transporting and caretaking of the exhibit.

Franklin County Favors Bill; Plan Mutual Insurance

The Franklin County Farm Bureau, through its executive committee, went on record as being strongly in favor of the McNary-Haugen bill and notified their Congressman of the action taken. They also took action against the proposed increase in parcel post rates. The committeemen present were: H. H. Webb, Matt House, E. J. Davis, C. J. Ketteman, J. R. Kelly and D. M. Parkhill. The Farm Bureau members present were: J. S. Webb, J. A. Freeman, Ed Karnes, G. W. Ketteman and W. W. Gunter. Insurance to the extent of $55,000 has been vouched for by 39 Farm Bureau members who are starting a Farmers Mutual Fire Insurance Company in Franklin county. H. A. De Werff is Farm Adviser.

The "long distance" record for requests was established last week when a banker from Tampa, Florida, wrote for the "Record."

17th District Commends Thompson; Flays Rainey

Representatives of the 17th Congressional district, which includes the counties of Woodford, Livingston, Ford, Logan and McLean, met at the McLean County Farm Bureau building in Bloomington, April 23 with a good delegation even though field work was in progress. Frank Barton of Cornell, executive committeeman of the I. A. A. from this district, took a prominent part in the meeting explaining many points over which controversy arose.

George J. Stoll, president of the Logan County Farm Bureau was elected chairman for the day. Succeeding meetings are to be conducted by the other presidents of the districts in order. J. H. Checkley, farm adviser of Logan county, acted as secretary.

Letters Express Sentiment

Among many matters considered, the most outstanding action of the day was the drafting and adoption of three letters—one to Congressman Rainey making it plain that the 17th district representatives were unqualifiedly behind their president, S. H. Thompson; one to Mr. Thompson commending his work for the I. A. A. and of the work being done by the association itself; and one to Congressman Frank H. Funk thanking him for his expressed intention to vote for the McNary-Haugen bill. The letters to Mr. Rainey and Mr. Thompson follow:

Bloomington, Ill.
April 23, 1924.

Hon. Henry T. Rainey,
House of Representatives,
Washington, D. C.
Dear Mr. Rainey:

We note that in your controversy with President S. H. Thompson of the Illinois Agricultural Association over the merits of the McNary-Haugen bill that you are indulging in personalities and criticism of such a character as to suggest that your opposition to this matter is not altogether an impersonal one.

With reference to President Thompson's conduct in this matter we wish to make plain that he is merely carrying out one of the many duties of his office and functioning as an energetic and able executive should.

As active farmer members of the farm bureaus of the 17th district we wish to inform you that President Thompson has our whole hearted support and that your remarks will fail to destroy confidence in him or the organization he represents.

Very truly yours,
Farm Bureaus of the 17th District.

Bloomington, Ill.
April 23, 1924.

Pres. S. H. Thompson,
Illinois Agricultural Association,
608 South Dearborn Street,
Chicago, Illinois.
Dear Mr. Thompson:

We have noted in the farm press extracts from a vicious attack made upon you by Congressman Rainey of the 20th district, in which he insinuates that the Illinois Agricultural Association and you in particular are guilty of extravagance in the expenditure of funds entrusted to you.

We believe this criticism is the outgrowth of unreasoning anger on the part of Mr. Rainey induced by your able and aggressive support of the McNary-Haugen bill; and we are pleased to express herewith our whole hearted support of your action in this matter and pledge our encouragement and cooperation in the furtherance of the same.

Very truly yours,
Farm Bureaus of the 17th District.

Lincoln Fine for Picnic

Discussion of the I. A. A. state picnic which is to be at Lincoln August 26 brought out from Mr. Checkley and others from Logan county that Lincoln has fine facilities for a large picnic of this kind and that several thousand people can be cared for on their picnic grounds with good camping facilities.

Discussion was taken up of the work being done by each of the departments of the I. A. A. It was pointed out that the Department of Information should send copies of the I. A. A. Record to all the Chambers of Commerce in Illinois. A resolution was presented by P. E. Johnston, farm adviser for Woodford county, that endorsed the plan of refunding 10 cents per ton on limestone to the County Farm Bureaus. One of the delegates brought out for discussion the attitude that Farm Bureaus should take in regard to the teaching of agriculture in grade and high schools. Although no action was taken on this point, all who commented on it were favorable to such instruction and believed that Farm Bureaus should encourage and aid this instruction as much as possible.

Favor McNary-Haugen Bill

Frank Barton led a discussion on the McNary-Haugen bill and said that, in his opinion, the bill would pass if brought to a vote. The bill was endorsed by those assembled. The next meeting is to be the last week of June, according to the program committee, and George Wicker, new head of the auditing and accounting service, will be asked to talk on cooperation lines.

Farm Advisers present were: P. E. Johnston, Woodford; H. O. Allison Livingston; C. E. Hopkins, associate adviser, Livingston; George Swaim, Ford; J. H. Checkley, Logan; and Harrison Fahrnopf, McLean. Delegates and presidents present were: Woodford—J. Ira Powell, Louis Powell, James Haas, F. W. Ostler, A. C. Jones, George Wermeman, Conrad DuBois and William Beer; Livingston—F. D. Barton, executive committeeman for 17th district, William Aspen, Frank Reeves, Charles Patterson, Carl Barton and Louis Beeman; Logan—George Stoll, Edgar Sisson and D. C. Scheckler; McLean—H. C. Dixon, John Kinsinger, A. O. Convis, Allen McIntyre, John Scholl, Fred Armstrong, H. E. Hilpert, Albert Rengel, O. W. Fuller, E. D. Lawrence and Homer R. Johnson. Vernon Vaniman, who is in charge of the field organization for the new auditing and accounting service established by the I. A. A., attended and spoke briefly and H. C. Butcher, director of the department of information of the I. A. A. was also present.

BREEDERS' CONGRESS PLANNED IN I. A. A.

(Continued from page 7)

dairymen of Wisconsin and we will have cleaner, better cattle in Illinois."

Cattle Agents Without Ethics

So, quite largely, according to Mr. Peterson and Mr. Lynch, the latter being the head of the dairy marketing department of the I. A. A., the matter of buying dairy cattle from strangers becomes a matter of faith. Faith and ethics are closely linked, they say, and especially in the dairy cattle game. To build up ethics and faith between the seller of dairy cattle and the buyer, they have proposed, in the name of the Illinois Agricultural Association, that there be a "Breeders' Congress" at the next National Dairy Show, which is to be held at Milwaukee, September 27 to October 4.

Plans Breeders' Congress

According to the two progenitors of the idea, dairymen from all the states which are in need of dairy cattle, such as Illinois, Iowa, Kansas, Nebraska, North and South Dakota, Ohio, Missouri and Indiana, would gather at the National Dairy Show next fall, meet the sellers of the cattle from Wisconsin and other states, talk over their problems, go on excursions to visit dairy farms in Wisconsin and hear a good program of speakers during the days of the "Breeders' Congress." W. E. Skinner, general manager of the National Dairy Show, thinks it's a good idea, and plans are now being laid whereby representatives from all the states interested can meet soon and get the first annual "Breeders' Congress" under way. Special trains of Pullmans could carry and house whole county farm bureaus and more dairy knowledge could be obtained by the participants than could be preached by exposition in a century, Mr. Lynch points out.

HERE'S ANSWER TO PERPETUAL KNOCKER; MORE LIKE IT, TOO

Taxation Work Has Brought Laurels To I. A. A. and Saved Money For Farmers

There is quoted below an editorial from the "Champaign County Farm Bureau," the news sheet of Champaign county of which C. C. Burns is farm adviser. In it there is a point which is well worth the consideration of every farm bureau member. That the Illinois Agricultural Association is paying dividends to its members, both directly and indirectly, is a bona fide fact. This is but one of many instances which can be quoted. The editorial follows:

The Farm Bureau Never Did Anything!

Here is a statement that will raise you several inches off your seat, due to the taxation work taken up by the Farm Bureau and the Illinois Agricultural Association in Champaign County.

Land Valuation

In 1922	$30,986,425
In 1923	25,354,505
Difference	$ 5,631,920

While this reduction in land was being secured you and your representatives in the county raised the county rate in Champaign County 35c and the state rate was raised 7.7c. Think what you would have had to pay with this increase, if the Farm Bureau had not reduced the land valuation $5,631,920.

We just worked this out this morning at the Court House at Urbana with Mr. John Watson, statistician expert of the I. A. A.

G. C. Williams of Condit said that his land tax alone was $60.00 less this year than last, due to the reduction on his 200 acres of land.

Some of these fellows that have been talking against the Farm Bureau get quite aggressive once in a while. It is about time that Farm Bureau members begin to defend their own organization. In fact, it might be well to use a few aggressive tactics in return.

MURPHY HITS HARD FOR McNARY BILL

(Continued from page 1)

farmer and that farmers as a class have developed an orgy of borrowing money. Mr. Murphy made it a point that agriculture is being held subservient to industry and labor with the same as a ball and chain around both ankles.

Farmer Sells at Prices Offered Him

"Let us start by considering the present status of agriculture," said Mr. Murphy in beginning his address. "The farmer of today must sell his products at prices offered him. He must pay for what he uses in his business practices, prices that are asked of him. He has no alternative but to sell for what is bid and buy at prices demanded. He has to deliver substantially two loads of almost every product of the average farm for what he secured with one load of his products in 1913. The exchange value of his products is but about 50 percent of the prewar values.

"Let us then analyze the subject further and determine why it is that the farmers' products will only purchase one-half of what they did 10 years ago. On the whole, the farmers of America are receiving as high a level of prices as they did in 1913. His price is not, when considered in respect to normal conditions, depressed. The answer to this disparity in price is found in the fact that the price of the things the farmer purchases has increased approximately 100 percent. It is a case of the inflation of the products of labor and industry.

What Causes This Disparity?

"It then becomes important to ascertain what has happened in the affairs of the nation that has increased the prices of fuel, building material, machinery, clothing and the like which the farmer purchases to carry on his business and to exist. We find our answer to this question in the protective system which the nation has consented to in such legislation as the Adamson law, the restriction of immigration, the tariff law, the Federal Reserve Board, the Esch-Cummins Act and other paternalistic legislation. These laws have given great disadvantages to the farmer.

"Labor and industry can and do pass laws on all increased prices and costs, but when the farmer purchases, he cannot pass on increased costs and is compelled to absorb the losses out of his business—which is shown by the tremendous increases in mortgages and other indebtedness of the American farmer. He cannot pass the buck. Under the existing law-made economic system, the farmer is powerless to help himself and the basic industry is facing a complete collapse.

Extend Protective System to Farmer

"Either the protective system must be extended under the McNary-Haugen bill or we will have a peasantry on the farms of this country. The farmer is not seeking to tear down the existing protective system, but asks that the same consideration be shown to him by the enactment of the McNary-Haugen bill. The protective system has taken away his purchasing power and he asks that it be restored to him by law. He does not ask for favor, but he does insist that disfavor be abolished. He wants an even break.

"This nation cannot afford to bankrupt and destroy its basic industry through the industrialization of the country. It is important that we continue as an agricultural nation. It is possible and necessary that both agriculture and industry be given the same opportunities. We cannot proceed as a nation 35 percent slaves and 65 percent free."

In answering a question after his address, he said that the scrip clause had been removed by committee amendment and that the provisions of the bill now called for the issuance of receipts in place of scrip which is, he said, better than the scrip idea.

AUDITING SERVICE PLANS COMPLETED

(Continued from page 1)

receive a more-or-less uniform service with special auditors for each group, but so systematized that an auditor will be shifted from district to district periodically. The control will be in the membership.

To Furnish Complete Audits

"Every effort will be made," says Mr. Wicker, "to build up a reliable, efficient service on a cost of service basis. The auditing service of the Illinois Agricultural Cooperative Association will differ from that service rendered by commercial auditing companies in that our auditors will stay in an office until all the facts are known. Many commercial audits are based upon a time limit or a salary limit, which can, in turn, be set by the manager of the local cooperative. Audits made by this organization will be thorough. The fact that a local cooperative belongs to the "I. A. C. A." will mean, in time, that its books are in good condition and that the organization is sound. It will be an iron-clad guarantee of protection to farmers."

Members of the committee which formulated the final plans are as follows: George A. Fox, executive secretary of the I. A. A.; Vernon Vaniman, Virden; George Wicker, St. Paul, Minn.; George E. Frazer, consulting accountant of the I. A. A.; I. A. Madden, farm adviser of Sangamon county; William A. McNeill, manager of a local cooperative elevator at Chandlerville, and A. R. Wright, executive committeeman for the I. A. A. from Congressional district 16.

FIND FACTS BEFORE BOOSTING RATES ON FARMER SAYS I. A. A.

Quasey Shows that New Does Not Sanction Proposed Raise in His Own Department

Opposition to the proposed raise in parcel post rates now in Congress is being voiced strenuously by the Illinois Agricultural Association through L. J. Quasey, head of the transportation department.

Mr. Quasey received information which states that Postmaster-General New has made it plain that "no such increases as are carried in the bills now before your committee are warranted." The letter in which this statement was made was sent by Mr. New to the chairman of the Congressional Committee which was considering the proposed raise in rates. Mr. Quasey is of the opinion that the Postmaster-General knows more about the needs of his business than any Congressmen who have not his close contact.

These bills, the Paige and Edge-Kelly, provide for extensive increases in the rates on fourth class matter and on parcel post, and it is particularly these two classifications in which the farmer is vitally interested.

"Several years ago," says Mr. Quasey, "an appropriation was made for the study of the cost of carrying various classes of mail. Extensive data has been gathered and it will be several months before the report is completed. If conditions require an increase in the revenue, any action contemplating any changes in the present postal rates should be held in abeyance until the report of the committee that investigated the cost of the mail service is available.

"It appears," continues Mr. Quasey, "that there is a strong effort on the part of friends and proponents of these bills to pass them without considering the data collected by the especially appointed committee. We urge that, if you have not already done so, to communicate with your respective congressmen and representatives voicing your opposition to these measures."

Radio Fans Have Chance To Hear A. C. Everingham

A. C. Everingham of Hutsonville, who has done good work for the I. A. A. as a member of the legislative committee, delivered a series of radio lectures from the Sears-Roebuck Agricultural Foundation during the past week. Mr. Everingham speaks extensively at farmers' institutes and has been on the Chautauqua platform several seasons.

MISS MARY G. BURWASH, LIBRARIAN,
COLLEGE OF AGRICULTURE,
UNIVERSITY OF ILLINOIS,
URBANA, ILL.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 2 | May 20, 1924 | Number 10

EARLY RETURNS FROM PETITIONS INDICATE OVER 50,000 MARK

Large Number of Signers to McNary-Haugen Petition Suprising in View of Spring Rush

Results of the state-wide petition-sign-up for the McNary-Haugen bill had not been tabulated completely when the RECORD went to press, but reports already in and tabulated show that 22,727 persons signed the petitions in 18 counties. Many of the reports indicate that from 90 to 99.5 percent of the people asked to sign actually signed, indicating a strong desire on the part of Illinois voters for the McNary-Haugen bill and refuting the recent published statements in Chicago newspapers that the bill is a "dead issue" in Illinois.

Frank D. Barton

Frank D. Barton, chairman of the I. A. A. legislative committee, spent considerable time and energy in directing and checking up on the state-wide sign-up spending one week of busy farm time in the I. A. A. office at Chicago. Following is a list of the counties tabulated to date:

Woodford, 713; DeKalb, 2300; Whiteside, 2051; Christian, 1568; Kendall, 1901; Kankakee, 368; Logan, 1348; Sangamon, 3260; Macon, 598; Piatt, 837; Monroe, 725; DeWitt 359; Iroquois, 781; Menard, 564; Livingston, 355; Ogle, 498; St. Clair, 513; McLean, 3988; Total 22,727.

Only One-fourth Tabulated

With over three-fourths of the counties yet to report and over 22,000 signatures received already, it appears that the original mark of 50,000 will be surpassed easily. However, a great deal of difficulty was experienced by those who got the signatures in the counties as it meant dropping urgent farm work and driving about the country interviewing farmers busily at work seeding corn.

It is thought that Sam H. Thompson, president of the I. A. A., will take the petitions to Washington and deliver them personally to President Coolidge. That the great number of names will have an influence on Illinois Congressmen in Washington is a foregone conclusion.

All Classes Sign

Examination of any bunch of petitions from any county reveals that all classes of people signed for the McNary-Haugen bill. Farmers were represented in the greatest percentage, but doctors, lawyers, assessors, ministers, bankers, laborers, plumbers, hardware dealers, garage men and what-not signed, thus expressing their belief that the McNary-Haugen bill will do them some good as well as for the farmer.

COWLES REPORTS PROGRESS

Following is a telegram from R. A. Cowles who is representing the I. A. A. at Washington, D. C., in behalf of the McNary-Haugen bill, which gives the progress of the bill up to the time the RECORD went to press:

"Got rule today from committee so that bill may come before house for debate Friday morning (May 16). Will be debated Friday, Saturday and Tuesday or may possibly not come up before Tuesday (May 20), beginning three-day debate then. Bill gaining supporters and progress may be reported.

R. A. Cowles.

I. A. A. Acts Quick To Stop Possible T. B. Hindrance

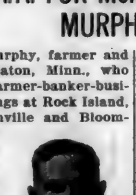
John W. Novak and Dr. Peter P. Duket, co-partners in the Duket-Novak Stock Farm of Lake county, Illinois, have filed suit against the Department of Agriculture of Illinois in the Sangamon county circuit court at Springfield for a writ of mandamus claiming that the department has not lawfully complied with their request for a permit to buy tuberculin re-acting cattle and take them to their 250-acre Lake county farm, there to be treated with a newly formulated tuberculin treatment, which, Dr. Duket claims, makes a cow which has previously reacted to the regulation tuberculin test so free from the disease that she can easily pass the government meat requirements.

The case came up May 12, and was deferred until the week following, according to M. H. Petersen, tuberculosis eradication expert for the Illinois Agricultural Association. Both Mr. Petersen and Donald Kirkpatrick, law counsel for the I. A. A., are attending the hearings.

In their petition, Dr. Duket and Mr. Novak say that they are desirous of carrying on upon their farm and elsewhere as they may choose the business of purchasing and maintaining under legal quarantine reacting cattle and treating them for re-sale for their own profit.

Both the Illinois Agricultural Association and the Chicago Live Stock Exchange are backing the Illinois Department of Agriculture in its stand.

Shelby County Advertises



The Shelby County Farm Bureau is doing a little direct advertising. It has had blotters printed with the names of the county president and the executive committee. It also says: "The only farmers' organization trying to protect and advance the interests of the farmer. Are you a member?" The blotters have been distributed freely over the county.

EYES THAT SEE NOT—EARS THAT HEAR NOT

CHICAGO COMMERCE MEN ASK I.A.A. FOR McNARY DETAILS; MURPHY DEBATES DR. BOYLE

Frank W. Murphy, farmer and lawyer of Wheaton, Minn., who addressed the farmer-banker-business man meetings at Rock Island, Springfield, Danville and Bloomington, was called upon to explain the McNary - Haugen bill to the Chamber of Commerce at Chicago at that organization's 5th district conference. Mr. Murphy defended the bill in behalf of the I. A. A. against Dr. J. E. Boyle, professor of rural economy of Cornell University, Ithaca, N. Y., who took the negative orthodox professorial viewpoint. No action was taken by the Chamber of Commerce, this being an "Informative Conference," as they term it.

Dr. James E. Boyle

Mr. Murphy gives this late information on the McNary-Haugen bill:

"It was decided that the bill should come up for consideration in the House either Thursday, May 15, or on Tuesday, May 20," said Mr. Murphy. "In all probability the McNary-Haugen bill will be brought up on the fifteenth. It is especially significant that this action should have been taken in view of the misinformation that has gone out through newspaper dispatches to the effect that the members of the House were unwilling to bring the bill up for consideration until the President has definitely stated his position in respect to it.

No Expression from Coolidge

"It is probably true that a number of the republican House members have expressed a wish that they might have information from the White House as to the view of the President respecting the bill, but there has been no stand taken to the effect that the bill would not be brought up until the President definitely stated his position. Many members of the House and Senate are in daily communication with the President concerning agricultural relief and we are convinced that the President is seriously concerned about the situation of agriculture and is determined that suitable relief shall be provided by this session of Congress.

Julius Barnes Leads Opposition

"The opposition to the bill is traceable to Julius Barnes and his friends and the Boards of Trade. The opposition is entirely obstructive, without merit, and immoral. It lacks conscience; it offers no remedy for farm relief. This opposition is very prominent here in Washington, and we have no hesitancy in attributing to the opposition much of the misinformation that has been given out concerning the status of the bill and the prospects of its enactment. No one has suggested any other plan for agricultural relief. It is true that some cooperative marketing bills have come forward, but they are not intended to provide equal-

(Continued on page 4)

LAY DEFINITE PLANS FOR SCHOOL SURVEY; WILLETT EMPLOYED

I. A. A. to Cooperate with State Educational Committee in Interchange of School Facts

Plans for the investigation of school problems are now quite definitely laid. George W. Willett, who is principal of the Lyons Township High School at La Grange, as previously announced, has been secured to head up the work. It is planned by the Education Committee of the I. A. A. that there shall be full cooperation between the Illinois Agricultural Association survey and the State Educational Committee in the exchange of facts obtained. A survey of the state is to be made to determine, as fully as possible, the attitude of the farmers with reference to important educational problems, such as consolidation, revenue relationship, enlargement and unification of administration.

George W. Willett

Cooperate with State Educational Committee

It is planned to work in close cooperation with the I. A. A. taxation department in so far as the school problems are connected with tax matters.

"It is apparent," points out J. L. Whisnand, of Charleston, chairman of the educational committee in outlining the survey, "that the closest relationship and cooperation should here exist because the solution of some of the most important school problems is dependent upon revenue measures. In addition, information is to be obtained from other states regarding school laws, school government and the best systems used there to thus determine the relative efficiency of our school systems. A survey of rural school problems is to be made from the standpoint of the rural school teachers and county superintendents. In addition, full publicity will be given to the facts obtained." A. C. Everingham of Hutsonville and E. W. Rusk of Carlinville are the other members of the committee.

Willett to Have Charge

George W. Willett will have charge of the investigations during the summer vacation and will be assisted by a field man who has not yet been appointed. It is expected that a large proportion of the survey will have been completed and summarized by late fall.

J. L. Whisnand, Charleston, executive committeman from the 19th district, announces that the next district meeting will be at Champaign, June 14.

17th District Commends Thompson; Flays Rainey

Representatives of the 17th Congressional district, which includes the counties of Woodford, Livingston, Ford, Logan and McLean, met at the McLean County Farm Bureau building in Bloomington, April 23 with a good delegation even though field work was in progress. Frank Barton of Cornell, executive committeeman of the I. A. A. from this district, took a prominent part in the meeting explaining many points over which controversy arose.

George J. Stoll, president of the Logan County Farm Bureau was elected chairman for the day. Succeeding meetings are to be conducted by the other presidents of the districts in order. J. H. Checkley, farm adviser of Logan county, acted as secretary.

Letters Express Sentiment

Among many matters considered, the most outstanding action of the day was the drafting and adoption of three letters—one to Congressman Rainey making it plain that the 17th district representatives were unqualifiedly behind their president, S. H. Thompson; one to Mr. Thompson commending his work for the I. A. A. and of the work being done by the association itself; and one to Congressman Frank H. Funk thanking him for his expressed intention to vote for the McNary-Haugen bill. The letters to Mr. Rainey and Mr. Thompson follow:

Bloomington, Ill.
April 23, 1924.

Hon. Henry T. Rainey,
House of Representatives,
Washington, D. C.
Dear Mr. Rainey:

We note that in your controversy with President S. H. Thompson of the Illinois Agricultural Association over the merits of the McNary-Haugen bill that you are indulging in personalities and criticism of such a character as to suggest that your opposition to this matter is not altogether an impersonal one.

With reference to President Thompson's conduct in this matter we wish to make plain that he is merely carrying out one of the many duties of his office and functioning as an energetic and able executive should.

As active farmer members of the farm bureaus of the 17th district we wish to inform you that President Thompson has our whole hearted support and that your remarks will fail to destroy confidence in him or the organization he represents.

Very truly yours,
Farm Bureaus of the 17th District.

Bloomington, Ill.
April 23, 1924.

Pres. S. H. Thompson,
Illinois Agricultural Association,
608 South Dearborn Street,
Chicago, Illinois.
Dear Mr. Thompson:

We have noted in the farm press extracts from a vicious attack made upon you by Congressman Rainey of the 20th district, in which he insinuates that the Illinois Agricultural Association and you in particular are guilty of extravagance in the expenditure of funds entrusted to you.

We believe this criticism is the outgrowth of unreasoning anger on the part of Mr. Rainey induced by your able and aggressive support of the McNary-Haugen bill; and we are pleased to express herewith our whole hearted support of your action in this matter and pledge our encouragement and cooperation in the furtherance of the same.

Very truly yours,
Farm Bureaus of the 17th District.

Lincoln Fine for Picnic

Discussion of the I. A. A. state picnic which is to be at Lincoln August 26 brought out from Mr. Checkley and others from Logan county that Lincoln has fine facilities for a large picnic of this kind and that several thousand people can be cared for on their picnic grounds with good camping facilities.

Discussion was taken up of the work being done by each of the departments of the I. A. A. It was pointed out that the Department of Information should send copies of the I. A. A. Record to all the Chambers of Commerce in Illinois. A resolution was presented by P. E. Johnston, farm adviser for Woodford county, that endorsed the plan of refunding 10 cents per ton on limestone to the County Farm Bureaus. One of the delegates brought out for discussion the attitude that Farm Bureaus should take in regard to the teaching of agriculture in grade and high schools. Although no action was taken on this point, all who commented on it were favorable to such instruction and believed that Farm Bureaus should encourage and aid this instruction as much as possible.

Favor McNary-Haugen Bill

Frank Barton led a discussion on the McNary-Haugen bill and said that, in his opinion, the bill would pass if brought to a vote. The bill was endorsed by those assembled. The next meeting is to be the last week of June, according to the program committee, and George Wicker, new head of the auditing and accounting service, will be asked to talk on cooperation lines.

Farm Advisers present were: P. E. Johnston, Woodford; H. O. Allison Livingston; C. E. Hopkins, associate adviser, Livingston; George Swaim, Ford; J. H. Checkley, Logan and Harrison Fahrnkopf, McLean. Delegates and presidents present were: Woodford—J. Ira Powell, Louis Powell, James Haas, J. W. Ostler, A. C. Jones, Geo. Wermsman, Conrad DuBois and William Beer; Livingston—F. D. Barton, executive committeeman for 17th district, William Aspen, Frank Reeves, Charles Patterson, Carl Barton and Louis Beeman; Logan—George Stoll, Edgar Sisson and D. C. Scheckler; McLean—H. C. Dixon, John Kinsinger, A. O. Convis, Allen McIntyre, John Scholl, Fred Armstrong, H. E. Hilpert, Albert Renger, O. W. Fuller, E. D. Lawrence and Homer R. Johnson. Vernon Vaniman, who is in charge of the field organization for the new auditing and accounting service established by the I. A. A., attended, and spoke briefly and H. C. Butcher, director of the department of information of the I. A. A. was also present.

BREEDERS' CONGRESS PLANNED IN I. A. A.

(Continued from page 7)

dairymen of Wisconsin and we will have cleaner, better cattle in Illinois."

Cattle Agents Without Ethics

So, quite largely, according to Mr. Peterson and Mr. Lynch, the latter being the head of the dairy marketing department of the I. A. A., the matter of buying dairy cattle from strangers becomes a matter of faith. Faith and ethics are closely linked, they say, and especially in the dairy cattle game. To build up ethics and faith between the seller of dairy cattle and the buyer, they have proposed, in the name of the Illinois Agricultural Association, that there be a "Breeders' Congress" at the next National Dairy Show, which is to be held at Milwaukee, September 27 to October 4.

Plans Breeders' Congress

According to the two progenitors of the idea, dairymen from all the states which are in need of dairy cattle, such as Illinois, Iowa, Kansas, Nebraska, North and South Dakota, Ohio, Missouri and Indiana, would gather at the National Dairy Show next fall, meet the sellers of the cattle from Wisconsin and other states, talk over their problems, go on excursions to visit dairy farms in Wisconsin and hear a good program of speakers during the days of the "Breeders' Congress." W. E. Skinner, general manager of the National Dairy Show, thinks it's a good idea, and plans are now being laid whereby representatives from all the states interested can meet soon and get the first annual "Breeders' Congress" under way. Special trains of Pullmans could carry and house whole county farm bureaus and more dairy knowledge could be obtained by the participants than could be preached by exposition in a century, Mr. Lynch points out.

HERE'S ANSWER TO PERPETUAL KNOCKER; MORE LIKE IT, TOO

Taxation Work Has Brought Laurels To I. A. A. and Saved Money For Farmers

There is quoted below an editorial from the "Champaign County Farm Bureau," the news sheet of Champaign county of which C. C. Burns is farm adviser. In it there is a point which is well worth the consideration of every farm bureau member. That the Illinois Agricultural Association is paying dividends to its members, both directly and indirectly, is a bona fide fact. This is but one of many instances which can be quoted. The editorial follows:

The Farm Bureau Never Did Anything!

Here is a statement that will raise you several inches off your seat, due to the taxation work taken up by the Farm Bureau and the Illinois Agricultural Association in Champaign County.

Land Valuation

In 1922	$30,986,425
In 1923	25,354,505
Difference	$ 5,631,920

While this reduction in land was being secured you and your representatives in the county raised the county rate in Champaign County 35c and the state rate was raised 7.7c. Think what you would have had to pay with this increase, if the Farm Bureau had not reduced the land valuation $5,631,920.

We just worked this out this morning at the Court House at Urbana with Mr. John Watson, statistician expert of the I. A. A.

G. C. Williams of Condit said that his land tax alone was $60.00 less this year than last, due to the reduction on his 200 acres of land.

Some of these fellows that have been talking against the Farm Bureau get quite aggressive once in a while. It is about time that Farm Bureau members begin to defend their own organization. In fact, it might be well to use a few aggressive tactics in return.

MURPHY HITS HARD FOR McNARY BILL

(Continued from page 1)

farmer and that farmers as a class have developed an orgy of borrowing money. Mr. Murphy made it a point that agriculture is being held subservient to industry and labor with the same as a ball and chain around both ankles.

Farmer Sells at Prices Offered Him

"Let us start by considering the present status of agriculture," said Mr. Murphy in beginning his address. "The farmer of today must sell his products at prices offered him. He must pay for what he uses in his business practices, prices that are asked of him. He has no alternative but to sell for what is bid and buy at prices demanded. He has to deliver substantially two loads of almost every product of the average farm for what he secured with one load of his products in 1913. The exchange value of his products is but about 50 percent of the pre-war values.

"Let us then analyze the subject further and determine why it is that the farmers' products will only purchase one-half of what they did 10 years ago. On the whole, the farmers of America are receiving as high a level of prices as they did in 1913. His price is not, when considered in respect to normal conditions, depressed. The answer to this disparity in price is found in the fact that the price of the things the farmer purchases has increased approximately 100 percent. It is a case of the inflation of the products of labor and industry.

What Causes This Disparity?

"It then becomes important to ascertain what has happened in the affairs of the nation that has increased the prices of fuel, building material, machinery, clothing and the like which the farmer purchases to carry on his business and to exist. We find our answer to this question in the protective system which the nation has consented to in such legislation as the Adamson law, the restriction of immigration, the tariff law, the Federal Reserve Board, the Esch-Cummins Act and other paternalistic legislation. These laws have given great disadvantages to the farmer.

"Labor and industry can and do pass laws on all increased prices and costs, but when the farmer purchases, he cannot pass on increased costs and is compelled to absorb the losses out of his business—which is shown by the tremendous increases in mortgages and other indebtedness of the American farmer. He cannot pass the buck. Under the existing law-made economic system, the farmer is powerless to help himself and the basic industry is facing a complete collapse.

Extend Protective System to Farmer

"Either the protective system must be extended under the McNary-Haugen bill or we will have a peasantry on the farms of this country. The farmer is not seeking to tear down the existing protective system, but asks that the same consideration be shown to him by the enactment of the McNary-Haugen bill. The protective system has taken away his purchasing power and he asks that it be restored to him by law. He does not ask for favor, but he does insist that disfavor be abolished. He wants an even break.

"This nation cannot afford to bankrupt and destroy its basic industry through the industrialization of the country. It is important that we continue as an agricultural nation. It is possible and necessary that both agriculture and industry be given the same opportunities. We cannot proceed as a nation 35 percent slaves and 65 percent free."

In answering a question after his address, he said that the scrip clause had been removed by committee amendment and that the provisions of the bill now called for the issuance of receipts in place of scrip which is, he said, better than the scrip idea.

AUDITING SERVICE PLANS COMPLETED

(Continued from page 1)

receive a more-or-less uniform service with special auditors for each group, but so systematized that an auditor will be shifted from district to district periodically. The control will be in the membership.

To Furnish Complete Audits

"Every effort will be made," says Mr. Wicker, "to build up a reliable, efficient service on a cost of service basis. The auditing service of the Illinois Agricultural Cooperative Association will differ from that service rendered by commercial auditing companies in that our auditors will stay in an office until all the facts are known. Many commercial audits are based upon a time limit or a salary limit, which can, in turn, be set by the manager of the local cooperative. Audits made by this organization will be thorough. The fact that a local cooperative belongs to the "I. A. C. A." will mean, in time, that its books are in good condition and that the organization is sound. It will be an iron-clad guarantee of protection to farmers."

Members of the committee which formulated the final plans are as follows: George A. Fox, executive secretary of the I. A. A.; Vernon Vaniman, Virden; George Wicker, St. Paul, Minn.; George E. Frazer, consulting accountant of the I. A. A.; I. A. Madden, farm adviser of Sangamon county; William A. McNeill, manager of a local cooperative elevator at Chandlerville, and A. R. Wright, executive committeeman for the I. A. A. from Congressional district 16.

FIND FACTS BEFORE BOOSTING RATES ON FARMER SAYS I.A.A.

Quasey Shows that New Does Not Sanction Proposed Raise in His Own Department

Opposition to the proposed raise in parcel post rates now in Congress is being voiced strenuously by the Illinois Agricultural Association through L. J. Quasey, head of the transportation department.

Mr. Quasey received information which states that Postmaster-General New has made it plain that "no such increases as are carried in the bills now before your committee are warranted." The letter in which this statement was made was sent by Mr. New to the chairman of the Congressional Committee which was considering the proposed raise in rates. Mr. Quasey is of the opinion that the Postmaster-General knows more about the needs of his business than any Congressmen who have not his close contact.

These bills, the Paige and Edge-Kelly, provide for extensive increases in the rates on fourth class matter and on parcel post, and it is particularly these two classifications in which the farmer is vitally interested.

"Several years ago," says Mr. Quasey, "an appropriation was made for the study of the cost of carrying various classes of mail. Extensive data has been gathered and it will be several months before the report is completed. If conditions require, an increase in the revenue, any action contemplating any changes in the present postal rates should be held in abeyance until the report of the committee that investigated the cost of the mail service is available.

"It appears," continues Mr. Quasey, "that there is a strong effort on the part of friends and proponents of these bills to pass them without considering the data collected by the especially appointed committee. We urge that, if you have not already done so, to communicate with your respective congressmen and representatives voicing your opposition to these measures."

Radio Fans Have Chance To Hear A. C. Everingham

A. C. Everingham of Hutsonville, who has done good work for the I. A. A. as a member of the legislative committee, delivered a series of radio lectures from the Sears-Roebuck Agricultural Foundation during the past week. Mr. Everingham speaks extensively at farmers' institutes and has been on the Chautauqua platform several seasons.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Volume 2 | May 20, 1924 | Number 10

EARLY RETURNS FROM PETITIONS INDICATE OVER 50,000 MARK

Large Number of Signers to McNary-Haugen Petition Suprising in View of Spring Rush

Results of the state-wide petition-sign-up for the McNary-Haugen bill had not been tabulated completely when the RECORD went to press, but reports already in and tabulated show that 22,727 persons signed the petitions in 18 counties. Many of the reports indicate that from 90 to 99.5 percent of the people asked to sign actually signed, indicating a strong desire on the part of Illinois voters for the McNary-Haugen bill and refuting the recent published statements in Chicago newspapers that the bill is a "dead issue" in Illinois.

Frank D. Barton

Frank D. Barton, chairman of the I. A. A. legislative committee, spent considerable time and energy in directing and checking up on the state-wide sign-up spending one week of busy farm time in the I. A. A. office at Chicago. Following is a list of the counties tabulated to date:

Woodford, 713; DeKalb, 2300; Whiteside, 2051; Christian, 1568; Kendall, 1901; Kankakee, 368; Logan, 1348; Sangamon, 3260; Macon, 598; Piatt, 837; Monroe, 726; DeWitt 359; Iroquois, 781; Menard, 564; Livingston, 355; Ogle, 498; St. Clair, 513; McLean, 3988; Total 22,727.

Only One-fourth Tabulated

With over three-fourths of the counties yet to report and over 22,000 signatures received already, it appears that the original mark of 50,000 will be surpassed easily. However, a great deal of difficulty was experienced by those who got the signatures in the counties as it meant dropping urgent farm work and driving about the country interviewing farmers busily at work seeding corn.

It is thought that Sam H. Thompson, president of the I. A. A., will take the petitions to Washington and deliver them personally to President Coolidge. That the great number of names will have an influence on Illinois Congressmen in Washington is a foregone conclusion.

All Classes Sign

Examination of any bunch of petitions from any county reveals that all classes of people signed for the McNary-Haugen bill. Farmers were represented in the greatest percentage, but doctors, lawyers, assessors, ministers, bankers, laborers, plumbers, hardware dealers, garage men and what-not signed, thus expressing their belief that the McNary-Haugen bill will do them some good as well as for the farmer.

COWLES REPORTS PROGRESS

Following is a telegram from R. A. Cowles who is representing the I. A. A. at Washington, D. C., in behalf of the McNary-Haugen bill, which gives the progress of the bill up to the time the RECORD went to press:

"Got rule today from committee so that bill may come before house for debate Friday morning (May 16). Will be debated Friday, Saturday and Tuesday or may possibly not come up before Tuesday (May 20), beginning three-day debate then. Bill gaining supporters and progress may be reported.

R. A. Cowles.

I. A. A. Acts Quick To Stop Possible T. B. Hindrance

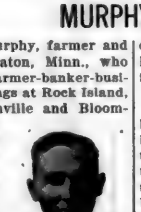
John W. Novak and Dr. Peter P. Duket, co-partners in the Duket-Novak Stock Farm of Lake county, Illinois, have filed suit against the Department of Agriculture of Illinois in the Sangamon county circuit court at Springfield for a writ of mandamus claiming that the department has not lawfully complied with their request for a permit to buy tuberculin re-acting cattle and take them to their 250-acre Lake county farm, there to be treated with a newly formulated tuberculin treatment, which, Dr. Duket claims, makes a cow which has previously reacted to the regulation tuberculin test so free from the disease that she can easily pass the government meat requirements.

The case came up May 12, and was deferred until the week following, according to M. H. Petersen, tuberculosis eradication expert for the Illinois Agricultural Association. Both Mr. Petersen and Donald Kirkpatrick, law counsel for the I. A. A., are attending the hearings.

In their petition, Dr. Duket and Mr. Novak say that they are desirous of carrying on upon their farm and elsewhere as they may choose the business of purchasing and maintaining under legal quarantine reacting cattle and treating them for re-sale for their own profit.

Both the Illinois Agricultural Association and the Chicago Live Stock Exchange are backing the Illinois Department of Agriculture in its stand.

Shelby County Advertises



The Shelby County Farm Bureau is doing a little direct advertising. It has had blotters printed with the names of the county president and the executive committee. It also says: "The only farmers' organization trying to protect and advance the interests of the farmer. Are you a member?" The blotters have been distributed freely over the county.

EYES THAT SEE NOT—EARS THAT HEAR NOT

CHICAGO COMMERCE MEN ASK I.A.A. FOR McNARY DETAILS; MURPHY DEBATES DR. BOYLE

Frank W. Murphy, farmer and lawyer of Wheaton, Minn., who addressed the farmer-banker-business man meetings at Rock Island, Springfield, Danville and Bloomington, was called upon to explain the McNary - Haugen bill to the Chamber of Commerce at Chicago at that organization's 5th district conference. Mr. Murphy defended the bill in behalf of the I. A. A. against Dr. J. E. Boyle, professor of rural economy of Cornell University, Ithaca, N. Y., who took the negative orthodox professorial viewpoint. No action was taken by the Chamber of Commerce, this being an "Informative Conference," as they term it.

Dr. James E. Boyle

Mr. Murphy gives this late information on the McNary-Haugen bill:

"It was decided that the bill should come up for consideration in the House either Thursday, May 15, or on Tuesday, May 20," said Mr. Murphy. "In all probability the McNary-Haugen bill will be brought up on the fifteenth. It is especially significant that this action should have been taken in view of the misinformation that has gone out through newspaper dispatches to the effect that the members of the House were unwilling to bring the bill up for consideration until the President has definitely stated his position in respect to it.

No Expression from Coolidge

"It is probably true that a number of the republican House members have expressed a wish that they might have information from the White House as to the view of the President respecting the bill, but there has been no stand taken to the effect that the bill would not be brought up until the President definitely stated his position. Many members of the House and Senate are in daily communication with the President concerning agricultural relief and we are convinced that the President is seriously concerned about the situation of agriculture and is determined that suitable relief shall be provided by this session of Congress.

Julius Barnes Leads Opposition

"The opposition to the bill is traceable to Julius Barnes and his friends and the Boards of Trade. The opposition is entirely obstructive, without merit, and immoral. It lacks conscience; it offers no remedy for farm relief. This opposition is very prominent here in Washington, and we have no hesitancy in attributing to the opposition much of the misinformation that has been given out concerning the status of the bill and the prospects of its enactment. No one has suggested any other plan for agricultural relief. It is true that some cooperative marketing bills have come forward, but they are not intended to provide equal-

Give the Farmer a Jetty

Economic professors are now proclaiming to the world that the McNary-Haugen bill is economically unsound. Their statements have furnished leads for a multitude of people who would like to find some good reason for not making the McNary-Haugen bill a law. The general trend of economic conditions, if not disturbed in any way, would be comparable to a great river like the Mississippi as it flowed along serenely in the days of Marquette, Joliet, and De Soto.

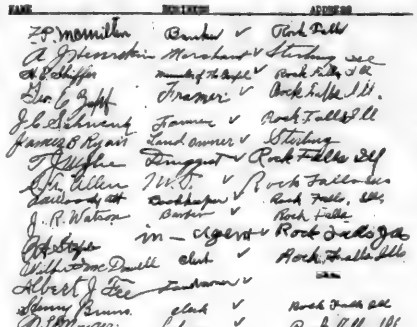
Civilization came and stuck in an Adamson law jetty here, a restrictive immigration jetty there, a high tariff jetty sticking way out into the river, and others. The serene waters of the tranquil river became disturbed by legislation for labor and industry. The farmer is not complaining because other classes have jetties in the economic flow, but he would like to have one himself.

—o—

An Expression From One Farm Bureau Member

I am writing you why I belong to the Farm Bureau and how I get service out of it. I am proud to belong to an organization which represents the greatest industry in America. I don't see how any man that lives on a farm and calls himself a farmer can refuse to belong to his county Farm Bureau, after the farmers have gone through what they have the last few years with everything organized against them. I do not see how they can gain their rights unless they too, organize and uphold their own individual business. When I need service from my county Farm Bureau, there is only one way to get it, and that is ask for it. I get several times more in a year out of the Farm Bureau than I put into it. I can save my yearly dues by buying one ton of oil meal through the Farm Bureau, to say nothing about buying seeds of all kinds.

If we will just look over our country we can see results, such as the alfalfa that has been grown the last six years, the vaccination of our hogs, and the soybeans that have been grown for the benefit of our stock.



We have the shipping associations, we have our livestock marketing association in Chicago, and the laws that are being passed in the state legislature and in Washington, D. C., for the benefit of the farmer.

We have one of the finest institutions in the state of Illinois, a farmers' cooperative milk plant located in the City of Rock Island, all brought about by the Rock Island County Farm Bureau. —Fred Saulpaugh, Blackhawk Township, in the "Rock Island County Farm Bureau."

PETITION FOR MCNARY-HAUGEN BILL

TO THE PRESIDENT OF THE UNITED STATES AND MEMBERS OF THE CONGRESS OF THE UNITED STATES, GREETING:-

The undersigned citizens of the State of Illinois, respectfully represent to you our interest in the early passage and approval of H.R. No. 5563, commonly known as the McNary-Haugen Bill, as recommended for passage to Congress by the Committee on Agriculture of the House of Representatives. We believe this measure will afford substantial and immediate relief to agriculture.

This reproduction of one petition page is representative of the many classes of people who want the McNary-Haugen bill to become a law. Does this indicate that the bill is a "dead issue" in Illinois as some Chicago newspapers declare?

Merchandising Excels Monopolizing

The Illinois Agriculture Association has never waivered in its belief and advocacy of cooperative marketing of farm products, meaning thereby that the producer must follow and exercise control over his product until it reaches the consumer of the same. The greed and not the inefficiency of the individual operator who has no producer interest at stake, has made cooperative marketing a necessity. Just as human weakness and selfishness compelled collective action in government to supersede absolute monarchical government, so it is forcing collective action by producers to supersede individualistic marketing.

Grain, because of its non-perishable character, would seem to offer the least difficulty to the cooperative. However, the transition from old, established methods is slow and has met with great difficulties. Cooperative effort got a good start at the local loading station but stalled at the local elevator. The U. S. Grain Growers planned to complete the journey to the consuming buyer. Like many of Uncle Sam's war-time ships, it promised much while under construction at the dock yards but never put to sea. Nobody has yet found out what to do with it or how to use it.

In the meantime, many hard pressed grain farmers are becoming restless and confused. Why blame anybody when all are to blame? Perhaps presently we will have exhausted all of the unsound theories and will begin to see clearly what not to do as well as what to do. Then we shall build a ship which, when completed, will put to sea and weather the storm.

Many past efforts were started with the purpose of creating an absolute monopoly. Why not? We have learned to envy the individual or company that succeeds in controlling a market, whether that market be labor, steel or what not. However, we overlook the fact that corners on the market are short lived and end in heavy losses somewhere. Have we not learned that monopolies have limitations beyond which they cannot go? Nearly all cooperative efforts have been permeated some time with a desire to hold their product and compel the buyer to pay the seller's price. Every cooperative must be a merchandising institution for the purpose of selling and not holding, except holding to supply the market at point of demand with the quality and quantity of product needed. All efforts at cooperative marketing which aim at a purely holding program to compel the buyer to pay the seller's price are self-destructive and will fail. Surely thoughtful farmers will soon learn that cooperative marketing to be successful must be more than a holding proposition, for holding can only succeed in influencing the price when accompanied by all the means and facilities for merchandising a product according to the needs of the market.

Think On This

Farm Bureaus and their activities are always subject to a great deal of criticism whenever they do anything that doesn't just suit interests other than farm interests. The whole category of agents and officers are subject to this criticism. This criticism even goes so far sometimes as to say the whole system is wrong. A Farm Bureau that can't stand up under criticism from those who would like to kill it isn't much of a Farm Bureau. Occasionally enemies of organized agriculture will succeed in making some Farm Bureau members believe that the organization is all wrong. A Farm Bureau member who wants to make his dollar serve him and make his organization better will bring this criticism to the attention of the officers or the agent. Every Farm Bureau member is entitled to understand every detail and every act of his organization. It isn't much use to explain to the knockers outside of the organization. They won't believe the explanation and Farm Bureau members should make it their business to find out the truth when they hear anything that they feel is detrimental to their organization. The facts are obtainable from the Officers and the Agent. It is impossible to answer a lot of criticism in the monthly letter, or the newspapers. Not only is it impossible, but it is unwise to do so. We would be chasing rainbows all the time. — From the monthly letter of the Jersey County Farm Bureau, R. L. Eyman, Farm Adviser.

—o—

Dairy Cattle Sales Contracts Bring Results

Here is *one* example of money-saving results obtained through the I. A. A. Read about it—

Frank Ehredt of Round Lake recently made a trip to Barron County, Wisconsin, and bought over 30 head of springers, which cost an average of $71, delivered at Round Lake. This is in line with what we stated in the March issue of the Diversified Farmer. The district around Barron has a very low percent of tuberculosis, and any one who will take a trip up there can very likely be well satisfied if he wants to buy cows. The Illinois Agricultural Association through Mr. Petersen has completed contracts with the Barron County folks whereby cattle can be bought subject to 75 day retest in Lake County. Copies of these contracts may be seen at the Farm Bureau Office. Prospective buyers from that territory should investigate this proposition before going up there.—Lake County Diversified Farmer.

LIARS' CONTEST GOING STRONG—EVERYBODY ELIGIBLE

Here's the best lie so far. It's contributed by Charles J. Robinson, farm adviser of Shelby county. Everybody's eligible; let 'em come—the bigger the better, but it takes a big one to get recognition in this contest! This one is a dandy for a starter, but it's too bad the Methodist preacher came in when he did.

Here we go—

The other day a short distance from Shelbyville I met a man who stopped me and said he had decided to join the Farm Bureau. Not happening to have any contract blanks with me we drove back and he signed up, paying three years in advance in cold cash. After his departure I again started out and was stopped by three farmers within two miles travel, all of whom wanted to join. After signing them and receiving their checks, which were bankable, I stopped at a farm sale. Here I was swamped with requests for membership blanks and within 49 minutes three good Farm Bureau members had signed up 84 new members. Five of these 84 also signed up contracts for their mothers-in-law and paid cash for same. Well —our Methodist preacher just walked in the office and said: "Let your conscience be your guide"—so I must quit.—Chas. J. Robinson, Shelbyville.

Let's see if you can make the "Liars' Corner" of the RECORD. All contributions must be signed, but name will not be printed if so requested. Let's go! Mail 'em to H. C. Butcher, care of the I. A. A., 608 South Dearborn Street, Chicago. The biggest liar for the year wins a prize, to be awarded at the next annual meeting.

RAILROADS PROMISE TARIFF REVISIONS ON FARM LIMESTONE

Farmers to Benefit From 7 to 40 Cents Per Ton as Result of I. A. A. Complaint

Farmers who buy limestone from the quarries in the East St. Louis district and who are located in Southern Illinois will benefit from a recent conference between the crushed limestone producers of the East St. Louis district, the transportation department of the Illinois Agricultural Association and the Illinois Commerce Commission in Chicago. Promises were made by the railroads represented to re-publish their freight rates on crushed stone and agricultural limestone during May with a decrease ranging from 7 to 40 cents per ton.

Quasey Represents I. A. A.

According to L. J. Quasey, head of the transportation department, and who represented the I. A. A. at the conference, the saving will mean considerable to down-state farmers who purchase limestone for their sour lands. From 340,000 to 350,000 tons of limestone is the estimated amount which will be used by Illinois farmers in 1924, according to figures compiled by J. R. Bent, head of the I. A. A. phosphate-limestone department.

The re-adjustment in rates affects agricultural limestone shipped from Columbia and Falling Springs at the present time, but, according to Mr. Quasey, a reduction in rates on limestone shipped from the quarry at Valmeyer may also be expected.

17 Cents Per Ton Saving

A saving of 17 cents per ton on agricultural limestone has also been effected by the I. A. A. department of transportation between the important limestone center of Greencastle, Indiana, and Oblong, Stoy, Gordons and Palestine, Illinois, which will take effect May 20. The new rates apply via the Big Four railroad and the Illinois Central. The former rate was $1.38 per ton to Palestine but is now $1.21.

"During April the Ill-Mo Butter Company, makers of the "Illini" dairy products, received shipments of cream from farmers at 163 Illinois and Missouri towns," says A. D. Lynch.

Vaniman Explains Details of Auditing Service for Co-ops

The establishment of a cooperative auditing and business advisory service for farmers' elevators, livestock shipping associations, milk producers' associations and other similar farmers' organizations is meeting with the approval of those who have had an opportunity to consider it, according to Vernon Vaniman, in charge of field organization of the I. A. A. accounting and auditing service.

"This is following the same plan," states Mr. Vaniman, "that has been used by the packers through the Institute of Meat Packing; by the petroleum people through the Petroleum Institute; by the bankers through their Clearing House organization and by several hundred trade associations that might be mentioned.

"By the farmers having their own auditing, accounting and business service they are applying the same practices that have proved successful among other organizations. This organization, which will probably be called the Illinois Agricultural Cooperatives Association, will be owned, controlled and directed by the cooperatives themselves. It will provide authoritative auditing, comparative analysis of business, protection to managers and directors, establish confidence and loyalty of stockholders, besides furnishing business advisory service for increasing the efficiency of the business."

Plan of Organization

"Under the present plan," says Mr. Vaniman, "each class of organizations will have one member on the board of directors, and each district will have one member on the board.

The cost of the service will be on a pro-rated basis, based on the volume of business for each class of organization. For instance, farmers' elevators will have one rate and livestock shipping associations another rate.

Meetings to consider the service have been held in McDonough and Iroquois counties and have been arranged for in Sangamon, Morgan, Knox, Bureau, Logan, Champaign, Macon, Macoupin, Christian and Montgomery counties.

Collections so far this year are coming in better than last year, according to L. A. Evans of the finance department.

Who's Oldest and Youngest Farm Bureau Members?

The question came up the other day in the office as to who is the oldest farm bureau member. We didn't get that settled before someone chimed in with the question, "Who's the youngest member?" There were some suggestions, but none definite. So we are going to find out.

We would like to have the names of the youngest and oldest farm bureau members. Write to H. C. Butcher, Director of Information, and enter your oldest or youngest contestant. We'll see "who's who," and maybe "why" later.

Wants McNary Bill; Also Amendment to Packer-Stockyard

Galesburg was the scene of the regular quarterly meeting of the 15th district on April 29, of which H. E. Goembel of Hooppole is executive committeeman. Representatives from Adams, Henry, Fulton, Knox and Schuyler counties were present and passed a resolution unanimously favoring the McNary-Haugen bill and it was also resolved in the resolution that House Resolution 7110 and 6424 would greatly improve the Packers and Stockyards Act and that the Illinois senators and representatives at Washington work to secure the enactment of the McNary-Haugen bill and the addition of the amendment to the Packers and Stockyards Act.

WANT McNARY BILL IN 16th DISTRICT; WIRE RESOLUTIONS

Representatives Talk Limestone, Serum, Cooperation, Collections and Tuberculosis Eradication

At a meeting of Farm Bureau officers and Farm Advisers of the 16th congressional district, April 28, which includes the counties of Tazewell, Peoria, Stark, Bureau and Marshall-Putnam, a resolution was drafted and ordered to be wired to Illinois senators and Congressmen at Washington asking that they support the McNary-Haugen bill and help get it passed this session of Congress. A. R. Wright, executive director, opened the meeting and presided.

Joseph Morris, president of the Tazewell County Farm Bureau, spoke on ways and means of collecting dues and was followed by others in a discussion. It was reported that collections for 1924 so far are better than in 1923. It was indicated by those present that service on limestone and serum should be restricted to paid up members. The opinion was general that close cooperation and good feeling between bankers and the Farm Bureau is essential and that the Farm Advisers should keep the banker and newspapers completely informed as to what is going on in the Illinois Agricultural Association.

Farm Adviser W. E. Hedgcock of Peoria county told how Peoria county assisted in getting the Legislature to pass the bill allowing counties to make appropriations to pay county inspectors in tuberculosis eradication work. Reports from Tazewell county showed how the tuberculosis testing project was turned down in that county, but that at the same meeting an appropriation had been made for a tuberculosis sanitarium.

T. B. Work Discussed

In the afternoon session, Dr. Augsberger of the U. S. Department of Agriculture, explained the tuberculosis eradication work in detail, telling of the success of Hillsdale county, Michigan, an accredited county.

I. A. A. Votes $300 For Whiteside Judging Team

Three hundred dollars was voted by the executive committee to go to the Whiteside County dairy judging team, which won the trip to Europe when it placed first at the National Dairy Show at Syracuse, New York, last fall. The expression was made by some of the committeemen that the I. A. A. would be willing to vote $300 every year if an Illinois Farm Bureau team could win the national honor every year.

The team, "Dad" Wise and a representative from the University, who will probably be C. S. Rhode, dairy extension specialist, as he had considerable to do with the success of the team, will sail from Montreal June 7 on the "Doric." The team will enter the international livestock judging contest at the "Royal" in England this summer. This contest was won by a similar team from Maryland last year.

Members of the team will give a dairy judging talk over the WLS, the Sears Roebuck radio station, some time before they depart for abroad.

Here is the Whiteside county dairy judging team which sails June 7 from Montreal to represent the United States in the international judging contest at the Royal Live Stock Show, England. From left to right they are: Donald Williams, Prof. C. S. Rhode, Elwyn Folkers, L. O. Wise and Harold Gauirapp.

estimated expense of the trip was set at $1,000 a person, with a representative from Whiteside county and one from the University accompanying the team.

$4,000 Subscribed

Geo. A. Fox, executive secretary, read a list of contributions secured by "Dad" Wise, farm adviser of Whiteside county, who coached the team and who will accompany it to Europe, in which $3,700 was listed as subscriptions from various commercial agricultural organizations in Chicago. This amount brings the total to $4,000, which is the goal. The

Phosphate Service Extended by I. A. A.

Phosphate users in Illinois will be interested to know of the new agreement obtained by the phosphate-limestone department in which the I. A. A. extends its supervision at its Tennessee phosphate office to all reducing companies although withdrawing, at least for the present, from the work of actually buying and distributing phosphate.

"We will continue to operate the Tennessee branch office," says J. R. Bent, director of the phosphate-limestone department, "and will continue to follow up matters at the production end in the interest of the purchaser; will take samples from each and every car and make analysis of all shipments where such service is desired by the purchaser whether he is an I. A. A. member or not and whether a farmer, dealer, elevator company or other buyer of phosphate. The producers recognize the saving to themselves and the sales advantage to them in this plan and so have agreed to pay for this service, so there will be no extra charge involved so far as the purchaser is concerned. We will also continue to follow up complaints in matters of service, weights and quality. The producers have agreed to make us arbitors in the matters of complaints by purchasers, or disputes between producers and themselves."

Michigan Sees How I. A. A. Probes Taxes

J. C. Watson, in charge of the taxation investigation work for the I. A. A., complied with a request of the Michigan Farm Bureau Federation recently and put on a demonstration in Kalamazoo, Michigan, to show how he obtains the levels of valuation of different classes of properties in Illinois.

Mr. Watson says that he found Michigan in just about the same condition as Illinois. The demonstration was put on in Kalamazoo county, where he found that land and small town and village property was assessed at a much higher level than real estate in Kalamazoo, the county seat of Kalamazoo county and a large city. The difference is approximately 30 percent he says.

The work done in Michigan by Mr. Watson corresponds with results found in Wyandotte and Wood counties in Ohio and with the results of an investigation made by G. E. Metzger.

MONROE EGG PRODUCERS ORGANIZING

Since the Mark Twain Egg Producers Association of Hannibal, Mo., draws considerable support from the poultry raisers of Monroe county, Illinois, G. E. Metzger, organizer for the I. A. A., put on a county-wide meeting in Monroe county and assisted in making arrangements for a series of meetings to be addressed in Monroe county by local people. This county will put on its own campaign to get a large volume of eggs signed up with the Mark Twain Association and will hire its own manager about June 1, according to Mr. Metzger.

HERE'S WHAT EXECUTIVE COMMITTEE ACCOMPLISHED AT ITS MAY MEETING—

May 6th is the date of the last meeting of the Executive Committee. The following decisions were made by the Committee at that meeting:

1. Accepted invitation of Dean Mumford to hold next annual meeting at Champaign as guest of the University of Illinois, January 14 and 15, 1925.

2. Invited Dean Mumford to outline work of the College of Agriculture, the Experiment Station and the Extension Service at the June meeting of the I. A. A. Executive Committee in Chicago, June 6.

3. Appropriated $800 to the $4,000 financial budget of Whiteside County dairy judging team which goes to Europe this summer to judge in Royal Live Stock Show in international competition.

4. Decided not to have exhibit portraying progress of the Illinois Agricultural Association because of excessive cost.

5. Heard R. W. Dickensen, farm adviser of Cass county, and John H. Taylor, chairman of the finance committee of the Board of Supervisors, Cass county, and vice-president of the Cass County Farm Bureau, tell of valuable work done in starting clean-up of Cass county finances by John C. Watson, head of the I. A. A. Department of Taxation.

6. Motion passed that Farm Advisers should not receive per diem compensation from the I. A. A. for time spent on Advisory Committees.

7. Discussed grain marketing and gasoline tax.

8. Passed resolution urging other state farm bureaus to give active support to McNary-Haugen bill.

9. Accepted resignation of C. A. Stewart, head of the Live Stock Marketing department, and planned to hire a successor.

1000 MORE ENDORSE McNARY BILL; ASK IMMEDIATE ACTION

Everingham Speaks to Farmers, Bankers, and Business Men in Rainey District

Information meetings on the McNary-Haugen bill have been held recently in Petersburg, Menard county, and Virginia, Cass County, for the purpose of acquainting farmers, bankers and business men of the details of the bill. At the Petersburg meeting, 400 men from a radius of 50 miles unanimously passed a resolution favoring the bill and urging the representatives in Congress to support it. Over 400 signatures were affixed to the petition asking for the passage of the McNary-Haugen bill, according to C. A. Hughes, farm adviser of Menard county.

A. C. Everingham

The meeting at Virginia was a dinner given by the Virginia Chamber of Commerce for the Cass County Farm Bureau with about 500 present. Albert H. Rankin, president of the Springfield Chamber of Commerce, spoke on "The Relation of the Farmer to the Chamber of Commerce." A. C. Everingham was the principal speaker at both meetings. He explained the principle of the McNary-Haugen bill and answered questions which were asked about it. Both counties are in Representative Rainey's Congressional district.

I. A. A. HELPS APPLE GROWERS

G. E. Metzger, head of the organization department of the Illinois Agricultural Association, and E. B. Leeper, manager of the Illinois Fruit Growers' Exchange, met with the organization committee of the Calhoun county apple growers at Hardin, May 9, and went over possible plans for organizing the Calhoun county apple growers with the Illinois Fruit Growers' Exchange. Mr. Metzger reports a good attendance and says that arrangements were made to proceed with informing the apple growers of the county of the contemplated affiliation, then a sign-up campaign will probably be started early in June.

Galena, Illinois.

Mr. L. J. Quasey,
Transportation Department,
Illinois Agricultural Association,
Chicago, Illinois.

Dear Sir:

Mr. Frank Delleballa asked me to thank you for getting him a new fence along the C. B. & Q. right of way on his farm. He was 15 years trying to get a fence and now, he says, he has a good fence at last. It also pleases the section foreman to build a new fence and not be compelled to try and repair the old one. The section foreman will also put the undercrossing in proper shape.

If farmers would ask more from the railroad companies in a good manner, they would get results. The object desired is obtained to the whole satisfaction of all concerned. Again accept our thanks for your work.

Yours truly,
(Signed) H. N. Riplinger.

Baseball Fans To Read Latest Dope in Record

Baseball news of the Illinois Farm Bureau Baseball League will be printed in the RECORD in its newly formed Sport Department, which will be instituted as soon as baseball scores begin to come in. Team managers and others in connection with township or county teams should not fail to mail the results of games to the Information Department, Illinois Agricultural Association, 608 South Dearborn St., Chicago.

May Select All-State Team

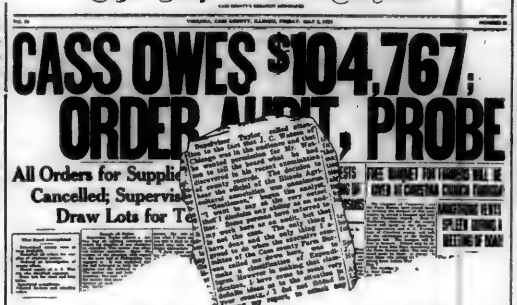
Many possibilities await the Sports Department. For instance, it may be possible to select an All-State Farm Bureau baseball team from the teams that compete for the state championship during the annual picnic, which is to be at Lincoln, Logan county, August 26. If you have a team, want to have a team or are planning to have a team, get in touch with R. W. Dickenson, farm adviser of Cass county, who is president of the Illinois Farm Bureau Baseball League, or G. E. Metzger, secretary and treasurer of the league, at the I. A. A. office at Chicago. Many counties have signified their attention of joining up and several have already sent in their $10 dues.

Kendall county already has a county schedule arranged between eight teams. It is printed in big league style in the Kendall County Farm Bureau Bulletin.

Scores Two More Victories; Helps Limestone Users

Two more victories for the phosphate-limestone department of the I. A. A. were recorded when two more producers of agricultural limestone signed the dotted line to agree to the I. A. A. plan for recognition of County Farm Bureaus in the price of agricultural limestone.

"The Lincoln Crushed Stone Company of Joliet," says Mr. Bent in announcing the new contracts, "is quoting a price of 60 cents per ton to all purchasers on both their regular agricultural screenings and their double-fine agricultural stone. On the 15th of each month they will remit to each County Farm Bureau at the rate of 10 cents per ton for all shipments made during the previous month and on which payment has been received.



"The Dolese Brothers Company, 327 W. Madison street, Chicago, with a quarry at Buffalo, Iowa, has agreed to a similar commission of 10 cents per ton from their present quoted prices on orders received through Farm Bureaus. Dolese Brothers' present price is good only until June 30 at which time some advance may be made, but it will still retain the 10 cent commission. Three prominent companies, separately located, have now subscribed to the I. A. A. plan. It is hoped that more will follow."

T. B. Work Planned In Edwards County

Edwards county is seriously considering taking up the campaign of tuberculosis eradication acording to M. H. Petersen, in charge of tuberculosis eradication work for the I. A. A., who has attended two meetings in that county. He reports that 175 people were present at a meeting at West Salem and about 550 attended a similar discussion at Albion. Mr. Petersen spoke at both meetings, telling of the necessity of eradication work and the methods used in other counties to raise money. He also visited Jasper, Cumberland and Effingham counties, visiting with interested people there.

Cass Benefits From I. A. A. Finance Probe

Something like a bomb broke when the Illinois Agricultural Association investigated the expenditures of tax money in Cass county. John C. Watson, in charge of the taxation department of the I. A. A., was invited to find the relative valuations on city and farm property by the Cass County Farm Bureau. Wide inequalities were discovered which the Board of Review corrected only in part, reports Mr. Watson.

The Republican-Gazette

CASS OWES $104,767; ORDER AUDIT, PROBE

All Orders for Supplie Cancelled; Supervis Draw Lots for Te

This is a reproduction of part of the front page of the Republican-Gazette of Virginia, Cass county, after the I. A. A. financial investigation.

A second invitation was extended to the I. A. A. to investigate the expenditures of the Board of Commissioners and upon this occasion considerable irregularities were found in the finances of the county. Some of the Farm Bureau people in Cass county had been trying to put their county on the board of supervisor system for several years. The investigation led to the election of a board of supervisors representing the county by townships. At its first meeting, the board heard the report of the Illinois Agricultural Association, as determined by Mr. Watson.

A report of the meeting as given in the Republican-Gazette of Virginia says that the board of supervisors cancelled all orders for supplies for the county, ordered an investigation of county offices, heard a report of the situation by J. C. Watson, and proceeded to hire an auditor to go over the county books. Following is a part of the report as given in the Virginia Republican-Gazette:

"The fact that Cass county is at least $104,767 in debt and that it has already borrowed through anticipation warrants more than the legal 75 percent of the incoming taxes were two of the important discoveries made by the board of supervisors Tuesday in a meeting that was replete with surprises and accomplishments. The board began work at 9 o'clock and except for one hour and a half taken for lunch, was in constant session until 5 o'clock.

Watson Reports Irregularities

"Following the report at the morning session, John C. Watson of the Illinois Agricultural Association, Chicago, who conducted an analysis of county expenditures at the request of the farm bureau, and the statement by County Treasurer Farrar that the county has but 74 cents in the general fund, a committee was appointed to consider these facts during the noon hour and report its recommendation immediately after lunch. This committee was composed of Supervisor Springle, chairman, and Supervisors Schneider and Jones. The report of the committee reads: 'Whereas, it has come to the attention of this board of supervisors and to the public that Cass county is practically bankrupt and for most purposes has no funds in the treasury with which to meet its obligations and pay bills:

Affairs in Bad Shape

"'And whereas it has been brought to the attention of this board of supervisors through a partial investigation of the affairs of the county and the methods of conducting the business of the county by the former board of county commissioners that money has been recklessly and illegally expended in large sums and that no statement of the financial condition of the county can be had.

"'Therefore, be it resolved, that this board of supervisors of Cass county, Illinois, hereby authorizes and empowers its committee on Judiciary and Finance to take any and such actions as are necessary to employ and pay some reliable certified auditing company to thoroughly audit the books and accounts of the several offices of the county running back for a period of several years as may seem wise in the judgment of the said Judiciary and Finance committee and that said committee be instructed to report the findings of said audit to this board at as early a date as seems practicable to it:'"

Secure I. A. A. Auditor

John Taylor, vice-president of the Cass County Farm Bureau, is chairman of the board of supervisors and was instrumental toward getting the investigation. Both he and R. W. Dickensen, farm adviser of Cass county, appeared before the I. A. A. executive committee at its meeting of May 6 at the Chicago office and thanked the I. A. A. for the services of Mr. Watson and commended his work highly. Mr. Taylor and Mr. Dickensen secured the services of the public accounting firm of Frazer and Torbet, Chicago, to do the auditing. Geo. E. Frazer of Frazer and Torbet, is consulting accountant for the Illinois Agricultural Association.

MURPHY SUPPLIES FACTS FOR C. OF C.

(Continued from page 1)

ity for agriculture, or the removal of the tremendous handicaps under which the farmer operates daily.

"There is a firm determination on the part of those supporting the McNary-Haugen Bill to insist upon this legislation being enacted and they will accept no substitute unless it will bring about the same results. We are told that the opposition will attempt to sidetrack this bill and substitute some other measure dealing with cooperative marketing problems or some other principle that cannot cure the existing difficulty of the farmer, but let it be said for the men who are representing the forty million people back of the McNary-Haugen Bill that they will not be swerved from their purpose and will never give their consent to any sop legislation."

DEAN SAYS, "COME AND SEE US"; I.A.A. ANSWERS, "WE WILL"

Next Annual Meeting to Be At Champaign; Mumford to Outline U. of I. Program

H. W. Mumford, dean of agriculture at the University of Illinois, was present at the last meeting of the executive committee and invited the Illinois Agricultural Association to hold its next annual meeting at Champaign on January 14 and 15, 1925, the dates previously selected by the I. A. A. He stated that Champaign is centrally located between the northern and southern parts of the state and that it can be reached without difficulty because of the hard roads leading into it. Champaign and Urbana have ample hotel facilities with which to handle the attendance and there is an auditorium available for the meeting which will accommodate 2,500 people.

Benefit to All

"It would be an advantage to the student body," said Dean Mumford in presenting his invitation to the committee, "and especially to the agricultural faculty to have an opportunity of seeing an annual meeting of the Illinois Agricultural Association in action. It would be especially advantageous to all concerned to have close touch between the College of Agriculture, the Experiment Station and the Extension Service. Everything will be done to give the I. A. A. a real welcome and a good time as well as a profitable time."

Motion was made by J. L. Whisnand, Charleston, of the 19th district, that Dean Mumford's invitation be accepted. It was seconded by G. F. Tullock, Rockford, of the 12th district. The executive committeemen who were bidding for the annual meeting graciously withdrew in favor of Dean Mumford's invitation and the motion was passed unanimously.

Dean to Outline U. of I. Program

Dean Mumford also asked that the Executive Committee hold its June meeting in Champaign in connection with the annual Farmers' Week in order that the present program of work being carried on by the College of Agriculture, the Experiment Station and the Extension Service. The committee decided that it would not be convenient to have the June meeting at Champaign, but invited Dean Mumford to appear before the committee at its June meeting and outline the program of work.

RECORD Coming Every Two Weeks

Beginning with the next issue, the RECORD will be published every two weeks rather than twice a month, as has been the case heretofore.

From now on you can expect to receive the latest news of your association every other Monday. If you don't get your copy at this time, let us know. The RECORDS will go in the mail every other Saturday at Chicago and for that reason will receive practically first class service because the Chicago post office is not jammed with mail over the week-ends.

Your next RECORD will be dated June 9 and each issue should reach you every second Monday thereafter.

SAM THOMPSON TO REPRESENT A.F.B.F. WHEN G.O.P. MEETS

I.A.A. President Selected To Guard Farmers' Rights at Republican Convention at Cleveland

President Sam H. Thompson's services are in demand again. This time he is to go to Cleveland to the republican national convention upon the request of J. F. Reed, acting president of the American Farm Bureau Federation in the absence of President Bradfute, who is in Rome, Italy, representing the United States at the International Institute of Agriculture. President Thompson will be accompanied by E. B. Reid, assistant Washington representative of the A. F. B. F.

It will be the duty of Mr. Thompson and Mr. Reid to see that agriculture is not overlooked in the building of the national republican platform and that the agricultural planks in that platform are in harmony with the wishes of the American farmer.

President Thompson is a member of the executive committee of the A. F. B. F. The ability shown by President Thompson in handling legislative problems in Illinois and his knowledge of the real needs of American farmers today make him a valuable representative of the American Farm Bureau Federation.

Representatives to attend the democratic national convention at New York will be announced later, according to American Farm Bureau Federation officials.

Cass County Probe Goes to Grand Jury

Cass county continues to be a hot-bed of official unstability. Reports from that county indicate that the facts discovered by the auditors who were engaged after John C. Watson, the I. A. A. taxation specialist, had classified the expenditures of Cass County upon request of the Cass County Farm Bureau and found considerable irregularities, have substantiated the findings made public by Mr. Watson.

The auditors have completed their work and an attorney has been secured to present the facts to the grand jury. The audit has not been made public. The firm of Frazer & Torbet, Chicago, performed the audit, George E. Frazer of that firm is consulting accountant for the Illinois Agricultural Association.

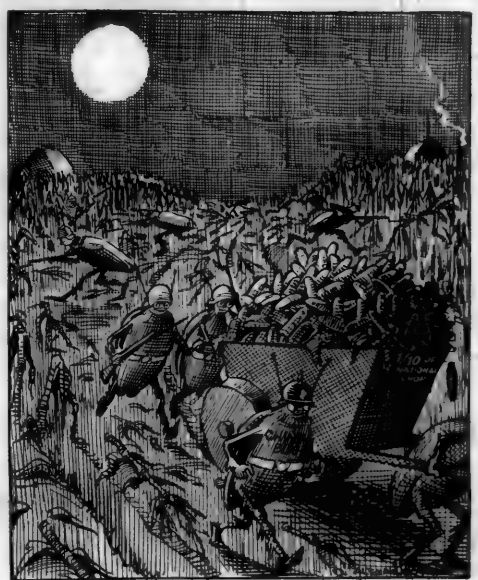
HARPER IS INFORMATION DIRECTOR FOR PRODUCERS

J. D. Harper, formerly director of poultry and egg marketing of the I. A. A., has recently been appointed director of information for the National Producers. He has been with the Producers since leaving the Illinois Agricultural Association.

McNARY-HAUGEN BILL DEFEATED

Eastern and southern opponents voted the bill down today in House. Our central and western members excepting those from large cities rallied to the bill's support solidly. Compromises as to commodities, duration of life of board, capital and other details than principle were offered to steering committee yesterday and rejected. Motion to recommit with such amendments failed to carry. Friends of bill did everything possible to secure support. Fought up to roll call. Am staying over until Monday watching relief measure promised by steering committee presumably satisfactory to administration. National meeting of farm organizations tentatively called July 17 and 18 at St. Paul. R. A. Cowles, Washington, D. C. June 4, 1924.

Hire Hedgcock of Peoria County For Stewart's Place



Wm. E. Hedgcock, farm adviser of Peoria county, has been chosen by officials of the Illinois Agricultural Association to take charge of the association's live stock marketing department, the former director of which, C. A. Stewart, has recently resigned to become executive secretary of the National Livestock Producers' Association. Mr. Hedgcock has been farm adviser of Peoria county since May 1, 1916, and is a University of Illinois graduate in the college of agriculture, class of 1909.

Wm. E. Hedgcock

He has been interested in cooperative marketing of livestock and other products and has had considerable experience in agricultural extension work and taught agriculture in the LaSalle-Peru Township High School from 1910 to 1912 and in the Albert Lea State High School, Albert Lea, Minnesota, one of 10 high schools in Minnesota which received state aid at that time for teaching agriculture, until he went to Peoria county in 1916. Mr. Hedgcock was interested in dairy testing associations and dairy marketing in Minnesota and was secretary-treasurer of the Pioneer Cow Testing Association, Freeborn county, Minnesota. Mr. Hedgcock managed his father's 425 acre Illinois farm during vacations of the Plymouth High School and the University of Illinois. He has been instrumental in forming livestock shipping associations in Peoria county and also assisted with the formation of the Peoria Live Stock Producers' Association. He will be with the I. A. A. as soon as his work in Peoria county can be turned over to a new farm adviser.

THE INVADERS ARE COMING!

CHINCH BUGS BAD THIS YEAR

Chinch bugs are to be exceptionally bad this year according to reports from the United States Department of Agriculture and agricultural colleges. Illinois loses one-tenth of its crop to the chinch bugs every year, the bugologists claim. They also say that the time to combat the chinch bug is before he gets started. "Calcium Cyanide for Chinch Bug Control" is the title of a bulletin ready for distribution from the College of Agriculture, Urbana. This bulletin gives different methods of using the cyanide for chinch bug control and gives complete directions for the use of the chemical. See your Farm Adviser.

Livingston County Has Serum Schools

A series of demonstrations to show the methods and benefits from vaccinating hogs for cholera were held in Livingston county under the direction of Farm Adviser H. O. Allison May 27, 28 and 29. The Livingston County Farm Bureau has established a distributing point at Pontiac where it has serum and virus at 70 cents per 100 cc. The schools were held at 12 points over the county, according to a program announcement of the vaccinating schools, and Dr. Schirmer, representing a serum company, gave the demonstrations.

The executive committee of the Gallatin County Farm Bureau decided to charge non-members 90c per 100 C. C. for serum and virus, at its regular May meeting.

Lincoln Has Fine Grounds For I.A.A. Picnic; Good Roads

G. E. Metzger, organization director of the I. A. A., has been spending some time in Lincoln, Logan county, paving the way for the I. A. A. state picnic which is to be held on the Logan county Chautauqua Association's grounds one mile from Lincoln, August 26. According to Mr. Metzger, everything in the way of conveniences and necessities for handling a large crowd is available; A baseball field and horseshoe courts are available on the grounds.

There is an open-air auditorium that will seat over 4,000 people.

Sheds are available for automobiles in case a shower should come up. Running water is available right on the grounds so there should be no shortage of lemonade. Besides that, Mr. Metzger says, there is plenty of trees so the proverbial shade which accompanies the lemonade will be there. There is plenty of space for picnic lunches with elbow-room.

Transportation facilities for getting to Lincoln are exceptionally good, since two paved roads touch Lincoln. Speakers for the picnic have not yet been announced.

George A. Fox, executive secretary of the Illinois Agricultural Association, has some 70 pure-bred Holsteins on his farm near Syracuse and is an ardent "better milk" fan. He is taking a few days off from his I. A. A. duties in June to attend the national Holstein-Friesian convention at Richmond, Virginia.

BROOMCORN MEN FIGHT PROPAGANDA TO ORGANIZE POOL

Organization Committee Have 280 Signed To Broomcorn Pool, Need 680; Oklahoma Broomcorn President To Speak

The organization of a pool for marketing broomcorn in Coles and Cumberland counties and those broomcorn growing portions of the adjacent counties of Douglas, Edgar, Clark, Jasper, Shelby and Moultrie has been deterred to some extent because of propaganda and direct opposition by a few local bankers and broomcorn brokers according to a recent report by the organization committee which was appointed at a meeting of broomcorn growers at Mattoon last August.

Minimum is 75 Per Cent

According to the committee's report, the marketing agreement which each grower was asked to sign called for 75 per cent of the growers to join by April 1, 1924. Because of bad weather and poor roads during the winter months, this date was extended to June 1. The committee conducted a series of meetings attended by more than 600 growers and mailed a full explanation of the contract and general pooling plan to practically every broomcorn grower in the area.

Still Want Pool

"The committee," says the report of that committee, "feels that in the minds of the growers there is a desire for a marketing organization but at this time too many broomcorn growers are depending upon those who have signed to set up the organization and carry the responsibility, while they, by staying on the outside and using the organization as a tool, obtain for themselves all the advantages of the cooperative organization."

Import Speaker

The broomcorn pool has not been abandoned, latest reports from the committee indicate. Instead, the president of the Oklahoma broomcorn pool has been engaged to speak soon before a meeting of the growers telling them of the experiences of the Oklahoma growers. That there is a keen desire to market cooperatively in the broomcorn area is certain, according to G. E. Metzger, organization director of the I. A. A. who has been assisting, but there is considerable need for more of the growers to get the spirit.

"Two hundred and eighty broomcorn growers have signed the association agreement, most of which are farm bureau members," says Mr. Metzger. "Ninety per cent of those who have not signed are not members of the Farm Bureau. The minimum requirement of 75 per cent amounts to approximately 680 growers."

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, H. C. Butcher, Director.

Entry as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

OFFICERS

President, S. H. Thompson, Quincy.
Vice-President, C. B. Watson, DeKalb.
Treasurer, R. A. Cowles, Bloomington.
Secretary, Geo. A. Fox, Sycamore.

Gougler; special representative on Tuberculosis Eradication, M. H. Petersen.

Call Nation-Wide Conference Following Defeat

Immediately after the defeat of the McNary-Haugen bill in the House June 3, the following statement was issued by the farm organizations which were fighting for the bill:

"By failing to enact into law the principles of the McNary-Haugen export corporation bill, congress has refused to concede to American agriculture equal opportunity and equal protection with that which the nation grants to other industries and institutions.

"Congress has freely admitted the plight of the farmer, but it has refused to take the steps dictated by simple justice toward correction of conditions that have precipitated nation-wide agricultural collapse.

"We cannot believe this decision of congress is to be taken as final. Otherwise we should have no choice except to return to the millions of people who compose the farming industry of the country with the word that the American nation no longer held a place for them, their work, or the production of their hands and toil.

"We believe the decision of congress in refusing justice to agriculture is dictated more by misunderstanding of the underlying causes of present conditions than by a cold blooded purpose of industrial and financial aggrandizement accomplished through the ruin of the farming industry.

"With this belief, we are taking what steps are within our power to continue the work for the principles of the McNary-Haugen bill. A nation-wide conference of farm organizations will meet in St. Paul July 17 and 18 to perfect arrangements for expanding and carrying on the campaign for agricultural justice and equality."

—o—

What Does the Farm Bureau Mean?

What does the Farm Bureau mean to agriculture? The above question is constantly recurring to the mind of the American farmer whether he gives much time to thought or not. It keeps coming up because every farmer knows that there is something radically wrong with farming as a business, and what is more important, if something is not done and done soon, American agriculture will go on the rocks. Now, this is not a calamity howl, it is a plain truth backed by facts. When the price received for any commodity is less than the actual cost of production, the chances for a solvency for that enterprise are rather remote. This is true of farming now.

When the taxes on a piece of property operated for profit are more than the gross returns from the property, what does it mean? Confiscation. That is true of many farms in some of our most prosperous counties. Now what's the answer? You know. Organization.

Solution in Organization

You ask how we know that organization is the answer? Because we have the organization and we are already beginning to see the effects of its activities. Already our taxing bodies, state and county, are responding to the demands of the Farm Bureau committees regarding the lowering of taxes on farm lands. Already cooperative livestock shipping association in the county, and Producers' Livestock commission firms in our great livestock markets are correcting many evils which have existed for generations. Legislative bodies, state and national, have hearkened to the voice of the farmer coming through the State Farm Bureaus and the American Farm Bureau Federation to the effect that many comprehensive laws have been passed, not as special legislation for the farmer, but for the purpose of correcting abuses and giving the farmer an equal opportunity.

Farmers' Demands Win

Now the farmer has not been given these so-called boons because some other agency recognized his need. Not by any means. He has been recognized because he has demanded recognition and has an organization strong enough to enforce that demand. If any one doubts this he has only to turn to the fight put up by the "Farm Bloc" at Washington and its results. After one of the bitterest fights in legislative history, the farmers won practically every point contested for, and the reason they won was because their cause was just.

Or, the battle waged by the Illinois Agricultural Association before the State Tax Commission and the Railway Commission for tax and rate reduction. In both of these instances, reductions were secured amounting to more than the Farm Bureau dues to each member of the Farm Bureau.

We Must Not Quit

Well, we say, if we have accomplished so much, isn't that enough? We ought to feel pretty well satisfied, and surely have no need to worry. Don't think for a moment that the enemies of farm organization will ever sleep; they have too much at stake and are right now at work among the members of the Farm Bureaus, distributing propaganda and trying to create dissatisfaction and discontent, so that the integrity of the organization—the very life of the Farm Bureau—depends upon the individual member.

Every live, thinking member of the Farm Bureau in every county, of every state in the union, should recognize this, should realize that it is not sufficient for him to be just a member. He must be a fighting member, spreading the truth about this organization among his neighbors and explaining to them the need of united action.

—Logan County Reflector.

—o—

Price Fixing and the Teeter-Board

The term "price fixing" has muddied the water. Some people use the term without thinking what it means. Some people mean one thing and some another. It has come to be a handy term for propagandists.

The merchandising of any commodity requires the fixing of a price. The retail or wholesale merchant, the blacksmith, the professional man, the elevator, the creamery, the manufacturer, in short, all trade requires price fixing of some sort. Commerce is impossible without price fixing.

What does the propagandists mean by price fixing? Time is an element. In commercial practice, some prices are fixed for a short length of time—others for a longer time. What influences changes in price? The theoretical economist says that supply and demand regulates the price. The most casual observation proves beyond doubt that prices and changes in prices are artificially determined for selfish reasons. Supply and demand forces changes in prices only when other influences are unable to resist its influence. Supply and demand is a regulating and not a direct determining factor in price fixing. As a regulating factor, it is irresistible within certain limitations, and, on the whole, a most wholesome influence.

Some price fixers would attempt to eliminate the law entirely. They would have a fixed price for a more or less long period of time disregarding supply and demand altogether. Other clear thinking and sensible folks know that prices are not determined, but regulated, and that in only a limited way by supply and demand. These people do not object to the introduction of new factors in fixing prices for either a short or long time but do recognize as futile every attempt to entirely eliminate the supply and demand factor as a regulatory force.

Some say that cost, plus a reasonable profit, should fix prices. Cost plus determines whether or not a business is profitable. Everyone wants his business profitable; therefore, he naturally wants to determine prices on a cost-plus basis wherever possible and naturally will do so whenever and wherever possible. Everyone is doing his best at all times to fix prices on a cost-plus basis. However, we never have and never will be able to resist absolutely the regulation of supply and demand except by regulating supply and demand itself. We have not done enough thinking about regulating supply and demand as a means of maintaining a cost-plus price.

There is undoubtedly an irresistible relation between cost-plus price fixing and supply to demand. Artificial means are resorted to everywhere by everybody in fixing prices in an attempt to maintain the one and overcome the regulatory force of the other. Cost-plus and supply and demand are the two ends of a business equation. They each occupy opposite ends of a teeter-board. The important thing is to keep the teeter-board on a level. A little artificial pressure on one side of the fulcrum or a little less on the other will often maintain the equilibrium. The important objective for farmers today is to obtain and maintain that equilibrium.

—o—

One, Two, Three, Four

For the past four years the American Farm Bureau Federation has energetically represented American agriculture on every public question affecting the welfare of the farmer. It has been the farm bureau's aim to secure farmer-minded representation on all national boards and commissions as one step in its program to see that the farmer is not forgotten when questions of national importance are under consideration.

THE LIARS' CONTEST

The Liars' Contest is getting warmer. We have selected three this week. The question which now confronts us is what to give as a prize to the biggest liar at the next annual meeting. Suggestions will be welcomed. Let 'em come, lies and all. Someone suggested a gas mask; what do you think?

Here we go:

A farmer having one acre which he wished to divide into building lots, decided the land would sell much better if the weeds were killed out and the plot sown to bluegrass. Accordingly, he offered the entire crop to anyone who would cultivate the ground and sow it to bluegrass. A Scotchman who was more frugal than common and who lived in a shack nearby, accepted the offer, hired a teamster to plow and prepare the seedbed at a standard price per hour. The ground was a mass of sweet clover since it had been left idle for years, so it took twice as long to plow the plot as the Scotchman calculated. After paying the teamster, the Scotchman had 25 cents left to buy seed.

He spent 15 cents for potatoes and 10 for tomato seed. He cooked all the potatoes excepting the eyes, which he dried in the sun. Having heard that Luther Burbank had grown potatoes and tomatoes on the same plant, he went Luther one better by mixing the potato eyes with the tomato seed, grinding them to a fine powder and carefully broadcasting the dust over the acre plot. A fine shower fell that night and in three days the field was covered with as fine a stand of tomato plants as there had been of sweet clover. There was no necessity for cultivation. He sold 27 tons of tomatoes to the local canning factory and then harvested 776 bushels of fine potatoes.—John C. Brissenden, Hillcrest Farm, Clay City, Illinois. "Where we grow them big." (And where you tell 'em bigger—the editor.)

Mr. Brown had a wonderful, swift team of horses with which he drove to town in his wagon one day taking his little dog. A dreadful storm came up soon after he reached town and he decided to beat he storm home if possible. Everyone in town advised him not to start out. The sky was black with clouds moving rapidly, but he "allowed as how" he could beat that storm home with his wonderful team of horses.

Although driving madly, the storm caught him before he was halfway home. Upon reaching home, he found his wagon bed half full of rain water caught by moving so quickly through the rainstorm. The water was piled up in the back end of the wagon and his little dog was drowned. The horses didn't get wet.—Mrs. Paul Wilson, Sullivan, Ill.

The biggest liar is the farmer who says, "The farm organizations haint doin' nuthin' fur th' farmer." Keep smilin'.—C. T. Crofton, Savanna, Ill.

Good lies are coming in every day and extra good ones every other day. Let's see if you can "make" the Liars' Corner!

VARIETY IS SPICE IN 25th DISTRICT MEET AT SPARTA

Pass Resolution Jogging Congressional Representative To Support McNary-Haugen Bill

Variety was the keynote of the 24th district meeting May 22 when farm bureau representatives from the counties of Randolp, Franklin, Jackson, Williamson, Union and Pulaski met at the high school in Sparta in a regularly scheduled meeting called by Vernon Lessley, executive committeeman for the 25th district.

Talks were made in the forenoon by J. C. Spitler, University of Illinois extension man, and by G. E. Metzger, director of organization for the I. A. A., who spoke in place of President Sam H. Thompson, then in Washington. An open discussion followed in which Mr. Metzger answered questions. Several men expressed themselves pro and con regarding the million dollar bond issue to be voted on this fall. The sentiment seemed to prevail that the southern Illinois farmers would appreciate the raising of more money so that they might benefit more quickly from the hard road program.

Eat with the Ladies

Following the short morning session, the 50 or 60 farm bureau members present dined at the First Presbyterian church in Sparta in true farm bureau style. Vernon Lessley, executive committeeman, had arranged for a demonstration in the afternoon on the University of Illinois experimental plots near Sparta, which were visited by the farm bureau members. Dr. F. C. Bauer, soils extension specialist of the University of Missouri told of the progress of soil improvement work in Illinois and the needs of both the state and Randolph county. A great precentage of farms in southern Illinois need limestone and clovers. C. J. Badger, the University of Illinois soils specialist who is in charge of the plots at Sparta conducted the party, telling and showing the various advantages of phosphate and phosphorous.

Favor McNary Bill

Following the soils demonstration, the meeting again met in session in the high school. Charles McKinley, president of the Randolph county farm bureau, spoke on farm bureau activities in Randolph county. A resolution was passed asking Congressman Denison of the 25th district to support the McNary-Haugen bill. It was understood that he was not in favor of the bill.

Following is a list of those in attendance according to a list taken at the church dinner:

H. A. DeWerff, Benton; C. J. Thomas, Murphrysboro; W. K. Galeener, Marion; C. J. Badger, University of Illinois, in charge of Sparta experiment field; H. Webb, Mulkeytown; Jacob Krumrey, Marion; E. J. Avis, West Frankfort; J. R. Kelley, Benton; William Ziegler, Murphrysboro; Henry Bickmeyer, Campbell Hill; Glenn L. Hamilton, Ewing; Theo. Kueker, Ava; Geo. A. Bartruff, Jonesboro; Fred and Phillip Diets, DeSoto; Matt House, Benton; Joseph Colquot, DeSoto; A. Ziegler, Murphrysboro; H. P. Sauer, Pomona; Z. A. Robb and E. S. Lindsay, Coulterville; W. R. Ervin and J. Rupert Maxwell, Steeleville; W. C. Patton, Alert Taylor, L. W. Patton, S. H. Wasson, Louis Degener, H. V. Morgan, W. E. Bannister, Ralph Bannister, C. F. Baird, W. D. Murphy, H. C. Wills Will Bambauer, Paul Ohms, J. V. Lessley, Charles McKinley, Everett McDill, R. H. Dickson, F. C. Scott, A. J. Stephenson and N. R. Lessley, Sparta; Herbert Heineman and H. F. Heineman, Evansville; John H. Little, Prairie du Rocher; Fred Rehmer, Red Bud; J. C. Spitler, extension service; Dr. F. C. Bauer, department of soil fertility, University of Illinois; G. E. Metzger organization director, I. A. A.; W. Floyd Keepers, assistant editor Prairie Farmer; H. C. Butcher, director of information, I. A. A.

This is how the "gang" looked that attended the sweet clover and soil demonstration which was a part of the program of the 25th district meeting at Sparta, May 22. They had just finished a dinner at the First Presbyterian Church in Sparta. It's too bad the picture is so small otherwise you could see the happy expressions which are recommendations for the ladies who cooked the dinner.

Quality Is Basis For Success Of Farmer's Market

By F. A. Gougler, Director of Poultry and Egg Marketing

At Bloomington the members of the McLean County Farm Bureau have undertaken to shorten the route from producer to consumer by establishing a Farmers' Produce Market which has for its market place the bottom floor of the McLean County Farm Bureau building.

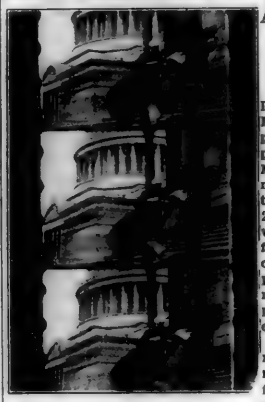
Recently, I had an opportunity to see this market in action. Early that Saturday morning the farmers came in from all parts of the county with their various forms of produce, fresh meat, cured meat, dairy products, poultry products and vegetables. Almost as early the towns-folk began to assemble in front of the McLean County Farm Bureau building with their market baskets.

Like Farmers' Quality

In answer to the question as to why they came to the market to buy their food instead of having it delivered by the local grocer, several customers answered that they liked to get the fresh products directly from the farmers because they were fresh even though sometimes higher. The quality is better, it was said.

Another thing that makes a patron, "once a customer, always a customer," is that this farmers' market guarantees quality. Any goods purchased which does not prove satisfactory can be checked up with the seller through the committee in charge of the market. This committee is composed of three farmer salesmen and the Farm Advisor who acts as chairman of the committee, with no power to vote.

Have Floor Manager



During business hours everything is under the supervision of a manager whose job is to keep prices adjusted and to manage all details. Booths are provided for each member of the market at a set charge per week.

Bloomington housewives are delighted to be able to purchase their Sunday dinners direct from the farm. At the same time the farmers are glad to sell their produce in this manner because they are able to sell their products for better prices than they could get otherwise. One farmer remarked: "This is the first time in my life that I have had the pleasure of setting the price on the stuff I have for sale."

Get Kansas Man For Information

F. E. Charles, graduate in Industrial Journalism at the Kansas State Agricultural College, has been secured as assistant in the Department of Information to take the place of George C. Biggar who resigned in April.

Mr. Charles was born and raised on a Kansas farm and was a member of the Kansas dairy judging team which placed second last fall at the National Dairy Show at Syracuse. He started with the I. A. A. June 2.

Here is what the movie camera saw when Senator McNary and Representative Haugen helped President Thompson pick up the famous 57,129 signatures.

Ford County Cream Producers Organize Pool on I.A.A. Plan

Ford county dairymen now have a full fledged cream selling organization on the I. A. A. plan of organization since 114 dairy farmers, representing 496 cows, signed the pooling contract of the Ford County Dairy Marketing Association. They met at Paxton May 27 and completed their organization by electing officers, formulating by-laws and laying definite plans for the future. Following are the five members of the board of directors: Elliven J. F. Nelson, Paxton, President; O. G. Anderson, Paxton, Secretary; Geo. L. Stanford, Lota; James Gourley, Paxton; Nels Hanson, Paxton. Elliven J. F. Nelson is chairman and James Gourley secretary of the Paxton local.

Two of the directors are appointed from the directorate of the Ford County Farm Bureau and three are elected from members of the dairy association. All directors are farm bureau members which is one requirement of the Ford county organization.

Indicates Better Price

Convincing proof that the pooling will bring a better price is indicated by the fact that four cream buying organizations have submitted bids and are competing for the cream. The directors are now busy considering these offers and will soon close with the highest bidder. Operations will commence in about two weeks in the first branch at Paxton. Other buying points will be established in the county as soon as the local dairymen sign up in sufficient numbers to assure a profitable volume. The financing has been cared for by arranging for a loan at one of the Paxton banks, which loan will be paid off from reserves. There is no capital stock and each member has one vote.

Nearly T. B. Free

A. D. Lynch, director of dairy marketing, states that in three months Ford county will be free from bovine tuberculosis, which will make this organization the first cooperative marketing association in Illinois that is selling products from T. B. free cattle only.

Macoupin Loses To Cass 9-0 In First Game of Season

In the first game played in the Illinois farm Bureau Baseball League between Cass and Macoupin counties, "Chuck" Houston, pitching for Cass county, let the Macoupin team down for a no-hit, no-run shut-out. During the afternoon show Houston struck out 20. Macoupin county batters, while his team-mates collected five safe hits off Goode, which, combined with bobbles by Macoupin players, netted a total of nine runs for the Cass county players. The fielding of the Cass county team was faultless.

Macoupin county had a large number of players out but had not held a regular practice before the game. Goode had plenty of steam and pitched a good game for the home team but the visitors coupled their hits with errors by the Macoupin team when hits meant runs.

The Cass county team made the trip across country in cars, arriving in Modesto at noon, where they were met by "Cracker" Johnson, assistant advisor of Macoupin county. The home team had made arrangements at the hotel and put forth an excellent dinner for the Cass county boys.

Soon after dinner the teams were out on the diamond limbering up while an enthusiastic crowd gathered to watch the preliminary practice. Promptly at two o'clock the umpires, one from Cass county and one from Macoupin county, made agreements as to ground rules and the game was on.

It was a typical farmers' game and the spirit manifested was commendable. Macoupin county was extremely courteous to the visitors who were so welcome that "Bob" Hierman, the good natured catcher of the Cass county team, had a number of small boy admirers hanging on his arms during the latter part of the game. W. H. Witte, Sr., Cass county, whose son played center field, came all the way to Modesto to see the game. He was probably one of the oldest fans in the crowd. Young and old alike were in the game. One of the players who received considerable notice was Birdsell Keithley, left fielder for the Cass county team. He is but 14 years old and just out of the eighth grade but caught every ball that came to his territory and caught the only long fly which the Macoupin team knocked outside the infield.

Around the edges of the field, between innings, Cass and Macoupin county fans exchanged ideas about cattle feeding, sweet clover, soybeans and other farm topics.

The summary of the game:

MACOUPIN COUNTY	AB	R	H	P	E
Downs, cf	4	0	0	2	0
Chapman, lf	4	0	0	3	0
Rogers, ss	4	0	0	2	1
Knoll, 2b	4	0	0	2	1
Mansfield, 1b	3	0	0	6	2
Hale, 3b	4	0	0	2	1
Lloyd, rf	3	0	0	2	0
Goode, p	3	0	0	1	0
Whittler, n	3	0	0	1	0
Totals	32	0	0	22	5

CASS COUNTY	AB	R	H	P	E
Witte, cf	5	2	0	0	0
Herzberger, 3b	5	0	0	0	0
Hierman, c	5	1	1	0	0
Dober, 1b	4	2	1	5	0
R. Hager, ss	5	1	1	0	0
Karl Hager, 2b	4	1	0	1	0
Lynn, rf	3	1	0	0	0

Score by innings—

Macoupin	000 000 000
Cass	330 030 000

Struck out, by Goode, 5; by Houston, 20.

The Kane County Farm Bureau will not contract for serum during the year 1924, according to a decision made by the executive board at its regular meeting at Geneva, Saturday, May 3.

FARM BUREAU WINS REPRESENTATION ON TRADE COMMISSION

C. W. Hunt's Appointment Significant; Victory for A. F. B. F.; Helps Fight On Pittsburgh Plus

Charles W. Hunt, Des Moines, Iowa, Secretary of the Iowa Farm Bureau Federation, has been appointed to the Federal Trade Commission by President Coolidge to fill the vacancy caused by the resignation of Victor Murdock, of Wichita, Kansas.

The appointment of Mr. Hunt to this important Commission is hailed at farm bureau headquarters as another great accomplishment in the farm bureau's campaign to secure farmer representation on all public boards. The appointment of Mr. Hunt to

C. W. Hunt

the Federal Trade Commission has particular significance at this time because that Commission will soon make a decision on the Pittsburgh Plus case.

In selecting Mr. Hunt for a place on this Commission, the Federal Government has recognized for the second time within a year the farm bureau in Iowa, since Mr. Hunt's predecessor in the Iowa Farm Bureau Federation, E. H. Cunningham, was appointed only a few months ago to the Federal Reserve Board.

C. W. Hunt has been intimately associated with the farm bureau since its beginning. Away back in 1920 when the president of the Iowa Farm Bureau Federation was J. R. Howard and the secretary was J. W. Coverdale, C. W. Hunt was elected as vice-president of the state organization. Then the summer of 1920 when the American Farm Bureau Federation was organized with Mr. Howard as president and Mr. Coverdale as the national secretary, Mr. Hunt became president of the state organization. He was president in 1921-1922 and again in 1923, until E. H. Cunningham, the secretary, was appointed to the Federal Reserve Board. Mr. Hunt then assumed active control of the state organization in the position of secretary.

The appointment of a farmer-minded member to the Federal Trade Commission is of utmost importance because of the great Pittsburgh Plus case involving the present method of steel pricing by which all rolled steel, no matter where made or shipped from, is charged for at the Pittsburgh price, plus the freight from Pittsburgh to destination. This practice has been in vogue over twenty years and for the past four years the American Farm Bureau Federation has been vigorously fighting it. The farm bureau leaders estimate that the Pittsburgh Plus practice takes a total of $75,000,000 a year from the American consumer of steel.

Will Slum "Kiddies" Get 'Nother Invite to Country?

"D'ya s'pose we'll git 'nuther invite to go out to the country 'n git a lot of that fresh air like last year, Jimmy?" is a question many slum "kiddies" in Chicago are asking each other these days when spring is lightly turning slum "kiddies'" minds to last season's summer vacations — swimmin' holes, horseback ridin', pattin' up hay or chasin' the cows up from the far pasture.

It's mighty hot down in those sections of Chicago where the slum "kiddies" call "home." And when summer comes they will be crowded in like wee chicks in a hover with not a chance to keep cool. Last year farm bureau members furnished 473 slum "kiddies" with outings through the Illinois Agricultural Association. This is the fourth year the I. A. A. has undertaken to help the United Charities, a non-sectarian organization, place needy children in good homes for a short summer vacation. The United Charities selects the children and makes sure they are worthy in every way. They are given new clothes, carefully examined by a physician and generally made bright and shining — and sanitary — for their outing. The railroads of Illinois furnish free fare within a radius of 200 miles of Chicago.

The members of the I. A. A. are invited to take one or more of these kiddies, who range in age from 4 to 14, of both sexes, into their homes for two weeks, if they care to do so. The United Charities assumes the liability for injury and sickness and conducts the children to the station where they are met by the farm folks.

Ten thousand children like these want and need to go to the country. You can help them go! 'Phone your neighbors and arrange to take a dozen kiddies in your community.

New Co-op Audit Service Meets General Approval

That there is a vital necessity for an auditing and business advisory service such as is being formulated by the Illinois Agricultural Association is the gist of thoughts expressed by many farmer elevator directors and co-op managers over the state according to Vernon Vaniman who is presenting the I. A. A. plan to interested groups over the state. The reaction in general is that the plan is fundamentally sound and that it is just taking a step to render a service on a cooperative basis for organizations instead of individuals.

Many directors of farmers' business organizations state that they should have an organization to render such an auditing and business advisory service to its members on a cooperative basis just the same as farmers' organizations have their respective combinations with which their grain is handled, their live stock is shipped and their members mutually, insured against fire and lightning.

Find Big Need

"A director of a co-op elevator in Champaign county," says Mr. Vaniman, who is presenting the plan to various cooperatives over the state, "stated that if his elevator had had this service it would have been in a much better financial condition today." Many other expressions of similar character could be quoted. We know that classified accounts will indicate the general trend of business and what steps should be taken to regulate that business.

Following is a statement prepared by Mr. Wicker in which he gives details of the proposed organization:

Wicker Explains Plan

"From time to time the Record has presented information regarding the new cooperative auditing and accounting service to be known as the Illinois Agricultural Cooperative Association, the incorporation plans of which is to be completed when the directors meet at the I. A. A. office, Chicago, June 5.

"For years it has been apparent that there is a definite need by Illinois cooperative associations for an authoritative auditing and accounting service which would be owned and managed cooperatively. To meet this demand the Illinois Agricultural Association is accepting the responsibility of promoting such an organization in the interest of its members since they constitute a large percentage of the membership of the farmer-owned associations in Illinois.

Not Organized for Profit

"The Illinois Agricultural cooperatives' Association is to be a corporation not for pecuniary profit, without capital stock, the membership of which will be restricted to cooperative associations, farm bureaus and other agricultural organizations. It will be operated as a cooperative association and the costs of the service will be assessed upon a proportionate basis at a rate to be determined by its own board of directors. Its purpose will be to furnish to its member associations an official and reliable audit and accounting service, income tax and general business advisory service. Reports and comparative data will be compiled covering the operations of similar enterprises and there will be provided an exchange of experience and information.

Members Sign for Three Years

"Members will be based upon a contract for a three year period, during which the member association will agree to accept the service and to pay its proportionate cost of the same. During this period each member will receive the benefits of examination at such periods as may be necessary, and it will be furnished with suggestions and recommendations for the improvement of the local's accounting and business methods, which will be directed toward standardization. Districts or groups of similar enterprises will be organized in which the members will receive comparative analyses of their operations with particular reference to costs and expenses.

"This is not a new and untried theory. Minnesota has provided such a service, which has been conducted by the State Department of Agriculture on a basis of actual cost.

"Cooperatives should learn to cooperate and establish between themselves that same community of interest that exists among professional, financial, industrial trade and labor interests."

ASK I.A.A. TO FORM MARKETING PLAN AT 13th DISTRICT MEET

Dixon Conference Brings Out Discussion On Gasoline Tax, Co-op Marketing, Reports and I.A.A. Service

The gasoline tax, cooperative marketing, tuberculosis eradication, limestone possibilities, constructive criticism of the Illinois Agricultural Association and a general interchange of information between county farm bureau presidents and other representatives featured the first district conference of the 13th district held at Dixon, May 29. Stephenson, Ogle, Whiteside, Carroll and Lee counties were represented, Jo Daviess being the only county not represented. The meeting was presided over by C. E. Bamborough, Polo, executive committeeman of the 13th district, who called on each farm buerau president in attendance to give an account of the work in his county.

County Presidents Talk

C. R. Morris, Lanark, president of the Carroll County Farm Bureau, told of the merchandising adventures of his farm bureau through Farm Adviser Bliss and of the saving obtained, and said they had decided to drop it several times, but did not. S. L. Shaw, Lee Center, president of the Lee County Farm Bureau, said that his county was interested quite largely in the vaccination of hogs for cholera and that immediate returns to farm bureau members were being obtained by buying serum collectively through the farm bureau. He stated that the Lee County Farm Bureau had saved its membership $500 on virus alone this year.

L. M. Swanzey, Freeport, president of the Stephenson County Farm Bureau, forecast a much larger field of service for the farm bureau organizations of the future.

Considerable interest was shown in cooperative marketing, a resolution being passed as follows:

"Resolved by this meeting composed of representatives of the 13th district, to urge the Illinois Agricultural Association to adopt and put into effect some plan of cooperative marketing and in that way put the farmer's product on an equal basis with other commodities."

A long discussion on the advisability of a gasoline tax finally led to a motion for a two cent tax on all gasoline sold in the state to be tabled until more complete data could be brought before the meeting.

G. E. Metzger, director of the organization department of the I. A. A., talked to the group telling of the necessity for farmers to organize and pointing to many of the benefits which have already been derived from collective bargaining on the part of farmers.

L. O. Birdsall, Sterling, a former executive committeeman to the I. A. A., said that it was his opinion that farmers should ignore party lines in voting for representatives in any branch of government and that the men who are for the farmer should receive unified support from farmers, regardless of his political party.

Following are the names of those in attendance at the meeting:

G. R. Bliss, Mt. Carroll; W. L. Riegle, Franklin Grove; John McNeil, Rock Falls; Elmer Cline, Wachusa; Albert L. Getz, Mt. Carroll; H. A. Stevens, Stillman Valley; Sidney Bishop, Stillman Valley; C. E. Bamborough, Polo; Herbert Conner, Amboy; J. W. Thier, West Brooklyn; S. L. Shaw, Lee Center; M. Sullivan, Rochelle; L. S. Griffith, Amboy; Peter Hoyle, Dixon; L. M. Swanzey, Freeport; C. R. Morris, Lanark; Vernon S. Todd, Milledgeville; Thos. Cooney, Deer Grove; L. E. Birdsall, Sterling; Geo. W. Beach, Ashton; Theo. F. Ellis, Lena; W. H. Robinson, Bradford; Theo. Frank, Rock Falls; G. E. Metzger, department of organization, Chicago; W. Floyd Keepers, Prairie Farmer, Chicago; H. C. Butcher, department of information, Chicago; Philip S. Lyons, Harmon; D. E. Warren, Oregon; H. C. Scott, Polo.

I.A.A. Gets Freight Lowered On Stocker and Feeder Cattle

Live stock feeders who buy stockers and feeders on the Chicago market and who live south of Peoria at points on the Chicago and Northwestern railroad will benefit materially from the decrease in tariffs on that railroad recently secured by the transportation department of the Illinois Agricultural Association, according to L. J. Quasey, director of that department.

Upon complaint of the Illinois Agricultural Association, the Chicago and Northwestern railroad has amended its live stock tariff, applying from the Union Stock Yards, Chicago, to points on the C. & N. W. south of Peoria to include an application on stockers and feeders cattle to read 75 per cent of fat cattle rates. This tariff becomes effective June 18, 1924. According to Mr. Quasey this rate has never been in effect before on this division of the Chicago and Northwestern railroad.

WILL YOU TAKE ONE?

You can make the wish of one or two slum "kiddies" come true if you will take a poor boy or girl into your home for a two weeks' summer outing this summer. Talk it over with your neighbors and form a neighborhood committee to arrange a glorious two weeks' visit" in your community for a dozen or more of these needy little "shut-ins". The United Charities finds it much more convenient in sending "kiddies" to the country to have a dozen or so going to each station, thus eliminating the necessity of sending a caretaker out with every one or two children.

'Phone or see your neighbors and arrange to take a dozen or so in your community. Fill out the blank on this page and mail it to the Outing Secretary, Illinois Agricultural Association, and the United Charities will receive your request. Summer will soon be here! No time must be lost! You must be within the 200-mile radius, however.

Outing Secretary,
Illinois Agricultural Association,
Chicago, Illinois.

A.F.B.F. PLANK GETS POLISHED AND CUT AT G.O.P. MEETING

Republicans Pledge Many Points Suggested; Same Agricultural Plank to Democrats

That the Republican platform committee heeded the demand made by Sam. H. Thompson, president of the I. A. A., when he presented the American Farm Bureau Federation agricultural plank at Cleveland is rather evident in spots, and not so evident in other spots. E. B. Reid, assistant Washington representative of the A. F. B. F., who was also present at the Cleveland G. O. P. meeting, released the following story telling of the success and failures encountered by the farmers' representatives in getting the Republican party to pledge itself to assist in curing the ills of the American farmer. The same agricultural plank will be submitted to the Democrats at New York. Mr. Reid's story follows:

Sam H. Thompson

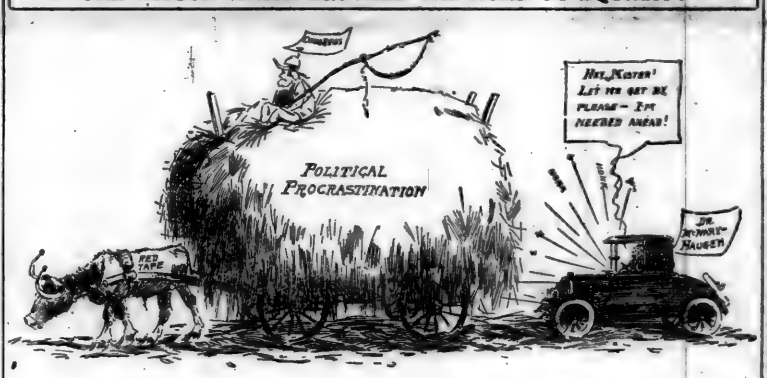
Back to Normal Plank

The biggest plank presented to the Republican party by the A. F. B. F. requested it to "take what steps that may be necessary to bring the purchasing power of agriculture back to normal." The Republican plank on agriculture includes this general statement almost verbatim: "We pledge the Party to take whatever steps are necessary to bring back a balanced condition between agriculture, industry and labor."

Other planks and splinters from the platform which conform in spirit, if not in wording, to what the farmers, as represented by the Federation, requested are as follows:

"The crux of the problem from the standpoint of the farmer is the net profit he received after his outlay. The process of bringing the average prices of what he buys and what he sells closer together can be indirectly expedited by reduction in taxes, steady employment in industry and stability in business.

Urge Cooperative Marketing



"This process can be expedited directly by lower freight rates, by better marketing through cooperative effort and a more scientific organization of the physical and human machinery of distribution of farm products.

"We promise every assistance in the reorganization of the marketing system on sounder and more economic lines, and where diversification is needed, government assistance during the period of transition."

"The Republican party pledges itself to the development and enactment of measures which will place the agricultural interests of America on a basis of economic equality with other industry, to insure prosperity and success.

THE WAGON WHICH BLOCKED THE ROAD TO EQUALITY

E. M. Whitted

HATCH NARRATES THE FARM BUREAU WAY TO PROSPERITY

One of the easiest things in the world for the members of a community Farm Bureau to do is to talk about the things they should have done or the things they might do but over in Elmira township, Stark county, in the vicinity of Kewanee is a local Farm Bureau that really does things. Fifteen years ago, before the Farm Bureau movement began, progressive farmers in Elmira township got bit by the cooperation "bug" and the effects showed up in the form of a farmers' institute, an alfalfa growers' association, an experimental farm and other similar enterprises. This "pull-together" spirit has never died out in the community. Today the local Farm Bureau there is more than abreast of the times in community work.

O. L. Hatch

Have Good Times

Not willing to confine their activities to the problems of growing more farm crops and better livestock and believing firmly in the old saying all work and no play makes Jack a dull boy, Kewanee farmers and their families have developed an unusual community interest in social activities that finds its outlet through basket suppers, home talent entertainments and church and school affairs.

Prominent in the affairs at Kewanee is O. L. Hatch, of Roselawn Farm, whose personality and devotion to the Farm Bureau is largely responsible for the success of the bureau work in Stark and Henry counties. He is something of a novelist besides being a community builder, as is evidenced by his account of the Elmira township Farm Bureau. It took some press agenting to get the story from Mr. Hatch but this is the way he pictures the Farm Bureau:

Farm Bureau Plant

"Among the noted men of America is Luther Burbank, the great plant wizard. One of the many miraculous things which he has done in developing plant growth was the production of the seedless raisin. He took the

(Continued on page 7)

C. I. & M. To Reduce Sheep Rates From Omaha to Bulpitt

Farmers and livestock men at Bulpitt, Illinois, who buy sheep on the Omaha market will profit from a decrease in shipping rates on sheep from Omaha to Bulpitt, over the Chicago, Illinois and Midland railroad, according to L. J. Quasey, director of the transportation department of the I. A. A. Heretofore shippers were compelled to pay a combination rate over Pawnee Junction which amounted to 46½ cents per cwt. from Omaha to Bulpitt. As a result of negotiations made by the I. A. A. transportation department with the Illinois Central and C. I. & M. railroads the C. I. & M. has granted rates of 33½ cents per cwt. on sheep from Omaha to Bulpitt, which becomes effective July 1, 1924. This reduction means a saving of 13 cents per cwt. to Bulpitt shippers.

Many farm bureau members are already getting in shape for the final "barnyard golf" contest to be held at the annual I. A. A. picnic at Lincoln, August 26. A silver loving cup is to be given to the champion horse shoe tosser.

Serum Association Saves Money For Illinois Farmers

During the year 1923, 22,000,000 cubic centimeters of hog cholera serum was used by Illinois farmers through the Illinois farm bureau serum association, which consists of 41 county farm bureaus. C. A. Stewart, director of the livestock marketing department of the I. A. A. and also a director of the serum association, estimates that between 25,000,000 and 28,000,000 cubic centimeters of serum will be sold through farm bureaus this year. Taking an average per hog of 60 cubic centimeters, 28,000,000 will vaccinate 500,000 hogs.

Along with the increase in the amount of serum used by Illinois farmers to prevent hog cholera is the unusual situation of a general decrease in the price. Before the farm bureau began to buy serum the general price was from $1.50 to $3.50 per 100 cubic centimeters. As a result of collective buying the Illinois Farm Bureau Serum association has been buying serum from several companies at prices ranging from 60 to 75 cents per 100 cubic centimeters and is now furnishing it to farmers at that rate through the county farm bureaus.

General Office Of I.A.A. Will Provide Supplies At Cost

J. H. Kelker, office manager of the I. A. A. office in Chicago, has added another activity to his list of duties. He has recently instituted a purchasing arrangement whereby office supplies such as stationery, carbon paper, stencil sheets and other office routine necessities, can be purchased through the central office at a considerable saving. County farm bureau offices have been notified of the service by Mr. Kelker, who says that office supplies as a rule are much cheaper in Chicago than in the other Illinois cities and that when large quantities are purchased, a considerable saving will result both for the I. A. A. central office and county farm bureaus. Quite a few orders have already been received, he reports.

AUDITING SERVICE INCORPORATED AND BY-LAWS ADOPTED

Temporary Board of Directors Elected; Producers Subscribe and Recommend Plan To Terminals

Continued progress marks the development of the newly formed auditing and business accounting service instituted by the Illinois Agricultural Association. The organization has been incorporated and by-laws have been adopted by the temporary board of directors, who are: Henry McGough, Maple Park, president; L. P. McMillen, Rock Falls, vice-president; H. J. Shafer, Illiopolis, director; O. B. Goble, Charleston, director; Geo. L. Potter, Pontiac, director. These directors will serve only until the time comes to elect permanent directors. The by-laws were approved by Donald Kirkpatrick, law counsel of the I. A. A., and have been printed in booklet form for dissemination to all local cooperatives in Illinois and others interested.

A membership contract was also written and approved which does not embody the requirement of a $200 payment for membership as was originally required. Vernon Vanimam, who has been meeting with various cooperative managers over the state during the last six weeks, reports that the representatives of the 37 local cooperatives whom he has addressed have practically unanimously favored a cooperative audit association like is proposed by the I. A. A.

Financed by I. A. A.

The by-laws provide that the Illinois Agricultural Association shall present at the annual meeting of the auditing association the names of one or more persons for the election, by the directors of a secretary and a treasurer who if accepted by the directors, shall be elected to fill these offices. Under this arrangement George A. Fox is temporary secretary and R. A. Cowles temporary treasurer. This clause in the constitution of the auditing association was deemed advisable, inasmuch as the I. A. A. is financing the new organization until it becomes self-supporting.

George Wicker is now on the job as general manager and has several audits to perform and is laying his plans to accommodate those co-ops which have asked for audits. One assistant is coming down from Minnesota to help Mr. Wicker take care of the actual auditing and other auditors will be added as rapidly as needed.

National Producers Sign

The National Livestock Producers' Association has subscribed to the new organization and has recommended the Illinois Agricultural Cooperatives Association auditing service to its 14 terminal markets. The Peoria Producers have applied for an audit and will be among the first to receive service. According to C. A. Stewart, livestock marketing director of the I. A. A., but who recently resigned to become executive secretary of the National Livestock Producers' Association, there will probably be four or five of the terminal Producer organizations subscribe, the others having arrangements for audits.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

Published twice a month by the Illinois Agricultural Association, 608 South Dearborn Street, Chicago, Illinois. Edited by Department of Information, H. C. Butcher, Director.

Entry as second class matter Oct. 10, 1921, at the post office at Chicago, Illinois, under the act of March 3, 1879. Acceptance for mailing at special rates of postage provided for in Section 1103, Act of October 3, 1917, authorized Oct. 31, 1921.

The individual membership fee of the Illinois Agricultural Association is five dollars a year. This fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record.

Let's Put the Tail on the Other End

On the next page is the report of R. A. Cowles, who represented the Illinois Agricultural Association at Washington, D. C. in behalf of the McNary-Haugen bill. Study the report carefully, then turn to the next page and scrutinize the map showing where the opposition came from. Notice the geographical majority of the agricultural regions. The tail is wagging the dog, as Mr. Cowles puts it, and that tail is on the Eastern end of the pup, too. Study the map.

—o—

Most Illinois Representatives Stand By Agriculture

It is gratifying to note the support given the McNary-Haugen bill by Illinois representatives. Every representative from an agricultural district, including the two representatives at large, but excluding Henry T. Rainey, representative from the 20th district, voted for the bill. Eight of the ten representatives from Chicago voted against and two were not present.

—o—

Council of War Called

Definite action for the future has not been determined by farm organization in general any further than to set July 17 and 18 as the dates for a general conference of all farm organizations at St. Paul, at which time a program for future legislative action will be discussed and some definite plans laid.

—o—

The Republican Pledge to the Farmer

Following is the agricultural plank of the Republican platform adopted at the Republican Convention June 14 at Cleveland, which is printed in the RECORD without political favor whatsoever and merely to inform the membership of the Illinois Agricultural Association what has been pledged for agriculture by the Republican party. When the Democratic platform is framed at the New York convention, those planks pertaining to agriculture will also be published in the RECORD. If a third party forms and a platform is formulated with parts pertaining particularly to agriculture, that also will be printed.

Agriculture

"In dealing with agriculture the Republican party recognizes that we are faced with a fundamental national problem, and that the prosperity and welfare of the nation as a whole is dependent on the prosperity and welfare of our agricultural population.

"We recognize our agricultural activities are still struggling with adverse conditions that have brought about distress. We pledge the party to take whatever steps are necessary to bring back a balanced condition between agriculture, industry and labor, which was destroyed by the Democratic party through an unfortunate administration of legislation passed as war time measures.

"We affirm that under the Republican administration the problems of the farmer have received more serious consideration than ever before both by definite executive action and by congressional action not only in the field of legislation but also in the enactment of laws to meet emergency situations.

"The restoration of general prosperity and the purchasing power of our people through tariff protection has resulted in an increased domestic consumption of food products while the price of many agricultural commodities are above the war price level by reason of direct tariff protection.

"Under the leadership of the President at the most critical time, a corporation was organized by private capital making available $100,000,000. to assist the farmers of the northwest.

"In realization of the disturbance in the agricultural export market, the results of the financial depression in Europe, and appreciating that the export field would be enormously improved by economic rehabilitation and the resulting increased consuming power, a sympathetic support and direction was given to the work of the American representatives on the European reparations commission.

"The revival in 1921, of the war finance corporation, with loans of over $300,000,000 averted in 1921, a complete collapse in the agricultural industry.

"We have established new intermediate credit banks for agriculture, and increased the capital of the federal farm loan system. Emergency loans have been granted to drought-stricken areas. We have enacted into law the cooperative marketing act, the grain futures and packer control acts; given to agriculture direct representation on the federal reserve board and on the federal aid commission.

"We have greatly strengthened our foreign marketing service for the disposal of our agricultural products. The crux of the problem from the standpoint of the farmer is the net profit he receives after his outlay. The process of bringing the average prices of what he buys and what he sells closer together can be promptly expedited by reduction in taxes, steady employment in industry and stability in business.

"This process can be expedited directly by lower freight rates, by better marketing through cooperative efforts, and a more scientific organization of the physical human machinery of distribution and by a greater diversification of farm products.

"We promise every assistance in the reorganization of the market system on sounder and more economical lines and, where diversification is needed, government assistance during the period of transition.

"Vigorous efforts of this administration towards broadening our exports market will be continued. The Republican party pledges itself to the development and enactment of measures which will place the agricultural interests of America on a basis of economic equality with other industry to assure its prosperity and success. We favor adequate tariff protection to such of our agricultural products as are threatened by competition. We favor, without putting the government into business, the establishment of a federal system of organization for cooperative marketing of farm products.

—o—

Is the Republican Platform Right for Agriculture?

The Illinois Agricultural Association recognizes the necessity for party machinery. However, it has no sentimental relationship binding it to any party. The allegiance of the Illinois farmer should rest on the principles for which any party stands and also on the commitments and character of individuals who aspire to positions of authority and upon whom the responsibility for carrying out platform declarations will rest. This applies to all officials from the President and Congressmen down. The platform of principles should be right. The individual seeking the support must be right to gain the confidence and support of the farmer.

Will It Help Conditions?

Is the agricultural plank in the Republican party right? Does it unreservedly commit the Republican party to the stabilization and the preservation of agriculture, our basic industry? The farmer's knowledge of his business and his recent intensive study of existing conditions places him in a position to appreciate the meaning of that part of the platform in which "The Republican party pledges itself to the development and enactment of measures which will place the agricultural interests of America on a basis of economic equality with other industry to assure its prosperity and success." The farmers have never asked for more than this, neither will they be satisfied with less. Nothing short of economic equality will save agriculture. This part of the plank could not have been improved much if it had been written by the farmers themselves.

Promises with Reservations

Our enthusiasm wanes somewhat when we read in the same paragraph—"We favor, **without putting the government into business,** the establishment of a federal system of organization for cooperative marketing of farm products."- **Putting the government into business is a catch phrase.** The socialist thinks of this catch phrase in terms of government ownership and operating of packing institutions, mills, etc. The farmer is not a socialist in any sense. He believes in individual efficiency but he realizes the necessity for government regulation of certain activities. He observes that the government has seen fit to extend its activities into the banking business, the railroad business as well as other activities. The farmer is determined that agriculture shall have economic equality and he will not balk at extending government activities even to the extent of putting the government into business the same way whenever and wherever it is necessary for the establishment of agricultural equality.

Slap at McNary-Haugen Bill

We cannot escape the inference that this phraseology is a slap at the McNary-Haugen bill. The present leaders of the Republican party could have passed this bill but did not see fit to do so. What will be the attitude of the party leaders in the future toward any measure which will effectively bring about equality for agriculture? It is pertinent to consider how much this phraseology has weakened the agricultural plank of the Republican party. It has been one of the arguments used by opponents of farm relief. Will these opponents and the Republican party hide behind this phraseology in the future? The agricultural interests of America will resist any attempt of the men who have no sympathy with agriculture to use this phrase as a smoke screen for their opposition to any measure extending government activities for the purpose of establishing agricultural equality.

THE LIARS' CONTEST

BURN, WE'RE RIGHT

Say, listen, you're right. I mean about the Irishman and the elevator, see, that you was telling about in the RECORD. How do I know? Say, I was runnin' that elevator at the time. We started from the top floor at two o'clock, stopped a couple dozen times to take on passengers, and it was five five when we stopped at the 45th floor and took on this here Irishman that saved himself by a standin' high jump. This is the first time I ever seen it in print, but it's the truest thing you know.—J. E. Willis, Decatur, Illinois.

COME INTO THE CORNER, EFFIE
Tell Dad to Run for the Senate

Dear Editor:—Could I qualify for the Liars' Corner? I am a farm girl eighteen years old. I have been a member of the Pike County Pig Club four years and the Poultry Club three years. Naturally I am interested in farm life and all organizations pertaining to it. I think the Farm Bureau is the best thing that ever came to the farmers' aid.

The above is true. Here is my entry in the contest:

My Dad joined the Farm Bureau and learned how to treat the soil for sweet clover. Then he planted a field of clover. When it was about a year old he wanted to see how far down the roots had gone, so he chose one of the smallest plants, which was only about ten feet high, and began digging. After about 200 feet he had to cut the roots, because it went through such a large vein of water that he was almost drowned before he could get out of the hole. He walled up the hole and now he has a splendid well with which he irrigates the whole farm, which is about 280 acres.

This experience made him more curious. He then hired a well driller to come and drill down by the side of the main root of the largest plant, which measured twelve inches in diameter and fifty fet high. They kept drilling and drilling until they came to the end of the root, which ended 3,000 feet down, in the center of the largest vein of oil that has ever been known. Now Dad has the most famous oil well in the world and he is twice as wealthy as John D. After this happened, all the farmers in Pike county and all the neighboring counties joined their Farm Bureaus, and now are planting their farms to sweet clover. They are all boosters of the Farm Bureau.—Effie R. Dorsey, Griggsville, Illinois.

THIS SOUNDS REASONABLE

Speaking of speed, old Hank Henneberry used to have the speediest threshing machine in those parts, and some say in the whole state. Only trouble was, old Hank was always bragging about his machine, so one day Bill Jones got tired of hearing him brag and made a bet that he couldn't thresh all the oats on the back eighty of Bill's farm in a day. Course old Hank took him up on it, and he made good, too. He threshed nigh 5,000 bushels of oats that day, but as luck would have it there was a grape vine tangled in the last bundle. Well sir, before they could stop that machine, forty acres of timber had been dragged into it, ground out and blown clean over to the edge of Podunkville. Bill sold that wood for fuel to the inhabitants of the town for more than enough to pay his bet and clear the mortgage on his farm besides.—Wm. T. Laughlin, Massbach, Illinois.

Come on, Illinois, with your lies! If you don't, we're going to tell some like they tell out in Kansas where the first song the tadpoles learn after they grow up to be frogs is, "How Dry I Am." That's a threat!

Cowles Analyzes McNary-Haugen Bill Defeat

I.A.A. REPRESENTATIVE TELLS INSIDE POLITICS AND DETAILS FOR FARM BUREAU MEMBERS

Cowles Says That All Farm Organizations Represented Worked in Harmony and United Accord; No New Action Determined.

The McNary-Haugen Bill—its consideration in the House of Representatives of the United States, Sixty-eighth Congress, First Session, with brief comment upon and some analysis of the vote by which the bill was defeated.

BY R. A. COWLES.

The purpose of this article is to properly inform our people, farm folks generally, and all friends who supported the bill "back home" as to its progress in Congress during the session just closed, its consideration in the House of Representatives, its defeat, and some of the causes and forces contributing thereto.

At the outset it should be stated that the Bill was drafted with the fullest expectation that the administration would sponsor the measure to the extent of supporting it; since the principles embodied in the bill had been under favorable consideration by the Secretary of Agriculture, Mr. Henry Wallace, for more than two years. Further, that the flexible tariff provision embodied, and those other provisions of the bill seeking to render effective the protective tariff on agricultural commodities of which surpluses over and above domestic consumptive demands are normally produced, were entirely consistent with principles of the protective tariff. It was also assumed with pardonable presumption by the proponents of the bill representing the central, west and northwest states, having consistently supported the various tariff bills from time to time, and particularly the high schedules on manufactured goods appearing in the present Fordney-McCumber Bill at the urgent request of the New England states and the East—that the McNary-Haugen bill, because of its very nature and the present emergency existing in agriculture, would have the general support of this group of states.

What actually happened?

COMMITTEES FAVORED IT

The bill was introduced in the Senate by Senator Charles L. McNary of Oregon and in the House by Representative Gilbert N. Haugen of Iowa and ordered printed and referred to the respective committees on Agriculture of the Senate and House, and by those Committees considered with unusual care and deliberation. The bill was in due course favorably reported to both houses of Congress. A minority report was also filed within the limit of time prescribed by the house rules.

After the bill was reported by the House Committee on Agriculture, considerable time elapsed before the proponents of the bill were able to secure a rule from the Rules Committee under which the bill might come before the House for consideration. This fact and other contributing evidences led the proponents of the bill to the belief that the administration did not favor the measure.

ORGANIZED AGRICULTURE BEHIND IT

So that you may know something about the united support of organized agriculture behind the McNary-Haugen bill, a statement formulated by its representatives in Washington, after having considered the subject matter in two consecutive meetings, was addressed to individual members of the Congress and released to the press Monday morning, May 19, 1924, appearing in the newspapers of the central and western states. Space does not permit of a repetition of the statement here. It reaffirmed the united support of agriculture to the measure and to the principles embodied in it. It was signed by the following organizations whose representatives were on the ground in Washington at the time:

T. C. Atkeson, Washington Representative, National Grange.
John G. Brown, President, National Live Stock Producers' Association.
Geo. G. Coale, Knox County, Indiana, Bankers.
Thomas E. Cashman, President, American Hereford Breeders Association Director, Minnesota Farm Bureau Federation.
S. H. Thompson, President, Illinois Agricultural Association.
R. A. Cowles, Treasurer, Illinois Agricultural Association.
Carl Gunderson, Director, South Dakota Wheat Growers Association.
William Hirth, President, Missouri Farmers Association.
C. W. Hunt, Secretary-Treasurer, Iowa Farm Bureau Federation.
Geo. C. Jewett, General Manager, American Wheat Growers Associated.
Fred I. Marshall, Secretary, National Wool Growers Association.
John D. Miller, President, National Cooperative Milk Producers Association.
F. W. Murphy, St. Paul Association and Northwest Campaign Committee for Promotion McNary-Haugen Bill.
J. F. Reed, Vice-president, Minnesota Farm Bureau Federation.
J. R. Riggs, Producers Commission Association of Indianapolis, Indiana.
C. G. Selvig, President, Minnesota Export Commission League.
Gray Silver, Washington Representative, American Farm Bureau Federation.
Wm. H. Settle, President Indiana Farm Bureau Federation.
Indiana Wheat Pool.
Indiana Dairy and Produce Association.
L. J. Tabor, Master, National Grange.
John Trumble, President Kansas Farmers Union.

During the session there were present for varying periods of time some seventy-eight representatives of farmer organizations working to secure the enactment of this legislation. They met on common ground and worked without exception in harmony. The bill had the united support of practically all farm organizations interested in the production and marketing of the commodities enumerated in the bill and was generally admitted and recognized to have such support.

ADMINISTRATION TURNS ITS BACK

Nevertheless, so far as I am informed no voluntary effort at any time was made in behalf or in the name of the administration to consider the bill or any of its provisions in council with those present representing farm folks and their organizations, and who presumably were informed at first hand as to the agricultural situation in the United States.

Under the rule secured for the consideration of the bill in the House, it was debated for fifteen hours. After concluding the debate, the bill was "read under five minute rule," section by section—during which, members of the House were permitted to offer amendments, speaking for five minutes upon each amendment. The entire consideration of the bill was hampered by persistent filibuster and consumed in all much time, parceled out, as other legislation on the calendar and appropriation bills came up for consideration, and intervened. Reading of the bill was finally concluded and all unfriendly amendments offered were either voted down, withdrawn or ruled out on point of order made. During both the debate and the reading of the bill it gained strength and support and should have passed in this session of Congress, now brought to a close.

The first real test of strength came when the reading of the bill was concluded on Saturday evening, May 31st—the opponents forcing adjournment and defeating a vote on the bill at that time. Representative Longworth from Ohio, majority leader in the House, having given notice earlier in the day that at the conclusion of the reading of the bill on that day, vote on the bill should go over until Monday or Tuesday, such motion was offered and prevailed.

INDIVIDUAL SUPPORT ONLY

The bill was sponsored by no political party in Congress, and its only friends in Washington were those members of Congress who recognized its real merit and loyally supported it, as did also Secretary of Agriculture, Henry Wallace, so far as his position in the cabinet permitted.

The bill admittedly had sufficient individual support so that the administration, had it seen fit, might have secured its passage in the House and final enactment into law, as a great piece of constructive legislation for the immediate benefit of the people of the whole United States.

Its defeat cannot be justified upon any grounds and can only mean a continuation of subsidy to industry under prevailing Fordney-McCumber high tariff schedules at the expense of agriculture.

The representatives of the several farmers' organizations in Washington, by appointment at their request, met Mr. Longworth, the Majority leader in the House, and other administrative leaders—the Steering Committee—and discussed possible compromises that might be made in the bill, as to commodities, maximum duration of the life of the corporation, and authorized capital; so that the administration might get behind such a bill. Nothing was accomplished, and no compromise of the principles of the McNary-Haugen Bill were entertained by its friends.

BIG BUSINESS OPPOSES

The National Chamber of Commerce, headed by Julius Barnes, the American Bankers Association, "Wall Street," the Grain Exchanges and other large business and financial interests speaking through these organizations and their associated and federated groups in the larger cities, covered the Country, directly and through their metropolitan press, with propaganda against the bill—unfounded and unsupported by the provisions of the measure. Let the whole country know and realize that an organized group of the great city financial and business interests, solely in the selfish interest of a relatively very small number of their people, blocked the passage in Congress of our bill, in which the well being and living of hundreds of thousands of farm people was at stake. Surely there should be no underestimation or misunderstanding of the situation now. The record is before you. The vote by which your bill was defeated—your analysis must bring you to the same conclusion, all.

On the other hand, large numbers of our "down state" bankers, business and professional men and others, and their organizations and the down state press in Illinois, and in the mid-west, west, north and north-west sections supported the bill and urged its passage in Congress. Rural America with its friends from those sections of the country, in a united effort must carry the fight to a finish. The fight must be carried to Congress. Relief must come through corrective legislative enactment; because a great defect is apparent in our economic structure, directly attributable to and growing out of legislative enactments secured through the efforts and in the behalf of Industry and Labor—favoring these groups to the great disadvantage of Agriculture.

The Agricultural situation in this country is fundamentally and immediately due to this defect—whatever minor causes may be thought to exist.

It must be equally obvious that favorable consideration at Washington, of the problems of agriculture can only come from an administration reliably informed, conscious of the existing emergency—actually solicitous. Those engaged in Agriculture, as producers, speaking as they must through their active representative organizations, can be presumed to know best the condition and present situation in their industry—and not a mere handful whose sole interest in agriculture is centered in the revenue to be derived to them from handling and dealing in the commodities of agriculture, and in which costs of production and fair exchange values are entirely disregarded—under the present order of things.

PRINCIPLES WILL NOT DOWN

The principles, embodied in the McNary-Haugen bill, will not down. Agriculture demands equality with industry and labor under our protective system which so operates under prevailing conditions as to favor other major classes at the expense of agriculture.

It is too early for us to make definite recommendations for immediate procedure. We shall wait until the platforms of the major political parties are made public. We desire now to assure our members and friends that we are in the fight to the finish to secure for agriculture equality with Industry and Labor.

During the interim members and friends are urged to ascertain the attitude of candidates for public office toward our basic industry—Agriculture.

Following is an analysis of the vote by states, and by groups of states:

VOTE ON THE BILL BY STATES

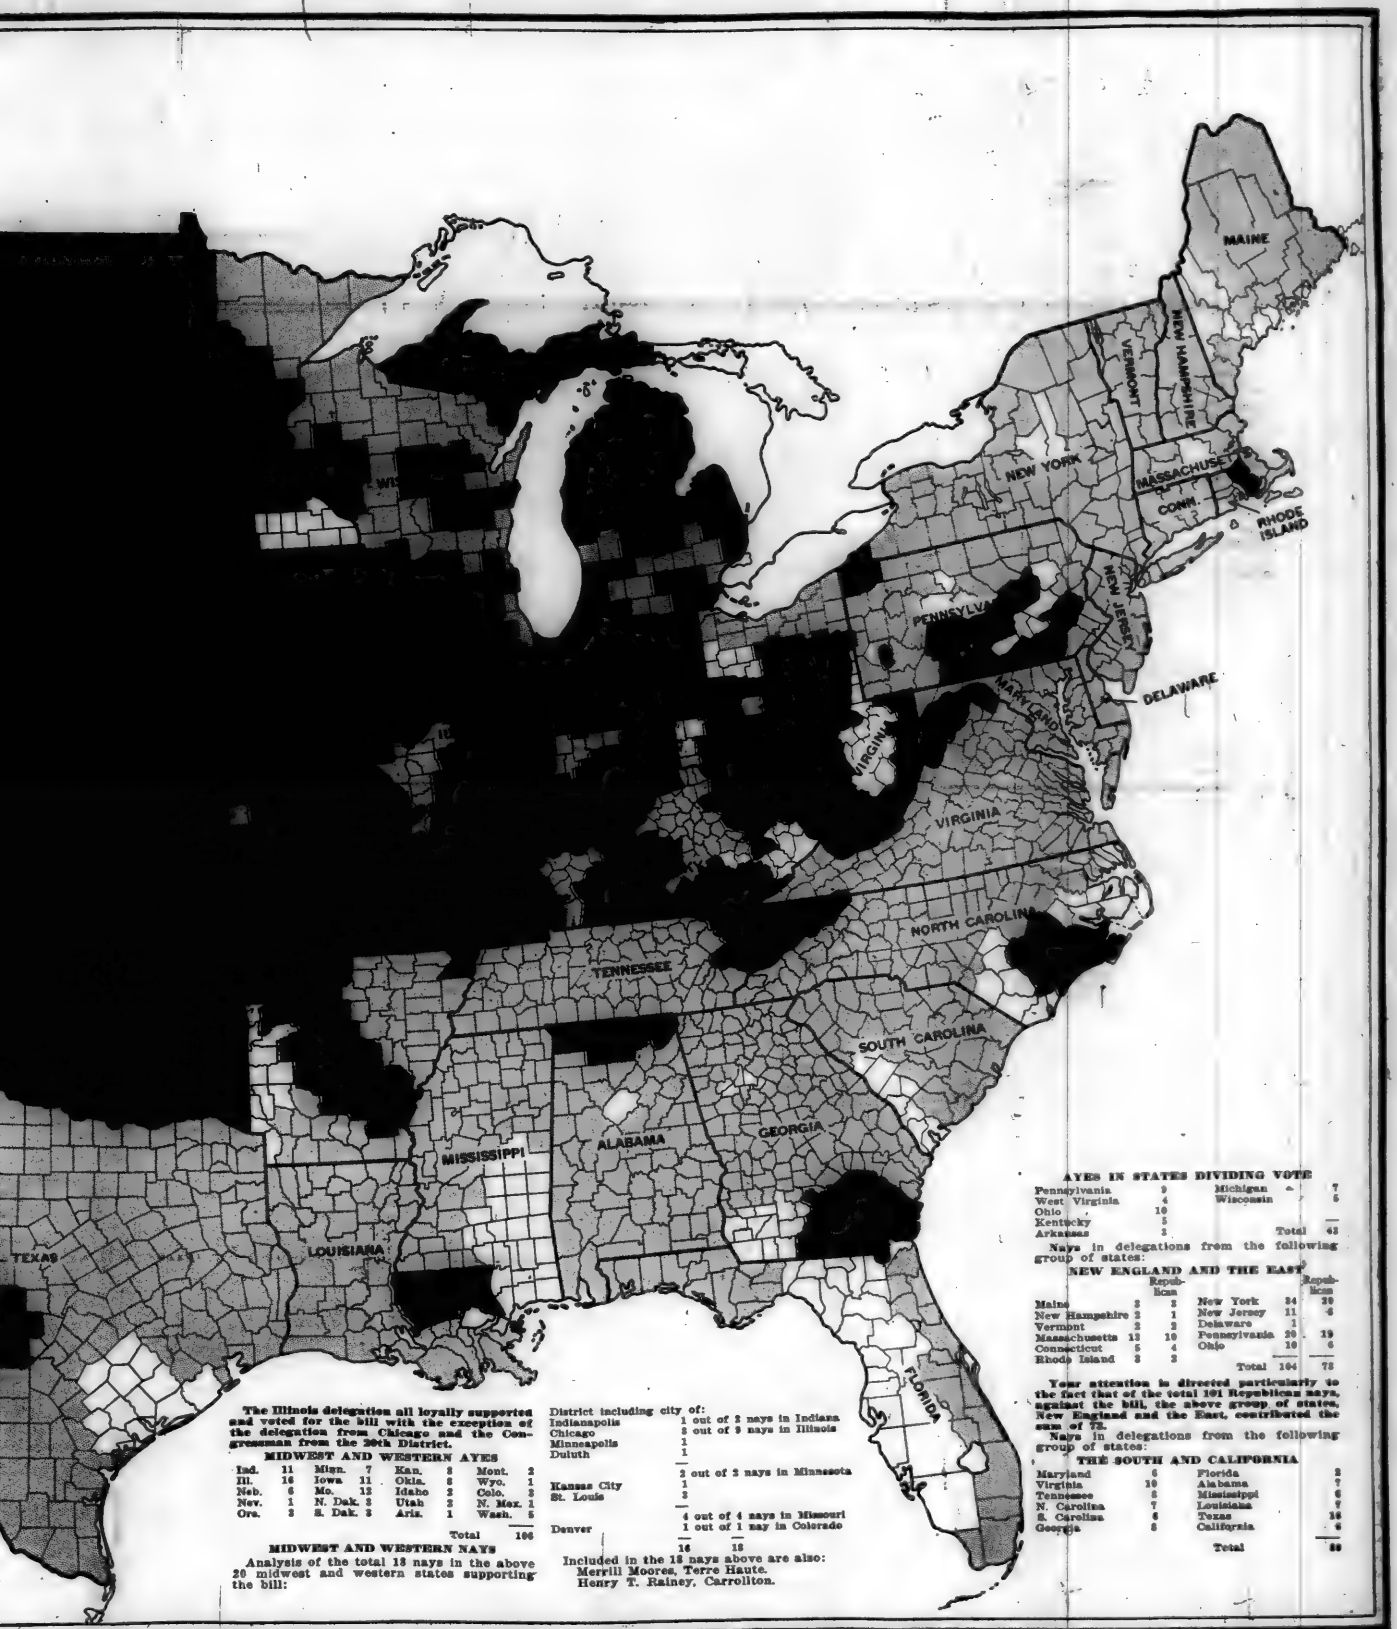
ALABAMA

District	Yeas	Nays	Not Voting	Residence
1		McSwain		Huntsville
2		Hill		Montgomery
3		Bankhead		Ozark
4		Jeffers		Anniston
5		Bowling		Lafayette
6		Oliver		Tuscaloosa
7			Allgood	Allgood
8	Almon			Tuscumbia
9		Huddleston		Birmingham
10		Bankhead		Jasper

ARIZONA

	Harden			Phoenix

ARKANSAS



1		Driver		Osceola
2		Oldfield		Batesville
3	Tillman			Fayetteville
4			Wingo	DeQueen
5	Eagle			Clarksville
6	Reed			Leachs
7		Parks		Hope

(Continued on page 6)

Here's How McNary-Haugen Bill Was Defeated

ted Red—For; Blue—Against; White—Not Voting

The Illinois delegation all loyally supported and voted for the bill with the exception of the delegation from Chicago and the Congressman from the 20th District.

MIDWEST AND WESTERN AYES

Ind.	11	Minn.	7	Kan.	8	Mont.	2
Ill.	16	Iowa	11	Okla.	8	Wyo.	1
Neb.	6	Mo.	13	Idaho	2	Colo.	3
Nev.	1	N. Dak.	3	Utah	2	N. Mex.	1
Ore.	3	S. Dak.	3	Ariz.	1	Wash.	5

Total 106

MIDWEST AND WESTERN NAYS

Analysis of the total 18 nays in the above 20 midwest and western states supporting the bill:

District including city of:	
Indianapolis	1 out of 2 nays in Indiana
Chicago	8 out of 9 nays in Illinois
Minneapolis	1
Duluth	1
	2 out of 2 nays in Minnesota
Kansas City	1
St. Louis	3
	4 out of 4 nays in Missouri
Denver	1 out of 1 nay in Colorado
	16 18

Included in the 18 nays above are also:
Merrill Moores, Terre Haute.
Henry T. Rainey, Carrollton.

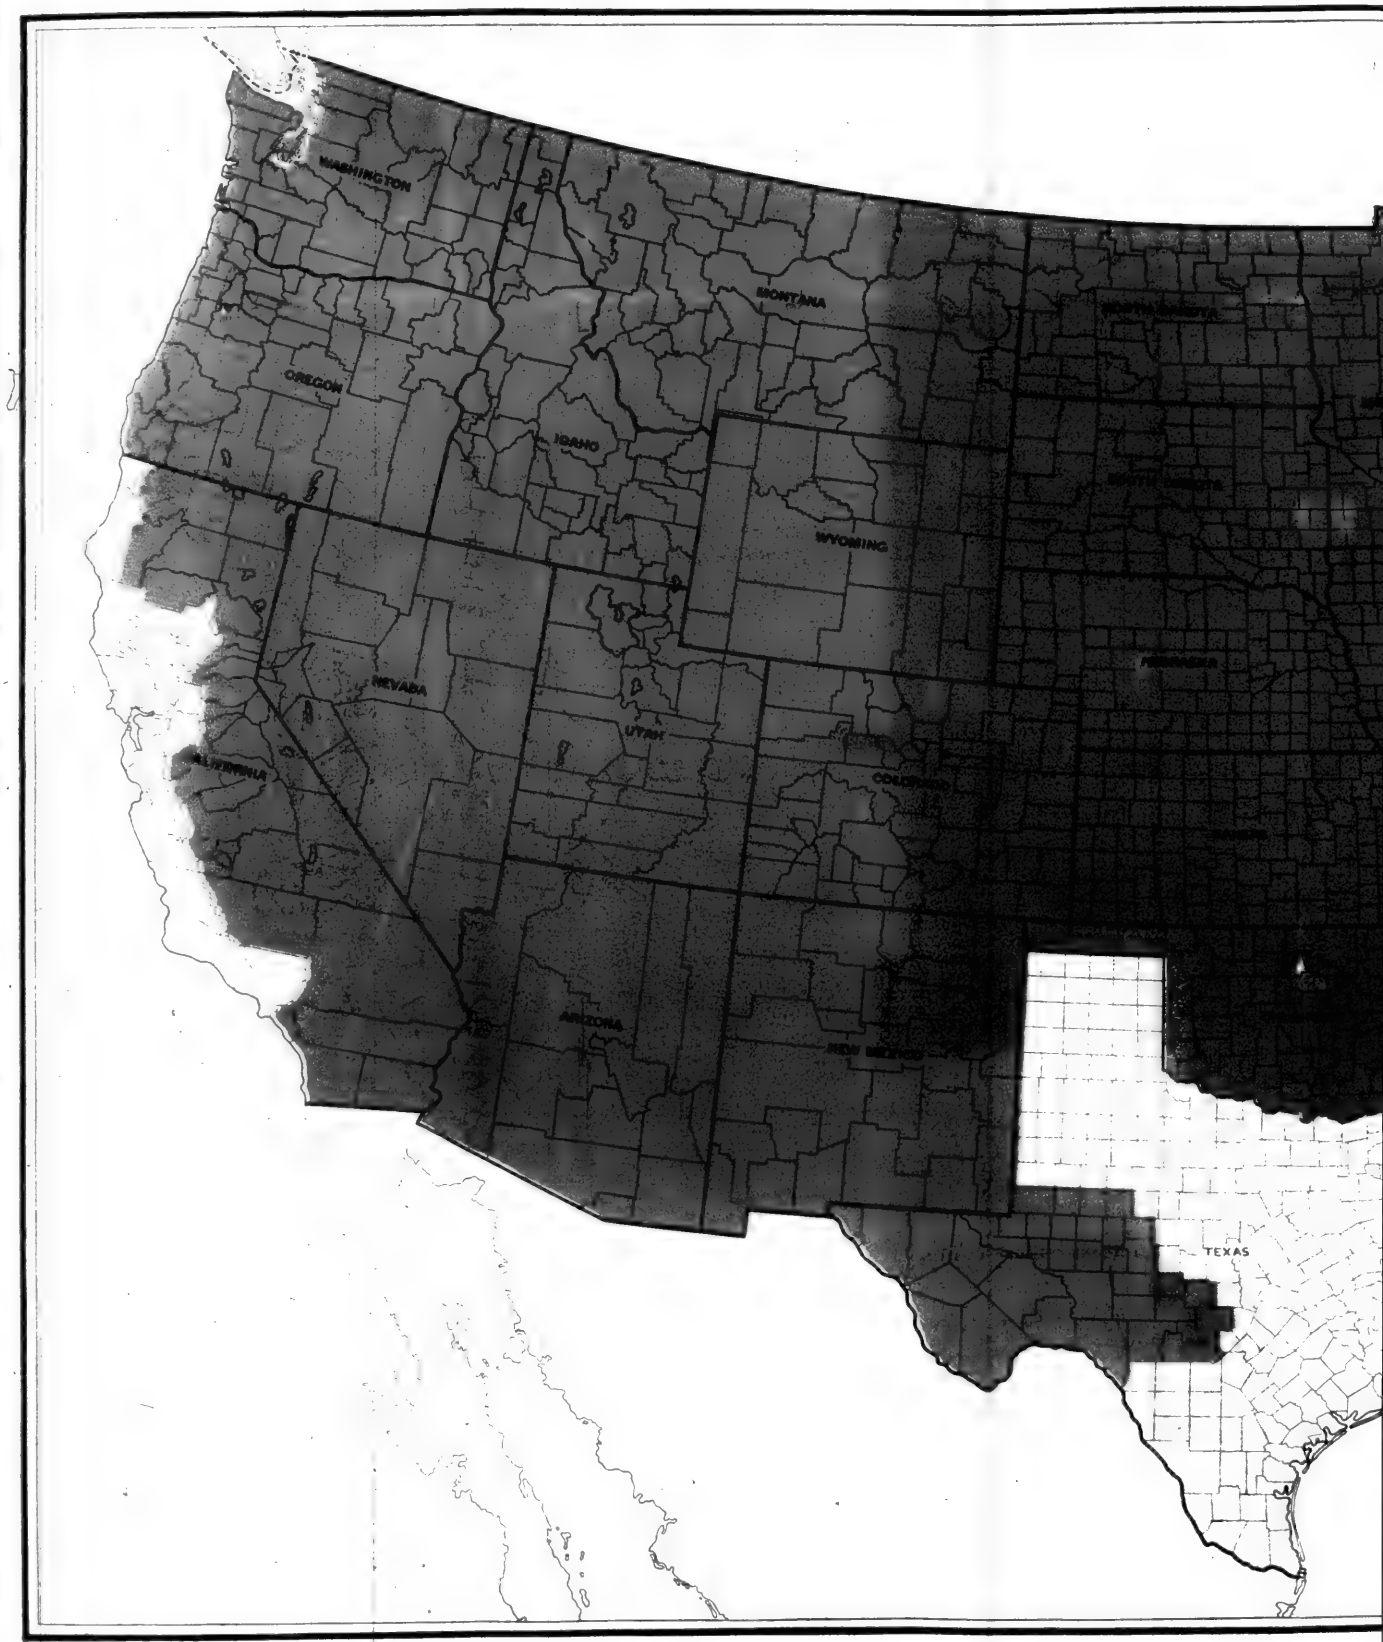
AYES IN STATES DIVIDING VOTE

Pennsylvania	9	Michigan	7
West Virginia	4	Wisconsin	6
Ohio	10		
Kentucky	5		
Arkansas	3	Total	43

Nays in delegations from the following group of states:

NEW ENGLAND AND THE EAST

	Republican			Republican
Maine	3	2	New York	34	20
New Hampshire	2	1	New Jersey	11	4
Vermont	2	2	Delaware	1	
Massachusetts	13	10	Pennsylvania	29	19
Connecticut	5	4	Ohio	10	6
Rhode Island	3	2			
			Total	104	75



Your attention is directed particularly to the fact that of the total 101 Republican nays, against the bill, the above group of states, New England and the East, contributed the sum of 72.

Nays in delegations from the following group of states:
